### Free text (Other locations?)

Inside halls and classrooms of A, N, and S buildings for easy access between classes and even IN classes (to access files for presentations, group projects, etc. that may be saved on campus cruiser).

Lobbies of all campus buildings that have benches.

I think there should be hotspots in all the classrooms, to allow students to access class material on the internet.

McKeithan Center seating area, 2nd floor.

Courtyard by Schwartz Center, maybe picnic tables on lawn between N and Coastline Inn, & Grassy area in front of W Would this also include being able to get online in each classroom?

McKeithan Center, 2nd Floor Seating Area

Inside N, A, and S buildings for student use inside of class.

Eventually in all the lounge areas on each floor.

2nd floor of the main building at north campus in the seating area
In the classrooms. The internet is an important learning tool especially in classes in which teachers use online power point presentations. It would be wonderful to simply add notes to them as the teacher goes along. Also, in classes where there are online handouts, it would save paper if students were simply allowed to view them in class as they are needed.

E Building

...at the end of the halls (where the benches and seating areas are) on each floor in A, S, and N

The board room in the GAB, though this would be more for staff than student or faculty.

North Campus Applied Technologies Building, 1st floor break room (vending machines)

all of North Campus

I am so happy that we are getting wireless access so now i can do more studying in the library and be able to use the computer at the same time that i think all the location are covered.

between building S and building W

Courtyard beside Schwarz Center

with advancements in wireless servers and receivers having a link to the campus internet should not be a problem

Inside McLeod, esp. 5th & 6th floors

If you could get it to hit the coffee shops that would be great also.

downtown campus library

Inside classrooms.

Outside behind the NA building.

ALL LOCATIONS ON EVERY CAMPUS. THIS IS THE YEAR 2006 AND I/WE(THE STUDENT BODY) AGREE THAT WE SHOULD BE ABLE TO ACCES THE INTERNET EVERYWHERE ON CAMPUS!

The Art building E. We need it badly!

river front behind W building

E BUILDING, Artists need the internet too!

Maybe on each floor at the North Campus???:) Seriously, I would use it WHEREVER POSSIBLE!!!!!!!!!

Student parking lots, MOST IMPORTANTLY: ALL classrooms; access to the Internet is critical!!!!!!!

maybe even around the parking lot in case someone needs to use it right before they leave their car if they don't want to have to bring their computer into school with them. Computers tend to be heavy and with the book load, one doesn't always want to lug it around school with them if they don't have to.
I think all the classrooms should have WiFi access. Having access everyone on campus will only help students in their educational development.

Near the Workforce training center would be great to.

outdoor areas behind McKeithan center

The smoking area at the end of the applied tech building at the north campus where the benches are.

Is it possible to configure class rooms in?

Everywhere!

Admissions/Registration/Financial Aid building 1st floor.

McKeithan Center, 2nd floor

I think it is a vital step to expanding what CFCC can offer their students. It is also an important part of globalizing our society.

In the lobby areas of the northcampus..like directly when you arrive at the top of each stair case, where the benches are..and also the sitting areas on each floor..this would be terrific!

Just put in all the campuses, so it will be easy to connect no matter where we are!!!!!!!!!!!!!!!!!!

"L" Building LRC

In the cosmetology building

### 3. What kinds of wireless devices would you bring to campus to access the internet at these hotspots? (Check all that apply.)

Sony PSP
apple notebook with airport
PSP
None
Wi-Fi enabled cellular device
I do not own a wireless device.
apple airport

4. Any comments or suggestions?

Free text
Make sure they are decently secured. Perhaps needing to log on to monitor.

Have access limited to students, faculty, and staff only. CFCC issued ID number must be used to gain access to internet.

PLEASE bring WiFi as soon as possible! I have heard some of the professors talking about using Port City Java's wireless access due to cramped office conditions and the need to use their laptops. I, as a full-time student, would definitely use the WiFi connection every single day of class. This would be VERY helpful and a great selling point for new students!!

You shouldn't count faculty surveys --- we have lots of access right now.

I think a wireless connection on the campuses is nearly a must in our day and time. I have online classes as well as in school classes (North Campus) and it would be so helpful for me to be able to access the internet with all my stored information while at school instead of having to use the library or computer lab. This would also free up many of the library computers that can get full from time to time.

This would be awesome!!

Please do this with a timely manner.

This would be great and it will help with the overcrowding in the learning lab.

I think it would be great to have WiFi, I am taking classes online and in person. I have an hour break most days and it would be great to be able to sit in the cafeteria, eat some food and work on my assignments for my online classes. Especially since they don't allow food or drink in the library. THIS is very exciting!!

Offer this at no cost

This is a very good idea, it would free up a lot of the computers in the learning lab (both of them) and give students more flexibility to accomplish work, no more saying "its too nice to be inside doing homework". I hope you can actually accomplish this in a good time frame, its a great idea.

I am so glad this is in the works! I would buy from the cafeteria more than Port City Java or other places downtown if WiFi was available on campus. Would this also include being able to get online in each classroom?
Great idea!

Consider WIFI access in classroom areas as well

Hurrry!

Wireless access would be great!! I would be able to sit and do homework in between other classes instead of sitting around waiting for class to start!!!

It would be more than greatly appreciated if there were wireless internet in Building L-cafeteria and in the library ASAP!

North campus needs an ATM machine, downtown has one, why can’t we.

This is a wonderful opportunity for a long-needed technological breakthrough to be welcomed into Cape Fear Community College’s campuses!

That would be great...and VERY helpful between classes when waiting hours at the time for the next one!!!

How about being able to take your midterms or finals on these, will that be able to ever take place if you are an internet course taker? I know now you have to come to the campus to take the test and that is what distance learning is - off campus. I like the idea though it sounds like a great thing to offer especially since CFCC is growing and there are not enough computers in the learning lab to accommodate everyone all the time.

I would definately use the wireless internet. To do research and papers on my lap top i have been going to Port City or Soapbox, which is somewhat of an inconvenience. I think students would greatly benefit from this.

This is very exciting! Bring it on ASAP!

Great incentives for the students.

look forward to the service

Over 70% of my classes are web-oriented. Wireless access would be a tremendous asset in this.

Yes by getting wireless internet, it would cut down the traffic of the computer lab..yes do you know when it will take a affect.

good idea

laptops for use in the library, that the school provides.

I think that having wireless internet connections around campus is a great idea.

i was just thinking that the school should have internet acess this morning and think that this is a great idea!!

make sure you have a good wireless modem system set up so it doesn’ constantly break down!

It's great your considering this and I hope it all goes through.

make it free and easy to access
This needs to be done before final exam time. Also we should be able to send data from a laptop to the printing station in Library or LRC to cut down on end of semester congestion. Also the LRC needs to recognize that cfcc students are serious about their education and needs to be open to at least ten throughout the semester and until midnight during the end of semester. Let us not forget this is a college that transfers credits, so if UNCW offers it cfcc should to. Also there are more nontraditional students at cfcc who have to work during the day, so reasonable nighttime hours are a must.

I think the money would be better spent on an on-line registration method because TRAC is a nightmare.

I don't have wireless devices at this time.

That to register for access, use campuscruiser to send in the info and get the required access info for the network

awesome idea for the students - thank you

need to have in the library and food court

This would be a big help and offer me more time to work on stuff for class using my laptop in between classes instead of switching between computers and flashdrives.

THIS IS THE YEAR 2006 AND I/WE(THE STUDENT BODY) AGREE THAT WE SHOULD BE ABLE TO ACCESS THE INTERNET EVERYWHERE ON CAMPUS!

I would absolutely love to the WiFi around the campus, especially the Art building E, it would make my life a lot easier!

I'm really looking forward to this service! It'll help my research greatly.

I dont attend classes at the North Campus. Therefore, i am much more concerned with the wireless internet being installed at the downtown campus.

Don't own device to be able to utilize such wireless access

AWESOME! THANK YOU FOR OFFERING THIS OPPORTUNITY! I am a "Laptop nerd" and I cannot do ANY work without it (even taking notes in class). having wireless access is the BEST thing EVER at CFCC!

good idea

do this quickly..please!!!!

Students NEED internet access in classrooms!!!

It's about time that all the areas of hiring learning, and recreational areas have this access.

Thankyou

It would be very uselfull if the school was entirely wireless networked.

please hurry with the wi-fi!

Anywhere that there is a wireless connection would be great on the North Campus. Students would change their habits to go where a connection is.
In my opinion this is a great idea and something I have wanted to have on campus for a long time. I take notes on my laptop since I type faster than I write. As a student in the nursing program, it would ease things for me in terms of downloading my notes from my instructors.

Should prove to be a most beneficial upgrade!

I think this is a great idea....

It is long overdue. I am glad CFCC is finally ushering the new era of wi-fi. Wires are for noobs.

good idea!

Great idea!

Why don't you just make the whole campus wifi like UNCW has done?

Very excited about wifi at cfcc. Please implement it.

Great Idea Thank you!

Thanks for doing this! Keep up the good work

we def need wireless capability! It is a must it would benefit the students in all aspects!

Wireless is really really good. We should put it in as many places as possible.

i think it is a great idea

Excellent idea. Hope it pans out!

cfcc is way behind in this department. wireless internet will allow students to more easily use thier own computers for research, email, and whatever other buisness they have while on campus. PLEASE GIVE US WIFI!!!!!!!!!!!!

I don't think offering this service outside of any building is such a good idea. Myself I have a problem working on anything if there is to much noise around like being outside near the noise of traffic.

ASAP

I would love to have wireless access on campus!

This would really be great..Thanks a lot!!

The fast it is done the better CFCC will look to businesses!!!!!!!!!!!

Wireless would be awesome!!

Having wireless access on campus would be a great oppurtunity for students to do more work!!

WIFI would be VERY HELPFUL!!!
