

ASSOCIATE IN GENERAL EDUCATION

A.G.E. DEGREE (A10300)

The Associate in General Education (AGE) curriculum is designed for individuals who wish to broaden their education, with emphasis on personal interest, growth, and development. The two year General Education program provides students opportunities to study English, literature, fine arts, philosophy, social science, and science and mathematics at the college level. All courses in the program are college-level courses which can be selected based upon a student's personal interests rather than specific technical or professional requirements. Many of the courses are equivalent to college transfer courses; however, the program is not principally designed for college transfer.

Semester Hour Credits

I. General Education Courses

ENG 111	Expository Writing.....	3
ENG 114	Professional Research and Reporting	3
	Humanities/Fine Arts Elective	3
	Social/Behavioral Sciences Elective.....	3
	Natural Sciences/Mathematics Elective.....	3

II. Major Courses

CIS 110	Introduction to Computers.....	3
	or	
CIS 111	Basic PC Literacy	2
	Free Electives.....	47

Free electives may be any college transfer or vocational technical course as selected by the student and approved by the student's advisor. CJC 100 and TRP 100 do not meet the requirements for this degree.

No financial assistance is available for free elective courses taken from curriculum programs that are ineligible for financial aid. Additional information is available in the Financial Aid Office.

Total Credits64/65

ASSOCIATE IN APPLIED SCIENCE, DIPLOMA, AND CERTIFICATE PROGRAMS

Accounting

A.A.S. DEGREE (A25100)

DIPLOMA (D25100)

CERTIFICATE (C25100)

Associate in Applied Science Program

The Accounting curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in the accounting profession. Using the language of business, accountants assemble and analyze, process, and communicate essential information about financial operations.

In addition to course work in accounting principles, theories, and practice, students will study business law, finance, management, and economics. Related skills are developed through the study of communications, computer applications, financial analysis, critical thinking skills, and ethics.

Graduates should qualify for entry-level accounting positions in many types of organizations including accounting firms, small businesses, manufacturing firms, banks, hospitals, school systems, and governmental agencies. With work experience and additional education, an individual may advance in the accounting profession.

Air Conditioning, Heating, and Refrigeration Technology

DIPLOMA (D35100)

CERTIFICATE (C35100)

Diploma Program

The Air Conditioning, Heating, and Refrigeration Technology curriculum provides the basic knowledge to develop skills necessary to work with residential and light commercial systems.

Topics include mechanical refrigeration, heating and cooling theory, electricity, controls, and safety. The diploma program covers air conditioning, furnaces, heat pumps, tools, and instruments.

Diploma graduates should be able to assist in the start-up, preventive maintenance, service, repair, and/or installation of residential and light commercial systems.

Architectural Technology

A.A.S. DEGREE (A40100)

Associate in Applied Science Program

The Architectural Technology curriculum prepares individuals with knowledge and skills that can lead to employment in the field of architecture or one of the associated professions.

Students receive instruction in construction document preparation, materials and methods, environmental and structural systems, building codes and specifications, and computer applications as well as complete a design project. Optional courses may be provided to suit specific career needs.

Upon completion, graduates have career opportunities within the architectural, engineering, and construction professions as well as positions in industry and government. At participating universities, graduates may continue their education toward a bachelor's degree in related fields.

TECHNICAL & VOCATIONAL PROGRAMS

Autobody Repair

DIPLOMA (D60100)
CERTIFICATE (C60100)

Diploma Program

The Autobody Repair curriculum provides training in the use of equipment and materials of the autobody repair trade. The student studies the construction of the automobile body and techniques of autobody repairing, rebuilding, and refinishing.

The course work includes autobody fundamentals, industry overview, and safety. Students will perform hands-on repairs in the areas of non-structural and structural repairs, mig welding, plastics and adhesives, refinishing, and other related areas.

Graduates of the curriculum should qualify for entry-level employment opportunities in the automotive body and refinishing industry. Graduates may find employment with franchised, independent garages, or they may become self-employed.

Automotive Mechanics (Automotive Systems Technology)

A.A.S. DEGREE (A60160)
CERTIFICATE (C60160A)

Associate in Applied Science Program

The curriculum prepares individuals for employment as automotive service technicians. It provides an introduction to automotive careers and increases student awareness of the challenges associated with this fast and ever-changing field.

Classroom and lab experiences integrate technical and academic coursework. Emphasis is placed on theory, servicing and operation of brakes, electrical/electronic systems, engine performance, steering/suspension, automatic transmission/transaxles, engine repair, climate control, and manual drive trains.

Upon completion of this curriculum, students should be prepared to take the ASE exam and be ready for full-time employment in dealerships and repair shops in the automotive service industry.

Basic Law Enforcement Training

CERTIFICATE (C55120)

Certificate Program

The Basic Law Enforcement Training curriculum Certification Examination mandated by the North Carolina Criminal Justice Education and Training Standard Commission and/or it prepares individuals to take the Justice Officers Basic Training Certification Examination mandated by the North Carolina Sheriff's Education and Training Standards Commission. Successful completion of the curriculum certificate program requires that the student satisfy the minimum requirements for certification by the Criminal Justice Commission and/or the Sheriff's Commission. The student satisfactory completing this program should possess at least the minimum degree of general attributes, knowledge, and skills to function as an inexperienced law enforcement officer.

Job opportunities are available with state, county, and municipal governments in North Carolina. In addition, knowledge, skills, and abilities acquired in this course of study qualify one for job opportunities with private enterprises in such areas as industrial, retail, and private security.

Students who successfully complete the BLET Program can receive credit for CJC 120, CJC 131 and CJC 221.

CJC 100 - Law Enforcement Training

Prerequisite: Sponsorship letter required, approval of Director, and Reading Score of 39 on ASSET, 57 on CPT or better.

The following items are required for admission to the BLET program:

- Must be at least 20 years of age
- Must have a valid North Carolina driver's license
- Must submit a Medical Examination Form completed by a North Carolina licensed physician
- Must provide a Certified Criminal History Check report
- Must be a citizen of the United States

This course is designed to provide the student with basic skills and basic knowledge necessary to perform those tasks essential to function in law enforcement. The course consists of 624 hours of instruction in the following topic areas:

Course Orientation	4
Physical Fitness Training	54
Ethics of Professional Law Enforcement	4
Arrest, Search & Seizure/Constitutional Law	28
Elements of Criminal Law	24
Communication Skills for Law Enforcement Officers	8
Law Enforcement Radio Procedures & Communication Systems	8

Boat Building (Wooden)

DIPLOMA (D35120)
CERTIFICATE (C35120)

Diploma Program

The Boat Building program prepares individuals for employment in the boat manufacturing and repair industry. Today's boat builders are skilled craftspeople who can create complex shapes out of a wide variety of materials.

Course work includes reading marine blueprints, lofting, constructing bird cages, building forms, and the safe and proper use of hand and power tools. Wood and composite boat building, production moldmaking, and interior cabinetry and joinery are also covered.

Graduates may find employment with yacht manufacturer's or with other companies needing wood furniture or moldings fabricated and installed. Other employment opportunities can be found in the fiberglass industry and in boat maintenance and repair yards.

Boat Manufacturing and Service

DIPLOMA (D60330)

Diploma Program

The Boat Manufacturing and Service Technology program prepared students for employment in the manufacture and service of boats. Students learn the basics of boat design and the implementation of those designs in various components and/or complete boats or yachts.

Course work Includes reading and interpreting blueprints, manuals, and other documents common to the industry; lofting; constructing forms and mold-making; application of concepts and techniques in composite, fiberglass, and wood; interior finishing; and marine mechanical, electrical, and plumbing systems.

Graduates may find employment with boat/yacht manufacturers, service yards, dealerships doing commissioning work, and companies doing custom boat building.

Business Administration

A.A.S. DEGREE (A25120)

CERTIFICATE (C25120B)

Associate in Applied Science Program

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Chemical Technology

A.A.S. DEGREE (A20120)

Associate in Applied Science Program

The Chemical Technology curriculum prepares individuals for work as analytical technicians in chemical laboratories associated with chemical production, environmental concerns, pharmaceuticals, or general analysis.

Course work includes general chemistry, organic chemistry, introductory chemical engineering, qualitative analysis, and quantitative analysis, including such instrumental techniques as spectroscopy (UV-Vis, IR, AA) and chromatography (GC, LC, IC). Students also utilize computerized data collection, reduction, and graphic presentation.

Graduates should qualify as entry-level chemical laboratory technicians. Their duties may include chemical solution preparation, raw material, product, or environmental sampling, and/or sample testing via wet chemistry or instrumental techniques. All Chemical Technology students must complete American Red Cross certification or equivalent in First Aid and Adult Cardio-Pulmonary Resuscitation (C.P.R.) for graduation.

Community Spanish Interpreter

A.A.S. Degree (A55370)

Diploma (D55370)

Certificate (C55370)

Note: The program is listed for information only. CFCC is only offering limited classes at present. Check with the Public Service Department Chair for current status.

Associate in Applied Science Program

The Spanish Interpreter curriculum prepares individuals to work as entry-level bilingual professionals who will provide communication access in interview and interactive settings. In addition, this curriculum provides educational training for working professionals who want to acquire Spanish language skills.

Course work includes the acquisition of Spanish: grammar, structure, and sociolinguistic properties, cognitive processes associated with interpretation between Spanish and English; the structure and character of the Hispanic community; and acquisition of communication skills.

Graduates should qualify for entry-level jobs as para-professional bilingual employees in educational systems or a variety

TECHNICAL & VOCATIONAL PROGRAMS

of community settings. Individuals may choose from part-time, full-time, or self-employment/free-lance positions, or apply language skills to other human service related areas.

Community Spanish Interpreter Certificate Program

The certificate is designed to provide persons with Spanish-speaking experience (native or otherwise) the opportunity to further improve their proficiency and especially for native speakers to hone their reading and writing skills in their native language. In addition, actual practice interpreting and a co-op within the community are included as the students choosing this curriculum already have proven proficiency through SPA 212 and have skills equivalent to the basic certificate described above before beginning this advanced certificate and will be better equipped to facilitate communication between Spanish-only and non-Spanish-speaking members of the community.

CERTIFICATE-WEB DEVELOPMENT (C40160W)

Associate in Applied Science Program

The Computer Engineering Technology curriculum provides the skills required to install, service, and maintain computers, peripherals, networks, and microprocessor and computer controlled equipment. It includes training in both hardware and software, emphasizing operating systems concepts to provide a unified view of computer systems.

Course work includes mathematics, physics, electronics, digital circuits and programming, with emphasis on the operation, use, and interfacing of memory and devices to the CPU. Additional topics may include communications, networks, operating systems, programming languages, Internet configuration and design, and industrial applications.

Graduates should qualify for employment opportunities in electronics technology, computer service, computer networks, server maintenance, programming, and other areas requiring a knowledge of electronic and computer systems. Graduates may also qualify for certification in electronics, computers, or networks.

NETWORKING

Certificate Program

The Computer Engineering Networking Certificate program prepares students to understand networking technologies. This curriculum develops operating skills needed to successfully manage and support networking technologies.

Course work includes hands-on experience with networking electronics, operating systems, internet technologies, LANS,

TECHNICAL & VOCATIONAL PROGRAMS

and server configuration and management. Classes cover fundamentals of networks, installation and management of network operating systems, troubleshooting, and network administration responsibilities.

Graduates should qualify for entry level positions such as Computer Repair Technician, Computer Technician, Hardware/Software Installer, Network Technician, Network Administrator, Network Installer, and Network Support Specialist. Graduates are prepared to sit for certification exams that may result in industry-recognized credentials.

Computer Information Technology

A.A.S. DEGREE (A25260)
 CERTIFICATE (C25260)

Associate in Applied Science Program

The Computer Information Technology curriculum is designed to prepare graduates for employment with organizations that use computers to process, manage, and communicate information. This is a flexible program, designed to meet community information systems needs.

Course work includes computer systems terminology and operations, logic, operating systems, database, data communications/networking, and related business topics. Studies will provide experience for students to implement, support, and customize industry-standard information systems.

Graduates should qualify for a wide variety of computer related, entry-level positions that provide opportunities for advancement with increasing experience and ongoing training. Duties may include systems maintenance and troubleshooting, support and training, and business applications design and implementation.

Course work prepares students to take the Comp/TIA A+, SEC+, and CISCO™ Certified Network Associate (CCNA) exams for industry certification.

Diploma Program

The Cosmetology curriculum is designed to provide competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the cosmetology industry. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional imaging, hair design, chemical processes, skin care, nail care, multi-cultural practices, business/computer principles, product knowledge, and other selected topics.

Graduates should qualify to sit for the State Board of Cosmetic Arts examination. Upon successfully passing the State Board exam, graduates will be issued a license. Employment is available in beauty salons and as skin/nail specialists, platform artists, and related business.

The listed courses, CFCC Cosmetology competencies, NC State Board Performances and a minimum of 1500 hours are required for graduation.

This curriculum complies with the standard approved by the State Board of Community Colleges

Criminal Justice Technology

A.A.S. DEGREE (A55180)
 CERTIFICATE (C55180)
 INDUSTRIAL SECURITY CERTIFICATE (C55180S)

Associate in Applied Science Program

The Criminal Justice Technology curriculum is designed with a core of courses to afford one the opportunity to acquire basic knowledge, skills and attitudes in the generally accepted subject areas associated with a two-year study of law enforcement services. It includes subjects such as interpersonal communications, law, psychology and sociology.

In addition to core subjects, the correctional services option provides an opportunity to study other generally accepted subjects indigenous to a correctional services program such as confinement facility administration, correctional law, counseling, probation-parole services and rehabilitation options. Similarly, the law enforcement provides an opportunity to study other generally accepted subjects included in a law enforcement services program such as criminal behavior, criminal investigation, patrol operation, traffic management, and other aspects of law enforcement administration and operations. The security services provides an opportunity to

TECHNICAL & VOCATIONAL PROGRAMS

study other generally accepted subjects related to a security services program such as accident prevention and safety management, common carrier protection, fire prevention, private security, industrial security, retail security, security systems and surveillance.

Job opportunities are available with federal, state, county and municipal governments. In addition, knowledge, skills and attitudes acquired in this course of study qualify one for job opportunities with private enterprise in such areas as industrial, retail and private security.

Culinary Technology

A.A.S. DEGREE (A55200)
CERTIFICATE (C55200)

Associate in Applied Science Program

The Culinary Technology curriculum provides specific training required to prepare students to assume positions as trained culinary professionals in a variety of food service settings including full service restaurants, hotels, resorts, clubs, catering operations, contract food service, and health care facilities.

Course offerings emphasize practical application, a strong theoretical knowledge base, and professionalism and provides the critical competencies to successfully meet industry demands. Courses also include sanitation, food/beverage service and control, baking, garde manger, American/international cuisines, food production, and hospitality supervision.

Graduates should qualify for entry-level positions such as line cook, station chef, and assistant pastry chef. American Culinary Federation certification is available to graduates. With experience, graduates may advance to positions such as sous-chef, executive chef, or food service manager.

Customer Service

CERTIFICATE (C25120)

Certificate Program

This program stresses the importance of customer relations in the business world. Emphasis is placed on developing communication tools, understanding the business environment and learning how to respond to complex customer requirements and to efficiently handle stressful situations. Upon completion, students should be able to demonstrate the ability to understand and communicate with customers and resolve problems and complaints.

Dental Assisting

DIPLOMA (D45240)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Diploma Program

The Dental Assisting curriculum prepares individuals to assist the dentist in the delivery of dental treatment and to function as integral members of the dental team while performing chairside and related office and laboratory procedures.

Course work includes instruction in general studies, biomedical sciences, dental sciences, clinical sciences, and clinical practice. A combination of lecture, laboratory, and clinical experiences provide students with knowledge in infection/hazard control, radiography, dental materials, preventive dentistry, and clinical procedures.

Graduates may be eligible to take the Dental Assisting National Board Examination to become Certified Dental Assistants. As a Dental Assistant II, defined by the Dental Laws of North Carolina, graduates work in dental offices and other related areas.

The program in Dental Assisting is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of accreditation without reporting requirements. The Commission is a specialized accrediting body

CAPE FEAR COMMUNITY COLLEGE

recognized by the United States Department of Education.

The Commission on Dental Accreditation will review complaints that relate to a program's compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of the appropriate accreditation standards and/or the Commission's policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611 or by calling 1-800-621-8099 extension 4653.

Dental Hygiene

A.A.S. DEGREE (A45260)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The curriculum is designed to prepare male and female students as primary preventive oral health professionals licensed to practice dental hygiene. Upon successful completion of the program, graduates will be eligible to take the national board, regional and state board examinations leading to licensure as a registered dental hygienist (R.D.H.).

Course work includes instruction in general studies, biomedical sciences, dental sciences, clinical theory and clinical practice. A combination of lecture, laboratory, and clinical experiences provide the students with knowledge in dental hygiene services, radiography, pathology, pharmacology, oral anatomy and periodontology.

Graduates may practice dental hygiene in dental offices, federal and state dental clinics, local health departments, school districts, correctional facilities, and private and public facilities for pediatric, geriatric, and other individuals/groups with special needs. Dental hygienists also participate in education, research, and sales.

The program in dental hygiene is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of accreditation without reporting requirements. The Commission is a specialized accrediting body recognized by the United States Department of Education.

The Commission on Dental Accreditation will review complaints that relate to a program's compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of the appropriate accreditation standards and/or the Commission's policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611 or by calling 1-800-621-8099 extension 4653.

All students who wish to apply for the Dental Hygiene Program must have completed a Chemistry and Biology course in high school or college and achieve a grade of a "C" or higher. Applicants who have taken the GED may also meet this requirement if they achieved a standard score of 45 on the GED

TECHNICAL & VOCATIONAL PROGRAMS

Natural Science Test. (The GED Natural Science Test will not satisfy the Chemistry requirement.) If an applicant received the GED more than five years ago, they will be required to complete a biology course. The Chemistry requirement must be completed within three years of admission into the Dental Hygiene Program. Interested applicants who need to meet this requirements must complete either BIO 106, BIO110, BIO 111, BIO 163, or BIO 168*

*If a student completes BIO 168 with a grade of "C" or better, the course will meet eligibility requirements if taken within five years of admission into the Dental Hygiene program

Early Childhood Associate

A.A.S. DEGREE (A55220)
 DIPLOMA (D55220)
 CERTIFICATE (C55220)

Associate in Applied Science Program

The Early Childhood Associate curriculum prepares individuals to work with children from infancy through middle childhood in diverse learning environments. Students will combine learned theories with practice in actual settings with young children under the supervision of qualified teachers.

Course work includes child growth and development; physical/nutritional needs of children; care and guidance of children; and communication skills with parents and children. Students will foster the cognitive/language, physical/motor, social/emotional and creative development of young children.

Graduates are prepared to plan and implement developmentally appropriate programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Head Start Programs, and school age programs.

Electrical/Electronics Technology

A.A.S. DEGREE (A35220)

DIPLOMA (D35220)

CERTIFICATE (C35220)

Associate in Applied Science Program

The Electrical/Electronics Technology curriculum is designed to provide training for persons interested in the installation and maintenance of electrical/electronic systems found in residential, commercial and industrial facilities.

Training, most of which is hands-on, will include such topics as AC/DC theory, basic wiring practices, digital electronics, programmable logic controllers, industrial motor controls, the National Electric Code, and other subjects as local needs require.

Graduates should qualify for a variety of jobs in the electrical/electronic field as an on-the-job trainee or apprentice, assisting in the layout, installation, and maintenance of electrical/electronic systems.

Electronics Engineering *Technology*

A.A.S. DEGREE (A40200)

CERTIFICATE - ELECTRONICS (C40200)

CERTIFICATE - INSTRUMENTATION (C40200I)

Associate in Applied Science Program

The Electronics Engineering Technology curriculum prepares individuals to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems.

A broad-based core of courses, including basic electricity, solid-state fundamentals, digital concepts, and microprocessors, ensures the student will develop the skills necessary to perform entry-level tasks. Emphasis is placed on developing the student's ability to analyze and troubleshoot electronic systems.

The EET program allows for students to major in Electronics with either an Elective in Computer Upgrade and Repair, or in the field of Instrumentation Process Control.

Graduates should qualify for employment as engineering assistants or electronic technicians with job titles such as electronics engineering technician, field service technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, instrumentation technician, and production control technician.

Film and Video Production Technology

A.A.S. DEGREE (A30140)

DIPLOMA (D30140)

CERTIFICATE (C30140)

Note: Limited classes are offered in this program. Please check with Public Services Department Chair or Student Development.

Associate in Applied Science Program

The Film and Video Production Technology curriculum prepares students for entry-level employment in production support and selected technical areas of film, video, and associated media production. Instruction provides training for entry-level crew and/or production and post-production assistants in many moving image media forms.

The first year content includes exposure to the entire production process. Students are taught by industry professionals who provide extensive hands-on instruction. In the second year, students receive professional training by performing in various crew positions on actual production projects.

Graduates may find employment as entry-level crew and/or production assistants in feature and short films, commercials, and industrial, educational, and documentary productions. Other opportunities include entry-level employment in pre-production and post-production areas for film and video.

Hotel and Restaurant Management

A.A.S. DEGREE (A25240)

CERTIFICATE-LODGING TRACK (C25240L)

CERTIFICATE-RESTAURANT TRACK (C25240R)

Associate in Applied Science Program

The Hotel and Restaurant Management curriculum prepares students to understand and apply the administrative and practical skills needed for supervisory and managerial positions in hotels, motels, resorts, inns, restaurants, institutions, and clubs.

Course work includes front office management, food preparation, guest services, sanitation, menu writing, quality management, purchasing, and other areas critical to the success of hospitality professionals.

CAPE FEAR COMMUNITY COLLEGE

Upon completion graduates should qualify for supervisory or entry-level management positions in food and lodging including, front office, reservations, housekeeping, purchasing, dining room, and marketing. Opportunities are also available in the support areas of food and equipment sales.

Industrial Systems Technology

A.A.S. DEGREE (A50240)
DIPLOMA (D50240)
CERTIFICATE (C50240)

Associate in Applied Science Program

The Industrial Systems Technology curriculum is designed to prepare or upgrade individuals to service, maintain, repair, or install equipment for a wide range of industries. Instruction includes theory and skill training needed for inspecting, testing, troubleshooting, and diagnosing industrial equipment and physical facilities.

Students will learn technical skills in blueprint reading, electricity, hydraulics/pneumatics, machining, welding, and various maintenance procedures. Practical application in these industrial systems will be emphasized and additional advanced course work may be offered.

Upon completion of any of the various levels of this curriculum, graduates should gain the necessary practical skills and

related technical information to qualify for employment or advancement in the various areas of industrial maintenance technology.

Interior Design

A.A.S. DEGREE (A30220)

Associate in Applied Science Program

The Interior Design curriculum is designed to prepare students for a variety of job opportunities in the field of both residential and non-residential interior design. The focus of the studies is technical knowledge, professional practices, and aesthetic principles.

Curriculum content includes residential and non-residential interior design, architectural drafting, computer aided design, and universal design. Also included are basic design, history of interiors and furnishings, color theory, products, business practices, graphic presentations, and general education courses.

Graduates should qualify for a variety of jobs including residential and commercial interior design, showroom design, and sales positions for furniture, textiles and accessories, and all business dealing with interiors.

Landscape Gardening

A.A.S. DEGREE (A15260)

CERTIFICATE (C15260)

RETENTION POND MANAGEMENT CERTIFICATE (C15260R)

Associate in Applied Science Program

The Landscape Gardening curriculum emphasizes intensive, practical, hands-on training in applied horticulture to reinforce classroom lecture on theory and technique.

Course work includes plant propagation, greenhouse and nursery plant culture, turf management, plant identification, arboriculture, diseases and pests of plants, and landscape planning, maintenance, and construction.

Graduates will be prepared for employment opportunities in applied horticulture related to landscape development and maintenance for residential and commercial operations. Graduates should be prepared to take the North Carolina Pesticide Applicator's Examination and the North Carolina Certified Plant Professional Examination.

Machining Technology

A.A.S. DEGREE (A50300)
CERTIFICATE (C50300)

Associate in Applied Science Program

The Machining Technology curriculum is designed to develop skills in the theory and safe use of hand tools, power machinery, computerized equipment and sophisticated precision inspection instruments.

Students will learn to interpret blueprints, set up manual and CNC machines, perform basic and advanced machining operations and make decisions to insure that work quality is maintained.

Employment opportunities for machining technicians exist in manufacturing industries, public institutions, governmental agencies and in a wide range of specialty machining job shops.

Manicuring/Nail Technology

CERTIFICATE (C55140)

Certificate Program

The Manicuring/Nail Technology curriculum provides competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the nail technology industry. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional nail technology, product knowledge, and other related topics.

Graduates should be prepared to take the North Carolina Cosmetology State Board Licensing Exam and upon passing be licensed and qualify for employment in beauty and nail salons, as a platform artist, and in related businesses.

Marine and Diesel Mechanics

(Heavy Equipment and Transport Technology-Marine Systems Concentration)

A.A.S. DEGREE (A6024C)

DIPLOMA (D6024C)

CERTIFICATE (C6024C)

Associate in Applied Science Program

This curriculum provides training for individuals interested in becoming technicians which service and maintain the propulsion systems of boats and other types of marine and industrial equipment.

The course work includes the maintenance and repair procedures of mechanical, electrical, hydraulics equipment used on marine systems. Students will inspect and test equipment to determine the cause of faulty operation, and then repair and replace defective parts.

Graduates of the curriculum should qualify as marine technicians which may be employed in marinas, shipyards, industrial and trucking industries.

Marine Technology

A.A.S. DEGREE (A15320)

Associate in Applied Science

This curriculum is designed to provide the practical and academic skills essential for success in marine scientific support. Students will receive training in observational and measurement techniques aboard a variety of vessels including the college's own ocean-going research vessel.

Course work includes a unique blend of traditional and contemporary vocational, technical and scientific marine education. Students are trained in the use of physical, chemical, meteorological, biological, and geological oceanographic instrumentation and sampling equipment.

Graduates should qualify for entry level field or laboratory positions with industries, state and federal agencies, and educational facilities associated with marine science and research. Career opportunities include oceanography, environmental science, marine biology, geophysical exploration, and fisheries-related employment.

Mechanical Engineering Technology

A.A.S. DEGREE (A40320)

DIPLOMA (D40320)

CERTIFICATE (C40320C)

Associate in Applied Science Program

The Mechanical Engineering Technology curriculum prepares graduates for employment as technicians in the diversified mechanical and manufacturing engineering fields. Mechanical Engineering technicians assist in design, development, testing, process design and improvement, and troubleshooting and repair of engineered systems. Emphasis is placed on the integration of theory and hands-on application of engineering principles.

In addition to course work in engineering graphics, engineering fundamentals, materials and manufacturing processes, mathematics, and physics, students will study computer applications, critical thinking, planning and problem solving, and oral and written communications.

Graduates of the curriculum will find employment opportunities in the manufacturing or service sectors of engineering technology. Engineering technicians may obtain professional certification by application to organizations such as ASQC, SME, and NICET.

Medical Office Administration

Contingent on approval and funding, CFCC will offer a Medical Office Administration AAS Degree, starting Fall of 2009. For further information please check with your advisor, Student Development or the Business Technologies Department Chair at 910/362-7281.

Medical Sonography

A.A.S. DEGREE A45440

Associate in Applied Science Program

The Medical Sonography curriculum provides knowledge and clinical skills in the application of high frequency sound waves to image internal body structures.

Course work includes physics, cross-sectional anatomy, abdominal, introductory vascular, and obstetrical/gynecological sonography. Competencies are attained in identification of normal anatomy and pathological processes, use of equipment, fetal growth and development, integration of related imaging, and patient interaction skills.

Graduates of accredited programs are eligible to take National Registry Examinations in ultrasound physics and instrumentation and specialty examinations administered by the American Registry of Diagnostic Medical Sonographers. Graduates may find employment in clinics, physicians' offices, mobile services, equipment manufacturers, hospitals, and educational institutions.

Students are required to pass the computer competency test administered in the Learning Lab.

Medical Transcription

DIPLOMA (D25320)

Diploma Program

The Medical Transcription curriculum prepares individuals to become medical language specialists who interpret and transcribe dictation by physicians and other healthcare professionals in order to document patient care and facilitate delivery of healthcare services.

Students will gain extensive knowledge of medical terminology, pharmacology, human diseases, diagnostic studies, surgical procedures, and laboratory procedures. In addition to word processing skills and knowledge of voice processing equipment, students must master English grammar, spelling, and proofreading.

Graduates should qualify for employment in hospitals, medical clinics, doctors' offices, private transcription businesses, research facilities, insurance companies, and publishing companies. After acquiring work experience, individuals can apply to the American Association for Medical Transcription to become Certified Medical Transcriptionists.

Nuclear Maintenance Technology

A.A.S. DEGREE (A50390)

Associate in Applied Science Program

The Nuclear Maintenance Technology program prepares individuals to become qualified field service technicians who perform maintenance, repairs, and modifications to licensed nuclear facilities in the United States and around the globe which have light water reactors that are shutdown for refueling.

Students enter this program in either the Fall or Spring semesters and participate in five academic semesters plus one Spring co-op semester. Academic semester course work includes theory and application related to nuclear energy, boiling water reactors, quality control, industrial and nuclear safety, instrumentation, electrical generation, automation devices, process measurement, welding, various metallurgical inspection procedures, and specialized equipment applications. The co-op semester emphasizes specialized training and hands-on experience to further prepare students for maintenance and service support positions during nuclear plant outages. The co-op semester may include training in radiological controls at GE-Hitachi facilities in Wilmington, North Carolina, working at a full-scale mockup of a boiling water reactor at GE-Hitachi facilities in San Jose, California, and operating equipment during nuclear plant refueling outages at sites throughout the US and overseas or equivalent. After their co-op semester, students continue their academic work to complete their degree requirements.

Upon completion of this program, graduates should qualify as entry-level field service technicians in the nuclear power industry.

NURSING PROGRAMS

Associate Degree Nursing (RN)

A.A.S. DEGREE-RN (A45100)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program

The Associate Degree Nursing (integrated) curriculum provides individuals with the knowledge and skills necessary to provide nursing care to clients and groups of clients throughout the lifespan in a variety of settings.

Courses will include content related to the nurse's role as provider of nursing care, as manager of care, as member of the discipline of nursing, and as a member of the interdisciplinary team.

Graduates of this program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN) which is required for practice as a Registered Nurse. Employment opportunities include hospitals, long term care facilities, clinics, physician's offices, industry, and community agencies.

LPN Refresher

CERTIFICATE-LPN (C45390)

This program has selective admission requirements. Contact the Director of Allied Health for information and application deadlines.

Certificate

The Licensed Practical Nurse Refresher curriculum provides a refresher course for individuals previously licensed as Practical Nurses and who are ineligible for reentry into nursing practice due to a lapse in licensure for five or more years. Individuals entering this curriculum must have been previously licensed as a Practical Nurse.

Course work includes common medical-surgical conditions and nursing approaches to their management, including mental health principles, pharmacological concepts, and safe clinical nursing practice.

Graduates will be eligible to apply for reinstatement of licensure by the North Carolina Board of Nursing. Employment opportunities include hospitals, long term care facilities, clinics, physician's offices, industry, and community health agencies.

Occupational Therapy Assistant

A.A.S. DEGREE (A45500)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program

The Occupational Therapy Assistant curriculum prepares individuals to work under the supervision of a registered/licensed occupational therapist in screening, assessing, planning, and implementing treatment and documenting progress for clients receiving occupational therapy services.

Course work includes human growth and development, conditions which interfere with activities of daily living, theory and process of occupational therapy, individual/group treatment activities, therapeutic use of self, activity analysis, and grading/adapting activities and environments.

Graduates may be eligible to take the national certification examination for practice as a certified occupational therapy assistant. Employment opportunities include hospitals, rehabilitation facilities, long-term/extended care facilities, sheltered workshops, schools, home health programs, and community programs. Successful completion of the program is required for certification and licensure.

The National Board of Certification in Occupational Therapy administers the national certification examination. The NB-COT is the certifying body for occupational therapy practitioners.

Paralegal Technology (Legal Assistant)

A.A.S. DEGREE (A25380)

DIPLOMA (D25380)

CERTIFICATE-CIVIL LITIGATION TRACK (C25380C)

CERTIFICATE-CIVIL REAL PROPERTY TRACK (C25380R)

Associate in Applied Science Program

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks, and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Course work includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses also include subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

Pharmacy Technology

DIPLOMA (D45580)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Diploma Program

The Pharmacy Technology curriculum prepares individuals to assist the pharmacist in duties that a technician can legally perform and to function within the boundaries prescribed by the pharmacist and the employment agency.

Graduates will maintain patient's records; fill prescriptions; maintain inventories; set up, package, and label medication doses; prepare solutions and intravenous additives; and perform clerical duties, including insurance forms and forms required by third-party payers.

Graduates may be employed in hospitals, nursing homes, private and chain drug stores, research laboratories, wholesale drug companies, and pharmaceutical manufacturing facilities. Graduates will qualify to take the National Certification Examination developed by the Pharmacy Technician Certification Board.

TECHNICAL & VOCATIONAL PROGRAMS

Phlebotomy

CERTIFICATE (C45600)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Certificate Program

The Phlebotomy curriculum prepares individuals to obtain blood and other specimens for the purpose of laboratory analysis.

Course work includes proper specimen collection and handling, communication skills, and maintaining patient data.

Graduates may qualify for employment in hospitals, clinics, physician's offices, and other health care settings and may be eligible for national certification as phlebotomy technicians.

Semester Hour Credits

Practical Nursing (LPN)

See Nursing Programs page 184.

Radiography

A.A.S. DEGREE (A45700)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program

The Radiography curriculum prepares the graduate to be a radiographer, a skilled health care professional who uses radiation to produce images of the human body.

Course work includes clinical rotations to area health care facilities, radiographic exposure, image processing, radiographic procedures, physics, pathology, patient care and management, radiation protection, quality assurance, anatomy and physiology, and radiobiology.

Graduates of this program are eligible to apply to take the American Registry of Radiologic Technologists' national examination for certification and registration as medical radiographers. Graduates may be employed in hospitals, clinics, physician's offices, medical laboratories, government agencies, and industry.

Real Estate

CERTIFICATE (C25400)

Certificate Program

The Real Estate Licensing curriculum provides licensing education required by the North Carolina Real Estate Commission for students preparing to take the real estate license examination and for provisional brokers that are seeking removal of the provisional status.

Course work includes the practices and principles of real estate, broker relationships as they apply to customers, sellers and buyers, contract procedures, fair housing and real estate methodology. Course work also includes professional development opportunities.

Graduates who have passed the real estate license examination and obtained a real estate provisional broker license should then qualify for removal of the provisional status and be able to provide basic, residential real estate services as a broker affiliated with a real estate brokerage firm.

A student must secure his/her provisional broker license before proceeding into the post-licensure courses and must complete the three mandatory post-licensing courses within three years of licensure in order to avoid cancellation of his/her license.

Semester Hour Credits

I. Major Courses

RLS 112	Broker Prelicensing	5
RLS 121	Broker Relations/Responsibilities	2
RLS 122	Contracts and Closing	2
RLS 123	Selected Post-License Topics.....	2

Surgical Technology

A.A.S. Degree (A45740)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program

The Surgical Technology curriculum prepares individuals to assist in the care of the surgical patient in the operating room and to function as a member of the surgical team.

Students will apply theoretical knowledge to the care of patients undergoing surgery and develop skills necessary to prepare supplies, equipment, and instruments; maintain aseptic conditions; prepare patients for surgery; and assist surgeons during operations.

Graduates of accredited programs will be eligible to apply to take the national certification exam for Surgical Technologists which is administered by the National Board of Surgical Technology and Surgical Assisting. Employment opportunities include labor/delivery/emergency department, Inpatient/outpatient surgery center, dialysis units/facilities, physicians' offices, and central supply processing units.

Truck Driver Training

CERTIFICATE (C60300)

Certificate Program

The Truck Driver Training curriculum prepares individuals to drive tractor trailer rigs. This program teaches proper driving procedures, safe driver responsibility, commercial motor vehicle laws and regulations, and the basic principles and practices for operating commercial vehicles.

The course work includes motor vehicle laws and regulations, map reading, vehicle maintenance, safety procedures, daily logs, defensive driving, freight handling, security, and fire protection. Highway driving, training range exercises, and classroom lectures are used to develop the student's knowledge and skills.

Graduates of the curriculum are qualified to take the Commercial Driver's License and employable by commercial trucking firms. They may also become owner-operators and work as private contract haulers.

Welding Technology

DIPLOMA (D50420)

CERTIFICATE (C50420)

Diploma Program

The Welding Technology curriculum provides students with a sound understanding of the science, technology, and applications essential for successful employment in the welding and metal industry.

Instruction includes consumable and non-consumable electrode welding and cutting processes. Courses in math, blueprint reading, metallurgy, welding inspection, and destructive and non-destructive testing provides the student with industry-standard skills developed through classroom training and practical application.

Successful graduates of the Welding Technology curriculum may be employed as entry level technicians in welding and metalworking industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.
