Text input

I am in a G.E. sponsored program
get my degree, and join the Coast Guard.

UNCW Transfer
It was originally to transfer to a four-year college or university, but with a change in career choice I may not transfer into a four-year, but I will certainly still transfer to another school.

transfer

Attended the Early College
To eventually transfer to a 4 year school but also to obtain a job

Nursing Degree

Health program
To learn the skills needed for a new career.

Receive college education to prepare me for career desired and to help to provide a better future for my family

TEST ITG

Finish two year degree and begin Paralegal Technology program

certificates and possible a degree
both two year and transfer

A G E

Pursue my degree in nursing

military
Question 5
I have accomplished my goal for attending CFCC:  (select one)

Text input
- finished
- The instruction at CFCC is not good. I have told my G.E. manager that it is a waste of there money.
- n/a
- I have 1 class left until I finish my goal at CFCC which I'm taking in the fall
- Still taking classes toward the associate's degree.
- currently enrolled at Pitt CC for remaining 3 classes
Apathy

Have to complete this semester to graduate

Changed major
currently taking last classes required for Core Curriculum Diploma
still working for degree
totally satisfied!
recently changed career goals
still in last semester
job market
Working on new major
Still taking classes
I want to be a radiographer
Want to keep learning
I accomplished
Pre Pharmacy Program not officially offered
Felt I could of had better and more clear guidance from advisers and counselors
need additional credits
Achieved

HAVE N0T GOT 4 YR DEGREE YET
continuing on to an associate degree
haven't finished semester
Graduate in December,
I am currently work on an associates degree and I recently earned a diploma.
Still working on it
I did achielve my goal
I did complete my goals!
money
Want to attend Nursing school as well.
Still Attending, Not enough Credits to Transfer yet.

obtain a second degree
Husband joined the Marines
Secondary Degree
none
plan on receiving a degree in business
small admittance into dental program, only 8-12 a year. Cannot wait any longer.

Not done yet
Want to transfer to UNCW
want to take courses and gain another Associates in Social Work
want to pursue Social Work in the near future
Not finished with my primary degree
Have not completed program
nothing just not finished yet
I still have one semester to complete before I have completely accomplished my goal.
Hard times; not enough classes at North
Waiting to get accepted into the program.

Deaths in Family

Since enrolling at CFCC in 2010, my medical conitions have worsened; and I am unsure if I can or will be able to physically perform the job for the program that I inintially intended on reciving a diploma, certificate and degree in (Dental Hygiene).
transfer issues
I would like to be included in the radiography program
I have enjoyed going to CFCC. However, I have never been to college and nobody in my family have either. I am the first to even receive my GED. I had no clue on what the best route for me to go. The guidance was not very good. I have been here longer than I thought.

I'm still taking classes to get another degree in spring 2012 and then I will have accomplished all my goals at CFCC. I hope to further my education in business. I would have liked more assistance in moving on to a 4-year school.

I still have a few classes to take.

N/A

Wanted to graduate from Radiology program as well. Haven't graduated yet?

Completing prerequisites for a four-year degree. I want to graduate from Radiology program as well.

Finishing last semester.

Failed Classes

I'm receiving one 2-year degree but am also attending to receive a second 2-year degree at a later date.

Applying for ADN program next year.

Wasn't accepted in the Nursing Program.

Discovered another field of interest.

I want to get into an allied health/nursing program.

Change of heart.

Interested in more classes.

Still in progress.

Also want an associates in Nursing.

Could not get into program.

Haven't been accepted into a health science program.

May get RN degree from CFCC instead of university.

Dissatisfied with qualification procedures.

Difficult to find work in the area.

Grades not done yet.

Miller-Motte College did not get into program.

Hard to get into program.

Finances were a major issue but I feel I have accomplished what I set out to do.

Pursuing an additional degree.

Soccer non-applicable.

Haven't been accepted to a four-year university.

Not finished with degree yet.

Haven't been accepted into a four-year university.

I have accomplished my current goals.

Some classes weren't offered even though they were in catalog, e.g., journalism, accomplished.

Want to explore my options of becoming a professor.

Medical Disqualification for current major.

Nursing program is very competitive.

Associate Degree in Nursing.

Haven't been through the whole program.
Still haven't been accepted to UNCW

dissatisfied

none

Beginning a new program. Basically, completed one goal, moving on to another!

not finished yet

have not completed my two-year degree

still in progress

not finished yet

over populated

Associate Degree in Nursing

Im only one credit away from a general education degree

Im still working towards my AAS but want to recieve the certificate and diploma.

waiting to be accepted to a University

did not get accepted into uncw yet

did not receive my degree yet

nothing

still taking classes

Obtain another two year degree

finishing last class now

still working towards my FVP degree

none

Still working toward a nursing degree

Marketing

educate myself more

finish in summer semester

n/a

looking for job

n/a

Waiting for OTA program acceptance.

N/A

must apply for the 2nd year of Pharmacy Technology to receive an associate degree

haven't graduated yet

Did accomplish my goal

acceptance into a specific program

Personal

financial hardship, medical problems, Family conflict(recent separation from my husband) and moving out of state

Not yet completed the required course of study. Will be complete after Summer session.

till in college

have one more semester

Deferred from University

still in progress

only 16 students a year

semester is not over, still attending classes

Still enrolled

fail class

various needs

I am going to work in the field I recently studied in as I continue to further my education in psychology.

almost done

Enlisting in the Army Reserve
still need to attend for two more semesters to receive my Associate Degree

Haven't gotten into a 4-year institute as of yet

Anxiety Issues
n/a

intend to become an RN

Continuing Education
NA

accomplished goal

Until I get the degree and I am excepted into my prospective new college, I feel like I will have only partially achieved my goal for attending CFCC.

Completed one degree...going to complete the transfer degree.

Didn't Pass
i did

Mathematics and Science

I believe the strengths of my program stem from how well CFCC prepared me for education at a further level while also helping prepare me for the world beyond school as well. CFCC also allowed me to grow as a student and as a person of character.

Mathematics and Science

that i have broadened my knowledge of the area of studies that i have went into and learned the practical use of what i have learned in the class in everyday life.

challenging, small classroom setting

That all the professors in the criminal justice program have real life experience with the area we are studying

It was a good program to refresh the basic knowledge everyone should have and know.

The strengths were how the require classes were more science and math related.

With the A.A degree it allowed the opportunity to complete classes that I wanted to take and had an interest in but also challenged me by requiring difficult core classes.

The strengths of the Paralegal program are: one, having an internship program, and the experience of the instructors.

the instructors

Hands on experience with legal research, legal document preparation, and law office internship.

Programs and instructors are great. Instructors were very patient and explained things well.

The strengths of the program were in the complete preparation that CFCC provides for future and futher study at another level. I feel also that it has helped me correct my bad study habits and, in turn improve my GPA.

flexibility.

The variety of classes required.

I enjoyed having a wide choice of classes to take in the humanities section.

The credits transfer to 4 yr university

I believe the teacher's were exceptional and willing to help their students when possible.

is a great teacher. I have been on the co-op and have done the job. The rest of the instructors are retired people that have no idea how to teach, follow a schedule, and seem to be at CFCC to kill time. I am refering to . I have attended a UNCW and I am appauled at the lack of teaching ability.

With nursing you will always have a job. Someone is always going to be sick and need help.

The teacher! The best teacher I've ever had my whole life! is the Man!!!

I do not see many strengths in my program. It is quite comparable to most other 2 year institutions.

I am determined to make my career goals come true. As I am nearing the age of 22 I am now ready to start a job as a nurse. My education is essential for that to be possible. So my strength would be that I am capable of making my dreams come true, and I will not give up.

The teachers ability to be creative in the teaching process.

I think the quality of instructors provided by the college was a huge asset to the program.

Employment, and being able to transfer to a 4 year university

vast selection of classes

It forced me to study hard and challenged me to a level I didn't think I could reach.

The teachers.

Hands on work is strong.

It prepares you for the university life.

Natural Sciences, math, writing skills

Resources, leadership, knowledge.

History, science, and writing where my biggest strengths.

Broad knowledge of general studies, good prep. for college transfer. Allowed me to get a taste of everything and make a more informed decision as to a major.

Knowledgable professors that are willing to meet one on one with students.

Being taught by attorneys in the Paralegal Technology program was an advantage due to their thorough grounding in the law and ability to draw upon their own experiences and cases.

perparing to pursue a bachelor's degree
I think the strengths are the teachers. They really challenge you to prepare to transfer to a higher institute by providing challenging work.

The new cosmetology facility at CFCC was a definite strength of the program. All the appliances and given product were up to date and helped students reach a realistic view of how ones work may be in a real life salon.

it provides a stright foward path to a 4 year degree

Always have a job and a very seroius jon. Have a lot of thingking to do with math.

Ability to get a job quickly.

I think the strengths of my study towards the curriculum is everything is well thought out and they have excellent teachers to follow through on what needs to be taught. I think in the real world my study will help people all over make sense of actions and the world today. All in all my study has prepared me for things I will face not only now but in the future.

Me having a great teacher ( ) being patient with me and pushing me to know, ask for help. Don't be ashamed.

It gives you a taste of college life but with the smaller class sizes it was not too overwhelming.

The strengths of my program included: strong teaching, and academic development.

Knowledgable staff and professors that are willing to spend one on one time with students.

My program of study is simply designed for transfer purposes, therefore it has helped me to begin my journey into college, and helped me transition easily into a 4 year university.

I think that the strengths of my program of study were primarily the instructors. They presented the material in an effective manner and were willing to help when you did nit understand.

It is easy and effective. You get in, get your diploma, get out.

The teacher are very helpful and could relate due to personal experiences of their own.

classes

The teachers are fun so they are great to get along with and easy to communicate with.

It started off fine and I was enjoying it, then I got to classes.

The strengths within the Nuclear program are the classes taught by and the Granite Scholarship program which allows for guaranteed employment after graduation and an income source while in school.

That the teachers are highly educated on what they teach- and if need be that they are willing to help students in the areas that they might be having difficulties.

Strong learning in Medical Terminology, etc.

Keyboarding, Word Processing, Medical Terminology classes, Coding classes

The preparation for the state board exam

Teachers, curriculum

I think the instructors are very knowledgable and have always been able to answer every question I've had. I also feel that there are more than enough resources for all students to use.

Some of the strengths of my program of study are learning how to effectively communicate and develop my own ideas and critical thinking. I learned in depth much more than I ever thought possible and have also learned how to put what I have learned into action.

I think it was the instructors that really made my major enjoyable. The majority of them had a great understanding of the Criminal Justice field.

Nice facilities and campus. Like the non-smoking rules. Good instructors for the most part. There are a few who don't really convey a lot of information. With those instructors, anything you learn will be on your own and not due to their efforts.

The advising

The strengths in my program of study are that the courses and professors well prepared me to attend a 4-year university. I feel as though am ready to take the next step in obtaining my degree.

Teachers involvement in education.

The instructors that were truly subject matter experts and dedicated to sharing their knowledge and experience.

I think the main strength is that choosing Associate of Arts you have some time to choose what you want to do for a career.

I think the strengths of the program is the ability to have a lot hands-on experience and help with the hands-on experience and the guided out line the professors give the students to go by.

The Teachers.

My English classes vastly improved my effectiveness through written communication

To create the business of myself it takes business. I feel the strength of my study is what I get out of being able to literally run my own business, and the business of my self confidence.

I believe the strengths of my program of study were my professors.

The professors are knowledgable and willing to work with the students to meet a joint goal of not only passing but understanding the material on a conceptual level.
I'm very motivated, as well as excited to start my career goals. I was attending Cape Fear at first to get my nursing degree. However, after a year of taking classes, I decided to join the United States Coast Guard. I wanted to receive a basic degree, and start my training towards my life career.

The strongest part of the music program at CFCC is the instructors.

The knowledge gained from the teachers and the information that i was able to obtain from each class has allowed me to feel confident in my abilities to get a job in my preferred career.

Small class sizes are wonderful, the teachers are so dedicated to their work which makes learning from them fun and accessible. Cape Fear itself is very willing to work with its students to achieve their needs, not the needs of the school. The material presented is easy to understand as well as in a basic form so that all extra "fluff" of learning is cut out. Again, the teachers at Cape Fear are so excited about their topic, and knowledgeable, and always available to their students for extra help or extra resources, that being with them as compared with stuffy university professors is a joy. Would never have enjoyed my experience at Cape Fear without them, so thank you to all of them!

Humanities, History

Very personally gratifying

I felt challenged by my teachers to really learn the material. The focus was on learning not just test-taking and homework.

N/A

I felt that i am now prepared for my journey into a four year program and hopefully on to grad school one day. Eventually, I know the skills and knowledge I have gained will help me one day as a professional.

The strengths of being a college transfer is learning while having the door open to many other degrees.

The hands on aspect. The ability to get out on real sets is priceless. UNCW's film program is far inferior in terms of actually knowing how to work in film upon graduation.

I felt the strengths of my program were the level of classes offered, which were challenging yet informational. They prepared me for a great start at UNCW.

It was mentally stimulating and interesting.

The diversity of knowledge held by the instructors at CFCC is first rate. I enjoyed working and learning from individuals with a broad base of experience and unique teaching styles.

Customer service for one covers alot of territory. It is a key component to getting along with others and working. So I'm very glad to be getting a certificate in this by the end of this fall semester and going forward after that Business Administration is a program that will always be a main force in working structures, and a stable job. I can’t go wrong in the Business Administration program.

Great teachers

The preparation for a four year college is excellent.

n/a

Math was the strongest one in my program of study

It's very interesting, and the co-op semester really helps you in preparation for actual work

Broad range of classes and information.

It allows me to either go to college or go to work and I like when I have choices.

It is quick and easy to graduate.

I feel like this program has given me the knowledge and confidence to pursue further education at a four year university. I feel diversisty is a great strength in this program.

I changed my major so many times that i feel that the amount of education i received is satisfactory, however the hardest question to answer (in my opinion) is: what do you want to do for the rest of your life? I still cannot answer that question and Cape Fear did not help me answer it. My quest for knowledge will not end with Cape Fear Community College although i have learned alot of different things about life and myself while i attended.

I was in the ADN nursing program and it was just too much work to not be considered full time so I failed twice and picked a major that would allow me to graduate soonest.

Preparing students for transfer to another program.

It provides me with a strong foundation from which I can build on with further education.

The class participation, (public speaking), showed me that I have stronger leadership qualities then I formally believed. Whenever groups were formed in almost every class, or subject, I was invariably chosen to be group spokesman. At first I was insecure, but slowly I've come too recognize abilities I did not think I possessed. In short I gaine self confidence (even at my age of 57). We're never too old to keep learning and growing.

Excellent teachers. almost everyone has a car so they will need to be fixed so its a never ending a supply of work.

I feel i have learned a great sense of knowledge and skills i will use for the rest of my life.

The job market in the computer field is growing.

You computer team and teachers is your best assest. Been doing this for 20 years and they were always open to real life teaching. Black board killed me the most with my online classes. The reason if you had issue the teacher would say like no one else had that issues. Well if I was suppose to take my test the same time the whole class did then I miss that information. You basic subject teachers need to understand Black board has issue's and they need to support the student.
All of my teachers were excellent. They knew what their subjects and were able to convey information accurately and with enthusiasm.

Being taught to have a strong attention to detail, being able to problem solve, being well organized, having the most current information on topics important to area of work.

The level of dedication that the majority of the instructors have with ensuring that the student completely understands the information provided. Always being challenged in every class to come prepared.

The strengths of the program studied open my mind to view the world as a place where formal knowledge helps one to obtain goals, objectives and embark on a startling voyage of Scientific Secrets, Introduction to Nanotechnology, Innovation, History, Literature & Language, Theology, Fine Arts & Music, Business & Economics, Philosophy and Personal and Professional desires to bring Satisfaction and Harmony through Intellect to our World and life of disorganization.

Lots of hands on experience. Instructors are very knowledgeable and very helpful.

Rigorous courses, caring teachers and academic counselors, and hands-on learning.

It's a lot of stuff to learn but it's really interesting

English classes

n/a

The program is lucky enough to have great restaurants located around Wilmington to send the student off to do their coops at.

allow to go further with education

biology

I have been able to learn and grow as a student. CFCC has made me see my strengths in science and has made me want to transfer on to major in Environmental Sciences.

That all the teachers were very helpful in answering any questions I might have had throughout my program of study.

Very diverse courses that broaden my knowledge base.

I had a very diverse course load that expanded my knowledge.

I thought that the material that was covered in the classes I attended challenged me. They taught me to think logically and on my own, instead of the information just being thrown at me.

The course that I was previously pursuing offers many opportunities, that being the Dental Assisting program. Recently my major has been changed to Associates in General Education.

The strengths of my program are the ability to think outside of the box and develop ideas at a rapid pace.

NUC Classes

A better preparation for furthering my education.

Very affordable and the smaller classroom size creates a more relaxed atmosphere which makes learning so much easier.

Introducing a student to a wide variety of subjects.

There were a lot of hands on activities, which is how I learned the material best.

The instructors were very knowledgeable and very involved in helping our class learn the trade.

My initial plan was to transfer. However, my focus had shifted and I would like to finish my current degree to pursue another degree within Cape Fear Community College. Associates in Science will create more options if I choose to pursue further education at a university.

accounting

Cape Fear Community College prepared me for college life and my future in a four-year university. The Associates of Art degree is fundamental to strengthen one's knowledge of the humanities, social issues, composure in speaking, and well-developed writing skills.

Instructors, curriculum

Focused in the area I need.

the teachers definitely you have an amazing staff in the arts and they are so understanding and helpful not just with art but with life and life's complications.. I had art at UNCW when I attended there before I came here and CFCC's art program is better than UNCWs any day of the week

Diverse background of various subjects

My program of study was the only alternative left to considering there is no college transfer for physics majors. An A.S. degree would be the next best thing, there are no strengths to it.

My program of study required lots of different classes. It opened me up to learning a little about lots of different fields.

Learning how to manage and use computers on an administrative level.

In this program, you learn a lot. More about state laws and how to do certain tasks that will be asked of you when you enter into employment.
It allows me to get my general studies credits fulfilled in smaller classroom sizes.

My program of study was challenging in preparation of my further advancement in the 4 year university. Equal to the quality of UNCW while having smaller class sizes so it is much easier to get help from the instructor when needed.

Hands Down, the instructors make up the heart and soul of our culinary and hospitality management program just to name a few are blessings and without them this program could not possibly be the same. They are the core of this program and should be treated like diamonds in the rough because we the student body are lucky to have them.

Great Gear and Teachers

The flexibility and knowledge of the instructors changing lives Making children feel safe and having a place for them to learn Making a difference in families all over the city

The various approaches to the material presented through projects and research papers.

CFCC has a decent biology program to say the very least. On the upper hand, they have professors that challenge ones character and thinking ability. On the down side, the department could should impliment more hands on experience. Take for instance the A&P courses, you do get to go into the semulations lab but you dont get to go very often unless it's on your time. Many students attend CFCC for nursing or some field in the healthcare network of careers. It would be great if they got the opportunity as a part of the class to be just as much hands on as they are facing the words of a text book. I say this because as an individual whom has embraced the fact that I dont learn everything as easy as some others,what I read about doesnt always make since. Therefore, If I am granted the ability to manipulate what I was taught,I grasp the concept easier. I hope that the meditation of my heart and thoughts have been a blessing to the department.

My program of study will amplify my GPA scores.

My program has changed. But the Associates of General Education is a great general program for returning students to achieve their goal.

Drafting actual forms from the NC Court.org website and documentation using hypothetical cases.

allows you to get a good understanding of how construction should be done as well as as human resource and the cost of certain aspects of my field

Gives me the ability to transfer to the college of my choice.

Teacher interaction

Size and intelligence of staff

A general all around understanding of the different aspects of the profession.

The communications class was very helpful especially to take in the first semester; it teaches one the proper way to talk to people and that is a skill that everyone should acquire.

My professors are very knowledgable about their profession.

The text books and the instructors

Helped to prepare me for a 4 year university.

My program of study offered a lot of options to pursue and gave me the ability to chose courses that captured my interests.

My strengths of my program of study was that I felt like I succeed in many different areas. I was able to have a wide variety of areas to learn from, and that helped me be able to broaden my area of learning.

The text books are well chosen for the course of study, and the instructors are well organized.

The professors are knowledgeable. The childcare facility is a learning lab for the students.

The good resources the school provided.

the teachers are very helpful

It provides a great way to learn a variety of things over a range of subjects and for me personally, helped me to learn what I wanted to pursue in life.

The ability to enter a variety of Bachelors Programs in NC

This program is a good start before completing a bachelors.

Its a broader field, I have many options I could pursue if I ever changed my mind on my career path.

I think the strengths of my program of study are the english classes and accounting classes that are required. I feel that they will help me in the future.

I think the professors were the strength of my program of study. I have not met a professor who was not helpful or willing to work with me.

N/A

Paralegal work is an ever growing career. There are always jobs available and our program offers information for every aspect of our field.

I don't feel there are any strengths, but I don't feel there are any weaknesses.
There are many great things about my program of study. The teachers for each individualized classes are wonderful and helpful. It is also a smooth transition into the college life. The classes are challenging yet you can achieve success.

Learn how to make people feel beautiful.

When completing or by taking the courses you will have gained plenty of skills to become an early childhood educater.

I defenitely think the labs help alot.

Geology class!

The strengths of my program of study were the history and humanities courses I was able to take.

All professors were wonderful, and very helpful. My program of study allowed me to take classes i was interested in as well as classes that were neccesary.

The teachers and classroom sizes

The strengths of the program of study i chose is that I am prepared for after school mathematically and English has been my subject of choice during school. I also had a different genre of classes, but my favorite are the social sciences. That genre fits perfect when studying humans and how we interact to the world.

To prepare you for when you transfer to a university

The available technology and the hands on study.

Because I am in the Transfer Program for Associates of Science, most of the courses were math, science, or chemistry related. I feel that in the science department I am well prepared for the major that I will be pursuing at the 4 year college I have chosen.

In the art classes I’ve taken, the teachers have been friendly, passionate, and extremely helpful. The same goes to most of my Psychology and English teachers as well. Teachers at Cape Fear tend to be very one-on-one.

N/A

I believe that the Science and Biology courses at Cape Fear are strong and very helpful. I also believe the Math courses are strong.

The strengths of my program of study is that it has a variety of classes that you can choose from.

I ever class I had, I was put to the test. In ever class that I had my teachers did above and beyond anything that I could ever ask for in a teacher. They were all open to help you in anyway and see you succeed.

Most teacher would give one on one attention and help the students learn.

Strong instructors in math and science, especially in biology, anatomy & physiology, precalculus and human sexuality.

good and effective teachers and teaching methods

I felt that the Computer Engineering Program at Cape Fear did a great job of preparing me for my future career. One of the strengths of the program was the amount of hands-on learning we did in the classroom. I also felt that my instructors were very knowledgeable on the subject material and were very helpful in making sure I understood the material.

Small class sizes as well as instructor interaction.

The freedom of the classes able to take to explore possibilities.

Clear pathway to success

I think the strengths of my program of study are the smaller classes which gives you alot of one on one with the teachers in the classroom and the friendly staff who are always willing to help students with their educational needs.

Job opportunities. Good preparation

The teachers

The resources that are available for the students that attend cfcc.

Everything is up to date and helped prepare me for the next steps.

Diversity of student body, skilled instructors, meeting new folks, learning good stuff!

The basic college education, everyone needs it. Throughout my college years I have gained an abundance of knowledge I put to use every day. It has made me a more rounded individual, as well as tough me patients and determination. Another strength about associate of arts degree is to prepare one for a four year institution, which I am now ready for thanks to Cape Fear.

The professors and their kind, supportive, and helpful ways.

I had Mr. Arie for all of my political science classes. I thought he was a very good teacher and always enjoyed listening to his lectures and thoughts.

A selection of well rounded teachers that know the business, were able to share their experiences in the business. And teach it well!

The teachers and the way they used technology to teach the course content.

I recently just changed my program of study, but feel like a lot of classes I have taken have helped me learn an understanding of what I am pursuing.

Excellent, it was really challenging eventhough i am a native speaker. I learned alot.

The ability to choose from a wide range of classes to take.

It helps us to challenge ourself.
I think everything was well balanced overall.

One of the strengths of my program of study was the amount of hands-on learning done in the classroom. I also felt that the teachers in my program were very helpful and knowledgeable of the subject material. The teachers were very professional and made expectations very clear.

The strengths of my program of study lies in the fact that it provides a chance for students planning on transferring to a 4-year university the time and place to refine study skills to prepare oneself for the move to the university level of education. If I had gone to a university fresh out of high school, I would not have been as confident in my skills as a student as I am after completing an Associate's Degree at the community college level.

My strengths are the Social Sciences and English; however, these courses will not apply to the bachelor degree that I am pursuing.

The ability to be able to write and speak with confidence.

The biggest strength of my program of study are the instructors. I found the teaching staff in my program to be very good.

There are some nice, friendly teachers.

Prepares you for a 4 year college with lower costs.

The instructors

I feel that my program of study excels in many areas. The math teachers are very knowledgeable and helpful. There were plenty of math classes offered on the North Campus, and I am very appreciative of that.

The chairperson of the Business Technologies Department. She is always available to the students, either to listen to their concerns or help solve a problem. She is very honest and fair to both the students and instructors under her supervision.

Reading material assigned

I think that one strength of the paralegal program is that the instructors bring a wealth of experience into the classroom. It is easier to relate to legal concepts when a life example is used by an instructor.

I took classes randomly, and there was lots of freedom.

The teachers

English courses where my strongest subject throughout my program of study.

I had the opportunity to interact with very knowledgeable and professional professors.

I feel that the instructors for the CET program, [REDACTED], are huge assets and have helped me with my confidence and motivation to complete this program.

I have a better understanding of the health care field, which will help me with my future.

Variety of Studies

I had been away from school since 1981. I had been a good student but unmotivated in high school (very bored). I quit 12th grade, took a GED, and got on with my life. I decided in the mid 1990s to return to school and CFCC was it. My life took many difficult and unexpected turns, at times even tragic. But I kept coming back on and off. I love CFCC, which sounds strange coming from a person who always disliked school. I awakened a need in me to become a lifelong learner, which I am now. The teachers are #1 but so is the support and the way the school is structured, the curriculum and all. I cannot say enough good things about CFCC. Simply a superlative school!

I got to experience many different subjects which is helping me which major to pursue in.

we have instructors who really care about our goals and how well we can do our work before they send us out on our own

The Cosmetology program has only prepared me for a state board exam, which was my goal to achieve

Hands on learning with clients.

The Cosmetology Certificate Program provides more than enough knowledge and hands on practical work than needed to pass state board examination, which is great. It's always better to be over prepared, than under prepared.

teachers

The instructors.

The program successfully moves students through, preparing them for the bare minimum of the State Board Cosmetology Exam. Beyond that point, I feel it is up to the student to gain the education or experience he/she wants.

Most of my teachers really cared and made the classes relatable while teaching and pushing all of the students in the class.

The strengths are the actual clients that come in and allow us to work on and with them to learn the basic skills of cosmetology.

I THINK THE PROGRAM EVALUATION AND COURSES REQUIRED ARE GOOD PREPARATION TO FIND A JOB FOR THE MAJOR I CHOSE. I ALSO FEEL THIS PROGRAM OF STUDY PREPARED ME TO TRANSFER TO A 4 YEAR SCHOOL AND APPLY TO THE CAPE FEAR NURSING PROGRAM.

zoology and the different biology courses that I have taken to pursue my dreams.

I enjoyed all the classes that I was able to take and had successful teachers who were willing to go out of their way to help in any way possible.

I am able to express my creativity through cosmetology.
Computers and Mathematics

Creativity

Some instructors are more than willing to help you understand everything you need to.

The MOA program is giving me the ability and knowledge to apply for several different positions in a medical office. MOA gives the basic of some subjects, such as medical billing and coding, to where I can take additional classes to become a licensed coder.

The strengths of my program of study are being introduced to Lanza Color Care.

Online classes.

The Instructors and their experiences in the field.

Small class sizes and a good teacher to student ratio.

My program has helped me to become a better well-rounded person.

The hands on aspect of the program made it very easy to learn compared to a class room setting. The teachers were also very helpful if you ever had any problems.

My program of study (Computer Engineering Technology) has a great instructor base. The instructors go beyond their duties by helping the students whenever needed with anything within their capabilities. I really think the CET program has the best instructor base. I felt like they were not only my teachers, but my friends also.

The personal detail I got from the staff.

The Business Administration program builds personal confidence in the student to be able to publically speak and to work collaboratively with others in a positive manner. I would positively recommend Cape Fear Community College to my family and friends.

Knowledge gained through instruction and my life experiences.

This program not only teaches you skills and information needed for a future job, but it also provides you with information that everyone should know for their every day life.

the hands on experience and the ability of the teachers to answer pertinent questions

I believe the strengths for my program of study are that I received proper guidance to help me prepare for my future goals. CFCC has also helped me be more prepared for transferring to a 4 year university.

Gives one basic skills and knowledge to prepare for a four year university.

I want to be a genetic engineer so the benefit of that job is permanent job security.

Math and English

The English Department at CFCC is incredible! Mainly, those instructors with a Creative Writing background. The small classrooms, sense of community and experience of the writers/instructors nurtured my writing ability and motivated me to achieve goals that exceeded my own expectations.

Wide diversity of sciences that let you explore possible majors

The teachers were the main strength of my program study.

The teachers I have had were awesome! There was one teacher that I didn't match well with but overall they were great. The Library and tutoring services were on point and did find them very helpful.

the night beginner instructor Ella Johnson was instrumental in my success

The teachers I have encountered. I realize that it is sort of a luck of the draw deal when you are picking teachers, but I have certainly gotten lucky in my choices. Almost all of the teachers I have had have been hardworking, help me to succeed to the best of my abilities, and have made each class a class worth going to. They made each class a joyful memory.

Another big strength has been all the help I received from [Instructor Name] without her I don't know how I would have gotten through some tough times.

Probably the History courses I took. Who knows, I may become a history teacher someday!

the instructors are very dedicated and very passionate about what material they are teaching. the teachers are also very approachable and will do their best to help you in any way within their power.

Easy classes

I think a strength of the Business Administration program is learning through all the various required courses what it takes to work in the business world or trying to one day own your own business.

I have improved in a lot of skills through attending Cape Fear Community College. The professors have been a big help, and have been there for me when I did not understand. Pre-Elementary Education is a hard program to pursue because of the demand for teachers and for their help. The classes I have taken through the years have proven to be a challenge but have made me love the program even more. The courses in this program are a great preparation for education careers or transfer students.

Strengths are the ability to shape future generations, making meaningful contributions to child's life, be a good role model

The strengths of my program of study are any math and communications courses.

Great instructors

Gained knowledge to help me in "real world" situations and jobs.
I feel that with an AGE degree your variety in courses is limitless and your knowledge is wide.

The multitude of choices allow the student to tailor their experience to their liking.

My study right now is transferring. At the moment, getting all my credits, so I can transfer and learning the basics is a major role.

I think this program is a good program for transfer students because it gets all of the basic classes out of the way so whenever you get to a 4 year college you can just concentrate on your major.

THE INSTRUCTORS - A LOT OF THEM WERE AWESOME

The up to date content and the instructors were really engaging.

The strengths of my program of study include the balance of hands on experience and training and bookwork and are amazing, your credits are wonderfully organized and match well with other colleges. are amazing, the credits well organized and plenty of classes offered.

The nuclear and the industrial safety courses provided the most helpful information in preparation for on the job.

I have the ability to transfer to a four year college with my transfer program at cape fear. I'm also able to acquire all the general study classes i need before transferring to another college.

I think the strength of the college transfer program is the broad selection of classes I was able to take.

The teachers were very effective.

Helped me transfer to a four year college with the same education I would have received at a University at a more affordable level.

The program of study was able to give me the same education that a four year college would have but at a more affordable cost.

I think my strengths are Payroll and Managerial Accounting.

There really wasn't any. Half the people in some of my classes shouldn't have even passed English 065. There English was horrible, they couldn't even compile a sentence in proper English. The requirements are too simple.

New building and equipment.

Locality, reasonable and feasible Cost, Ease of parking & attendance, Size of school handles class load well, class availability. The program is the strongest in Networking and I highly recommend for anyone seeking to learn Networking to attend CFCC for smaller class size and better hands on. This makes a big difference in both the learning curve and confidence in future employment.

It offers a variety of courses to choose from while still requiring the core classes.

To prepare myself for higher education!

the ceramics department, the variety of subjects, and all of the phenomenal art instructors, who are all extremely knowledgable, passionate, and insanely gifted in their craft!!!!!

the strengths in getting an associates degree in arts are the many different subjects of study i learned in and the diversity of them.

Our lead instructor is very knowledgeable in his subject. I was able to learn a lot about the nuclear field from his experiences and teaching. Also I was exposed to a lot of different courses that expanded my knowledge of various vocational subjects.

the hands on activites givin to students by teachers.

Broad course selection.

Cost

Hands-on experience through the internship part of the program. Organization of the in-class discussions and the ability to use legal sources while on campus.

Payroll and Managerial Accounting

Allows you to get a lot of college credit done with so you are not starting over once you get to a 4 year university.

The strengths of the program are the teachers involved in the particularsubject. They provide students with every opportunity to succeed and offer extra help to anyone who needs it.

I think the strengths were the flexible online courses.

Staying positive, reading and studying the chapters and help from my teacher and peers.

I think the strengths of my program are definitely the actual boat time and all the hands on training you receive.

The challenges of my classes made me academically ready to further education.

Broad knowledge of the basics for business administration and the ability to to be flexible in my future employment opportunities.

I have the ability to go into several job areas with an associates degree.

the best people were my english teachers, and my new counsoler! Everyone else at cfcc are mean, and rude to you.
The knowledge of the staff on the subject.

We had a lot of hands on and I think it better helps us prepare for our career.

Most the teachers care and help put their students.

Allows me choose my own courses based on my interests while taking the required academic courses.

The teachers are dedicated

I found the professors to be dedicated, enthusiastic and knowledgeable in their fields. The education I received at CFCC was a good basis for transfer to a Bachelor of Science program at a four year college.

My program of study offers a broad selection of classes, especially art classes. With such a large selection of art classes to choose from I was able to narrow down the options to exactly what I want to study at a four year college after I transfer.

Since its General studies it doesn't just focus on one particular thing but about everything.

Gives hands-on experience for work in the film industry.

Instructors

Communication

I think the strengths were me being able to get help whenever needed.

Knowledgeable instructors

software use

providing mediocre service

The wonderful transfer program at CFCC is something that should not be overlooked, the price of college in this downward economy is overwhelming. I felt I received all the tools I will need for a University. This is an excellent way to educate yourself, pay for college, and be able to move on to higher learning. The program's greatest strength is the fact it puts your goals reachable. You have the reward if you work hard to transfer to many excellent schools. While taking classes at CFCC you can save your money. In hopes, later to pay for your aspiring university, in the future. All and all, a great program.

My strengths from being in the program, is knowledge to know how to handle customers in any situation whether it is good or bad.

Awesome teachers! Definitely prepares you for the field you're going into.

I think my course instructor is the strength of Industrial Sy

are willing to learn.

I really got a lot out of several classes. Business Finance and Geology gave me the biggest challenge and from that, a wonderful feeling of accomplishment. As a whole, the program is very well rounded.

The teachers in the paralegal department are the best!

it helps me prepare for my classes for the nursing program

Knowledge of the information

There is a very strong core study of math and science in my program. Both of these areas of study will be necessary for me to continue in a computer science or engineering program.

Very helpful instructors who had prior experience in the field.

The film program has up to date technology and teaches the student every asset that goes into running a film set, allowing them to acquire multiple skills.

The teachers whose careers were what they were teaching

The hand on experience in the kitchen with the culinary part of the program, being able to make mistakes, and learn from it, also the recipes conversions. The management sections of the program has great instructors in the Human Resources Management, Food, and Beverage cost Controls, and Purchasing, and Purchasing Lab. Over all a very good program.

lots of hands on experience with up to date technology

Even though I did change my program a few times, I feel like College Transfer filled my needs because I want to go to a 4 year university over anything else and because I love CFCC so much I decided to stay and get a 2 year degree. I believe the atmosphere of CFCC is what made me want to stay.

I having a wide array of classes and teachers to choose from for learning my strengths and weaknesses.

I believe the instructors are very strong and the equipment is completely up to date

There was a good range of choices as far as the classes I could take, which allowed me to specialize in areas that will be more applicable once I transfer to a four year University.

More knowledge of the boating industry.

The program strengths would have to be the teachers. They are always willing to help and are very effective in doing their jobs.

individual contact with professor

I liked that nearly everything was available in the evening. I'm not a big fan of online courses, but they were able to make up what I couldn't take in person. For the most part I'm quite happy with the program. There's only one glaring exception, which I outline in question 18...

The instructors are wonderful, especially . She truly cares about her students being able to get employment when they finish the program.
I was very lucky in the professors that instructed all my courses. With their help I was able to succeed.

One on one training with the instructor and up to date information.
The facilities and labs. As well as the instructors.

You get a wide, basic knowledge to help you develop your interests.

My instructors were the strength I needed to succeed and grow academically and personally. Almost all of them impacted me and helped me to understand and appreciate my program of study. Arts is a general course of study, but with all of the classes necessary, I believe I learned a great amount here at Cape Fear!

The teachers at Cape Fear are amazing to work with and they are very knowledgeable in the courses. You get one on one help, if needed. The technology and books are up-to-date.

The ability to expand beyond my current knowledge and expand my horizons within the basic studies courses has allowed me to strengthen myself at CFCC.

The diversity of the Classes and teachers.

The strength of the course comes from the instructors they have the knowledge and experience that students need to understand not only how to do the job but what it takes to complete it.

The major strengths of my program of study include the professors teaching the class and the actual curriculum. My professors were knowledgeable on the topics they were teaching and were willing to help whenever no matter what. The technology used was amazing as well. Since my program of study is Pre-Elementary Education, the honor of having a smart board in most of my elementary education classes was a plus. When asked about them, my professors explained to my classmates and I that they are a wonderful tool for classrooms.

All the professors. I think that all the teachers I had were very knowledgeable of the subjects and all were willing to help.

Experience and dedication of the instructors

A focus on strengthening speaking and writing skills was evident in the College Transfer/ Associate in Science program of study.

I love the hands on things you get to do during the program.

my english and science for the most part.

we have great professors in the criminal justice program

not sure what your asking here but had some really good teachers, and like how most or some of the school seems to be progressive

I believe that my strengths are having prior knowledge about my program of study, the amount of resources that were applicable to a student. I believe that I have progressed in the program.

The variety of the programs set me up for any 4 year degree that I would like to get.

Cape Fear has prepared me for the work environment.

Good hands on experience

The professors of the Criminal Justice and Psychology fields are great!

Excellent instructors

My program has wonderful instructors that are able to incorporate the practical side of learning with the intellectual side. They are always available for any help and support, if/ as needed.

I believe the Accounting classes, computer classes, and Business classes all give a great amount of info needed to succeed in the business world. These classes open up lots of opportunity to find a job that will utilize the skills learned.

Great teachers

In my opinion, there is a vast array of opportunities in the Medical Office Administration program. I have studied accounting, anatomy, and I have learned how to transcribe. Along with additional subjects to build my knowledge, such as English and computer classes. These classes have exposed students to discover another realm of possibilities of careers in accounting or further their studies to become a nurse or realize they have a passion for computers.

Since my major is science, I spent most of my time with science professors. The professors are very helpful. I do not have one complaint about them and I feel they are the strongest part of this program.

There are a variety of classes to choose from. The classes are a small number.

Very Informative

I believe my program of study focuses more on the procedures of how to do certain things in the office setting. Once you know how to do it, then you can adjust it to fit the particular office you are working in.

The biology classes, they really get you prepared for the material you need to know for nursing.

I feel that I am prepared to attend a university because of all of the challenges I experienced here.

The learning environment and knowledge of the instructors. Practical application of skills to the work world.

Teaching things that I will actually use in my job field

I think with earning my associates in communication and taking the classes required, it has given me the strengths to succeed in a professional atmosphere. I feel that I am much more knowledgeable as how to present myself as well.

The teachers and labs
It gives me the basic knowledge I need to go on in life.

The ability to apply what I have been taught in the real world.

I think the strength in the program comes from the flexibility in the program. The student is given a wide variety of classes to choose from enabling the student to truly figure out which path they want to choose for themselves.

Clinical time

The general education program was comprehensive and exposed me to many different disciplines. My instructors as well as books, materials, and information all seemed to be well synchronized with the most current measures of study.

customer service

Math and Science classes

customer service

The entire program was solid and well balanced

Teachers commitment to students, and teaching, professionalism, and knowledge of expertise.

The strengths are a strong academic base, small class size allowing for individual attention, and adequate classes offered.

Being an early college student, Cape Fear allowing me to take classes here has opened provided me with so many opportunities. In addition to that I am also in the associate in sciences program, and there are numerous strengths within this program. The teacher's I have experienced in this program are superb, and I appreciate that they did not look at my age as a hindrance.

That each instructor has personal experience in the field

It allows me to get a degree in something i enjoy while also easing me into what i ultimately want to major in.

Great teachers like !

My strengths would be in Math and Chemistry. I really enjoy these studies and would like to pursue a career in Engineering at North Carolina State University. I like to comprehend the equations and figure out things on my own and make them work.

The multiple accounting classes will help when I transfer to UNCW

Business Finance, English, Basic Math and Accounting skills, and I enjoyed Geology.

My ability to write thoroughly.

Broad range of electives to supplement my education.

The small classes and availability for working adults.

The Science Dept. is amazing, if my instructor wasn't available for me to help someone always did.

The strengths of my study definitely was all the hands on experience we attain through out the program.

My strengths are my Sociology & Criminal Justice classes.

I think the strengths of my program of study in my personal opinion are psychology and humanities courses along with the science department.

The associate in arts transfer core programs offers the perfect balance of general education. This is extremely important to know basic computer, math, and science skills. Which this program does a great job of giving students a better understanding of how the world operates. This is a good program and I would recommend it to anyone, and everyone.

One of the biggest strengths of my program would be the variety. Every classes in its own way challenged me and I learned an enormous amount of knowledge in each class.

Basic knowledge of sciences.

Everything

A strong focus on sciences and the large selection of transferable credits allowed me to choose the courses that would best help me succeed in my chosen path.

My strengths were my science courses.

The Associate of Arts allowed me to take a variety of classes that helped me learn my different skills and find what I was interested in.

My instructors are great. Although I learned a great deal from the information I received from the material in the books I learned far more from the life experiences and hands on activities I was able to participate in. The hospitality curriculum has one of the best group of instructors at the college.

I will be able to transfer to 4 year college of choice with a degree I plan on pursuing.

The teachers in the program have had experience and can relate to the material in the book, allowing a more depth of learning.

Having excellent teachers.

Good teachers.

Techniques and ethics, because we came with the wrong idea that we know everything and was going to be easy.

Classes that are geared toward a career in teaching.
I think the strengths of my study are that it challenges you to use your time wisely. It helps you realize your potential as a student. Makes you feel great when you succeed in a class. It also helps prepare you for real life and employment.

I think that the strengths of my program of study are diverse. Teaching the ability to think critically is one of the strengths. It helped with my confidence in different subjects. The teachers were effective. The courses were challenging but not too challenging.

I feel that my program of study has many different strengths including the ability to write effectively, understand biology, complete difficult math problems, and understanding of human behavior.

I think that CFCC is a strong community college in general. Every program offered here is amazing. I was extremely satisfied with my program and the way that everything turned out. I would recommend this to anyone. All of the instructors that I had were very knowledgeable on their subject matter and the majority of them had great teaching strategies. This college was very helpful to me in figuring out what I ultimately want to do with my life. I couldn't have asked for better advisers and counselors. I am more than satisfied with my program of study and have no complaints.

Great foundational classes. Teachers were insightful, helpful, and were a pleasure to be around. The course materials were comprehensive and thorough.

I think the English and Science departments are challenging in the best possible way.

The experiences from my major classes were outstanding. I truly enjoy the teachers I have had at Cape Fear. I felt like they all cared about my personal success and that meant a lot to me for character building purposes.

Was able to take classes online.

In the paralegal program I feel that the fact that most, if not all of the professors were practicing attorneys enhances their ability to provide real life experiences to the class. They are well informed on the subject matter and up to date on new practices.

I feel that this program has properly prepared me in all fields, while being challenging but not impossible. The field of study I am going into; healthcare, is a strong never leaving field. People will always get sick, and will always need to be taken care of. Through this program, I was able to have a better my self in college courses.

I really enjoyed the freedom to explore different electives within my basic studies program.

The Mechanical Engineering Tech program give students a solid base for employment. It is very useful using CAD drafting programs such as AutoCAD and Inventor.

Writing and speaking effectively

All of the instructors that I have had have been extremely helpful and very passionate about their courses.

Program has a variety of courses, but emphasizes mathematics. The mathematics department at CFCC is exceptional, to say the least.

Fantastic instructors, wide choice of courses, flexibility.

great teachers

The instructors in the art program are very skilled at what they teach.

my program of study is Pre-Dental/ General Education. After the prerequisites were completed for the Dental Hygiene Program, I planned on applying and completing the Dental Hygiene program. I am still deciding whether or not I am going to apply to the Dental Hygiene Program. The strengths of the General Education Program are that I have gained general knowledge in every aspect of it. I learned some new things I did not know; also having an Associates in General Education is a prerequisite to most of the programs that CFCC offers.

Instructor knowledge

Smaller classrooms, positive atmosphere and great student body

The abundant amount of good professors

The instructors in the Radiography Program are top notch. It is a great program as far as hands on experience as well. In total, I think we end up going to thirteen different clinical site rotations by the time we graduate. This really lets you get exposure to a lot of different work environments and a better sense of what type of work setting you might look for when applying for employment in the future.

Teachers were all very helpful, courses are useful for my future plans

I feel like I have received a well-rounded education preparing me for any and every employment opportunity that may present itself.

All my instructors were very passionate about their field of study and that enthusiasm transferred to myself as well. The art department is full of knowledgeable teachers who are more than willing to help students who put forth extra effort in any class.

The strengths of this program were the organization and the ability for the staff to be hands on and very helpful.

The English department actually challenge the students.

The English dept challenges the students.

The teachers at Cape Fear Community College are very dedicated to their students. They are extremely knowledgeable of their areas of study and enjoy teaching.

Variety of professors with different teaching styles

I believe the strengths in my program of study would be the factuality and staff.

Sustainability is the new thing.
Comprehension

My strengths are that I built up from the floor in English and Math. I have a strong knowledge on writing effectively and better with numbers.

The strengths of my program of study for me were the sociology, English and psychology. They were awesome as well. Although the math and science classes were a struggle I completed them. There was a great deal of other resources available to assist with the math and science classes. Overall I enjoyed having the experience of it all.

CFCC offers a large amount of science classes. The CFCC science teachers are also very nice and helpful. CFCC also has a learning lab for science majors which helps a lot because there are tutors that can help you.

My strengths of my college transfer program have been learning how to “jump in” and get involved in class. My favorite classes were American History and Western Civilization. I also really enjoyed Intro to Sociology and Sociology of the Family and my Humanities classes.

The strength would have to be the skill development in the art studios. Without determination and many hours of work and creativity, you will not be able to develop your skill. Having an open studio and teachers/upper level students helps greatly in achieving this goal.

My strengths of my college transfer program have been learning how to “jump in” and get involved in class. My favorite classes were American History and Western Civilization. I also really enjoyed Intro to Sociology and Sociology of the Family and my Humanities classes.

The classes involved and my interest in those classes.

The courses and teachers pushed you daily. I appreciated that.

I believe an associates degree in science provides its recipients with strong critical thinking skills, a well rounded background in a wide variety of subjects, and a great start into the job market.

It gave me a variety of classes to prepare me for the working world. Just a semester after starting with CFCC I had to start working full time. CFCC gave me the opportunity to take all my classes online and still go to work full time. It also helped to teach time management as well.

Writing

I did not have to take very many courses that were not relevant to me.

It prepares you for a university setting and helped me learn a lot of things that were very helpful to my career.

Learning the general education that was extending from my high school education. Being able to decide which pathway was right for me.

The hand on experience definitely helped out and the instructors were very personable and cared about helping you learn.

Gives you a strong back ground on improving your knowledge in all areas of Education

The instructors in criminal justice classes are very knowledgable.

Thorough inclusion of multiple fields to create a well rounded base

The strengths of this program is the hands-on classroom experience. I think this one the best things that you can have for students to learn with.

The teachers are extremely effective in preparing the students to perform and pass the state board examination required to get a cosmetology license.

I chose general education because I could not decide what area I wanted to study. The general classes are all great and I learned a lot within all of the different courses I took.

I feel well prepared to pass the state board exam.

Sociology, Accounting

I do not feel that any one area was more important than the next. All of them were important to me.

The program prepared me to move on to receive my BS.

The strengths are the professors. I felt that the accounting and economic instructors were on point.
Some strengths would be the fact that the classes prepare you for what in the real world now. Not what was important years ago. The classes are up to date!

My program of study teaches you the basic skills of transferring to a University. It helps you understand what to do in more complicated situations.

The instructors are down to earth and willing to help in anyway possible to make sure you get the most out of the courses.

Instructors

The strengths of this program are the instructors are very knowledgeable and have a lot of experience in the business to help educate. The books are very up to date with current events and the current economy.

Great teachers.

I think the fact that my degree in Associates Arts is so broad is a major strength. I like that throughout my time at Cape Fear I was able to touch on many different subjects for my degree. Now that I have an Associates in Arts degree, I feel like my career path will be more successful.

the close net group of students i have encountered, that are willing and determined to get the work done and go above and beyound what is expected of us as students.

It gives any individual the educational freedom to take an array of courses and see what Cape Fear really has to offer to the people. While not narrowing things down to a specific major, you are free to take any course you want but can also focus on courses that could have an impact on your future choice for a major down the road. In this busy life flexibility is key and Cape Fear has that.

The strengths of my program are the speed in which it can be obtained as well as the challenge that is presented.

English program

Fantastic instructors, interesting classes, and a wide range of courses to choose from.

Great instructors.

The teachers that are in the CET program are excellent. CFCC should be paying these guys way more as they go above and beyond.

Creative Writing, British Literature, Art History, Anthropology, Psychology, Biology classes

Accessible, cost-efficient, decent selection of classes to take, ability to take classes that interest the student and still be counted within the program of study.

I chose to enter the transfer program. The benefits of my program is that it is cost effective and a more simple path to a 4 year university.

The Paralegal Technology Program is very intense and full of so much information. The instructors are very knowledgeable and helpful. The material covered will open the door to numerous job opportunities.

Instructor spectrum of knowledge applicable to the program, hands on training, availability of resources

Learning hands on in a work based environment.

great course load

My program of study strengths are that it has many classes available and great teachers to teach the classes you choose.

The knowledge of knowing the different disorders a person can have and how the brain works down to the core.

I am able to identify the different ways the brain functions as well as the associated dysfunctions the brain can have as well as the many types of disorders that can arise.

I am aware of the different ways the human brain works as well as how it is made up in the human body. I also have knowledge in the different disorders someone can have and how to treat them.

Preparing students to enter the workforce immediately and with instruction using high-end chemical instrumentation. Instructors are very helpful and understanding.

The helpful instructors.

Hands on.

The foundation to complete what will be a long journey in a field that engages me intellectually both academically and recreationally. The program at CFCC prepared me mentally for any challenge I may face when I transfer.

The ability to learn much from my first two-years of college.

The variety of arts courses offered.

For the cosmetology program I believe the biggest strength we have is the preparation that goes into the students when it comes to taking our state board exams.

The strengths are the hands on instruction and experience. Another strength is the hands quality of instructors in every class that I have taken in the program. The follow through by the department chair on any questions or issues I may have had. And the follow through with instructors with any concerns or questions, I may have had.

The strength is the staff of Cfcc. The science and health professors are beyond fantastic and willing to work with me through the semester.

The sciences are well-taught, and interesting

Mathematics and Accounting

the teachers
Cost of going to a community college

Very competitive, instructors get you very prepared.

Decent teachers.

I spent three years at East Carolina University prior to coming to CFCC and some of the best instructors I've had throughout my college experience are on staff at Cape Fear. I think the strength of my program of study comes from the great teachers.

Program has definitely giving me the confidence to go to work, apply, and feel that I know exactly what I'm doing and working on.

The facility is amazing and it is a fun environment to be in most of the time

The classes that are available to aid in other areas that may not be directly related to the curriculum are abundant and allow students to grow.

Great professors that were willing to help if needed

The training cruises

It is a great hands on program with a great staff. Also I feel that it truly prepares you for the type of work one will be pursuing upon graduation.

This program gives me the option to transfer to a four year college such as UNCW.

I liked that I was able to study many subjects instead of just one, I feel I learned so much this way. And I loved that I was able to choose many electives, which allowed me to be able to earn a degree in the intellectual field of my choice and enhance my creative side.

Technical side of the Video studies

I formed a purpose, a reason to study and better myself.

It is the best in the state at the Community College level and the only local program.

Great teachers that actually care. Small class sizes, perfect for one on one learning.

My program of study has prepared me to effectively and professionally work in a diverse atmosphere. My program of study has also enhanced my computer literacy, a valuable asset in today's society.

The ability to work with your hands, as well as a level of expressionism.

I had the opportunity to use my interest in many different subjects to complete a degree.

Flexibility

It really helped me with my basic studies and more importantly, with information I will use for my lifetime career. I feel that I am prepared to transfer and start furthering my knowledge in my major.

get me ready for 4 year school and major in social work

One strength would be exposing us to a variety of subjects which show the the power and capabilities of the degree. I came in thinking it was only going to be kitchen school but quickly discovered it was closer to restauranteur school, with a healthy dose of the art of the hotelier as hospitality and food have had a long standing and happy marriage. Our formal culinary training being supplemented with courses on everything from human resource management, selection and procurement to food science and nutrition leaves us highly well rounded individuals who are capable of communicating the ins and outs of our passion with the ease of a professor. My program of study also does a outstanding job of supplementing the classroom work with real world excursions and events in the field that have the ability to educate in new an exciting ways. Visits from herb farmers, personal chefs, caterers, celebrity chefs, ice carvers awaken the vision of many. Trips to water filtration plants, local fish mongers, butchers, artisanal and international food vendors, coffee roasters, farms and culinary competitions gives students a view of the food world in action. One also has opportunities to brush elbows with everybody in the business while volunteering for one of the diverse events. These lead to positive networking and potential job offers.

The programs I took at CFCC were hands on and help me prepare for real life circumstances in the work field.

My strengths are in Theatre and Music performance. I really enjoy Acting and Performing Music and I hope to fulfill these desires as a career.

For this degree it was offered with the addition of a couple classes.

The strengths of the program is the classes needed for the study program are transferable and closer to completing the credits for it.

Student Input

The terminology courses are really beneficial for this course as well as the administrative classes that teach that portion of the class.

The strengths of my program of study are the great teachers and the material is interesting and helpful towards my future.

I feel that I should be able to enter a business with the knowledge to help improve the company.

Students will financial difficulties really benefit from obtaining an AA Transfer from a community college. Completing the A.A. degree at Cape Fear community college was less expensive (tuition and fees) than completing the A.A. degree at a public state university. With that said, I feel like I received just as good as an education as I would of obtaining my AA through UNCW.

The strengths of my program was that I was able to figure out which area of study I really wanted to pursue. Before I was in this program I was unsure of what I wanted to get my schooling and now I am very focused and excited to continue my education.
The program I choose really helped me to decided what I wanted to specialize my schooling in. It really helped me decided what I really wanted to do and I feel able to excel.

I think the strengths of my program of study are the ability to work with real equipment that is used in the field.

Learning a subject of interest that I had no prior experience with but have always wanted to learn. Really appreciate the HANDS ON learning aspects of the shop and labs. Good instructors for the program make it easy to learn and understand.

I really loved the Science Department. The staff was very influential and determined to teach the material effectively.

Legit preparation for real world IT careers.

in my program of study we do alot of hands on with the children i believe my strengths are the hands on projects and working with children and my class mates

The strengths in my program of Special Education are helping others that need it more. Giving my all to help impact and change someone else's life.

Academically prepared to enter a four year university.

I believe Cape Fear's transfer program is very effective in preparing students to move foward to a four year university as well as the work force. Cape Fear Community College is challenging yet effective in providing students of all ages an opportunity to reach a higher education.

I think I have been able to work with some truly incredible teachers who have supplied me with adequate insight on the path I am choosing to study.

They use a hands on approach comparable to other community colleges of their stature.

Learning a wide variety of skills

Math, there are tough math classes required to take

Some of the teachers are amazing. The price was very good too.

The dedication of the Instructors in seeing the students succeed.

Great preceptors in the program.

Prehaps the different levels of cirriculum within the classes. Along with that my teachers provvided good guidance and I was able to challenge myself in areas that I had little knowledge of beforehand.

The lead instructor was very helpful in advocating employment opportunities.

Some strengths for the transfer in arts is better preparing students for the transition to a university and allowing them to complete basic study transfer courses for a fraction of the cost while deciding on a career choice.

The faculty. Fantastic teaching staff.

The ability to transfer to a 4-year university

The strengths of my program were my science courses. They helped me understand the field that I would like to be in in the future, Animal Science, and most of all the zoology course was absolutely incredible and the highlight class. I feel that it allowed me to experience and learn from all fields and aid me in deciding what my longterm goals were, career-wise.

A big variety of classes to choose from that are accepted in continuing education.

Getting work done and in on time.

challenge of the mind, very informative about human life.

Production based classes.

The knowledge of our lead instructor, constantly updated

Small Classes so there is more hands on time and more student teacher interaction.

The classes touch base with every aspect of my career field.

Math and Science

the strength of my program I felt was that it allowed one to be creative.

The ability to transfer to a four year university.

Medical Terminology I & II, Computer Courses, Administrative Classes

CFCC should be proud of their engaging and continuously developing Early Childhood Education Department.

I think being allowed to be creative was a strength of my program.

The teachers: The teachers are knowledgeable and helpful.

Although, there are only a hand full of instructors that teach my major, they are all very wise, nice, and truly care about what their teaching and their students. I like that all of my instructors have worked in the hospitality business. It helps me get a better insight on what my career will be like.

I have acquired the knowledge needed to finish out the program and become a success registered nurse.

Everything

It offers a variety of math and science courses that will be the bedrock of my future study and career.
Small classes and knowledgeable instructors

Allowed me to study a wide range of topics and helped me to make a choice for a career.

Being able to work with children

That with the knowledge of electrical properties and calculation, I feel very confident that I could go to a residential, industrial, and even an electronical work field with electricity and be a reliable asset to any company in that field.

I learn differently from other people and I have things I can learn that are strong enough so I can know what I am doing.

The criminal justice teachers were a big help in understanding the subjects by using their own personal judgements and what they have experienced during their career in criminal justice.

The knowledge of electrical properties and calculations to size a circuit.

The resources that students can use like the learning lab with tutoring.

It helped me getting to UNCW quickly without having to stay at my old college in VA.

N/A

I think the strengths in my program include the way our instructors are dedicated and care greatly about us. I think that a strength is that because we have a handful of instructors we're able to become close and feel like family. With that being said I do think that the lack of instructors in our programs hinders us in being able to take the maximum amount of classes we can because certain courses are only available certain semesters.

One of the main strengths of an Associates of Arts is the broad base of knowledge and skills it instills. The diversity of requirements is designed to grow the student on a personal level and an academic level. An Associates of Arts at Cape Fear is a true education.

The strengths of my program study is that you can easily find a job in this field, I was able to learn more about English and Biology, and my teachers were great!

Electrical

The ability to use the online courses.

Most of my professors seemed to actually care about their jobs, and want to teach students.

I think the strength is having a free choice just in case you don't know what you want to do right yet.

I think this program of study is perfect for students exactly like me. Students who aren't really sure what they want to do with their life, students who aren't sure what field of study they want to go into. It offers all different classes so that students may test their strengths and weaknesses in different classes. Gives students the opportunity to figure out what they might be really interested in and what they might want to go into after college.

The wonderful staff and the learning lab are probably one of the strengths that helped me through this program.

It's an open field and there are a bunch of directions I could go with it.

I think the classes Introduction to Mathematical Concepts 1 and 2 are strengths of this program because it leads into elementary education.

I think that the strengths of my program of study are the English classes. No matter what career one decides to pursue they have to know how to write properly and speak proper language while speaking. Another strength in my program of study would have to be the requirements for the electives. I have learned many different skills in the electives that I have chosen to take. They teach you more than the curriculum; they teach you life skills as well.

I liked the challenges of taking a variety of classes.

The strength of the program is that it is the only marine diesel school in hundreds of miles.

When I finally decided to just get my transfer degree I found most of the classes were worthwhile.

I believe that I learned a broad spectrum of knowledge that I can apply to everyday life. I also feel like I have been well prepared for entering the working world and starting a career.

The professors and how helpful they are.

Availability of classes to take to begin the basis of a collegiate career.

On-site training

On-site training

I have learned all the basic things and taken all the basic classes to graduate and transfer to a four year program and I feel pretty confident in my computer and communication skills due to the great instructors and classes I have taken in those studies.

It is the only marine diesel program anywhere close to North Carolina.

The teacher's caring about whether or not the students are learning, plus the willingness to go above and beyond the basic teacher requirements to ensure student satisfaction and preparedness for the real world challenges.

Jerry Barton is an excellent instructor and expects a lot of his students. I really enjoyed the course and felt like I am definitely qualified for employment in my phlebotomy field.

It better prepared me for my future course of study.

It gave me a stepping stone between high school and a university.

Good teacher. Good clinical sites.
The strengths were that the teachers were outgoing, energetic, and understanding. I feel that many of my professors worked with me to ensure that I could complete all the work necessary and that they made sure we knew about help outside of class. I also liked that many of the labs of our classes are online because that made it easier for me to work from home as I am a single parent and work part time.

I am very happy with the educational experience I had at CFCC. I feel that the work was challenging and I appreciate that attendance is important. My professors were all very energetic, informative, and understanding. I feel that many of them understand that students have other responsibilities and helped make it possible for us to complete our work while maintaining a busy life. I was happy to have online labs in some of my classes as this allowed me to do some of my coursework at home. Being a working single parent, this helped make school more manageable for me.

It is a good basic program for those looking to continue in business or marketing and can easily be transferred.

Being able to manage several employees without being nervousness about how to delegate jobs for future employees to perform.

The hands-on experiences.

I believe the size of the classrooms turned out to be beneficial to obtaining my pre Social Work degree here at CFCC. They were all relatively small, allowing me to always have complete interaction with my classmates and teachers, as well as easily being able to read and hear what was going on the entire class period. Also, I was able to complete all of my core classes along with some important social work electives. The ability to do both, along with my internship outside of school, proved to me that Social Work was exactly what I was looking for in a long term career, as well as an area to which I would dedicate the rest of my life to.

The range of degrees available through this school.

N/A

I have learned how to communicate effectively and on a more professional level.

I enjoyed the closeness of the community and the convenience of the location of the school. I highly recommend CFCC to anyone who is interested in attending College.

It's easy and cheap.

The teachers have hands on experience

Mr Richie

The material is very thorough and relevant to things I will encounter in the field. There was a lot of hands on labs and what not to help prepare me for situations in the workplace.

It's a new program and it is evolving into a great one. The program explains the methods of construction as best as possible and the hands on experience is awesome. The program also can transfer to a four year university and there a so many opportunitys to advance in the construction industry. Another strenght is coming out and receiving certain cerfticates that go with the program.

Writing, learning new ideas,

I feel that the strongest advantage of the AA Transfer Program from CFCC is the financial aspect of saving. You get adequate education for an affordable cost.

It fulfills almost all of the basic requirements for the 4 year university I am planning to attend. It is a nice variety of courses and allows some nice options within those courses.

I think my particular strengths in my program have been my honesty through out my classes.

The strengths are the academic intensity of the classes in the program. It is a very challenging program but I think it prepared me well for the workplace. I also like how the technology we have in the program is very up to date.

Diverse class requirements that allowed me to broaden my educational spectrum.

My program had excellent clinical instructors and adequate ultrasound machines.

The labs were well planned and organized.

The teachers who teach the courses

Lab hours were invaluable. Instructors were both professional and practical. Their field experience made the course interesting and informative.

The strengths of my program allow me to go into any science field I want, have challenged me, and have prepared me to enter a four year university.

Writing and expressing myself in a proper manner
writing and expressions through writing presented properly

The teachers are personable and willing to reach out to students to help them through their academic careers.

the strength of the program is the instructors

gaining the basic knowledge needed to carry on into any field I desire

They were are well planned and executed.

I chose to study to become a paralegal because there is a wide variety of employment opportunities, and I liked learning about federal and state law.

Yes, the program of my study improve my critical thinking
It's a stable field and it's also very challenging.

The program I am in helps me to understand what to look forward into when trying to run your own business.

The program Eval tells you everything you need to take to graduate in Industry.

Some strengths of the Social Work program are that the classes are interesting. There is much room for the student to choose what classes he/she wants to register for. Also, there are jobs attainable with a Social Work degree.

Being able to transfer to a Four Year University and already have two years out of the way. The arts degree makes room for itself...

Great science labs and teachers.

The products used and the teachers' knowledge.

It is very flexible and you can take classes at your own pace. You have more one-on-one time with the instructors here than you would at a university.

Prepares you very well for employment.

The strengths of my program of study is that it allows you to take a broad variety of classes if you're not too sure what your major will be.

I feel confident with the knowledge from my fantastic teachers.

Small Class Rooms, More hands on approach.

Patient care in a clinical setting.

I feel that this program of study is overall tremendous. I have really enjoyed this journey.

Teachers

Good.

The strengths of my program of study had to be the science department as a whole. I had a great learning experience in biology as well as chemistry.

Great hands on experience, especially with the internship that is required in the paralegal program.

The knowledge of the instructors.

I feel the strengths of the College transfer/associate's of the arts is that you learn the fundamentals of various different courses which allowed me to view the world in different form, whether it was artistically from art appreciation, to mathematically, or scientifically.

My program of study allows for a very broad scope of learning, allowing one to have a better understanding of what they may want to study further on at a four year university.

I am now able to transfer to a four year university with the basic classes already taken. I can now choose a degree and pursue my goal which is to receive a diploma.

The program helps you to be knowledgeable in your field of study.

The classes I've taken have really allowed me to get a wide variety of knowledge in different areas. This has allowed me to really explore my interest and narrow down my field of study for the next course in my education career.

Being able to take a variety of classes to help narrow down your search of what you want to major in.

The 3 Criminal Justice classes I did get to take I certainly loved and gained a lot of information from.

The Economics courses

The versatility of the program is what makes it great. Being able to pick and choose a class so that you're able to explore many different areas of interest that you may have. Of course every instructor I've had at Cape Fear was also very helpful with my process of picking and choosing. They also were very helpful in the classroom.

It makes you more prepared for the working world. Provides well instructed welding techniques.

Good teachers.

I received the knowledge necessary to get my degree but also got knowledge in general areas in life because of my electives. The Spanish will also help with me trying to become bilingual.

I feel the whole program had its good points. Being well rounded is a good thing.

The program evaluation that helps you know what you have and have not completed, and what you need to take. It is a guidance to help you thought the whole community college experience.

The strengths were really my professors. They were always there if I needed that extra help and took the time in-class to explain things as clearly as possible.

Great opportunity.

The strengths of my program are that it is going to allow me when I finish to find and get a job in the field that I want to have a career.

Freedom to explore different and perhaps unknown fields of study through a wide range of classes.

Teachers have really good relationships with the students.
The teachers have had a law enforcement background.

The strengths of the program of study that I chose is the wide range of courses available for the program. I was able to take all of the classes that appealed to me which also applied to my degree.

**Broad, general knowledge**

Improves my job skills of working with children

The main strength of my program of study is the teachers who are passionate about their jobs and about teaching their students.

The texts and instructors prepared me to use my degree to either transfer to a 4-year program or begin a job.

The program of study is very well-rounded. There are many directions in which to pursue further education and employment.

SO much clinical experience really helps develop your skills as a professional.

Most of my teachers were great and very helpful. I could always talk with them after class or in their office.

The instructors; the teachers (most) at CFCC are incredibly passionate and knowledgeable about their subjects.

My program was very diverse which I find a huge strength that I can take onward to my four year university.

I am a college transfer student and I believe the courses I have attended at CFCC have prepared me well for my next level at a University.

It was fairly simple, it wasn't too hard and wasn't too easy. It was just right and the classes are great examples of General Education.

The teachers are fantastic. The school does not give them the room to instruct as they choose. The facilities are old and terribly outdated. The administration understands nothing about our industry. We often feel used by "The Foundation".

**English and computer skills**

good music education.

The art class where by best class, I like hand on projects, then writing.

The essential knowledge of the base factors and characteristics of the mental mind and all that are inclusive in the overall psychological aspects of the human itself. Understand an individual on a personal level and possessing the ability to mentor and aide them into a much better citizen of society as a whole.

I think the all the instructors at CFCC are great

Adequate Curriculum, Understanding Instructors, Challenging Courses

the tecnogley part and the hands on expercicne

I had great teachers for the most part with the exception of one or two bad teachers. Also the resources that are available such as the learning labs, the library, and many other devices really proved to be very helpful!

The Nuclear courses

Basic skills of writing, communications, ect...

Yes

**Broad academic areas**

Every professor that I have had attending at Cape Fear Community College has well prepared me for a four year university.

The biggest strength in my program of study are the professors, without a doubt. I have been challenged to think out of the box, to the next level, to challenge myself.

The nursing program needs to have more online classes, like Davidson County Community College for LPNs to RN. They have it where LPNs do 2 semesters of online classes and do their clinicals at their jobs and local hospitals. That way, CFCC will have a lot more money coming into the college and you will have a lot of people over the country trying to get into your program. The LPN will finish in just 2 semesters and be responsible for doing all the homework and test online. I think this program would work wonders!

It is challenging which prepares you for what nursing will be.

As a student I find that the teachers I have had during my course of study all have been great instructors. Good teachers make class and learning a great experience.

Cape Fear is the third community college I have attended and it by far has the best teachers. The teachers are educated in the subject matter and most of them have had real world jobs that are similar to the materials that we study.

Being allowed to branch out and take different types of classes while still acquiring general studies.

**Broad class options for major.**

The strengths of my program of study include flexibility for change, and a base knowledge that can be built upon in further endeavors.

Effectively prepare myself to transfer to a four year institution, while working on a tan.

**technology is pertinent to today's work force. Instructors are very helpful**

The strengths in my program of study are, well qualified instructors, technical and useful text books, access to tools and hands on technical experience (My program does need more hands on experience and repetition),
I feel that the salon at Cape Fear Community College has been an excellent learning environment for me. I have learned so much by doing "hands on" activities. Dealing with clients has gotten me extremely prepared for my future job at Bangz Hair Salon & Spa.

The nursing program thoroughly prepare students in developing technical skills that are essential to patient care. The program also develops critical thinking skills that enable students to identify and resolve patient care issues. The simulation labs that are conducted once a semester place the students in situations that requires use of these critical thinking skills in an environment that enhances learning.

This is a good program. However, I think more Cisco router should be included in the program since CFCC is a Cisco partner.

Study through the college transfer helped me obtain a basic level of understanding of Social Sciences, Music, Art, Mathematics, and English/Literature I feel prepared for college and much more informed on a variety of different topics after attending cfcc.

The teachers adequately prepared me for the design industry by teaching many technical details, requiring oral presentations, and giving many projects. I think that the teachers are very knowledgeable and helpful. The strengths of the program, in my opinion are the knowledgeable teachers.

I believe that my strengths are the architectural part of this program. I enjoy the technical aspect of it.

The strength of my program of study is that people can express themselves through art, and the professors here at CFCC do their best to allow that to happen.

A large field to expand in.

Very challenging nursing program that adequately prepares you for transitioning into the workforce with caring faculty and staff. In addition to having a night program available for working students.

knowledge base of instructors

An Associates in General Education has given me a broad range of classes and knowledge.

The smaller classes give you the ability to recieve great one on one time with the instructors. I feel that this provides a much better learning experience.

I think that most of the teachers are very knowledgeable in their courses. Most of the teachers do push you to think and be responsible.

There are a variety of courses offered to prepare for the diversity of a new job.

The strengths of the paralegal program are the courses that deal with legal research and writing. These skills are needed in the legal field.

Having the choice of many different classes to take so I could complete my degree program. Thus I was allowed to find classes that interest me and help mold my degree options from there.

The ability to take many varied humanities courses.

This is a very interesting program. I have learned so much. The teachers and equipment are great!

Developing capable students for the work force

Up to date knowledge of the instructors and the hands on experience I have received in the classes

The teachers are great at what they do, and know how to communicate and relate to the students.

Having an Introduction to Education class is helpful.

Getting the basic courses finish at Cape Fear will allow me to concentrate fully on my major at a University.

CFCC is a good starting place for people who either don't know what they want to do or for those who can not afford a four year university right out of High School.

I believe that are extremely knowlegable in all areas of the law. The find effective and challenging ways to prepare you for a job in the legal community. I have friends that have enrolled in the same program at other college communities and they are not exposed to a third of what Cape Fear Community College's program entails.

The fact that most of the classes I took, had overlapping topics. Which really helped to develop a strong sense of understanding.

The quality of books and teachers.

The teachers are very knowledgeable and understanding. They give real life scenarios and make themselves available when you need them

The Associate in Arts is a great program that gives students a well rounded education. This program is perfect for preparing people for transfer or ever the real world. All in all if I had to do it again I would not change a thing.

Instructors are nurses with anecdotal experiences to share. Strong clinical instruction and extensive clinical hours.

I feel that my strengths for my program of study are english and social sciences.

Great program which is challenging, but prepares one for the field.

The literature aspect of my studies.

I think the strengths of my program of study are the up to date technology and instructional methods used.
You are completely prepared for your job by the time you graduate. The program is challenging!

It's a great program to give you confidence that you can take on the world.

Flexibility with regards to scheduling (online classes were especially helpful), and covering a wide range of subjects.

Great teachers

The experience of the instructors.

I felt the strengths of the program was the experience of the instructors, they brought work experience into the classroom.

It takes advantage of my passion for art and transforms it into knowledge that I can use out in the real world.

I am trying to obtain a certificate in Business Administration with focus on Banking and Finance. I completed all the teller training classes and would like a copy to show my employers.

Provides students with ability to learn how a bank operates.

Legal foundation into the field of law.

The knowledge of the instructor's. They all made sure that if you put forth an effort to do well, they were all very good to make sure you had the materials you needed to succeed. is a great HVAC instructor.

Art classes like photography

All the teachers are really nice and are willing to help you.

Prepared me to transfer to a university.

The instructors made it hardest task simple for me.

my strenght would be learning more about computers, specifically CIS, and also Sociology and Psychology things.

The hands on that you get.

I believe the strengths of my program of study is to help others and myself prepare for the real medical field. It teaches about medical terms that I never know much about, and it goes deep into the terms.

The courses that I had to take were a good combination for my field of study. I enjoyed all of the classes I took and the teachers did a really good job.

The teaching in the in accounting departmant are top knoch. All of the teacher are very qualifty which makes it easy to learn.

This program has an excellent instructor base.

The instructors at CFCC have been amazing. They have taught me more than I thought I would learn.

The quality of the staff makes it a good environment to take the courses you plan on majoring in and make it interesting.

Dental assisting was the original program of study, after waiting to be accepted into the program I decided to move forward with the course credits already received. Due to the fact of being one credit short of achieving a degree in general education, my focus was shifted towards graduating with the credits earned. Dental assisting is still a goal to work towards; unfortunately the competitive program has put me on hold for the time being. At least with a general education degree, there is experience to show with college degree.

Well rounded course of study.

One on one contact with the students.

The variety of classes that I was able to experience really helped me grow.

The technology is up to date in the clinic.

I feel like everything is covered and we are prepared to enter a dental office.

Availability of instructors when assistance is needed, and exposure to the latest technologies within clinical practice.

The clinic and amount of time we are alotted in clinic

Small class size

Competent instructors and the dental clinic.

providing a great education and two year degree while being able to transfer to a four year university.

The teacher's willingness to help the students with their clients and work they have assigned to them.

The strengths of the transfer program would be that you have room to explore careers.

Real world experience and connections. It is a good introduction into how the film world really works.

I have developed a strength in communication along with writing while doing my program of study.

The large offering of online classes.

The teachers and staff were extremely helpful.

Hands on classes that teach you theory as well as how to manage equipment, etc.

In my program of study, pre-business admin, I felt the courses were well aligned with university basic studies and standards. My basic studies at CFCC also provided a very well balanced/diverse education going into today's workforce.

The basic studies course, as well as my program of study courses, provided me with a very well balanced/diverse education and preparedness going back to a university.
My program of study allowed me to explore many different subjects which kept school, in general, more interesting.

My strengths are being able to become more socially active. I have become not to be afraid to work with people and also build up my confidence in talking in front of a crowd of people. Also, I am able to prepare myself with what's waiting for me in the real world and be able to take that challenge of being successful.

The ability to transcribe.

small classes

getting an associates for a 4yr

Great instructors

The Diversity to attend almost any 4 year college.

I was introduced to the theory and the technical side of electricity when I was young and fell in love with it.

Practical work experience in participating in clinical rotations with hands on work.

Pre-business will be a great two year degree to transfer to UNCW with and start my business operations major.

I initially changed my transfer major because I wasn’t sure what I wanted to do after college. Changing my major opened me up to new possibilities, and gave me a chance to see exactly where my strengths and weaknesses are.

I do believe that community colleges in North Carolina are held to high standards. By having these standards, it helps transfer students prepare for the responsibility associated with attending a four year university. It enables students to learn how to become successful college students in the areas of studying, organization, and time management.

The Early Childhood Education program has a wonderful set of instructors who are thriving to make the program all it can be. They push their students and really provide a challenging and quality learning environment with hands-on experiences to prepare us for the education work force.

I feel that the strengths of my program of study was all of the free electives. Although I loved my core classes I enjoyed taking classes with a wide variety of interest.

I have learn a lot more than I would when I began. Hope to learn more through out the years.

Applicable to current trends in employment today.

Well planned out and a reasonable challenge.

Short in duration

Close to home, lots of connections with the community

I think since attending CFCC and taking the specific courses I did take for my program of study have helped me so much. I have definitely learned how to write an English essay in the proper format, make my essay flow together and how to write a good essay. I learned that I love math, especially precalculus algebra. I like being able to go through and solve at problems. I learned that I actually like history now, where before CFCC I hated history. From taking the courses I took it showed me I can write a good college essay, I want to do something in life dealing with math, and that I want to keep taking history classes to learn about the world from the beginning to now.

I feel like our instructors and my fellow classmates were the greatest strengths that contributed to the quality of education we received. The instructors did a wonderful job educating us and my fellow classmates always came to class with positive attitudes and worked well together most days.

many teachers I have had have experience with my program

The strengths of the OTA program at CFCC are that the classes are challenging and prepare the students for the "real world" experience. I also believe that the new program director and addition of a third teacher will enhance the program and the experience for the students.

A major strength I found in my program of study was the ability to freely choose the classes I needed to be prepared to transfer and obtain my four-year degree.

real-world business experience, provides a leadership/management skill set applicable in numerous organizational functions and settings, both public and private,

Being able to work with children, counsel others, and gain knowledge on what is happening in our world today and how to deal with it socially.

My current program of study is phlebotomy. It's strong point is that it is very hands on. Also, the instructor has years of experience and is very thorough and patient. I enjoy her classes immensely and I am looking forward to my clinical studies out in the field.

I think that Communications can be beneficial to everyone, because it teaches us how to speak with others and use skills that help us on a daily basis. It's important for any job to be able to communicate effectively with your peers. Communications also allows us to look into mass media, personal growth, and leadership development. Which I have found to be of great importance here at Cape Fear.

The friendliness and dedication of the teachers was definitely the strongest and most helpful part of my experience.

The strengths of my program are the quality and the accessibility of my instructors. All made themselves available through office time, telephone or email. All were willing to help me as needed.

The mixture of required courses: English, math, computer (including excel), accounting, marketing, project management, business law & seminar, and finance classes all combine to give students basic knowledge of all aspects of what they could face being employed in the Business field. Since I am a non-traditional student, I have been employed in various positions in Business before attending CFCC; the degree I will receive should enhance my employment opportunities.

It allowed me to be hands on. I find that I learn better that way.
Connection to local professional community.

Great and caring instructor. Job prospects are good especially with such a short program (1 semester).

I think the strengths of my program study were teachers who were properly trained in the study. Another strength is update programs that prepare you for jobs in the my program of study.

The information was up to date.

The program requires a variety of courses which allows the student to discover other possible majors.

Adequate preparation for web design and web server installation.

My program of study changed my view on many topics. It opened my mind and taught me how to think "out of the box". I learned to understand different forms of writing through literature courses and the Human Values and Meaning course (my favorite).

I was able to expand my view on many subjects. I also learned how to understand many different forms of writing from my English and Literature classes, as well as from my Human Values and Meaning class (my VERY favorite class).

the professors in the program understand that most students are trying to transfer and explain why it is that you need to take certain classes. Also they do not expect you to love an art class if you are a business major which is nice that you are not expected to be in love with all of your classes as that is completely unrealistic. Also the courses are set up somewhat so you can understand what it is that you need to take in order to transfer to a 4yr college/university.

The staff, they are very knowledgeable and well spoken.

The help from the staff.

course content and creative classes

I am in pre-nursing as a college transfer and I believe the faculty for the math and science department are great. Through my experience, all of my professors have been extremely helpful and it's important for me to actually understand and learn the material since I plan on being in the medical field.

The instructors.

Great History Teachers

All the classes i have taken in my program were useful in the workplace. I really enjoyed the co-op work experience also.

Faculty, Equipment

The strength of my program of study is the fieldwork experiences.

A strong emphasis on clinical education.

Offers opportunitites for students who are less fortunate financially to get an education and potentially a future career!

The program was well laid out, and the college was willing to work with me to insure that I met my goals as quickly as possible.

The diversity of the requirements for attaining a degree for my curriculum. The knowledgeable instructors that are provided by CFCC which allows me to attain my goal. The program of study provides above and beyond the skill set required to succeed.

Remembering my goals and keeping my grades up.

The Instructors are knowledgeable and helpful.

The strengths in my program of study would have to all be acredited to the excellent professors that I had. They all taught me so much and made everything that I learned, and every challenge I faced interesting and exciting.

GREAT TEACHERS!!!

knowledge of the instructors

being able to write better

I feel that I am very strong in the fields of English, Sociology, General Sciences and Psychology.

Doing Hand-on things in the lab

I believe there is good employment opportunity for my chosen field. There has been a change in leadership in the OT department. I believe it was a change for the better. These ladies will really make the program stand out as a professional, respected degreee to acquire.

scheduling, tuition costs, location, UNC system guaranteed transfer of 2 year degree.

Being able to gain the first hand experiences on the R/V Dan Moore

The resource room provides many options that assist in doing projects. Learning CAD is such a worthwhile experience for our field.

There's a degree for people who are not sure of what they want to major in.

it was well thought out and the instructor is fantastic

helps me prepare and understand the adjustments that will need to made when I transfer

the ability to decide which classes i wanted to take to fill that certain credit.

A good teaching staff.

Wonderful instructors and well organized program.
The instructor is amazing and the technology is up to date.

Class size and relaxed teaching styles

I chose the Associate Degree in General Education though I want to become a registered nurse. I plan on applying to the Associate Degree in Nursing at CFCC and other schools as well.

The technological studies (Hydrographic survey, Marine GIS, data processing, Instrumentation)

Great instructor who is very knowledgeable and genuinely wants her students to succeed. The "hands-on" experience really helps people, like me, who are visual learners.

The strengths of my program of study is knowing the law and being able to apply it to my daily life.

small classroom sizes and great instructors

I have acquired the necessary tools needed to transfer to a four-year university and succeed in my chosen career.

I believe the strengths of my program, Associate in Sciences, are that CFCC has accumulated some great instructors and educators who are more than willing to help students in any way they can to learn and master the material. They are given all the tools they need to give the students all the tools that they will need.

The amount of time allotted for hands on experience is adequate as are the tools and textbooks provided.

My instructor is wonderful, she is very knowledgeable and helpful. The equipment we use is up to date and I feel confident that I can adapt to any situation after graduation because of that.

expansive extent of knowledge

It is a very challenging program that focuses on critical thinking.

In my opinion, I feel the strengths of my program of study are human development and growth. I have learned so much more about myself and I am confident in who I am as a person. The program is a transformation in the way one looks and considers things or people in life. I always knew I wanted to help others, but lacked the knowledge as well as confidence in working in different population. The knowledge I have acquired through this process has helped me grow so much more and will help to benefit me in my career. Other strengths are activity analysis, environments and understanding therapeutic use of self. I am very proud of who I am walking out of this program, and very grateful.

program was decent because I can get an associate degree. had to switch and switch back to maintain PTSL funding even though the purpose was to get an associate.

The program provides a solid foundation in the liberal arts while concentrating on science and math. The demanding math/sci requirement of this program serve to expose the student to new areas of scientific study. This helps to begin focusing and deciding on a career pathway.

The instructors in the accounting program are a huge asset. (Get it). Really, [name] has enabled me to learn so much and take a sincere interest in the accounting field.

A lot of hands on experience.

test itg

The strengths of my program of study are the professors, and the information we learn is interesting.

The conversation, real life stories and questions/answers that aren't found in books.

Online education.

Strong focus on networking and virtual machines

There is a lot of variety of courses to choose from and each class has its different structure and activities.

It a great program for people who wish to further their education and transfer to a university.

Hands-on! 100% Hands-on! The program not only teaches you the theory behind the how tasks are completed in the field, but then it takes you out into the field to practice what you learned in the classroom. The teaching staff is patient, but they also challenge you to think differently and outside the box, which is a necessity in order to be a successful technician.

The teachers

Mathematics and English

I gained a very thorough and effective understanding of financial accounting. I learned more in regards to the details of accounting than I thought I already knew.

It offered all of the basic courses that I needed to transfer to a four-year university. The instructors were also a huge strength of the program; almost all of them were willing to help and taught me many things that I still use and remember.

Beign as shy as i was starting school, i feel that through all my classes i have been realy challenged and learn to interact with studetns and ask question in areas where i lack.

Mathematics and English

The theory aspect or the beginning level courses.

I will be graduating with an A.A. I have already been accepted to UNCW and will begin there in the fall. I feel that all of the instructors that I have had at CFCC have challenged me and have have been very effective in their methods of teaching. I have enjoyed every class I have taken. The strengths of the program lay in the very capable hands of the instructors.

having a business degree allows a wide range of job opportunities. i was required to take classes that are technically not business related but, personally feel that its made me better well rounded.
The instructors are free to teach.

New innovative technology!

The instructors

It is a difficult program but prepared me well to become a nurse ethics, organization, business

The MOA program and [redacted] fully prepare you for the workplace. It is very through with going over all aspects of MOA and Ms. Hightower furthered that by treating the classroom as if it were a work environment and she is your boss.

The instructors

I can effectively communicate with my peers and staff.

The teachers were inspiring and what brought me through.

I gained knowledge and experience in the business field with taking classes like Accounting, Micro and Macro economics.

The ability to use 3D modeling programs

everything, because it gave me a bit of everything not just art.

The personal attention that professors provide each student.

I had wonderful teachers that were well educated and informative on their subject. The student:teacher ratio is amazing.

The Criminal Justice Program is well structured and has informed instructors in their areas of expertise. Further, they are individuals who are easy to approach and have a great willingness to assist students in their pursuit of higher education and employment.

The strength of my program is that it offers me a wide variety of job choices.

All the hands on work that we have been doing. All of my teachers have been great.

I feel that the sciences were the strongest part of my program of study. My teachers were amazing! I had BIO 168 with [redacted] and BIO 169 with [redacted] and BIO 175 with [redacted].

The instructors are up to date on what we needed to learn especially since this is a computer technology major where there is always something new coming out that we need to know and learn about.

The ability to transfer challenging classes

Flexibility to fit my wants and needs from the education I’m receiving.

My strengths as a Business Administration major would certainly be the understanding of Accounting and Financing mostly. Although I am familiar with everything involved with Business Administration, Accounting and Financing is what I have the most knowledge in.

There are many options in the math department and a lot of good teachers.

Some strengths included the suggested courses to take are relevant to skills needed for a four year university.

The experience was very well planned. It helped me encounter different aspects of my field that I will have to engage in for my future career.

Good preparation to go on and get a Bachelor’s degree.

Will comment at later date.

Having a teacher like [redacted] She has a passion for her job and she wants everybody to succeed.

I believe the main strength of my program was to prepare anyone to transfer to a four year institution. I knew this would be a stepping stone to other opportunities and I feel ready to move forward and succeed in receiving a bachelor’s degree.

NA

The resources available, such as machine-tools, tools, and work material make this program great. The knowledge of the instructors is great too.

Public Speaking gave me the ability to talk with others.

Excellent teachers.

The variety of classes that are offered in this course of study.

Customer Service

being able to work in the field and gain experience

The best part was how caring the teachers were. A good deal of the teachers I had genuinely wanted to help their students succeed and would go out of their way to help. I also enjoyed the help I received in the tutor centers.

Writing, and assessing arts.

The use of online courses which contributes to future educational skills and the remedial labs that facilitated knowledge gain in course work.

Quality of teachers
Working and learning from other students and trial and error. Extra classes informing us of color cuts etc.

I learned skills for services.

Excellent instructor, up-to-date materials

The hands on experience and the critical thinking skills needed to make it in the marine technology field.

I believe their are several strengths in the Associates of arts program. The courses teach skills for a variety of occupations. This degree prepares you for future education and also employment. Through this program of study I have learned skills in problem solving, decision making and also communication skills.

The teachers were the backbone of my program of study. They were Absolutely great!

Availability and Teacher Dedication

Instructors have alot of experience

The psychology classes. They were very interesting as well as insightful.

The teachers care about your success.

Challenging, lots of hands on activities

Hands on experience. CFCC nursing students have great skills knowledge at graduation which is evident and noted by current nurses at nearby hospitals.

There will always be a job.

The science. I really enjoyed doing some of the labs because it was like doing whatever the book tried to explain. I got it easier after that.

Great teachers in the BIO department. Small classe size makes for easier and effective teacher/student communication.

Great teachers and competitive program. Good hands on experience

The challenge and competitiveness of the program.

I believe my instructors have defiantly been the strengths of my program of study. They have all been very passionate, available and knowledgeable in their fields.

The humanities, sciences and art departments are all wonderful.

The Natural Sciences classes offered at Cape Fear Community College have helped me prepare for my transfer over to a four year university. They challenged me and helped me learn how to study and plan effectively in regards to my education.

The required math level and the fact that it gives you a glimpse of the business world and all of its functions.

The CFCC ADN nursing program is a very challenging program, but once through it you feel that you have the skills needed to succeed as a nurse.

The hands on/ real world knoledge of my teachers in my field of study.

all instructors have on the job experiance in the field of law enforcement

The hands on of equipment to get familiar with the work process

de the instructors

it prepares kids to evolve from high school level work to that of a university standard

Hands on tutoring and small class rooms helped

The technology and the teachers

The instructors and advisers in the Marine Tech program were fantastic and made my experience successful.

good instructors who push students to be the best, work load prepares us for stress load, teaching follows the NCLEX

Teacher were personable

It provides a well rounded study of my major

anthropology and anatomy

It provides more of choice in terms of the courses that you can take in order to get the degree.

I feel that the classes offered to me in the Associate Arts/transfer program offered a wide range of classes beneficial to me. The classes I have completed thus far have given a great amount of knowledge that has helped me further my career.

instructors are very passionate about nursing

Best Instructor I have ever had.

This is a very unique program, with many job opportunities.

Hands on use of technology used in the field. The training programs on the ocean going research vessel were the most beneficial. The field trips in class were very beneficial.

very challenging

The instructors.
The program is a solid foundation for people entering the field of Marine Technology. It does an excellent job of giving an overview of the diverse fields within Marine Technology.

Prepared me for a 4 year institution program

The fact that it gives students a more broad variety of class to take, more options to at least explore before choosing a field of study to go into as far as careers.

I feel that this course of study has several strengths. For one, it is up to date with today's job market. IT jobs are in high demand right now. Also, learning computers and how they work can prepare you for the future. It seems as though everything will be controlled or maintained by computers in the future.

To learn of the past to help understand and look at the future. Also to have the knowledge to understand current affairs and to teach others of the past.

Associates in Arts, a solid foundation for further education. The ability to take a combination of online and in person classes has made it possible for me to complete this degree while working full-time.

I was highly impressed with the credentials of my professors, especially those found in the Drama department. They are truly involved in the success of their students.

The strengths of my program of study are Teamwork, Cooperation, and Motivation.

Some of the instructors who are effective and current curriculum

I did enjoy the flexibility of the program in which I was enrolled.

Social sciences were one of my strong subjects. It seemed to come natural.

The Sustainability program at CFCC is extremely thorough, almost to excess. We have covered everything we will possibly need to know about Sustainability and alternative energy. Our lead instructor looks at the subject in a realistic manner, which is refreshing considering our society's stigma of "going green". I tip my hat to [NAME] for the way he has handled the program.

I believe that the Nursing Program at Cape Fear Community College produces strong new grad nurses into an ever-changing field. New RNs that come from this program are equipped with the knowledge and skills necessary to provide outstanding care. I really thing the health care system, especially in our specific community, is a better one because they have hired nurses that have graduated from this program.

I really enjoyed my political science classes because of my teacher. He was easy to relate to and relaid the study information in an easy way to learn.

The English courses and some of my math courses were the highlights of my program of study. Both types of courses challenged me greatly.

The Associate of Arts program allows for a variety of course load. I especially enjoyed being able to complete so many of my courses online. Online courses are a little more difficult, however, allow me to work, and bounce between the various activities of my two young children.

The strengths would have to be in my science courses.

knowledge of instructors, and ability to teach effectively

wide range of knowledge

The teachers and technology

Being able to go into the field knowing the basics.

Fast-paced, challenging learning environment and good instruction that gave me real world skills that I can apply directly to a career.

Learning how to work Auto CAD

it has strengthened my computer skills allot and everything is done on computers now days.

computer skills have progressed tremendously, hands on work with materials helps a lot

All of my instructors have been very insightful.

hands on

Teachers are enthusiastic and helpful, classmates are mature and take their work seriously.

Experience/training on a research vessel both onshore and offshore...priceless Amazing instructors

hands on and good instructors

Great professors, up-to-date equipment, and hands-on experience

Typical

machining is in the top five most demanded jobs in the country

My strength of the paralegal program has got to be criminal just because I'm more interested in criminal than any other part of the law but also I have learned a whole lot more in the other areas of law which I know would be very benificial to me in the future if I do decide to take on something other than criminal

I don't think that there were any strengths of my program of study. I entered CFCC with a fairly high writing skill. This carried me throughout the program. In January of 2013, I began working towards my Bachelor's degree at Oregon State University. For the first time since beginning my college education, I feel challenged. I do not feel as though Cape Fear adequately prepared me for the university experience.

The strengths og Hospitality Management program is the reading, writing and the instructors way of teaching is amazing.
The professors

I believe my strengths are being able to write well and working well with others.

There are exciting skills available in this field and the program prepares the student

The teachers are definitely an asset to the Computer Engineering program. They all work very well together to make sure a student is 100% on track whether its questions, concerns, or just need proper guidance. The number one strength of this program is the "one on one" interaction that is available to the students.

I believe the instructors at CFCC are very knowledgeable of the particular subject they are teaching, and really want their students to succeed and will go to various lengths to achieve this goal.

In today's job market you have to make yourself standout, you must be flexible and able to remold yourself into what ever the job market asks of you. The business bath is a well rounded curriculum that will open up many possibilities no matter the direction i choose to take later on down the road.

Teachers responded quickly and efficiently to anything asked and were also very effective at communicating over email.

I feel the curriculum at CFCC is thorough and I intend on returning for the RN program once I am financially able.

The instructors were very knowledgeable.

CFCC is a great institution to attend quality core educational classes before transferring to a four year institution.

The strengths of my program of study was the communication I was able to maintain with my Criminal Justice instructors. Being able to talk to them and being given professional advice from them was key.

It can provide a broad array of skills and knowledge necessary for further education, employment, or self betterment.

Test Taking/Welding skills improved

The strengths of my program of study would have to be it's instructors. The professors at Cape Fear are the most helpful, and caring teachers around. The teachers really do care for there students, and want them to succeed.

Teacher involvement

The instructors are some of the best I have ever encountered. With the exception of one bad experience (SPA 111), I have been inspired and challenged by wonderful teachers. All of the staff is very willing to help and kind to all.

The art department at CFCC has a outstanding and talented staff of art professionals.

The Radiography program has three main strengths holding it together. The driving minds behind a program that pushes you to the limit just show you that you can achieve your goals. All three of these people are exceptional teachers and role models, and in my opinion, make the program everything that it is: well structured, organized, and above all, an environment that makes you want to learn more.

good overall knowledge of everything

The psychology professors are very encouraging and knowledgeable. The courses were easy to follow and allowed for self improvement.

The Associate of Arts program of study has a good variety of course subjects. The variety aids the student in experiencing different subjects that will help them in the future rather then just art courses. Also, the high number of elective course slots and options allows the student to pick courses that are in their self interest regardless if they relate to the program of study or not.

The instructors in class are great and almost all of them were really helpful when you have questions. Many teachers are very willing to help you out outside class. If you had questions most teachers were willing to help out even from home through email.

My passion to both learn, and teach. I have always wanted to make a difference by teaching young children. I intend to go to the Watson College of Education at UNCW and become an effective and inspiring teacher like the teachers who inspired me. The strengths of teaching itself, are that it is by far the most influential job on the planet. A teacher can be the person that pushes a child to his or her full limits when no one else is willing.

Math,Computers course, Welding; all aspects

The accounting and math programs

The strengths of my program of study are my teachers. They are very experienced and are amazing teachers that work hard for the program as well as the students. I would also say our program has excellent classes to prepare us for careers.

Having the opportunity to perform spa service for actual clients, has prepared me for working as an Esthetician.

I think the strengths of teaching itself, are that it is by far the most influential job on the planet. A teacher can be the person that pushes a child to his or her full limits when no one else is willing.

I think the strengths of my program of study are that I get a well-rounded education in every major educational subject. Also, it prepared me more, and helped me transfer to a 4 year school.

I have acquired a number of new skills through the class i have taken to achieve my Associates degree.

Sustainability is a new subject and hopefully will help me find a great job in the real world. My lead instructor is very passionate about teaching and made learning fun and challenging!

hands on work

English

Englis
Building computers

Real-work experience was applied to the classroom

All the instructors take their jobs very serious and do his or her very best. My program of study is very general and straight to the point in skills you will one day use in the outside world.

It is a great program and the teachers are the best.

Challenging, extremely good at preparing individuals to take on large work loads (multiple patients), continuously learn new things.

Strong preparation for career.

Being able to be prepared for the BSN program.

The flexibility in scheduling, the number of times classes are offered throughout different parts of the days. The science classes were amazing and I usually don’t like science.

having instructers that have had first hand experience in this field

I think the core classes that I was required to take were very well organized and effective.

Computers

The instructors

-Teaches a wide variety of subjects

No shortage of work.

The finance and accounting classes are very well taught.

I believe the strengths of my program is getting a large amount of knowledge from different fields of classes that I have taken while at Cape Fear Community College.

I have attended two community colleges other than Cape Fear and out of the three I can honestly say that Cape Fear has really challenged me to better my study skills and made a better student out of me. I now feel more confident to enter a four year college or university and know that I can be successful. The professors at Cape Fear are some of the best that I have ever encountered, they really prepare you for a four year school.

The teachers were very important and helpful.

clinical time

My program of study gives you the opportunity to advance to a bachelors degree.

The strengths of my program of study were the drama classes I chose for my electives. They improved my ability to think outside of the box and venture from my normal way of thinking.

Hands on instruction of the program material and great instructor with vast knowledge.

Exposure to a broad base of information.

we cover the basics of diesel mechanics pretty well but our engines are older and not exactly up to date, there is so much that hasn’t been covered or was lightly covered

The instructors are amazing and always there to help with any questions or problems you may have. The instrumentation experience and theory behind them.

The strengths of my program of study is that it is very helpful in our everyday life. Knowledge of skin care is something that benefits you for years to come.

My strengths in my program would be all the fundamentals of the pre-elementary requirements. I feel confident in my goals and future thanks to my program.

It is very thorough and when I walked into the OR for the first time I felt very confident about what I had learned during the program. I felt very relaxed knowing the program had taught me what I needed to know.

All of the hands on experience in the salon with clients.

The ADN program permits students to graduate and have the tools to get a job. Also they have a reputation for producing excellent nurses and this benefits students in getting jobs over others in the area. The clinical experiences that students get in this program are excellent, they make sure that you are capable of taking care of patients in the nursing setting.

Hairdressing

I would think my strengths of my program are make-up applications, waxing, and of course facials.

I managed to get a lot of core classes out of the way.

Knowledgable instructors that inspire confidence and self-reliance. Coursework that allows one to feel confident in the workforce.

The teachers are awesome. They work really well with you and with showing you how to operate machinery the right way. I like that we have CNC machines to work on considering that we will be working on them in the outside world.

Less random credits should be required, instead more classes revolving around my major.

Has a good name for itself.

Completing necessary courses for a transfer program. General knowledge is gained that will provide an easy transition into BSBA program.
It is highly competitive and prepares you for medical-surgical nursing. We are allowed opportunities in the clinical area that some schools are not. There is a lot of hands on learning in the clinical setting.

The head instructor. He is knowledgeable and enjoys teaching. This makes the learning experience better.

Up to date technology and plenty of hands on experience.

The teachers.

One on one working with teachers.

Good overall program.

I think we learn the basic cosmetology service and every teacher here has different strengths that they teach us. I feel really equipped in this field of study and I am more than confident that I will find a job after school.

Coding, medical terminology is the biggest strength for this program. She taught me so much. I feel when I leave CFCC I will be able to get a job thanks to . Also, the coop was a big learning experience. My computer skills are so much more now than before I started school.

The instructor. Is a professional who cares about her students finding employment after graduation. She is truly an asset to the program.

The teaching of marine sciences and biology and giving students an incredibly rare opportunity very few, if any, other colleges offer for this kind of program: hands on experience in the field working on a research vessel. The faculty of this program are dedicated teachers who are some of the most determined professors to ensure the education of its students, no matter how often they repeat themselves. The program prepares students for this field of work in a way no other program could, or likely ever will.

The Marine Tech Program is full of instructors that are truly passionate about their work. Also, I had the opportunity to gain hands on experience with state of the art equipment applicable to my future job interests.

The strengths within the Marine Technology program include; the access to instruments, tools, and hands on experience related to the maritime industry. The teachers are very knowledgeable, dedicated, and passionate. The assistants, engineers, and technicians exhibit the same qualities.

The classes transfer easily.

The academic instructors of the fine arts program!! are FANTASTIC- both in their love for the subject AND in their artistic ability to produce art with exceeding knowledge and talent!

Excellent instructors and plenty of clinical time.

Very hands on learning experience.

The strengths of my program of study would have to be the focus on actual art classes. Cape Fear has a nice selection of art classes, which I think is perfect for someone like me who wants to be an art teacher. I have now had the chance to dabble a little in everything from drawing, photography, ceramics, sculpture, 3-D/2-D design, computer art, etc. Also, the Art History courses I feel are extremely important, highly informative and rewarding!

I believe the strengths of the program of study was being taught by actual attorneys who can prepare a student for what the workplace is like and what will be expected.

Class sizes are small enough to promote a good learning experience.

I took all online classes to get my associate and be able to transfer over to UNCW hopefully. It helped be able to work a 30 hour a week job, and work with my classes at all different hours.

The program has a wide range of course material to prepare you for the job market. The computer courses especially prepare you for our technology driven society.

The strengths of my program would have to be the quality of knowledge from the criminal justice professors. All the professors have experience in the criminal justice field.

Hands on technical training.

Everything was great.

The strength of this course is the hands on training. Also, the workforce pertinent training. Students are not just sitting in a classroom reading texts about the job and ideals. We are actually doing the jobs and research as we would, if we were in the field.

Hardware and software.
I didn't have a set program that I was in. What I felt was the strongest element of my education at CFCC was the teachers. They were all encouraging and wanted to help everyone succeed. I have only had one teacher that I didn't like, which I think is pretty good for five semesters of school. A particular favorite of mine was [redacted], who teaches Western Civ. 1 and 2; I thought he was exceptional.

The ability to understand people and how they behave a little better than beforehand

The teachers are very knowledgable and are always willing to help their students. The course work is exceptional for learning skills and will help me in the job market

The English and Social Science courses

The teachers were awesome and were always willing to help.

The strengths of my program of study would being able to be hands on and being in a environment like one of a real job after college.

Amazing instructors

The accounting courses were excellent.

I am very good at math and I feel that this program of study helped me show my strengths in math.

Being able to find a great entry level job

Prepares you for general knowledge and college level work for transferring

Relevant technologies in use and direct communication between instructors and employers catered classes more toward future and everyday use.

Good teachers have improved my learning and study ethics.

One of the teachers for this program is amazing. She is really invested in everyone learning the material and being motivated.

It is something we will all need in life, and it looks good on a resume.

waxing

My teacher knew the material and taught it well

I been working with kid's since I was 11 years old

The General Degree allows you to study a variety of different areas of study.

The instructors were very helpful, and involve in getting students ready for the workforce, at lease for me. The hands on experience in the culinary kitchen prepared me for working in the restaurants business.

After attending Cape Fear for almost two years, there have been many strengths about my program of study. Although my choice of study at Cape Fear has been set on working towards an Associates in Arts degree, I have allowed my self time to make up my mind as to what I would like to do for a career. I have taken interest in maybe a future career in the field of Radiology. I am very interested in the Radiology programs at Cape Fear and hope to get accepted into the program after I take my PSB.

I think the courses mold together very well to give one a good overall understanding.

I feel the strengths in my program of study are the professors. They are all very knowledgeable in my program of study and are good at presenting the information.

preperation for my career

The time spent on the ocean working is this programs major strength. No amount of class time can relate to the learning experience obtained by working on the R/V Dan Moore.

learned how to read a hospital record and know what they are talking about when I read my husband's medical record from the VA. I learned to find out what they have done to him and what they say they have done to him.

Instructors, Instructors, Instructors. and the capable crew of the R/V Dan Moore.

Cisco networking

small class size allows one on one if needed

The classes incorporate a very comprehensive range of study.

All the instructors that I have had, have been very helpful.

I was able to get a feel of the criminal justice classes needed for my major. I got a taste of what I am going to be pursuing in the future.

Up to date spa facilities and professional products

I feel that I am prepared to start a nursing career. When comparing to nursing students at other schools, I feel like I have had better experiences and more exposure.

A fantastic Geology program with fantastic instructors.

Great teachers. They care about their students. Never felt overwhelmed in any way. Every class I signed up for I got exactly what I asked for.

learning about the way cells and people function

great program, great teachers, very well prepared for workforce.

Through having the program of study I chose, I have acquired many skills that have helped prepare me for a University.
I feel that my program of study has prepared me for success if I choose to attend a four school. 

I have the ability to prioritize, plan, better skills, much more organized. I can multitask and assume responsibilities and duties. Attending school has self motivated me and given me the capacity to cope with failures and trying to learn from past mistakes.

I think my strengths of my program of study is that there are good instructors that will help guide you through.

The research vessel is a huge advantage to the Marine Tech program vs. others in the country.

I think my strengths of my program of study is that they have good instructors that are willing to help.

I really liked the way the instructors took the time to make sure you were getting the correct understanding of the course. The shop was very nice as well as the equipment we were able to learn on.

The teachers are very knowledgeable and are willing to really work with you on things and to make sure you can learn what you need to.

The program provides a wide variety of knowledge and left me very prepared to get started in the renewable energy industry.

Great Teachers

The bonds you form with other students after spending so much time with them.

Hands on experience

I believe that I have acquired many new skills in my area of study. I have learned accounting skills and managing my finances as well as how to handle finances in any area of business.

The research cruises was a huge strength, along with every piece of equipmnet that were introduced to us throughout the program. It is a very hands on program as well, and that made it more enjoyable and easier to learn the material.

The class began as two seperate classes with approximately 20 students in each class. Now in my last term there are only 5 of us that remain and we have bonded over the experiences and challenges we have had to face in our classes. We have learned to work as a team and support each other. We come together to teach each other when we do not have the support from the instructor.

I feel more confident in my program of study because of the amount of hands on training i received through clinical hours.

The diversity, location plus academics prepare u for the next step in life.

I think that the ability to perform the job correctly reduces the stress of the patient. The class was taught well and the on job training is essential.

in depth knowledge of body sciences

It has a wide variety of courses to choose from.

CFCC offers plenty of sciences to choose from which is great.

Teachers challenge you.

the ability to transfer into a undergrad program

I like that although it is a "pre" degree, it has many variations within itself.

N/A

Very nice facility

The strength of my program of study includes having a wide range of academic knowledge to prepare for a 4 year University.

I really enjoyed the Humanities and English courses, I could not have imagined better classes.

I believe the staff, the technology, and the effort given at this program are the strengths within my study. The learning lab is definitely one of the places where students can go to get extra help and talk to tutors or teachers for guidance.

Teachers are good

Real world opportunities

I believe that some of the instructors of the cosmetology program are very good at the role of instructing. These individuals listen to their students, provide help and advice when students need it, and are effectively constructive with criticism.

The practical class

My program allows for a little wiggle room in terms of pursuing a multitude of careers.

The Criminal Justice classes were very detailed and helpful and I believe they have prepared me to transfer and pursue a major in Criminal Justice. They have helped me get a feel of what other classes I will be taking after I transfer.

Best in the area!!

I met amazing teachers that really involved me into the studies. My psychology teacher . and my Women's Studies teach. two examples.

Writing papers and reading material and understanding the concepts intended.

I have built up enough of confidence within myself, and I now feel I am 100%ready to continue with my learnings and be successful in the Heating and Air Conditioning field.
The classes required for my program of study provided me with knowledge that will be helpful in my future career. Although a few of the electives I took didn’t have much relevance to my program of study, I felt that overall it helped me gain a solid education.

Active lab work, resulting in quality skills that will help find and retain a well paying job.

My course instructors have a strong understanding of the material and the current legal environment. My course instructors have been extremely helpful and accommodating, and genuinely want to see students succeed job ready upon graduation.

It gives me an edge for joining the NAVY.

The college offers a wide variety of courses to choose from.

I am in the Early College, so I think their ability to include us in their program is a great strength.

The strengths of my program of study are my elective classes. By taking these classes I was able to explore different cultures and learn different subjects of this world. From different music, humanities, history, language, education, and other classes. By CFCC providing the opportunity for us students to explore these options in the program, I have gained knowledge on different subjects for my future.

My strengths I gained from the fine arts program would include being able to draw, paint, design internal and external structures, acting and speaking for crowds and art history were all combined.

Some very well qualified instructors

I learned to work with speed and accuracy in the kitchen. Presentation is a major key the food service. Working well with others as a team will get you a long way!

clinical education

I believe that the strengths in Marine Technology at CFCC are simply the hands on teaching and experience in the field. With the hands on teaching I felt that I was fully prepared to find a job in my degree. I loved the fact that the program had a research vessel that allowed us to not only study on the river but allowed the student to actually be out at sea. Another strength would definitely have to be the all the instructors in the program. They had all the knowledge and truly wanted all their students to succeed.

I believe the strengths in Marine Technology was the hands on experience. Almost everyday during class we would go out in the field and experience what we had learned in the classroom. We had to learn how to run all the equipment involved in the program. I had chosen Marine Tech because it had the R/V Dan Moore which really gave us the edge over the other schools and programs. Another strength would have to be the instructors in the program. They are all very knowledgeable and helpful.

I believe the strengths of Associate Arts, is the basic ground for starting a career. I think it prepares you and helps you along the way of a further career if chosen.

N/A

Good instructors.

Very to the point, good instructors.

I think that with an associates in science I have opportunities in many careers and universities. I believe that the teachers were great for all the classes I had to take. I got more into science than I was. Cape Fear really made learning fun for me.

I believe that the classes and the instructors in my program of study were great. They made the parts that I did not like more fun for me and I learned a lot.

It prepares you for transfer to a university as well as allowing you to obtain an actual degree.

My leadership skills have been enhanced.

we have great professors and they are well rounded in their profession

Great teachers and tutors

This program of study was very challenging involving many English and science classes with little elective classes. This helps students grow educationally and become ready for the university requirements/challenges.

The Cisco courses

Cisco

I think the strengths of my program are critical thinking and strategy of writing a well organized paper.

learning how to effectively use correct tools in different situations

The cheapness. You can’t beat getting, pretty much, the same education for less.

It is related to real life.

A few strengths of the college transfer program at Cape Fear Community College are cheaper spending, Smaller class size and prepares you for life ahead.

I feel that the strengths of this program are presented in the instructors abilities to not only teach but develop healthy working relationships with the students.

Highly qualified and helpful instructors have given me direction and confidence to continue my music education.

I think the online programs increased my general knowledge, specific course knowledge, and organization. As written work was the primary means of communicating I feel my confidence and skill was writing is especially strong. 
great instructor who was completely knowledgeable about her field of study. I learned a lot and grasped everything easily due to this factor.

All of the hands-on clinical time was very important to my learning experience and will help me to be an exceptional nurse!

Clinical Time

There is a good deal of hands-on instructions and clinical experience that I feel more adequately prepares Nursing students in this program for actual vocational nursing.

good fin aid

I like the flexibility of being able to take classes online. As far as classes themselves go; the educational/learning challenges we overcame help to prepare us for life and shape us into what to expect at the University level.

I think the strengths of my program of study are the hands on training during the science labs. The thorough explanations and demonstrations that I’ve gotten from my instructors have helped me grasp so much.

I believe the program is an excellent prerequisite into the social work field.

Teachers- are all great teachers. Gave me the desire to learn and study music in depth.

It gives you a great selection of courses to complete the program and still remain interested.

The instructors are knowledgeable in the field of pharmacology and provide the history of where pharmacy began and the new technology that will be the future of pharmacy. The courses provide knowledge and skills to perform the tasks required of a pharmacy technician. The opportunity to participate in clinical rotations at various pharmacy locations provide the hands-on experience to apply the skills and knowledge learned in the classroom.

The ability to produce introduce students to CAD.

having general knowledge of my surroundings

The hands-on experience working with HVAC units in class and on jobs locally.

It gives you a broad range of topics to become knowledgeable on.

the strengths are, that you perform many activities in this program and you get to do it in group, which is really helpful and also individual projects which are the best if someone is trying to learn.

It requires a little bit of everything, you receive a well-rounded education.

Cape Fear is an amazing academic environment for any student who is interested in transferring to a four-year school. The passion of the professors and the faculty is as strong as any four-year school. Cape Fear’s transfer program fosters critical thinking, creativity, and scholarly curiosity in its students.

Cape Fear is an excellent academic environment for any student interested in transferring to a four-year university. The passion of the professors and faculty is as strong as those of any four-year university. Cape Fear fosters critical thinking, creativity, and scholarly curiosity in its students.

My teachers have years of experience working in the field of early childhood education, and therefore could provide great insight through talking about their experiences.

The strength of my program came directly via my professors. They gave me the time and attention I needed become a successful student.

The campus and technology available

The strength of my program were the instructors.

Excellent instructor. A true resource. Amazing knowledge of subject. Lots of hands-on experience in the lab.

Teacher knowledge

You get to have hands on training on real cars and do real world repairs.

The teachers who have taught me

The community awareness and acceptance of the program and graduates.

The hands on experience.

I believe it was a good experience to take all the classes in an associates in arts degree that you don’t want to just eliminate them through taking them and learning a little bit about them. I believe it was because of CFCC I chose to major in Architectural Engineering.

N/A

All of the teachers I had were helpful in anyway possible and prepared me for the next course I had to take.

teachers are very nice and helpful

The Film and Video production courses at CFCC are great because they are mainly hands on learning and get you familiar and ready for work after graduation.

Great instructors

The strengths of my program of study is the science department. Every science teacher is awesome!

The strength in CFCC’s art program is its instructors. incredible teachers and the school is lucky to have them as employees. Their knowledge of the arts is on par with what is to be expected from 4 year universities.

I am able to create my own path
My Strengths I have gained are how to research properly, connect with others, and study for a good test performance.

The involvement and relationships one develops with the instructors.

The program prepares you for the medical field.

Great teachers

Got all of the basics out of the way and prepared me to transfer.

The classes are easy to follow.

n/a

English

Computer and Mathematics

Hands on learning and skilled instructors.

Different classes that transfer to UNCW.

Speaking in front of others and developed critical thinking skills.

Great teachers that are more then willing to help you as a student succeed.

The professors were very helpful throughout my time here.

You have to be a self-starter. An individual who can not manage themselves or their actions does not belong in this program. Also, this course really gives you more of a backgroud in computer skills.

very general

provides a variety of classes and subjects of education that is directed toward the program of study.

Having the clinical sites available to train at and to practice your skills. Having an outstanding instructor, which I had, makes all the difference.

My interest in Criminal Justice. Understanding the courses and material. I also pretty well in the courses and they will help me in the future.

Being that my purpose in attending CFCC was to get my general studies taken care of, I feel the strength in the program I completed, was that I learned a little bit of everything. The courses I enrolled in were broad, and enlightening.

There is a decent variety of classes offered and most of the instructors are very knowledgeable and willing to help with student success

I have gained overall knowledge of general education, i have also gained more experience in art. I have been able to learn more about photography which has always been one of my passions.

The staff at CFCC are the primary reason that so many students achieve the success they are hoping for. In my two years here, I have always felt that my instructors were approachable, readily available to help me in most ways possible, and I always felt like an individual to them...not just a number.

Great instructors, lots of clinical experience, important information taught in class. The instructors care about providing us with the best nursing education.

Each instructor is involved with the students and relates to them. They are hands on and really push you to keep striving. The instructors have experience in this industry and I look up to each of them for that and learn from them every day.

Great flexibility

My teachers were always willing to help me succeed.

General studies of various core education requirements which will transfer to a four year university

Attending CFCC has changed my life. The teachers are so structured that I had to become the student that I should be! Each teacher is thorough and exceeds the capability to form an average student into a spectacular student!

Associate in Arts is a very well rounded area of study and it gives the student a diverse learning experience while preparing them to move onto a four year university.

This school has no journalism department or classes for that matter, so it has no strength. Mind-blowing that no classes in journalism are offered.

Class and shop are great

I think that my program is very well rounded. I belive it has prepaared me into going on to further my education.

Everything was wonderful

The courses I have taken will be stepping stones for future courses.

Good teachers made my time at CFCC. When ever a genuine teacher was my instructor, I soured through the class with all A's. When ever I had a teacher who didn't seem to enjoy teaching, my grades dropped. That is because those teacher quickly lost my interest in the class. The teachers who care about their students are the only thing keeping the education system alive.

The teachers take the time to make sure that the students are understanding the concepts that are being taught

analyzing data, better research abilities, preparing for a 4 year college

I love that the instructors in my program make class exciting and easy to learn. There are unlimited amount of resources available.
They are not big class sizes, and most of the professors are easy to get in touch with.

People will always need heating and air conditioning, therefore there is great job security in this line of work.

Hands on

The instructors. I have met and learned so much from so many amazing teachers. They are what make CFCC such a wonderful place to get your education.

Being flexible by taking online courses.

Great Transfer program

Up to date knowledge of what the industry expects and up to date equipment.

Very up to date and learn a lot of material in a short amount of time.

It prepares you for the actual jobs in the area for this particular field.

Knowledgeable instructors with up to date information

I believe that the professors were a very important factor within my program making me want to learn more and working with me.

Ability to prioritize, planning skills, well-organized, multitasking and assuming responsibilities. Processing the capacity to cope communication skills and time business management.

You transfer to a University.

Construction Management has many strengths as a program. The technology we learned to use is what is used in the industry which makes the transfer from student to employee quicker and easier.

I feel that the pre-nursing program possesses many strengths such as instructor expertise and the great science facilities. These strengths have allowed me to maintain a 3.9 GPA and ensure my success if I choose to attend higher level education.

My strengths was learning more how to interact with children on their level, and how to provide the right activities for the children to play with in each center.

Up to date knowledge of what the industry is looking for.

The art teachers. They do not have a lot to work with, and they make it work! Strong in their fields, knowledgeable.

New instructor Bruce Long is a very good hands on instructor.

The strengths of the program was the one on one teacher experiences.

The teachers within the program were great and academically challenging.

Being able to communicate in society more effective and becoming more marketable for a job.

The strengths of the program of study is that it prepares you for the work place.

Accounting and marketing

That you are actually exposed to the real thing, by doing volunteering work.

The strengths are that many of the classes I have taken involved expressing myself in presentation or by written word, which is something I have grown to accept as more of the career that I am after, more so than any other profession. And the majority of my teachers were excellent along with the staff of the lab and some of the staff in the administration office.

Works around my schedule.

Instructor's knowledge of the material for each course.

Transcription utilized keyboarding skills, which I am able to do beyond potential and it also challenged me to understand multicultural dialects. I was able to learn to adapt to different situations that would occur when using transcription, and I enjoyed using the foot pedal as well as the headset.

Building

Hands on work and prep for work force.

The teachers that teach the classes, they are always there when you need help. The books are also a big help to the program.

The teachers are very helpful.

I loved that it was as hands on as it was. Theory was a good option to have, but having the option to actually work with the equipment we'd be using was a major perk. I really feel that it helped me progress with my education here.

The strengths of program help me understand the Medical field.

The film program has received strong support by the school and that is fantastic! have been spectacular. All of the technology that is available is unbelievable and I couldn't be happier with what I've learned.

It gives one the basic understanding of the world around them. It gives an individual the ability to transfer to a degree of higher learning and that is an incredible opportunity.

Preparing me for University level classes.

The teachers

The preparation for future educational endeavors.

Writing skills.
The Early Childcare program’s strengths are the instructors are educated in the field. They seem to be up to date with the child developmental changes in North Carolina.

Chemical Application, Plant ID

good teachers that can incorporate their own knowledge with test material, while still making it attainable to the students.

I now will have a degree

Gives more knowledge of working with young children.

The classes in this program help improve your skills with machine work and help you get ready to inter into a job in this field.

The Marine Technology Program is a one of a kind program that prepares you for a career in the maritime world. The instructors are incredible, they care about their students like no other teachers that I have ever encountered. We are exposed to up to date technology in a field of study that is ever-changing. The hands on experience that we gain is invaluable and the main reason that we get good jobs coming out of school. is an incredible man and works tirelessly to make sure that the students who want to excel and get a good job are prepared to do so. I can not say enough good things about the chair of our department, he always makes time for us to answer questions, has taught me far more than what can be taught in a class room, and that goes for all of the teachers. The faculty is just incredible, i are so much more than just teachers to me. Each and every one of them has reached out to me and my classmates far above and beyond what is expected of a teacher. They all deserve the credit that is due to them for the incredible job that they do in what may be the most difficult field of study. I can not say enough good things about the Marine Technology Program and the people who make it possible. I sincerely thank everyone involved for helping me change my life and live up to the potential that I am capable of.

The given instruction to express yourself. Say what you mean and mean what you say. Do not talk who you are be about who you are. This course was a confidence builder.

the hands on training

For my program of study (criminal justice) I really got a grasp of how the legal system works. The papers and test that were provided for us really made us do out research to be effective in the classroom.

VERY HANDS ON AND PROFESSIONAL.

The technology and tools provided to the students.

My reason for attending CFCC was a personal one. I wanted to learn culinary basics, and that goal has been accomplished.

Hands on work and you are thought everything the program ask for.

One specific instructor, is an excellent example of the knowledge level needed for this level. The level of technology available was appropriate and will translate easily into the type of work I am hoping to pursue. I very much enjoyed my math and outside curriculum classes as well.

It is academically challenging and is a growing field of employment.

Very challenging and up to date. Knowledge can be used in various career fields.

I don't know.

is an extremely passionate professor and I felt like she helped the students in my program really understand and enjoy the material, which is why I have enjoyed it so much and I feel that she makes the program a great success.

I think that going to a community college, and in this case especially Cape Fear, has provided me with the step I needed before entering the hectic four year university lifestyle. I was not at all prepared for a university level of education and Cape Fear has now brought me to that level. I feel as if I am more than ready for a university level. Cape Fear has provided me with strength to help me grow and succeed. Cape Fear has also allowed me to expand my expectations as I go on through my education, career, and life.

Some of the strengths of my program of study are that I have learned a lot of useful and interesting information that I can use in my everyday life.

All of the instructors in the criminal justice program have alot of experience in the field.

I had many inspiring teachers that helped me shape my path

Being challenged in the art program.

I speak well in public and enjoy debates and discussions of current events.

The atmosphere

Understanding.

I think that it will prepare you with the tools you need to transfer to the school of your choosing.

Versatility

The demand for employment. The competent instructors at CFCC.

I was able to take electives that coincided with my interest.

Gave me the ability to transfer to a NC university.

Good foundation for continuing to a four year university majoring in computer science.

The variety of courses offered

Teachers who speak the Spanish language and know the culture.
The strengths of the program are endless, the biggest strength is for sure the staff.

The smaller classes which allow for a better student teacher interaction. I felt that this was a way for everyone to receive help in any way that they may need be it very little during class to perhaps meeting afterwards at a tutor lab or something along those lines.

Hands on training, real job prospects, friendly instructors that care about you as an individual

The variety in the arts courses.

The accounting and math programs.

I liked the variety of classes that were available.

It has a big career field and it is always going to be here!

The strengths are the variety of choices.

The strengths of my program were that I got the basic skills and needs for my degree and education and I was still able to take classes of my interests.

Great Educators

Very solid online course offering.

my instructor is well and experienced enough to teach the class with confidence in making his students succeed.

Class size, Class format, Lecture, Individual work, Professional experience, Challenges mentally.

I really enjoyed the smaller class sizes. Also, my Instructors were very knowledgable. They truly care about the legal profession and want all of their students to succeed.

This programs helps to become a well-rounded person.

Accessibility of staff and teachers, cost-effective classes, available resources

Since my program is for the Pharmacy Technician Diploma, its strong points are associated with filling prescriptions, computer skills, professionalism in the workplace, pharmacy law, and compounding sterile and non-sterile products.

The sciences are quite good and diverse

Lots of studying.

The nursing program is very hands on and gives plenty of opportunities to learn the job.

Amazing instructors that were dedicated and were endless sources of information and support

Passionate instructors

Well organized and challenging

The flexibility of my course options and the fact that the communications transfer can be applicable in just about any course of study and eventual jobs.

The Arts.

Understanding the Plumbing systems and being able to diagnose problems that occur

The construction management program is top notch, paralleling similar programs at universities.

Learning from others

That I will be able to run and own my own company.

Customer Service and diversity of hair

I believe my strengths in this program of study were the criminal justice courses. I found them interesting and received respectable grades in them.

It was inexpensive to attend the college.

Clearly, prepared me to transfer even though I had to take a "hodgepodge" of courses required by UNCW.

being able to challenge myself mentally, able to speak in class, work in a team

Diversity of clients and learning how to use certain techniques that will take me further in my career.

The program is organized, and makes it easy to transfer.

I feel as though I was able to acquire a sound knowledge base and understanding of basic electronics engineering and troubleshooting.

I liked being able to take different elective courses. I was able to see what I was interested in or what got my attention more. And it honestly has helped move to a four year degree.

I really felt that the faculty was the biggest strength of the CFCC CTE Program. I had [Teacher's Name] as a teacher for all of my classes excluding one. He was an amazing teacher.

Information

The practical nursing program is very challenging but because so, prepares students for the challenges they will face in the field.

Great
Great science courses

It is a very personal experience and I felt that my success was very important to the instructors in this program.

Hands on training

Business is an admirable topic of study because it is globally applicable. Traveling to a different part of the world does not reduce the impact of your knowledge. Cape Fear also did a good job covering all of the necessary bases in their Business program, leaving no necessary stone untouched.

The strengths in my program of study are effectiveness and its ability to ready students to graduate and actually learn materials for the medical work field.

The tig welding courses

The use of in the field research. Having the boats and instruments to use and be familiar with are what employers are looking for.

My program of study for the last few semesters has been challenging and fun. The strengths I believe to be are the professors. Each had their own agenda for teaching the information of their respective courses and I found it very easy to transition from a military lifestyle to a school lifestyle. I might ass that the veterans center have gone beyond words with the help and direction they have provided not only myself but all attending veterans. I will never be able to express the true appreciation I have for them.

In humanities

The strengths are well organized instructors, good variety of courses for completion, and two year time frame.

Ease of attending classes.

I learned a lot in the first few semesters with quality material. Very hands on and useful equipment. Replacement teacher was not very good.

The selection of instructors

The strength of this program is the teachers.

The varies to choice of classes to pick.

Great curriculum, with the program director having such extensive work experience in my field of study benefits all involved. The hands on approach to practically every course specific to Nuclear Technology was a huge factor in my success; im a very hands on person, due to my background in auto mechanics and construction.

Great instructors: these are people who inspire and truly are dedicated and intuitive to each student. Great clinical experience: very diverse, and I like that it starts right away, it really helps one get more comfortable in the atmosphere he/she will go into.

The instructors: these are people who inspire, and are truly dedicated and intuitive to every student. The clinical experience: the diversity; also, I like that it starts right away, it really helps one get more comfortable in the environment he/she will be working in.

The Lead Instructor of the Medical Office Administration program at CFCC is the best instructor I have ever had. I have taken her classes every chance I have had because she is very knowledgeable in every area of Medical Office Administration. She pushes her students to learn the material in such an inspiring manner. I feel adequately prepared to begin my career because of all of her hard work.

The versatility of classes and ability to apply my degree to more than one area.

The faculty and staff.

The studies really challenged me to be my best!

Quality material

Quality material needed

The flexibility of being able to take online classes and the multitude of classes and times offered at different locations. Current and updated information.

I felt like the program that I majored in allowed me the opportunity to pursue a wide array of courses and learn new skills.

Communication

The staff is available to help you when you have any questions or concerns.

The updated technology and the instructor was good and the materials and equipment was up to date.

Knowledgeable instructors

The instructors are amazing. The course study is on the level of state board regulations. Overall, the cosmetology program is great for anyone to pursue.

I found that CFCC has an abundance of knowledgeable and supporting teachers. Most of every subject that I took I had an instructor that made all the difference. I think CFCC is a strongly staffed college, and I am very thankful for it.

The instructor

The strenghts are the teachers who teach the programs

Mainly Science and Mathematics.
Contacts in the industry already, through the teachers and everyone attending. It makes finding work through school easier.

That the professor and head of the program is a pharmacist herself so she knows what we need to be taught to get a job.

It is a very good program, I would recommend it to anyone. It was very challenging, and I like that.

There are benefits and strengths in all the classes I had to take for this course. It was a very broad range of classes.

It prepares you for a career or to further your education.

The ability to learn an an work hands on.

the faculty and their drive to teach and prepare students

Instructors are very knowledgeable

I feel that there were many options in classes that worked well with my work schedule. I thought it would have been way more difficult to work around my work schedule but it all worked out.

Community College Nurturing

Learning with a better student to teacher relationship as oppose to the University level.

I think our strengths in the program are.  is a great teacher. He introduced the material very well and I felt like he is what keeps that program strong, interesting, and finds ways to improve it by listening to his students.

Very challenging

Having a dental clinic at school helps a lot. It is up-to-date and is for the most party running properly.

The Instructors

The instructors. They care so much and try and so hard. Never give up on you!

we have great professor in the criminal justice field

The Nuclear Tech program is a great program for the simple reason that it equates to a job. The nuclear industry is growing and the program here at CFCC is one that I feel blessed to have had completed. is a great instructor that cares for his students.

It is broad

Allows me to get UAA to a power plant

I believe that the strengths of my program of study is giving the ability to overcome your fears, as you begin to work on clients for the first time.

Get beneficial science instruction.

I feel that during my time as a student at Cape Fear, my knowledge and my general aptitude concerning humanities, writing, communicating, and things of that variety have broadened considerably.

It is well organized and offers multiple hands on experiences and opportunities and clinical aspects.

It had a lot of hands-on aspects.

The strengths of the Nuclear Technology program that made it desirable for me is the amount of opportunity for employment. There are not many nuclear programs offered and it is a field that needs new people all the time.

Having R.B. Richey as the lead instructor.

Quick understanding, Writing, and Speaking skills.

The strengths of the program is that any student can take all of the science classes that they need to in order to succeed their goals. Also, this program helps to prepare any student for a four year university.

Only had 2 bad teachers in 2 years, one of which had not mastered hybrid mini-sessions(although they were bad in my opinion, I think they cared. 5 excellent teachers, and the rest were good or better.

The huge benefit of the Nuclear Technology major is the possiblilaty to get hired by Granite. I was lucky enough to achieve such goal.

The Art Classes had very helpful teachers, and the types of projects were very interesting.

The strengths of knowing collision repair and refinishing technology would be learning and knowing how to repair vehicles. Cars get damaged everyday so it would be a good idea to learn the trade because there is a lot of money and plenty of customers to come your way.

I was able to receive my GED and now I want to attend regular college courses. From attending CFCC I have learn the basics of work to prepare me for college.

The curriculum is academically challenging but there is very little real world application in this program for a vocational program.

instructors

good instruction, good environment

Painting and Refinishing, Welding, Structural Damage classes. Plastic and Adhesives as well as Collision Estimating were very strong points in the program.

This program has prepared me to be able to continue my education if I was to do so at a higher level college. The program has prepared me to be able to make sufficient evaluations with psychology programs and know the basic do's and don'ts for psychology.
The fact that this program is so versatile and allows for the students in it to study many different areas while still looking preparing for a four year university. I was able to take classes I normally wouldn't have and discovered an interest and skill in new areas.

Good amount of elective courses to allow the student to study arts and attend a variety of arts classes.

The program is academically aggressive but not supportive of the jobs that are available. The programs teaches for jobs at a much higher level of education. I already have a four year degree and this program teaches at a much higher level than most students are academically capable of meeting.

Academically challenging.

The dedication of the teachers. They motivated and coached us individually very well.

The courses enabled me to experience circumstances I would encounter in the workforce. The instructors were always approachable.

I have a good knowledge of how the economics of business today work.

Plenty of classes to choose from that closely related to my goal in profession.

I believe that an Associates of Arts degree from Cape Fear effectively gives students a solid background in general classroom expectations for future endeavors.

Prepares you to go to work.

Prepared me greatly for the real world.

The entire clinical aspect of my program of study was excellent.

One really understands how the different sciences are correlated.

The program gives you the ability to manage a medical office or hospital financial department or medical records staff.

The rotations and the teaching

The hands on training better prepared me for skills that I will learn in my field of work.

Literature, Physiology, Sociology

Hands on experience.

How patient the teachers are

The professors were terrific!

Social sciences, art

The faculty and employees of the school care so much about their students. Best school I have attended, and I am continuing my education at CFCC with the Marine Technologies degree presently.

Preparing me for the next step in my education, coming out of highschool I definitely wasn't ready for college, now after two years at Cape Fear I feel ready to tackle the rigors of a 4 year university.

The Marine Technology program at CFCC is, In my opinion, the best this community college as to offer.

Smaller classes and good availability to contact instructors

They made the program and influence students' lives rather than teach straight out of a book, especially ______. If it weren't for them, I do not think I would have learned anything I did not already know working in the hospitality industry nor would I have thought my education here was worth my time.

I wouldn't have stayed in the program if it wasn't for him. He taught my life lessons that I will never forget. Cape fear is so lucky to have such a well educated instructor like ____.

i just want to graduate

The instructors are top notch and truly care about the students success.

enjoyed the attention from teachers and staff

The Wooden boat building program is unique in that there are few programs like it in the country and even fewer in the Southern US. My instructor, _________ brings sound practical and business experience, which is useful to prospective workers for this industry. Best "hands on" education I have ever experienced.

It is very focused on my future career.

new teacher

I gained an understanding of a broad range of literature and arts I wouldn't otherwise have been subjected to outside of school.

It gives the graduate a wide range of courses to pursue in many career fields.

The teachers really try to prepare you for the future and work with the students to fully understand the material

The variety of classes available to me.

The post graduate employment is high.

English was my biggest strength while appending CFCC.

The course of study is right on track fr what my expectations were

veterans assistance, economics, computers
Very knowledgeable staff and up date education.
Question 18
What, if anything, about your program of study needs improvement?

Text input
to be more confident in myself and to further educate myself in the field i have studied
offering all cjc classes all year long
I liked it all it's a good program.
Instead of splitting certain classes into part 1 and part 2, maybe there should be one class for i.e. Real Property.
Would have been easier if we had computers in every classroom that we were in during class.
Maybe a few more distance learning classes - but actually everything is fine.
I would like to see the the test for CIS110 be more accurate in terms of curriculum. In order to "test out" of the course, I took a standardized test that really had very little to do with the CIS110 curriculum. I would think that the use of computers in this day and age is so commonplace that perhaps an entrance placement exam could be instituted that would more accurately reflect/determine a student’s need to take CIS110.
None
I needed better aid in scheduling the correct classes for study and countinuing my education.
Some of the instructors treat the students like children, and are judgemental and unapproachable. There are, however, a handful of instructors who actually like teaching, and care about what the students are getting out of their instruction.
Anything that does not teach.
Some of the teachers need to remember that we also have a life and 4 other classes to take care of. Some people even have jobs, so if the teachers were a little bit more considerate sometimes we would perform better.
Attendance policy. If im paying for classes and passing them, i feel like I should hatve to show up til test day if i already know the material.
Everything is good.
More guidance about transferring.
None, keep up the good work!
Clarification of course requirements for transfer students.
parking!
It would be better if this program and the Associates of Arts Program were a little more in sync. I took college level classes in high school and am still forced to take another semester to graduate because I changed from Ass. of Arts to Ass. of Science.
More out the class work. like going to police offices and jails.
attendance affecting your final grade needs to be adressed.
Nothing.
nothing
Not sure at the moment.
My math needs improvement.
My adviser was practically useless.
Real world application exercises and an expansion of the variety of economics courses offered.
more funding for the science programs
I think it would be easier if longer deadlines were given. Not everyone is a fulltime student. Many of us have jobs and children and other priorities that can make completing some classwork stressful.
There was a definite lack in the teaching. Most of the time our class was taught to read a book and without instruction, create whatever was in the book.
N/A
More full time teachers.
I feel that my program of study doesn’t need improvement as long as it continues to make sure students do there best and keep their courses curriculum the same then things will continue to succeed.
everything about Art, English and knowing that I can do the work with a little help.
Parking

More examples of real world applications and a more diverse offering of economics courses would be nice.

The one area of my program of study would be for the school to have more course selections at the north campus.

It was extremely difficult to communicate with the office staff and advisors. They make you feel like they do not care about you and they really don't. I can't think of one visit I made to the CFCC offices that I did not leave frustrated. Normally nothing would be accomplished so I just stopped going down there. Like with any school I did have excellent and horrible professors. One professor I would highly recommend that your institution exam would be . I took their online ENG 131 course and it was a constant chaotic mess where no one knew when anything was due and the assignments were busy work. It is like they just thought up something that sounded productive and tried to make us do it. I learned nothing from that course but one hundred ways not to teach an English class.

I felt that the Counselors were not as helpful & teachers did a better job helping me to find my field of study & classes that would be of interest.

Physics class is not needed. does not seem to like teaching very much and it shows in his lectures. Also he is very very negative about the mechanical Eng. field, I believe sometimes it might be wise to not tell students about how it will really be when they get into the work force. If you keep telling students how horrible its going to be then what motivation is there to keep going in the class??

Most other courses were either lacking in content or very slow moving along with the content. Most of the classes were of no use to the job of becoming a Reactor Service Technician. The program also seems to have a major problem with people cheating.

N/A

More online course access

I feel there is no need for improvement.

I can't think of anything.

I found nothing in my program of study to need improvement. I was challenged to a degree that taught me how to work and learn things for myself.

Nothing

Teachers who understand that many 17 and 18 year olds may seem immature but that they have to work full time, in difficult and low paying jobs, while trying to attend school. Better financial aid staff, too, as the people I have dealt with in the financial aid office are often intimidating and at times, downright rude and condescending. If family and financial circumstances had been different, CFCC would not have been my first choice due to the overall unfriendliness of many of the staff and some faculty. Also, parking is a nightmare at the downtown campus.

Not Sure

I do not feel as though there are any areas that are in need of improvement.

Electronic technology needs vast improvements.

Nothing, in general I don't think it is the program, it is the student.

I think it is a very solid program and the professors are very educated and educate the students to all they know.

N/A

It needs more actual business courses to strongly support the mindset of those, like me, who want to reach out as owner or CEO of business.

I think the anatomy and physiology course needs some improvement. The professors seem to go a little bit to fast, and make things more complex then they need to be. Other then that, I feel as if Cape Fear Community College is an excellent school.

Nothing.

More available classes throughout the year.

Some students attending Cape Fear do not care about their education as much as other students and effectively bring the level of expectations down, meaning that other students who are prepared and ready to be challenged are given a lighter course load and a lower standard. Also, in the science courses I think there should be more hands on and more challenging labs. Instead of just simulating a procedure, it should actually be done. Especially in anatomy classes there should be dissections.

Enforcing / "making" older students who have been out of school to retake English / Math courses. Had a hard time with learning English MLA format due to never having learned it 20 years ago.

Nothing

I do NOT feel that I, a psychology major should be forced to take math so much. If I am no good at it, then let it go. If my major was math, then yes, I should definitely have to take it. No finals or midterms need to be taken. they are pointless and they do not prove our knowledge of the particular subject.

N/A

I cant really think of anything of the top of my head that needs improvement. As a student that began at another community college I will say that CFCC really knows what they are doing and has a well organized faculty and staff.

Nothing at all
That being said, I think the program could use one or two classes based solely on film theory, especially in terms of storytelling. He pushes story as much as he can in every class he teaches, which is great because that's really what we're doing here. A whole class or two dedicated to analyzing film would be good, but no more than that. We don't want to turn into the other school where people know how to talk about it but can't do it.

Maybe some of the requirements for the specific programs, such as accounting, needs a history?

The course work was not that challenging.

At this time I don't have the answer to this. I will be completely new to the Business Administration program this fall. I just want to graduate in the Customer Service certificate this fall since I have 3 of the 5 classes that's needed all ready from other colleges. As I go forward in the program I will know more how to answer that. I do have a few of the classes already that's in the program and I know that microeconomics was a difficult subject online so I had to get it changed to seated. Since I live so far away from the campus, I believe the main thing that can help me to prevent me from moving to the area is that the new Cape Fear Community College (which is going to be closer to where I live and it's going to be in Surf City) be technology subjects so if I need to move for seated classes I won't be as far away as North Campus in Wilmington, at least. I live in New Bern.

I felt that some of the teachers who taught online classes made things difficult for students becuse they were afraid of cheating.

n/a

More current equipment, and flexible course schedule's

Technology: More Online Componets, perhaps blogs or videos relative to subject matter.

Many classes taken because they were the only ones available, not necessarily the best to chose for my program of study and transfer program.

Nothing I enjoyed CFCC to the max

Some of the teachers as well as the front office staff. I had one of the worst teachers ever for my English 131 online course. They were disorganized and communicated what they wanted horribly. I am very, very glad to be done with that class. Also, every time I went down to the front office staff (with the exception of the FAFSA people) I left frustrated and even more confused. I understand they get beat down by students on a regular basis but some of us really need help which they refused to provide.

Hybrid classes are nonsense if i wanted online classes i would take them but, i shouldn't be forced to take a class with an online portion of it. Example: Studio Art 241 i believe is a studio class to work on my artwork it should not require that i do online work! I am paying the college to teach me and answer questions in a face to face manner. online/ hybrid classes do not do that, you basically teach yourself, so what am i paying you for in the first place? other than that i enjoyed my professors and learned from them a great deal and i thank them for that.

The ADN program. I know it's supposed to be hard, but it shouldn't feel as though it were impossible.

I have noticed a large number of older students that struggle with computer literacy: Also, as a Bus. Adm. major I took alot of courses that require a calculator. I used a $1.00 calculator from dollar tree because I was never taught to use the TI-84, or any other calculator which would have greatly enhanced my speed and abilities with my courses. I have spoken with many older students who had the same problems. We were never formally taught the proper uses of these invaluable tools, and our grades suffed accordingly! Each student should be introduced, thru a 3 week class on the proper way to use these course specific calculators. Without this knowledge at our disposal many of us have felt we are starting at a disadvantage to our fellow younger students. This manifests itself in our self confidence and puts us behind in our courses before we even start.

fix the roof on the shop

i feel my program could use a little more hands on learning,

Teacher other then computer teacher understand issue with black board. I understand you have students sometime say they always have issue but I had two issue one ended me up getting a B in the class instead of an A cause I could not take the test over again even though I told the teacher that night I had issues. Example the test was 45 minutes but she said I was logged in for over 2 1/2 hours. That should tell the teacher that Black board had an issue.

more available times to accomodate those working

program needs a bigger facility

There needs to be a better place for the art classes.

certain class being offered more frequently.

Classroom technology (audio/visual) should be updated.

nothing needs improvement

How to become a gifted scholar, enthusiasts and communicator.

Offering night classes

I had a great experience and enjoyed it thoroughly!

There were certain classes I had to take that I didn't think were relevant for my program of study.

Math/biology

n/a

supplies and space.
I have loved the Math classes I have taken at CFCC, although I feel I need more improvements in order to move on to major in Environmental Sciences.

Nothing

Nothing

I think the program was great with amazing classes.

I have no complaints at this time.

None

There's a lot of choice, however, it feels A LOT like high school. The history courses I took were essentially High School History. This was annoying to me as I had already done them. The same is true for the math I had to do and to an extent, the English. high schools spend years teaching students how to do research papers and I come here... To do it all over again. Because of this, I recommend that students in HS should complete AP programs (as well as the tests, unlike myself) just to skip over courses in college. The other thing is that I still don't know what "real" university is like from this. If this is a college prep course-of-study, then why not make classes that are crucial to success mandatory? why not show transfer students how it works at the next level and give them advice and lessons that work in that fashion? Admittedly, the hs like courses may be very well designed with that very notion in mind. But, the classes are done like HS classes, with a lot of intermediary work. I understand that this is the choice of the teacher. I would say however that the most University-Like courses I took were my Bio class in a lecture hall and Mason's Psych class. Bio was about labs, homework, notes, lectures, and study. Psych was about lecture/study. From what I've heard, that's what university classes are like.

I feel that some of the teachers need to provide a better study guide for the test.

I feel that there is no improvement needed.

focused more on business

Ultimately, attending Cape Fear Community College was one of the best decisions I could have made as a college student. I am grateful for the Associates of Art degree and see no need for improvement in the future.

N/A

let the teachers teach the classes they want .. arts students need more variety because art is always evolving and too should its classes

More of a guided advising process

The only thing that was really tough about my degree was scheduling the classes when I neede them and juggling work. There were several classes that filled up rather quickly and there weren't many alternative choices.

Implementing a class that would teach Microsoft's Active Directory would be a major improvement.

A certain teacher tends to take a lackadaisical attitude toward the class. We were never given our grades to anything (whether it be a project or a paper)until the end of the year. After one class, the last day of class this teacher asked me where all my work was. (Although I had turned everything in on time, except one assignment.) Thus I was given a "D" in the class. I'm still not even sure he found my work.

nothing at this time

CFCC needs more higher level classes such as general physics and calculus 3. Cape Fear needs to offer more of one class, such as general chemistry, so it's easier to find a time that fits the rest of a person's schedule. In addition, there should be more variations of classes that are held in different mini-sessions.

Given that an extraordinary amount of money into the infrastructure of Cape Fear. Keeping that in mind, taking into account the amount of growth and the facility that our program has to work with, we need a bigger facility and more equipment.

class scheduling.

The availability of classes

Better teachers

The semesters always start off very slowly and ween students in. I think that the classes should start intense instead of slowly building up and rushing to finish in the end.

The hands-on skills

n/a

If a complete online program was set up.

Give the teachers an assistant.

more opportunities to take the classes not only once a semester because if you miss a class or are short a class and are almost done you have to wait another semester for one class or even wait until summer time. also shouldnt be required to take a full schedule in the summer time to graduate offer classes in fall and spring also rather than just summer

Nothing

Better library hours

parking

I believe the summer mini courses don't allow enough time to actually learn enough material to be of use, because of the time restraints

The program of study could stand to have a couple basic business classes added into it so that students could at least get a taste of what they are majoring and preparing for.

nothing
After thinking about it I can not think of anything about the program that needs improvement.

I will always accept the fact that since I am wanting to get a degree in anthropology, I will always need improvement in that category.

Nothing

unable to think of anything.

A little more hands-on work and more club activities.

More hands on life experiences.

I think it could be more challenging in the classroom.

Time of courses!!!! And be on a 10point scale like every other college...

Consistency in requirements over more than one school year.

Nothing

One thing that I think needs improvement is that some of the classes that are required for an associates in business do not count towards college transfer. Some of the classes, however, are very beneficial to my studies.

N/A

I wish there was more Psychology classes offered.

Improvements can always be made but I would say that communication lines with counselors and advisors could be improved.

Nothing about this program needs improvement.

Need more specific class for science majors.

Improvements needed to more easily find the courses needed to be taken in order to complete program of study.

Advisors should be better selected.

Nothing

More studying every night in math and to read more.

Not that I can think of.

There is too much of a burden on students to develop original material to shoot as well and maintain high technical standards. I think a stronger relationship with both the Creative Writing departments and the Drama departments would help a great deal.

I wouldn't change anything about my program. I feel that everything I have learned will prepare me for my 4 year college I am going to.

The main thing I feel could be improved on is helping students move forward in their program of study, of instance suggesting jobs or helping with a knowledge of where to start.

N/A

I didn't see anything wrong with the program of study.

Parking.

Personally my counselor was never available, leaving me on my own to pick courses and plan my schedule using the program evaluation, thank god for that feature of web advisor!

early college students need to be more involved in the college activities

Some of the classes in the program were only offered during certain semesters which lead to scheduling conflicts.

Class availability. I work full-time and must attend school at night. I don't feel like the evening class selection is great.

Nothing

The program is very good and I can not think of anything that could improve my program of study.

cant recall any

Nothing

nothing

Upgrade instructors (not in all areas) and there skills.

I wound have to say nothing, because the associate of arts degree covers the basic knowledge of everything. For instance before CIS 110 I had little to no technical knowledge, but now I can use a computer to its full potential. Another class that has helped me tremendously was ENG 131 with [Instructor Name] as the instructor. This class helped me both comprehend literature better as well as write better. But once again the program is perfect, and I would not change a thing.

N/A

I don't completly get why for a political science program you need more than one basic science class.

(Books that do not fall apart with excessive use!)
Keeping blackboard up to date.

Consider offering a new program of study for those wishing to attend the Campbell School of Pharmacy. All of the required prerequisite classes are offered at CFCC.

I think the advisers and counselors could be more specific and helpful in clear guidance. I have went to them numerous times for help and left feeling just as lost as when I walked in the door. Some advisors are good, but most of what I have come across has not been here lately.

Learn more, we never stop learning.

The instructors could be better

Nothing seems to need improvement to me.

i do not feel there is any improvement to make.

Well I think at times the number and length of assignments were overkill. Plus they need to accomodate drop/adds more in the future it shouldnt take an act of congress to do a drop add.

Some required courses were not offer both in the fall and spring semesters. This caused some scheduling issues and forced me to take additional semester.

Most of the courses that I was interested in for science were not available. I felt that the sciences I could choose were limited.

The use of computers, and staying on top of everything ahead of time (concerning my full time classes).

n/a

More classes...

Nothing. If anything, I needed improvement on myself. CFCC was the best choice of schooling for me.

There is no need to have so many electronic engineering and programming courses. There also needs to be a class on writing scripts.

I think there should be more sections of humanities classes offered on both the North Campus and the Wilmington Campus.

Replace Denise Hightower. She leads her classes like a drill sargent and does not treat her students equally.

Science lab. I was required to play video games for lab to receive credit. The skills and intelligence needed to do so would of suited a middle school science course.

A course that teaches some of the legal software that is used in law firms would be very beneficial. Also, it would be helpful to have information available on how to fill forms out online and locate legal forms online.

Better advising, my adviser doesn't always answer his emails.

I should improve my public speaking.

Not to require Java 2 if someone doesn't want to go into programming.

Accept more students into allied health programs.

A course on Mac perhaps.

Nothing. This is the best school, the best program, everything about it is superior to other schools I have tried. I have been challenged, I have even failed, but I have learned lessons for a lifetime. And made some friends along the way. I am so proud to be a John T Hoggard dropout (GED, which I think I left for the right reasons at the time) and to be a CFCC Sea Devil because CFCC is the best community college in NC or on the entire east coast! Love it! Have referred many friends and family members there, locally and out of town. They feel the same. Thank you for giving me such a wonderful opportunity. It has been priceless.

I don't think anything needs improvement.

some instructors teaching or giving rules off of their emotions

Product

The frequency at which product is ordered and the amount of time spent haircutting in beginners is not sufficient.

Better communication between teachers and students. I feel like a lot of the time if any tension or arises whatsoever, it's usually due to a misunderstanding, misinterpretation within teacher/student communications.

Having more supplies in stock.

There could be some improvement in the diversity of the program and diversity of learning material. Also, I believe the program caters to and supports students receiving financial aid, unlike myself and a few other students. The staff could have been more understanding, supportive, and motivational for students paying tuition out of pocket.

I would like to see there be more creative classes online because I would have loved to take more but they fill so quickly. I am sure though that as the school continues to grow online choices will as well.

The day time students need improvement. The work environment is a bit childish at times. Also a form of music of some sorts whether its oldie but goodies or some form of entertainment would help cut back on a lot of the foolishness and/or self entertainment that takes place.

nothing needs improvement. it's great.

More flexible schedules as far as different timings

There needs to more consistency.

Nothing
More attentive instructors. More structure.

Offer more up to date things to learn...more modern techniques. Have more instructors willing to help & learn themselves.

The program is great! I wish that ALL classes were offered at the downtown campus as well as the north campus.

Instructors need improvement. Cosmetology is a field that is always changing and growing, they need to be up to date.

More classes offered in the evening.

More of the technical aspects of Criminal Justice.

I can not think of anything at the moment.

The class scheduling was something that made school a little bit of a challenge. I work also besides going to school and there only certain times you can take some of the core classes and it made it difficult to work and go to school during certain semesters.

I do think the requirement of physics in my field of study needs to be changed. Out of all the classes that was my only C and I do attribute it to poor teaching and a lack of interest. I do not see how physics applies to a Computer Engineering program.

It was a very successful program.

I don't feel as though anything needs to be changed. Every step up on the curriculum was a challenge for me.

More interaction with advisor.

I do not need any improvement because you trained me correctly.

History

The English Department needs more funding for writing contests. This type of competition among students would also produce stronger work.

Diversity of the computer science field.

My study habits need improvement.

Books and their prices! The books go way into depth which is good but found that some things were not necessarily needed to get to the point of what was needed to gain the knowledge of the course. Some were good and on point and others should be simplified to exactly what we are doing and may even cost less.

There should be a nail tech portion to the program

Overall I have been immensely happy with my program of study. I had one issue once with meeting my adviser for my schedule, but it was nothing I couldn't handle through webadviser.

I think CIS 110 should be taught first, because MS Word and Power Point are used quite frequently in English, humanities and speech classes. The need to be computer savvy is there. I think the Math 070 course needs more teacher lecture time.

I don't think the program needs to do anything different

Some classes are too easy, they seem kind of pointless at times. Some teachers act as if they are teaching at a university, while others, seem to be teaching 7th graders.

I think overall that the Business Administration program really teaches you a thorough understanding of today's business environment and doesn't need any core improvements.

Need for improvement are speaking in front of others and writing effectively

I feel as though some elective courses I have taken could have been improved upon.

Nothing

I believe the classes needed for a Diploma in your program should be aimed more towards your needs. Example: How does taking two Geology courses help me learn business and finance?

More online courses available and for teachers who want daily work to consider that some of us are mothers and work...etc..

I think the people that students are supposed to go to to get help with their schedule when they first start at CFCC need more training because I got stuck in the wrong class and took a lot of classes I didn't need because of them.

More classes at different times

I do not see where two semesters of Physics is necessary, in the nuclear industry a entry level person is not going to be doing any type of physics pertaining to the reactor. that's what engineers are paid to do.

Some of the credits will not transfer to other colleges.

Some of the credits won't transfer over to other colleges.

There are some required courses that do not seem necessary for the nuclear maintenance program.

Some of the classes are fully taught through a power point. If the class used more hands on activities, kids would learn quicker and retain the information.
It needs more program related courses than electives
Keeping students on the right path as well as a better advisory job in figuring out a plan for the future.
I believe that more advisory could be used in helping decide the right path for a future. I felt a little lost.

None
Better instructors!
Consistency.

CTS285 and CTS289 were difficult to understand, esp. student direction, tests were overly difficult, projects were not adequately explained, lack of direction. I believe only one of the courses is actually needed, perhaps a combination of these into one with well defined projects and directives. Electives could perhaps offer advanced English and advanced Math for transfer students. The brochure had a misprint in that the number of electives required (2010 version) was 9 hours, the suggested semester class loads only listed two electives, not the three required, this caused me to take an extra semester and slowed my overall progress toward a bachelors degree. There seemed a complete lack of empathy toward the student regarding this issue, which is clearly a misprint and misleading. Student loan and financial aid information is too difficult to track for the student. I would suggest a pending amount be listed on web advisor, not just zero it out because of pending approval. In my case, my grades were needed for this approval. It is difficult for the student who relies on these funds to make adequate plans when zero is the only number one can get. I felt it necessary to look at CET programs due to the departments use of labs and program availability. I think CET150 should also be a CIT program, it offers excellent computer information training. There are others I would suggest including in the CIT program from the CET program, but I will not list them here.

I don't feel anything needs improvement.
I did not find anything that needs improvment for my program of study.
more money and funding for supplies and more studio areas with ample space to create art of all kinds!!
better counseling and help in choosing the correct AA degree to successfully transfer into the program the student wants in a four year college.
More access to nuclear specific information. Such as tours, guest speakers and etc.
more teachers who are passionate about there field of study and like to help students.

None
Registration.

Class availability. Students should be informed that all the classes offered in the Paralegal program are not offered every semester and that they should follow the course outline shown in the student handbook.

Business Finance

Having an academic adviser who can help you more thoroughly through the transfer process.
I believe the program needs more projects based on the field of sociology itself. Something to give students hands-on experience in the field
I don't feel like any of the courses I took were truly challenging.
Nothing at all I had the best teacher and learned everything that I needed to know.
I can't really think of anything..the program is great and the teachers are awesome.

none

None that I'm aware of at this time.
Nothing really
more clientele coming to the school

Everything. The teachers, faculty, and counselors are no help at all! They only care about themselves, and moving you along just to get to the next student! The financial aid office is a JOKE! THEY ARE RUDE, MEAN, AND ARROGANT. THEY ARE NOT FRIENDLY PEOPLE, AND DO NOT WANT TO HELP THOSE WHO ARE IN NEED OF FINCIAL AID

Nothing

It would nice if cape fear could advertise their cosmetology program to target potential clients. this will make it easier for students to receive all of their pracicals and graduate on time.
The basic knowledge of kitchen work needs to be improved, cfcc culinary gives students false hope of working in kitchens. I have worked in restaurants for 8 years, the last 3 years in the kitchen on the hot line, the students need more knowledge of technical skills like meat fabrication and global cuisine.

None

I would have liked to have had more availability of currently offered science classes (organic chemistry 251,252) and additional, transferable upper level science classes, such as Microbiology and Genetics. Although I realize that ultimately, the courses that I enrolled in were my responsibility to choose, I could have benefited from a more personal experience from a well qualified advisor. My 1st semester, I ended up taking a non-transferable Biology class, and now I am playing catch-up trying finish credits on time. My class schedule was reviewed by an advisor who did not catch the error. Making sure that new students get the right start should be a top priority. All in all my experience at CFCC was a good one.

The only area of improvement my program of study could use is an official Computer Art II class. I noticed it is an option in the class catalog yet it is not yet an actual class. With the addition of this class to the Associate of Arts program I feel those who are pursuing a graphic design degree at a four year college like myself can get a better understanding of graphic design before they head off to a four year college.
Not enough expensive equipment.

More online offerings

More field study

nothing

nothing

need to teach advanced techniques

The major improvement needed would be accurate counselors. The back and forth, communication from CFCC, and the school I wished to transfer too was frustrating. Although, I know some counselors would say that is a good thing. The main reason it was happening was because, CFCC counselors did not have their facts straight. The UNCW counselor told me, my schedule designed by my counselor and myself, was off base with transferring. I need my counselor to guide me. I did not feel I got the help I needed in that department. This is the main reason I am graduating a semester behind.

I don't think anything needs improvement at this time.

I think the electrical part of the program needs a new instructor. Students who are not already proficient in the electrical field are made to feel stupid for seeking help from the instructor.

I think that the notary classes should be included since most office situations request the paralegals to also be notaries.

nothing

Speaking specifically of the Automotive program: More structured, instructor-led hands-on work on a daily basis would be helpful. Also, some instructors lack enthusiasm for teaching students, especially in the foundational courses. They often expect students to already know the material, and do not lead the students in class.

no

It would be nice to have more programming courses for A.S. transfer, course options. These would include C programming and Java programming as options, in addition to visual basic.

Drug test all student to eliminate waste of materials and instructors time.

Focused course on building your networking for acquiring a job perhaps.

None

N/A

Continuous Funding!!!

I did not like having to take Literature.

Nothing, was an excellent program.

AAAAAAARGH PEARSON ONLINE STUFF! Do they pay schools to get a monopoly on textbooks or something? The last few semesters I had to use some variant of their online lab, pay extra for the privilege, and learn less than I ordinarily would have due to being frustrated by banging my head against their horrid software. Were it a free practice tool it would be great, but it may well be the worst possible way to do homework. Please get rid of it.

All of the classes I took were amazing! The only thing that I feel needs improving is Black Board and Computers in the class rooms. Many to most of the time the computers/Black Board were either slow or completely not working. This made both the students and the Professor frustrated and also caused many of our classes and assignments to be delayed.

Newer equipment.

The class time availability for the higher, more specialized courses. I chose to attend CFCC in order to attend class and still work full time. There were a couple semesters when I really had to cut back on my work hours in order to attend.

I completed most of my courses at UNCW so I'm not sure.

I am currently taking Business Law. I do not like that in the class we were told we have a mid term and a final, and that is it. Only two test puts a lot of stress on a person. Not only for that class, but it affects the other classes I am taking as well. Most of the students in the class had to fail the midterm for the teacher to realize that we need more grades to be able to pass.

None, all classes for the program were what I needed.

The advising center for Pre-Elementary Education majors could use some improvement. I went off of my program evaluation to figure out who my advisor was. After countless amounts of emails of trying to get in touch with her and receiving no response, I decided to locate her office. Once I finally got in contact with her, she then told me that she wasn't my advisor when on my program evaluation it clearly says that she is.

Larger facility

Because of the fields of study that it leads to, such as engineering, and the level of difficulty/workload associated with these programs in a University setting, I feel that the Associate in Science program could benefit from more challenging course material, and an overall more focused look at mathematics and science courses; this would much better prepare college transfer students for the fields of study that this program is intended for and the level of study dedication that comes with them.

Some of the classes are very repetitive.

my math courses.

offer all the classes each semster

organization especially in the math department, more resources etc.
larger acceptance into the program

There should be an unlimited amount of chances to take the placement tests.

More course variety

It would be nice to have more times available to take classes. Some of the classes I had to take were only offered at one time that was not always a good time for me. They also don't offer many of the classes require for this program during the summer. I believe it would be helpful to offer more of them during the summer. Another thing I find I really liked are Hybrid classes. My schedule was always so crazy. When I had the chance to take a class that was one day or night during the week and the rest was online it made it much easier for me.

Organization

The only part of the program that I did not favor was the fact that it has taken me so long to get finished. I have been in school for 3 1/2 years trying to get this 2 year degree, and I came in with a few transfer credits. The problem for me was how the classes are offered when you have to take evening classes. Some classes were only offered in the fall, others only in the spring, and sometimes the second part of the class was offered the semester before the first part was offered. I am glad that I am finishing this semester because I had run until a problem with financial aide saying that they would not pay for any more of my classes. So I had to do an appeal to be able to finish the degree. I believe a large part of that was due to how the classes are offered.

The facility is inadequate at best.

Department chair is highly ineffective, please hire someone who wants to help people succeed.

extra funds for free labtops

I think it is good the way it is.

Keep everything as is.

The 4th semester is 14 credit hours, while the 5th semester is 10 credit hours. Therefore, the final semester is not considered full time, which mess up financial aid for us students.

I feel very satisfied with my experience at Cape Fear and do not feel there is a significant area for improvement with in my program of study.

Writing skills

books

I would have picked a more definitive major earlier on

Equipment in kitchen, needs support from CFCC so it can be just as good as (GTCC I went there too) it seems like this program is the red headed step child of the school, size of kitchen is a joke but the instructors make miracles happen in that space. The dinning room needs major updating to make it more appealing to potential employers for the students to come in and scout potential employees. The clubs in both programs are also awesome for the students to be involved in the community. This is a excellent program but the school needs to put more money into it and let it grow as of now I feel it is terribly under staffed and too small for the size it has grown. Look at GTCC Hotel and Culinary program as a example.

help in getting a co-op. Having a list of cooperating agencies that offer internships would be a great help because we could see more options then we may have thought were available.

i have enjoyed almost all my courses at CFCC

Culinary students should have access to the parking lot next to the W building, since our program requires us to carry so many supplies.

I would like to learn to write a little more effectively and to better understand our nations history so i could explain it to another student or even help them in a class they are taking.

Being a business major who is going into Management and Leadership, it would have been nice to have had some leadership courses attached to my major requirements.

Personal Finance, seemed weak

Nothing.

Nothing other than another speech/communication class may be needed. These communication classes were extremely helpful to me, and helped me to comunicate with others better. This is because at a job there is much communication going on, and it needs to be clear and precise. Other than maybe another communication course required this program is very solid.
One thing I would say needs improvement is more help planning out what classes you need to take. It got easier my last semesters, but I can say I personally had a lot of trouble my first semesters picking classes I needed and would transfer. I actually took a class that will not transfer and it set me back a little bit.

My program of study was perfect.

Nothing really needs improvement I enjoyed all my classes and felt they were all fair.

I see no need for improvement.

There are not enough instructors in the hospitality/culinary curriculum. I think it is ridiculous that I have the same 3 instructors for every class I have for every semester. It is not only spreading them thin the students don't get enough one on one time. I also think the facilities we are typically in...the (W) building needs some long overdue upgrades. Students need to have more choices of classes to take in a given semester but it isn't possible because of the lack of instructors which in turn takes a student longer to graduate.

The improvement of college selection to choose for certain degrees as well as minor programs.

In my opinion it's great the way it is.

More parking and more classes offered at North Campus.

Need more qualified instructors, it's only so much we can do with only one good instructor.

Nothing notable

At the moment I can not think of anything that needs improvement.

Possibly make some of the higher level Psychology courses transferable to universities.

I think that some of the math professors need to take a step back an try to understand their students a little better.

I felt like it would have been better to have more classes offered for my major requirements as a science major.

Need more required classes such as criminal. Teachers need to communicate better.

Nothing

As someone who is taking classes for the paralegal diploma and certificate I feel like I have gained some vital learning experiences from some of the diploma classes which I would not have if I was just pursing the certificate. I feel like the certificate should possibly include more classes to assist in preparing you for a career as a paralegal. For example, I have not yet taken the class, but I would imagine legal research and writing I would be very helpful towards the certificate and becoming a paralegal.

I feel that if a computer competence course is required for graduation, that it should be added to the program requirements.

Nothing.

I feel that is would be very beneficial to have a solid internship program in place with local companies. This would provide real word experiences that will prepare students to transition into a full-time job.

Nothing comes to mind

I would like to see a more diverse list of history courses pertaining to european and ancient civilization.

More courses and course times offered on non-Western philosophy, religions, and history.

none

Better equipment and more materials for the different art courses would help.

more availability of core classes, also professors that give assignments, homework and tests to give the student a better chance at learning and understanding the material; versus professors that only lecture and give tests.

Bigger facility

There were some, but a few more scholarships would be nice.

I had a change in majors which temporarily derailed my plan of study, this was due to a miscommunication, but fortunately only one semester was spent on this route and I feel I still learned a lot.

The way the information was given and the attitudes towards the programs.

Having instructors who have experience in teaching and journalism would improve the program.

More instructors who are actually journalists

A lot of the classes that I have taken were not directed towards my program of study. I feel like these classes are wasting my money and the states money. Also, I think it is important for students to understand what jobs they can achieve with their degree and this knowledge is not offered. Advisers are useless. I repeatedly tried to contact my adviser via email and phone and she never responded.

Facilities and equipment

I do not believe anything should be changed about my program of study.

The program needs more structure. Although the program just started so the teachers are still working out the bugs.

Writing

More studying on the math side than any side of my program of study.

Nothing
I feel like I am ready for University level classes. My GPA has continued to improve each semester. I promise to dedicate myself in every way possible.

It would be nice to be able to have a larger supply of art medium, you can never have too much. I also wish every studio had their own room instead of bundled together and having to share rooms. It makes it awkward and stressful when trying to share a space with two different types of art classes.

Adding more "elective" courses to the Major Requirements part of the program evaluation.

I wish that the math requirement had more choices instead of just the three options. Also, anatomy could be useful for anyone, and for my major a student does not receive credit for taking it.

I feel CFCC needs larger culinary lab spaces.

I think there need to be more courses geared towards elementary education and preparing for transfer to a University.

* She rules her students like a "drill seargent"!!!! * Does not like student participation such as a student's opinion or student discussion during class!!! * Is racist! * Not available to students when a problem arises such as a conflict between two students and will not listen to both sides of the story, especially, if one student is white and the other is African-American; makes the white person apologize in a situation when an African-American starts a conflict and does not discipline the African-American. Will not meet with the white person to listen to that person's side of the story.

I would like to have more class dealing with my major.

The Sociology and Psychology classes I believe need to have more classes available. The classes that are available are few and hard to get into. (Fill up very quickly.)

Some of the math and science course's time slots, along with labs, conflict with one another making them difficult to take in the same semester.

I really don't think there is much to improve on, completing a degree online is a dream come true for many working adults including myself. I think may be a larger variety of classes available online over the summer is the only thing that could be improved upon.

Studying
There needs to be more criminal justice courses.

I wish it was a evening program so students like myself could easily secure employment.

There should be more criminal justice courses.

New equipment.

There could be better communication at times, but nothing else really.

n/a

would like to learn some more updated procedures such as the smooth out.

Math, Psychology

Counselors need to set your graduation goal day one of enter each degree program to ensure NO error at the end of your program

Nothing

The removal of unnecessary classes on the program study and more in depth class study would be nice.

I felt that my program of study was completely what I needed to take my education to the next level

I think the advisors should be more available and the Natural Sciences and Sciences should combine.

Nothing, I love it all. Well, maybe the Java classes... could use another option for instructor.

The classes should be available each semester. It was not an issue for me, but many in the program have to wait until a class is available to graduate. I feel like a few that could have graduated have to wait and then life happens and that class is never taken. I would also like to see more involvement with the culinary program. The biggest problem in restaurants is the lack of understanding between front of house and back of house employees.

More products for Cosmetology

I enjoyed the A.A program. but if there was to be an improvement I would say there needs to be more Science requirements. I feel like I only did the bare minimum, but that's only what my degree required.

I feel that the program is just fine.

Maybe a few more musical arts tailored classes.

Economics

More diverse class times. More non-Western centric history, religion, and philosophy courses offered.

Wider variety of non-Western history, religion, and philosophy classes as well as more diverse course times.

I know that it is difficult to stay cutting edge in the technology field, but some of the classes need to be updated more often and we should be using the newest software available, not last year's outdated stuff.

Less required science/math for those who have a writing or art major planned; if online classes are taken, teacher for that class should be available on campus for meetings and discussions.
Maybe the difficulty of courses, workload, subject matter covered.. I feel as though some of the classes I took in high school were more challenging. I ended up not taking certain classes so that I could take the entry-level courses at a 4-year university to make sure that I would not fall behind with how much I know about the subject after transfer credits. For example, an intro to physics at a 4-year college would cover much more and be much more demanding, and also sets the student up for the next level of physics. If a student took an intro to physics at CFCC, received a transferable credit, and jumped into the next level at a uni, the student would be behind and unprepared. While some classes/professors were an exception, the courses I have taken and with which have earned an A.A. degree did not prepare me for transferring to a university/4-year college, especially with the ~128 cred. hour general education req's waived. I know that for the cost, I can't complain, but it's silly.

The main area for improvement would be the establishment of course prerequisites. As there were several first year paralegal students taking courses that are tough even for myself at this point in the curriculum.

facility space with respect to class size

It needs more materials to work with and a bigger budget.

price

The only thing I would change about my program of study is the absence and tardy rules the teachers enforce that do not follow the cfcc guidelines, especially for the three hour classes.

Nothing.

The concentration of the type psychology field that the student is most interested in to develop familiarity. If the concentration is therapy or education then the program could allow for that by providing certain services or classes.

Information about College careers and success.

There needs to be less mathematical and science courses required and focus more on arts.

The only think I feel that may need improvement is getting more supplies.

I feel the program really needs sometime of study lab where one has the ability to practice or to continue to learn everything from net mending to marine zoology to time practicing with the hydrographic survey software. This being more available outside of class time. This would strengthen the students skill level going into the work place.

I believe the students should get more hands on opportunities. The labs are good , but more involvement allows the student to reach his/her maximum potential in the classroom.

Some courses need to be lengthened to two semesters. There is just too much information for one semester

Less English and no Literature

nothing

Broader selection of classes online

The availability of equipment and some decent buildings.

I don't think anything need improvement, my time at this school did me a lot of good and I'm very pleased with my experience within my program of study.

None, great instructor, very experience in the field and are more then willing to help you as the student.

More knowledgeable staff.

A more defined role when it comes to the concentration of the area of psychology that the student is interested in.

Nothing needs improvement

I am really happy with the program, the only real improvement i think it needs is some updated equipment and maybe larger classrooms.

Nothing, as long as students apply themselves they will succeed.

Physics pre requisits should at least be trigonometry

Since it is fairly new, the program is ever evolving and improving.

Offering calculus based physics. It is required to transfer to NC state as an engineering student, and yet it is not offered here. Making it impossible for any student who desires to be in engineering at state impossible to get there straight from CFCC.

to finish my classes and get what i need to do over and done with here at cape fear.

n/a

Teaching styles

Some of the classes I was required to take I feel I did not need for my career knowledge.

Perhaps the addition of an elective that focuses on training for the American Culinary Federation certification. Also making it available for students to test for their A.C.F. certification on site. This would give us higher value to future employers and almost garaunteeing employment with some.

nothing

For the Acting program I believe that students who want to study strictly film or television acting, the major should be have courses specifically for that and I think that they should have high quality equipment to use. Also, for the music program I believe that those who are interested in learning how to play instruments should have more than just primary instruments such as guitar piano, and violin.

For this degree i believe it is perfectly fine.
It needs clear instruction on what type of class requirements are needed to complete the program of study.

Academic Information

I feel that the ICD-9 and CPT classes should be offered in the Spring or Fall semester instead of the Summer semester.

Nothing really needs improvement.

I feel that the AA Transfer Program offered is well rounded and offers great course flexibility.

The only thing I would say needs improvement is getting help entering my first semester. When I first started I was so confused on which classes to take and I ended up taking classes I didn't need which hurt me with my financial aid. So I would just say getting guidance when I first enrolled would have been more helpful other than that I enjoyed my time at CFCC.

The only thing I would improve would be the assistants new students get. When I first started I didn't get enough help in choosing classes so I ended up taking courses I didn't need which hurt my financial aid. Other than that I really enjoyed my time at CFCC.

I think that taking a computer programming class is not valid to my course of study.

Small classes. Welding had 18 people in the Fall class and smaller classes would allow more one on one teaching/tutoring. More space for projects and work room. Some equipment out of date or not available in this course. Building leaks and needs repairs.

Program of study needs to have more hands on opportunities for the students in the Science Department.

I'd like to see the computer forensics courses offered in CIT as well.

the amount of work that is given at once, I know this is college and we half to accept what we get for example I took five classes this semester ans in 3 classes I had the same project and everything was due at the same time

N/A

Nothing.

The only thing I would suggest for improving my program of study would be that the teachers use their position to more creatively teach students aspiring to have a career in the psychology field.

More help in person with guidance on signing up for classes and the goals to achieve a degree. CFCC is starting to do everything online.

Some of the teachers were truly awful and indifferent to the evolving needs of the classroom. Stricter teacher evaluations by outside personnel would have gone a long way in rooting these teachers out.

The only real point of improvement that I felt needed to be addressed was the difficulty in which my automotive instructors faced in getting new and updated equipment. This is coming from someone who has seen both sides of this program, first as a student, than as a work study in the automotive department.

More scholarships.

There should be more choices of electives so that students may experiment during their time at Cape Fear Community College. Also I think that it would be best to have teachers for those programs because there where many courses that were available in the elective slots, but had no teachers to teach it.

There should be more hands on work with building science tools and a more diverse pool of instructors.

The financial aid department was insensitive and inconsistent. I received different answers to the same questions. I never received any return communication from my adviser in 2 years. Not once. No one ever helped to develop a course of study and I wasted time because of this.

I was absolutely satisfied with the program and do not feel that anything needs to be changed.

n/a

Communication with teachers.

nothing it is a great programs but I wish dealing general studies there was a general class that taught a little on how to do a little office work being that aa is a general study.

At the moment I would say that the program could use more instructors for how many students they have.

Need to re-evaluate the courses required to have for this degree.

some classes required for course need to be re-evaluated. There needs to be more actual hands-on labs that we would encounter in the real world. Less lectures and more hands on.

Another computer class perhaps.

I think the total integrity, Advising and Instruction in my program needs improving tremendously.

n/a

I feel that the Coding classes should be offered in the Fall or Spring semesters, not during the Summer semester. This will allow the students to have more time to learn the coding system while they have an instructor to work with them.

I have to take some classes online at other college when I they wont work with my schedule, since they are all in class courses. This isn't really a problem since quality education in childcare should be hands on. It would be nice to have some of the courses hybrid style, so at least the paperwork/power point discussion time could take place online and class time for activities and project development.

I think the Advising, Instruction, and possibly the programs integrity.

Better theater and classroom space.
Better scheduling of classes.

More teachers!! I was almost not able to graduate because the 2 classes I needed were not offered in the spring. Therefore I was forced to take an independent study for marketing which is a hard class. It's unfair to the students and teachers. Forced to have an instructor 3 times in one semester is a bit ridiculous. I love my instructors and because I've had them so many times we have grown a close bond. I just hate that the classes required aren't offered every semester.

More on the public speaking

none

Writing skills

The program is more advanced than I that it would but I have no complaints.

I do not have patience to do what I need to do because I have other things I have to get done with my life and I can not just put things to the side for college

I feel like online classes should require that you meet with your instructor once a week

Pre rec math classes need to be mini semesters so if you do have to take a pre-rec math it will not take as long to get through them.

Better advisors would help. I was unsure of what to take. I had to see Rodney Young to get anything accomplished personally me passing all of my classes.

We need to be able to take some classes in the summer for those of us who have families and or work the summer time would be a perfect time to take some of those harder classes or just classes period by themselves to fully focus and or dedicate ourselves

I can't think of anything I'd change

More study-guides!

electronics

More online classes.

All in all, this is a very effective program of study.

Parking downtown and the hours for the library

Too many classes that are not important. Don't understand why someone would have to take art classes for a science degree

I don not think anything about my program of study should change. In my opinion I learned many valuable lessons in the classroom about more than just the subject. This program of study has prepared me for my career choice and for furthering my education in the future.

I am satisfied

Needs to focus more on marine.

Nothing really, I got just a basic transfer degree so didn't have any specific area of study.

Because my program is so broad, it allowed me to take classes that were relevant to my interests. I enjoyed all of my classes and do not believe any improvements to the program are needed at this time.

N/A

Phlebotomy needs it's own space, had difficulty with maintaining our own area due to the nursing program

lab space, newer equipment

Needs to focus more on marine.

Nothing needs improvement in my program of study.

n/a

Possibly more critical thinking.

yes

None that I can see

None

More teachers and offering major classes in the fall and the spring semester.

The capstone class would benefit from a different structure. I would limit the Project Approach to one application instead of two. I would allow the students more freedom in their selections of curriculum presented to the pre-school children.

I honestly I am very happy with CFCC and the way my program of study was handled. I have always had options and been given incredible amounts of knowledge that pertains to my degree.

Some teachers seem unfit for their position.

N/A

I was very challenged at times in certain classes, but there were a lot of other classes that I thought were too easy.

Take out some of the electives that our not relevant to the pathway.
Classes required for degree should be offered more often. Having classes that are only offered once a year or only in the summer is not convenient. Also many classes get cancelled which is inconvenient and may push back a student's graduation date.

Set Co-Op

I do not feel as if anything in my program of study needed any improvements.

The program needs a couple more teachers. I feel that the courses should be a bit more software based because technology is improving quick and software is always being updated. There are a few more classes that I could say could be of some use to the program.

I wouldn't change any component of this program. There is a broad array of courses required which allows a person to be well round and developed.

UNCW requires a few more culturally diverse courses in their basic University Studies program than what is available at CFCC. It might be nice to see some of those classes offered at CFCC so that students transferring over can jump straight into their major program of choice without having to take those couple of extra classes first.

My procrastination needs improvement, it is what I struggle with the most.

The clinical instructors do not always grade cohesively. Some instructors take points off for things other instructors do not. I think it should be a more uniform grading system in clinic.

In my course of study I felt it would have been beneficial to offer business classes at the downtown campus.

Some lab equipment was out dated (although usable) It would be nice to do some field work outside of the lab.

Job placement, specifically what jobs can be applied for with a Pre-English Associate Degree.

My learning skills, my ability to comprehend material, and my studying skills.

the argumentative based research aspect

argumentative based research studies

The music department desperately needs new equipment and facilities.

equipment

The instructors lack the motivation to see that every student succeed, the way they teach can sometimes feel inadequate.

Add more teachers to rooster.

NA

The Courses don’t particularly go along with the actual work in the field

writing

None

A little more hands on.

I need to work on taking more chemistry classes for my Major in Pharmacy

the hours are too long

There’s nothing that I would change in the program

the class arrangements for night classes

NONE

I could hope for better math lab tutors.

Teachers do not need to just stand up in front of a class room and do lecture all day. I feel as though that the students become bored and then begin to slack off due to the lack of pop quizzes, homework, and participation.

More times available for classes

Needs more equipment.

What needs improvement has to be the organization, personally I had to track down my advisor to help me. He never answered any of my emails and only helped me by giving me a piece of paper to fill out my classes. I do not consider that helping.

The school needs to be more up-to-date on research material for paralegal use in the library.

Some of the text books contained errors that were not being corrected.

I feel the program is fine the way it is.

The only thing that is peculiar is that one is required to have two math courses; however, if MAT140 is the math you place into or you take 070 instead of 080, there is no other math course available other than a computer systems class, which in my opinion is a waste of time.

I was very satisfied with the classes I took, I do not see any need of improvement.

Bigger shop to work on the trucks and equipment

Nothing, I thought everything was very up to date and great!

I wish my program had more Criminal Justice based classes.

Nothing
Overall, I found the program and all of the instructors and advisers to be extremely helpful. Whenever I had a question, it would be solved.

To work on more projects, instead of just doing the same thing over and over.

more good teachers

Can't think of anything.

I think it was fine.

I did not have many business courses but then I guess I will have that experience when I transfer.

NOTHING

Just that more teachers fought the program so more classes were available to take.

It would be helpful if the transfer program included a requirement that each student takes one or two classes at UNCW before completing the A.A. This could help each student acclimate before being completely immersed in a four-year university setting.

able to you mac books for some of the programs used in most of the classes

Nothing

There are no major things in my program of study that need improvement.

A lot of hoops to jump through to register for the correct classes. Hard to meet with the right people to register for the right classes.

None that I can think of.

Less focus on clinical paperwork as it does not continue to teach anything past the 2nd or 3rd semester. More focus on teaching classroom material based on state board objectives and less focus on what one specific teacher thinks is important.

The grade-point scale should be 10 points, not the high school level 8 point scale.

N/A

Not more so of the program but I believe CFCC should open up more online classes! Being far away, I was limited to what I could take online and I don't think that was fair. We need more sciences classes online.

New facilities and LABS. More diversity within the faculty. More use within the college.

lower cost of textbooks.

N/A

Better test questions.

n/a

I think everything is pretty well in place.

Less overlap in classes talking about the same thing over and over again, and needs more program specific courses

Quality of the classroom environment

More hands on.

Nothing

I do not think there is much to improve, professors are amazing and the resources offered to the students are great!

More online classes and have the online test last more than 1 hour!!

amount of time allotted to learn the concepts

At the moment I cannot find the need for improvements in my program of study.

I cannot think of anything.

Nothing needs improvement.

Nothing needs improvement.

more variety in certain elective categories... allow more advanced classes to count towards degree (Calculus 2, Java Programming 2 & 3, et al.)

Communication among program leaders and students

Wifi signal needs to actually work in every room and lab. should have a textbook rental system for students of low income, a more sufficient summer cafeteria schedule (we are there long hours), Ping pong table, foosball, or pool table @ North Campus (we are there long hours)

N/A

I think the math level for this program is too basic, MAT 171 and MAT 172 should be mandatory for this program.

I think a few of the teachers I had were slightly unprofessional but other than that had few complaints.

I believe that the program is rigorous and effective in teaching and preparing students for the design industry. Therefore, I believe that this program needs no improvement.
Mostly just the requirements of projects need to be up to date on how actual designs would be handled. Learn things in a different order.

They need to focus more on specifics, instead of doing these huge projects that you have to rush to get done.

I think I am well rounded in my program of study but if I could improve one thing it would be the creative aspect of picking out fabrics and designs for my projects.

CFCC is already building Union Station, and I believe the new art department will help improve student performance in the future.

More up to date technology.

n/a

the hybrid courses are self study i am paying to teach myself

Student Services.

The only thing that I would change would be the ability to take my classes at the downtown campus.

I think the teachers of online classes need to be more involved with the class. I have taken a few online classes and felt like I didn't have a teacher. They don't keep up with their email or blackboard, but they expect you to stay ahead even when there are no assignments posted. I know teachers are very busy, but if they are too busy to keep up with the classes they have then they need a lower class count.

The format for the online classes. Some instructions are pretty simple, while some instructors instructions are extremely difficult to follow.

The instructors need to be more knowledgable about North Carolina law instead of the laws that were applicable in the state where they practiced law. The classes need to be taught according to the textbooks and not from the instructor's experience.

More councilors should reach out to student to keep them on track and make sure they are taking the proper courses. I understand advisers, etc., are available. However they are often silent unless spoken to and typically offer little advice or direction either way.

We need extra OB scanning practice.

nothing

The specific physics programs are not in place for entry at the college level. The basic understanding nessesary is in place but not an equivalent calculus level physics class that would be the boost needed for my college advancement.

Some of the professors prefer to use and teach outdated technology sometimes. While it gets the job done, there are newer, easier, more effective tools to use.

I think that more then one education class would be more helpful in helping students decide this is definitely what they want to do. A class that offered students going into schools in actual classrooms as part of a class because sometimes, just being in a class with actual students can help someone decide on continuing in education.

Some clarification needs to be made about the language requirement from a transfer degree to a four year University. Everyone I talk to has given me a different answer.

I would say that a few three hundred level classes should be offered for those who plan to transfer, because to transfer into the engineering program at NC State requires Calc. Based physics and Calc. 3 neither of which are offered at CFCC.

I would suggest that with some of the course you should be required to have taken other classes first before you can enroll in them. The only class that has a prerequisite is the CLA review class.

It would be wonderful if 4 year degrees were offered at CFCC. Being Employed Full-Time while attending classes, makes it difficult to persue the wide array of classes offered at CFCC. I would like to see a broader scope of classes offered at night, with a dedicated counselor to help students plan accordingly.

The lack of anything Apple/Macintosh related.

more experience in a real corporate setting

Nothing at all. Every course was so helpful, and now that I am nearing the end I am thankful for taking them because it has made me a better/smarter individual.

I dont feel anything needs to be changes in the program of study.

MORE courses that focus more towards a students career

Course guidelines change every semester, and sometimes in the middle of the semester.

The program is great the way it is.

More availibilty of classes.

Offering more internships for the program

Need more classes focused on computer integration, particularly the computer art courses. There needs to be more classes for this subject and it's sub-elements such as graphic design, illustrating, photo-manipulation, etc.

Hands on experience.

Hands on experience and internship.

Absolutely Nothing.

better parking for trade school students. Alot of us have are required to bring our own tools. They are heavy and hard to carry long distances.
Nothing.

No!

I do not believe the studies need no improvements.

need more classes in the evenings

No complaints at this time.

More availability in tutoring.

Nothing. Each class challenged me and I feel empowered by that.

hand written tests from teacher, not test bank tests

N/A

nothing

The coverage of information needs to be changed somewhat. I feel that not everything I learned here will be used in the workplace, and other things that I needed to know were not taught.

It needs a better steady supply of products.

I would have enjoyed a little more theory, but that is not the way this program is designed. We could use some more lab space.

What I hope to improve on is my skills in mathematics and my skill in natural sciences.

The only major issue that I have had is finding out after the start of a semester that I would have an in person final for my online class. I understand the need but living over an hour away and finding out that you have 2 or 3 classes with an in person final can be hard to coordinate working a full time job as well.

Nothing

I feel my program of study was ideal.

Nothing

I have no suggestions.

newer technology

nothing really

up to date tools and machinery

I am completely content with my program of study.

the need of more night classes available

A clear defined set of rules for the program. I understand that from time to time things change, but ever changing rules in the program makes it difficult to keep your head down.

Nothing

Better communication between the various student service departments ie: financial aid, registrar's office, department heads, etc.

The Early Childhood Education could use more development in their resources and supplies. I think they have a wonderful selection, but they deserve the same recognition as some of the other programs at CFCC. They offer study opportunities you can't find at similar schools.

I feel that nothing needs to be changed about my program.

A more steady supply of products, like color.

It needs more service supplies of products.

I wish that the two summer section classes were offered during the regular school year.

Teachers need to better prepare students for the real world of OT including documentation and treatments

More up to date information. More hands on. More teaching from teachers not reading from powerpoints

I really don't think much improvement is needed. With the program of study I did I had many choices of what classes I could take. I loved that about AA. I wasn't limited that much. Since I love math and history, I took as many as I could and they were all apart of my program. It feels really good to be able to take the classes you like and want to take and them being accepted.

I feel like everything about CFCC's OTA program is great. I have personally handed out many brochures to people who showed interest in the program. I wouldn't have done anything different except perhaps have a fund to reimburse the students for fuel expenses during their fieldwork rotations if they are more than 10 miles from the students place of dwelling. Personally, all of my level 1 fieldwork locations were relatively close within 10 miles of my home. My first level 2 fieldwork site happens to be about 35 miles from my home which means, since we are required an average of 40 hours a week in level 2, that I have a 70 mile round trip per day for 8 weeks. During this time I am not bringing in any money since I can't work during Level 2 fieldwork, so at the very least I feel that CFCC should reimburse students in these situations without question instead of having to rely on a scholarship or grant that may or may not come through.

Advisors with information and answers on my questions and how I can continue my education in my program
Within the program, there is a lack of communication between the fieldwork coordinator and the students. There also is a lot of wasted time in the last few semesters of the program.

nothing that I know of, but I am sure the school could add some type of hands on assignments to make the classes more hands-on.

Nothing.

It would be so wonderful if phlebotomy also included injectables like the programs in other states, such as California.

The only thing I think should improve with my program is the variety of classes. There are not many options when it comes to picking classes for Communications.

I feel that the AA transfer program could be a little more in line with the bachelors program. I feel this can help better prepare students to transition into a bachelors program.

Since non-traditional students have life experiences that far surpass traditional students, if they could replace the social science and humanities electives with additional courses in their field of study it would strengthen their employability. In order to get a Customer Service Certificate there were specific classes I had to take in my Business choices. If one of the electives could have been omitted I would have been able to take Quickbooks which would help me so much more!

Teaching styles for most of the Anatomy teachers.

Coursework that will prepare students for real life Occupational Therapy Practice.

Can't think of anything I his time

I don't think anything in my program of study needs improvement. I think with what is available I'm more than ready to go out into a career in my program of study.

More hands on. I entered this program expecting to actually physically set up servers, physically make new computers. I understand that budget is an issue but not having the actual hands-on has left me feeling inadequately prepared for actual employment. I was really looking forward to experiencing something closer to real world experiences other than just theory.

Perhaps the amount of history courses offered could be improved.

More web based courses should be offered in the Computer and Electrical Engineering Technology department.

I cannot think of anything. I believe that if a student puts in time and effort they will get the very best from CFCC.

I cannot think of anything. I believe if students put in the time and effort they will get the very best from CFCC.

COUNSELING!!!! I truly feel that the counselors that are here on campus have little to no knowledge about transferring. I have gone repeatedly to them to ask for advice with signing up for classes, my next step after cfcc, or just to make sure I am on the right track. I have never been able to see the same counselor twice; therefore have been unable to build any sort of relationship with them. I feel that the counselors should have at least one or 2 mandatory meetings with students before they can graduate so that if students have any questions they can be answered. Also consider having counselors assigned to last names of students. That way a student has a person they know that they can come talk to and don't have to wait to be placed with someone they do not know... COUNSELING NEEDS TO BE BETTER ORGANIZED AND REVAMPED!!!!!!

I would like to see lasers incorporated in to the curriculum

I was satisfied with everything my program offered.

deliver of info on more customized power point presentations

I believe that more courses should be offered. With many interested in nursing or the medical field in general, once classes are full, many students do not get the opportunity to get into their needed courses and typically will have to wait for the next semester.

Nothing.

I believe some classes need to be offered at night so if people work during the day they can still come to school.

The schedule is difficult and unnecessary for non traditional students.

Certain sites are not student friendly.

Rearrangement of classes so students can master the program of study within a 2 year time frame. Placing some subjects inline with those that are not as time consuming as others and offering my summer classes that adhere to the program of study.

The program should have either ABET certification or ATMAE certification, at the least. There should be emphasis placed on the students to apply for these, and resources made available to obtain these certifications on an individual level. It should be made extremely clear to all students wishing to continue on in a ABET certified major that Mechanical Engineering Technology, here at CFCC will not transfer into an actual professional engineering school it will only transfer into Engineering Technology majors. This distinction is of great difference in the Engineering world.

my study habits

More programs help with certain classes.

Nothing.

out dated equipment

Personally, I could use improvement in Mathematics. Although the overall program is very effective with its current ethic.

Nothing is love everything about the program

Need some fresh blood and we got it! I wish we gone a little deeper into anatomy, body mechanics and actually practicing OT rather than spending so much time the last semester on professional development and program design. Program design takes up way too much time in my opinion.
Clearly defined transferability of individual classes so that upon transferring, students won't be required to retake courses due to program inconsistencies.

The attitude of the lead instructor brings down the mood and makes learning less fun and more like work. The more one enjoys what they are doing and is encouraged to continue in that mind set the better they learn and retain information.

Nothing needs improvement.

the support system for students (counseling)

More availability with the classes and the schedules

None

More computer work more online classes

The online program evaluation could be more direct, as it is difficult to comprehend at times.

More up to date equipment

My program of study here at caper fear community college could use more criminal justice classes.

Acc 150 needs to be on the internet

I believe that by incorporating an apprentice program as part of the course would greatly enhance its effectiveness.

If anything needs improvement, it would be a little more of a guideline of classes that should be taken that would pertain more relevance to the degree.

n/a

The esthetics program could use a new or another washer/ dryer. It is difficult to get the sheets and towels clean and dry for the next day.

nothing

More practical application component in the form of internships.

he program has gone through some major changes since I have been apart of it. They were not easy changes to deal with on top of having families and the stress of keeping good grades. I feel since these changes have happened things will start to smooth out and become normal again for newer students that go through this program. For our class it was just a huge change.

e doesn't match current requirements, esp. the university studies requirement.

I would like to see more opportunity for interaction with local professionals working in relevant fields of science. Perhaps guest speakers from companies such as PPD, ADM, and GE/Hitachi could be arranged.

Rules were constantly changing and never to benefit the students.

test itg

More teachers. I had to attend an extra semester because the last class I needed was already full.

Online education, lower book cost.

lack of focus on programming languages and zero use of Linux/Unix based systems.

One class, AutoCAD/Multimedia needs to be focused on AutoCAD more so than Multimedia.

The books and equipment need updated

no, I do not need any improvement

I just wish there was a bit more struture and just a laid out format of what classes to complete.

I will improve on it, but there isn't any

The instruction of some of the more difficult courses needs to be improved.

Honestly, probably nothing other than maybe more times that humanities-type classes are available.

I haven't any issues with any courses I have taken nor any instructors.

a better focus on business courses. instead of taking 3 english and 2 music classes, i would have benefited myself more by taking a marketing or finance class instead.

N/A

More instructors.

A more structured lesson plan

None.

more customer service experience learning

Some of the textbooks have multiple errors and the software associated with them is very glitchy. Although they are new, it seems like there has to be a better textbook/workbook out there that doesn't have as many errors. This problem has occurred in two of my classes and is very frustrating for everyone involved.

the equipment

I am satisfied!

nothing!
My math skills have improved, but still need more work on it. It was never my best subject.

More art class requirements.

Nothing

Better science labs

In the Criminal Justice Course there is a large need to add more classes for specific areas and credits that are required for students to graduate. Two of such courses are "Forensic Photography" and the "Narcotics Class" - (Which was only offered as a mini session during a summer semester which lead to there only being 5 class periods.)

I feel that my program of study here at Cape Fear Community College could improve by offering more criminal justice classes.

Teachers need more freedom and resources.

Nothing comes to mind.

Upgrading the old books used in class to the most current. Bring in macs so that students can choose between macs or pcs. Also maybe change the program where you can choose to concentrate in a specific area within the IT field. For example; programming, networking, security ect.

I never was offered or received any help from a counselor, which was always offered at ecu.

Nothing.

As a Business Administration major, I need to improve my knowledge in Economics. Macroeconomics and Microeconomics have certainly been the most difficult for me to learn and understand. However, I am currently taking Macroeconomics and I intend on learning as much as possible.

The statistics class needs to be more than three credit hours, or come with a caveat. I spent much more time in that class than a typical three credit hour class.

How the counselors choose to advise and the structure of the order in which classes should be taken.

Wider range of classes available to complete the program of study.

Will comment at later date.

The office simulation program needs to be improved. However, Ms. Watson is in the process of doing that.

Better makeup in Esthetics kit.

I did not see much room for improvement in my program of study.

not sure

Tooling could be updated

The attendance policy was to strict, and the classes do not prepare students for outside of school.

More class times.

My teachers often had problems with the computers and the tech people never seemed to be able to fix any of the issues.

I would like to improve my computer technological skills.

learning lab techniques need to be improved.

Plant ID needs to have an introduction class because its a tough course and the Plant ID class itself needs class room time and lab time separately

nothing

Nothing, I could not ask for a better program to be in.

In my opinion and through my experience with this program, I do not feel that anything needs improving.

I think that there is nothing that needs improvement...

The Students

Program needs more funding to keep up with current improvements in the industry.

Some of the teachers.

Cheaper textbooks.

Nothing

Nothing. It is a tough program but very effective in producing skilled nurses.

Maybe newer technologies. Because i've had my teacher who threatened in a jokingly manner to break one of the computers because it was acting so retarded.

Perhaps more lab opportunities for BIO 168/169 students.

It is a little TOO challenging

I do not feel that Cape Fear needs any improvements in the pre-psychology course.

We shouldn't be required to take the computer class, that should if anything be an option for those who are not already proficient with computers and computer programs. It feels as though I was in an elementary school computer class all over again.
The Learning Lab is less than desirable. There were times I sought out help at the Learning Lab and there was not anyone there who was able to assist me in my second level classes such as Chemistry 2 or Physics. They were not prepared to answer my questions.

I think it would be beneficial to require more business courses in the pre-major, to make the student's connection to this field even stronger.

choices of internship, list of places to apply. A list of previous internships in the field of study. Places, addresses, person to contact. Feedback from Previous students who had internships at that location willing to be contacted by new students interested in doing an internship at the same place; would be very helpful.

More materials so that there does not have to be groups of five people working on one small thing

the budget

the technology used

A more accessible counselor

More classes offered more often

A revaluation of some required class that apply to the ultimate goal of the degree.

communication of the teachers

Less holding hands of students, felt people were pushed through without an understanding of course material

I would like better outline of what specific classes and when to take them as opposed to assuming I am following my Major's course outline.

Instrumentation

writing

Nothing really needs improvement.

I would recommend more online class availability.

organization and communication

They need more equipment.

I like the way the program is set up

more supplements to help with learning material, more tutors etc

Some areas of the program could use adjustment to meet the needs of the ever changing job market.

nothing really.

Some of the books in the courses were a little more advanced than I felt they should be. In one class, the book stated at the beginning that the exercises in the book were assuming you already had 3 years of experience working with servers. It really didn't seem to match what we were learning in the class.

The program of study was good at CFCC.

CFCC has "world class" professors located in the E building. Given the right facilities they could do so much more for their students.

I do not think my program needs any improvement, the instructors are great.

One of two of the instructors need improvement in teaching

Every thing can and should be revamped. The selection process for certain fields should be reorganized immediately.

I need to improve my math skills.

I have been in this program for longer than 2 years, since its inception in 2010. I have noticed that the newest curriculum has improved since the beginning. The addition of business classes, residential energy classes, and other electives will be beneficial to future students in the Sustainability Technology program. I know that in the above box I praised the program for being thorough and for that I am grateful to have learned as much as I have, however, most of the material is incredibly difficult. This program at times felt like we were working on a Masters degree rather than an Associates degree.

Although I think our program is fantastic, there are a few things that could use some looking into. Let's say you have already taken all of your "pre-requisite" classes prior to applying to the program and then are accepted; according to the school and for financial aid purposes, you are no longer considered a "full time student". I would like for whoever decided this to go sit in on nursing school for a semester and then come back and tell me it is not full time. I am just saying. I have never worked so hard in my entire life to get through a class. Sure, we have class three days a week for 3 hours, sometimes more depending on the semester or mini session, but then we have clinicals for 12 hours a week and on top of that we have to be at the hospital the night before our clinicals to get paperwork and this usually takes a couple of hours. I just think this really needs to be considered. Many people who do not make it in the program, don't because they are trying to work, have families, and go to school. I have to admit that I was lucky to have the option of not having a job during this program, but it was hard. Other people I know were fired or quit their jobs because the hours of the program just don't match up to any job available. At least offer more night class slots. There are only 11 people in the night class this year graduating with us. There could be more. Basically, the program should be considered full time. JUST the nursing classes. Because then you have financial aid issues too! Single moms, trying to raise families, who cant go to night classes because they have kids to be with at night and cant have a job because their school schedules are too hectic and have to live off financial aid and loans and scholarships for two years to get by but then cant get the full amount of money because they aren't "full time".

Better Instruction Better Teaching
To be able to graduate in two years, a student must take at the minimum 5 classes and some during the summer semesters. It has taken me 3 years to graduate due to the fact I personally cannot handle taking a course load that is anymore than 4 courses a semester and be able to work and do well in my courses. I would suggest looking to see what could be changed about the amount of courses CFCC requires to graduate with an associates. I personally am not sure what the requirements are at other colleges but from what I have heard, CFCC students are required to take many "silly" courses. But that is just what I have heard.

Nothing needs improving.

Learn solid works, group projects, can't talk to class mates for help so I am being taught to ask the "boss" simple questions, in the real world that would get you fired quick

The amount of classes that are offered each semester. Some classes are only offered during one semester each year, which is not good for a lot of people who have to balance life and school

Up to date computers.

Nothing

Nothing

everything seems fine

some courses can be combined to allow access to different classes

Remove old and senile instructors

need more instructors per student ratio

The e-campus instructors need to work on the student/teacher relationship and be more willing to work with distance students. At the beginning of the fall '12 semester, I moved from North Carolina to Washington state and found myself having an extremely difficult time with the classes and little desire from the instructors to accommodate my situation. I realize that students shouldn't expect special attention but, in extreme circumstances, there should be a little leeway.

This program can be improved by bring in professional people to speak to the students.

Everything

I need to improve my studying habits and the fact that I procrastinate.

Only one teacher should tech the classes and not a different one every chapter. Hard to adjust to a learning style and method. One teacher will say something is correct, while the other says it's not the best method.

I cant say I was unhappy about anything regarding the CET program. The program has many career path choices for a student and the courses have always been accurate and kept up-to-date.

I would like to see more of a local involvement within the community, a job shadow program, or short term apprenticeship that would allow for early incite for career choice.

For getting a customer service certification consider dropping the requirement for PC literacy because for many this is already something known and expected. Perhaps offer an option to opt in or out of taking the course depending on if a student feels he or she finds it necessary to improve skills or even offer students a way to "test out" of getting that course.

I feel there should be more focused transfer studies. I also feel that each student should specify what they intend to do next in a 4 year college in order to take the appropriate classes. I personally changed my major several times over the years at CFCC, and just realized I only needed one class to graduate.

Everything seems to be well thought out and directed toward a smooth transfer to a four year institution for transfer students.

I would not change a thing.

A humanities and fine arts building would have improved my experience.

the only thing i would have to say would be bigger classrooms, a lot of them are kind of small.

More advanced courses offered

My advising experience left a little to be desired, however the counselors more than made up for that.

I was happy with the program however I wish I could have taken more of the classes offered.

Courses in Marine Biology or Marine Tech would have been an interest to me, but they were not available for this program. There is a good variety of mandatory course subjects the student must take to earn the degree, but too many slots per subject. Limit to two courses so that the student can focus more on arts if need be. If they want more sciences and maths, then take the Associate of Science program.

The only thing I thought could be different or improved is if there was more consistency with how each class is run. I ran into problems where many instructors would do things the same way, with math classes for example, and others would be completely different. That made working and studying and doing online homework very difficult at times.

I personally need to work on my procrastination. Teaching as a profession needs improvement in the sense that it is too political and bureaucratic. Children of this nation are falling behind other countries because the people who run the education system are too comfortable with the old system of teaching and managing. The world has changed, and with it so should the education system.

more welding time.

I think our program could use more funding to work with more technology that is used in our industry like POS systems or Quickbooks.

More spa space and a more efficient washer and dryer for linens used in the spa, would allow for more hands-on learning.

It is a pretty straight forward program. Not many changes necessary.
I don't think anything about my program needs improvement.

Sustainability is a new subject of study. With that being said, this is a great program, but I felt as if my instructors were sometimes learning with us and not sure of what they were teaching.

I'm very satisfied

nothing

Help in the learning lab on different computer programs used in classes.

computers need to be faster...sometimes it would take ten minutes for them to boot up and get started...if there are six people in the class, that's an hour of wasted time

I wouldn't change one thing.

The Medical Office simulation book.

Simulation lab, Need more education on Narrative charting, and LTC. The ADN program focuses only on computer charting and hospital care and the truth is not all jobs available for RN's are in hospitals and even smaller hospitals still use paper charting. I think at least one lecture on these aspects are needed.

The lab facility. It needs updating. Mannequins are in bad shape. Room is messy and dirty.

Some of the professors seemed like they were not interested in what they were teaching.

More lab time

Can't really think of anything

I don't believe there are any that I can think of since I have been at Cape Fear.

I do not have any recommendations, just keep hiring great professors.

nothing

The lack of leadership with some of the professors. I don't feel like I was taught the information that I will need to go out and get a job and feel comfortable working at it with the little knowledge I received. It has been basically teaching myself how to do things and learning from classmates. If it wasn't for the teamwork with my fellow classmates I don't feel that I would have completed this program and learned what I have so far.

Areas in my program of study that could use improvement were my English and History classes. The instructors could have explained the information they were teaching in better ways so all of their students would understand.

The program could use more money to expand its marine side.

tools, engines, everything should be looked at really but with the new shop in 2015 it should be much better...

I enjoyed learning about Esthetics, but the teacher needs to be more alert and helpful.

I feel like the program is perfect

nothing

I think that everything in my program of study is great and nothing really needs improvement.

Nothing needs improvement.

More funding for better tooling and equipment.

I do think that we need more teachers in this field. I also believe that they should be told before hand what it is that they will be teaching or doing before putting them in a class.

nothing

we need to have some focus on long term care. some of the graduates may end up working long term care and we never had one clinical there which may make it hard when they realize they wont be taking the patient load that is available at the hospital.

Some of the classes are lacking equipment to be able to gain hands on experience with.

The way the shedule of classes are, should take some classes before others.

n/a

Nothing.

Nothing needs improvement.

I think the program is helpful but the amount of services is a little redundant.

I feel that the coding is a big component to this program but for some reason it is only available during the summer. It was so stressful tring to learning coding in such a short period of time. PLEASE for future students make coding a fall or spring class so we can learn more about the subject we are trying to get a job in.

It was very difficult to learn everything taught in Medical Billing and Coding during the summer session. It would be better to take both of the classes during a normal semester.

MORE FUNDING!

Make it a four year degree there is still so much I want to learn and so much my instructors are capable of teaching me.

teaching

Even though I am learning quite a bit in Quickbooks, this class should be an on-line course.
The program is great, improvement should be within the student, apply what is taught in the classroom and at clinical sites.

The hybrid courses where you only meet once a week. I think some of these courses need at least two face-to-face meetings.

There is only one class I believe could use reorganization, CAD/Multimedia. I believe we would benefit more if the focus was concentrated on CAD, rather than the multimedia portion.

MORE SPACE TO CREATE ART!

More hands on programs dealing with software used in law offices could help better prepare a student for the type of technology they will be using.

I do not feel improvement is needed at all with online classes.

n/a

The need of a CIS class.

I felt that my program of study was very efficient and seemed very solid. No improvement needed.

Wonderful program; would not change anything

nothing

Well I would say more advanced equipment, but I hear it is on the way.

I was happy with my experience at CFCC.

Some of the teachers should be better organized

The math requirements

Nothing needs improving.

I think the program of study needs improvement on spending more time demonstrating the things we are using.

More exposure to OT practitioners on Level 1 placements in order to better prepare students on the OT procedures, techniques, and treatments currently being used in the various settings.

Why do I need to take a foreign language? I'm 30 years old and have spent 6.5 years outside of the US and have never needed to speak a foreign language and I have no desire to seek employment as an Accountant outside of the US.

N/A

I felt that all of classes were adequate to furthering my knowledge in the future work force.

I would have preferred that the billing/coding classes been in the spring or fall instead of summer.

instruction

Nothing

Obviously within today's job market, an Associates in Arts will not get me far. I see this degree of accomplished success not as an end but a start towards a brighter future for my self. If I do not get accepted in the Radiology program, I will continue my schooling at UNCW in hopes for a equally specific program of study.

A percussion instructor would be great. Would like to see the program eventually get into sound engineering with updated recording software.

I feel that some areas of my program of study need a little bit more teaching instead of letting the students figure it out on their own.

the notary class needs to be added

The biggest area that needed improvement is the R/V Dan Moore. It desperately needed to be replaced with another ship, luckily that has happened with the purchase of the R/V Cape Hatteras.

The teachers need to be consistant in their way of teaching them.

home access to hypak software.

Nothing

More in depth treatments: aggressive peels, advanced body treatments

Grades are determined solely based upon test scores. Other aspects such as our clinical time is just as important in the education, but its only considered "satisfactory" or not. The tests are extremely hard and a lot of good students fail out of the program. I think adding in some considerations for clinical, math test, etc would be nice to help boost grades.

Nothing felt inadequate.

nothing

New ship is great addition. Teachers that treat us more like college students and not like elementary kids. Dont need group projects and games in class.

Being organized wasn't my strongest point, but I implemented a time management system that really helped my organization skills. All of my College courses helped, but Procrastination is my nature so I definitely still need improvement.

I don't have any improvements for my program.

Make it a requirement for those who have not attended school/college in a long time to take "refresher courses" in either math or English... Had a hard time with MLA formats (was not taught this 20 years ago)
I don't have any improvements for my program.

I think the course is good the way it is.

Very repetitive

Online courses needs improvement.

Needs better instructors

I don't think anything needs improvement...I look forward to the opportunity to use my newly acquired skills in a workplace setting to get a hands on experience.

Nothing needs improvement.

The teaching skills of some of the instructors. I do not feel that I learned the fundamentals particularly in regard to the various software programs that I will be utilizing in my career field.

The textbook needs to be changed.

Class selection

The need for more dr.s offices to participate.

more funding, better labs

I would like to see more music related classes available.

Some of the science instructors are ill-prepared and ill-equipped, not to mention inexperienced.

I was satisfied with the program

Knowing a little bit more about what jobs you're working towards or being in more of a work environment or situation.

N/A

The instructors

When class are available. i.e. night classes to accommodate working full-time.

I only wished some of the curriculum was more challenging and students had more options as far as extra help goes.

The cosmetology program could use many improvements. Like I said above there are a few instructors that are great at instructing, however there are many that lack the professionalism and decorum to teach at the community college level. I have been appalled and disgusted many times by the action and words of one instructor in particular, and the department is aware of these actions but chooses to ignore the issue and fails to reprimand this instructor. Among other issues within the cosmetology department, many of us wonder just what our tuition money is going towards. Many times we have been completely out of supplies to use for everyday coursework, such as appropriate hair styling products, hair color, and nail/facial supplies. Many of the policies/requirements for the program have change several times throughout my time in the program. Students try to make "plans" and estimate when they might be done with the course but cannot do so because the way to fulfill those requirements has changed yet again. I have a four year degree and I understand that requirements may change, but it has ALWAYS been in my experience that you are "grandfathered" in under the terms in which you started the program, and I don't know why that would not be true at CFCC as well? The cosmetology program is desperately in need of consistency. This program has caused more frustration for me than I can put into words. I really hope that these surveys are taken seriously and I really hope some changes come about. If I had the choice to make over again, I would have gone somewhere else.

Instructors teaching skills

not sure.

Nothing

It needs to have more technology introduced into the classes, and it also needs to 'amp' up level of each classes. CFCC does not adequately prepare students for the work load they will experience at four year universities.

I do not feel anything needs improvement.

I feel the program should have a little more practice outside of the lab or classroom and have hands on experience in an actual residence.

I wouldn't change anything about my program of study other than a better selection of Economics Instructors.

More resources as in plate metal for tests, qualifications and certifications.

Please make this program compatible so graduates of the certificate program can take the North Carolina State Bar Paralegal Certification!!!

equipment and materials

Nothing my time at Cape Fear has been an excellent experience.

I do not see any room for improvement.

I honestly believe that the classes I was enrolled in to complete my program of study don't need improvement. The only improvement I could suggest is better communication between instructor and students, from in class to online students.

more hands on/work career related

Some of the instructors

nothing

Some of the instructors need to be for patient with their students, we are going to school to learn the material. We dont know it all upon entering the program.
too many petty rules to abide by
N/A
Better online courses.
More criminal justice courses.
The online hybrid parts of classes were a little much for me to handle.
The online hybrid parts of the classes were a bit too much for me to handle.
Needs more focus on different types of construction.

needs to offer courses more often
Separate business students from CIT students for Cape Fear's Security 110 class. Having more time with servers and server Operating Systems continues to be my biggest disappointment with this major. Servers are a huge part of IT but our CIT program is very lacking in this area, having only one server class does not satisfy the knowledge standards that IT students need.

More classes about servers and server operating systems
I do not have anything in mind about what my program of study needs improvements.
more hands on building dealing with more precise cuts
Chemistry labs need new technology. I'll be taking labs I already took here again at the university because the labs aren't furnished with the needed technology. The chem tech labs are furnished well and have all of the equipment needed but the general chemistry and general organic chemistry (not part of them chem tech program) needed technology bad. Talkin' mass spec, GC, IR devices. I know they're expensive, but it's hard to have successful chem labs without them and then transferring to a university that expects you to have knowledge of how to use these devices already.

The courses for the music department need to be added to WebAdvisor in a timely manner so that registration is easier.
On line Instructors need to post deadlines in multiple places, especially next to assignments, rather than just on the course schedule. Some of us on line are older, non traditional students, and we don't always have the time refer back to several documents about dates.
the availability of an adequate amount of products to finish out each semester with. towards the end of both semesters we had to make due with what we had left, which was not all the products we neccessarily needed.
n/a
I'm not sure this applied to the question but I would like the see all Community College's use the same grading scale as University's.

The non-music courses required for this degree are outrageous and irrelevant to music. I shouldn't have to worry about reading literature or studying rocks when trying to obtain a music degree and practice my instrument a minimum of 3-5 hours a day... that's what high school should be for- to get all that stupid bullshit I don't care about out of my life and a lot of these "core" classes might as well have been high school all over again. It's unrealistic and not possible to devote the proper amount of time for ultimate growth in your instrument and music in this program with all of the other non-music classes interfering. I know they are coming, but how about making/devoting practice rooms for the music students?

Nothing, actually.
More space to setup the classroom with instructional area separate from the mock-up pharmacy/lab area. I think it would be beneficial to have the pharmacy/lab area to be a more realistic to what is seen in the marketplace. I would have like more exposure to learning how to fill the robot with medications/supplies.

More reverse engineering projects, as well as a two year long project on things like a bike or something of that nature.

More step-by-step instructions for beginners who have no experience in HVAC. Do not assume all students have some experience.
i personally dont think it needs any improvements
Nothing.

I think the transfer program could need updating to better match the basic studies or core requirements of four-year universities. Some of the courses outlined in the "Program Evaluations" are no longer required at universities like UNCW.
The transfer program could update the courses they suggest as core requirements or basic studies to better match the requirements of four-year universities. Some of the classes required in the transfer "Program Evaluation" are no longer actually required by four-year universities like UNCW.

More technical information on teaching for particular children's learning styles.

None
quit being scared to fail some students you don't need to model the class to the students rather the students to the class
They need to figure out how to keep instructors.
Clarification on reaching the degree

More options in terms of class sections/times for classes outside of core program. Scheduling required classes can be a mess. Try to develop partnerships/relationships with local companies to expose students to job opportunities. This will help with the co-op work requirement. Require that the program's core classes be taken in sequence. This will ensure that students develop a base of knowledge and progress in the same sequence/order. Allowing students to jump in at any point, or semester, can slow things down for students who started at the beginning.

Nothing
Need more space/bigger building! Serious lack of space for project vehicles, class labs and basic storage. Building constantly leaks from rain leaving large amounts of water on the floors. This creates a safety hazard for students and doesn't allow lab classes in the shop. Additional and up to date equipment needed. By the way, restrooms are old and nasty.

More up-to-date work area.

I think the program did exactly what its suppose to do in my case and that was to teach me about the college life and get me prepared for whats next.

Did not take all my studies at CFCC so I am not really confident about answering this question. I am not really sure.

The scheduling of classes, I always seemed to have conflict with getting my schedule the right way.

none

the Film and Video production program could probably use a new and bigger facility

Nothing that I can think of at the moment.

I think the microeconomics and math classes need new teachers. Just about half the teachers I got in these departments where horrible.

the cliental that is brought to CF

Nothing needs to be improved

In my program of study I feel that writing skills need to be an important aspect of the program.

The technology available to teachers

Requiring MAT 070 to enroll in CIS 110.

I would like to see more availability

n/a

Math

More teachers in Communication Studies instead of cutting the program. Every job in the work force that has meaning requires these skills.

Just more space for room to work is major. A little more variety of equipment also.

Some of the material did feel like it was out-dated. Especially since the medical field is switching over to the EMR, learning how to fold a letter seemed very out-dated.

if some of the 101 courses were more challenging i would feel better prepared for a university

more challenging information should be provided in the classes.

Up to date supplies are needed in the lab. Possibly having a small group of students working together at the clinical sites.

Nothing.

There is not anything I can think of at this time.

The attendance policy is absolutely ridiculous. If a student pays to go to school then they should not be punished for not being able to make classes. There are many outside circumstances that can keep students out of class such as medical issues, work related problems or the need to take care of family obligations. I feel that if schools like Yale, Harvard and other prestigious universities do not require students to adhere to an attendance policy then neither should a local community college. If I were to fail a class because of attendance due to doctors appointments I would be extremely upset and would want nothing to do with Cape Fear Community College.

I can't think of anything that needs improvement in my program of study.

Really, the only thing that I wish had been more effective is the parking situation. but I also realize that in the downtown area, there is only so many parking options available.

I love this program and recommend it everyone I meet. However, I do wish they offered classes for this program in the summer for those of us who could have already been done.

Nothing

It needs to be established!!!

class and shop are fine

I don't think it does. I do believe, however, there could be one more required political science class.

No complaints

CIS 110 is the same information I received in elementary school, except in public education it was free. We had to re-learn everything for an expensive price. Electronic text books and homework/tests are awful, they are expensive and students don't like them. Mandatory text books is also harsh to those that can't afford it, same with the online codes. When someone can't get that code it puts their entire class on halt, it doesn't seem worth it.

I would not change anything

It was great just wish I didn't take as long as I did to transfer

i thought it was fine.

auto body needs more room
Having more accounting courses being offered online. I had to somewhat change my course study because of this conflict.

Not enough equipment for students to use.

More machines

I really enjoyed my program and it challenged me and made me a better student

Improve my technical skill sets to meet future challenges.

nothing

The only thing I can think of to improve the program is already in the process. I would say more labs, but to do more labs some equipment needs to be purchased. As I have watched the program grow, classes that I had been enrolled semesters prior improved due to furnishing better equipment.

I have been accepted into the ADN program at CFCC and though I am excited that I will be attending the program I must say that I am disappointed that it has taken me two years to gain entrance. Hopefully with the expansion of the health science department the school will be able to accept more students in years to come.

My math was a big challenge.

More machines or less students per class.

The times the art classes are offered. An actual building dedicated to the art program. Currently the art program is thrown all over campus - in the basement, a 15 minute walk from the main campus. I think it would be better for it all to be together, separated by actual walls.

the mgmt. needs to implement a drug entrance policy for incoming students in industrial arts

There is nothing off the top of my head that I can think of.

Nothing, the program, faculty and campus are great.

none

nothing

Some of the classes are highly unnecessary and very difficult for the average student as many and many of my classmates have discussed over the years I've been here. For example, Business Finance 225, Microsoft Excel Spreadsheets were two very hard classes along with Project Management. All of my teachers were extraordinary but the material wasn't anything I'll be needing as a desk worker and should be more geared toward those going into Business Finance type of employment.

none

Nothing that I can think of.

I wished there was only one book to learn from instead of going back and forth between the Hillcrest and the Dos and Don'ts book that we purchased, because it was a little confusing, as these formats were not the same.

nothing

nothing

Nothing

Nothing. Duke was an excellent teacher.

I think the only thing is maybe have the film department work a bit more closely with the drama department. And give Duke and John a raise! Maybe get them a bit of help. They both have A LOT of classes to teach and the program just keeps getting bigger.

Nothing

Nothing

More specialization for particular degrees and more available classes

N/A

younger instructors would really help the upcoming students.

Nothing, Fun Program, Great Teachers

Better math programs

Very few select teachers should be evaluated to see if their course material is attainable. I mention this, because in a few classes I had the whole class averaged F's on the tests because the teacher was making them too difficult.

I do not believe that there is anything that needs to be improved.

I would like to spend more time in the Marine Instrumentation class, and hydrographic survey class. More time with the equipment could be utilized to learn more about troubleshooting problems, and mobilizing the equipment. If marine instrumentation was held in the fall versus a summer class more time could be spent on learning the ins and outs of the equipment.

Being connected with employers for restaurant and hospitality careers. More funding to help with the program in general.

In my opinion, I would have to say nothing for the criminal justice program as of now. This program was really in-depth with what we needed to know about criminal justice.

NOTHING
The level of communication between the staff and students who do not attend multiple classes could stand improvement. If a student is not enrolled in multiple classes with the same instructor, there tends to be a deficiency in communication. The email updates are not consistent.

Nothing much needs to be changed.

As a former educator, I was frustrated with the instruction I received for the last 2 semesters I was a student at CFCC. I was HIGHLY disappointed with the instruction I received from one instructor. He was not qualified to teach the level of technology being used in the workforce today which we were expected to learn. Most of my last year of study was spent teaching myself with absolutely no support from him, the lead instructor. He was rude, unapproachable, passive aggressive, and even at time very racist/inappropriate. Some courses were not arranged in the best manner and certain “focuses” of course instruction were behind today's times (for example spending an entire month on making a Power Point presentation when that specific program was already known by each and every individual in class.) He did not know how to relate to students at all and was totally unconcerned with our education.

Teachers.

N/a

It needs a larger variety of midlevel science classes.

Nothing at all. The teachers are excellent, the learning labs are helpful, and as a former athlete, the coaches are great! Everything is phenomenal and I always recommend to indecisive, future, college students that community college is the best way to go.

For the most part I enjoyed studying in my program, I just began to lose interest in the field.

Need more end of degree classes offered in the fall and spring

The rooms.

The clarity of what classes one needs and does not need. I should have already graduated but I was miss guided by different “counselors”

No.

More class options.

N/a

Some class did not have a prerequisites which made the order of the course hard to follow.

Nothing about the Marine Technology Program needs improvement

I felt that some of the teachers viewed CFCC as a lesser institute so in turn treated their students as such.

New shop for the diesel program, more tools, BOATS WITH DIESELS

There should be more Comprehensive Digital Art classes.

Statistics uses TI-83, 84 calculators when we should be using and excel type program.

I don't feel like anything needs improvement.

It needs to be narrowed down to the certain part of technology you want to study. Like networking, programming, or web development.

The film department.

Not so much improvement but I think students should be able to see what online courses require an in person final during the registration process instead of getting that information once the class has officially started.

bigger lab

I think that this program should be regarded the way the medical programs are regarded meaning that this should be a program that one should have to qualify for and be accepted instead of just signing up for it. Maybe having some sort of entrance exam or interview with the lead instructors.

The way law is practiced in today's society is very different. It would be a great asset to the program to have access to computer programs that are widely used in the field. Word Perfect, a more extensive SoftPro license, Microsoft Outlook, and some case management software would be ideal.

Integrate a co-op program/internship requirement allowing students to work in the field, require one or two classes to be taken at uncw to get an integrated university experience for transfer students.

The only problem with the program may be the lack of many program specific scholarships to help financially unstable students who may want to attend the Associate's program.

I think that Botany and Zoology and a few other elective courses should be counted as the sciences they are.

Having to do the entire course long distance. I have to travel 1:30 hours to and from home to attend CFCC.

I really enjoyed my classes and clinical time.

The ability for more applicants to be accepted into the program.

Availability to more students.

Instruction

The wide range of classes are not met with a equal amount of teachers to match each class for every semester.
Well everything needs continual improvement.

Our own classroom with more space for training activities

Nothing

nothing

N/A

I would say my math courses could use improvement.

I don't think anything needs improvement

more/better product

Nothing needs improvement.

I do not think the program of study needs to be improved.

Sometimes as a CTE student I was not as informed as other students who may be on campus daily. I was likely the last to get information unless I hunted it down.

The amount of space for newly entering students is very limited. Often applicants give up on trying to get into program because of this.

Nothing

none

english courses should be better

HVAC students should be allowed to park closer to class because of the amount of tools we are required to bring to class on a daily basis. I had to spend close to a thousand dollars for the required tools. I don't like walking from the parking deck or lot 2 to W building in the rain with my expensive tools.

This program needs more people that are knowledgeable about it so they can effectively lead students into the right direction for class.

none

Lots of the "Online" classes require exams on campus. The classes are not truely "Online" and need to be changed to "Hybrid."

The course options could be a little. For instance, I should be able to take nutrition as an elective credit and it count towards my degree instead of sculpture.

class options, for instance I should be able to take Nutrition as an elective instead of sculpture and it count to my degree.

Not having to drive to North Campus.

There needs to be far more computer design intruction in order to be competitive in today's industry.

be more promoted

Computer Integrated Machining is an excellent program, however, more cnc machines would be a major plus.

No

I think the program schedule needs a little wiggle room for those that may have trouble getting a course required for the degree. At times the inability to register for a class throws the student off track and leads to complications when trying to cram the remaining required classes in before graduation.

More opportunity for learning lab/tutor-type resources.

I am very happy with my program of study. If I had to choose an area that needs improvement, I would say that the Text Editing course should be focused on a little more because that is a major basis of Transcription. Without text editing skills, Transcription can be a little more difficult. However, I still performed very well with both Transcription classes.

More classes offered online and throughout the entire year instead of rotating them from spring/fall.

I'd like to see more class times available at the main campus.

None

None

Nothing

work outside the classroom

Rotation site schedule needs manipulated so the program can be shorter.

n/a

way more equipment, program is falling behind the times as far as technology goes.

Cosmetology need more clipper cut training, but now that there's a barber school in Wilmington, that might not change.

There is really not anything I can think of that needs improvement, as far as what I experienced. Though, I am sure there is improvements that need to be made.
There aren't many jobs in the sustainability field in this area - at is level of education. The program really needs to be a four year degree. Other classes need to be incorporated, specifically drafting and Computer Aided Drafting. Further study in architecture would also help. Of course, I say this because I am an older student and won't be huffing it on the roof tops.

My program needs better technology so that it can make it easier for the students who are technologically sound

Biology

I think we need more adequate space for sterile products class, like an ante room and an actual clean room.

I don't really think anything needs improvement.

The course seems to benefit my degree well.

More hands-on classes.

N/a

should be more than one class or larger class size

The sustainability program is extremely too hard. Too many major projects

Advising

Advising

I think the program is very well rounded, but I just wish instead of having to take Mechanical Physics. The students in my program could have taken a physics that is more involved with my field of study.

24 he study area

The instructor's way of communicating with students. At times I felt belittled and treated as if I was 5. Sometimes I felt if they did not care and did not really care to hear what students had to say.

Up to date

More clinic time, sometimes felt things were too fast paced, didn't get enough time to practice.

offer tha classes more often

Overall I was satistified with the program.

I felt many of the 100 level classes to be less insightful than I imagined they would be. Some of them left me wondering if I would in fact be prepared to transfer to a four year institution.

The types classes needed to attend.

I believe if we need improvement on anything it would be to make sure the students always have enough supplies to provide services to the clients.

Be more clear on electives needed.

Updated products and procedures as to what is current out in the work place. Also teachers that are more up to date with the current products and so forth. I felt that they were experienced, but not up to date with a LOT of things. I constantly was being taught more in my rotations at offices than I was in the entire program.

More assistance with the required co-op portion of the degree. I was fortunater enough to get employment with Granite services so i was provided with a co-op. Other students who are very bright are having to struggle to get employment for their co-op for their degree. The nuclear industry is an industry that is very difficult to get your foot in the door. If Cape fear had something set up to assist non Granite students get their co-op it might make the program more desirable and not scare as many people away.

Preperation for Business Classes.

There isn't anything I would change anything about the program.

I had one clear republican teacher. I am a little more on the democrat side, and although I did not always agree, I think the difference is beneficial to students.

Everything in my program of study was benefical.

Being able to have gotten on the correct pathway in the begining of my experience at CFCC.

It would be better if we had more equipment to work with so we have the items and tools that the job field uses. Limited equipment means limited learning which would be a disadvantage if you were considering this field as a career. I would not want to get hired and then not know how to use something or what a certain tool is used for due to not learning about it due to lack of equipment. It would not look good on my part or the schools part in the eyes of the shop owner or customers.

My math just a little.

The academics are challenging but at a level that is inconsistent with the jobs and pay levels available to students that complete either the certificate programs or the associates program for this subject.

less students or more equipment

Automotive HVAC and Mechanical and Electrical Components NEED improvement. Teachers ways of going about "teaching" are not up to par with other teachers like [REDACTED] and MANY students agreed on this. There's more to teaching than assigning multiple chapters of homework that requires the student to write in full answers and write the question like we were in high school. Then upon completion rarely did we ever go over the homeworks. Every class ive taken here at CFCC was fun and educational but I did not learn nearly as much in HVAC and Mech and Electrical as I did in my other Autobody classes.

The only thing I would recommend would be to have more job focuses classes for this program. Maybe a class that would help you to achieve your goals in a job setting.
Perhaps the volume of requirements of some fields. As mentioned above it is important to try new things, but requiring multiple courses in fields that have nothing to do with an intended major are frustrating and cause more frustration than is necessary.

| not much, it filled all the core class needs for transferring to a university |

| The program is not academically in line with the types of jobs that are available to certificate holders or graduates. |

| Not applicable to typical jobs available. Curriculum is not aligned with jobs available. |

| n/a |

| The amount of food waste that is a result of the classes is quite large. Perhaps consider donating that food that gets thrown away from each class. Thank you. |

| Cant think of anything. |

| The knowledge about what is needed to further the program. |

| I believe the Associates of Arts program would be more beneficial to students if the student was given more opportunities to choose certain classes outside of the sociology, psychology, or humanities fields as that student sees fit. I do understand the need for these classes, yet if a student so chooses to study alternative programs in the pursuit of an Associates of Arts I feel that other options should be given. |

| The teachers. I loved what I learned but making it so stressful that we dreaded coming to school wasn't necessary. |

| The program needs to improve on telling students which courses they should take first on the semester schedules. |

| nothing |

| Nothing |

| More structure curriculum. |

| Not sure |

| The organization of Cape Fear in general! |

| Longer class room time |

| Maybe a little more in copper and fiber optic wiring schemes and practice |

| More teachers so all classes can be taken both semesters and so you can pick a teacher rather than having only one teacher that teaches a certain class. |

| Yeah, you need more instructors period. There's no way a student can finish this "two year program" in two years! It's impossible because there's not enough teachers. Also, I like [redacted] but he's not a good instructor. |

| teachers |

| more specified classes |

| I would have liked to see the related computer class geared more towards boat design, rather than being a Microsoft Office suite class. |

| We need more funding for better hands on equipment. |

| keep people NOT in the class OUT of the the class. |

| Nothing, the program is great. |

| More computer classes that pertain to specific aspects of certain job markets |

| The program as a whole is to varied in the requirements, this needs to be narrowed. Also the use of technology is taking some liberties. |

| Maybe go further into some more programing like robotics |

| nothing I can think of |

| Na |
Question 19
Overall quality of my academic program.
