<http://www.cogsci.ecs.soton.ac.uk/cgi/psyc/newpsy>

### ***Learning Objects and Online Tutorials:***

**ePsyche** – This site is designed to teach about psychological processes in a rich experiential setting and show you some amazing things about how the mind works.

<http://epsych.msstate.edu/index.html>

**The Brain from top to bottom** (Anatomy, Physiology, Psychology) – This site includes an incredible amount of information. You can browse the site by topic, level of explanation (beginner, intermediate, & advanced), level of organization (cellular, molecular, neurological, psychological, & social), module, or guided tour. The site contains over 70 presentations on the brain (and it is still under development)!

<http://www.merlot.org/merlot/viewMaterial.htm?id=84697>

**Human Brain Anatomy – An interactive Flash movie designed to help students learn all** about the structures of the brain visible from a midsagittal section.

<http://www.psych.ualberta.ca/~ITL/brain/>

**Internet Psychology Lab** – This site contains online demonstrations in several areas of psychology including cognition, memory & learning, auditory perception, and visual perception.

<http://www.ipsych.com/>

**The Research Methods Laboratory** – This interactive site provides a simplified description of the strengths and weaknesses of several research methods including experimental, correlation, naturalistic observation, survey, and case study. It includes a practice and post-test.

[http://www.mcli.dist.maricopa.edu/proj/res\\_meth/login.html](http://www.mcli.dist.maricopa.edu/proj/res_meth/login.html)

**Seeing, Hearing, and Smelling the World** – Information on the five senses and how they affect human development.

<http://www.hhmi.org/senses/>

**Visual Analysis of Variance** – Visual ANOVA is an interactive Flash program which demonstrates visually how variability between and within experimental groups contributes to the F ratio in the Analysis of Variance. It is not a numerical calculator; rather it visually and holistically demonstrates the relations among important concepts.

<http://www.psych.utah.edu/stat/introstats/anovaflash.html>

**The Whole Brain Atlas** – An excellent brain atlas site, complete with scans associated with disorders.

<http://www.med.harvard.edu/AANLIB/home.html>

## Miscellaneous Directories & Resources:

**AmoebaWeb** – This site has educational and informational links pertaining to every aspect of normal and abnormal human development.

<http://www.vanguard.edu/faculty/ddegelman/amoebaweb/>

**Child and Family WebGuide** – A directory of sites rated by experts from Tufts University for parents, students and professionals. Web sites that contain research-based information about child development are described and evaluated.

<http://www.cfw.tufts.edu/>

**Digital Librarian- Psychology** – A librarian's choice of the best of the web.

<http://www.digital-librarian.com/psychology.html>

**Encyclopedia of Psychology** – The Encyclopedia of Psychology is intended to facilitate browsing in any area of psychology. There are two paths envisioned for this purpose: original information generated by respected researchers and practitioners in various fields of psychology; and, a hierarchical database of links to websites providing information about scientific psychology.

<http://www.psychology.org/>

**Genders** – Presenting Innovative Work in the Arts, Humanities and Social Theories.

<http://www.genders.org/>
