Spring Registration!
Jan. 2, 2013
Cape Fear Community College is an open door, multi-campus, comprehensive community college that strengthens the academic, economic, social and cultural life of the citizens of New Hanover and Pender counties.

As a member of the North Carolina Community College System, Cape Fear Community College fully supports the system mission and fulfills its purposes by:

- Focusing on vocational, technical, pre-baccalaureate, literary education, and continuing education programs and services;
- Recruiting, enrolling, advising and retaining a diverse student body;
- Recruiting, retaining and developing a highly qualified and diverse faculty and staff who are dedicated to quality education and service to the College and the community;
- Evaluating existing programs and implementing new curricula and instructional strategies to serve the changing needs of the service area;
- Providing support services that help students succeed;
- Enhancing student life through clubs, cultural activities, leadership opportunities, and athletics; and
- Interacting and cooperating with others to encourage, promote and facilitate economic and community development.

Approved by the CFCC Board of Trustees, March 23, 1995; revised January 18, 1996; revised November 19, 2003; reaffirmed January 26, 2006; reaffirmed September 10, 2010.

CFCC’s College Transfer Program

The college transfer/university-parallel programs at CFCC are designed for students planning to transfer to a four-year college or university. Students can get there by earning an Associate in Arts, Associate in Science, or Associate in Fine Arts degree.

Associate in Arts Degree

The Associate in Arts program is recommended for students who need a strong liberal arts background. CFCC offers special transfer tracks or pre-majors for certain liberal arts majors. Students may earn Associate in Arts degrees in 20 pre majors. The intent of the pre-majors is to help students transfer as juniors in the majors.

Pre-majors

Art Education
Business Administration, Accounting, Economics, Finance, and Marketing
Business Education & Marketing Ed. Communication/Comm. Studies
Criminal Justice (transfer program)
Elementary Education
English
English Education
History
Information Systems
Mass Communication/Journalism
Middle Grades Education
Nursing (transfer program)
Political Science
Psychology
Social Work
Sociology
Special Education

Students should always consult with their prospective transfer institution before choosing a pre-major to make sure the pre-major credits earned at CFCC will be honored.

*For students who want to transfer to a four-year institution

CFCC College Transfer Graduate Heads to UNCW

As the owner and operator of a small residential painting business in Wilmington, Jonathan Hause said that the physical demands of his current profession were beginning to take their toll.

“I woke up one morning and I realized that I did not want to paint for the rest of my life. My back had begun hurting a little and I just looked out over the horizon and I didn’t like what I saw,” Hause said. Knowing that getting a college education was the first step to finding a new direction, he enrolled in the college transfer program at Cape Fear Community College.

Two years later, he graduated from CFCC with an associate of arts degree with an impressive 3.8 GPA. Along the way, he realized that he wanted to get into a field where he could make a difference in the lives of others. Now at UNCW, Hause is in his first semester in the social work program at UNCW. His goals are to earn a Bachelor of Social Work degree and to work in the field after graduation.

Hause explained that he feels ready for the new challenge at UNCW because of his experience at CFCC.

“CFCC prepared me to take on the challenge at UNCW by providing excellent instructors, instilling in me the importance of completing assignments and being present, and by teaching me that is was OK to say I don’t know and to ask for help,” Hause said.

Earn a four-year college degree for less

Community college students save thousands of dollars in tuition by earning the first two years of a bachelor’s degree at a community college compared to two-years at a university or four-year college.

CFCC’s 2012-2013 tuition and fees are $1,172.50 for 16 hours of college credit for in-state residents.

CFCC’s College Transfer Program - continued

Associate in Fine Arts Degree

The Drama pre-major enables students to concentrate in one of three areas: Acting for the Stage, Acting for Television and Film, and Technical Theatre. Unlike the other transfer programs, the AFA has only 28 hours of the general education core but 36-37 electives. Students are advised to contact the senior institution of choice early to find out if they will be required to take additional general education courses after transfer. If additional core courses are required, students may use the core courses to fulfill some free elective requirements in the AFA program. CFCC also offers a pre-major in Music and Music Education.

Associate in Science Degree

This program requires more math and science and is recommended for majors like Biology/Biology Education, Math/Math Education, Chemistry, Computer Science, and Engineering. Compared to the Associate in Arts programs, the Associate in Science requires more math and science courses; fewer humanities/fine arts and social science courses; a two-course sequence in general biology, general chemistry, or general physics; and a higher level math in the general education core.
Cape Fear Community College - Apply Now for the Spring Semester!
Want to see the current schedule of classes? Visit www.cfcc.edu.

Where do CFCC students transfer after graduation?

In 2011, the top public university for CFCC transfer students was UNCW and the top private transfer college was Mt. Olive College. CFCC officials encourage students to research where they want to transfer well before they complete their associates degree.

For more information about CFCC’s college transfer program, call (910) 362-7126 or visit www.cfcc.edu/transfer.

How well do CFCC transfer students perform compared to university students?

89% of CFCC’s transfer students performed at or above the level of native sophomores and juniors at the transfer institution.

Note: The average for the N.C. Community College System is 88%. Source: NCCCS

CFCC Course Schedules Are Now Online!

All course schedule information for both credit programs and continuing education classes can be found online at www.cfcc.edu.

The online schedules are the most up-to-date class listings available!

How to Register at CFCC

Step 1: Submit an application online at www.cfcc.edu. You will receive an automated e-mail after your application is received.

Step 2: Submit official copies of your transcripts from high school and/or previous college(s).

Step 3: Take the academic placement test. The placement test schedule is located at www.cfcc.edu.

After you apply...

After completing the first three steps, students will receive an official acceptance letter and will be invited to attend a special orientation/registration session.

New students need to attend this orientation session in order to register for classes.

For detailed admissions information, please visit: www.cfcc.edu/admissions

APPLY NOW!
The last day to register for the spring semester is Jan. 2, 2013

PAYMENT IS DUE AT THE TIME OF REGISTRATION.

For specific admissions questions, e-mail admissions@cfcc.edu or visit the CFCC Admissions Office at the Downtown Wilmington Campus at 411 N. Front St. or at the North Campus at 4500 Blue Clay Rd.
Technical & Vocational Programs

Cape Fear Community College - Apply Now for the Spring Semester!

Want to see the current schedule of classes? Visit www.cfcc.edu.

Cape Fear Community College guarantees that its graduates are proficient in the areas of knowledge and basic skills covered by our educational programs.

Graduates not meeting their employer’s entry level expectations during the first year following graduation may be referred, by the employer, back to CFCC for retraining, provided the employer’s entry level expectations are consistent with those skills and competencies routinely taught in the college program from which the employee graduated and further provided that the graduate earned a minimum grade of “C” in the course or courses in which the skill or competency should have been mastered.

The additional training will be provided either on-site to the graduate, excluding books and supplies.

NOTE: Admission to this program requires a letter of sponsorship from a law enforcement agency or approval by the director of the program.

BANKING AND FINANCE

Where Graduates Get Jobs: Banking and finance is a concentration under the title of Business Administration. This curriculum is designed to prepare individuals for a career with various financial institutions and other businesses.

Degree Options: Certificate

BASIC LAW ENFORCEMENT TRAINING

Where Graduates Get Jobs: Students successfully completing this program will possess at least a minimum degree of general attributes, knowledge, and skills to function as an entry-level law enforcement officer. Job opportunities are available with state, county, and municipal governments in North Carolina. In addition, knowledge, skills, and abilities acquired in this course of study qualify graduates for job opportunities with private enterprises in such areas as industrial, retail, and private security.

NOTE: Admission to this program requires a letter of sponsorship from a law enforcement agency or approval by the director of the program.

BOAT BUILDING (Wooden)

Where Graduates Get Jobs: Graduates may find employment with yacht manufacturers, service yards, dealerships doing commissioning work, and companies doing custom boat building, as well as related positions in industry, and community agencies.

NOTE: Admission to this program requires a letter of sponsorship from a law enforcement agency or approval by the director of the program.

Noted shipwright takes helm of CFCC’s Boat Building Program

B

efore Mark Bayne made a career out of building wooden boats all over the East Coast, he started as a student Cape Fear Community College’s first boat building class in 1978. Today, he’s back in the same classroom 34 years later to lead the program into the future.

In August, Bayne was hired as the lead instructor of CFCC’s boat building program - one of CFCC’s most unique academic programs.

A well-known boat builder based in South Carolina, Bayne took over for Ed Verge, who retired from the college this summer.

Bayne explained that boat building is a huge industry along the coast of North Carolina and he is enjoying the opportunity to share his experience to help students get started on their own boat building careers.

“I’m excited about spreading the knowledge that I’ve gained over all these years and training the next generation of workers that I would want to hire in my own shop,” Bayne said.

In addition to teaching in the program, Bayne will also organize the annual CFCC Wooden Boat Show in downtown Wilmington on April 20, 2013. For more details, call 362-7151 or email mbayne@cfcc.edu.

Cape Fear Community College's new lead boat building instructor Marke Bayne holds a half model of a boat built by students in CFCC’s boat building program.

BUSINESS ADMINISTRATION
Where Graduates Get Jobs: Graduates will be prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Degree Options: Associate degree, Certificate

CARPENTRY
Where Graduates Get Jobs: Graduates will be prepared for employment in the residential building construction field as rough carpenters, framing carpenters, roofers, maintenance carpenters and other related jobs.

Degree Options: Diploma, Certificate

CHEMICAL TECHNOLOGY
Where Graduates Get Jobs: Graduates will be prepared as entry-level chemical laboratory technicians. Their duties may include chemical solution preparation, raw material, product, or environmental analysis, and/or sample testing via wet chemistry or instrumental techniques.

Degree Options: Associate degree

COMMUNITY SPANISH INTERPRETER
Where Graduates Get Jobs: Graduates will be prepared for entry-level jobs as para-professional bilingual employees in educational systems or a variety of community settings. Individuals may choose from part-time, full-time, or self-employment/free-lance positions, or apply language skills to other human service related areas.

Degree Options: Associate degree, Diploma, Certificate

COMPUTER INFORMATION SYSTEMS TECHNOLOGY
Where Graduates Get Jobs: Graduates will be prepared for entry-level jobs in information technology fields such as computing, computer networks, computer management, and other related areas requiring computer knowledge. Graduates may also qualify for certification in electronics, computers, or networks.

Degree Options: Associate degree, Certificate

COMPUTER ENGINEERING TECHNOLOGY
Where Graduates Get Jobs: Graduates will be prepared for employment opportunities in electronics technology, computer service, computer networks, server maintenance, programming, and other areas requiring a knowledge of electronic and computer systems. Graduates may also qualify for certification in electronics, computers, or networks.

Degree Options: Associate degree, Certificate

CONSTRUCTION MANAGEMENT TECHNOLOGY
Where Graduates Get Jobs: This program is designed to prepare individuals for careers in the construction management field. Such positions may include project manager, superintendent, estimator, or foreman. Graduates should qualify for entry-level positions in the field of construction management.

Degree Options: Associate degree

COSMETOLOGY
Where Graduates Get Jobs: Upon successfully passing the State Board exam, graduates will be issued a license. Employment is available in beauty salons and as skin/nail specialists, platform artists, and other related hair professionals.

Degree Options: Diploma, Certificate

CUSTOMER SERVICE
Where Graduates Get Jobs: Graduates will be prepared for entry-level positions such as call center, customer service, or assistant manager. American Culinary Federation certification is available to graduates. With experience, graduates may advance to positions such as sous-chef, executive chef, or food service manager.

Degree Options: Associate degree, Certificate

CULINARY ARTS TECHNOLOGY
Where Graduates Get Jobs: Graduates will be prepared for entry-level positions such as line cook, station chef, and assistant pastry chef. American Culinary Federation certification is available to graduates. With experience, graduates may advance to positions such as sous-chef, executive chef, or food service manager.

Degree Options: Associate degree, Certificate

CUVIDINARY ARTS TECHNOLOGY
Where Graduates Get Jobs: Graduates will be prepared for entry-level positions such as line cook, station chef, and assistant pastry chef. American Culinary Federation certification is available to graduates. With experience, graduates may advance to positions such as sous-chef, executive chef, or food service manager.

Degree Options: Associate degree, Certificate

CUSTOMER SERVICE
Where Graduates Get Jobs: This program stresses the importance of customer relations in the business world. Emphasis is placed on developing communication tools, understanding the business environment and learning how to respond to complex customer requirements and to efficiently handle stressful situations. Upon completion, students should be able to demonstrate the ability to understand and communicate with customers and resolve problems and complaints.

Degree Options: Certificate

Cisco Systems Recognizes CFCC’s Computer Networking Program

Cape Fear Community College was recently recognized by Cisco Systems, a multinational corporation that designs, manufactures and sells computer networking equipment.

The college received special recognition for serving as a certified Cisco Networking Academy for ten years. Courses in the Cisco training are incorporated into CFCC’s information technology program. After all academy courses are completed, students are eligible to sit for the Cisco Certified Network Associate (CCNA) certification exam.

According to Melissa Watson, chair of CFCC’s business technology department, most graduates of the college’s computer information technology program choose to obtain this highly-regarded international networking certification, which greatly increases their chances of getting a job once they graduate.

Culinary grad opens new bakery

Culinary arts graduate Bree Peterson-Resnick, has used her talent to open “Uprising,” a new local bakery which offers customers much more than the typical pastry fare.

Located on Wrightsville Avenue in Wilmington, Uprising has everything from cheesecake and red velvet cake to savory goat cheese pastries and veggie scones. Resnick’s tasty treats are unique, due to her use of almost entirely locally grown, organic ingredients and her large selection of gluten-free goodies. Local or American made retail items such as hammocks, greeting cards, wind chimes and shirts can also be found at Uprising.

Resnick describes this unique fusion as, “selling an atmosphere, not just a cupcake.”

Resnick launched her culinary journey by enrolling in CFCC’s Culinary Arts program. She praised the program and its benefits.

“They give you all the tools you need to be successful,” says Resnick. “You learn how to purchase your products, set up your kitchen, hire your staff, create menus, evaluate your product, and to analyze your profits and losses.”

Resnick also credited her CFCC culinary instructors, Chef Valerie Mason, Chef Jim Dishaw and Chef Marilyn Lowers for their knowledge and guidance.

“They helped to shape my style and views on everything from steak to cake and back again! I admire and love those chefs and am so grateful for all they have taught me,” she exclaimed.

She co-owns Uprising with Michael Scott, her husband, and says she has achieved her culinary dreams.

“I not only work in a kitchen where I’m needed and appreciated, but I get to be my own boss and I have all the artistic freedom I could ever want,” she said.

by Jenni O’Toole
Graduate returns to CFCC to start new career

In 2010, Sally Varner decided to enroll at Cape Fear Community College for a "no-fail" tooling of sorts. "My first CFCC degree served me well for 12 years but I was ready for something new," Varner said.

Always curious about electricity, she set out to earn her second degree from CFCC in electrical/electronics technology. "I enjoyed the program tremendously. My main instructor, Wes Gubitz, was a great support and coach through the two years. Without him I feel the road would have been a bit longer and my enthusiasm for the field would have not been so clear," Varner said.

About a year into the program, Gubitz encouraged her to apply for an internship with Progress Energy, which helped her see how the classroom experience translated to the "real world." "I put my best foot forward every day I came to work, knowing that I was learning a trade that I could use anywhere, and all the experience working was leading to a deeper knowledge of that trade," Varner said.

Varner was hired at Progress Energy a week before graduation and is now working as an electrical/electronic systems integrator. "The experience I've gained through CFCC laid a strong foundation for me to grow and succeed professionally," Thrailkill said.

**Diploma and Certificate**

**Degree Options:**
- Hydraulics, welding, machining, blueprint equipment and facilities.
- Skills include
- Students will be prepared for a variety of jobs in manufacturing industries, public institutions, governmental agencies and in a wide range of specialty machining shops.

**INTERIOR DESIGN**

- Where Graduates Get Jobs:
  - Graduates will be prepared for a variety of jobs including residential and commercial interior design, showroom design, and sales positions for furniture, textiles and accessories, and all business dealing with interiors.
- Degree Options: Associate degree, Diploma and Certificate

**LANDSCAPE GARDENING**

- Where Graduates Get Jobs:
  - Students will learn how to
- Certificate
- Students will be prepared for employment opportunities in applied horticulture related to landscape development and maintenance for residential and commercial operations.
- Graduates will be prepared to take the North Carolina Pesticide Applicator’s Examination and the North Carolina Certified Plant Professional Examination.
- Degree Options: Associate degree, Certificate

**LANDSCAPE GARDENING (RETENTION POND MANAGEMENT CERTIFICATE)**

- Where Graduates Get Jobs:
  - The Retention Pond Management Certificate Program provides a heavy concentration of hands-on retention pond management experience using retention ponds at the CFCC North Campus.
- Students will learn the basics of aquatic and wetland fertilization and pruning. Students will also learn instrumentation and specialty examinations administered by the American Registry of Diagnostic Medical Sonographers. Graduates may find employment in clinics, physicians’ offices, mobile services, equipment manufacturers, hospitals, and educational institutions.
- Degree Options: Certificate

**MACHINING TECHNOLOGY (Computer Integrated Machining)**

- Where Graduates Get Jobs:
  - Employment opportunities for machining technicians exist in manufacturing industries, public institutions, governmental agencies and in a wide range of specialty machining shops.
- Degree Options: Associate degree, Certificate

**MANICURING**

- Where Graduates Get Jobs:
  - Graduates will be prepared to take the North Carolina Cosmetology State Board Licensing Exam. Upon passing the exam, graduates will be licensed and will qualify for employment in beauty and nail salons, as a platform artist, and in related businesses.
- Degree Options: Certificate

**MARINE AND DIESEL MECHANICS**

- Where Graduates Get Jobs:
  - Students will be prepared to take the North Carolina Pesticide Applicator’s Examination and the North Carolina Certified Plant Professional Examination.
- Students will learn the basics of aquatic and wetland fertilization and pruning. Students will also learn instrumentation and specialty examinations administered by the American Registry of Diagnostic Medical Sonographers. Graduates may find employment in clinics, physicians’ offices, mobile services, equipment manufacturers, hospitals, and educational institutions.
- Degree Options: Associate degree, Diploma and Certificate

**MEDICAL TRANSCRIPTION**

- Where Graduates Get Jobs:
  - Graduates will be prepared for employment in hospitals, medical clinics, doctors’ offices, private transcription businesses, research facilities, insurance companies, and publishing companies. After acquiring work experience, individuals can apply to the American Association for Medical Transcription to become Certified Medical Transcriptionists.
- Degree Options: Diploma

**NUCLEAR TECHNOLOGY**

- Where Graduates Get Jobs:
  - Upon completion of this program, graduates will be prepared as entry-level field service technicians in the nuclear power industry.
- Degree Options: Associate degree

**Marine Tech grad finds career on the high seas**

A
ter five years in the U.S. Navy, Ari Saint-Lot relocated to North Carolina and was soon looking for a new career.

A friend recommended CFCC’s Marine Technology program and in a few months Ari and his wife moved to Wilmington so he could enroll at CFCC.

It turned out to be a great decision.

“The Marine Tech program prepared me for my current job,” Saint-Lot said.

He explained that the at-sea experience he gained aboard CFCC’s research vessel the R/V Dan Moore helped him land a job with one of the world’s leading offshore seismic research companies.

“The Marine Tech program is awesome because of the instructors. They all go above and beyond. When someone cares so much about what they teach it is infectious,” Saint-Lot said.

He currently works for CGG Veritas, an international company that provides a wide range of offshore services for the oil and gas industry.

Most recently, Saint-Lot worked aboard the research ship CGG Alize, where he deployed, recovered and repaired equipment used in offshore seismic research.

---

**CFC Mechanical Engineering graduate Matthew Neal now works as the Business Process and System Analyst for Fenner Drives in Wilmington.**

---

**“Fantastic instructors with real life experience equals a great formula for successful students.”**

Matthew Neal - CFCC Mechanical Engineering Graduate
PLUMBING - New!
Where Graduates Get Jobs: Graduates will be prepared for employment with parts suppliers, maintenance departments and plumbing contractors to assist with various plumbing applications.
Degree Options: Diploma

PRACTICAL NURSING
Where Graduates Get Jobs: Graduates will be prepared to apply to take the national certification examination for practice as a Licensed Practical Nurse. Employment opportunities include hospitals, rehabilitation/long term care/home health facilities, clinics, and physicians’ offices.
Degree Options: Diploma

PHLEBOTOMY
Where Graduates Get Jobs: Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.
Degree Options: Associate degree, Diploma, Certificate

PHARMACY TECHNOLOGY
Where Graduates Get Jobs: Graduates may be employed in hospitals, nursing homes, private and chain drug stores, research laboratories, wholesale drug companies, and pharmaceutical manufacturing facilities. Graduates will qualify to take the National Certification Examination developed by the Pharmacy Technician Certification Board.
Degree Options: Diploma

PHLEBOTOMY
Where Graduates Get Jobs: Graduates will be prepared for employment in hospi- tals, clinics, physician's offices, and other health care settings and may be eligible for national certification as phlebotomy technicians.
Degree Options: Certificate

PLUMBING TECHNOLOGY
Where Graduates Get Jobs: Graduates will be prepared to work as parts supply clerks, plumbing contractors to assist with various plumbing applications, and work as private contract haulers. They may also become owner-operators employable by commercial trucking firms. The curriculum will be qualified to take the Commercial Driver’s License exam and employable by commercial trucking firms. They may also become owner-operators and work as private contract haulers. Graduates should qualify for positions within the alternative energy, construction, environmental, and/or manufacturing industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.
Degree Options: Associate degree, Diploma, Certificate

REAL ESTATE
Where Graduates Get Jobs: Graduates who have passed the real estate license examination and obtained a real estate provisional broker license then qualify for removal of the provisional status and are able to provide basic, residential real estate services as a broker affiliated with a real estate brokerage firm.
Degree Options: Certificate

SUSTAINABILITY TECHNOLOGIES
Where Graduates Get Jobs: Graduates will be prepared for employment with parts suppliers, maintenance departments and plumbing contractors to assist with various plumbing applications.
Degree Options: Associate degree, Diploma

Surgical Technology
Where Graduates Get Jobs: Graduates of the curriculum will be prepared to take the American Registry of Radiological Technologists' national examination for certification and registration as radiologic technologists. Graduates may be employed in hospitals, clinics, physicians' offices, medical laboratories, government agencies, and industries.
Degree Options: Associate degree

Local Companies Find Success Through CFCC’s Customized Training Program

While Cape Fear Community College is widely known throughout the region for providing job training and higher education for individuals, more and more companies are discovering that CFCC also offers specialized training for business and industry.

What makes CFCC’s Customized Training Program so attractive is that the courses are designed to meet the specific needs of individual businesses and are provided free of charge.

Over the past year, area businesses of all sizes have taken advantage of the program – including Fenner Drives, a design and manufacturing firm in Wilmington. According to Jason Kinney, manufacturing manager at Fenner Drives, the company initially wanted to pursue a few classes in machining, but they soon learned that the college could offer much more. Over the last year, 44 Fenner Drives employees took 22 different classes through CFCC, including quality improvement Six Sigma Greenbelt certification, efficiency, safety and hands-on training on specific equipment.

Kinney said that the training provided his employees with the tools they needed to initiate cost savings and become more efficient. “We sought the training to allow growth of our associates across all facets of our business,” Kinney said.

Before the classes began, Kinney and his associates worked with the college to develop a plan to meet their goals based on the offerings of the college, what the expectations were for employees, and Fenner’s organizational objectives for the future.

By having classes on site, the training was designed so that employees could practice new procedures on the actual equipment they use at the plant. CFCC integrated the course instruction with real-life problems, which made the course informative and practical.

Kinney said that when the Wilmington plant was recently visited by executives from Fenner’s parent plant in Pennsylvania, the visitors and senior management remarked at how efficient the operation had become over the last year. “These courses have also shown tremendous payback through renewed vigor to improve and a noticeable excitement across the facility,” Kinney said.

“We were a successful group prior to beginning the training but were essentially at our limits as far as ability. The training has allowed us to pursue different objectives and goals in order to continue both personal as well as professional growth,” Kinney stated.

Over the past year, other companies that have used CFCC’s customized training services include Cincinnati Thermal Spray, Mundy Corp, AAI Pharma, American Skin, Cardinal Metalworks, Corning, IKA Works, Invista, Key West Casual Furniture and WR Rayson.

For more information about CFCC’s customized training program, call Mary Wood at (910) 362-7050.

CFCC Basketball Season is Here!

All home games are held in the Schwartz Center in downtown Wilmington. Tickets are $3.00. Children 12 and under are free. Free entry for CFCC students and employees with CFCC ID.
