CATALOG and STUDENT HANDBOOK
2014-2015

VOLUME XLIV AUGUST 2014
NOTE
The catalog and handbook are published for the purpose of providing information about the College and its programs. Announcements contained herein are subject to change without notice and may not be regarded in the nature of binding obligations on the College or the State. Efforts will be made to keep changes to a minimum, but changes in policy by the North Carolina State Legislature, the North Carolina Community College System, or by local conditions may make some alterations in curricula, fees, etc., necessary.

NON-DISCRIMINATION POLICY
Cape Fear Community College, its faculty and staff, and the Board of Trustees are committed to equality of educational opportunity. The College does not discriminate against applicants, students, or employees. Moreover, the College is committed to cultural diversity and actively seeks larger numbers of minorities within the College community. This policy applies to both students and employees at all levels of the Colleges operations.

INSTITUTIONAL ACCREDITATION
Cape Fear Community College is accredited by the Commission on College of the Southern Association of Colleges and Schools to award associate degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call (404) 679-4500 for questions about the accreditation of Cape Fear Community College.

Cape Fear Community College (CFCC) provides the above information to enable interested constituents (1) to learn about the accreditation status of CFCC, (2) to file a third-party comment at the time of CFCC’s decennial review, or (3) to file a complaint against CFCC for alleged non-compliance with a standard or requirement. The Commission on College’s should be contacted only if there is evidence that appears to support Cape Fear Community College’s significant non-compliance with a requirement or standard. Otherwise, the Commission on College’s website provides membership information and accreditation status of its members at www.sacsccoc.org. All other inquiries about Cape Fear Community College should be addressed directly to the college and not to the Commission on College’s office.

MEMBER OF
Cape Fear Community College is a member institution of the North Carolina Community College System, the League for Innovation in Community Colleges, and the American Association of Community Colleges.

ACCREDITATIONS AND CERTIFICATIONS OF SELECT PROGRAMS
Associate Degree Nursing: Accreditation Commission for Education in Nursing, Inc. (ACEN). The address and telephone number of Accreditation Commission for Education in Nursing, Inc. is 3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326, (404) 975-5000.

Criminal Justice Technology: The North Carolina Criminal Justice Education and Training Standards Commission. The address and telephone number of the North Carolina Criminal Justice Education and Training Standards Commission is NC Criminal Justice Standards Division, NC Department of Justice, 114 West Edenton Street, PO Drawer 149, Raleigh, NC 27602, (910) 716-6470.

Dental Assisting: The Commission on Dental Accreditation of the American Dental Association. The address and telephone number of the Commission on Dental Accreditation of the American Dental Association is 211 East Chicago Avenue, Chicago, IL 60611-2678, (312) 440-4653.

Dental Hygiene: The Commission on Dental Accreditation of the American Dental Association. The address and telephone number of the Commission on Dental Accreditation of the American Dental Association is 211 East Chicago Avenue, Chicago, IL 60611-2678, (312) 440-4653. The dental hygiene program is accredited without reporting requirements.

Medical Sonography: The Medical Sonography Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) in cooperation with the Joint Review Committee on Education in Diagnostic Medical Sonography (JRC-DMS). The address and telephone number of CAAHEP is 1361 Park St., Clearwater, FL 33756, (727) 210-2350. The address and telephone number of the JRC-DMS is 2025 Woodlane Dr., St. Paul, MN 55125-2998, (651) 731-1582.

Phlebotomy: The National Accreditation Agency for Clinical Laboratory Sciences, 8710 W. Bryn Marr Avenue, Suite 670, Chicago, IL 60631-3415, (773) 714-8880.

The Performance Measures for Student Success Report is the North Carolina Community College System’s major accountability document. This annual performance report is based on data compiled from the previous year and serves to inform colleges and the public on the performance of our 58 community colleges.

In 2010, President Scott Ralls established a Performance Measures Committee to develop new performance based student success measures to go into effect in 2013.

In November 2011, the State Board formally approved the Performance Measures. These measures were then submitted to the General Assembly in March 2012 and later adopted in June 2012 through Section 8.5 of S.L. 2012-142. The revised Performance Measures include system-wide “baselines” and “goals” for each measure to promote transparency, simplicity, and objectivity. This utilization of baselines and goals is a departure from the System’s historical use of “standards.” These baselines and goals remain static for three years and will be reset in the 2016 Report.

Complete details for all 58 North Carolina Community Colleges can be found at the NCCCS Website. CFCC’s performance results for 2014, based on 2012-13 data:

President’s Welcome

Cape Fear Community College is full of opportunities. Whether you want to earn a degree, improve your current job skills or train for a new career, CFCC is a great place to get started. As you'll see by reviewing this catalog and student handbook, the college's programs of study offer a wide variety of diverse and academic programs.

Since 1958, CFCC has been a leader in higher education and job training for students from all walks of life. The curriculum is designed to challenge and prepare students for the next step of their journey - whether it be to transfer to an institution of higher learning or to start working in an exciting new career.

In addition, CFCC faculty are dedicated to providing the highest quality of instruction and support services. It is our mission to make sure each student has the resources they need to reach their educational goals.

If you are ready to make a commitment to improving your future, we are here to help.

Sincerely,

Ted D. Spring, Ph.D.
CFCC President

Mission Statement for the North Carolina Community College System

The mission of the North Carolina Community College System is to open the door to high-quality, accessible educational opportunities that minimize barriers to post-secondary education, maximize student success, and improve the lives and well-being of individuals by providing:

- Education, training and retraining for the workforce, including basic skills and literacy education, occupational and pre-baccalaureate programs.
- Support for economic development through services to and in partnership with business and industry.
- Services to communities and individuals, which improve the quality of life.

Mission Statement for Cape Fear Community College

Cape Fear Community College is an open door, multi-campus, comprehensive community college that strengthens the academic, economic, social and cultural life of the citizens of New Hanover and Pender counties.

As a member of the North Carolina Community College System, Cape Fear Community College fully supports the system mission and fulfills its purposes by:

- Focusing on vocational, technical, pre-baccalaureate, literacy education, and continuing education programs and services;
- Recruiting, enrolling, advising and retaining a diverse student body;
- Recruiting, retaining and developing a highly qualified and diverse faculty and staff who are dedicated to quality education and service to the College and the community;
- Evaluating existing programs and implementing new curricula and instructional strategies to serve the changing needs of the service area;
- Providing support services that help students succeed;
- Enhancing student life through clubs, cultural activities, leadership opportunities, and athletics; and
- Interacting and cooperating with others to encourage, promote and facilitate economic and community development.

Approved by the CFCC Board of Trustees, March 23, 1995; revised January 18, 1996; revised November 19, 2003; reaffirmed January 26, 2006; reaffirmed September 10, 2010.

Cape Fear Community College Vision Statement

“Cape Fear Community College: Building a future-oriented world-class workforce and a community of lifelong learners in partnership with regional businesses and agencies. Imagine the possibilities!”

Approved by the CFCC Board of Trustees, March 26, 1998.

About the College

Cape Fear Community College is a comprehensive community college that offers education and training services through numerous (1) TECHNICAL/VOCATIONAL CURRICULA in such broad areas as health care, business, engineering technologies, computer sciences, architecture/construction/interior design, law enforcement and numerous other fields, (2) COLLEGE TRANSFER/UNIVERSITY PARALLEL studies in the freshman and sophomore years of baccalaureate programs, and (3) a host of CONTINUING EDUCATION programs that can be broadly clustered into such categories as Basic Skills (including Adult High School and GED, among other programs), Occupational Extension (custom-designed training related directly to the in-service training needs of various professions), and Community Services/Self-Supporting classes that may include a wide range of avocational interests.

The core of the College’s mission is world-class workforce development.

CFCC is one of fifty-eight institutions comprising the North Carolina Community College System. The North Carolina Community College System and its constituent institutions operate in accord with legislation enacted by the North Carolina General Assembly and as contained in Chapter 115D of the North Carolina General Statutes. Governance of Cape Fear Community College is further defined by policies, rules, and procedures as promulgated in accord with state and federal laws by the North Carolina State Board of Community Colleges, the Cape Fear Community College Board of Trustees, and College officials.

Cape Fear Community College’s official service area includes New Hanover and Pender counties. CFCC’s Wilmington campus is located in downtown Wilmington and the North Campus is located in Castle Hayne. CFCC offers classes at the Burgaw Center and at the Surf City Community Center in Pender County. Several CFCC technical and vocational programs are unique to southeastern North Carolina and to the state as a whole, and the College therefore serves as a regional provider of workforce training. The number of different students annually enrolling at the College typically exceeds 27,000.

Admissions

CFCC operates under an “open door” policy. This means that the College offers instruction to all adults. So if you are 18 years of age or older, or if you have a high school diploma or equivalent, and can benefit from courses and programs offered by our College, WE WELCOME YOU. While CFCC advises all students to seek a high school diploma or equivalent admission to certain certificate programs may be granted without prior completion of a diploma or GED®. In addition, admission to the college does not mean that students will be admitted immediately to a program with specified admissions requirements.

Admission to degree, diploma, and certain certificate programs has additional requirements including high school graduation, official transcripts, placement testing, and medical examinations. Contact the Admissions Office for specific program requirements.

The College reserves the right to refuse admission or readmission to any applicant during any period of time that the student is suspended or expelled from any other educational entity. 23 SBCCC 02C.0301 (d).

The College reserves the right to refuse admission to any applicant if it is necessary to protect the safety of the applicant or other individuals. 23 SBCCC 02C.0301 (e) and (f).

Applicants who are refused admission have the right to an appeal. To initiate such an appeal, the applicant must submit a written appeal to the Vice President for Student Services within five (5) calendar days after being notified of the refusal to admit. The Vice President for Student Services will present the appeal to the Judicial Board within (5) calendar days of receipt of the written appeal. If the student wishes to appear before the Judicial Board, the request must be included in the written appeal. The Vice President for Student Services will notify the applicant of the Judicial Board’s decision. The decision of the Judicial Board shall be final with no further appeals.

Admission as a Non-Degree Seeking Student

Students who do not wish to enter degree or diploma programs may enter CFCC as “special credit” students. Students admitted as special credit students may carry only a part-time course load and must have their registration cards approved by a counselor. Special credit students must meet course prerequisites including Placement testing. Admission as a special credit student does not constitute admission to any curriculum program. Special credit students may attempt no more than 18 credit hours without meeting admissions requirements. Students who exceed this number will not be permitted to register until admissions requirements are met. Students who enter a curriculum program from special credit status, veterans, and Financial Aid recipients must meet all admissions requirements prior to time of registration. Exceptions are programs which do not culminate in a degree, diploma or certificate. Admissions requirements do not apply to these programs.

http://cfcc.edu/admissions/non-traditional-admissions/

Selective Admission/Health Science Programs

Students applying for admission to health science programs must meet general college admission requirements as well as specific program requirements. Each of the selective admission programs requires that applicants be a high school graduate or have a GED®, meet the minimum placement test scores required for the specific curriculum program and complete the program application process by the deadline established for that particular program. Prior college course completion with a grade of “C” or better in English and math could eliminate the placement test requirement. Students will need to consult with counselors.

Certain CFCC academic programs have additional entrance requirements beyond general admissions to the College. Selective admission programs at the College include: Associate Degree Nursing, Dental Assisting, Dental Hygiene, Nursing Transition, Occupational Therapy Assistant, Pharmacy Technology, Phlebotomy, Practical Nursing, Radiography, Regionally Increasing Baccalaureate Nursing (RIBN), Sonography, and Surgical Technology.

Students may visit the Counseling Office for specific program requirements and applications or visit our website at http://cfcc.edu/student/services/health/

Admission of Transfer Students

1. Transfer students must complete CFCC’s admission requirements (see General Admission Process).

2. Only courses with a grade of “C” or better can be transferred from other institutions to CFCC.

   a. CFCC will accept all courses completed with a grade of “C” or above from other North Carolina Community Colleges that apply to the student’s program of study.

   b. Credits are transferable from regionally accredited two and four year institutions within the United States. Courses are transferred that compare in content, quality and credit hours to those offered at CFCC.

   c. Transcripts of course work completed at a college or university located outside of the United States and credit evaluation (2) course descriptions if transfer credit is needed. Contact the Director of Enrollment Management for acceptable translation and evaluation agencies.

   d. Credit for Military Experience—Veteran applicants should submit an official S.M.A.R.T. transcript to the College in order to request credit for previous military experience and training. The College grants credit where applicable for military service schools in
accordance with the recommendations of the American Council on Education’s Guide To The Evaluation Of Educational Experiences In The Armed Services. Credit recommended must be consistent with the requirements and objectives of an academic program in order to be granted. Students should be aware that the transferability of these credits is totally at the discretion of the receiving institution and that Cape Fear Community College makes no guarantee of such transfer.

3. Some courses that depend heavily on technology, speed and accuracy, physical skills, and/or language skills will be subject to review after five years unless the student has been continuously enrolled. Courses subject to review may include, but not limited to, keyboarding, computer, foreign languages, developmental, and trades courses.

4. Credits transferred from other institutions will be noted on the student’s CFCC transcript. Grades achieved at other institutions will not be used in the grade point average computation at CFCC.

5. Credit gained through advanced placement testing will require official transcripts from the testing agency.

6. Experiential learning, proficiency testing, and cooperative education work experience will not be transferred as course work to CFCC.

7. Students should submit official copies of all transcripts two weeks prior to registration so that evaluation of transfer credit can be completed. Transfer credit for those transcripts received during the registration process will be completed by the end of the first academic session of enrollment. Faxed transcripts are not acceptable.

8. To receive a degree, diploma or certificate from CFCC, transfer students must complete at least 25 percent of program requirements at CFCC.

Re-Admission of Curriculum Students
Students (including CFCC graduates) returning to CFCC who have not been enrolled for a minimum of 3 years must submit a new Admissions Application. Students must also meet the admissions requirements for the current program of study including evaluation of all coursework earned at CFCC and other institutions.

Some courses that depend heavily on technology, speed and accuracy, physical skills, and language skills will be subject to review after five years unless the student has been continuously enrolled. Courses subject to review may include, but not limited to, keyboarding, computer, foreign languages, developmental, and trades courses.

Admission of Transient Students
Transient students are those who are admitted and enrolled in another college or university and wish to enroll in CFCC as a full-time student for one academic session.

Transient students must:
• Submit a completed CFCC Admission Application.
• Submit written permission from their home institution to enroll in CFCC.
• Provide verification of completion of applicable prerequisites prior to enrolling in CFCC courses.

Provisional Admission
Provisional admittance is granted during Final Registration Day only. Students whose official high school transcripts have not been received by the Admissions Office at the time of registration may be admitted provisionally. All admissions requirements must be met within thirty (30) calendar days from the first day of the academic session. Those students who do not meet admissions requirements within thirty (30) calendar days may be dropped from courses, and financial aid benefits may also be jeopardized. Students will not be allowed to register for upcoming semesters until all admission requirements are met. Students must take the placement test prior to registration to meet course prerequisites.

NOTE: Official post-secondary transcripts are required; faxed transcripts are not acceptable.

Special Credit - Lifelong Learners
Students who have no desire or intention to work toward a degree, diploma, or certificate and wish to take classes for personal development, enrichment, or simply for the joy of learning may enroll as a Lifelong Learner. To be admitted as a Lifelong Learner, the student need only submit a completed college application for admission. Students admitted as Lifelong Learners may carry only a part-time course load and must have their registration approved by a counselor. Lifelong Learners must meet and verify course prerequisites including placement testing. Official post-secondary transcripts are required; faxed transcripts are not acceptable. Admission as a Lifelong Learner does not constitute admission to any curriculum program. A Lifelong Learner who wishes to be reclassified as a regular student must complete admission requirements as outlined in the General Admissions Process in this catalog. Lifelong Learners are not eligible to receive financial aid or Veteran’s benefits.

The North Carolina Career and College Promise: College Opportunities for High School Students
The Career and College Promise Program allows qualifying high school students the opportunity to enroll in college classes in order to earn both high school and college credit upon successful completion of CFCC courses. This program offers the following pathways:

• Career and Technical Education Pathway
• College Transfer Pathway
• Cooperative Innovative High School Pathway (or Early College High School)

The Career Technical Education Pathway allows high school students the opportunity to enroll in a CFCC Certificate that aligns with their high school career cluster programs. To be accepted to this program, students must meet the following criteria:
• Be a high school junior or senior;
• Have a weighted GPA of 3.0 on high school courses or have the approval of the high school principal or designee;
• Meet all program prerequisites.

The College Transfer Pathway allows high school juniors and seniors the opportunity to complete some of the core general education classes required during the first two years of a four-year degree. To be accepted to this program, students must meet the following criteria:

• Be a high school junior or senior;
• Have a weighted GPA of 3.0 on high school courses;
• Demonstrate college readiness in English, Reading, and Math on an assessment or placement test such as the PLAN, PSAT, SAT, ACT, or Accuplacer Exam.
• Meet all program prerequisites.

The Cooperative Innovative Pathway or Early College High School allows students the opportunity to earn a high school diploma and up to two years of college credit within five years. CFCC partners with New Hanover County Schools and Pender County Schools to host two early college high schools. Pender Early College High School (PECHS) and Wilmington Early College High School (WECHS) are high schools located on the campuses of CFCC. Both early colleges enroll rising ninth-graders each year. Students must have the desire to attend a smaller school with high expectations for academics and behavior. Admission to the program is granted by each respective school system.

For more information on college courses available to qualifying high school students, visit our website at http://www.cfcc.edu/ccp.

Admission of Out-of-State Students
Out-of-state students are admitted under the same admissions requirements as residents of North Carolina. Residency classification for out-of-state students will be determined at the time of admissions according to the laws of the State of North Carolina. General Statute 116-143.1 specifically states that to qualify as a resident for tuition purposes, a person must have established legal residence (domicile) in North Carolina and maintained that legal residence for at least 12 months immediately prior to his or her classification for tuition purposes. Furthermore, a person must establish that his or her presence in the state currently is, and during the requisite 12-month qualifying period was, for purposes of maintaining a bona fide domicile rather than of maintaining a mere temporary residence or abode incident to enrollment in an institution of higher education. Consequently, the fact that a person has resided in the state for 12 months does not in itself constitute in-state residency. Special rules and circumstances may affect the assessment of domicile for minors, married persons, active members of the armed forces and their dependents, aliens, federal personnel and prisoners. Exceptions are also made for families transferred by business within the past 12 months (up to 1% of total out-of-state students), students with employer-paid tuition, lawfully admitted public high school graduates, non-profit corporation sponsorships, and emergency workers.

Applicants wishing additional information about the laws of North Carolina governing residency classification for students should contact the Director of Enrollment Management’s office where copies of the law are maintained or log on to www.ncleg.net for NC General Statutes.

It is the student’s responsibility to provide the College with the necessary information to prove in-state status. If a student wishes to apply for a change of status consideration, he/she must submit a Resident and Tuition Status Application (available in the Student Services Offices and the College’s website) to the Director of Enrollment Management. Applications must be submitted within the first ten (10) days of the semester in which the student is requesting the in-state status. Legal documentation supporting a student’s claim for in-state status must be attached at the time the application is submitted. Examples include NC State tax return, voter registration, vehicle registration, personal property taxes, driver's license/State I.D. etc. If the student chooses to appeal the classification assigned by the Director of Enrollment Management, he/she must file a written appeal to the Director of Enrollment Management within ten (10) days following the director’s notification of residency status (electronic submissions are not acceptable). The appeal will then be forwarded to the Residency Status Subcommittee of the Judicial Board of CFCC who will review the appeal and make a determination to either uphold or reverse the applicant’s residency classification. Should the student choose to appeal the determination of the Appeals' Committee, he/she may appeal to the State level by filing a written appeal to the Director of Enrollment Management within ten (10) days following the Appeals Committee’s decision (electronic submissions are not acceptable). This appeal must include a statement of intent and grounds for appeal. The decision of the State Appeals' Committee is final.

Admission of International Students
Cape Fear Community College does not issue the necessary documents to obtain the F, J, or M student visas. Other visas may be acceptable for admission. Contact the Director of Enrollment Management for further information.

General Admissions Process
New students should complete all admission requirements at least two weeks prior to registration.

1. APPLICATION An application for admission must be submitted prior to placement testing and registration. Applications may be submitted online at www.cfcc.edu. Valid email addresses are required for electronic applications.

2. OFFICIAL HIGH SCHOOL OR GENERAL EDUCATIONAL DEVELOPMENT (GED®) TRANSSCRIPT
An official high school or GED® transcript from an accredited institution recognized by the Department of Education which indicates the date of graduation must be submitted to CFCC. Official transcripts are those received either by mail or by hand-delivery to CFCC in the original, sealed envelope from the awarding institution or agency. Home schooled students must submit a copy of the home school’s approved registration from the state in which they are registered.
3. OFFICIAL COLLEGE TRANSCRIPT(S) Official college transcripts from all accredited institutions of higher education previously attended must be submitted to CFCC.

4. PLACEMENT TESTING All applicants to degree, diploma and certain certificate programs are required to have valid placement test scores on file prior to acceptance at CFCC. (There is no charge for the placement assessment). All or parts of the placement assessment requirement may be waived upon receipt of official transcripts if the applicant:
- has satisfactorily completed college level English and/or Mathematics course above the developmental level, or
- has made the following minimum scores within the last five years on the Scholastic Aptitude Test (SAT): Writing 500 OR Critical Reading 500 and SAT Math 500: American College Testing (ACT)-Reading 22 OR English 18 and ACT Math 22 and has submitted official SAT or ACT transcripts to the Admissions Office, or
- has achieved CFCC’s cut-off scores for desired curriculum program by submitting official ASSET, COMPASS or Accuplacer scores taken within the last five years, or
- has earned developmental course credit, with a “C” or better, at a school in the North Carolina Community College System. Students will need to consult with counselors. Students and prospective students may take the placement test twice (2 times) in twelve (12) consecutive months (one initial test and one retest).

5. MEDICAL EXAMINATIONS A medical history is required for specific program admission or completion. Students are notified of this requirement as applicable to their programs of study. Selected programs within the college may require drug screening prior to final acceptance into the program. Contact Counseling for further information.

All new students are encouraged to take advantage of these programs to maximize their opportunities at CFCC.

myCFCC
myCFCC is a web-based portal that links all aspects of campus life to create a community environment. It provides services such as e-mail, campus announcements, message boards, calendars, and discussion groups. Accounts are created upon acceptance to the College. Students are encouraged to check myCFCC on a regular basis to receive important college information. A link to myCFCC is on the College’s website at www.cfcc.edu.

WebAdvisor
WebAdvisor is another web-based portal that gives students access to class schedules, on-line registration, grades, address changes, and graduation progress. A link to WebAdvisor is on the College’s website at www.cfcc.edu.

Counseling
Confidential academic, personal, and career counseling services are provided on an ongoing basis to all students. The counseling staff is available Monday through Friday on both campuses. Please refer to our website for specific hours based on campus location. Summer hours may vary. Students are seen on a walk-in basis or appointments may be made by calling (910)
362-7017 (Wilmington Campus) or (910) 362-7523 (North Campus).

The professional counseling staff is experienced in assisting students in developing skills and attitudes needed to deal effectively with their academic environment.

Students who are uncertain in selecting their major course of study or who are experiencing academic difficulty are encouraged to seek the assistance of a counselor. Students with personal concerns that may interfere with their academic success are also urged to seek guidance from the counseling staff.

When appropriate, the counseling staff may make (with the student’s permission) referrals to community resources/agencies.

Disability Support Services
Cape Fear Community College and all employees shall operate programs, activities, and services to ensure that no otherwise qualified individuals with disabilities shall be excluded from participating in, be denied the benefit of, or be subjected to discrimination under any such program, activity, or service solely by reason of their disabilities. Disability Support Services provides numerous services that assist students in reaching their academic goals. Assistance may include services such as registration assistance, academic counseling, student advocacy, interpreters for the deaf or hard-of-hearing, academic aides, assistive technology and other reasonable accommodations. To be eligible for Disability Support Services, students must provide professional medical, psychological, and/or educational documentation of their disabilities, including associated functional limitations, to the Disability Support Services’ staff. If classroom adaptations, interpreters, or academic aides are necessary to participate in class, advanced notice of 4 weeks is required to coordinate such services.

Career and Testing Services
Career counseling is available through the Office of Career and Testing Services. Students are assisted with career decision-making, employment trends, and educational requirements.

Job placement assistance is also available to students and graduates. Career Services provides on-line job listings through CFCC Career Connection. This on-line job bank gives students, graduates, and employers an opportunity to connect. The Employment Security Commission’s (ESC) on-line job listing is also available to students and graduates.

Placement Testing
All applicants to degree, diploma, and certain certificate programs are required to have valid placement test scores on file prior to being accepted at CFCC. The assessment is not an entrance examination. The primary purpose of placement examinations is to determine the individual’s skill level and readiness. Assessment results will be used to determine the need, if any, for developmental placement. Faculty advisors will also use the results in planning students’ programs and classes.

Placement assessments are administered in the following areas: English and Math. All placement scores are valid for five years from date of examination. An admission application must be submitted prior to testing to ensure that results are properly posted.

Accuplacer Test
The Accuplacer is an un-timed computer-based type assessment. The test is divided into two sections: English and Math. Currently there is no fee for the test.

Applicants/students need to bring a #2 pencil, a picture ID, and know their CFCC Student ID Number and CFCC’s program of study. The testing room opens fifteen (15) minutes prior to testing. Parking for testers at the Wilmington Campus is available in the student parking lot located next to the Schwartz Center on North Front Street.

If alternative accommodations are necessary because of a diagnosed disability, requests for approval, assistance, and scheduling must be arranged through CFCC’s Coordinator of Disability Services.

A schedule of dates/times of the Placement Tests can be obtained from CFCC’s website: http://cfcc.edu/testing/.

Retest Policy
Applicants/students can take the placement test only twice in (12) twelve consecutive months. It is recommended that a student retest after successfully completing a developmental course in the subject area.

High School Equivalency Exam Testing
The General Education Development (GED®) diploma is administered at CFCC. Testing is administered via the computer. See Basic Skills Division.

Retention and Graduation Rate Information
Anyone wishing to obtain information about first-time students’ rate of persistence and/or graduation rates should contact the Office of the Director of Enrollment Management.

Cape Fear Community College measures and reports retention, graduation and transfer rates, along with seven other institutional performance standards, on an annual basis and in accordance with definitions and standards established by the North Carolina State Board of Community Colleges. Establishment of these common performance measures of institutional effectiveness, along with definitions and standards for each, are the result of a mandate by the N.C. General Assembly to review past performance and define standards of performance to ensure quality and effectiveness of programs and services in all of the 58 community colleges. Please refer to page “vi” of this catalog for CFCC’s performance report on these measures. Historical data and additional details may be viewed at http://cfcc.edu/ie/.

Developmental Studies
To help ensure student success, the college offers developmental courses to students who need help in the basic skills: mathematics, reading, and writing. These courses are required for those students who have been identified by Career and Testing as needing enhancement in these skills.
Placement Test Advising Guide

Applicants entering vocational/technical and college transfer courses must begin their English sequence with the course corresponding to their score levels on the following placement tests. When using placement scores for English, you must look at both Writing and Reading scores.

**ENGLISH PLACEMENT**

Testing is not required with SAT Reading 500 or Writing 500

OR

ACT Reading 22 or English 18

OR

Transfer credit of ENG 111 or its equivalent with a grade of “C” or better.

Your English Placement is determined by Adding Reading and Sentence Skills Together.

Register for your English class based on the guide below.

(A score of 7 or higher on DMA-060 will also award credits for DMA-070 and DMA-080)

MAT-101* & MAT-110 = A score of 7 on DMA-010 through DMA-030 Needed
MAT-120* & MAT-140* & MAT-141* = A score of 7 on DMA-010 through DMA-040 Needed
MAT-115* & MAT-143 & MAT-152 & MAT-155* = 7 on DMA-010 through DMA-050 Needed
MAT-121 = A score of 7 on DMA-010 through DMA-060 Needed
MAT-171 & MAT-175* = A score of 7 on DMA-010 through DMA-080 Needed

*Students who need these courses should complete them during the 2014/15 program year since they will no longer be offered after that time period.

**Math Courses for Registration**

DMS-001 = If you need 1 DMA
DMS-002 = If you need 2 or more DMA’s

Register for the maximum number of credits (DMS course) in each semester until you have successfully completed all of the DMA courses that are required on your Program Evaluation.

All scores are valid for 5 years.
Developmental courses count toward registered credits as it applies to financial aid, veterans benefits, and enrollment status. Developmental courses do not count attempted or earned hours, nor do they count in a student's academic GPA. All developmental courses are given grades of PA, PB, PC, or R (Repeat).

CFCC will recognize developmental courses completed with an equivalent grade of “C” or above at other North Carolina accredited institutions. Counselors will mail students a transfer credit slip following an evaluation of the coursework. The transfer evaluation will be used for class placement by the advisor.

Below is a selected list of transferable courses for students who are deficient in reading (a CPT score less than 80). Some courses have additional prerequisites and corequisites (listed within parentheses), and students must comply with them. Reminder: Students may also take math courses if they (students) comply with the prerequisites and the corequisites.

The Learning Lab
The Learning Lab provides free educational support and access to computers to promote student success and academic independence.

Masters-level facilitators and experienced student tutors cater to individual learning styles to help students develop self-reliance and build self-esteem.

The Lab provides the following:

1. Free tutorial assistance for...
   • CFCC academic, curriculum, and online courses, ESL, Accuplacer test preparation, Adult Basic Skills, and GED/Adult High School readiness.
   • basic skills in reading, writing, and grammar.
   • all math classes from the basics to advanced calculus.
   • courses such as anatomy & physiology, biology, chemistry, physics, and all languages.
2. Guidance and materials to prepare for the PSB Test for Health Science careers.
3. Free access to over 100 computers for students to complete assignments and type papers.
4. Supplemental Instruction that assists students in traditionally challenging courses through facilitated group sessions. These courses may include BIO, CHM, PHY, MSC, and other courses as needed.
5. Assistance that helps students develop computer skills applicable to schoolwork and their future career.
6. Academic skill workshops on Time Management/Study Skills, Note and Test Taking Skills, Plagiarism, and Resume and Cover Letter Writing.

Learning Lab - Wilmington Campus
Room L-218 • Health Sciences/Learning Resources Center

Hours: Monday-Thursday from 8:00 a.m. to 8:45 p.m.
Friday from 8:00 a.m. to 5:00 p.m.
Saturday from 10:00 a.m. to 2:00 p.m.
(Hours are subject to change)

Learning Lab - North Campus
Room NA-1131 • Learning Resource Center

Hours: Monday-Thursday from 8:00 a.m. to 6:00 p.m.
Friday from 8:00 a.m. to 3:00 p.m.
Saturday-Closed
(Hours are subject to change)

To request more information about the Learning Lab and special summer hours, students may call (910) 362-7663 or (910) 362-7476

If a student is injured or becomes ill while on campus, the Student Services office should be contacted. Should illness or injury occur after 5:00 p.m., the Evening Coordinator should be contacted at 362-7100.

Learning Resource Centers (LRC)
The Learning Resource Centers include the libraries, media center, and TV studio. The Wilmington Campus LRC is located on the second floor of the Health Sciences/LRC building. The North Campus LRC is located on the first floor of the McKeithan Center. Additional information about the LRC is available at our website: http://cfcc.edu/lrc/.

Library
The Wilmington and North Campus libraries provide staff, services, resources, and an environment conducive to research and study. The libraries have approximately 54,000 books, 500 current print periodical subscriptions, and over 16,000 audiovisual items. A wide range of more than 100+ electronic resources, including NC LIVE, is accessible online through the libraries. These e-resources contain thousands of full-text articles from more than 16,000 newspapers, journals, magazines, and encyclopedias and access to 30,000+ online books. Students may use the libraries’ 60 computers or their own computers to access these resources via the Internet. Students can also access the Surf CFCC wireless network from the libraries. A current CFCC ID is required to check out library materials. For individual reference or research assistance or to schedule an instruction session or tour for a class, contact the Reference Desk at (910) 362-7034 or via email: lrc@cfcc.edu. Library staff and resources will assist you with reference questions, help you meet your course objectives, supplement classroom assignments, and enable you to pursue topics of interest.

Media Center
The media center, located in the LRC, has equipment and personnel available to assist faculty, staff, and students in the creation of classroom aids, including media production, signage, and dubbing. Media center staff are also available to assist faculty and students with the operation of classroom multimedia equipment.

TV Studio
The TV studio provides students with a laboratory setting for learning the tools and tasks needed to produce television content. The studio also produces programming for broadcast on The Learning Network and creates promotional videos highlighting CFCC students and courses of study.

Continuing Education Services
The Continuing Education Department promotes the concept of lifelong learning by providing meaningful educational experiences that will help adults meet occupational and professional goals and fulfill social and personal needs. Non-credit classes and seminars offered will allow adults to achieve their full potential in our ever-changing world of knowledge and skills by preparing for employment to upgrade their skills or learn a new skill.

Health Services
Cape Fear Community College does not maintain health facilities or medical services. The responsibility for medical services rests with the student. In the case of illness or injury on campus, Emergency Medical Services may be called to assist individuals.

First aid kits are available in labs and the Student Services office.
Human Resources Development Program
The Human Resources Development (HRD) program is designed for unemployed or underemployed individuals who wish to become more marketable by upgrading their employability skills. Classes are year round and are free for those who qualify. See Corporate and Continuing Education Division for further details.

Basic Skills Division
The Basic Skills Division offers literacy classes for adults 16 years of age or older, who wish to begin, continue, or expand their educational skills: All classes are free and are offered at convenient times and locations. Anyone under 18 years of age must have school and parental release forms. See Extended Services-Continuing Education Department for further details.

Registration Information
Registration is the term used for enrolling in classes. Advisors and counselors provide information which will assist students in choosing required classes, completing the registration form, securing a space in class and paying tuition fees.

Semester System
The academic year is divided into two semesters and summer sessions. The Fall and Spring semesters offers sixteen (16) weeks of instruction and two eight (8) week mini sessions. The Summer terms are provided either in a ten (10) week session or two five (5) week sessions. Consult the Schedule of Classes for specific scheduling information.

Semester Hour Credit
Each course listed in the catalog and class schedule is followed by a notation on the number of semester hours it earns. Normally, the number of semester hours earned is based on the number of class, laboratory or shop hours spent under the supervision of the course instructor per week for the semester. Usually one semester hour credit is given for each lecture hour of class per semester. Usually one class, laboratory or shop hours spent under the supervision of the course instructor per week for the semester. (A class hour is usually defined as 50 minutes of instruction.) Exceptions may be made in cases where specific classification is not feasible.

Course Load
Students enrolled in the Fall and Spring semesters for 12 or more credit hours are designated as full-time students. Students taking 11 or fewer credits during a semester are considered part-time. Students enrolled in the Summer Session for 9 credit hours or more are designated as full-time students for insurance purposes. Students receiving Financial Aid benefits must be enrolled for 12 or more credit hours each semester to receive full benefits. Veteran’s benefits for the Summer-full time is seven hours (7) hours for the 10 week session or four (4) hours each five week session. Students who are placed on academic probation or suspension may be required to take a reduced course load.

Maximum course loads for which students may enroll are as follows:
- Fall and/or Spring Semester(s) - Eighteen (18) credit hours except when program requirements determine otherwise.
- Summer Term - Thirteen (13) credit hours except when program requirements determine otherwise.

Any exception must be approved by the Vice President for Student Services.

Procedures for Registering for Classes
(General Registration)
Step 1. Advisement & Scheduling - Faculty advise students concerning course schedule and sign registration cards.
Step 2. Schedule Input - Student searches and registers for classes using WebAdvisor.
Step 3. Schedule and Tuition: Student prints schedule grid and tuition bill using WebAdvisor.
Step 4. Payment of Tuition Fees - WebAdvisor or Business Office - All students pay tuition and fees.

Note: Students receiving Financial Aid, Veterans benefits or financial sponsorship must complete steps 1-4.

WebAdvisor
(Online Registration at Cape Fear)
WebAdvisor is online registration for currently enrolled students to select and early register for classes for the following semester. Currently enrolled students are assigned registration priorities based on their major and number of completed credit hours. Registration information is emailed to students’ CFCC email account.

Auditing Courses
Students who wish to audit courses must register for the audit by following the regular registration procedures and indicating in writing on an audit form which course(s) they are auditing. Auditing students must meet all course pre-requisites. The audit form must be signed by the instructor and turned into the Registrar’s office during the first week of the semester. Auditing students receive no credit and are not required to participate in class discussion or take tests. Fees for audit courses are the same as those taken for credit. Changes from audit to credit or credit to audit may only be done during registration and Final Schedule Adjustment Day. Students should be aware that Financial Aid and Veteran benefits do not pay for audit courses. Audit courses do not transfer.

Withdrawal
Students desiring to withdraw from classes must contact the Student Services Office to obtain the necessary forms and procedures for official withdrawal. Online Learning students may go to http://cfcc.edu/online for more information. Students who have not attended at least once by the 10 percent date of the class will be dropped by the instructor as “no show” and assigned a non-punitive transcript grade of “NS.” No tuition and fee adjustments will be made.
Academic Information

Student Advisement
Cape Fear Community College views student advisement as an important, on-going process. Each degree/certificate seeking student is assigned a faculty advisor who assists the student in selecting and scheduling appropriate classes to fulfill his/her educational requirements. Non-degree students are assigned a counselor as their advisor who assist in selecting and scheduling appropriate classes.

Students are strongly encouraged to meet with their assigned advisor each semester/session for assistance in scheduling classes and completing the registration form. Advisors’ office hours are posted on their office doors.

Students must accept the responsibility of familiarizing themselves with specific course, prerequisite, corequisite, and program requirements.

While advising is an on-going process, specific times are designated prior to each registration period for advising.

Grading and Grade Point Averages
Grading is done by the traditional method of “A” through “D” along with negative categories such as “F” (Failure), and “WF” (Withdraw Failing). Grades are assigned a numerical value when determining a student’s Grade Point Average (GPA).

Grading System
Quality Points

<table>

</tbody>
</table>

Grading Scale
The College grading scale is:

- A = 92 - 100
- B = 84 - 91
- C = 76 - 83
- D = 68 - 75
- F = 0 - 67

Notes:
- Please refer to the Academic Calendar for the withdrawal deadlines for each semester.
- Financial Aid students who stop attending class and receive a grade of “WP,” “WF,” or “W” may be required to repay a percentage of their Federal Aid back to the Department of Education. Go to http://cfcc.edu/finaid/ for more information about financial rules and policies.

Curriculum Courses
Students who officially withdraw from a course(s) within the first 30 percent of class hours will receive a grade of “W,” which will not be computed in the grade-point average (GPA).

Students who withdraw from a course(s) based on course performance between the 30 and 80 percent point of class hours must receive a grade of “WP” (Withdraw Passing) or “WF” (Withdraw Failing) as determined by the course instructor. A “WP” will not be computed in the GPA whereas a “WF” will be computed as a failing grade.

Students who stop attending a class without officially withdrawing will receive a grade of “F,” which is computed as a failing grade.

Students who withdraw after the 80 percent of class hours must obtain permission in writing from their instructor and the Department Chair. Permission will be granted for extenuating circumstances only. Documentation is required. No withdrawals may be requested during the last week of the semester.

Developmental Courses (Courses with numbers less than 100: DRE 096, DRE 097, DRE 098, DRE 099, DMS 001, DMS 002, DMS 003, DMS 004, DMA 010-080.)

Students who withdraw from a developmental course(s) within the 80 percent date of the semester will receive a grade of “W.” Students will not be allowed to withdraw from a course(s) after the 80 percent date of the semester. After the 80 percent date, final grades will be assigned based on the grade earned. Grades in developmental classes are not computed in the grade-point average.

While students are expected to initiate all withdrawals, instructors will withdraw a student and assign a grade of “W” when the student has exceeded the allowable absences for that course through the 80 percent date of the semester. Instructors may not initiate withdrawals for any other reasons.

Notes:
- Please refer to the Academic Calendar for the withdrawal deadlines for each semester.
- Financial Aid students who stop attending class and receive a grade of “WP,” “WF,” or “W” may be required to repay a percentage of their Federal Aid back to the Department of Education. Go to http://cfcc.edu/finaid/ for more information about financial rules and policies.
Translating Course Grades into GPA

By taking the number of semester hours assigned to a course and multiplying them by the value of the grade, you determine the grade points for each course attempted. Example: If you take five courses that are assigned a total of 18 semester hours, you may determine your GPA in the following manner:

<table>
<thead>
<tr>
<th>Course</th>
<th>Grade</th>
<th>Semester Hours Attempted</th>
<th>Times Grade Value</th>
<th>Equals Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>B</td>
<td>2</td>
<td>X 3</td>
<td>= 6</td>
</tr>
<tr>
<td>2</td>
<td>A</td>
<td>6</td>
<td>X 4</td>
<td>= 24</td>
</tr>
<tr>
<td>3</td>
<td>C</td>
<td>4</td>
<td>X 2</td>
<td>= 8</td>
</tr>
<tr>
<td>4</td>
<td>B</td>
<td>3</td>
<td>X 3</td>
<td>= 9</td>
</tr>
<tr>
<td>5</td>
<td>F</td>
<td>3</td>
<td>X 0</td>
<td>= 0</td>
</tr>
<tr>
<td>6</td>
<td>WP</td>
<td>0</td>
<td>X 0</td>
<td>= 0</td>
</tr>
<tr>
<td><strong>TOTALS</strong></td>
<td></td>
<td><strong>18</strong></td>
<td></td>
<td><strong>47</strong></td>
</tr>
</tbody>
</table>

Divide the total number of hours attempted into the total quality points and that will give you your GPA; in this case 2.61 is the GPA

Attendance Policy

College instruction is designed for students to learn by way of class attendance, and regular attendance is a key to academic success. Attendance is based on class meetings and calculated from the first class meeting, not based on when the student enrolls in the class. Students are expected to punctually attend all class sessions in the courses for which they are registered. Late arrivals and/or early departures may count toward total absences in classes.

Students who have not attended at least once by the 10 percent date of the class will be dropped by the instructor as a “No Show.” No tuition or fee adjustments will be made. For example: A student enrolls in a three credit hour class totaling three meeting hours per week. The class meets 16 weeks for a total of 48 hours during the semester. Ten percent of this class would be 4.8 hours rounded to 5. Therefore, the fifth class meeting would be the 10 percent point of the class.

Within their respective departmental guidelines, instructors are responsible for stating their own course attendance and tardiness requirements on course syllabi distributed at the beginning of the academic term. It is the student’s responsibility to know and understand the attendance requirements for each instructor and to understand how attendance in class might affect his or her final grade. Regardless of how attendance is used in grading, faculty are required to keep a timely record of attendance for each student through the end of the semester using a college approved record keeping software.

Attendance in online (Internet and Hybrid) courses is measured not only by completion of an initial log-in assignment (first 10% of the semester) but also by completion of the required coursework and/or online participation, as defined by the instructor on the course syllabus. Hybrid courses, students MUST meet on the required meeting dates specified by the instructor (first class meeting, lab, etc.). See www.cfcc.edu for course information.

Effective fall 2010, students will be allowed two days of excused absence each academic year for religious observances required by the faith of the student. These excused absences will be included in the twenty (20%) percent of allowable clock hour absences. Students are required to provide written notice of the request for an excused absence by completing the Religious Observance Absence form available in Student Services. The completed form must be submitted to the Vice President for Student Services or his/her designee a minimum of ten (10) school days prior to the religious observance. The Vice President for Student Services or his/her designee will notify the instructor within three (3) school days of receiving the request. Students will be given the opportunity to make up any tests or other work missed due to the excused absence and should work with their instructors in advance of the excused absence to delineate how to make up the missed coursework (N.C.G.S. 115D-5).

Student Veteran Attendance Policy

CFCC recognizes the unique situations student veterans sometimes face which can affect their attendance. If a student veteran receives orders for unexpected short-term deployment or training, or for medical appointments, he/she may receive absences totaling 30 percent of the total clock hours of a class. The 30 percent includes a combination of the 20 percent allowed by the college policy (unexcused absences) plus an extra 10 percent (excused absences). In most cases, absences in excess of 30 percent would result in the student receiving a grade of “W” for the course.

A student seeking an excused absence should first present orders/documented to the CFCC Veteran Affairs Coordinator, to be shared with the respective Department Chair and the student’s instructor.

The college acknowledges that some classes, such as biology and clinicals in allied health programs, have unique content; it may not be possible for a student to receive an extension on the assignments in these courses.

We also recognize that there will be unique cases that will require the exercise of sound judgment. Instructors are encouraged to discuss these cases with their Department Chair and the Veterans Affairs Coordinator. Our collective goal is to assist student veterans in completing their course of study.

College Closings or Delays

In the event of inclement weather, Cape Fear Community College may close or delay classes depending on the weather forecast and local conditions. All official college closings and delays will be posted on the college website at www.cfcc.edu, myCFCC online portal, the CFCC Emergency Information

Inclement Weather
While the College makes every effort to provide a safe environment on campus, the College does not take responsibility for student safety while traveling to and from campus. During periods of inclement or hazardous weather, students must use their best judgment when deciding to come to class. College officials do not expect students to take extreme risks to their personal safety to attend class. However, if a student chooses not to come to class due to inclement weather when the college is open, the student will be counted as absent in accordance with the course syllabus (see the Attendance Policy on page 17).

On-Campus Groups and Individuals
On-campus groups and individuals may reserve designated outdoor space for use in support of their activities. Arrangements for the use of outdoor space shall comply with College procedures and CFCC Club and Organizations procedures.

Off-Campus Groups and Individuals
General Provisions
Individual and/or groups will be granted access to designated areas when notice has been provided consistent with the CFCC Space Request Form.

Access for the requested event will not be granted if the event conflicts with a previously scheduled event or if the designated area is temporarily inaccessible or unsafe due to construction, act of God, or similar cause.

Access is granted on a first-come, first-served, space-available basis.

Gross, multiple, or continued violation of this solicitation procedure will result in the soliciting party’s loss or suspension of future solicitation privileges on property which is owned, leased, or operated under the jurisdiction of the College.

Notice Requirement
The requesting individual, organization, agency or group must complete the CFCC Space Request Form and obtain the approval of the Vice President for Student Services at least ten (10) business days in advance of the event.

Approved individual/groups must check in with the Vice President for Student Services and/or designee upon arriving on the campus on the day of the event.

Information Requirement
When completing the Space Request Form, all individuals or groups must provide the names of the persons who intend to speak on campus, the anticipated size of the group that will visit campus, and the name, address and phone number of a responsible contact person who will be present on campus during the event.

Disclosure of this information is required in order to allow proper planning and will not be grounds for denying or abridging the right to engage in expressive activities in the designated area.

Designated Areas
The following areas are designated for expressive activities by off-campus groups and individuals:

Wilmington Campus: The grassy area in front of the Burnett (W) Building on Water Street.

North Campus: The covered brick patio between the Eric B. McKeithan Center and the soccer field.

Scheduling Limitations
At the beginning of the academic year, the Vice President for Student Services shall establish a schedule of one day per week for expressive activities by off-campus groups and individuals. These areas will be made available to any off-campus group or individual for up to four hours per day between 11:00 a.m. and 3:00 p.m.

In order to promote opportunities for diverse speakers, an individual and/or group may not reserve or submit an application more than twice per academic year.

Noise Restrictions
Sound amplification is not permitted. Noise levels that cause, or are likely to cause, a disruption to the learning environment or the normal administration or operation of the College are prohibited.

Grounds for Denial of Access or Removal from CFCC Property

- Failing to comply with the procedures set forth.
- Communicating “fighting words” as defined in case law.
- Advocating illegal conduct that is directed to inciting or producing imminent lawless action and is likely to incite or produce such action.
- Touching, striking, or impeding the progress of pedestrians, except for incidental or accidental contact, or contact initiated by a pedestrian.
- Photographing, audio recording, or videotaping any faculty, staff or student without first obtaining written permission from the person to be photographed, audio recorded or videotaped.
- Engaging in disruptive or disorderly conduct that is reasonably likely to cause a material disruption to the learning environment or the normal administration or operation of the College.
- Damaging, destroying or stealing College or private property on campus.
- Possessing or using firearms, explosives, or dangerous weapons or substances.
- Obstructing the free flow of pedestrian or vehicular traffic.
Student Participation in CFCC Activities
Student success at Cape Fear Community College is based upon academic excellence. Accordingly, students should attempt to attend all scheduled class and laboratory sessions. Participation in extra-curricular activities is also important to the total education and personal development of CFCC students. Occasionally, a student may be required to miss a class session in order to participate in college-sponsored activities such as athletics, Phi Theta Kappa Honor Society, CFCC Ambassadors, Student Government Association, program conferences and competitions, and other activities approved by the Director of Athletics/Student Activities.

College officials sponsoring such approved student activities are expected to provide advance notice to faculty of anticipated absences and the list of students who will be participating. In addition, participating students must also inform their instructors in advance of such anticipated absences and are expected to make advance arrangements for making up all missed assignments. In such cases, class time missed will not usually be counted as absences provided participating students are otherwise in good academic standing.

If a faculty member believes that missing class due to a student activity is detrimental to the academic success of a specific student, the faculty member may request that the Vice President for Student Services (or his/her designee) review that student’s overall academic and attendance records to determine if the student’s absence warrants exemption from the College's regular attendance policy.

Students who disagree with the Vice President’s decision may appeal to CFCC’s Judicial Board according to the College’s Grievance Procedure.

Final Grades
Final grades will be available through WebAdvisor to students after the end of each academic session. Course grades, along with semester and cumulative grade point average (GPA), will be displayed. Grade reports are no longer printed and mailed to students.

Incomplete Grades
An incomplete (I) will be given only when circumstances justify additional time to complete the course. Students must contact the instructor to request an Incomplete Grade. When an incomplete is granted, the course requirements must be completed within six weeks of the beginning date of the next academic session. Incompletes (I) not finalized within the appropriate time frame will convert to an “F”. Exceptions may be made by the Vice President for Student Services.

Credit by Proficiency
For selected courses, students may request credit by proficiency examination for previous experience or training. The student must be currently enrolled at CFCC and must not have enrolled in the course prior to taking the proficiency exam. The student must make written application to the Registrar and the department chair. Students may challenge a course only once. Students successfully passing a proficiency exam will receive credit for the course as a “CR” (credit for record). Credit by Proficiency does not usually transfer. CLEP and AP exams (see below) may be used in lieu of proficiency exams.

CLEP-College Level Examination Program
The College-Level Examination Program® or CLEP provides students of any age with the opportunity to demonstrate college-level achievement through a program of exams in undergraduate college courses.

CFCC may grant credit in appropriate courses on the basis of CLEP examination results. The following guide describes the cutoff scores and credits that may be earned through the CLEP. Credit may be awarded for other CLEP tests not listed. Students should submit official CLEP scores and meet with a counselor in Student Services prior to registration for possible credit and proper course placement.

DSST (DANTES Subject Standardized Tests)

Students may receive credit by examination for achieving acceptable scores on the DSST (DANTES Subject Standardized Tests). Students should submit official DSST scores prior to registration for possible credit and proper course placement.

Educational Partnerships

Cape Fear Community College and its partners work together to provide a variety of academic, cultural, and work-based experiences designed to enhance the educational experience of students and improve the quality of life for local residents.

Partnerships with Business and Industry

Cooperative Education

CFCC partners with local business and industry to offer students on-the-job training opportunities through Cooperative Education. Participating students may earn college credit using approved work experience(s) specifically related to their educational program goals. Cooperative Education Work Experience classes include COE 111, COE 112, COE 121, and COE 131.

Employers and organizations interested in having a cooperative education student are urged to contact the educational partnerships liaison at 910.362.7115 and see our web page: http://cfcc.edu/wbl/.

Student Enrollment Criteria: To qualify for one of these classes, students must meet the following criteria:

- Meet the age requirement of 18 years old.
- Have a minimum cumulative GPA of 2.0.
- Be enrolled in a program of study that offers cooperative education work experience courses as an option.
- Have completed at least nine (9) semester hours in the appropriate program of study with at least three (3) hours in major courses.

Please Note: Individual programs may have additional requirements for enrolling in a cooperative education work experience course.

Registration Process: To register for a cooperative education work experience course, a student must submit an application directly to the cooperative education instructor or the educational partnerships liaison (McLeod or S Building, 200E). After the college has approved the application, the student may register using WebAdvisor or through his/her academic advisor during the registration period. A cooperative education application is required each semester the student plans to enroll. The application is available online (http://cfcc.edu/wbl/).

Please note: Cooperative education courses may not transfer to four-year institutions. Students should always check with the receiving college or university to verify transferability of any course. The college reserves the right to limit cooperative education work experiences based on the appropriateness, applicability, and location of the position.

For more information, please see the Cooperative Education Web page: http://cfcc.edu/wbl/ or contact the educational partnerships liaison at 910.362.7115 or your lead instructor (AAS programs only).

Partnerships with Community Agencies

The North Carolina Career and College Promise Program: College Opportunities for High School Students

CFCC partners with high schools to offer high school students the opportunity to enroll in college classes early in order to earn both high school and college credit upon successful completion of CFCC courses. For more information, please...
Service Learning
CFCC partners with local community service-based agencies to provide students enrolled in select classes the opportunity to complete service learning activities to fulfill requirements for a course project. The goal of service learning is to integrate into an assignment meaningful community service activities that help students better understand the course content. These activities should:

- Provide opportunity to apply ideas and theories learned in class to a reflective, service-based experience;
- Help students become more interconnected with the community through their contributions.

For more information about service learning projects at CFCC, please see our web page: http://cfcc.edu/ServiceLearning.

History Teaching Alliance
The History Teaching Alliance (HTA), a partnership between CFCC, UNC-Wilmington, high schools, and local public historical sites and organizations, coordinates events designed to appeal to the intellectual curiosity of history educators and students. For more information about the HTA, please see our Web page: http://cfcc.edu/blogs/hta/.

Partnerships with Four-Year Institutions:
CFCC partners with public and private North Carolina four-year colleges and universities to provide a clear pathway from associate degree coursework to baccalaureate studies.

Statewide Comprehensive Articulation Agreements: The following transfer articulation agreements between North Carolina community colleges and North Carolina colleges and universities provide qualifying AA, AS, and AFA students the opportunity to transfer their coursework to a four-year college or university in North Carolina:

- The North Carolina Comprehensive Articulation Agreement between North Carolina community colleges and North Carolina public universities.
- The Independent Comprehensive Articulation Agreement between North Carolina community colleges and 24 North Carolina independent colleges and universities.
- Bilateral Agreements: CFCC and select UNC institutions have bilateral agreements that provide qualifying graduates of AA, AS, and some AAS programs a pathway for transferring coursework into a four-year degree.

Select AAS programs:
- Qualifying graduates have the opportunity to transfer to UNC-Pembroke and earn a Bachelor’s of Interdisciplinary Studies through online learning courses or face-to-face courses that UNC-Pembroke offers on the campus of CFCC.

Independent Study
CFCC provides the opportunity for students to pursue, on an individual basis, subjects in the students’ major area of study. Independent study is not intended, nor will it be allowed, as a substitute for existing courses as listed in the schedule of classes. If the student is preparing to complete the last full semester of study prior to graduation and the college is unable to offer a major course required for a degree, independent study may be considered. In an independent study arrangement, the student first seeks approval from the respective department chair who then works to identify an instructor to supervise the study. The chair will contact the student to let them know if there is an instructor available to supervise the study. The student then meets with the instructor. The instructor provides for a course outline and discusses course requirements and expectations with the student. The instructor then notifies the appropriate chair who authorizes scheduling of the course. The number of credits may vary. Current tuition rates apply, as do standard grading policies. Independent study opportunities are for students who:

- are currently enrolled in classes at CFCC
- have earned a 2.0 or higher cumulative GPA
- have completed 12 credits in their major program of study
- have met the pre-requisites and/or co requisites of the course proposed for independent study

Independent study courses are subject to the consent of the department chair and the availability of qualified instructors. Courses are run by semester and all work must be completed within the semester dates. Only one (1) course taken as independent study may be applied toward an associate degree, diploma, or certificate.
North Carolina High School to Community College Articulation Agreement

Through an agreement between the North Carolina State Department of Public Instruction and the North Carolina Community College System, high school graduates are eligible to receive CFCC credits for certain courses upon presentation and evaluation of a high school transcript. Courses eligible for CFCC credit can be found in the articulation agreement. Copies of the agreement are located in the offices of high school counselors.

Award of credit will only be given for courses that are required in a student’s CFCC program of study. Criteria to award college credit:

1. Students must enroll at the community college within two years of their high school graduation date.
2. A grade of “B” or higher is required for the course.
3. A raw score of 80 or higher is required on the standardized VoCATS post-assessment score report.

Any student wishing to receive credit should submit both an official high school transcript and VoCATS post-assessment score report. A CFCC counselor should then be contacted for transcript evaluation.

Experiential Learning

CFCC does not award direct credit for previous experience or training. Proficiency exams or CLEP exams may be used as a means of receiving credit for prior knowledge.

Academic Program of Study

A Program of Study is a specific or specialized academic field. Students seeking a degree, diploma or certificate are enrolled in a program of study. All programs of study/curriculum programs can be found on pages 54-55.

Academic Program Change

Students who desire to change from one academic program to another must see a Counselor to complete a Change of Program form. The counselor will evaluate program requirements and prerequisites and advise the student of any academic deficiencies. Students should also request re-evaluation of their transfer credits including previously earned CFCC credits. Students should complete this process prior to any registration period.

Course Repeat Policy

Courses that are repeated fall into three different categories:

1. Courses with an earned grade of “C” or better may be repeated two times.
2. Courses with an earned grade of “D,” “F,” “W,” “WP” or “WF” may be repeated until successfully completed.
3. Audit courses may be repeated a maximum of two times.

When a course has been repeated, the higher grade will be used in the Grade Point Average (GPA) calculation. Lower grades will be removed from GPA calculation; however, these grades will continue to appear on the academic transcript.

Students who receive Veteran’s Benefits or Financial Aid should be advised that they may not receive funds for repeating courses which they have already passed.

Also, students who have received a degree from CFCC should be advised that the policy will not apply to courses which were taken to fulfill previous graduation requirements. A final student GPA is computed at the time of graduation, and this GPA may not be recalculated as courses are repeated.

The above Course Repeat Policy became effective Fall quarter, 1991 and revised Fall 2004.

Academic Forgiveness

Students may request, in writing, to the Director of Enrollment Management to have previous credits exempt from calculation in their cumulative grade point averages. Academic forgiveness is designed to assist returning students with low grades to have a fresh start upon re-enrolling after having at least a three year period of non-enrollment at CFCC. Prior to evaluation for Academic Forgiveness, the student must be re-admitted to the college, register, and successfully complete the first semester of course work at the 100 level or above with a GPA of 2.0. Exceptions may be made by the Vice President for Student Services.

Grades which may be disregarded from students’ grade point averages are “F”, “WF”, and “NC”.

Requests for academic forgiveness must specify (1) the period of initial enrollment, (2) the courses and grades considered for forgiveness, and (3) the period of non-enrollment.

Students granted academic forgiveness will have their cumulative grade point averages recalculated. While the forgiven grades will continue to appear on the official transcript, they will be marked as forgiven.

Academic forgiveness will be granted only one time.

Grades that are included in academic forgiveness are not exempt from academic progress relating to Financial Aid and VA educational benefits.

Academic Forgiveness has no bearing on any other institution or how they calculate grade point averages.

Grade Appeal Procedure

The purpose of the Student Grade Appeal Procedure is to provide an orderly and equitable process for resolving differences between students and faculty relating to grading in the classroom where the student believes he/she is being treated unfairly or arbitrarily.

Procedure

Step 1. The student with the conflict must first discuss the issue with the class instructor to attempt to resolve the difference. Every reasonable effort should be made to resolve the matter
at Step 1. This initial conference must occur within fifteen (15) week days of the beginning of the subsequent school term. The instructor must notify his/her Department Chair of the grade appeal and provide written documentation.

Step 2. If a satisfactory resolution is not reached at Step 1, the student may contact the Department Chair seeking resolution. The student must contact the chair within ten (10) weekdays of the conference with the instructor. The Department Chair will seek equitable resolution by conferring with both the student and the instructor.

Step 3. If the student continues to be dissatisfied, he/she may, within five (5) weekdays of the date of notification of Step 2, file a written notice with the instructional dean responsible for the course in question (Dean of Arts & Sciences or Dean of Technical/Vocational Education). The Dean will review and evaluate the conflict to determine what action, if any, should be taken to resolve the conflict. Written notification of that determination will be sent to the student within fifteen (15) weekdays of receipt of student’s written notice.

Step 4. If the student is dissatisfied with the outcome of Step 3, he/she may file a written grade appeal with the Vice President for Student Services within ten (10) weekdays of receipt of the written appeal, the Vice President will convene the Academic Subcommittee of the Judicial Board to hear the conflict and make a determination regarding the issue. Within ten (10) weekdays of receipt of the written appeal the committee will notify the Vice President for Student Services of its decision. The Vice President for Student Services will notify the student, the Dean, the Department Chair, and the instructor in writing of the Committee’s decision. The decision of the Academic Subcommittee of the Judicial Board may be appealed to the President’s designee, of the College by the student appealing the grade or by the faculty delivering the grade. The written appeal must be submitted to the President’s designee, within ten (10) weekdays of the receipt of notification of the Subcommittee’s decision. The appeal consists of his/her review of the written record submitted to that point and does not consist of an additional hearing. The designee will respond to the appeal within ten (10) weekdays.

Students dismissed from the clinical area in Allied Health and Nursing programs will follow the appeals process outlined in the program student handbook.

Satisfactory Progress Standards
Each student is expected to make satisfactory progress toward obtaining the degree or diploma he/she has declared. The cumulative grade point average is reviewed at the end of each semester to determine whether the student has made the expected progress. The minimum cumulative GPA for remaining in good standing is a 2.00.

Academic Warning, Probation and Suspension
Students whose cumulative grade point averages fall below 2.0 for any given semester will be placed on academic warning for the following semester. The notice of the warning will be sent to the students and their advisors. Students will be encouraged to see their advisors within the first ten days of the following semester.

Students on academic warning whose cumulative grade point average remains below the Satisfactory Progress Standards (2.00) will be placed on academic probation for the following semester. Students and their advisors will be notified of the academic probation.

In addition to meeting with their advisors, students on academic probation must meet with a counselor to develop a “Plan for Success” and receive a registration release prior to any registration period.

During the Fall and Spring semesters, students on academic probation may register for a maximum of ten (10) credit hours, unless otherwise determined by a counselor.

During the summer session, students on academic probation may register for one course per session but not more than two for the entire summer semester, unless otherwise determined by a counselor.

Students on academic probation whose cumulative grade point average remains below the Satisfactory Progress Standards (2.00) will be placed on academic suspension. Students on academic suspension may not register for academic classes during the period of suspension, unless otherwise determined by a counselor. Students on Academic Suspension who request approval to register from a counselor will be required to repeat courses in which they received failing grades (maximum of 6 credit hours per semester). Students will remain on academic suspension with limited credit hour enrollment until their cumulative GPA’s reach 2.0.

Re-enrollment after Academic Suspension
Students may re-enroll after one semester of academic suspension by contacting a counselor to update their plan for improving academic performance. Students re-enrolling after academic suspension must follow the conditions required during academic probation.

Right of Appeal
The right of appeal is granted to any student who has been suspended from Cape Fear Community College. To initiate such an appeal, follow the process outlined in the Grievance Procedure (see page 39).

Cheating and Plagiarism
Cheating is any practice which gives one student a dishonorable advantage over another student engaged in the same or similar course of study. It shall include, but is not limited to the following: securing or giving assistance during examinations or on required work; the improper use of books, notes, or other sources of information; or the altering of any grade or academic record. Plagiarism includes submitting as one’s own work or creation of any kind that which is wholly or in part created by another. All sources, including Internet content, whether paraphrased or quoted, must be cited correctly.
Direct quotes must have quotation marks around them, or they are considered plagiarism even if the quote is correctly cited. Rearranging parts of author’s sentences or substituting a few words is NOT paraphrasing and also constitutes plagiarism. When a faculty member observes cheating or acts of plagiarism on the part of the student, the case shall be handled in accordance with the following procedures:

1. The faculty member shall notify the student who has been observed cheating or plagiarizing that he/she will receive a grade of “F” on the assignment or “F” in the course. The faculty member, however, shall afford the student an opportunity to clarify his/her position. If the student accepts a grade of “F” on the assignment, the student may remain in the class. If the student accepts a grade of “F” in the course, the faculty member has the option of withdrawing the student from the class with a grade of “WF”.

2. The faculty member shall submit a written report of the incident stating the facts and the action taken to the Department Chair, the Dean, and Vice President for Student Services within three (3) weekdays from the time the incident was discovered.

3. A student who considers the action taken to be unfair and who desires to appeal to the Academic Subcommittee of the Judicial Board, may present to the Vice President of Student Development a written request.

**Right of Appeal**
The right of appeal is granted to any student who has been determined to be cheating at Cape Fear Community College. To initiate such an appeal, the student must submit a written appeal to the Vice President for Student Services within five (5) weekdays after being notified of the action. The Vice President for Student Services will present the appeal to the Academic Subcommittee of the Judicial Board within five (5) weekdays.

The committee will notify the Vice President for Student Services of its decision. The Chairman of the Judicial Board will notify the student of the Committee’s decision. The decision of the Academic Subcommittee of the Judicial Board shall be final with no further appeals.

**Prerequisites and Corequisites**
A prerequisite is a course that must be taken prior to another course. A corequisite is a course that must be taken at the same time as another course or prior to the course to be taken. The college may mandate prerequisites and corequisites to ensure students are prepared to meet the requirements of the course material. Pre and corequisites are identified in the catalog. Students are responsible for meeting their program requirements, including prerequisites and corequisites. If students sign up for a class and do not meet the pre and/or corequisite requirements they may be administratively dropped from the course.

Students who drop on their own or who are administratively dropped after the first day of class and before the published refund date, are only eligible for a 75% refund. Students are advised to review published course prerequisites and corequisites carefully before enrolling.

**Waiver of Prerequisites and Corequisites**
The Vice President for Instructional Services and the academic Deans may waive pre and corequisites. Normally, a waiver will be recommended by the appropriate lead instructors and approved by the Department Chair, Dean, and the Vice President for Instructional Services.

**Catalog of Record**
Students are expected to meet the catalog requirements in effect at the time of their enrollment into a curriculum program. Anyone not in continuous enrollment for more than one semester (not counting Summer) will be readmitted under the requirements of the current catalog. A student who changes programs must meet the requirements of the catalog in effect at the time of the change of program. A student’s academic advisor can recommend substitution of courses with adequate cause. Substitutions must have written approval from the instructor, department chair, and the Dean.

Most courses can be counted for credit toward graduation for an indefinite period of time. Some courses that depend heavily on technology, speed and accuracy, physical skills, and language skills will be subject to review after five years unless the student has been continuously enrolled. Courses subject to review may include, but not limited to, keyboarding, computer, foreign languages, developmental, and trades courses.

**Degree Audit (Program Evaluation)**
Degree Audit is a tool for tracking graduation progress based on the student’s catalog of record. Degree Audit can be accessed through WebAdvisor so that students, advisors, and counselors can follow their progress towards completion of a degree, diploma or certificate. Students can also use the system for “what if” scenarios when considering changing majors.

**Requirements for Graduation**
To receive the Associate in Applied Science Degree, Associate in Arts Degree, Associate in Science Degree, Diploma or Certificate, a student must maintain satisfactory grades in all laboratory and class subjects and a cumulative grade point average of at least 2.00. (Students must earn a minimum of 25 percent of credit hour requirements at Cape Fear Community College).

**Computer Competency**
All CFCC degree and diploma graduates must demonstrate basic computer competency. Students in programs that require specific computer coursework may demonstrate their competency by successfully completing the computer class that has been designated in their program. Students in programs that do not require specific computer coursework will need to pass the Computer Competency Test offered through the Learning Lab (second floor, Health Sciences/Learning Resource Center Addition). Results will be forwarded to the Office of the Registrar and added to the student’s academic record prior to graduation. Students may acquire basic computer instruction by successfully completing the computer class that has been designated in their program.
College transfer students may demonstrate computer competency in one of the following ways: take the Computer Competency Test in the Learning Lab, provided the student is already computer competent and is enrolled in his or her last semester at CFCC, or take a college transfer computer course: CIS 110, or CIS 115, or CSC 151. CIS 111 may be used to satisfy the computer competency requirement, but it is not a College Transfer course.

Information and help for students electing to take the Computer Competency Test through the Learning Lab may be found at http://cfcc.edu/learninglab/. Additional help may be found at http://www.gcflearnfree.org/office2013. Students are advised to prepare for the test through materials found on these pages.

Intent to Graduate
Candidates for graduation must file an Intent to Graduate in WebAdvisor and complete the Graduating Student Opinion Survey by the following dates:

- **Academic Year 2014 - 2015**
  - Fall - November 7, 2014
  - Spring - March 20, 2015
  - Summer - June 12, 2015

Commencement exercises are held following the Spring semester and at the end of the Summer session.

Students who graduate in December are invited to participate in the May commencement exercises.

Upon graduation, a student’s eligibility for financial aid and veteran’s benefits will end. Therefore, students must contact the Financial Aid and counseling offices if they plan to continue enrollment and receive aid in another program beyond graduation.

Graduation Needs
Orders for caps, gowns and class rings will be accepted by a company representative during announced dates. Students who anticipate graduating at the close of Spring or Summer academic sessions will be provided a limited number of commencement announcements. Students completing graduation requirements at the close of the Fall academic session will be invited to participate in the May ceremony.

Academic Honors

President’s List
Full time students (12 or more credit hours during Fall and Spring semesters and 9 or more credit hours in the Summer semester) who have earned a grade point average of 4.00 will be placed on the President’s List.

Dean’s List
Full time students (12 or more credit hours during Fall and Spring semesters and 9 or more credit hours in the Summer semester) who have earned a grade point average of 3.50 with no grade lower than a “C” will be placed on the Dean’s List.

Honors List
Honors list students are part time, have completed at least 4 credit hours and earned a grade point average of 3.50 with no grade lower than a “C”. Part time is 11 credit hours or less during the Fall and Spring semester and 8 or less during the Summer semester.

President’s Award
Graduating students who have achieved an “A” average, defined as a cumulative grade point average of 4.0, are recognized each year at graduation exercises for academic excellence.

(Courses numbered below the 100 level are not used to determine Academic Honors.)

Departmental Honors
Students who have demonstrated outstanding leadership, attitude and ability will be awarded Departmental Honors. Recipients for these awards are selected by lead instructors in cooperation with appropriate faculty.

Financial Aid
Cape Fear Community College administers Federal, State and institutional aid programs designed to assist students and their families in meeting the cost of obtaining a college education. These aid programs are intended to supplement available family resources, considered to be the primary source of educational funding.

Available Aid Programs

Federal Pell Grant  The foundation of federal student financial aid, Pell Grants are awarded only to undergraduate students (those who have not earned a bachelor’s or graduate degree) who demonstrate financial need.

Federal Supplemental Educational Opportunity Grant (FSEOG)  Supplemental Grants are awarded to undergraduate students with exceptional financial need. Federal Pell Grant recipients receive priority for FSEOG awards.

Federal Work Study (FWS)  Work-study awards provide part-time employment opportunities for eligible students to earn money to meet college expenses.

Federal Direct Stafford Loan  The U.S. Department of Education provides the funding for student loans which are borrowed money that must be repaid with interest. Student must be enrolled in at least six credits each semester to be eligible. Returning student must have earned 30 credit hours to be eligible to borrow a second-year loan.

Federal Direct PLUS Loan  PLUS loans are available to eligible parents of dependent students who are enrolled in at least six credits each semester. Parent loans are borrowed money that must be repaid with interest.
North Carolina Community College Grant (NCCCG)
This state grant provides funding to North Carolina residents enrolled in a community college who demonstrate limited or no eligibility for Federal Pell Grants.

North Carolina Education Lottery Scholarship (NCELS)
This state grant provides assistance to needy NC resident students enrolled at least half-time. Eligibility is determined based on the same criteria as the Federal Pell Grant with one exception: students not eligible for the Federal Pell Grant with an estimated family contribution of $5000 or less will be eligible for an NCELS.

Institutional Scholarships
Scholarships are awarded on the basis of financial need, academic excellence, special talent, or any combination thereof. A separate application is required.

Applying for Financial Aid
Apply for a PIN. The Personal Identification Number (PIN) is an electronic access code number that serves as a personal identifier. It will allow a student to apply online for federal and state financial aid and “sign” the application electronically—no paper is involved. Go to www.pin.ed.gov anytime to request your PIN.

Complete the Free Application for Federal Student Aid (FAFSA). Go to www.fafsa.ed.gov to apply for financial aid. A “FAFSA on the Web” worksheet is available online to assist in completing the application.

Eligibility After Graduation
Upon graduation, a student’s eligibility for financial aid and veteran’s benefits will end. Therefore, students must contact the Financial Aid and Counseling offices if they plan to continue enrollment and want to receive aid in another program beyond graduation.

Financial Need and Expected Family Contribution (EFC)
Most federal and state financial aid is awarded based on need. An EFC number is used to determine financial need:

\[
\text{Cost of Attendance} - \text{EFC} = \text{Financial Need}
\]

The EFC is a measure of a family’s financial strength and indicates how much of the family’s resources should be available to help pay educational costs. The EFC is calculated from the information provided on the FAFSA according to a formula established by law.

Verification
Copies of federal tax transcripts and other documents may be required of financial aid applicants to verify the accuracy of the information submitted on the FAFSA. CFCC will notify applicants of documents required to complete the process upon receipt of FAFSA data.

Notification of Awards
Students will receive a notice announcing that the financial aid award has been processed.

Students who have been awarded Financial Aid, registered for classes, but do not attend at least once by the 10 percent date of the class will be dropped by the instructor as “never attended.” Financial aid awards will be adjusted accordingly. No tuition and fee adjustments will be made.

Students who do not qualify for federal or state grant programs will be notified of their non-eligible status.

Programs Not Eligible for Financial Aid at Cape Fear Community College
Students enrolling in the following programs cannot receive financial aid because the programs do not meet the U.S. Department of Education eligibility requirements.

- Air Conditioning, Heating & Refrigeration Technology (certificate)
- Collision Repair & Refinishing Technology (certificate)
- Boat Building (Wooden) (certificate)
- Business Administration: Customer Service (certificate)
- Carpentry (certificate)
- Community Spanish Interpreter (certificate)
- Community Spanish Interpreter – Legal (certificate)
- Community Spanish Interpreter – Medical (certificate)
- Criminal Justice Technology:
  - Criminal Justice Technology (certificate)
  - Industrial Security (certificate)
- Electrical/Electronics Technology (certificate)
- Electronics Engineering Technology (certificate)
- Heavy Equipment & Transport Technology:
  - Marine & Diesel Mechanics (certificate)
- Industrial Systems Technology (certificate)
- Landscape Gardening:
  - Landscape Gardening (certificate)
  - Retention Pond Management (certificate)
- Licensed Practical Nurse (LPN) Refresher (certificate)
- Manicuring/Nail Technology (certificate)
- Mechanical Engineering Technology:
  - CAD Drafting (certificate)
- Phlebotomy (certificate)
- Real Estate (certificate)
- Special Credit (major)
- Sustainability Technologies:
  - Sustainability Technologies (certificate)
  - Alternative Energy Technology (certificate)
  - Sustainable Building Technology (certificate)
- Truck Driver Training (certificate)
- Welding Technology (certificate)

Associate in General Education (AGE) Program—No financial assistance is available for free elective courses taken from curriculum programs that are ineligible for financial aid unless the courses are required for completion of the diploma and/or degree programs in the same discipline.
Satisfactory Academic Progress for Financial Aid Recipients

Federal and state regulations require that students receiving financial aid maintain satisfactory academic progress (SAP) to be eligible to continue to receive funding. This policy applies to all students receiving assistance from any financial aid program administered by the Financial Aid Office at CFCC.

Qualitative and Quantitative Standards

Financial aid recipients must meet both a “qualitative” and a “quantitative” standard to maintain eligibility for financial aid. Students must maintain a cumulative 2.0 grade point average (GPA) to meet the qualitative standard. Students must also successfully complete 67 percent of all credits in which they enroll to meet the quantitative standard.

Developmental Education courses (designated by course numbers below “100”) are included in the calculation of a student’s enrollment status. However, no more than 30 Developmental Education course hours can be used to determine a student’s enrollment status for financial aid purposes. “Foundation” courses in math and English are NOT eligible for financial aid funding or inclusion in the determination of enrollment status because their content is below the post-secondary level.

Transfer credits from institutions other than CFCC will be totaled and counted in the determination of completion rate and maximum time frame.

Grades of “W”, “WP”, “WF”, “NC”, “NS”, “I”, “R”, “U” and “F” do not count as successfully completed courses but do count as credits attempted and are used in the determination of enrollment status and maximum time frame. Audited courses are not eligible for financial aid funding and are not included in the determination of a student’s enrollment status for financial aid purposes.

A student is permitted to repeat a previously passed course one additional time for the repeated course to be eligible for financial aid. A student can repeat a previously-failed course an unlimited number of times. All earned grades will be used to determine a student’s compliance with the 2.0 cumulative GPA requirement and all attempted hours will be included in the calculation of maximum time frame.

Timing of Measurement

Satisfactory academic progress is measured after every semester. All terms of enrollment at CFCC are included in the measurement, even if the student did NOT receive financial aid. Summer and mini-sessions are also included.

Failure to Achieve Satisfactory Academic Progress

Students who fail to meet either of the progression standards will receive a warning notice. The preferred method of notification is electronic; messages are sent to the student’s CFCC e-mail account. Students on warning are eligible to receive one additional semester of financial aid and are expected to use this period to reestablish satisfactory academic progress.

If a student fails to meet either standard for a second consecutive semester, s/he will receive a suspension notice. No financial aid will be awarded to a student on suspension until the student corrects the academic progress deficiencies. Students who do not meet the satisfactory academic progress requirements for financial aid eligibility can enroll at CFCC without financial aid to correct the deficiencies.

Appeal Process for Probationary Semester

The right to appeal is granted to any student whose financial aid eligibility has been suspended. An appeal must be based on significant mitigating circumstances that seriously impacted academic performance.

The student should submit a written appeal to the Financial Aid Office. An appeal letter must include why the student failed to make satisfactory academic progress and what has changed that will allow the student to make progress at the next evaluation (i.e., at the end of the next semester of enrollment).

- An appeal letter must be accompanied by:
- A typed academic plan clearly stating how the student intends to meet progress standards, and
- A copy of the student’s degree audit, which is available on the student’s Web Advisor account. The degree audit displays completed courses and courses still required for program completion.
- Students are strongly advised to submit third party documentation supporting significant mitigating circumstances. For example, in case of significant medical issues, documentation may require medical reports and signed statements by physicians regarding the circumstances.

An appeal submitted without adequate documentation will be denied.

The appeal letter and supporting documentation submitted by the student will be forwarded to the Financial Aid Subcommittee of the Judicial Board. If the student chooses to make his/her own presentation to the Subcommittee, a written request to do so must accompany the appeal letter.

Please note that merely filing an appeal does NOT guarantee continued eligibility for financial aid.

The Financial Aid Subcommittee of the Judicial Board reviews the appeal within 15 business days. Students will be notified of the Subcommittee’s decision. The preferred method of notification is electronic; the decision notice is sent to the student’s CFCC e-mail account. The decision of the Financial Aid Subcommittee of the Judicial Board is final and no further appeals are allowed.

If the appeal is denied, the student may reestablish financial aid eligibility for subsequent semesters ONLY by taking courses, without benefit of financial aid, until s/he is in compliance with all components of the CFCC satisfactory academic progress policy (67% completion rate and 2.0 minimum cumulative GPA).
If the appeal is approved, the student regains financial aid eligibility for one probationary semester. During the probationary semester and all subsequent semesters, the student must achieve a 75% completion rate and maintain a term GPA of 2.0. Failure to do so will result in suspension of financial aid after which the student will regain eligibility only by taking a minimum of six (6) credits, without benefit of financial aid, until s/he is in compliance with all components of the CFCC satisfactory academic progress policy (75% completion rate and 2.0 minimum cumulative GPA). The classes in which a student registers to regain eligibility must be required for program completion. Previously-passed courses which the student retakes will not be included in the determination of Continued on Appeal status.

### Maximum Time Frame

Federal regulations also establish 150 percent of the published length of the program as the maximum time frame allowed in which to complete an educational program. Maximum time frames allowed to complete CFCC programs, measured by credits attempted as a percentage of credits required for graduation, is as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th># of Credits Required for Graduation</th>
<th>Max # of Attempted Credits Allowed for Financial Aid Eligibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>Certificate</td>
<td>18</td>
<td>27</td>
</tr>
<tr>
<td>Diploma</td>
<td>48</td>
<td>72</td>
</tr>
<tr>
<td>AAS</td>
<td>76</td>
<td>114</td>
</tr>
<tr>
<td>College Transfer/AGE</td>
<td>65</td>
<td>98</td>
</tr>
</tbody>
</table>

If a student earns 67 percent of the credits attempted each semester, the student should complete the program of study within the maximum time frame.

The 150% count will include transfer credits and all credits attempted in all programs of study in which the student has been enrolled, regardless of whether or not a certificate, diploma, or degree was received. The number of credits attempted will be measured against the student’s current active program of study.

### Maximum Time Frame Appeal

Students who have exceeded the maximum time frame for their declared program of study must submit an “Exceeding Maximum Time Frame” appeal. The student must be meeting the cumulative 2.0 grade point average and 67% cumulative completion rate in order to submit a maximum time frame appeal. An appeal must be based on significant mitigating circumstances that seriously impacted academic performance.

A complete maximum time frame appeal will include:

1. The “Exceeding Maximum Time Frame” Appeal form, and 2. A copy of the student’s degree audit, which is available on the student’s Web Advisor account. The degree audit displays completed courses and courses still required for program completion.

3. Students are strongly advised to submit third party documentation supporting significant mitigating circumstances. For example, in case of significant medical issues, documentation may require medical reports and signed statements by physicians regarding the circumstances.

A student for whom a maximum time frame appeal is approved must complete 75% of all attempted credit hours with a minimum 2.0 grade point average each semester following the appeal approval. Failure to do so will result in suspension of financial aid eligibility.

Additional information and forms required to submit an appeal can be found on the Financial Aid Office website, http://cfcc.edu/finaid.

### Student Responsibilities

It is the student’s responsibility to monitor satisfactory academic progress as it relates to maintaining eligibility for financial aid. The Financial Aid Office assists with periodic measurement and notification to students who fail to meet the standards.

It is the student’s responsibility to notify the Financial Aid Office of any grade change made after the official posting of semester grades.

It is the student’s responsibility to follow up with the Financial Aid Office if s/he does not receive an appeal determination notice within three weeks of submitting the appeal.

NOTE: The Satisfactory Academic Progress Policy for financial aid recipients is different than the College’s satisfactory progress standards maintained by the Counseling Department that places students on academic warning, probation or suspension for failure to achieve a 2.0 grade point average.

### Return of Federal Funds

Regulations governing the administration of financial aid require a recalculation of aid eligibility for federal aid recipients who withdraw from all classes prior to the end of a semester. This recalculation is required regardless of the reason for the total withdrawal and differs from CFCC’s general refund policy. Additional information is available in the Financial Aid Office.

### Tuition/Fees/Books

Students who are eligible for financial aid can charge their tuition, fees and books up to the amount of their awards. If the amount of financial aid received is less than tuition, fees, and books, the student is required to pay the remaining balance at the time of registration or purchase of books.

Students who have been awarded financial aid, registered for classes, but do not attend at least once by the 10 percent date of the class will be dropped by the instructor as “never attended.” Financial aid awards will be adjusted accordingly. No tuition and fee adjustments will be made.

Students will receive a check for the excess amount of financial aid remaining in their account following the payment of tuition, fees and books. It is the student’s responsibility to make certain
Student Ambassadors should possess:

- An outgoing personality
- A professional appearance
- High academic achievement

**Foundation Scholarships**

Student scholarships are established through donations to the CFCC Foundation. Criteria for scholarships are specified by a donor in collaboration with Foundation staff, ensuring the most efficient use of the donation while helping as many students as possible.

The Foundation establishes endowed and non-endowed scholarships. Endowed scholarships are generated through the investment of permanently held principals from which only the interest is used. Non-endowed scholarships are those from which all funds are dispersed as scholarships rather than as long-term investments. These scholarships are commonly referred to as “pass-through” scholarships.

**Merit Scholarships**

Many outstanding local high school students want to attend CFCC. To assist them, the CFCC Foundation awards ten Merit Scholarships annually to deserving New Hanover and Pender County seniors who exhibit academic excellence. To qualify for a CFCC Merit Scholarship, you must:

- Be a current high school senior
- Have applied for or been approved to enroll in CFCC in a curriculum program
- Submit a letter of recommendation from your high school principal, guidance counselor, or a high school teacher
- Demonstrate academic potential through high school grades, rank in class, and/or aptitude test results
- Be a US citizen or documented alien

Consideration will be given for non-school activities, work experience and community service. To apply for a Merit Scholarship, students should see their high school counselor or download an application from the Foundation website, http://cfcc.edu/foundation/.

The CFCC Financial Aid Office administers scholarships to CFCC students. Students should contact the Financial Aid office for applications, forms and specific information (910-362-7338). Scholarships are subject to change without notice.

For a current list of available scholarships, please go to http://cfcc.edu/foundation/.

Please visit the Foundation website at www.cfcc.edu/foundation for scholarship applications and additional information.

**Veterans Educational Benefits**

The Veterans Administration determines the eligibility of students requesting Veterans educational benefits. The Financial Aid staff member located in the Veterans’ Center processes necessary documentation, certifies enrollment and students’ academic progress. The Veterans’ Center provides assistance to student veterans in the transition to civilian and academic life. The center also provides guidance in obtaining other VA benefits to eligible students enrolled at CFCC.

Veterans’ educational benefits are available to eligible veterans, spouses and children of certain categories of living and deceased veterans and to certain active duty military personnel, reservists and National Guard members.

**Maintaining Eligibility for Veterans Educational Benefits**

Students receiving veterans educational benefits are required to maintain satisfactory academic progress. CFCC’s progress standards appear on page 23 of this catalog. Recipients of veterans educational benefits whose cumulative GPA falls below 2.0 will be placed on academic probation for the subsequent semester. If the cumulative GPA remains below 2.0, the student will not be eligible to receive veterans educational benefits.

Prospective students who are eligible, or believe they may be eligible, to receive veterans educational benefits should contact the Veterans’ Center.

Visit http://cfcc.edu/veterans for additional information.

**Vocational Rehabilitation**

This is a program administered by the North Carolina Department of Human Resources. The Division may provide services as are necessary to enable a physically, mentally and/or educationally disabled person to become self-employed. If
Expenses

Tuition
Tuition is established by the North Carolina State Legislature and is subject to change without prior notification. Current tuition costs can be found on the College’s website at www.cfcc.edu, in the Schedule of Classes published for each academic term, or in the Admissions Office.

Tuition is due and payable on the day of registration unless otherwise noted. Any deferred payment or exceptions must be approved by the Vice President of Business and Institutional Services. Tuition shall be waived for up to six credit hours of credit instruction and one course of non-credit instruction per academic year for North Carolina resident senior citizens 65 years or over during a semester. However, other fees are payable where applicable. Self-supporting classes are not free for any student. If tuition is a major factor in the student’s determination to attend CFCC, the student should contact the Financial Aid Office as soon as possible.

Students who register for a course and do not attend at least once during the first 10 percent of the course’s term will automatically receive a grade of NS or “No Show” for that course. No tuition and fee adjustments will be made for grades of NS.

Payments can be made by cash, check, debit card, MasterCard, Visa, American Express, and Discover. Web Advisor is available for making payments by debit, credit cards and checks. Payments are not accepted via the telephone.

Student Fees
A non-refundable student fee is charged to all curriculum students for the Fall and Spring semesters. This fee is due and payable on the day of registration. The maximum fee charged is $65.00 per academic year, but is subject to change.

Funds collected from activity fees are used to support the costs of student publications, athletics, social activities sponsored by the Student Government Association, and student identification cards.

In the fall of 2003, the Board of Trustees of Cape Fear Community College approved a non-refundable “Technology Fee” to be charged to all curriculum students for the Fall, Spring and Summer sessions. The $1.00 per credit hour fee, not to exceed $16.00 in a semester, is due and payable on the day of registration.

Electronic Signature Policy for Students
Cape Fear Community College (CFCC) recognizes an electronic signature as a valid signature from employees and students subject to Conditions 1 and 2 below:

Condition 1: Campus Network Username and Password
- Institution provides student with a unique username
- Student sets his or her own password
- Student logs into the campus network and secure site using both the username and the password

Condition 2: Student Login ID and Personal Identification Number (PIN)
- Institution provides student with a unique PIN
- Student sets his or her own PIN
- Student logs into a secure site using both the login ID and PIN

An electronic signature is defined as any electronic process signifying an approval to terms, and/or ensuring the integrity of the document, presented in electronic format.

Students use electronic signatures to register, check financial aid awards, pay student bills, obtain unofficial transcripts, update contact information, log into campus computers, complete forms, submission of class work, tests, etc.

It is the responsibility and obligation of each individual to keep their passwords and PIN private so others cannot use their credentials. This is further explained in the CFCC Student Catalog section on “Computer Acceptable Use Policy”.

Once logged in, the student is responsible for any information they provide, update, or remove. CFCC will take steps to ensure both the passwords and PIN are protected and kept confidential. Furthermore, users are responsible for logging out of all systems and exercising the necessary precautions when using publicly accessible computers.

This policy is in addition to all applicable federal and state statutes, policies, guidelines, and standards. The policy as it applies to employees is explained in Section 9.13.1 Computer Use Policies of the CFCC Faculty and Staff Handbook.

Student Identification Card
The student I.D. card is included as part of the curriculum student tuition and fees. The I.D. card should be carried at all times and presented upon request to a College representative. The I.D. card serves as the College library card, permits access to campus parking decks, and is required for participation in campus events and sports activities. Lost cards should be reported and a replacement card purchased for $10.00. To obtain an I.D. card, students need to present their current CFCC schedule and a photo I.D., such as a driver license, passport, or military I.D.

Parking and Security Permits
A non-refundable fee is charged to curriculum students for parking and security. A parking permit is issued when a student is paying for their tuition and fees in the Business Office. The parking permit is valid September 1 to August 31. The maximum cost of the parking and security fee per semester is $20, but is subject to change.

Insurance
The College provides limited student accident insurance for curriculum students at no cost to the student; however, this insurance may not cover all expenses of treatment received...
Refund of Tuition

A 75 percent refund will be made if the student officially drops a class(es) during the period starting from the first day and ending on the 10 percent day of the academic session/semester. A student is not officially dropped until he/she processes a signed drop card with the Registrar’s Office. The effective date of the drop is the day the Registrar’s Office receives the form. WebAdvisor is not available to drop classes during the 75 percent refund period.

Classes beginning at times other than the first week (seven calendar days) of the semester

A 100 percent refund shall be made if the student officially drops from the class prior to the first class meeting. Students are also eligible for a 100 percent tuition refund if the College cancels the class. Drops must be processed through the Registrar’s Office or through WebAdvisor.

A 75 percent refund shall be made if the student officially withdraws from the class prior to or on the 10 percent point of the class. WebAdvisor is not available to drop classes during the 75 percent refund period.

Students who have not attended at least once by the 10 percent date of the class will be dropped by the instructor as a “No Show” and assigned a non-punitive transcript grade of “NS.” No tuition and fee adjustments will be made.

Return Check Guidelines

Tuition payment made with a check returned by the bank will be considered nonpayment of tuition. Students will lose their classes or will not be able to attend classes until full restitution is made. Absences incurred due to nonpayment of fees will be counted in accordance with the College’s attendance policy.

A returned check processing fee will be charged in the amount of $25.00 for a paper check or e-check when payment is refused by the bank for any reason.

Transcript of Record

Upon written request of the student, a transcript of credits earned at Cape Fear Community College will be sent to other colleges and/or industry. Transcripts can be requested for colleges to which you have applied through the College’s website (www.cfcc.edu). Transcripts per the request may be picked up or will be mailed after 4:00 p.m. on the following work day. The non-refundable cost for an official transcript is $5 each.

Graduation Fees

Fees for graduation are not included in the activity fee. The cost for caps and gowns are paid by the student directly to the company representative from whom they are being ordered. At present the cost is approximately $25.00, but is subject to change.

Applicable fees at time of printing are subject to change without notice.

Institutional Indebtedness

No student will be permitted to graduate, register for classes, or have a transcript issued until all financial obligations to the College are satisfied.

Personnel in the Armed Services

Any active duty member of the armed services or a military dependent who does not qualify as a North Carolina resident for tuition purposes may be eligible to pay a reduced tuition rate if eligibility requirements for the Military Tuition Benefit (N.C. General Statute Section 116-143.3) have been met. Members for reserve components are not eligible for the benefit unless they have been called up for active duty.
Student Activities

Extra-curricular activities are an important part of the total educational program at Cape Fear Community College and fulfill the College’s mission by providing a variety of activities that enrich students’ lives. The goal of Student Activities is to accommodate student diversity in backgrounds, abilities, interest, and career objectives; enhance academic success; and promote diplomacy, unity, self-discipline, physical and emotional well-being, and leadership skills. The Student Activities Office is located in the Health Sciences Building (L-112) and offers space for the many clubs at CFCC to hold their monthly meetings and is the home of CFCC Athletics. Student Activities also provides services, programs, and facilities for the students, faculty, and staff of the College.

Athletics and Intramural Activities

Cape Fear Community College is a member of the National Junior College Athletic Association (NJCAA), competing in Region 10, a high level of competition. College athletics may include basketball, volleyball, golf, soccer, and other NJCAA sponsored sports depending on student interest and facilities availability. Students participating in intercollegiate athletics must meet NJCAA/NCAA eligibility requirements and standards. Individuals participating in college athletics must be a high school graduate/GED, and or obtained a GED currently enrolled at CFCC and be in good academic standing. The goals and objectives of intercollegiate athletics are listed below:

Goals:
• To enhance academic success of student athletes
• To provide opportunities for participation in competitive college sports
• To promote the development of self-discipline and leadership skills

Objectives:
• Monitor the academic grade point average of collegiate student athletes
• Develop and monitor sports activities based on student interest as gleaned from Student Interest Survey and participation
• Monitor the retention and graduation rates of student athletes

Intramural Program

The CFCC Intramural Program is specifically designed to provide opportunities for students, faculty and staff to have fun, socialize, manage stress and improve personal health and wellness by participating in organized competitive sports and recreational activities.

The intramural program includes a wide variety of events. Past activities have included a table tennis tournament, 3 on 3 basketball, kick ball, flag football, volleyball, and other competitive activities based upon the overall interest of the CFCC students, faculty, and staff. General information and registration materials for intramural sports may be obtained through the Student Activities Office (L-112).

Student Government Association

The Student Government Association (SGA) is the official organization authorized by the administration to represent all students at Cape Fear Community College. The SGA is a democratic organization and as such elects officers each year. The State Board of Community Colleges, the CFCC Board of Trustees, and the administration, faculty, and staff fully support the SGA. This support is most visible in the office of the SGA President who, upon election to that office, automatically becomes a member of the Board of Trustees and the College Council. Additionally, students have SGA representatives on standing college committees. These committees are charged with annually reviewing and recommending changes to the College.

The Student Government Association is an active organization; it is the voice of the student body and has paved the way for good lines of communication between students and administration. Students receive practical experience in responsible citizenship through participation in a program of self-government.

The SGA is governed by its Constitution and By-Laws. Copies of these documents are available in the Student Activities office (L-112 or the Student Government Office S-400).

Social Activities

The social development of the student is an important phase of the total educational program at Cape Fear Community College. Under the sponsorship of the SGA, social events include concerts, cookouts, holiday celebrations, charity events, tournaments, athletic events and various other student body activities.

Student Ambassadors Program

Each year the College selects student ambassadors to represent CFCC at various college functions and special events. These students are selected based on their leadership ability, academic achievement, college involvement and their desire to assist other students and represent the College. The major purpose of the program is to teach students the importance of responsibility and teamwork, raise self-esteem and create a well-rounded college experience. See page 29 for more information.

Phi Theta Kappa

The Phi Theta Kappa International Honor Society encompasses the upper ten percent of all students enrolled in the two-year college system. Alpha Chi Sigma is the CFCC Chapter of Phi Theta Kappa. Membership in Phi Theta Kappa is extended by invitation only. Today Phi Theta Kappa is the largest honor society in American higher education with more than 2 million members and 1,200 chapters located in all 50 of the United States, U.S. territories, British Virgin Islands, Canada, Germany, Marshall Islands, Micronesia, and Palau. The innovative programs and services and array of membership benefits offered by Phi Theta Kappa are unequalled among honor societies. Programs and projects focus upon the Society’s Hallmark of Scholarship, Leadership, Service and Fellowship. To be eligible for membership a student must complete a minimum of twelve hours of associate degree course work and generally earn a grade point average of 3.5 or higher.

Student organizations and clubs that help fulfill the mission of CFCC, accommodate student diversity, enhance academic success, promote diplomacy, unity, discipline, physical/emotional well being, and develop leadership skills are an important part of Cape Fear Community College.

New student organizations and clubs may be approved by the Vice President for Student Services, in consultation with the Director of Student Activities, after written application is submitted to the Director of Student Activities. The written application must state the proposed name of the organization, the names of all students proposing the organization, the name of at least one faculty/staff member (full-time CFCC employee) who has agreed to serve as a sponsor to the group, and a complete description of the proposed activities of the group including, but not limited to, (1) purpose statement, (2) goals, (3) complete description of the organization’s proposed activities, and (4) Club Constitution.

Once a student organization and/or club is approved, each activity must be individually approved by the Director of Student Activities before it is undertaken. Student Activity Forms are available from the Director of Student Activities. It is the primary responsibility of the proposing organization to provide accurate and complete descriptions of individual activities of the organization. Inactive student organizations and/or clubs may be disbanded at the College’s discretion.

The College reserves the exclusive right to immediately suspend any activity that is not being conducted in exact accord with the college-approved description of the activity or any activity that substantially disrupts or materially interferes with the work, discipline, and/or educational activities of the College (e.g., by violating reasonable college rules and regulations, interrupting classes or other college programs or activities, or inciting or producing imminent violence or other lawless action on College premises) as adjudged by designated College officials. Moreover, the College reserves the exclusive right to disband any student organization and/or club that: (1) conducts such inappropriate and/or unapproved activities; and (2) fails to follow college guidelines.

Guidelines for Display or Distribution of Handbills, Posters, or Other Materials by Student Clubs, Community and Non-Profit Organizations, and Individuals

The College would like to provide educational opportunities to its students and others in the college community and believes that public expression through displays or distribution of handbills, posters, or other materials can play an important role in accomplishing this goal. The College also believes firmly in its obligation to college employees and its students to provide an environment that is conducive to learning. Public expression that enhances this environment by affording students and others in the college community exposure to a variety of ideas is encouraged. Subject to the terms and conditions set forth in these procedures, to any rules or regulations established by the College pertaining to display or distribution, and to other applicable laws, rules, and regulations, an organization or individual may display or distribute handbills, posters, or other materials that are aimed at providing information to students.

The following guidelines apply to materials posted on the campus of Cape Fear Community College, regardless of the source of those materials. They include:
Posted information shall not contain obscene or libelous information or other information that is not protected by law.

Information will not be placed over existing notices. Outdated material will be removed to make room for timely information.

All event items must be removed by the sponsoring organization immediately following the event.

All notes to be posted in stairwells, at doorways, or in other college locations not otherwise permitted in these guidelines, require approval by the Vice President for Student Services five work days (Monday through Friday) in advance of the proposed posting.

Due to extreme space limitations, information to be posted by student groups, community groups, or individuals in areas other than those reserved for Phi Theta Kappa and academically-oriented student clubs will be posted for a maximum of two weeks and must be no larger than 8.5” x 11”.

Items not approved in the prescribed manner will be removed and discarded.

Placement of information on vehicles of others on campus is prohibited.

The College reserves exclusive rights to re-arrange materials to accommodate the display of additional materials, to establish limits on the amount of information organizations may display, and to deny additional requests when all designated space is being used.

Failure by any organization or individual to abide by CFCC guidelines will be grounds for denying additional requests from the same organization or individual.

The College will grant access by an eligible organization or individual to areas of College premises, designated for public expression on a neutral basis, in accordance with these procedures. A grant of access to any particular organization or individual does not mean that the College endorses the beliefs, practices, or views expressed by that organization or individual, and outside organizations and individuals are expressly prohibited from stating, implying, or suggesting in any manner that they are endorsed by or associated with the College or that any publication, announcement, or other form of expression provided by the organization or individual has been approved by or is associated with the College. Areas of college premises designated for public expression will not be denied to any organization or individual on the basis of the content of information sought to be provided by or the convictions or affiliations of that organization or individual.

Given the varying nature of different organizations and the wide-range of notices that individual students and/or college personnel may wish to post on occasion, additional guidelines apply to certain types of organizations and individuals, as noted in the following information:

**Phi Theta Kappa**

Space has been designated for displays of the Alpha Chi Sigma chapter of Phi Theta Kappa, CFCC’s student honor society, and displays are subject to approval of chapter officers and faculty/staff sponsors.

**Academically-Oriented Student Clubs**

Academically-oriented student clubs that are directly linked in name, purpose, and practice to specific instructional disciplines or programs offered at CFCC may post discipline-related displays and materials, including announcements of upcoming club meetings, on College bulletin boards in their respective academic departments, subject to advance approval of faculty sponsors, department heads, and the appropriate division Deans.

Other student clubs and community and non-profit organizations may distribute or display information relating to the approved purpose including announcements of upcoming meetings, in accordance with the following guidelines:

All items displayed by other student clubs in the category must be approved by the faculty/staff sponsor and the Vice President for Student Services. Items submitted by community and non-profit organizations must be approved for display by the Vice President for Student Services. The Vice President for Student Services will consider all requests for display and distribution in light of the availability of areas that are designated for such purposes and the availability of space for the proposed display or distribution within any designated area(s). Requests for access to distribute or display publications will be reviewed and granted on a first-come, first-serve basis. The College will communicate its approval or disapproval of access for distribution or display and any conditions of access to the requesting organization or group, generally within three business days after the request is submitted. Access for display or distribution of materials will not be provided if previously approved requests for access to display or distribute materials have resulted in space being unavailable for additional displays or distributions within any designated area(s). Approved materials may be displayed on the designated bulletin board(s). No one club may use a disproportionate amount of the allotted space unless other clubs do not elect to display information.

Committee organizations and individuals may display approved notices on designated bulletin board(s).

**Appeal**

Any organization or individual who believes that the opportunity to display or distribute handbills, posters, or other materials has been denied improperly may appeal the denial by providing written notice of the appeal to the Vice President for Student Services within three business days of the date on which the organization or group has been advised of the denial. Information supporting the appeal (which may include a written statement or, at the election of the individual or group, a conference with the College’s Judicial Board) also should be provided. As a general rule, the Judicial Board will make a final decision within five business days of receiving the appeal and any written information or, if a conference with the organization or individual has been scheduled, after conducting the conference.
Student Publications
All student publications, printed and electronic, are supervised by the Director of Student Activities, and the Vice President for Student Services. Students are invited to submit information to the Director for possible inclusion in printed material. All material must adhere to the canons of responsible journalism, including the avoidance of libel, indecency, vulgarity, undocumented allegations, attacks on personal integrity, and the techniques of harassment and innuendo.

The Vice President has the authority to determine responsible journalism and to prohibit the publication of any material in violation of the canons of responsible journalism.

College Sponsored Activities & Events
The College reserves the exclusive right to immediately suspend any activity that is not being conducted in exact accord with the college-approved description of the activity or any activity that substantially disrupts or materially interferes with the work, discipline, and/or educational activities of the College (e.g., by violating reasonable college rules and regulations, interrupting classes or other college programs or activities, or inciting or producing imminent violence or other lawless action on college premises) as adjudged by designated college officials. The College reserves the exclusive right to disband any student organization and/or club that: (1) conducts such inappropriate and/or unapproved activities; and (2) fails to follow college guidelines.

Moreover, Cape Fear Community College has zero tolerance when it comes to drugs and alcohol consumption while representing the college during college events. Any violation will result in immediate suspension from the college for one academic year and complete withdrawal from all current classes; no exceptions. For more information regarding Cape Fear Community College’s Drug and Alcohol Policy, see page 42 of this handbook.

General Information

Change of Name/Address
It is extremely important for the College to have accurate name and address information for each student. Students must have their name formally changed with the Social Security Administration and the Department of Motor Vehicles in order to process a name change. Name changes can only be done in person in Student Services. Students with new addresses may complete a form in Student Services or update their address online through WebAdvisor.

Children on Campus Policy
Children cannot be taken into classrooms, laboratories or shops unless authorized by College personnel. Responsible adults will be expected to remove disruptive children immediately. Children cannot be left unattended on campus including the Learning Resources Center, the cafeteria, lounge areas, registration sites, administrative offices or parking lots.

Failure to comply with this policy will lead to disciplinary action as outlined in the College Catalog, Student Handbook and Faculty and Staff Handbook. Visitors violating this policy will be notified of the violation and continued violation will result in the individual being asked to leave campus.

Dress
CFCC invites prospective employers and industry representatives on campus throughout the academic year. Therefore, while students may dress casually, they are encouraged to dress neatly and cleanly. Students are required to wear shoes to help ensure safety on campus and/or college facilities.

Food Services
Hot food and snacks are available in the cafeteria, which is located on the first floor of the Health Sciences-Learning Resource Center (L) Building, from 7:30 a.m. to 8:30 p.m. Monday through Thursday and 7:30 a.m. to 4:00 p.m. on Friday unless otherwise posted. Food service is also available in the cafeteria at the North Campus.

Housing
The College does not have housing facilities. However, upon request and if known, college officials will provide students information concerning available housing. Students are advised to have a clear understanding with landlords regarding all rental and/or lease agreements. Students are urged to make housing arrangements well in advance of enrollment.

Lost and Found
The Switchboard Operator will accept articles found on campus. If contact information is available, the owners will be notified. Articles will be held for the remainder of the semester and will then be donated to a non-profit organization.
Parking
To park on any CFCC property, you must clearly display a CFCC parking decal. Parking decals, along with rules and regulations, are obtained in the Business Office. Violation of parking policy may result in citations, towing or booting of vehicle, or further disciplinary action.

Downtown, the College offers student surface parking lots and a parking deck at 200 Hanover Street. Students must have a CFCC Student ID card to enter and exit the parking deck. North Campus and the Burgaw Center offer student surface parking lots.

Handicap parking is provided at each of the Downtown Campus buildings, North Campus buildings and the Burgaw Center. Downtown, anyone displaying a DMV Handicap placard or license plate may park in any of the metered parking spaces without paying.

For complete rules and regulations, along with the most up-to-date information regarding parking and traffic conditions, please refer to http://cfcc.edu/parking/ or follow us on Twitter @cfccparking.

Telephones
Pay telephones are available for students to use. Students may not use phones located in college offices unless it is an emergency.

Incoming calls for students will be honored only in cases of emergencies.

Tobacco Free Campus Policy

Cape Fear Community College:
• is committed to providing its employees and students with a safe and healthful environment.
• recognizes the use of tobacco products on campus grounds is detrimental to the health and safety of students, staff, faculty and visitors.
• recognizes that it has the legal authority to prohibit tobacco use pursuant to G.S. 143-599.

Therefore, Cape Fear Community College has set the following 100% tobacco free campus policy, to be implemented on August 1, 2009.

1. Use of tobacco is prohibited by students, staff, faculty or visitors:
• in all campus buildings, facilities or property owned, maintained, or leased by Cape Fear Community College and outside areas of the campus;
• on campus grounds, facilities, or in vehicles that are the property of the college;
• in personal vehicles while on property owned or leased by Cape Fear Community College;
• at lectures, conferences, meetings, athletic, social and cultural events held on college property;
• for the purposes of this policy, tobacco is defined as any type of tobacco product including, but not limited to, cigarettes, cigars, cigarillos, pipes, bidis, hookahs, smokeless or spit tobacco or snuff, e-cigarettes or any product simulating smoking instruments.
• except at a specific location(s) on the North Campus as approved by the College President due to unsafe conditions going off-campus.

2. The sale or free distribution of tobacco products, including merchandise, on campus or at school events is prohibited.

3. Student organizations are prohibited from accepting money or gifts from tobacco companies, including:
• Events sponsored by tobacco companies and allowing them to distribute free, reduced-price, or fully priced tobacco products (T-shirts, hats, etc.) on campus.
• All tobacco advertising, such as billboards and signs in all campus buildings, facilities or property owned or leased and operated by Cape Fear Community College.

4. Tobacco advertisements are prohibited in college-run publications and on grounds or facilities, including athletic facilities, owned or operated by Cape Fear Community College.

5. Cape Fear Community College will provide access to tobacco cessation programs on campus.

These tobacco treatment programs shall be publicized regularly in student, faculty and staff publications and academic buildings, through Student Services and through other appropriate means.

6. Implementation:
• A campus committee shall develop a plan for communicating the policy with students, staff, faculty and visitors.
• The College ensures that appropriate signage and other physical indicators of our policy are provided.
• All tobacco waste management products such as ashtrays shall be removed.
• Those who violate the policy shall be given a citation for each policy violation.

7. Citation:
Students:
• 1st Offense-Conduct Warning
• 2nd Offense-Conduct Probation
• 3rd Offense-Conduct Suspension from CFCC if deemed necessary

In accordance with the Code of Conduct students who repeatedly violate the policy shall be referred to the Vice President for Student Services.

Faculty and Staff:
• Staff and faculty who violate the policy shall be referred to their supervisor. Repeated violations by faculty and staff may result in further personnel action.

Visitors:
• Visitors are expected to adhere to the college policies. Visitors who ignore the policy shall be asked to leave campus.
Student Expectations, Rights, and Responsibilities

Student Records
CAPEFEARCOMMUNITYCOLLEGERESPONSIBILITIES UNDER THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT OF 1974 (THE BUCKLEY AMENDMENT)

Under the Family Educational Rights and Privacy Act of 1974, the rights of the student and the responsibilities of the institution concerning the various types of student records maintained by the institution are established. Consistent with this legislation, Cape Fear Community College establishes the following policy to ensure compliance. Failure to comply with standards prescribed in the Act could jeopardize federal funding received by the institution and its students.

Rights of Students
In compliance with the law, an individual becomes a student when he/she registers at the College. Upon reaching age 18 or attending an institution beyond the high school level, the student has the right to view his/her own school or college records. These records include the academic transcript of the College, post-secondary transcripts, high school transcripts, and other documents maintained as part of the student’s permanent file with the exception of confidential letters of recommendation. All permanent academic records are housed and maintained by the Registrar.

CFCC requires written authorization from the student prior to release of academic records. A minimum of 48 working hours will be required by the College to access the requested academic information. The student may inspect, copy, and review his/her records in the Registrar’s Office. There may be a charge for copies.

Rights of Parents
Parents of a child who is under the age of 18 and has never attended an educational institution beyond high school level has the right to inspect and review that child’s academic records. After a student reaches the age of 18 or enters a post-secondary institution, the parent will be denied access to the students academic record unless the student gives written consent. The College assumes that all students are independent adults attending an institution designed for adult education. Parents do have the right to review the academic records of their child if they are claiming the child as an income tax deduction; however, they must show proof of the claim.

Rights of Faculty
The faculty of the College has a legitimate educational interest in students academic records. Therefore, access to those records is authorized by the institution. Along with this access comes certain obligations and responsibilities.

A faculty member shall not access educational records of any student for which he/she does not have a direct advisory responsibility. Those with direct advisory responsibility include the current instructors of the student, the students faculty advisor, and the appropriate department head and division chair. A faculty member not professionally associated with a student shall not access educational records of the student without the written consent of the student.

A faculty member shall not disclose any information from a students record to a third party (i.e., other students, other faculty members, employers, etc.) without the written consent of the student. Parents of the student do not have special access rights and should not be given information without the students written consent.

A faculty member shall be responsible for the security of all academic information in his/her possession. These records must not be accessible to students and unauthorized personnel.

A faculty member shall refrain from disclosing academic information by phone without the expressed written consent of the student.

Rights of Administration
Student Services and specifically the Registrar’s Office, has the responsibility of maintaining and safeguarding the academic records of all students of the College. Consistent with this responsibility, the personnel of Student Services will access student records as needed. However, these individuals bear the responsibility for ensuring that no unauthorized disclosure of student academic information occurs without the expressed written consent of that student.

The President, Vice-Presidents and Deans of the College may access student records when needed to facilitate the students educational pursuit. College administrators may disclose a student’s educational records to appropriate parties in connection with a health or safety emergency. Furthermore, College Administrators have the right to contact parents of any student under the age of 21 that has violated a Federal, State, or local law, or any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance.

Educational records of a student will not be accessed for employment decisions without the expressed written consent of the student. Information from student academic records may be shared in aggregate for educational research purposes.

Directory Information
Directory information includes name, major field of study, full time/part time enrollment, the most recent college attended, dates of enrollment, degrees and awards received, and the College assigned email address.

Students have the right to withhold disclosure of any directory information by completing a request for non-disclosure in the Director of Enrollment Management’s Office. Requests for non-disclosure must be filed annually. The College assumes that a student’s failure to file a request for non-disclosure indicates approval for disclosure.

The complete text of The Buckley Amendment is available for review in the Office of the Director of Enrollment Management.
Patent and Copyright Policy
Every invention, discovery, material, work, product, or any part thereof, that results from the efforts of a full or part-time employee, student, or outside consultant carried out while in the employment of, or under contract or agreement of any kind with, the College and that is produced or brought about in any fashion with the aid of the College’s facilities, staff, or through funds administered by the College shall, as between the College and the full or part-time employee, student, or outside consultant, be the property of the College. Any patents, trademarks, trade names, and/or trade secrets shall belong to the College and any legal protection applied for shall be applied for by the College or through an authorized agent, assignee, or licensee in the name of the College.

As a general rule, all rights to copyrightable material are the property of the creator. The creator shall be deemed to be the College where a specific contract so provides, where a full or part-time employee, student, or outside consultant is employed for the purpose of producing a specific copyrightable work, or where necessary to reflect the contribution of the College to the work, as in the case of software or audiovisual material of any kind.

As between the College and The State Board of Community Colleges, ownership of any of the above-described items shall be determined in accordance with applicable regulations of the State Board of Community Colleges.

The College may charge a reasonable rental fee for use of any of the above-described items and, further, if such item is a learned journal, work of art, book, publication, textbook, library book, form bulletin, or instructional supply, then it may, as allowed by the Unmstead Act, be offered for sale by the College.

This policy shall be deemed to be a part of any existing and/or future employment or consulting agreements of the College.

(approved by the CFCC Board of Trustees, March 17, 1994)

Computer Acceptable Use Policy
Purpose
College owned or operated computing resources are reserved for the educational, instructional, research, and administrative computing needs of the faculty, students, staff, and other individuals authorized by the College. The College’s computing resources include but are not limited to all College computers and hardware, access to the Internet or access to any College intranet provided through College owned or operated computers, online and offline storage, and network and communications facilities. Access to these computing resources is a privilege and, therefore, it is essential that all users exercise responsible ethical behavior when using these resources. Users are expected to read, understand, and comply with the College’s Acceptable Use Policy.

The College monitors access to the computing resources and reserves the right, without prior notice to users, to access the College’s computing resources and to use any and all information retrieved from the computing resources. Users do not have an expectation of privacy regarding their use of the computing resources, and by accessing and using the College’s computing resources, users expressly consent to such monitoring, access, and use by the College. Further, information contained on the College’s computing resources and in College accounts, including but not limited to e-mail, may be subject to inspection under the Public Records Law of the State of North Carolina.

The College does not attempt to articulate all required or unacceptable behavior by its users. Therefore, each user’s judgment on appropriate conduct must be relied upon. To assist in such judgment, users will follow this policy:

1. College computing resources are to be used only for educational, research, or instructional purposes for which access is provided, and are not to be used for any unauthorized purpose, including but not limited to commercial purposes, unauthorized access to remote computers or non-College related activities.

2. An access account assigned to a user must not be used by any other individual. Users are responsible for the proper use of their accounts, including proper password protection and appropriate use of the College’s computing resources. Obtaining another user’s password, allowing friends, family, co-workers, or any other individual use of your or another user’s account, or other unauthorized use of an access account is a serious violation of this policy.

3. Users shall not create, display, transmit, or make accessible threatening, racist, sexist, obscene, offensive, annoying or harassing language, e-mail messages, and/or material, including broadcasting unsolicited messages, sending unwanted e-mail, or impersonating other users. Remember - the College’s policies against discrimination and harassment apply to communications through the College’s computing resource or otherwise.

4. All computer software is protected by federal copyright law. In addition, most software is being proprietary and protected by legal licensing agreements. Users are responsible for being aware of the licensing restrictions for any software used on the College’s computing resources.

5. Users shall not download, reproduce and/or distribute copyrighted or licensed materials without proper authorization from the author or creator. Additionally, users shall not publish information, messages, graphics, or photographs on any web page, with the express permission of the author or creator.

6. Users shall not engage in activities to damage or disrupt the hardware, software, or any communication associated with the College’s computing resources, such as virus creation and propagation, wasting system resources, overloaded networks with excessive data, or any attempt to circumvent data protection schemes or uncover security loopholes.

7. Users shall not waste, monopolize, interfere or misuse the College’s computing resources by, for example, requesting an excessive number of copies from a printer, playing games or participating in chain letters or Ponzi schemes.
8. Users shall not access or damage any portion of the College’s computing resources or other College property, such as College records, applications or data. The College’s computing resources shall not be used for illegal activities.

9. Users learning of the misuse of the College’s computing resources or violations of the Acceptable Use Policy must notify a faculty member of the College or other College official immediately.

10. Any student identified as initiating or participating in the verbal, social, or physical bullying; whether in person, through social media or through electronic devices will be subject to disciplinary action as determined by the Office of the Vice President of Student Services.

**Enforcement**
Failure to follow the Acceptable Use policy and any misuse of the College’s computing resources may result in the suspension or revoking of access accounts, removal from the class with a grade of “F”, as well as other College disciplinary action including but not limited to conduct probation, suspension, or dismissal from the College. All College policies and procedures are applicable to users of the College’s computing resources. A violation of the Acceptable Use Policy is considered participation in an activity which disrupts the educational process of the College and is a violation of the Conduct Policy of the Catalog & Student Handbook, as well as other applicable policies and procedures of the College. Any conduct, which violates local, state, or federal laws, will result in the immediate loss of all access to the College computing resources and will be referred to appropriate College offices and/or law enforcement authorities.

**Code Of Conduct**
It is expected that at all times the student will conduct himself/herself as a responsible adult. Participation in any activity, in the opinion of the administration, disrupts the educational process or functioning of the College may result in disciplinary action. Specific violations of conduct include, but are not limited to the following:

- a. destruction of college property
- b. stealing
- c. gambling
- d. use of profane language
- e. engaging in personal combat
- f. possess or carry, whether openly or concealed, any weapon on campus; the only exception to this directive is in the case where training or job requirements of the students or employee requires that such be carried
- g. possession and/or use of alcoholic beverages
- h. possession and/or use of any drug as defined under the North Carolina Controlled Substance Act, G.S. 89-90 through G.S. 90-94
- i. noncompliance of the Tobacco Free Campus Policy
- j. initiating or participating in verbal, social, or physical bullying; whether in person, through social media, electronic devices or any other means.

Violation of these rules of conduct will not be tolerated in or on any part of the campus, its satellites, equipment it operates, or wherever its employees or students are required to be while performing their duties as employees or students. Any violation of these standards of behavior may result in dismissal from the College. Additional classroom rules will be designated by instructors or supervisors and must be followed by all. College administrators have the right to contact parents of any student under the age of 21 who has violated a federal, state, or local law, or any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance (g and h above).

Cape Fear Community College has a zero tolerance policy when it comes to drugs and alcohol consumption while representing the college during college events. Any violation will result in immediate suspension from the College for one academic year and complete withdrawal from all current classes; no exceptions. In addition, the suspended individual will have a notation placed on their permanent CFCC record.

For more information regarding Cape Fear Community College’s Drug and Alcohol Policy see page 42 of this handbook. Cape Fear Community College does not differentiate among unlawful users, sellers or pushers of drugs or alcohol. Any student who uses, possesses, sells, gives or in any way transfers alcoholic beverages or a controlled substance is subject to disciplinary proceedings by the college and referred for prosecution.

Any person observing conduct violation(s) should immediately contact the Vice President for Student Services.

**Conduct Probation and Suspension**
Any student whose conduct becomes unsatisfactory may be placed on conduct probation; however, a student is subject to immediate suspension if deemed necessary by the Vice President for Student Services. Any misconduct after a person is placed on conduct probation may result in prompt suspension.

**Right of Appeal**
The right of appeal is granted to any student who has been suspended from Cape Fear Community College for conduct violations. To initiate such an appeal, follow the process outlined in the “Grievance Procedure” section

**Classroom Rules**
According to College policy, no food or beverages are permitted in any classrooms, labs, or libraries at Cape Fear Community College.

**Weapons on Campus**
It is unlawful for any person to possess or carry, openly or concealed, any weapon on campus. The only exception made to this directive is in the case where training or job requirements of the student or employee requires that such a weapon be carried.
Crime Awareness and Campus Security Policy

I. Cape Fear Community College adheres to the following Crime Awareness and Campus Security Policy.

A. In case of an accident, illness, criminal actions, and other emergencies, the Vice President for Student Services must be notified immediately. (If any of the above situations occur at any campus site (ex-ample: Pender County Satellite) the appropriate Director of that location must be notified.

B. The Vice President of Business and Institutional Services or the designee is responsible for security and access to all campus facilities.

C. Campus law enforcement is handled by a local security agency. When further action is necessary they seek assistance from city police or county law enforcement.

D. Violations involving the possession, use, and sale of alcoholic beverages, possession and/or use of any drug as defined under the N.C. Controlled Substance Act will not be tolerated in or on any part of the campus, its satellites, equipment it operates, or wherever its employees or students are required to be while performing their duties as students or employees. Any violations of these standards of behavior may result in dismissal from the College.

E. All incidents (criminal and security) must be reported to the Vice President for Student Services (day) or Duty Administrator (night) and/or campus security guards.

F. All incidents (crime and security) must be reported on the appropriate form and turned in to the Vice President for Student Services.

G. Individuals seeking information about registered sex offenders in the region may contact the local Sheriff’s Department or go to the North Carolina State Bureau of Investigation website: https://www.ncdps.gov/Index2.cfm?a=000003,002965.

II. Security Operations

A. Cape Fear Community College (CFCC) has a contract with a local, professional security firm to provide security for the Wilmington campus as well as off campus facilities (example: Roland-Grise) when classes are being held or when it is requested by sponsors of special events. An on-site security system is in place at the Pender County facility also. These systems are tied into local police departments. Security services are also provided at the North Campus.

B. The guards have portable radios and are constantly patrolling. Should any event requiring security occur, the guards are to contact the City of Wilmington Police and then try to control event until police arrive. Events are reported to the appropriate personnel after the situation is under control. Security escorts are available to walk students, faculty and staff to their car at night. The switchboard operator, located on the second floor of the McLeod Building, will arrange escorts.

III. Information concerning crime awareness and campus security procedures and practices are disseminated to students and employees through the following.

A. Faculty, staff and student handouts.
B. Catalog and Student Handbook.
C. Orientation.

IV. Information data on crime and security violations has been collected since August 1, 1992. Results of the data will be reported and available for distribution to interested parties.

Source: New Hanover County Sheriff’s Office Reports

Campus Sex Crimes Prevention Act
The federal Campus Sex Crimes Prevention Act enacted on October 28, 2000 requires all colleges to issue a statement advising the campus community where information on registered sex offenders who are employed, enrolled, or volunteering at Cape Fear Community College can be obtained.

Sex Offender Notification
Persons who have been convicted of an offense against a minor or a sexually violent offense are required by law to register with the county sheriff in the county where they reside. The law requires that they also inform the county sheriff if they register for school. New Hanover and Pender County Sheriff’s Departments have indicated they would notify the college when a sex offender indicates they plan to attend CFCC. These notifications are intended to inform rather than create panic.

Notifications of registered sex offenders enrolling at Cape Fear Community College are received from the county law enforcement agencies and are sent to the Vice President for Student Services where they are placed in a binder and are available for viewing.

Cape Fear Community College campus location of Sex Offender Notification binders:
Union Station Building U-143 - Vice President for Student Services
McKeithan Center NA-100B - North Campus Student Services Director/Counselor

Additional Information:

Judicial Board
Cape Fear Community College supports students’ constitutional right to due process. The Judicial Board is the vehicle to insure the right of appeal.

The Judicial Board will consist of thirteen (13) representatives from all areas of the College - faculty, staff, students and administration. The entire board will hear appeals concerning academic suspension, conduct suspension and charges of discrimination and/or denial of service on the basis of race, color, national origin, age, religion, handicap or sex. The Judicial Board’s subcommittees will act on other categories of student appeals. The subcommittees, areas of responsibility, and composition are listed below.

Academic Subcommittee of the Judicial Board
The subcommittee will hear appeals in the matter of cheating and grades. The subcommittee consists of two (2) faculty, two (2) students and one (1) Student Services staff. One faculty member is to be chosen from each of the academic areas - vocational/technical and college transfer. The committee will select its chairman from the faculty membership.

Financial Aid Subcommittee of the Judicial Board
The subcommittee will hear appeals concerning suspension from the College’s financial aid programs. The committee will consist of one (1) representative from the following areas - Fiscal Services, Student Services, faculty, and student. The chairman will be selected by the committee.

Residency Status Subcommittee of the Judicial Board
The subcommittee will decide matters of residency status for tuition purpose. The committee will consist of one (1) representative from the following areas - Fiscal Services, Student Services, faculty, and student. The chairman will be selected by the committee.

Grievance Procedure
The right of appeal is granted to any student who has been placed on academic suspension, conduct suspension or feels he/she has been discriminated against or denied service on the basis of race, color, national origin, age, religion, disability or sex.

To initiate such an appeal, the student must submit a written appeal to the Vice President for Student Services within five (5) class days after being notified of the suspension or within five (5) class days of the grievous event. The Vice President for Student Services will present the appeal to the Judicial Board within five (5) class days of receipt of the written appeal. If the student wishes to appear before the Judicial Board the request must be included in the written appeal. The Vice President for Student Services will notify the student of the Judicial Board’s decision. The decision of the Judicial Board shall be final with no further appeals.

Written Student Complaint
As a matter of practice, CFCC subscribes to the philosophy that student complaints are best resolved on an informal basis. When a student has a complaint he/she should attempt to resolve concerns with college personnel having responsibilities directly
at the source of the complaint. When informal procedures do not resolve concerns, written student complaints should be sent to the Vice President for Student Services who will determine the appropriate college personnel to review the complaint. The student should receive written acknowledgment of the complaint from the Vice President for Student Services within five (5) working days.

The complaint will be reviewed and a collaborative effort will be made to resolve the complaint. Within twenty (20) working days of receipt of the complaint, the student will receive notification of the resolution of the complaint, or of the College’s position on the complaint.

**Student and Public Complaint Policy and Procedures**

Cape Fear Community College provides complaint procedures for students under established grievance procedures described in the **College Catalog and Student Handbook**. Members of the public may also register complaints by forwarding signed, written statements to the Office of the President, Cape Fear Community College, 411 N. Front Street, Wilmington, North Carolina. CFCC will not entertain complaints that are not in writing or which are anonymous, nor will it consider complaints sent electronically or through facsimile transmission. The President, or the President’s designee, may require further information from the complainant and may seek information from appropriate college offices, as needed, to respond to the complaint.

**Sexual Harassment**

Discriminatory personal conduct, including sexual harassment toward any member of the College, is a violation of both State and Federal law and college policy and cannot be tolerated in the College community.

All members of this college community are expected and instructed to conduct themselves in such a way as to contribute to an atmosphere free of sexual harassment. Sexual harassment of any employee or student by any other employee or student is a violation of the policy of this college and will not be tolerated.

Requests for sexual favors and other unwelcome verbal or physical conduct of a sexual nature by any employee or student constitutes sexual harassment when:

- submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment, academic or student status, or
- submission to or rejection of such conduct by an individual is used as the basis for employment decisions affecting that individual, or
- such conduct has the purpose or effect of interfering with an individual’s performance or creating an intimidating, hostile, or offensive environment in the workplace or the classroom.

Any student who believes that he or she has been subjected to sexual harassment in violation of this policy should make a confidential complaint to one of the Student Services counselors. If this is not feasible, the student may take the complaint to the Vice President for Student Services.

**Evacuation of Buildings**

An evacuation diagram is located on each floor and in each room of every building. The primary route for evacuating a building is indicated by a solid red line. If, for any reason, the primary route is blocked, use the secondary escape route indicated by a broken red line on the diagram. All occupants will follow this procedure EXCEPT HANDICAPPED PERSONS: CFCC staff will make provisions for all handicapped persons to be evacuated from the building by way of utilization of the outside stairwell and Wilmington Fire Department personnel.

**Emergency Evacuation**

Everyone must exit the building when the fire alarm sounds. IT IS NOT AN OPTION TO REMAIN IN THE BUILDING. Treat all alarms as the real thing. Students should take all personal belongings with them when evacuating the building.

**Drug and Alcohol Policy**

1. Cape Fear Community College does not differentiate among unlawful users, sellers, or pushers of drugs or alcohol. Any employee or student who unlawfully uses, possesses, sells, gives, or in any way transfers alcoholic beverages or a controlled substance is subject to disciplinary proceedings by the College, and referred for prosecution.

2. The term controlled substance means any drug listed in CFR part 1308 and other federal regulations, as well as those listed in Article V, Chapter 90 of North Carolina General Statutes. Generally, these are drugs which have a high potential for abuse such as: Marijuana, Cocaine, PCP, Heroin, and Crack among others. They also include legal drugs that are not prescribed by a licensed physician. The term alcoholic beverage includes beer, wine, whiskey and any other beverage listed in Chapter 188 of the General Statutes of North Carolina. Persons within the College community are responsible for knowing about and complying with the Cape Fear Community College Drug/Alcohol Policy.

3. Any employee or student who is convicted of violating any criminal drug or alcoholic beverage statute while in the workplace, on College premises, or as part of any College sponsored activity, will be subject to disciplinary action by the College up to and including termination or expulsion, and referred for prosecution. Specifically, any such person convicted of a felony, or a misdemeanor which results in an active prison sentence will, if a student, be expelled, or if an employee, be terminated from employment (subject to existing disciplinary policies applicable to state or federal law which may apply to employees). Other misdemeanors or convictions will be evaluated on a case-by-case basis and the specific penalties may range from written warnings with probationary status to enrollment expulsions and employment discharges. The College may also require the employee or student to successfully complete a drug abuse treatment program as a precondition for continued employment or enrollment. Persons charged with illegal drug/alcohol involvement may be suspended pending any legal proceedings if, it is determined by the President, or
his designee, that the persons continued presence within the College would pose a serious and immediate danger to the health or welfare of other persons within the College.

4. Each employee or student is required to inform the Personnel Director or the Vice President for Student Services, respectively, in writing within five (5) days after a conviction of any criminal drug or alcoholic beverage control statute where such violations occurred in the College workplace, on College premises, or as part of any College sponsored activity. A conviction means a plea or a finding of guilt (including a plea of nolo contendere) and the imposition of a sentence by a judge or jury in any federal or state court.

5. College Administrators have the right to contact parents of any student under the age of 21 that has violated a Federal, State, or local law, or any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance.

For those students or employees receiving or working under a federal grant, the College must notify the United States governmental agency from which a grant was made within ten (10) days of receipt of such notice from the grant employee, or otherwise after receiving actual notice of a criminal drug conviction. Appropriate disciplinary action will be taken by the College within 30 calendar days from the receipt of such notice. The law requires that all employees abide by this policy as a condition for continued employment on any federal grant.

Legal Consequences
The illegal use of drugs and alcohol constitutes a serious crime under federal, state, and local laws. Convictions may result in imprisonment, fines and/or mandatory community service. A drug conviction can disqualify a student for federal student aid. A record of a felony conviction may prevent a person from entering a chosen career. North Carolina law makes it illegal to manufacture, to sell or deliver, to possess with intent to sell or deliver, or to traffic controlled substances.

Under North Carolina law, the minimum age to purchase, possess, or consume any alcoholic beverage is 21 years old. Consumption of liquor or fortified wine by anyone 18 years old and younger is a Class 1 misdemeanor. Those 19- and 20-year-olds who drink beer or wine will be charged with a Class 3 misdemeanor. A person convicted for the first time of selling or providing alcohol to someone under 21 will receive a minimum sentence of a $250 fine and 25 hours of community service. For a second or subsequent offense within four years, the penalty is no less than a $500 fine and 150 hours of community service. A person convicted of aiding and abetting the sale or provision of alcohol to someone under 21 will receive a minimum sentence of a $250 fine and 25 hours of community service. For a second or subsequent offense within four years, the sentence is no less than a $1000 fine and 150 hours of community service. A driver may not consume any alcoholic beverages while driving. Driving after drinking with an alcohol concentration of .08 means a person is driving while impaired. No person may transport in the passenger area spirituous liquors in any container other than the manufacturer’s unopened original container. Violations may result in imprisonment, fine, mandatory community service and/or loss of driving privileges. Therefore, 19- or 20-year-olds who are convicted of an alcohol violation may have a criminal history that would affect professional organizations, and employers could use such a record to reject an applicant.

Federal Penalties and Sanctions for Illegal Possession of a Controlled Substance
• 21 U.S.C. 844(a) - 1st conviction: Up to 1 year imprisonment and fined at least $1000 but not more than $100,000, or both. After 1 prior drug conviction: At least 15 days in prison, not to exceed 2 years and fined at least $2,500 but not more than $250,000, or both. After 2 or more prior drug convictions: At least 90 days in prison, not to exceed 3 years and fined at least $5,000 but not more than $250,000, or both. Special sentencing provisions for possession of crack cocaine: Mandatory at least 5 years in prison, not to exceed 20 years and fined up to $250,000, or both, if:
  1st conviction and the amount of crack possessed exceeds 5 grams.
  2nd crack conviction and the amount of crack possessed exceeds 3 grams.
  3rd or subsequent crack conviction and the amount of crack possessed exceeds 1 gram.
• 21 U.S.C. 853 (a)(2) and 881 (a)(7) Forfeiture of personal and real property used to possess or to facilitate possession of a controlled substance if that offense is punishable by more than 1 year imprisonment. (See special sentencing provisions re: crack)
• 21 U.S.C. 881(a)(4) Forfeiture of vehicles, boats, aircraft or any other conveyance used to transport or conceal a controlled substance.
• 21 U.S.C. 844a Civil fine of up to $10,000.
• 21 U.S.C. 853a Denial of Federal benefits may apply, such as student loans, grants, contracts, and professional and commercial licenses.
• 18 U.S.C. 922(g) Ineligible to receive or purchase a firearm.

Miscellaneous: Revocation of certain Federal licenses and benefits, e.g. pilot licenses, public housing tenancy, etc., are vested within the authorities of individual Federal agencies. Note: These are only Federal penalties and sanctions. Additional State penalties and sanctions may apply.

Health Risks
No illicit drug is free of health risks. Most carry the danger of psychological or physical addiction. All cause distortion of brain functioning and can alter thinking, perception, and memory, as well as, affect behavior. The use of intravenous drugs also presents the risk of infection with potentially deadly diseases (e.g. AIDS develop as result of damage to the respiratory, circulatory, and other body systems). Every illicit drug has the potential to result in death—whether from the body’s own reaction to the abuse of drugs or from accidents caused by persons who are impaired. Although alcohol is not an illegal substance when consumed by adults over the age of 21, it presents many of the same health risks as illicit drugs. Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increases the incidence of a variety of aggressive acts, including spouse and child abuse. Moderate to high doses of alcohol cause marked impairments in higher mental functions; severely altering a person’s ability to learn.
and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described. Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver. Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

Available Resources
Many public and private resources are available for those needing assistance with drug or alcohol issues. In New Hanover County, call (910) 251-6530. In Brunswick County, call (910) 253-4485. In Pender County, call (910) 259-5476.

Another resource is the Alcohol/Drug Council of NC Information and Referral Service: (800) 688-4232. This is a drug abuse information and treatment referral line where individuals can get information and referrals to appropriate treatment facilities.

Counseling and Rehabilitation Services to Prevent Substance Abuse
Students, faculty, and staff may seek assistance with an alcohol or drug-related problem through Cape Fear Community College. A listing of available services and referrals will be provided in the Counseling Office of Student Services.

A copy of this policy is distributed annually to students and employees.

EXTENDED SERVICES
Continuing Education Department

General Course Information
The Continuing Education Department promotes the personal and professional development of individuals and employee groups by offering non-credit courses and seminars. Courses and seminars vary from a few hours in length to several hundred hours, depending on their purpose and content. Courses for the general public are developed and routinely advertised. Others are developed and customized for the current or future employees of client companies, and as a result, are not advertised to the general public. Continuing Education instruction generally includes a combination of lecture, demonstration and application and may be delivered in either a classroom setting or online learning environment.

The Continuing Education Department offers a broad range of educational services: basic skills and developmental assessments, GED testing, training and testing for professional licenses and certifications, career assessments, training needs assessments and job task analyses. Some specialized programs include the Small Business Center, WorkKeys testing, Customized Training Programs, Human Resource Development (HRD), workplace literacy, and English as a Second Language (ESL).

Classes are held at the Wilmington downtown campus, North Campus, Burgaw Center, and at other locations throughout New Hanover and Pender counties. Full details can be obtained by calling the office of Continuing Education at (910) 362-7170.

Directory of Services Areas
Continuing Education is divided into the following areas:

Basic Skills Division
- Adult Basic Education (ABE)
- General Education Development (GED)
- Adult High School Program (AHS)
- English as a Second Language (ESL)
- Compensatory Education Development (CED)
- Workforce Literacy Program

Corporate and Continuing Education Division
- Career Pathways Academies
- Career Readiness Certification Program (CRC)
- Certifications
- Computer Classes
- Customized Training Program (CTP)
- Ed2Go and other Online Courses
- French
- Human Resources Development (HRD)
- Italian
- Photography
Pre-Employment Skills Testing  
Project Management  
Project Skill-Up Program  
ServSafe Foods  
Sign Language  

Skilled Trades  
Electrical Apprenticeship Training  
Small Business Center (SBC)  
Spanish  

Short-Term Career Training Programs, such as:  
Barbering School  
Bank Teller  
Behavioral Health Technician  
Manicuring  
Medical Specialist  
Substance Abuse Counseling Program  

Teacher and Paraprofessional Training  
Teacher Recertification Classes

Admission  
Generally, any person who is 18 years of age or older, or whose high school class has graduated, is eligible for admission to Continuing Education classes. Applicants are usually admitted on a first-come, first-serve basis. Some classes have specific admission requirements. In such cases, applicants will be properly notified. High school juniors and seniors, 16 years of age and older, may enroll with permission from high school officials. Individuals interested in attending any occupational extension or community services course may register by visiting the college or attending the first class.
Registration and Special Information
For information concerning the current class offerings and their locations in New Hanover County, call (910) 362-7170.

For Pender County classes, call the CFCC Burgaw Center, call at (910) 362-7900 or (910) 259-4966.

For CFCC North Campus classes, call (910) 362-7700 or go to our website at http://cfcc.edu/ce/.

The CFCC Burgaw Center is located at 100 Industrial Drive in the Pender Progress Industrial Park. This location is approximately five blocks south of downtown Burgaw adjacent to Burgaw Middle School.

The North Campus is located at 4500 Blue Clay Road, Castle Hayne, NC.

All classes require pre-registration. Call (910) 362-7170 for specific registration information.

Class Schedule
Classes are normally scheduled on a continuous basis with new classes starting each month. Special seminars and industrial courses may be scheduled to begin at any time period appropriate to a company and Cape Fear Community College. Specific announcements of course offerings, registration dates, and places will be made through local news media and other appropriate means approximately three weeks prior to the beginning of the course. For current course information, please call (910) 362-7170. Course information is also accessible at the College’s website at http://cfcc.edu/ce/.

Minimum Enrollment Required
Normally a course will be offered when a minimum number of persons enroll. The college reserves the right to cancel any course when an insufficient number of people register.

Class Hours
The majority of occupational extension and community service courses are offered one or two evenings per week for 6-12 weeks. Courses may meet for one to four hours per evening. Special extension, industrial, and seminar programs may be scheduled at the convenience of the participants and the college.

Fees
For all occupational extension and community services courses, there is a required registration fee from $70.00 to $180.00, depending on the number of scheduled hours of instruction. In compliance with North Carolina statutes, however, this fee may be waived for selected individuals. Other costs in these classes may include textbooks and/or equipment and supplies and a $5.00 technology fee. In a limited number of self-supporting classes and seminars, special fees may be charged. If you are a North Carolina resident, 65 years old or older, you may request a waiver to take one occupational extension course for free each semester. Textbook and/or course supply fees may still be required. Registration fees are subject to change contingent upon action by the NC General Assembly. Refunds are not issued after the 10% census date of the course.

Withdrawal and Refund Policy
The Refund Policy, as set forth by the North Carolina General Assembly, follows in the next paragraph. To be eligible for a refund the student must officially withdraw from the class. The student must complete a refund request form. Any additional fees paid are nonrefundable, including professional liability insurance and technology fees.

A 100 percent tuition refund shall be made if the student officially withdraws from class before the first class meeting (fax: 910-362-7190 or email: ceregistrar@cfcc.edu). A written request must be dated and received by the Continuing Education Department, or instructor before the first class meeting.

A 75 percent tuition refund shall be made if the student officially withdraws from class prior to or on the 10 percent date of scheduled hours. A written request must be dated and received by the Continuing Education Department, or instructor prior to or on the 10 percent date of scheduled hours. Students are responsible for obtaining the 10 percent date from their instructor on the first class meeting.

A full refund shall be made for classes canceled by the college. Students do not have to request refunds in this case.

Continuing Education Registration - Campus Access Fee
All parking decals may be obtained in person Monday through Friday, 8 a.m.–10 p.m., and Saturday, 8 a.m.–5 p.m., at the front office desk of the BIG Center for classes on the Wilmington Campus.

At the Burgaw Center, parking decals may be obtained in person Monday through Friday, 8 a.m.–10 p.m., from the front desk.

At the North Campus, parking decals may be obtained in person from the Business Office cashier’s window, 8 a.m.–5 p.m., Monday through Friday.

Students are required to display parking passes on vehicles parked on campus at any site.
Basic Skills Division
The Basic Skills Division includes the following programs for adults 16 years of age or older, who wish to begin, continue, or expand their educational skills. All interested participants must demonstrate the ability to benefit from the program by being able to take one of the following pre-tests as determined by the college: CASAS, TABE. Students unable to complete the pre-test will be admitted to the program at a future date once they are able to complete the pre-test.

Adult Basic Education (ABE)
Adult High School Diploma (AHS)
High School Equivalency Exam Prep for the GED® Test
English As A Second Language (ESL)

All classes are offered at convenient times and locations. All classes are free. Anyone under 18 years of age must have school and parental release forms. High School Equivalency Exam Prep classes for the GED® Test, Adult High School and ESL classes are also offered online to students who meet eligibility requirements.

Basic Skills Attendance Policy for High School Equivalency Prep, ABE, ABE Essentials, ESL
Absences seriously disrupt students' progress in a class and diminish the quality of group interaction. Students are expected to punctually attend all lecture and laboratory sessions in the classes for which they are registered. Late arrivals and/or early departures will count toward total absences in classes. Attendance in online classes (Pre-GED, GED online, and ESL online) is measured not only by initial log-in but also by completion of 80% of the required course work. Students MUST also meet on the published meeting dates (registration/orientation, required testing dates). Students must be in attendance at least eighty (80%) percent of the clock hours of a class in order to remain in the class. Those who do not meet minimum attendance requirements will be dropped from the class for that session and will be given a grade of “U”.

Pre-registration/Orientation
To enroll in ABE, High School Equivalency Exam, or AHS classes at CFCC, students must attend a pre-registration and orientation session. No appointment is necessary. All sessions are held on the Wilmington Campus of CFCC. Students who wish to enroll in off-campus classes may register at the class site. Cost is FREE.

Adult Basic Education (ABE) Classes
The ABE program is designed for persons 16 or older with or without a high school diploma or its equivalency who function below the ninth grade level. Students receive individualized and classroom instruction in basic math, reading, and writing. These classes improve adults’ basic skills preparing them to enter the workforce, enhance daily living skills, prepare for the GED® Test or Adult High School Diploma classes and enroll in college.

For more information, call (910) 362-7179.

High School Equivalency Exam Prep Classes
This program is designed for persons 16 or older without a high school diploma or its equivalency and who function at or above the 9th grade level. Students receive individualized and classroom instruction to prepare for the four areas of the GED® Test. Classes are also available online to students who meet eligibility requirements.

For more information, call (910) 362-7179.

GED® Testing
Individuals wishing to take the high school equivalency exam must provide proof of age and identity. A valid, non-expired form of identification is required. The identification must be government issued and include: student’s name, address, date of birth, signature and photograph. GED Testing Service® accepts: passports, driver’s licenses, learner’s permits, nation/state/country identification cards and other forms of government-issued (national and foreign) ID including Matricula Consular. NC residency is not required for testing.

For more information, call (910) 362-7179.

Pre-GED Testing
Students must take and pass the Pre-GED lab before taking the GED test.

For more information, call (910) 362-7179.

Adult High School Diploma (AHS) Classes
The Adult High School (AHS) program is designed for adult learners 16 years of age or older who have not completed high school, but have academic skills at or above the 9th grade level. Students who are 16 or 17 years old may enroll only if they have officially withdrawn from public school. Students must complete 21 units to be eligible to graduate. Classes meet nightly, Monday through Thursday, from 5:30 p.m. until 9:30 p.m. at campus sites in Wilmington and Burgaw. The cost is FREE. Registration for all AHS classes is held at the Wilmington campus.

Classes are also available online to students who meet eligibility requirements.

For information, please call (910) 362-7182.

Adult Basic Education Essentials
The ABE Essentials classes are designed for adults that have completed high school but want to continue improving their reading, writing and math skills with the goal of getting a job. Classes meet Monday through Thursday on campus and Monday through Friday at off-campus locations. The cost is FREE.

Call (910) 362-7457 for more information.

English as a Second Language (ESL) Classes
The ESL program is designed for persons 16 years or older whose native language is not English. Instruction focuses on English skills that will enable students to interact effectively in the community, workplace, or in higher education.
Classes are designed to serve the needs of those individuals who have no English skills up to and including individuals who are preparing for university study. ESL classes help individuals develop skills to secure a job, help children with schoolwork, talk on the phone, meet new people, and improve communication skills.

For information call (910) 362-7184.

**Corporate & Continuing Education Division**

**Center for Business, Industry, and Government (BIG) Training**

805 North Third Street
Wilmington, North Carolina 28401

Located at the BIG Center, the Corporate and Continuing Education Division offers courses in a wide variety of areas, such as work/life skills enhancement, as well as seminars for small businesses and customized industry training in New Hanover and Pender counties. To request industry training or receive information on upcoming classes or seminars, call (910) 362-7170, check our web page at http://cfcc.edu/ce/.

**Barber School**

This program consists of 4 courses students take consecutively to prepare them for the NC State Barbering Exam. The program takes approximately 14 months to complete. Day and evening courses are available.

For more information, call (910) 362-7693.

**Certified Production Technician**

This course provides students with training in four critical production functions – safety, quality and continuous improvement, manufacturing processes and production, and maintenance awareness. At the end of each module, students will take the Manufacturing Skill Standards Council (MSSC) assessment. Upon successfully completing each assessment students will receive a certification. Once all four assessments are passed, the student will be designated as a fully Certified Production Technician.

**Certifications**

The Center for Business, Industry and Government Training offers a variety of certification classes to meet the continuing education requirements of trade contractors and other occupations including HVAC, electrical, plumbing, and general contracting.

For more information, call (910) 362-7319.

**EPA/CFC Refrigerant Recovery/Recycling Certification Exam**

Course designed for HVAC technical personnel to assist in meeting EPA mandated training requirements in preparation for the N.C. State Board of Refrigeration Examiners. Course is offered every three months.

For information and schedule, call (910) 362-7189.

**Electrical Contractors’ Renewal Course Programs**

The Electrical Contractors’ Renewal Courses are held throughout the year. This provides Electrical Contractors the six hours of mandatory continuing education credits required to maintain a license.

For more information, call (910) 362-7319.

**Computer Classes**

Many computer classes covering a variety of software and applications are offered through the Division of Continuing Education. Classes include: Intro to the PC and Internet, Introduction to Computers, Personal Computer Troubleshooting, Microsoft Office Suite, Creating Web Pages, Flash, PhotoShop, Build and Upgrade your PC, and Computer Applications in Spanish.

For more information, call (910) 362-7572.

**Customized Training Program**

The Division of Corporate and Continuing Education provides training for industry at CFCC as well as on-site at your business. Topics vary widely according to industry need and can be customized. Examples of industry offerings include: technical training, basic computer and software program skills, oral and written communication skills, management, supervision, quality standards, customer service, and team-building. The Customized Training Program supports the economic development efforts of the State by providing education and training opportunities for eligible businesses and industries. Amended in 2008, this program integrates the New and Expanding Industry Training Program and the Customized Industry Training Program to more effectively respond to business and industry (G.S. 115D-5.1e). The Customized Training Program also includes the former Focused Industry Training Program and shall offer programs and training services to assist new and existing business and industry to remain productive, profitable, and within the State.

The program was developed in recognition of the fact that one of the most important factors for a business or industry considering locating, expanding, or remaining in North Carolina is the ability of the State to ensure the presence of a well-trained workforce. The program is designed to react quickly to the needs of businesses and to respect the confidential nature of proprietary processes and information within those businesses.

The purpose of the Customized Training Program is to provide customized training assistance in support of full-time production and direct customer service positions created in the State of North Carolina, thereby enhancing the growth potential of companies located in the state while simultaneously preparing North Carolina’s workforce with the skills essential to successful employment in emerging industries.

For more information, call (910) 362-7050.
Ed2Go and Other Online Courses
The Division of Corporate and Continuing Education offers over 300 instructor-led courses that are available via the Internet. Topic areas include: computer applications, web design, customer service, project management, production and inventory management, small business, healthy lifestyle, writing, and many more. All courses begin on the third Wednesday of every month.

For more information, call (910) 362-7572 or log onto http://ed2go.com/cfcc.

Electrical Apprenticeship Training
Offered in partnership with the NC Department of Labor, this program is designed to provide the specific skills associated with the electrical trade. On-the-job training, combined with classroom instruction, develops the employees’ hands-on-skills, and results in the award of a certificate as a journeyman in the trade.

For more information, call (910) 362-7319.

Human Resources Development
The Human Resources Development (HRD) program is designed for individuals who wish to become more marketable by upgrading their employability skills. Classes are year round and include Introduction to Computers, Resume Preparation, Interview Coaching, Career Interests and Aptitudes, Confidence Building, and Self-Discovery. Classes are reasonably priced and the fee may be waived for those who qualify.

For more information, call (910) 362-7324

Career Pathways Academies
Career Pathways Academies are offered under the HRD Program. Each academy is 9 to 12 weeks long and consists of 3 to 6 courses bundled together in order to give the students an overall knowledge and some hands-on training in certain career paths, such as skilled trades, office administration, health sciences, and sales/customer service. Additional academies are developed due to training needs of local employers and their potential employees.

For more information, call (910) 362-7324

Career Readiness Certification (CRC)
Cape Fear Community College in partnership with the Employment Security Commission, JobLink Centers in New Hanover and Pender counties, is offering the Career Readiness Certificate (CRC) program. The CRC is a portable credential recognized by many employers across the State and nationwide that allows a job candidate to prove his/her skills in three areas Applied Mathematics, Reading and Locating information and other skill levels utilized in each occupation. After taking the KeyTrain pre-assessments students will know if there are any skills gaps and exactly what areas in which they need to improve when considering specific jobs.

For more information, call (910) 362-7050, or go to our website at http://cfcc.edu/ce/crc/.

Languages
Classes in all levels of Spanish are available in addition to Speed Spanish, Speak Spanish for Medical Professionals, and Spanish for the Workplace.

For more information, call (910) 362-7572.

Medical Specialist
This program is made up of 4 courses: Anatomy & Physiology and Medical Terminology, Introduction to Medical Coding, Advanced Medical Coding, and Medical Coding Exam Prep. Students may choose two options for training, either online or in the classroom. Students wanting to get into the program must attend an orientation session prior to the start of the semester.

For more information, call (910) 362-7196.

ServSafe Foods
The National Restaurant Foundation, in conjunction with CFCC, offers certification to those who successfully complete this course.

For more information, call (910) 362-7319.

Small Business Center
The Small Business Center is a provider of education, high-quality/low-cost training, and referrals developed to increase the success rate and number of viable small businesses in Pender and New Hanover County. Contact the SBC at 362-7216.

The following services are provided:
• CLASSES/SEMINARS: Targeted to prospective & existing Small Business owners including topics like Business Basics, Marketing, Financials, Writing the Business Plan, Quickbooks, Grant Writing, and Customer Service just to name a few!
• COUNSELING: FREE, confidential one-on-one business counseling
• REFERENCE LIBRARY: Access to our Reference Library is available by appointment and includes Internet Access, business planning, and accounting software, marketing/web-site videos, and business books.

Visit us online at http://www.cfcc.edu/sbc to register for classes, find how-to startup documents, and download helpful demographics and statistics to aid in writing a business plan. Or call us at 362-7216.
Substance Abuse Counseling Program
This program gives students the 270 hours required for the educational training for becoming a Certified Substance Abuse Counselor. This training is approved by the North Carolina Substance Abuse Professional Practice Board. Other requirements for becoming certified can be found at www.ncsappb.org.

For more information, call (910) 362-7319.

To get more information about all the training programs offered through Corporate and Continuing Education, find an updated list of all upcoming classes and events, or to subscribe to our listserv to receive our bi-monthly newsletter, please go to our website at http://cfcc.edu/ce/ccet/ or like us on Facebook (www.facebook.com/CFCCConEd).

Public Health and Safety Division

Emergency Medical Technician/Paramedic Program
For information and class schedules, call (910) 362-7512 or (910) 362-7751.

Emergency Medical Technician training prepares the student to perform basic and advanced patient care in a pre-hospital setting. After successful completion of the course, a state examination is required for credentialing. Courses offered include initial Medical Responder, Emergency Medical Technician, Intermediate, Paramedic, as well as continuing education for all levels of EMT training.

Nurse Aide Program
For Wilmington information and class schedules, call (910) 362-7218 or (910) 362-7370. For Burgaw Center information and class schedules call (910) 259-4966 or (910) 362-7370.

Nurse Aide Level I - Prepares graduates to provide personal care and perform basic nursing skills for the elderly and other adults.

Nurse Aide Refresher - A refresher course designed for skill/competency testing of Nurse Aide I employees.

Nurse Aide Level II - Prepares Nurse Aides to perform more complex nursing skills.

Nurse Aide Level II Refresher (with Competency Assessment) - This Refresher with competency assessment is available for the Nurse Aide II who has an expired Nurse Aide II listing.

Personal and Home Care Aide - this course provides advanced training in Home Care for the Nurse Aide I.

Defensive Driving
For information and class schedules, call (910) 362-7219, or (910) 362-7175.

This four-hour course is offered in conjunction with the District Attorney’s Office in New Hanover and Pender counties. Anyone receiving a moving traffic citation that did not result in an accident may be eligible to take the course. After attending the court date and gaining permission from the District Attorney’s Office to take the course, and upon completion of the course, the moving violation is submitted to DMV as a non-moving violation. Offered at the CFCC main campus and Burgaw Center.

An eight-hour Defensive Driving Course is offered for repeat offenders or for excessive speed offenders.

Alive@25
This course is designed to teach defensive driving techniques to traffic violators ages 16-25. Upon successful completion of the course, moving violations will be changed to non-moving violations, so no driver’s license or insurance points will be assessed.

Motorcycle Rider Safety Course
For information and class schedules, call (910) 362-7219 or 362-7175.

In-Service Law Enforcement Continuing Education Courses
Courses are available for sworn law enforcement officers affiliated with an existing law enforcement agency. For more information call (910) 362-7217.

Fire/Rescue & Emergency Management Training Division
The Fire/Rescue Emergency Management Training Division offers fire and rescue training as well as emergency management certification classes in New Hanover and Pender counties. Classes for NC OSFM State Certification and NC State Emergency Management Certification programs are offered by coordinating with area fire departments and emergency management personnel. Firefighter recertification and courses in the latest technology are also offered locally. CERT (Community Emergency Response Team), fire brigade/emergency response team training and customized training programs are available upon request. Call: (910) 362-7799 or (910) 362-7714 for more information.

NIMS ICS (National Incident Management System) Incident Command System
The Secretary of Homeland Security was directed by President Bush to develop and administer a National Incident Management System. This system provides a consistent nationwide template to enable all government, private-sector, and nongovernmental organizations, including all first responders, to work together effectively during domestic incidents. The intent of NIMS is to be applicable across a full spectrum of potential incidents and hazard scenarios, regardless of size or complexity and improve coordination and cooperation between public and private entities in a variety of domestic incident management activities. NIMS provides for interoperability and compatibility among all responders.

NIMS ICS-700 National Incident Management System-An Introduction
NIMS ICS-100 NIMS: Introduction to the Incident Command System
NIMS ICS-200 NIMS: ICS for Single Resources and Initial Action Incidents

Eastern Carolina Firefighters’ Association Fire & Rescue School - annually in October

Call 362-7799 or 362-7713 for more information.

Wastewater Treatment Plant Operator
I, II, III, IV
This course is designed to provide the individual with a general knowledge of the operation of wastewater treatment systems. The course will provide the individual with knowledge of the laws and regulations related to wastewater treatment systems operation, equipment usually employed in such plants, and the ability to describe the general maintenance requirements for such equipment. This course is designed to assist the individual in preparation for the North Carolina Water Pollution Control System Operators Certification Commission (WPCSOCC) Examination.

Recreation and Leisure Programs
Recreation and Leisure classes are an integral part of Continuing Education. Classes such as art, home economics, and general interest are offered mornings, afternoons, and evenings. These serve approximately 3,000 students in more than 400 classes per year. Classes are conducted at various locations throughout New Hanover and Pender County. Classes are also coordinated with local community centers, senior citizens centers, and recreation centers. Likewise, businesses, churches, and schools as well as public facilities are utilized. Courses are frequently designed to meet specific requests; therefore, this area is expected to change with the interests and needs of the community. Students are regularly surveyed for comments and suggestions.

Concealed Carry Safety Course
Teaches the aspects of the N.C. Concealed Carry-Handgun law including fundamentals of safety and basic marksmanship. Six (6) hours of classroom and six (6) hours range training. The course is offered twice a year.

Call (910) 362-7189 for information and class schedules.

Auto Safety Inspection Classes
These classes are for auto inspection certification or recertification as required by the State of North Carolina.

Marine Captain’s Course
This course will provide students with the information necessary to take the U.S. Coast Guard examination for licensing as an Operator of Uninspected Passenger Vessels or the Master’s License for vessels up to 100 gross tons, on inland, near coastal or ocean waters.

Notary
This course is required by the state of North Carolina in order to apply to become a notary. All requirements for becoming a notary are covered in this course.

Aviation Ground School
This course is designed to provide all ground school training for people interested in flying or working with the FAA as a tower operator or radar operator. This course is only classroom time and does not include flight lessons.

Small Gasoline Engine Repair
This course is designed to provide the student with hands-on knowledge of small gasoline engine repairs. The student will learn how to completely disassemble engines and check for problems on a variety of small engines. Upon completion stu-
dents will be able to repair and explain operating principles of engines, name major parts of engines, work safely in the shop. Please call to reserve a seat. Register and pay at first class.

**Celestial Navigation**
This course will cover the theory and technique of finding one’s position at sea through sextant observations of celestial bodies. Register and pay at first class.

**Coastal Navigation**
This course provides training in marine piloting and electronic navigation techniques. Upon completion, students should be able to demonstrate competence in the safe navigation of vessels utilizing and interpreting information obtained from navigational aids. Register and pay at first class.

**Assistance Towing Endorsement**
This 4 hour U.S. Coast Guard–approved course is intended for those who hold, or are in the process of attaining, their OUPV 6-Passenger or Master’s Licenses. In order to commercially assist other vessels that may be aground, disabled, out of fuel, or experiencing some other malfunction, a boat operator must hold this “Assistance Towing” Endorsement.

**Marine Captain’s License Preparation & Marine Captain’s Exam**
This course will provide students with the information necessary to take the US Coast Guard examination for licensing as an Operator of Un-Inspected Passenger Vessels or the Masters License for vessels up to 100 gross tons, on inland, near coastal or ocean waters. Register and pay at first class.

**Basic Cabinet Making**
This course is designed for the individual who wants to learn how to design and construct their own cabinets for their house or garage. Emphasis will be placed on learning how to draw up plans, select the right materials, operate all types of machinery/tools and safety procedures.

**Heritage Arts/Crafts**
Courses will cover a specific skill level such as introductory, intermediate, or advanced levels. Course work will include discussion on the history and trends of the art, practice in selected heritage arts, and information to build and supply appropriate studios. Upon completion, students will be prepared to either advance to a higher skill level or to fabricate and market their goods. Samples of classes include: Woodcarving, Glass Blowing, Steel Drums, Knitting.

**Oil Painting**
This course is designed to enable each student to be familiar with and enjoy using various materials connected to the art of oil painting. Participants will perform at his or her ability to complete painting project(s) using the above listed tools/materials. It is designed for beginners, intermediate and advanced learners. Students do not have to know how to draw in order to paint.

**Continuing Education for Teachers and Para Educators**
New Hanover and Pender counties’ teachers, active and retired, and para educators (teaching assistants, substitutes, child care and camp workers) may register for short courses. Continuing Education Units (CEUs) are provided for license renewal and No Child Left Behind Course requirements. Active teachers and para educators from counties outside New Hanover and Pender must get prior approval from central office professional development administrators. Parents and Home School Operators may also attend classes as space allows. To register for classes and receive additional details, call (910) 362-7199.

All day and evening classes provide CEUs for renewal credit and/or certification needs. Principals and Headmasters may also request after-school CFCC instructors for customized courses to be taught in school classrooms.

Many teachers and para educator staff short courses in Learning Disabilities, Behaviors, etc… provide CFCC Certificates of Completion that are also useful in gaining employment in summer and after-school programs for non-profit agencies and other businesses.

**Reading Strategies: Across The Curriculum**
Explore successful approaches to teaching English and Reading. Through exploration and practicing strategies for motivation, instruction, and evaluation of readers, instructors will create excitement and motivation for participants through hands-on implementation of strategies. 3.0 CEUs

**Reading Strategies: African-American Literature**
Participants review writings of historical significance from literary works that focus on African American culture. Poetry, prose, short stories and excerpts from novels linked to four centuries will provide an additional platform for the promotion of literacy among students in the classroom setting. Grade level specific strategies will be explored. 3.0 CEUs

**Understanding Behavior**
Teachers, and paraprofessional school and child care employees will study age specific behavior patterns. The course will include techniques for managing pupils with a variety of personality traits and multiple intelligences. Behavior disorders, effective disciplinary tactics and behavior modification plans will focus instruction.

**Learning Disabilities**
Participants review scholastic literature and theories about classifications of learning disabilities, and detection methodologies. The uses of appropriate individualized lesson plans and multi-sensory activities are emphasized. Instruction also includes details about communication needs with parents and fellow faculty and staff.

**Effective Teacher Training**
The course introduces educators to appropriate and effective teaching practices. Lecture-discussion periods focus on learning theories and hands-on participatory practices that are useful in classroom teaching. Successful completion of this program meets the North Carolina Department of Public Instruction requirements for teachers and substitutes. 3.0 CEUs
Spanish for Educators
This introductory course provides useful information for educators who have limited knowledge or no education in the Spanish language. Participants will learn phrases for useful dialogue with students and parents. Greetings, verbal directives linked to classroom and school ground needs, and basic complimentary, congratulatory and disciplinary statements. Educators also learn to write simple notes to parents/guardians. 2.0 CEUs or 3.0 CEUs

Basic Video Production/Short Documentary Film-Making For Educators and Others
Educators and others learn to produce short films and edit video footage of classes, special programs and projects. Learning about the most effective sound and lighting practices complements instructions on subjects’ movements, and the best techniques for use of mini cams and other high powered equipment. The CFCC Television Studio Manager, Tim Vandenberg will instruct. Call or Email for scheduling an individual or group.

Senior Citizen Computer Academy
This class is for retired teachers, and area residents from a variety of vocations who never worked or communicated in the high tech world. CFCC offers a bridge to this digital divide. Seniors can enjoy learning in age-specific and slower paced lab settings. Basic Introductory, and Intermediate courses are available. Classes are scheduled each semester.

Burgaw Center
100 East Industrial Drive, Burgaw, North Carolina 28425
Phone: (910) 259-4966 or 362-7900 Fax: (910) 259-9048

The CFCC Burgaw Center offers continuing education classes at this Pender County location. Pre-registration is required, call: (910) 259-4966 or (910) 362-7901. The curriculum classes that meet in Burgaw Center are registered through the main campus at CFCC in Wilmington, NC.

Surf City Community Center
201 Community Center Drive
Surf City, North Carolina 28445

The CFCC Burgaw Center offers continuing education classes at the Surf City Community Center. Pre-registration is required, call: (910) 259-4966 or (910) 362-7900.

Online Learning
Online Learning (OL) refers to all courses in which a portion of instruction takes place online. There are two types of OL courses: Internet and Hybrid. Internet courses are fully online courses where the students and instructors typically do not meet face-to-face, but instead interact entirely in an online environment. These courses are always indicated by an “I” in the course code (e.g. CIS-110-I2 and BIO-240-I1). Hybrid courses have both a face-to-face (in-classroom) component and an online component. These courses are always indicated by a “Y” in the course code (e.g. BIO-112-DY1 and HUM-115-DYE1A).

Online Learning courses follow the same college requirements as traditional courses. College policies, such as admission, withdrawal, financial aid, etc. apply to OL courses. OL courses are not self-paced. They follow the same college calendar as face-to-face courses.

Online Learning requires students to pace their work and meet regular deadlines. These courses can, when fully online, require a minimum of 6-10 hours of independent work each week. Because of this, OL courses are best suited for students who are strongly self-motivated, self-disciplined, and have excellent time management skills. Additionally, because all OL courses require the use of a computer, they should only be taken by students who are already comfortable using computers for various types of applications, such as word processing, web browsing, chat, discussion boards, etc., and who are proficient in communicating in writing alone. A tutorial for Blackboard—the online environment where OL courses are taught—is available at http://online.cfcc.edu and can be accessed using the generic username and password given on that page.

More Online Learning resources can be found at http://cfcc.edu/online/.

Online Learning Attendance
Attendance in Online Learning courses is measured not only by first login, but also by completing an initial “Enrollment Verification” assignment and completion of required course work. In Hybrid courses, where students meet online and face-to-face, attendance is measured by a combination of presence at the first (and subsequent) face-to-face-meeting, plus completion of the online “Enrollment Verification” assignment and assigned coursework.

“Enrollment Verification” (EV) activities, sometimes called “Introduction” or “Ice Breaker,” require the student to 1) login to the Blackboard course site and 2) complete an activity that involves engagement with course material. Failure to login and complete the EV activities for each Internet and Hybrid course by the 10 percent date of the class (which should be announced by the instructor) may result in the student being dropped by the instructor as a “No Show” and assigned a non-punitive transcript grade of “NS.” No tuition and fee adjustments will be made.

Help completing the Enrollment Verification activity can be found at http://cfcc.edu/online/help-page/#ev.

CFCC Disclosure Statement of Compliance for
Promotional Materials of Gainful Employment Programs.

Programs designated as Gainful Employment (GE) are marked as such to comply with federal regulations requiring colleges to make available certain information about students enrolled in certain Title IV eligible programs that have been identified as gainful employment (GE) programs for a recognized occupation. For more information about graduation rates, the median debt of students who completed the program and other information, please visit our website at http://cfcc.edu/studentserv/gainfulemployment/ [December, 2011].
General Education Values Statement

CFCC’s General Education courses provide learners the opportunity to attain a diverse set of skills, knowledge, and attributes. General Education courses may enhance learners’ existing skills or introduce learners to new disciplines and subject areas. Upon completing CFCC’s General Education Core of two-year programs, learners will have had the opportunity to develop competency in the following areas:

• Critical Thinking
• Communication--Written and Oral
• Global Awareness
• Quantitative Skills
• Scientific Concepts and Application
• Computer Skills

These areas of emphasis provide the academic foundation that learners need in order to succeed at the advanced levels of their academic and professional careers. Furthermore, these areas of emphasis reflect CFCC’s commitment to building a “future-oriented workforce and a community of lifelong learners,” as stated in the college’s vision statement. Finally, the General Education Core aims to promote learners’ appreciation for intellectual rigor, academic integrity, cultural diversity, and responsible citizenship.

North Carolina General Education Curriculum

All two-year degree programs at Cape Fear Community College (CFCC) comply with the program standards established by the North Carolina Community College System and include the appropriate number of general education core requirements: each degree program has a minimum of 15 credit hours in the general education core. The Associate in Applied Science and the Associate in General Education have the required 15 credit hours. Effective fall of 2014, the revised Associate in Arts and Associate in Science programs will have a minimum of 45 general education courses and a minimum of 15 electives or other requirements. The Associate in Fine Arts programs continue to have the required 28 credit hours. In the transfer programs, the core classes may be used as electives, but the electives may not be used as core requirements.

The general education subject areas may include some or all of the following: communications, humanities and fine arts, social and behavioral sciences, natural sciences—physical and biological, and mathematics. Degree of attainment and expected demonstration of these competencies are dependent upon the unique needs of the degree, diploma, and certificate program. More information may be found in the General Education Core Competency matrix published on the CFCC General Education website.

College Transfer/University Parallel General Information and Articulation Agreements

University of North Carolina Minimum Admission Requirements, Effective Fall 2006

(More commonly referred to as “Minimum Course Requirements” or “MCR”)

To enroll in a senior institution in the University of North Carolina (UNC) System, students whose high school class graduated in 1990 or later must have completed the following high school requirements:

• Four (4) units of English (emphasizing grammar, composition, and literature)
• Two (2) units of a language other than English
• Four (4) units of mathematics in any of the following combinations:
  • Algebra I and II and geometry and one unit beyond Algebra II, or
  • Algebra I and II and two units beyond Algebra II, or
  • Integrated Mathematics I, II, and III and one unit beyond Integrated Math III (The fourth unit of mathematics affects applicants to all UNC institutions except the North Carolina School of the Arts. The mathematics courses with Algebra II as a prerequisite that meet the new UNC Minimum Course Requirement are AP Calculus; AP Statistics; Pre-Calculus, formerly Advanced Math; Discrete Mathematics; IB Mathematics IV; and Advanced Functions and Modeling.)
• Two (2) units of social studies (including one unit of US history)
• Three (3) units of science (including a unit of life or biological science, a unit of physical science, and at least one laboratory course).

If a student has not met all the above requirements, the student is considered deficient in MCR. To remove an MCR deficiency and enroll in the UNC System, a student may choose one of the following options:

1. Earn an Associate in Arts degree, an Associate in Science degree, a baccalaureate, or any other higher degree.
2. Complete the following:
   • Six (6) semester hours of freshman composition.
   • Six (6) semester hours of college-level mathematics (must have an M-A-T prefix).
   • Six (6) semester hours of natural sciences.
   • Six (6) semester hours of social and behavioral sciences.
   • Six (6) semester hours of a foreign-language sequence (for students who graduate from high school in 2003-04 and beyond).

Students should always check with the Admissions Office of the receiving institution for the most current transfer
COLLEGE TRANSFER/UNIVERSITY PARALLEL PROGRAMS

To receive the maximum benefit from the CAA, students may transfer. Only 60-61 semester hours are guaranteed for the foreign language and/or health and physical education requirements. Students must meet the receiving university's electives may not be used to fulfill general education credit hours and a minimum of 15 electives. Since fall of 2014, both degrees consist of a minimum of 45 general education credit hours and a minimum of 15 electives. Since the Associate in Fine Arts degree contains only 28 semester hours in the general education core, students may still be required to complete the general education courses of the receiving institution. The general education courses provide opportunities for students to know the philosophy, literature, institutions, and art of their own culture and other cultures; to understand math and science; to communicate with others and develop a sense of community. These courses also help students achieve competencies in the following: reading, writing, oral communication, fundamental mathematical skills, and the basic use of computers. The electives provide opportunities for students to explore other areas of interest.

While general education courses may be used as electives, electives may not be used to fulfill general education requirements. Students must meet the receiving university’s foreign language and/or health and physical education requirements, if applicable, before or after transfer to the senior institution. Only 60-61 semester hours are guaranteed to transfer. To receive the maximum benefit from the CAA, students may transfer as juniors if they follow these guidelines:

- Earn an Associate in Arts degree or an Associate in Science degree.
- Earn a grade of “C” or better in all CAA courses.
- Earn an overall grade-point average of a “C” or a 2.0 at the time of transfer (Note: If the entering grade-point average of the receiving institution is higher than the 2.0 CAA grade-point average, the student must comply with the requirement of the receiving institution. Students should always contact the receiving institutions for the latest information about the admission and program standards.)
- Obtain acceptance at the UNC institution.

Under the CAA, no student is guaranteed admission to the UNC institution of his/her choice or to any specific program or professional school in the institution. Admission is a competitive process.

Students Not Completing the Associate in Arts or Associate in Science Degrees

A North Carolina community college student who satisfactorily completes, with a grade of “C” or better, courses identified in the Universal General Education Transfer Component (UGETC) will receive credit applied toward the university’s lower-division general education course requirements, subject to the following distribution limit: maximum of 3 hours in English Composition, 9 hours in Humanities/Fine Arts/Communications, 9 hours in Social/Behavioral Sciences, 8 hours in Mathematics, and 8 hours in the Natural Sciences.

A North Carolina community college student who satisfactorily completes a transfer course that is not designated as a UGETC course will receive transfer credit for the course. The receiving institution will determine whether the course will count as general education, pre-major, or elective credit. (Source: CAA Manual, February 21, 2014)

Transfer of Courses Not Originated at North Carolina Community Colleges

Transfer credit for courses that originate at a UNC institution or an independent college or university that is part of the CAA is acceptable as part of a student’s successfully completed general education core or associate in arts or associate in science program under the CAA.

Transfer courses that do not originate at a North Carolina community college may be used under the CAA with the following stipulations:

a. Courses must be completed at a regionally accredited institution of higher education (like the Southern Association of Colleges and Schools, the North Central Association of Colleges and Schools, and the New England Association of Schools and Colleges); and
b. Courses must meet the general education requirements; and
c. Courses may total no more than 14 semester hours of credit of the general education course credit.

For courses not originating at a North Carolina community college, if the courses are used to complete the associate in arts or science degree, the courses will be taken as a complete package. Otherwise, if 14 or fewer hours are presented without completion of the associate in arts or science, then the receiving institution will consider the courses on a course-by-course basis.

Transfer Assured Admissions Policy (TAAP)

The Comprehensive Articulation Agreement (CAA) assures the admission of a North Carolina community college
graduate to one of the sixteen (16) University of North Carolina (UNC) institutions with the following stipulations:

- Admission is not assured to a specific campus or program or major.
- Students must have graduated from a North Carolina community college with an Associate in Arts or an Associate in Science degree.
- Students must meet all requirements of the CAA.
- Students must have a minimum grade-point average of 2.0 on a 4.0 scale, as calculated by the college from which they graduated, and a grade of “C” or better in all CAA courses. (Note: If the entering grade-point average of the receiving institution is higher than the 2.0 CAA grade-point average, the student must comply with the requirement of the receiving institution. Students should always contact the receiving institutions for the latest information about admission and program standards.)
- Students must be academically eligible for re-admission to the last institution attended.
- Students must meet judicial requirements for the institution to which they apply.
- Students must meet all application requirements at the receiving institution, including the submission of all required documentation by stated deadlines.

If a student is denied admission to a UNC institution, he or she should receive a letter from that institution directing the student to the College Foundation of North Carolina (CFNC) website. At the CFNC website, the student will be presented with the conditions of the TAAP. If these conditions are met, the student will be given information regarding space availability and contacts within other UNC institutions. The student should contact those institutions and get specific information about admissions and available majors.

If the steps above do not result in admission to a UNC institution, then the student should contact the CFNC Resource Center at 1-866-866-CFNC.

The Articulation Agreement Between Cape Fear Community College and The University of North Carolina at Wilmington

Effective March 1, 1999, the University of North Carolina at Wilmington (UNCW) agrees to accept for academic credit college transfer course work completed at Cape Fear Community College (CFCC). Graduates of a college transfer program at CFCC may receive automatic admission provided that space is available, which is usually in the summer and fall, and may transfer to UNCW as a junior if they meet the following criteria:

- Earn at least a “C” in each transferable course
- Earn an overall grade-point average of a “B” or a 3.0 on a 4.0 scale (based on CFCC’s calculation)
- Complete an Associate in Arts degree or an Associate in Science degree
- Complete the admissions process at UNCW.

Purpose of the College Transfer Programs

Most of the college transfer programs provide the first two years or the basic studies requirements of a baccalaureate degree. If students plan to transfer to a four-year college or university, they should declare a college transfer program as their program of study. Cape Fear Community College (CFCC) offers five college transfer programs: one (1) associate in arts, one (1) associate in science, and three (3) associate in fine arts.

These academic programs help students develop the abilities to solve problems, understand scientific principles, write and speak effectively, use computers, reason and think critically, research, understand cultures, manipulate numerical data, and work in teams—inevitable workplace skills for the 21st century. Across the college transfer curricula, faculty try to adapt to students’ learning styles by using a variety of teaching techniques. In turn, students are expected to adapt to a variety of teaching styles. To evaluate student performance, faculty use some of the following methods: critical analysis papers and research papers; article reviews; book critiques; organized discussions; video summaries and applications; journals and novels; study guides/concept sheet assignments; readers’ analysis of readings; debates; current events papers; project/oral presentations; exams/quizzes (true/false, fill in the blanks, short answers, multiple choice, essay); portfolios; hands-on assignments and faculty observation; peer reviews; role-playing; resumes, business letters, and compositions.

Enrollment in the college transfer programs averages 3,400 students per semester, excluding summer sessions. A majority of CFCC students transfer to UNC-Wilmington, East Carolina University, Appalachian State University, North Carolina State University, and UNC-Charlotte.

Choosing a Program of Study

When choosing a program of study, students should consider their talents/abilities, personality, and passions/dreams.

Research the career of their choice for information about the following: the nature of the career, qualifications, salary range, market demand, employment locations, and related fields. For information about careers, students may visit CFCC’s Career and Testing Services.

Be willing to change their program if they discover a more rewarding academic field. Through a classroom project, an extracurricular activity, or an interview with someone in a field, a student may decide his or her career goal. Review the websites about academic majors from senior institutions.

Art Supplies - In addition to the purchase of a textbook, some art classes require students to purchase supplies. The following costs are estimations and will depend on the instructor, the place of purchase, and the maker/manufacturer:

- ART 121 - Design I, $75-$100;
- ART 131 - Drawing I, $80-$100;
- ART 240 - Painting I, $150-$175 (an additional $80 needed if a class wants to learn about watercolors and oils/acrylics.);
- ART 261 - Photography I, $120 for film, paper and supplies.

Students enrolled in ART 261 also require a manual 35-millimeter camera. ART 283 - Students in ART 283 Ceramics I, must pay $10-$20 for a personal tool packet, available at the CFCC Bookstore.

Math Supplies - Students are required to purchase a graphic calculator (an estimate of $100) if they enroll in the following math classes: MAT 121, MAT 122, MAT 152, 171, 172, 271, 272, and 273. (TI-84Plus is recommended.)

Internet, hybrid, and some face-to-face math courses require a MyLab Plus student access card. This card is included with the purchase of a new textbook from the CFCC bookstore and is used to access the online portion of the class. If a used book is purchased, the card must be purchased separately at an additional cost either at the CFCC Bookstore or online from the publisher of the textbook.

Physical Education (PED) Information
Some PED courses require membership at an approved commercial facility. The cost ranges from $20 to $144 depending on the course and the facility:

- Some PED courses meet off campus at local parks.
- All PED courses require a physical activity component.

Details on specific PED course requirements may be found in the COURSE DESCRIPTION section at the rear of the catalog.

Science Supplies
Interest, hybrid, and face-to-face science courses may require software as an online supplement. This software will be included with the purchase of a new textbook from the CFCC Bookstore. The software may also be purchased separately at an additional cost if one is using a used textbook.
A List of the College Transfer Courses Offered at CFCC
(Reminder: Students are responsible for knowing the prerequisites/corequisites and complying with them. The transfer of a course may depend on several factors, such as the grades earned in the courses, the semester that certain grades—below “Cs”—were earned, the transfer equivalency sheets of senior institutions, and the number of credit hours earned from various institutions of higher education. Students should always review the transfer requirements of the receiving institution, particularly the course equivalency list.)

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

Note: Courses in bold type are Universal General Education Transfer Components (UGETC)
ASSOCIATE IN ARTS
A.A. Degree (A10100)

As a result of a legislative mandate from the NC General Assembly, fall of 1997, the 58 North Carolina community colleges and the 16 institutions in the University of North Carolina (UNC) System entered into an agreement called the statewide Comprehensive Articulation Agreement, better known as the CAA. This agreement has been updated, and the revisions will be implemented in the fall of 2014. This agreement includes two degrees—the Associate in Arts and the Associate in Science—and enables North Carolina community college graduates to receive junior status if the graduates meet certain criteria. Students are encouraged to complete their degree. Admission to a UNC institution is a competitive process.

The Associate in Arts degree requires 60-61 credit hours. It allows students to take the first two years of their baccalaureate degree at CFCC and enables them to transfer to one of the 16 institutions in the UNC System with junior status. To graduate from CFCC under this agreement, students must meet all prerequisite and corequisite requirements, successfully complete all the required CAA courses with a grade of “C” or better, and earn at least a 2.0 overall grade-point average. (Note: To enroll at a senior institution, students must meet the grade-point average requirement of the receiving institution, which may be higher than a 2.0.)

It is the responsibility of the student to meet all graduation requirements.

Students are advised to take ACA 122: College Transfer Success in their first or second semester and create a suitable plan of study. Students are required to demonstrate their computer competency before graduation by taking CIS 110 or CIS 115 or CSC 151. If a student is enrolled in the last semester of course work, is computer-competent, but has not fulfilled the computer requirement, the student may opt to take a computer competency in the Learning Lab at the North or Wilmington campus.

Students must meet the receiving institution’s foreign language and/or health and physical education course, if applicable, prior to or after transfer to the senior institution.

The Associate in Arts program requirements are outlined as follows:

1. Universal General Education Transfer Component (32-33 semester-hour credits)—These courses are sometimes referred to as the UGETC courses and will transfer for equivalency credit at the 16 University of North Carolina institutions.

2. Additional General Education Courses (14 semester-hour credits)—These may be additional general education courses that CFCC has selected for its students and/or additional general education courses that your senior institution has recommended or required for your respective major.

3. Other Requirements (14 semester-hour credits)—A few electives are mandated by CFCC. Students should select the remaining electives based on the intended major of the senior institution.

## Mathemtics

Choose one course:
- **MAT 143** Quantitative Literacy  
- **MAT 152** Statistical Methods I  
- **MAT 171** Precalculus Algebra  

**3-4 SHC**

## Natural Sciences

Choose one course (Reminder: PHY 110 has a mandatory lab, which is PHY 110A):
- **BIO 110** Principles of Biology  
- **BIO 111** General Biology I  
- **CHM 151** General Chemistry I  
- **GEL 111** Introductory Geology  
- **PHY 110** Conceptual Physics  
- **PHY 110A** Conceptual Physics Lab  

**4 SHC**

## II. ADDITIONAL GENERAL EDUCATION COURSES

**14 SHC**

### Critical Thinking

Choose two courses (Reminder: BIO 140 and CHM 131 have mandatory labs):
- **ART 116** Survey of American Art  
- **BIO 112** General Biology II  
- **BIO 120** Introductory Botany  
- **BIO 130** Introductory Zoology  
- **BIO 140** Environmental Biology  
- **BIO 140A** Environmental Biology  
- **CHM 131** Intro to Chemistry  
- **CHM 131A** Intro to Chemistry Lab  
- **CHM 152** General Chemistry II  
- **CIS 110** Introduction to Computers  
- **CIS 115** Intro to Prog & Logic  
- **DRA 111** Theatre Appreciation  
- **DRA 122** Oral Interpretation  
- **DRA 126** Storytelling  
- **DRA 211** Theatre History I  
- **DRA 212** Theatre History II  
- **ECO 151** Survey of Economics  
- **ENG 131** Introduction to Literature  
- **GEL 113** Historical Geology  
- **GEL 230** Environmental Geology  
- **HUM 110** Technology and Society  
- **HUM 115** Critical Thinking  
- **HUM 121** The Nature of America  
- **HUM 122** Southern Culture  
- **HUM 130** Myth in Human Culture  
- **HUM 150** American Women’s Studies  
- **HUM 160** Introduction to Film  
- **HUM 161** Advanced Film Studies  
- **MAT 172** Precalculus Trigonometry  
- **MAT 263** Brief Calculus  
- **MAT 271** Calculus I  
- **MAT 272** Calculus II  

**MAT 273** Calculus III  
**MUS 113** American Music  
**MUS 210** History of Rock Music  
**MUS 211** History of Country Music  
**MUS 212** American Musical Theatre  
**PHI 210** History of Philosophy  
**PHI 220** Western Philosophy I  
**PHI 230** Introduction to Logic  
**PHY 151** College Physics I  
**PHY 152** College Physics II  
**POL 110** Intro to Political Science  
**PSY 241** Developmental Psychology  
**PSY 281** Abnormal Psychology  
**REL 211** Intro to Old Testament  
**REL 212** Intro to New Testament  
**REL 221** Religion in America  
**SOC 213** Sociology of the Family  
**SOC 220** Social Problems  
**SOC 240** Social Psychology  

**Global Awareness and Foreign languages**

Choose three courses:
- **ANT 210** General Anthropology  
- **ANT 220** Cultural Anthropology  
- **ANT 240** Archaeology  
- **ART 117** Non-Western Art History  
- **ENG 241** British Literature I  
- **ENG 242** British Literature II

### III. OTHER REQUIRED HOURS..........................14 SHC
Select a minimum of 14 semester-hour credits, based on your intended major and senior institution. The following two courses are required: ACA 122 (recommended during the student’s first or second semester at CFCC) and COM 110 or 120 or 140 or 231.

**Required course:**
- **ACA 122** College Transfer Success..........................1

**Required course (Choose one.):**
- **COM 110** Introduction to Communication ..................3
- **COM 120** Interpersonal Communication ..................3
- **COM 140** Introduction to Intercultural Communication ..3
- **COM 231** Public Speaking .....................................3

**Other Electives ..................................................10 SHC**
(Reminder: BIO 140 and PHY 110 have mandatory labs.).
- **ACC 120** Prin of Financial Accounting I ..................4
- **ACC 121** Prin of Managerial Accounting ..................4
- **ANT 210** General Anthropology ............................3
- **ANT 220** Cultural Anthropology ............................3
- **ANT 240** Archaeology ..........................................3
- **ART 111** Art Appreciation ....................................3
- **ART 114** Art History Survey I .................................3
- **ART 115** Art History Survey II ................................3
- **ART 116** Survey of American Art ............................3
- **ART 117** Non-Western Art History ..........................3
- **ART 121** Design I ...............................................3
- **ART 122** Design II .............................................3
- **ART 131** Drawing I .............................................3
- **ART 132** Drawing II ..........................................3

65
As a result of a legislative mandate from the NC General Assembly, fall of 1997, the 58 North Carolina community colleges and the 16 institutions in the University of North Carolina (UNC) System entered into an agreement called the statewide Comprehensive Articulation Agreement, better known as the CAA. This agreement has been updated, and the revisions will be implemented fall of 2014. This agreement includes two degrees—the Associate in Arts and the Associate in Science—and enables North Carolina community college graduates to receive junior status if the graduates meet certain criteria. Students are encouraged to complete their degree. Admission to a UNC institution is a competitive process.

The Associate in Science degree requires 60-61 credit hours. It allows students to take the first two years of their baccalaureate degree at CFCC and enables them to transfer to one of the 16 institutions in the University of North Carolina System with junior status. Students in this program may choose majors in architecture, agriculture, biology, chemistry, computer science, dentistry, forestry, mathematics, medicine, pharmacy, and textiles. To graduate from CFCC, students must meet all prerequisite and corequisite requirements, successfully complete all the required CAA courses with a grade of “C” or above, and earn at least a 2.0 overall grade-point average. (Note: To enroll at a senior institution, students must meet the grade-point average requirement of the receiving institution, which may be higher than a 2.0.)

This plan of study is subject to change when the college thinks that such action is in the best interest of the student or the program. It is the responsibility of the student to meet all graduation requirements.

When students enroll at CFCC, they are advised to take ACA 122: College Transfer Success in their first or second semester and create a suitable plan of study. Students must also demonstrate their computer competency before graduation by taking CIS 110 or CIS 115 or CSC 151. If a student is enrolled in the last semester of course work, is computer-competent, but has not fulfilled the computer requirement, the student may opt to take a computer competency in the Learning Lab at the North or the Wilmington campus.
Students must meet the receiving institution’s foreign language and/or health and physical education course, if applicable, prior to or after transfer to the senior institution.

The Associate in Science program requirements are outlined as follows:

1. **Universal General Education Transfer Component** (34 semester hour credits)—These courses are sometimes referred to as the UGETC courses and will transfer for equivalency credit at the 16 University of North Carolina institutions.

2. **Additional General Education Courses** (11 semester hour credits)—These may be additional general education courses that CFCC has selected for its students and/or additional general education courses that your senior institution has recommended for your respective major.

3. **Other Requirements** (15 semester hour credits)—A few electives are mandated by CFCC. Students should select the remaining electives based on their intended major and the senior institution of choice.

### I. UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT ...................... 34 SHC

#### English Composition ................................................. 6 SHC

- ENG 111 Writing and Inquiry ........................................ 3
- ENG 112 Writing Research in the Disciplines .................... 3

#### Humanities/Fine Arts .............................................. 6 SHC

Choose one course from each group below.

- **Group I**—Choose one course:
  - ART 111 Art Appreciation ........................................ 3
  - ART 114 Art History Survey I .................................... 3
  - ART 115 Art History Survey II ................................... 3
  - MUS 110 Music Appreciation ..................................... 3
  - MUS 112 Introduction to Jazz .................................... 3

- **Group II**—Choose one course:
  - ENG 231 American Literature I ................................ 3
  - ENG 232 American Literature II ................................ 3
  - PHI 215 Philosophical Issues .................................... 3
  - PHI 240 Introduction to Ethics .................................. 3

#### Social/Behavioral Sciences ......................................... 6 SHC

Choose one course from each group below.

- **Group I**—Choose one course:
  - HIS 112 World Civilizations II .................................. 3
  - HIS 131 American History I ..................................... 3
  - HIS 132 American History II ................................... 3

- **Group II**—Choose one course:
  - ECO 251 Prin of Microeconomics ................................ 3
  - ECO 252 Prin of Macroeconomics ................................ 3
  - POL 120 American Government .................................. 3
  - PSY 150 General Psychology ...................................... 3
  - SOC 210 Introduction to Sociology .............................. 3

### Mathematics ...................................................... 8 SHC

Choose two courses:

- MAT 171 Precalculus Algebra .................................... 4
- MAT 172 Precalculus Trigonometry .......................... 4
- MAT 263 Brief Calculus ........................................... 4
- MAT 271 Calculus ................................................... 4

### Natural Sciences .................................................. 8 SHC

Choose one pair of courses from one group.

- **Group I**
  - BIO 111 General Biology I ...................................... 4
  - BIO 112 General Biology II ..................................... 4

- **Group II**
  - CHM 151 General Chemistry I .................................. 4
  - CHM 152 General Chemistry II .................................. 4

- **Group III**
  - PHY 151 College Physics I ....................................... 4
  - PHY 152 College Physics II ..................................... 4

### II. ADDITIONAL GENERAL EDUCATION COURSES ........................................... 11 SHC

#### Science and Quantitative Reasoning ................................. 8 SHC

Choose two unused classes from the following:

- BIO 111 General Biology I ...................................... 4
- BIO 112 General Biology II ..................................... 4
- BIO 120 Introductory Botany .................................... 4
- BIO 130 Introductory Zoology ................................... 4
- BIO 140 Environmental Biology ................................ 3
- BIO 140A Environmental Biology ............................... 4
- CHM 151 General Chemistry I .................................. 4
- CHM 152 General Chemistry II .................................. 4
- GEL 111 Introductory Geology ................................... 4
- GEL 113 Historical Geology ..................................... 4
- GEL 230 Environmental Geology ................................ 4
- MAT 171 Precalculus Algebra ................................... 4
- MAT 172 Precalculus Trigonometry .......................... 4
- MAT 263 Brief Calculus ........................................... 4
- MAT 271 Calculus ................................................... 4
- MAT 272 Calculus II .............................................. 4
- MAT 273 Calculus III ............................................. 4
- PHY 151 College Physics I ....................................... 4
- PHY 152 College Physics II ..................................... 4

#### Required course .................................................... 3 SHC

Choose one from the following:

- COM 110 Introduction to Communication ....................... 3
- COM 120 Interpersonal Communication ......................... 3
- COM 140 Introduction to Intercultural Communication .... 3
- COM 231 Public Speaking .......................................... 3

#### Other Required Electives ......................................... 15 SHC

Reminder: ACA 122 is a required course, and students should take it during their first or second semester of enrollment at CFCC. The selection of the additional unused courses should be based on the student’s intended major and respective senior
institution. BIO 140, CHM 131, PHY 110, and all elementary foreign languages have mandatory labs.

Required course:
ACA 122  College Transfer Success ........................................1

Electives ..................................14 SHC
ACC 120  Prin of Financial Accounting I .........................4
ACC 121  Prin of Managerial Accounting .........................4
ANT 210  General Anthropology .....................................3
ANT 220  Cultural Anthropology .....................................3
ANT 240  Archaeology .................................................3
ART 111  Art Appreciation .............................................3
ART 114  Art History Survey I ........................................3
ART 115  Art History Survey II .......................................3
ART 116  Survey of American Art ...................................3
ART 117  Non-Western Art History ................................3
ART 121  Two-Dimensional Design ................................3
ART 122  Three Dimensional Design ...............................3
ART 131  Drawing I .....................................................3
ART 132  Drawing II ....................................................3
ART 171  Computer Art I ..............................................3
ART 212  Gallery Assistantship I ...................................1
ART 214  Portfolio and Resume .......................................1
ART 231  Printmaking I .................................................3

ASSOCIATE IN FINE ARTS
PRE-MAJORS

Art
A.F.A. DEGREE (A1020A)

It is the responsibility of the student to know and to comply with the prerequisites and the corequisites listed in this catalog. If students have previous college credits from other institutions, students are advised to check first with a counselor at the receiving institution (the institution in which they plan to attend upon leaving CFCC). A counselor at the receiving institution should advise students of the courses to take at CFCC if the students have credits from other institutions. Otherwise, students will be encouraged to 1) complete their associate degree, which consists of 64-65 semester hours, or, the general education core, which consists of 28 semester hours; 2) contact their CFCC advisor, register early, and pay their tuition on time; and 3) earn a grade of “C” or higher on the first attempt. Since this premajor has only 28 credit hours in the general education core, students may be required to fulfill their basic studies requirement after they transfer. When students have completed the general education core and the electives required for this program of study, students are advised to take additional core classes to fulfill their free electives. Early contact with a senior institution is important before a student enroll in this program. While some UNC institutions accept students with a 2.0 grade-point average, other UNC institutions require at least a 2.5 grade-point average. Students must always comply with the admission requirements of the receiving institution.

Important Websites
The following website provides more CFCC college transfer and advising information: http://cfcc.edu/transfer/.
The following website lists the academic programs offered at the sixteen (16) UNC institutions: http://www.northcarolina.edu/programs/index.php.

Students who need assistance in deciding their major may visit CFCC’s Career and Testing Services or visit the website about academic majors from their institution of choice. Example: https://www1.cfnc.org/Plan/For_A_Career/_default.aspx.

The Art pre-major is designed for students who plan to receive a Bachelor of Fine Arts Degree in Art. The general education core consists of 28 semester hour credits.

While the courses in this pre-major are not taught every semester, each course is taught at least once per year. When planning a class schedule, students should consider the frequency of the course offerings.

Since requirements vary, each student should first contact the senior institution of choice to determine the specific
requirements of that institution and to determine whether it is better to complete this pre-major or the Associate in Arts program or the minimum transfer hours of the receiving institution. Some senior institutions offer a Bachelor in Fine Arts degree while others offer a Bachelor in Arts degree. Depending on the institution of choice, some students will not have satisfied the general education core or the basic studies requirements even if the students complete this degree. Prospective Art Education pre-majors should first be advised by an admissions counselor at the senior institution before they enroll in this program or seek advising from a CFCC counselor or advisor.

Application to a University
Admission application deadlines vary; students must meet the deadline for the university to which they plan to transfer. Upon successful completion of the associate degree, students who meet the requirements outlined in this pre-major articulation agreement will be eligible to be considered for admission as juniors to the universities offering the baccalaureate degree. Students are encouraged to contact the senior institution to confirm degree offerings.

Admission to the Major
Grade-point average requirements vary and admission is competitive across the several programs in Art Education.

**Semester Hours Credit**

**GENERAL EDUCATION CORE ..........................28 SHC**

**English Composition ........................................6 SHC**
ENG 111 Writing & Inquiry ..................................3
and
ENG 112 Writing/Research in the Disc ........................3
or
ENG 113 Literature-Based Research ............................3
or
ENG 114 Professional Research and Reporting ..............3

**Humanities/Fine Arts ...........................................3 SHC**
Select one literature course from the following:
ENG 131 Introduction to Literature ...........................3
ENG 231 American Literature I .................................3
ENG 232 American Literature II .................................3
ENG 241 British Literature I .....................................3
ENG 242 British Literature II ....................................3
ENG 261 World Literature I .......................................3
ENG 262 World Literature II .....................................3

**Speech/Communication .........................................3 SHC**
COM 231 is recommended.
COM 110 Intro to Communication ...............................3
or
COM 120 Interpersonal Communication ........................3
or
COM 140 Intro Intercultural Com ...............................3
or
COM 231 Public Speaking ........................................3

**Social/Behavioral Sciences ....................................9 SHC**
Select three courses from three of the following areas: anthropology, economics, history, political science, psychology, and sociology. One course must be a history course. The following course is recommended: PSY 150.

1. ANT 210 General Anthropology .............................3
ANT 220 Cultural Anthropology ...............................3
ANT 240 Archaeology ...........................................3

2. ECO 151 Survey of Economics ...............................3
ECO 251 Prin of Microeconomics ..............................3
ECO 252 Prin of Macroeconomics ..............................3

3. HIS 112 World Civilizations II ..............................3
HIS 121 Western Civilization I ................................3
HIS 122 Western Civilization II ................................3
HIS 131 American Civilization I ...............................3
HIS 132 American Civilization II ..............................3

4. POL 110 Intro to Political Science ............................3
POL 120 American Government ................................3
POL 210 Comparative Government ............................3
POL 220 International Relations ...............................3

5. PSY 150 General Psychology ................................3
PSY 241 Developmental Psychology ..........................3
PSY 281 Abnormal Psychology .................................3

6. SOC 210 Introduction to Sociology ..........................3
SOC 213 Sociology of the Family ..............................3
SOC 220 Social Problems .......................................3
SOC 230 Race and Ethnic Relations ............................3
SOC 240 Social Psychology .....................................3

**Natural Sciences/ Mathematics .............................7 SHC**

**Natural Sciences. .............................................4 SHC**
Select one course, including accompanying laboratory work, from the biological and/or physical science disciplines. Reminder: BIO 140, CHM 131, and PHY 110 have mandatory labs.

1. BIO-110 Principles of Biology ...............................4
BIO 111 General Biology I .......................................4
BIO 120 Introductory Botany ....................................4
BIO 130 Introductory Zoology ..................................4
BIO 140 Environmental Biology ...............................3
BIO 140A Environmental Biology Lab ........................1

2. CHM 131 Intro to Chemistry .................................3
CHM 131A Intro to Chemistry Lab .............................1
CHM 151 General Chemistry I ..................................4

3. GEL 111 Geology ................................................4
GEL 113 Historical Geology .....................................4
GEL 230 Environmental Geology ...............................4
4. PHY 110 Conceptual Physics.........................................................3
   PHY 110A Conceptual Physics Lab ........................................1
   PHY 151 College Physics I ..................................................4
   Math .................................................................................. 3 SHC
   One math is required. If students select a second math as an elective, they may not receive credits for any of these combinations: MAT 171/175 or MAT 172/175.

      MAT 143 Quantitative Literacy .........................................3
      MAT 152 Statistical Methods I .........................................4
      MAT 171 Precalculus Algebra ...........................................4

OTHER REQUIRED HOURS ....................................................(36-37 SHC)
The required courses are posted in List I below. Select additional hours from any unused general education core courses and/or the electives posted in List II below. *ACA 122 may only count as the 65th hour.

Reminder: Graduates must take a computer competency in the Learning Lab.

List I (Required)

   ART 114 Art History Survey I ...........................................3
   ART 115 Art History Survey II ..........................................3
   ART 121 Design I ..............................................................3
   ART 122 Design II ............................................................3
   ART 131 Drawing I .............................................................3

List II (May choose a minimum of 21 hours)

   *ACA 122 College Transfer Success ..................................1
   ART 116 Survey of American Art .......................................3
   ART 117 Non-Western Art History .....................................3
   ART 132 Drawing II ..........................................................3
   ART 171 Computer Art I ....................................................3
   ART 231 Printmaking I .......................................................3
   ART 232 Printmaking II .....................................................3
   ART 240 Painting I .............................................................3
   ART 241 Painting II ............................................................3
   ART 245 Metals I ...............................................................3
   ART 246 Metals II ..............................................................3
   ART 247 Jewelry I ...............................................................3
   ART 248 Jewelry II .............................................................3
   ART 250 Surface Design: Textiles .......................................3
   ART 251 Weaving I .............................................................3
   ART 252 Weaving II ............................................................3
   ART 261 Photography I ......................................................3
   ART 262 Photography II ....................................................3
   ART 264 Digital Photography I ..........................................3
   ART 265 Digital Photography II .........................................3
   ART 266 Videography I ....................................................3
   ART 267 Videography II ...................................................3
   ART 271 Computer Art II ..................................................3
   ART 281 Sculpture I ...........................................................3
   ART 282 Sculpture II ..........................................................3
   ART 283 Ceramics I ...........................................................3
   ART 284 Ceramics II ..........................................................3

Total Semester Hours of Other Required Hours...... 36-37

Students must meet the receiving university’s foreign language and/or health and physical education requirements, if applicable, prior to or after transfer to the senior institution.

Recommended Courses: COM 231 and PSY 150

Note: Computer Competency must be demonstrated before the AFA degree may be awarded.

A.F.A. DEGREE (A1020C)

It is the responsibility of the student to know and to comply with the prerequisites and the corequisites listed in this catalog. If students have previous college credits from other institutions, students are advised to check first with a counselor at the receiving institution (the institution in which they plan to attend upon leaving CFCC). A counselor at the receiving institution should advise students of the courses to take at CFCC if the students have credits from other institutions. Otherwise, students will be encouraged to 1) complete their associate degree, which consists of 64-65 semester hours, or, the general education core, which consists of 28 semester hours; 2) contact their CFCC advisor, register early, and pay their tuition on time; and 3) earn a grade of “C” or higher on the first attempt. Since this premajor has only 28 credit hours in the general education core, students may be required to fulfill their basic studies requirement after they transfer. When students have completed the general education core and the electives required for this program of study, students are advised to take additional core classes to fulfill their free electives. Early contact with a senior institution is important before a student enroll in this program. While some UNC institutions accept students with a 2.0 grade-point average, other UNC institutions require at least a 2.5 grade-point average. Students must always comply with the admission requirements of the receiving institution.

Important Websites

The following website provides more CFCC college transfer and advising information: http://cfcc.edu/transfer/.

The following website lists the academic programs offered at the sixteen (16) UNC institutions: http://www.northcarolina.edu/programs/index.php.

Students who need assistance in deciding their major may visit CFCC’s Career and Testing Services or visit the website about academic majors from their institution of choice. Example: https://www1.cfnc.org/Plan/For_A_Career/default.aspx.
The Drama pre-major is designed for students who plan to receive a Bachelor of Fine Arts Degree in Drama. The general education core consists of 28 semester hour credits.

This program enables students to concentrate in one or more of three areas: Acting for the Stage, Acting for Television and Film, and Technical Theatre. Students who wish to concentrate their studies in live theatrical performance should take courses which refine their abilities to communicate on stage. Students whose emphasis is on Television and Film Acting should take courses such as Teleplay Production, Acting for the Camera, and Videography. All students who are considering performance should take DRA 130 (Acting I) and DRA 122 (Oral Interpretation) before they enter classes in their concentration areas. Students who are interested in technical theatre should take courses in Stagecraft, Lighting, Sound Technology, Costuming and Makeup.

While the courses in the Drama premajor are not taught every semester, each course is taught at least once per year. When planning a class schedule, students should consider the frequency of the course offerings.

Since requirements vary, each student should first contact the senior institution of choice to determine the specific requirements of that institution and to determine whether it is better to complete the Drama premajor or the Associate in Arts: General Studies program or the minimum transfer hours of the receiving institution. Some senior institutions offer a Bachelor in Fine Arts degree while others offer a Bachelor in Arts degree. Depending on the institution of choice, some students will not have satisfied the general education core or the basic studies requirements even if the students complete this degree. Before students may enroll in the Theater Department, some institutions require them to audition. Prospective Drama premajors should first be advised by an admissions counselor at the senior institution before they enroll in this program or seek advising from a CFCC counselor or advisor.

**Application to a University**

Admission application deadlines vary; students must meet the deadline for the university to which they plan to transfer. Upon successful completion of the associate degree, students who meet the requirements outlines in this pre-major articulation agreement will be eligible to be considered for admission as juniors to the universities offering the baccalaureate degree. Students are encouraged to contact the senior institution to confirm degree offerings.

**Admission to the Major**

Grade-point average requirements vary and admission is competitive across the several programs in Drama.

Total Semester Hours of Other Required Hours..... 36-37

Students must meet the receiving university’s foreign language and/or health and physical education requirements, if applicable, prior to or after transfer to the senior institution.

Recommended Course: COM 231 and PSY 150.

Note: Computer Competency must be demonstrated before the AFA degree may be awarded.

Music and Music Education
A.F.A. DEGREE (A1020D)

It is the responsibility of the student to know and to comply with the prerequisites and the corequisites listed in this catalog. If students have previous college credits from other institutions, students are advised to check first with a counselor at the receiving institution (the institution in which they plan to attend upon leaving CFCC). A counselor at the receiving institution should advise students of the courses to take at CFCC if the students have credits from other institutions. Otherwise, students will be encouraged to 1) complete their associate degree, which consists of 64-65 semester hours, or, the general education core, which consists of 28 semester hours; 2) contact their CFCC advisor, register early, and pay their tuition on time; and 3) earn a grade of “C” or higher on the first attempt. Since this premajor has only 28 credit hours in the general education core, students may be required to fulfill their basic studies requirement after they transfer. When students have completed the general education core and the electives required for this program of study, students are advised to take additional core classes to fulfill their free electives. Early contact with a senior institution is important before a student enrolls in this program. While some UNC institutions accept students with a 2.0 grade-point average, other UNC institutions require at least a 2.5 grade-point average. Students must always comply with the admission requirements of the receiving institution.

Important Websites
The following website provides more CFCC college transfer and advising information: http://cfcc.edu/transfer/.
The following website lists the academic programs offered at the sixteen (16) UNC institutions: http://www.northcarolina.edu/programs/index.php.

Students who need assistance in deciding their major may visit CFCC’s Career and Testing Services or visit the website about academic majors from their institution of choice. Example: https://www1.cfnc.org/Plan/For_A_Career/default.aspx.

The Music and Music Education pre-major is designed for students who plan to receive a Bachelor of Fine Arts Degree in Music or Music Education. The general education core consists of 28 semester hour credits.

While the courses in this pre-major are not taught every semester, each course is taught at least once per year. When planning a class schedule, students should consider the frequency of the course offerings.

Since requirements vary, each student should first contact the senior institution of choice to determine the specific requirements of that institution and to determine whether it is better to complete this pre-major or the Associate in Arts: General Studies program or the minimum transfer hours of the receiving institution. Some senior institutions offer a
Bachelor in Fine Arts degree while others offer a Bachelor in Arts degree. Depending on the institution of choice, some students will not have satisfied the general education core or the basic studies requirements even if the students complete this degree. Prospective Music and Music Education pre-majors should first be advised by an admissions counselor at the senior institution before they enroll in this program or seek advising from a CFCC counselor or advisor.

Application to a University
Admission application deadlines vary; students must meet the deadline for the university to which they plan to transfer. Upon successful completion of the associate degree, students who meet the requirements outlined in this pre-major articulation agreement will be eligible to be considered for admission as juniors to the universities offering the baccalaureate degree. Students are encouraged to contact the senior institution to confirm degree offerings.

Admission to the Major
Grade-point average requirements vary and admission is competitive across the several programs in Music and Music Education. Validation of level of achievement in Theory, Class Music, and Applied Music is required for acceptance into four-year programs in accordance with the National Association of Schools of Music requirements for admission of transfer students. Admission to teacher licensure programs requires satisfactory scores on Praxis I and II.

Semester Hours Credit

GENERAL EDUCATION CORE .......................(28 SHC)

English Composition ..................................6 SHC
ENG 111 Writing and Inquiry ..........................3
and
ENG 112 Writing/Research in the Disc ...............3
or
ENG 113 Literature-Based Research .................3
or

</tbody>
</table>

Additional hours may be selected from the list below. *ACA 122 may only count as the 65th hour.

*ACA 122 College Transfer Success ....................... 1

Total Semester Hours of Other Required Hours ....... 36-37

Students must meet the receiving university’s foreign language and/or health and physical education requirements, if applicable, prior to or after transfer to the senior institution.

Recommended Courses: COM 231 and PSY 1500

*Ensemble courses may be selected from Chorus, Jazz Ensemble, or Orchestra, or individual instrument ensembles such as saxophone, voice, and violin. At least two courses in the same instrument or voice are required.

Note: A student must demonstrate his/her computer competency before the AFA degree may be awarded.

Note: Because of required courses for pre-major, no general education electives beyond those listed above are recommended.
ASSOCIATE IN GENERAL EDUCATION

A.G.E. DEGREE (A10300)

The Associate in General Education (AGE) curriculum is designed for individuals who wish to broaden their education, with emphasis on personal interest, growth, and development. The two-year General Education program provides students opportunities to study English, literature, fine arts, philosophy, social science, and science and mathematics at the college level. All courses in the program are college-level courses which can be selected based upon a student’s personal interests rather than specific technical or professional requirements. Many of the courses are equivalent to college transfer courses; however, the program is not principally designed for college transfer.

Semester Hour Credits

I. General Education Courses
ENG 111 Writing and Inquiry ........................................ 3
ENG 114 Professional Research and Reporting ................. 3
Humanities/Fine Arts Elective ........................................ 3
Social/Behavioral Sciences Elective ............................... 3
Natural Sciences/Mathematics Elective ............................ 3

II. Major Courses
CIS 110 Introduction to Computers ................................ 3
or
CIS 111 Basic PC Literacy ............................................. 2
Free Electives .................................................................. 47

Free electives may be any college transfer or vocational technical course numbered 110 or higher as selected by the student and approved by the student’s advisor. Courses numbered below 110 in any discipline may not be used for this degree.

Note: Financial assistance is not available for all free-elective courses. Please check with the Financial Aid Office for more information.

Total Credits .................................................................. 64/65

ASSOCIATE IN APPLIED SCIENCE, DIPLOMA, AND CERTIFICATE PROGRAMS

Accounting
A.A.S. DEGREE (A25100)
DIPLOMA (D25100)
CERTIFICATE (C25100)

Associate in Applied Science Program

The Accounting curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in the accounting profession. Using the language of business, accountants assemble and analyze, process, and communicate essential information about financial operations.

In addition to course work in accounting principles, theories, and practice, students will study business law, finance, management, and economics. Related skills are developed through the study of communications, computer applications, financial analysis, critical thinking skills, and ethics.

Graduates should qualify for entry-level accounting positions in many types of organizations including accounting firms, small businesses, manufacturing firms, banks, hospitals, school systems, and governmental agencies. With work experience and additional education, an individual may advance in the accounting profession.

Semester Hour Credits

I. General Education Courses
ENG 111 Writing and Inquiry ........................................ 3
ENG 114 Professional Research & Reporting ................. 3
3 SHC Natural Science, or Math 143 .............................. 3/4

### Air Conditioning, Heating, and Refrigeration Technology

**DIPLOMA (D35100)**

**CERTIFICATE (C35100)**

**Diploma Program**

The Air Conditioning, Heating, and Refrigeration Technology curriculum provides the basic knowledge to develop skills necessary to work with residential and light commercial systems.

Topics include mechanical refrigeration, heating and cooling theory, electricity, controls, and safety. The diploma program covers air conditioning, furnaces, heat pumps, tools, and instruments.

Diploma graduates should be able to assist in the start-up, preventive maintenance, service, repair, and/or installation of residential and light commercial systems.

Architectural Technology A.A.S. DEGREE (A40100)

Associate in Applied Science Program

The Architectural Technology curriculum prepares individuals with knowledge and skills that can lead to employment in the field of architecture or one of the associated professions.

Students receive instruction in construction document preparation, materials and methods, environmental and structural systems, building codes and specifications, and computer applications as well as completing a design project. Optional courses may be provided to suit specific career needs.

Upon completion, graduates have career opportunities within the architectural, engineering, and construction professions as well as positions in industry and government. A strong emphasis on sustainable design and construction techniques is included.
### Associate Degree

**Nursing (RN)**

See Nursing Programs

### Automotive Systems Technology

**A.A.S. Degree (A60160)**  
**Certificate (C60160A)**

**Associate in Applied Science Program**

The curriculum prepares individuals for employment as automotive service technicians. It provides an introduction to automotive careers and increases student awareness of the challenges associated with this fast and ever-changing field.

Classroom and lab experiences integrate technical and academic coursework. Emphasis is placed on theory, servicing and operation of brakes, electrical/electronic systems, engine performance, steering/suspension, automatic transmission/transaxles, engine repair, climate control, and manual drive trains.

Upon completion of this curriculum, students should be prepared to take the ASE exam and be ready for full-time employment in dealerships and repair shops in the automotive service industry.

Basic Law
Enforcement Training
CERTIFICATE (C55120)

Certificate Program
Basic Law Enforcement Training (BLET) is designed to give students essential skills required for entry-level employment as law enforcement officers with state, county, or municipal governments, or with private enterprise.

This program utilizes State commission-mandated topics and methods of instruction. General subjects include, but are not limited to, criminal, juvenile, civil, traffic, and alcohol beverage laws; investigative, patrol, custody, and court procedures; emergency responses; and ethics and community relations.

Students must successfully complete and pass all units of study, which include the certification examination mandated by the North Carolina Criminal Justice Education and Training Standards Commission and the North Carolina Sheriffs’ Education and Training Standards Commission, to receive a certificate.

Job opportunities are available with state, county, and municipal governments in North Carolina. In addition, knowledge, skills, and abilities acquired in this course of study qualify one for job opportunities with private enterprises in such areas as industrial, retail, and private security.

Students who successfully complete the BLET Program can receive credit for CJC 120, CJC 131 and CJC 221.

CJC 100 - Law Enforcement Training
Prerequisite: Approval of the BLET Director, a minimum reading score of 41 on ASSET or a minimum score of 80 on Accuplacer (CPT) or 81 on COMPASS are required, and a sponsorship letter is recommended.

The following items are required for admission to the BLET program:
• Must be at least 20 years of age
• Must have a valid North Carolina driver’s license
• Must submit a Medical Examination Form completed by a North Carolina licensed physician
• Must provide a Certified Criminal History Check report
• Must be a citizen of the United States

This course is designed to provide the student with basic skills and basic knowledge necessary to perform those tasks essential to function in law enforcement. The course consists of 624 hours of instruction in the following topic areas:

Course Orientation .....................................................6
Physical Fitness Training .........................................54
Ethics of Professional Law Enforcement ....................4
Arrest, Search & Seizure/Constitutional Law ...............28

Elements of Criminal Law ........................................24

**Boat Building (Wooden)**

**DIPLOMA (D35120)**

**CERTIFICATE (C35120)**

**Diploma Program**

The Boat Building curriculum prepares individuals for employment in the boat building and boat repair industry. Today’s boat builders are highly skilled craftspeople who can create complex shapes out of wood.

Course work includes reading boat plans, lofting, setting up the building jig, fashioning the structural timbers, and different planking techniques. Interior joinery, exterior joinery, and yacht rigging is also covered.

Graduates may find work with yacht manufacturers, high end furniture shops, architectural millwork shops, and companies installing built in furniture in homes. Other opportunities can be found in boat maintenance and repair yards.

**Boat Manufacture and Service**

**DIPLOMA (D60330)**

**Diploma Program**

The Boat Manufacture and Service Technology program prepares students for employment in the manufacture and service of boats. Students learn the basics of boat design and the implementation of those designs in various components and/or complete boats or yachts.

Course work includes reading and interpreting marine blueprints, manuals, and other documents common to the industry; lofting; constructing forms and mold-making; application of concepts and techniques in composite, and fiberglass; marine woodworking; interior finishing; and marine mechanical, electrical, and plumbing systems.

Graduates may find employment with boat/yacht manufacturers, service yards, dealerships doing commissioning work, and companies doing custom boat building.

### Business Administration

**A.A.S. DEGREE (A25120)**
- CERTIFICATE - Banking and Finance (C25120B)
- CERTIFICATE - Customer Service (C25120)
- CERTIFICATE - Entrepreneurship (C25120E)

**Associate in Applied Science Program**

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with fundamental knowledge of business functions, processes, and an understanding of business organizations in today’s global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Cardiovascular Sonography Diploma (D45160)

Diploma Program

The Cardiovascular Sonography curriculum provides the individual with the knowledge and skills necessary to acquire, process, and evaluate the human heart and vascular structures. A cardiovascular sonographer uses high frequency sound waves to produce images of the heart and vascular structures.

Course work includes effective communication and patient care skills combined with a knowledge of physics, human anatomy, physiology, and pathology, all of which are essential to obtaining high quality sonographic images.

Graduates may be eligible to apply to the American Registry of Diagnostic Medical Sonographers for examinations in physics, cardiovascular physics, vascular physics, and adult echocardiography. Graduates may find employment in hospitals, physicians’ offices, mobile services, and educational institutions.

CERTIFICATE (C35180)

Diploma Program
The Carpentry curriculum is designed to train students to construct residential structures using standard building materials and hand and power tools. Carpentry skills and a general knowledge of residential construction will also be taught.

Course work includes footings and foundations, framing, interior and exterior trim, cabinetry, blueprint reading, residential planning and estimating, and other related topics. Students will develop skills through hands-on participation.

Graduates should qualify for employment in the residential building construction field as rough carpenters, framing carpenters, roofers, maintenance carpenters and other related jobs.

Chemical Technology
A.A.S. DEGREE (A20120)

Associate in Applied Science Program
The Chemical Technology curriculum prepares individuals for work as analytical technicians in chemical laboratories associated with chemical production, environmental concerns, pharmaceuticals, or general analysis.

Course work includes general chemistry, organic chemistry, introductory chemical engineering, qualitative analysis, and quantitative analysis, including such instrumental techniques as spectroscopy (UV-Vis, IR, AA) and chromatography (GC, LC, IC). Students also utilize computerized data collection, reduction, and graphic presentation.

Graduates should qualify as entry-level chemical laboratory technicians. Their duties may include chemical solution preparation, raw material, product, or environmental sampling, and/or sample testing via wet chemistry or instrumental techniques.

Collision Repair and Refinishing Technology
DIPLOMA (D60130)

Diploma Program
The Collision Repair and Refinishing Technology curriculum prepares individuals to become qualified technicians who possess the diverse skills required to perform quality repairs and proper refinishing techniques on automobile bodies and to diagnose and repair mechanical and electrical systems.

Coursework includes classroom and laboratory experiences that integrate technical application with academic theory. Emphasis is placed on autobody fundamentals, painting and refinishing, structural and non-structural damage repair, mechanical and electrical component repair or replacement, and common industry practices.

Graduates should be qualified to take National Institute for Automotive Service Excellence (ASE) certification examinations and also for entry-level employment in automotive dealerships, independent repair shops, or through self-employment, as collision repair and refinishing technicians.

Community Spanish Interpreter
A.A.S. DEGREE (A55370)
CERTIFICATE (C55370L)
CERTIFICATE (C55370M)

Associate in Applied Science Program
The Community Spanish Interpreter curriculum prepares individuals to work as entry-level bilingual professionals who will provide communication access in interview and interactive settings. In addition, this curriculum provides educational training for working professionals who want to acquire Spanish language skills.

Course work includes the acquisition of Spanish: grammar, structure, and sociolinguistic properties, cognitive processes associated with interpretation between Spanish and English; the structure and character of the Hispanic community; and acquisition of communication skills.

Graduates should qualify for entry-level jobs as para-professional bilingual employees in educational systems or a variety of community settings. Individuals may choose from part-time, full-time, or self-employment/free-lance positions, or apply language skills to other human service related areas.

Community Spanish Interpreter
Certificate Program - Legal Track or Medical
Interpretation
The certificate is designed to provide persons with Spanish-speaking experience (native or otherwise) the opportunity to further improve their proficiency and especially for native speakers to sharpen their reading and writing skills in their native language. In addition, actual practice interpreting and co-ops within the community are included in this curriculum. This is available due to the fact that the students included in this curriculum already have proven proficiency through SPA 212 and have skills equivalent to a level that will facilitate these activities. Completion of the certificate will allow for advanced training that will enable the student to facilitate communication between Spanish-only and non-Spanish-speaking members of the community.

I. Prerequisites for the Community Spanish Interpreter Certificates (Legal or Medical) are the following:

*ENG 111 for native/heritage Spanish speakers in place of SPA 120 (Spanish in the Workplace)
**Proficiency at the intermediate Spanish level II as determined by a CLEP examination or completion of SPA 212 and SPA 182
***SPA 111/SPA 181, SPA 112/SPA 182, SPA 120, SPA 141, SPA 281, SPA 282, SPA 215, SPA 231, SPI 213, and SPI 214.

Computer-Integrated Machining
A.A.S. DEGREE (A50210)
CERTIFICATE (C50210)

Associate in Applied Science Program
The Computer-Integrated Machining curriculum prepares students with the analytical, creative and innovative skills necessary to take a production idea from an initial concept through design, development and production, resulting in a finished product.

Coursework may include manual machining, computer applications, engineering design, computer-aided drafting (CAD), computer-aided machining (CAM), blueprint interpretation, advanced computerized numeric control (CNC) equipment, basic and advanced machining operations, precision measurement and high-speed multi-axis machining.

Graduates should qualify for employment as machining technicians in high-tech manufacturing, rapid-prototyping and rapid-manufacturing industries, specialty machine shops, fabrication industries, and high-tech or emerging industries such as aerospace, aviation, medical, and renewable energy, and to sit for machining certification examinations.

### Associate in Applied Science Program

The Computer Technology Integration (CTI) curriculum prepares graduates for employment as designers, testers, support technicians, administrators, developers, or programmers with organizations that use computers to design, process, manage, and communicate information, depending on the technical path selected within this curriculum.

Course work includes development of a student’s ability to communicate and solve technical issues related...
to information support and services, interactive media, network systems, programming and software development, and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

Computer Technology Integration

Information Systems Security Diploma Program

This diploma offers students a specialization in securing a variety of information technology systems including a general overview of security to prepare students to sit for the Security + certification. Students would also receive a rich background in computer forensics. Graduates would be ready for work as IS systems security technicians or security administrators/officers, or as computer forensics engineers.

Construction Management Technology  
A.A.S. DEGREE (A35190)  
CERTIFICATE (C35190)

Associate in Applied Science Program  
This curriculum is designed to prepare individuals for careers in the construction management field. Such positions may include project manager, superintendent, estimator, or foreman.

Course work includes safety, planning, scheduling, cost control, productivity, human relations, estimating, and building codes. Students will also gain proficiency in specific construction related skills.

Graduates should qualify for entry-level positions in the field of construction management.

Cosmetology
DIPLOMA (D55140)
CERTIFICATE (C55140)
CERTIFICATE-COSMETOLOGY INSTRUCTORS (C55160)
CERTIFICATE-ESTHETICS (C55230) see Esthetics

Uniforms and name tags are required at an additional cost.

In accordance with the State Board of Cosmetic Arts Rules and Regulations, Section .0700 “School Licensure, Operations, Closing and Relocating Schools”, Sub Section 21 NCAC 14T .0701 “School Operations/Licensure Maintenance”, students must pass Cosmetology Classes with a “C” or better in order to have met the State Board of Cosmetic Arts requirements for graduation and licensure.

Diploma Program
The Cosmetology curriculum is designed to provide competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the cosmetology industry. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional imaging, hair design, chemical processes, skin care, nail care, multi-cultural practices, business/computer principles, product knowledge, and other selected topics.

Graduates should qualify to sit for the State Board of Cosmetic Arts examination. Upon successfully passing the State Board exam, graduates will be issued a license. Employment is available in beauty salons and as skin/nail specialists, platform artists, and related business.

The listed courses, CFCC Cosmetology competencies, NC State Board Performances and a minimum of 1500 hours are required for graduation.

This curriculum complies with the standard approved by the State Board of Community Colleges.

Criminal Justice Technology
A.A.S. DEGREE (A55180)
CERTIFICATE (C55180)
INDUSTRIAL SECURITY CERTIFICATE (C55180S)

Associate in Applied Science Program
The Criminal Justice Technology curriculum is designed with a core of courses to afford one the opportunity to acquire basic knowledge, skills and attitudes in the generally accepted subject areas associated with a two-year study of law enforcement services. It includes subjects such as interpersonal communications, law, psychology and sociology.

In addition to core subjects, the correctional services option provides an opportunity to study other generally accepted subjects indigenous to a correctional services program such as confinement facility administration, correctional law, counseling, probation-parole services and rehabilitation options. Similarly, the law enforcement option provides an opportunity to study other generally accepted subjects related to a security services program such as accident prevention and safety management, common carrier protection, fire prevention, private security, industrial security, retail security, security systems and surveillance.

Job opportunities are available with federal, state, county and municipal governments. In addition, knowledge, skills and attitudes acquired in this course of study qualify one for job opportunities with private enterprise in such areas as industrial, retail and private security.

## Culinary Arts

### A.A.S. DEGREE (A55150)

**DIPLOMA (D55150)**

**Students are responsible for purchasing their own uniforms and knife kit.**

### Associate in Applied Science Program

This curriculum provides specific training required to prepare students to assume positions as trained culinary professionals in a variety of foodservice settings including full service restaurants, hotels, resorts, clubs, catering operations, contract foodservice and health care facilities.

Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Courses include sanitation/safety, baking, garde manger, culinary fundamentals/production skills, nutrition, customer service, purchasing/cost control, and human resource management.

Graduates should qualify for entry-level opportunities including prep cook, line cook, and station chef. American Culinary Federation certification may be available to graduates. With experience, graduates may advance to positions including sous chef, pastry chef, executive chef, or foodservice manager.

## Dental Assisting
### DIPLOMA (D45240)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

### Diploma Program

The Dental Assisting curriculum prepares individuals to assist the dentist in the delivery of dental treatment and to function as integral members of the dental team while performing chairside and related office and laboratory procedures.

Course work includes instruction in general studies, biomedical sciences, dental sciences, clinical sciences, and clinical practice. A combination of lecture, laboratory, and clinical experiences provide students with knowledge in infection/hazard control, radiography, dental materials, preventive dentistry, and clinical procedures.

Graduates may be eligible to take the Dental Assisting National Board Examination to become Certified Dental Assistants. As a Dental Assistant II, defined by the Dental Laws of North Carolina, graduates work in dental offices and other related areas.

The program in Dental Assisting is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of accreditation without reporting requirements. The Commission is a specialized accrediting body recognized by the United States Department of Education.

The Commission on Dental Accreditation will review complaints that relate to a program’s compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs, but it does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of the appropriate accreditation standards and/or the Commission’s policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611 or by calling 1-800-621-8099 extension 4653.

Dental Hygiene
A.A.S. DEGREE (A45260)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program
The Dental Hygiene curriculum provides individuals with the knowledge and skills to access, plan, implement, and evaluate dental hygiene care for the individual and the community.

Students will learn to prepare the operatory, take patient histories, note abnormalities, plan care, teach oral hygiene, clean teeth, take x-rays, apply preventive agents, complete necessary chart entries, and perform other procedures related to dental hygiene care.

Graduates of this program may be eligible to take national and state/regional examinations for licensure which are required to practice dental hygiene. Employment opportunities include dental offices, clinics, schools, public health agencies, industry, and professional education.

The program in dental hygiene is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of accreditation without reporting requirements. The Commission is a specialized accrediting body recognized by the United States Department of Education.

The Commission on Dental Accreditation will review complaints that relate to a program’s compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of the appropriate accreditation standards and/or the Commission’s policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611 or by calling 1-800-621-8099 extension 4653.

### Diesel and Heavy Equipment Technology

**A.A.S. DEGREE (A60460)**

**DIPLOMA (D60460)**

**CERTIFICATE (C60460)**

#### Associate in Applied Science Program

This curriculum provides training for individuals interested in becoming technicians who service and maintain propulsion systems of boats and other types of marine and industrial equipment.

The course work includes the maintenance and repair procedures of mechanical, electrical, hydraulics equipment used on marine systems. Students will inspect and test equipment to determine the cause of faulty operation, and then repair and replace defective parts.

Graduates of the curriculum should qualify as marine technicians which may be employed in marinas, shipyards, industrial and trucking industries.

### Early Childhood Education

#### A.A.S. Degree (A55220)

#### Diploma (D55220)

#### Certificate (C55220)

The Early Childhood Education curriculum prepares individuals to work with children from infancy through middle childhood in diverse learning environments. Students will combine learned theories with practice in actual settings with young children under the supervision of qualified teachers.

Course work includes child growth and development; physical/nutritional needs of children; care and guidance of children; and communication skills with parents and children. Students will foster the cognitive/language, physical/motor, social/emotional and creative development of young children.

Graduates are prepared to plan and implement developmentally appropriate programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Head Start Programs, and school age programs.

Electrical Systems Technology

A.A.S. DEGREE (A35130)
DIPLOMA (D35130)
CERTIFICATE (C35130)

Associate in Applied Science Program
The Electrical Systems Technology curriculum is designed to provide training for persons interested in the installation and maintenance of electrical/electronic systems found in residential, commercial, and industrial facilities.

Training, most of which is hands-on, will include such topics as AC/DC theory, basic wiring practices, digital electronics, programmable logic controllers, industrial motor controls, the National Electric Code, and other subjects as local needs require.

Graduates should qualify for a variety of jobs in the electrical/electronic field as an on-the-job trainee or apprentice, assisting in the layout, installation, and maintenance of electrical/electronic systems.

## Electronics Engineering Technology

### A.A.S. Degree (A40200)

### Certificate - Electronics (C40200)

#### Associate in Applied Science Program

The Electronics Engineering Technology curriculum prepares individuals to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems.

A broad-based core of courses, including basic electricity, solid-state fundamentals, digital concepts, and microprocessors, ensures the student will develop the skills necessary to perform entry-level tasks. Emphasis is placed on developing the student’s ability to analyze and troubleshoot electronic systems.

Graduates should qualify for employment as engineering assistants or electronic technicians with job titles such as electronics engineering technician, field service technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Electronics Engineering Technology
Certificate Program - Electronics

The EET Certificate Program is designed for part-time or evening students that want to learn the fundamentals of electricity, semiconductors, and the test equipment and troubleshooting procedures found in the field of Electronics. The certificate program can be completed in one year at night. Certificate students can always continue on to pursue the A.A.S. 2 year degree.

Emergency Medical Science

A.A.S. DEGREE (A45340)

Associate in Applied Science Program

The Emergency Medical Science curriculum provides individuals with the knowledge, skills and attributes to provide advanced emergency medical care as a paramedic for critical and emergent patients who access the emergency medical system and prepares graduates to enter the workforce.

Students will gain complex knowledge, competency, and experience while employing evidence based practice under medical oversight, and serve as a link from the scene into the healthcare system.

Graduates of this program may be eligible to take state and/or national certification examinations. Employment opportunities include providers of emergency medical services, fire departments, rescue agencies, hospital specialty areas, industry, educational and government agencies.

Minimum requirement is 600 hours as stated by the Board of Cosmetology. This program will not run every year. Effective Fall 2003.

Esthetics Technology
CERTIFICATE (C55230)

Certificate Program
The Esthetics Technology curriculum provides competency-based knowledge, scientific/artistic principles and hands-on fundamentals associated with the art of skin care. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional Esthetics Technology, business/human relations, product knowledge, and other related topics.

Graduates should be prepared to take the North Carolina Cosmetology State Board Licensing Exam and upon passing be licensed and qualify for employment in beauty and cosmetic/skin care salons, as a platform artist, and in related businesses.

Film and Video Production Technology
A.A.S. DEGREE (A30140)
DIPLOMA (D30140)
CERTIFICATE (C30140)

Note: Limited classes are offered in this program. Please check with Public Services Department Chair or Student Development.

Associate in Applied Science Program
The Film and Video Production Technology curriculum prepares students for entry-level employment in production support and selected technical areas of film, video, and associated media production. Instruction provides training for entry-level crew and/or production and post-production assistants in many moving image media forms.

The first year content includes exposure to the entire production process. Students are taught by industry professionals who provide extensive hands-on instruction. In the second year, students receive professional training by performing in various crew positions on actual production projects.

Graduates may find employment as entry-level crew and/or production assistants in feature and short films, commercials, and industrial, educational, and documentary productions. Other opportunities include entry-level employment in pre-production and post-production areas for film and video.

Fire Protection Technology
A.A.S. DEGREE (A55240)

Associate in Applied Science Program
The Fire Protection Technology curriculum is designed to provide students with knowledge and skills in the technical, managerial, and leadership areas necessary for advancement within the fire protection community and related firefighting industries, and to provide currently employed firefighters with knowledge and skills often required for promotional consideration.

Course work includes diverse fire protection subject areas, including fire prevention and safety, public education, building construction, fire ground strategies and tactics, and local government finance and laws, as they apply to emergency services management. Emphasis includes understanding fire characteristics and the structural consequences of fire; risk assessment and management; and relevant research, communications, and leadership methodologies.

Employment opportunities exist with fire departments, governmental agencies, industrial firms, insurance rating organizations, and educational organizations.

Healthcare Business Informatics
A.A.S. DEGREE (A25510)

Associate in Applied Science Program
The Healthcare Business Informatics curriculum prepares individuals for employment as specialists in installation, data management, data archiving/retrieval, system design and support, and computer training for medical information systems.

Students learn about the field through multidisciplinary coursework including the study of terminology relating to informatics, systems analysis, networking technology, computer/network security, data warehousing, archiving and retrieval of information, and healthcare computer infrastructure support.

Graduates should qualify for employment as database/data warehouse analysts, technical support professionals, informatics technology professionals, systems analysts, networking and security technicians, and computer maintenance professionals in the healthcare field.

**CERTIFICATE (C25110)**

**Associate in Applied Science Program**

This curriculum prepares individuals to understand and apply the administrative and practical skills needed for supervisory and managerial positions in hotels, motels, resorts, inns, restaurants, institutions, and clubs.

Course work includes guest services, leadership, management, restaurant operations, lodging operations, marketing, sanitation, food preparation, food and beverage management and other critical areas.

Graduates should qualify for management or entry-level supervisory positions in food and lodging operations, including restaurants, foodservice, beverage service, catering, front office, reservations and housekeeping. Opportunities are also available in product services, and technology support and sales.

ELECTIVE Courses: 4 - 6 hours of elective
Industrial Systems Technology
A.A.S. DEGREE (A50240)
DIPLOMA (D50240)
CERTIFICATE (C50240)

Associate in Applied Science Program
The Industrial Systems Technology curriculum is designed to prepare or upgrade individuals to service, maintain, repair, or install equipment for a wide range of industries. Instruction includes theory and skill training needed for inspecting, testing, troubleshooting, and diagnosing industrial equipment and physical facilities.

Students will learn technical skills in blueprint reading, electricity, hydraulics/pneumatics, machining, welding, and various maintenance procedures. Practical application in these industrial systems will be emphasized and additional advanced course work may be offered.

Upon completion of any of the various levels of this curriculum, graduates should gain the necessary practical skills and related technical information to qualify for employment or advancement in the various areas of industrial maintenance technology.

courses.
practices, graphic presentations, and general education
of interiors and furnishings, color theory, products, business
interior design, architectural drafting, computer aided design,
and universal design. Also included are basic design, history
of interiors and furnishings, color theory, products, business
practices, graphic presentations, and general education
courses.

Graduates should qualify for a variety of jobs including
residential and commercial interior design, showroom design,
and sales positions for furniture, textiles and accessories, and
all business dealing with interiors.
Landscape Gardening
A.A.S. DEGREE (A15260)
CERTIFICATE (C15260)
RETENTION POND MANAGEMENT CERTIFICATE (C15260R)

Associate in Applied Science Program
The Landscape Gardening curriculum emphasizes intensive, practical, hands-on training in applied horticulture to reinforce classroom lecture on theory and technique.

Course work includes plant propagation, greenhouse and nursery plant culture, turf management, plant identification, arboriculture, diseases and pests of plants, and landscape planning, maintenance, and construction.

Graduates will be prepared for employment opportunities in applied horticulture related to landscape development and maintenance for residential and commercial operations. Graduates should be prepared to take the North Carolina Pesticide Applicator’s Examination and the North Carolina Certified Plant Professional Examination.

Semester Hour Credits

Landscape Gardening
RETENTION POND MANAGEMENT Certificate Program

The Retention Pond Management Certificate Program provides a heavy concentration of hands-on retention pond management experience using retention ponds at the CFCC North Campus. Students will learn how to select aquatic and wetland plants for use around a retention pond including planting, fertilization and pruning. Students will also learn the basics of aquatic and wetland weed management and pest control and will receive the North Carolina Commercial Aquatic Pest Control Ground Applicators license.

Marine Technology
A.A.S. DEGREE (A15320)

Associate in Applied Science
This curriculum is designed to provide the practical and academic skills essential for success in marine scientific support. Students will receive training in observational and measurement techniques aboard a variety of vessels including the College’s own ocean-going research vessel.

Course work includes a unique blend of traditional and contemporary vocational, technical and scientific marine education. Students are trained in the use of physical, chemical, meteorological, biological, and geological oceanographic instrumentation and sampling equipment.

Graduates should qualify for entry level field or laboratory positions with industries, state and federal agencies, and educational facilities associated with marine science and research. Career opportunities include oceanography, environmental science, marine biology, geophysical exploration, and fisheries-related employment.

Mechanical Engineering Technology
A.A.S. DEGREE (A40320)
DIPLOMA (D40320)
CERTIFICATE (C40320C)

Associate in Applied Science Program
The Mechanical Engineering Technology curriculum prepares graduates for employment as technicians in the diversified mechanical and manufacturing engineering fields. Mechanical Engineering technicians assist in design, development, testing, process design and improvement, and troubleshooting and repair of engineered systems. Emphasis is placed on the integration of theory and hands-on application of engineering principles.

In addition to course work in engineering graphics, engineering fundamentals, materials and manufacturing processes, mathematics, and physics, students will study computer applications, critical thinking, planning and problem solving, and oral and written communications.

Graduates of the curriculum will find employment opportunities in the manufacturing or service sectors of engineering technology. Engineering technicians may obtain professional certification by application to organizations such as ASQ, SME, and NICET.

Medical Office Administration
A.A.S. DEGREE (A25310)

Associate in Applied Science Program
This curriculum prepares individuals for employment in medical and other health-care related offices.

Course work will include medical terminology; information systems; office management; medical coding, billing and insurance; legal and ethical issues; and formatting and word processing.

Students will learn administrative and support functions and develop skills applicable in medical environments. Employment opportunities are available in medical and dental offices, hospitals, insurance companies, laboratories, medical supply companies, and other health-care related organizations.

Medical Sonography
A.A.S. DEGREE (A45440)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program
The Medical Sonography curriculum provides knowledge and clinical skills in the application of high frequency sound waves to image internal body structures.

Course work includes physics, cross-sectional anatomy, abdominal, introductory vascular, and obstetrical/gynecological sonography. Competencies are attained in identification of normal anatomy and pathological processes, use of equipment, fetal growth and development, integration of related imaging, and patient interaction skills.

Graduates of accredited programs are eligible to take National Registry Examinations in ultrasound physics and instrumentation and specialty examinations administered by the American Registry of Diagnostic Medical Sonographers. Graduates may find employment in clinics, physicians’ offices, mobile services, equipment manufacturers, hospitals, and educational institutions.

Students are required to pass the computer competency test administered in the Learning Lab, or pass CIS 110 or CIS 111.

### CAPE FEAR COMMUNITY COLLEGE

**Nuclear Technology**  
**A.A.S. DEGREE (A50460)**

**Associate in Applied Science Program**  
The Nuclear Technology curriculum prepares individuals to become qualified reactor field technicians who are employed by licensed nuclear reactor facilities.

Course work includes theory and application related to industrial and engineering technology disciplines including nuclear reactor theory, reactor systems, industrial and nuclear safety, instrumentation, electrical generation, automation and robotics, and may include quality control, welding, and various metallurgical inspection procedures.

Upon completion, graduates should qualify as entry-level nuclear reactor technicians and have academic preparations to advance into other industrial or engineering technician positions within the commercial nuclear power industry.

Note B: ELC 117 or ELC 133 or ELC 213, EGR 251, MEC 111, PCI 162, PCI 262

Note:
Actual course sequence may vary from that stated above depending upon prior college credits. Contact the Lead Instructor regarding individual schedule and course selections.

This program includes a cooperative work experience course at a nuclear power plant that requires students to meet Federal regulations for fitness for duty and access authorization. Prior to registering for WBL 111NT, students must complete a process that supports the security criteria for their assigned nuclear plant that includes a background check, drug screen, and psychological assessment. The college has agreements with the service providers of this process and students will be charged a fee that totals about $200. Please contact the Lead Instructor, Nuclear Technology for further details.

**NURSING PROGRAMS**

**Associate Degree Nursing (RN)**

A.A.S. DEGREE-RN (A45110)

*This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.*

**Associate in Applied Science Program**

The Associate Degree Nursing curriculum provides knowledge, skills, and strategies to integrate safety and quality into nursing care, to practice in a dynamic environment, and to meet individual needs which impact health, quality of life, and achievement of potential.

Course work includes and builds upon the domains of healthcare, nursing practice, and the holistic individual. Content emphasizes the nurse as a member of the interdisciplinary team providing safe, individualized care while employing evidence-based practice, quality improvement, and informatics.
Graduates of this program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN). Employment opportunities are vast within the global health care system and may include positions within acute, chronic, extended, industrial, and community health care facilities.

**Practical Nursing (LPN)**

**DIPLOMA (D45660)**

*This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.*

**Diploma Program**

The Practical Nursing curriculum prepares individuals with the knowledge and skills to provide nursing care to individuals across the lifespan.

Students will participate in data collection, implementing, and evaluating nursing care provided.

Graduates are eligible to apply to take the National Council Licensure Examination (NCLEX-PN) which is required for practice as a Licensed Practical Nurse. Employment opportunities include hospitals, rehabilitation/long term care/home health facilities, clinics, and physicians’ offices.

Students are required to pass the computer competency test administered in the Learning Lab, or pass CIS 110 or CIS 111 or take CLEP test for CIS 110.

**Note:** CNA classes are offered through Continuing Education. Please call (910) 362-7170 for information.
**Occupational Therapy Assistant**
A.A.S. DEGREE (A45500)

*This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.*

**Associate in Applied Science Program**

The Occupational Therapy Assistant curriculum prepares individuals to work under the supervision of a registered/licensed occupational therapist in screening, assessing, planning, and implementing treatment and documenting progress for clients receiving occupational therapy services.

Course work includes human growth and development, conditions which interfere with activities of daily living, theory and process of occupational therapy, individual/group treatment activities, therapeutic use of self, activity analysis, and grading/adapting activities and environments.

Graduates may be eligible to take the national certification examination for practice as a certified occupational therapy assistant. Employment opportunities include hospitals, rehabilitation facilities, long-term/extended care facilities, sheltered workshops, schools, home health programs, and community programs. Successful completion of the program is required for certification and licensure.

The National Board of Certification in Occupational Therapy administers the national certification examination. The NBCOT is the certifying body for occupational therapy practitioners.

CERTIFICATE-CIVIL REAL PROPERTY TRACK (C25380R)

**Associate in Applied Science Program**

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks, and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Course work includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses also include subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

*Graduates of the A.A.S. program will be eligible to take the North Carolina Paralegal Certification Examination. Diploma and Certificate students should check with the lead instructor for additional requirements which may enable them to take the state exam.*

Pharmacy Technology
A.A.S. DEGREE (A45580)
DIPLOMA (D45580)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program
The Pharmacy Technology Program prepares individuals to assist the pharmacist in duties that a technician can legally perform and to function within the boundaries prescribed by the pharmacist and the employment agency.

Students will prepare prescription medications, mix intravenous solutions and other specialized medications, update patient profiles, maintain inventories, package medications in unit-dose or med-card form, and gather data used by pharmacists to monitor drug therapy.

Employment opportunities include retail, hospitals, nursing homes, research laboratories, wholesale drug companies, and pharmaceutical manufacturing facilities. Graduates from the program may be eligible to take the National Certification Examination to become a certified pharmacy technician.

**Phlebotomy**

**Certificate (C45600)**

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

**Certificate Program**

The Phlebotomy curriculum prepares individuals to obtain blood and other specimens for the purpose of laboratory analysis.

Course work includes proper specimen collection and handling, communication skills, and maintaining patient data.

Graduates may qualify for employment in hospitals, clinics, physician’s offices, and other health care settings and may be eligible for national certification as phlebotomy technicians.

Plumbing
DIPLOMA (D35300)

Diploma Program
The Plumbing curriculum is designed to give individuals the opportunity to acquire basic skills to assist with the installation and repair of plumbing systems in residential and small buildings.

Course work includes sketching diagrams, interpretation of blueprints, and practices in plumbing assembly. Students will gain knowledge of state codes and requirements.

Graduates should qualify for employment at parts supply houses, maintenance companies, and plumbing contractors to assist with various plumbing applications.

Radiography
A.A.S. DEGREE (A45700)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program
The Radiography curriculum prepares the graduate to be a radiographer, a skilled health care professional who uses radiation to produce images of the human body.

Course work includes clinical rotations to area health care facilities, radiographic exposure, image processing, radiographic procedures, physics, pathology, patient care and management, radiation protection, quality assurance, anatomy and physiology, and radiobiology.

Graduates of this program are eligible to apply to take the American Registry of Radiologic Technologists’ national examination for certification and registration as medical radiographers. Graduates may be employed in hospitals, clinics, physicians’ offices, medical laboratories, government agencies, and industry.

Students are required to pass the computer competency test administered in the Learning Lab, or pass CIS 110 or CIS 111 or take CLEP test for CIS 110.

Real Estate Licensing

Certificate Program
The Real Estate Licensing curriculum provides licensing education required by the North Carolina Real Estate Commission for students preparing to take the real estate license examination and for provisional brokers that are seeking removal of the provisional status.

Course work includes the practices and principles of real estate, broker relationships as they apply to customers, sellers and buyers, contract procedures, fair housing and real estate methodology. Course work also includes professional development opportunities.

Graduates who have passed the real estate license examination and obtained a real estate provisional broker license should then qualify for removal of the provisional status and be able to provide basic, residential real estate services as a broker affiliated with a real estate brokerage firm.

A license issued to a resident provisional broker shall be issued on inactive status. In order for a provisional broker license to be eligible for active status, the provisional broker

Surgical Technology

A.A.S. DEGREE (A45740)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

Associate in Applied Science Program
The Surgical Technology curriculum prepares individuals to assist in the care of the surgical patient in the operating room and to function as a member of the surgical team.

Students will apply theoretical knowledge to the care of patients undergoing surgery and develop skills necessary to prepare supplies, equipment, and instruments; maintain aseptic conditions; prepare patients for surgery; and assist surgeons during operations.

Employment opportunities include labor/delivery/emergency departments, inpatient/outpatient surgery centers, dialysis units/facilities, physicians’ offices, and central supply processing units.

Students of Commission on Accreditation of Allied Health Education Programs (CAAHEP) accredited programs are required to take the national certification exam administered by the National Board on Certification in Surgical Technology and Surgical Assisting (NBSTSA) within a four week period prior to or after graduation.
Sustainability Technologies
A.A.S. DEGREE (A40370)
CERTIFICATE - Sustainability Technology (C40370)
CERTIFICATE - Renewable Energy Technology (C40370R)
CERTIFICATE - Sustainable Building Technologies (C40370S)

The Sustainability Technologies curriculum is designed to prepare individuals for employment in environmental, construction, alternative energy, manufacturing, or related industries, where key emphasis is placed on energy production and waste reduction along with sustainable technologies.

Course work may include alternative energy, environmental engineering technology, sustainable manufacturing, and green building technology. Additional topics may include sustainability, energy management, waste reduction, renewable energy, site assessment, and environmental responsibility.

Graduates should qualify for positions within the alternative energy, construction, environmental, and/or manufacturing industries. Employment opportunities exist in both the government and private industry sectors where graduates may function as manufacturing technicians, sustainability consultants, environmental technicians, or green building supervisors.

**Truck Driver Training**

**CERTIFICATE (C60300)**

**Certificate Program**
The Truck Driver Training curriculum prepares individuals to drive tractor trailer rigs. This program teaches proper driving procedures, safe driver responsibility, commercial motor vehicle laws and regulations, and the basic principles and practices for operating commercial vehicles.

The course work includes motor vehicle laws and regulations, map reading, vehicle maintenance, safety procedures, daily logs, defensive driving, freight handling, security, and fire protection. Highway driving, training range exercises, and classroom lectures are used to develop the student’s knowledge and skills.

Graduates of the curriculum are qualified to take the Commercial Driver’s License and employable by commercial trucking firms. They may also become owner-operators and work as private contract haulers.

**Welding Technology**

**DIPLOMA (D50420)**
**CERTIFICATE (C50420)**
**CERTIFICATE (C50420F)**

**Diploma Program**
The Welding Technology curriculum provides students with a sound understanding of the science, technology, and applications essential for successful employment in the welding and metal industry.

Instruction includes consumable and non-consumable electrode welding and cutting processes. Courses in math, blueprint reading, metallurgy, welding inspection, and destructive and non-destructive testing provides the student with industry-standard skills developed through classroom training and practical application.

Successful graduates of the Welding Technology curriculum may be employed as entry level technicians in welding and metalworking industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.

**Semester Hour Credits**

**I. General Education Courses**
- ENG 101 Applied Communications I ............................... 3
- MAT 110 Math Measurement and Literacy ...................... 3

COURSE DESCRIPTIONS

Please Note:
Prerequisites: A course taken prior to another course.

1. CFCC administers one placement test: Accuplacer (CPT). These scores are listed in the course descriptions. Satisfactory scores on placement tests taken at other colleges (SAT, ACT, COMPASS) may be used to waive Reading, Writing and Mathematical prerequisites. See the Placement Test Advising Guide, for additional information or talk with a counselor.

2. Receipt of transfer credit for ENG 111 or above will waive the Reading and/or Writing prerequisites for certain courses.

3. Receipt of a curriculum math credit will waive the prerequisites for certain courses.

Corequisites: A course taken at the same time as another course or prior to the course to be taken.

Some courses may fulfill a general education requirement—communication or humanities/fine arts, mathematics, natural science, or social/behavioral science—in one of the following programs: AA (Associate in Arts), AS (Associate in Science), AFA (Associate in Fine Arts), AGE (Associate in General Education), AAS (Associate in Applied Science), DIP (Diploma), or CER (Certificate). Any course with a general education classification is identified by the last statement or the last two statements in the course description. Each statement should be read carefully. “SACS” in the description refers to CFCC’s accrediting agency, the Southern Association of Colleges and Schools.

CA 111 College Student Success 1 0 0 1
Prerequisites: None
Corequisites: None

This course introduces the college’s physical, academic, and social environment and promotes the personal development essential for success. Topics include campus facilities and resources; policies, procedures, and programs; study skills; and life management issues such as health, self-esteem, motivation, goal-setting, diversity, and communication. Upon completion, students should be able to function effectively within the college environment to meet their educational objectives.

ACA 122* College Transfer Success 0 2 0 1
Prerequisites: None
Corequisites: None

This course provides information and strategies necessary to develop clear academic and professional goals beyond the community college experience. Topics include the CAA, college culture, career exploration, gathering information on senior institutions, strategic planning, critical thinking, and communication skills for a successful academic transition. Upon completion, students should be able to develop an academic plan to transition successfully to senior institutions.

ACC 120* Prin of Financial Acct 3 2 0 4
Prerequisites: Proficiency in Reading - A grade of “C” or better in ENG 095 or RED 090 OR minimum Accuplacer score of 80 on Reading
Corequisites: None

This course introduces business decision-making accounting information systems. Emphasis is placed on analyzing, summarizing, reporting, and interpreting financial information. Upon completion, students should be able to prepare financial statements, understand the role of financial information in decision-making and address ethical considerations.

ACC 121* Prin of Managerial Acct 3 2 0 4
Prerequisites: A grade of “C” or better in ACC 120
Corequisites: None

This course includes a greater emphasis on managerial and cost accounting skills. Emphasis is placed on managerial accounting concepts for external and internal analysis, reporting and decision-making. Upon completion, students should be able to analyze and interpret transactions relating to managerial concepts including product-costing systems.

ACC 122 Principles of Financial Accounting II 3 0 0 3
Prerequisites: ACC 120 with a grade of “C” or better
Corequisites: None

This course provides additional instruction in the financial accounting concepts and procedures introduced in ACC 120. Emphasis is placed on the analysis of specific balance sheet accounts, with in-depth instruction of the accounting principles applied to these accounts. Upon completion, students should be able to analyze data, prepare journal entries, and prepare reports in compliance with generally accepted accounting principles.

ACC 129 Individual Income Taxes 2 2 0 3
Prerequisites: ACC 120
Corequisites: None

This course introduces the relevant laws governing individual income taxation. Topics include tax law, electronic research and methodologies, and the use of technology for preparation of individual tax returns. Upon completion, students should
be able to analyze basic tax scenarios, research applicable tax law, and complete various individual tax forms.

**ACC 130 Business Income Taxes**

</table>

Prerequisites: ACC 129
Corequisites: None

This course introduces the relevant laws governing business and fiduciary income taxes. Topics include tax law relating to business organizations, electronic research and methodologies, and the use of technology for the preparation of business tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete various business tax forms. This course is also available through the Virtual Learning Community (VLC).

**ACC 140 Payroll Accounting**

<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>0</td>
<td>0</td>
<td>2</td>
</tr>
</tbody>
</table>

Prerequisites: ACC 115 or ACC 120
Corequisites: None

This course covers federal and state laws pertaining to wages, payroll taxes, payroll tax forms, and journal and general ledger transactions. Emphasis is placed on computing wages; calculating social security, income, and unemployment taxes; preparing appropriate payroll tax forms; and journalizing/posting transactions. Upon completion, students should be able to analyze data, make appropriate computations, complete forms, and prepare accounting entries.

**ACC 150 Accounting Software Application**

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>

</thead>
<tbody>
<tr>
<td>1</td>
<td>0</td>
<td>0</td>
<td>2</td>
</tr>
</tbody>
</table>

Prerequisites: ACC 115 or ACC 120 and CIS 110 or CIS 111
Corequisites: None

This course introduces microcomputer applications related to accounting systems. Topics include general ledger, accounts receivable, accounts payable, inventory, payroll, and correcting, adjusting, and closing entries. Upon completion, students should be able to use a computer accounting package to solve accounting problems.

**ACC 175 Hotel & Restaurant Acct**

<table>
<thead>
<tr>

Prerequisites: None
Corequisites: None

This course covers generally accepted accounting principles and the uniform system of accounts for small hotels and motels of the American Hotel and Motel Association. Emphasis is placed on the accounting cycle, analysis of financial statements, and payroll procedures including treatment of tips. Upon completion, students should be able to demonstrate competence in the accounting principles and procedures used in hotels and restaurants.

**ACC 220 Intermediate Accounting I**

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>2</td>
<td>0</td>
<td>4</td>
</tr>
</tbody>
</table>

Prerequisites: ACC 120 and ACC 122
Corequisites: None

This course is a continuation of the study of accounting principles with in-depth coverage of theoretical concepts and financial statements. Topics include generally accepted accounting principles and an extensive analyses of financial statements. Upon completion, students should be able to demonstrate competence in the conceptual framework underlying financial accounting, including the application of financial standards.

**ACC 221 Intermediate Acct II**

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>2</td>
<td>0</td>
<td>4</td>
</tr>
</tbody>
</table>

Prerequisites: ACC 220
Corequisites: None

This course is a continuation of ACC 220. Emphasis is placed on special problems which may include leases, bonds, investments, ratio analyses, present value applications, accounting changes, and corrections. Upon completion, students should be able to demonstrate an understanding of the principles involved and display an analytical problem-solving ability for the topics covered.

**ACC 225 Cost Accounting**

<table>

<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>0</td>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

Prerequisites: ACC 121
Corequisites: None

This course introduces the nature and purposes of cost accounting as an information system for planning and control. Topics include direct materials, direct labor, factory overhead, process, job order, and standard cost systems. Upon completion, students should be able to demonstrate an understanding of the principles involved and display an analytical problem-solving ability for the topics covered. This course is also available through the Virtual Learning Community (VLC).

**AGR 139 Intro to Sustainable Ag**

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>0</td>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

Prerequisites: None
Corequisites: None

This course will provide students with a clear perspective on the principles, history and practices of sustainable agriculture in our local and global communities. Students will be introduced to the economic, environmental and social impacts of agriculture. Upon completion, students will be able to identify the principles of sustainable agriculture as they relate to basic production practices.

**AHR 110 Intro to Refrigeration**

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>6</td>
<td>0</td>
<td>5</td>
</tr>
</tbody>
</table>

Prerequisites: None
Corequisites: None

This course introduces the basic refrigeration process used in mechanical refrigeration and air conditioning systems. Topics include terminology, safety, and identification and function of components; refrigeration cycle; and tools and instrumentation used in mechanical refrigeration systems. Upon completion,
students should be able to identify refrigeration systems and components, explain the refrigeration process, and use the tools and instrumentation of the trade.

AHR 111 HVACR Electricity 2 2 0 3
Prerequisites: None
Corequisites: None

This course introduces electricity as it applies to HVACR equipment. Emphasis is placed on power sources, interaction of electrical components, wiring of simple circuits, and the use of electrical test equipment. Upon completion, students should be able to explain the basic oil, gas, and electrical heating systems and describe the major components of a heating system.

AHR 112 Heating Technology 2 4 0 4
Prerequisites: None
Corequisites: None

This course covers the fundamentals of heating including oil, gas, and electric heating systems. Topics include safety, tools and instrumentation, system operating characteristics, installation techniques, efficiency testing, electrical power, and control systems. Upon completion, students should be able to explain the basic oil, gas, and electrical heating systems and describe the major components of a heating system.

AHR 113 Comfort Cooling 2 4 0 4
Prerequisites: AHR 110
Corequisites: None

This course covers the installation procedures, system operations, and maintenance of residential and light commercial comfort cooling systems. Topics include terminology, component operation, and testing and repair of equipment used to control and produce assured comfort levels. Upon completion, students should be able to use psychrometrics, manufacturer specifications, and test instruments to determine proper system operation.

AHR 114 Heat Pump Technology 2 4 0 4
Prerequisites: AHR 110 or AHR 113
Corequisites: None

This course covers the principles of air source and water source heat pumps. Emphasis is placed on safety, modes of operation, defrost systems, refrigerant charging, and system performance. Upon completion, students should be able to understand and analyze system performance and perform routine service procedures.

AHR 115 Refrigeration Systems 1 3 0 2
Prerequisites: AHR 110
Corequisites: None

This course introduces refrigeration systems and applications. Topics include defrost methods, safety and operational control, refrigerant piping, refrigerant recovery and charging, and leak testing. Upon completion, students should be able to assist in installing and testing refrigeration systems and perform simple repairs.

AHR 120 HVAC Maintenance 1 3 0 2
Prerequisites: None
Corequisites: None

This course introduces the basic principles of industrial air conditioning and heating systems. Emphasis is placed on preventive maintenance procedures for heating and cooling equipment and related components. Upon completion, students should be able to perform routine preventive maintenance tasks, maintain records, and assist in routine equipment repairs.

AHR 130 HVAC Controls 2 2 0 3
Prerequisites: AHR 111 or ELC 111 or ELC 112
Corequisites: None

This course covers the types of controls found in residential and commercial comfort systems. Topics include electrical and electronic controls, control schematics and diagrams, test instruments, and analysis and troubleshooting of electrical systems. Upon completion, students should be able to diagnose and repair common residential and commercial comfort system controls.

AHR 133 HVAC Servicing 2 6 0 4
Prerequisites: None
Corequisites: AHR 112 or AHR 113

The course covers the maintenance and servicing of HVAC equipment. Topics include testing, adjusting, maintaining, and troubleshooting HVAC equipment and record keeping. Upon completion, students should be able to adjust, maintain, and service HVAC equipment.

AHR 140 All-Weather Systems 1 3 0 2
Prerequisites: AHR 112 or AHR 113
Corequisites: None

This course covers the principles of combination heating and cooling systems including gas-electric, all-electric, and oil-electric systems. Topics include PTAC’s and package and split-system units. Upon completion, students should be able to understand systems performance and perform routine maintenance procedures.

AHR 210 Residential Building Code 1 2 0 2
Prerequisites: None
Corequisites: None

This course covers the residential building codes that are applicable to the design and installation of HVAC systems. Topics include current residential codes as applied to HVAC design, service, and installation. Upon completion, students should be able to demonstrate the correct usage of residential building codes that apply to specific areas of the HVAC trade.

</table>

| ALT 120 *Renewable Energy Tech* | 2   | 2        | 0      | 3      |
| **Prerequisites:** None | **Corequisites:** None |
| This course provides an introduction to multiple technologies that allow for the production and conservation of energy from renewable sources. Topics include hydro-electric, wind power, passive and active solar energy, tidal energy, appropriate building techniques, and energy conservation methods. Upon completion, students should be able to demonstrate an understanding of renewable energy production and its impact on humans and their environment. |

| ALT 230 *Biofuels Waste Management* | 2   | 0        | 0      | 2      |
| **Prerequisites:** ALT 110 | **Corequisites:** None |
| This course is designed to address the issues of sustainability and environmental stewardship involved with the production and use of biofuels. Topics include the sustainable production of feedstocks, efficient and low energy methods of fuel production, and management of biofuels sidestreams. Upon completion, students should be able to identify and mediate environmental impacts of biofuels and discuss the importance of producing biofuels using sustainable practices. |

| ALT 250 *Thermal Systems* | 2   | 2        | 0      | 3      |
| **Prerequisites:** None | **Corequisites:** None |
| This course introduces concepts, tools, techniques, and materials used to convert thermal energy into a viable, renewable energy resource. Topics include forced convection, heat flow and exchange, radiation, the various elements of thermal system design, regulations, and system installation and maintenance. Upon completion, students should be able to demonstrate an understanding of geothermal and solar thermal systems and corresponding regulations. |

<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>6</td>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

**Prerequisites:**
- Completion of one of the following:
  a. Grade of “C” or better in RED 080
  b. Grade of “C” or better in ENG 085
  c. Grade of “C” or better in DRE 097
  d. Required placement test score(s)

**Corequisites:** None

This course introduces basic architectural drafting techniques, lettering, use of architectural and engineer scales, and sketching. Topics include orthographic, isometric, and oblique drawing techniques using architectural plans, elevations, sections, and details; reprographic techniques; and other related topics. Upon completion, students should be able to prepare and print scaled drawings within minimum architectural standards.

### ARC 112 Construction Materials & Methods

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>2</td>
<td>0</td>
<td>4</td>
</tr>
</tbody>
</table>

**Prerequisites:**
- Completion of one of the following:
  a. Grade of “C” or better in RED 080
  b. Grade of “C” or better in ENG 085
  c. Grade of “C” or better in DRE 097
  d. Required placement test score(s)

**Corequisites:** None

This course introduces construction materials and their methodologies. Topics include construction terminology, materials and their properties, manufacturing processes, construction techniques, and other related topics. Upon completion, students should be able to detail construction assemblies and identify construction materials and properties.

### ARC 113 Residential Architectural Technology

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>6</td>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 111

**Corequisites:** ARC 112

This course covers intermediate residential working drawings. Topics include residential plans, elevations, sections, details, schedules, and other related topics. Upon completion, students should be able to prepare a set of residential working drawings that are within accepted architectural standards.

### ARC 114 Architectural CAD

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>3</td>
<td>0</td>
<td>2</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 111 and ARC 112

**Corequisites:** ARC 114A

This course introduces basic architectural CAD techniques. Topics include basic commands and system hardware and software. Upon completion, students should be able to prepare and plot architectural drawings to scale within accepted architectural standards.

### ARC 114A Architectural CAD Lab

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>3</td>
<td>0</td>
<td>1</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 111 and ARC 112

**Corequisites:** ARC 114

This course provides a laboratory setting to enhance architectural CAD skills. Emphasis is placed on further development of commands and system operation. Upon completion, students should be able to prepare and plot scaled architectural drawings.

### ARC 131 Building Codes

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>2</td>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 112 or CAR 111, ENG 111

**Corequisites:** None

This course covers the methods of researching building codes for specific projects. Topics include residential and commercial building codes. Upon completion, students should be able to determine the code constraints governing construction projects.

### ARC 132 Specifications and Contracts

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>0</td>
<td>0</td>
<td>2</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 112 and ARC 230

**Corequisites:** None

This course covers the development of written specifications and the implications of different contractual arrangements. Topics include specification development, contracts, bidding, material research, and agency responsibilities. Upon completion, students should be able to write a specification section and demonstrate the ability to interpret contractual responsibilities.

### ARC 211 Light Construction Technology

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>6</td>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 111, ARC 113 and ARC 230

**Corequisites:** ARC 112

This course covers working drawings for light construction. Topics include plans, elevations, sections, and details; schedules; and other related topics. Upon completion, students should be able to prepare a set of working drawings which are within accepted architectural standards.

### ARC 213 Design Project

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>6</td>
<td>0</td>
<td>4</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 111, ARC 112, ARC 114, ARC 211, ARC 221, ARC 230

**Corequisites:** None

This course provides the opportunity to design and prepare a set of contract documents within an architectural setting. Topics include schematic design, design development, construction documents, and other related topics. Upon completion, students should be able to prepare a set of commercial contract documents.

### ARC-214 Architectural Statics

<table>
<thead>
<tr>
<th>Class</th>
<th>Lab</th>
<th>Clinical</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>0</td>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

**Prerequisites:** ARC 111, ARC 112 and MAT 121

**Corequisites:** None

This course covers the concepts of elementary statics as applied to architecture. Topics include forces, resultants, and
COURSE DESCRIPTIONS

ARC 220 Advanced Architect CAD 1 3 0 2
Prerequisites: ARC 114 and ARC 114A
Corequisites: None

This course provides file management, productivity, and CAD customization skills. Emphasis is placed on developing advanced proficiency techniques. Upon completion, students should be able to create prototype drawings and symbol libraries, compose sheets with multiple details, and use advanced drawing and editing commands.

ARC 221 Architectural 3-D CAD 1 4 0 3
Prerequisites: ARC 114, ARC 220, ARC 230
Corequisites: None

This course introduces architectural three-dimensional CAD applications. Topics include three-dimensional drawing, coordinate systems, viewing, rendering, modeling, and output options. Upon completion, students should be able to prepare architectural three-dimensioning drawings and renderings.

ARC 230 Environmental Systems 3 3 0 4
Prerequisites: ARC 111 and MAT 121 or MAT-171
Corequisites: None

This course introduces plumbing, mechanical (HVAC), and electrical systems for the architectural environment. Topics include basic plumbing, mechanical, and electrical systems for residential and/or commercial buildings with an introduction to selected code requirements. Upon completion, students should be able to develop schematic drawings for plumbing, mechanical, and electrical systems and perform related calculations.

ARC 231 Architectural Presentations 2 4 0 4
Prerequisites: ARC 111
Corequisites: None

This course introduces architectural presentation techniques. Topics include perspective drawing, shadow projection, texturization, rendered plans, elevations, and other related topics. Upon completion, students should be able to present ideas graphically and do rendered presentation drawings.

ARC 235 Architectural Portfolio 2 3 0 3
Prerequisites: ARC 211, ARC 220, ARC 221
Corequisites: None

This course covers the methodology for the creation of an architectural portfolio. Topics include preparation of marketing materials and a presentation strategy using conventional and/or digital design media. Upon completion, students should be able to produce an architectural portfolio of selected projects.

ARC 264 Digital Architecture 1 3 0 2
Prerequisites: ARC 220 and ARC 221 and ARC 231
Corequisites: None

This course covers multiple digital architectural techniques. Topics include spreadsheets and word processing procedures, on-line resources, modems, e-mail, image capture, multimedia, and other related topics. Upon completion, students should be able to transmit/receive electronic data, create multimedia presentations, and produce a desktop publishing document.

ART 111* Art Appreciation 3 0 0 3
Prerequisites: None
Corequisites: None

This course covers the development of art forms from ancient times to the Renaissance. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to identify and analyze a variety of artistic styles, periods, and media. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

ART 114* Art History Survey I 3 0 0 3
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 090
- Grade of “C” or better in ENG 095
- Grade of “C” or better in DRE 098
- Required placement test score(s)
Corequisites: None

This course covers the development of art forms from ancient times to the Renaissance. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

ART 115* Art History Survey II 3 0 0 3
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 090
- Grade of “C” or better in ENG 095
- Grade of “C” or better in DRE 098
- Required placement test score(s)
Corequisites: None

This course covers the development of art forms from the Renaissance to the present. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

</table>

This course covers the development of American art forms from colonial times to the present. Emphasis is placed on architecture, painting, sculpture, graphics, and the decorative arts. Upon completion, students should be able to demonstrate understanding of the history of the American creative experience.

This course introduces non-Western cultural perspectives. Emphasis is placed on, but not limited to, African, Oriental, and Oceanic art forms throughout history. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of non-Western social and cultural development.

This course introduces the elements and principles of design as applied to two-dimensional art. Emphasis is placed on the structural elements, the principles of visual organization, and the theories of color mixing and interaction. Upon completion, students should be able to understand and use critical and analytical approaches as they apply to two-dimensional visual art.

This course introduces basic studio problems in three-dimensional visual design. Emphasis is placed on the structural elements and organizational principles as applied to mass and space. Upon completion, students should be able to apply three-dimensional design concepts.

This course introduces the language of drawing and the use of various drawing materials. Emphasis is placed on drawing techniques, media, and graphic principles. Upon completion, students should be able to demonstrate competence in the use of graphic form and various drawing processes.

This course continues instruction in the language of drawing and the use of various materials. Emphasis is placed on experimentation in the use of drawing techniques, media, and graphic materials. Upon completion, students should be able to demonstrate increased competence in the expressive use of graphic form and techniques.

This course introduces the use of the computer as a tool for solving visual problems. Emphasis is placed on fundamentals of computer literacy and design through bit-mapped image manipulation. Upon completion, students should be able to demonstrate an understanding of paint programs, printers, and scanners to capture, manipulate, and output images.

This course covers the practical application of display techniques. Emphasis is placed on preparation of artwork for installation, hardware systems, and exhibition graphics. Upon completion, students should be able to demonstrate basic gallery exhibition skills.

This course covers resume writing, interview skills, and the preparation and presentation of an art portfolio. Emphasis is placed on the preparation of a portfolio of original artwork, the preparation of a photographic portfolio, approaches to resume writing, and interview techniques. Upon completion, students should be able to mount original art for portfolio presentation, photograph and display a professional slide portfolio, and write an effective resume.

This course introduces printmaking: its history, development techniques, and processes. Emphasis is placed on basic applications with investigation into image source and development. Upon completion, students should be able to produce printed images utilizing a variety of methods.
### Courses Designated with an Asterisk (*) are College Transfer Courses

| **ART 264* Digital Photography I** | 1     | 4   | 0        | 3      |
| Prerequisites: None                 |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course introduces digital photographic equipment, theory and processes. Emphasis is placed on camera operation, composition, computer photo manipulation and creative expression. Upon completion, students should be able to successfully expose, digitally manipulate, and print a well-conceived composition. |

| **ART 265* Digital Photography II** | 1     | 4   | 0        | 3      |
| Prerequisites: ART 264              |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course provides exploration of the concepts and processes of photo manipulation through complex composite images, special effects, color balancing and image/text integration. Emphasis is placed on creating a personal vision and style. Upon completion, students should be able to produce well-executed images using a variety of photographic and photo manipulative approaches. |

| **ART 266* Videography I**         | 0     | 6   | 0        | 3      |
| Prerequisites: None                 |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course introduces various aspects of basic video production including concept development, scripting, camera operation, and post-production. Emphasis is placed on creative expression, camera handling, storyboarding, and editing. Upon completion, students should be able to demonstrate a basic understanding of video camera operation and production techniques. |

| **ART 267* Videography II**        | 0     | 6   | 0        | 3      |
| Prerequisites: ART 266              |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course is designed to provide a framework for the production of a long-term video project. Emphasis is placed on realization of the unique creative vision. Upon completion, students should be able to produce a thematically coherent, edited video with sound and titling. |

| **ART 271* Computer Art II**       | 0     | 6   | 0        | 3      |
| Prerequisites: ART 171              |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course includes advanced computer imaging techniques. Emphasis is placed on creative applications of digital technology. Upon completion, students should be able to demonstrate command of computer systems and applications to express their personal vision. |

| **ART 281* Sculpture I**           | 0     | 6   | 0        | 3      |
| Prerequisites: None                 |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course provides an exploration of the creative and technical methods of sculpture with focus on the traditional processes. Emphasis is placed on developing basic skills as they pertain to three-dimensional expression in various media. Upon completion, students should be able to show competence in variety of sculptural approaches. |

| **ART 282* Sculpture II**          | 0     | 6   | 0        | 3      |
| Prerequisites: ART 281              |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course builds on the visual and technical skills learned in ART 281. Emphasis is placed on developing original solutions to sculptural problems in a variety of media. Upon completion, students should be able to express individual ideas using the techniques and materials of sculpture. |

| **ART 283* Ceramics I**            | 0     | 6   | 0        | 3      |
| Prerequisites: None                 |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course provides an introduction to three-dimensional design principles using the medium of clay. Emphasis is placed on fundamentals of forming, surface design, glaze application, and firing. Upon completion, students should be able to demonstrate skills in slab and coil construction, simple wheel forms, glaze technique, and creative expression. |

| **ART 284* Ceramics II**           | 0     | 6   | 0        | 3      |
| Prerequisites: ART 283              |       |     |          |        |
| Corequisites: None                  |       |     |          |        |
| This course covers advanced hand building and wheel techniques. Emphasis is placed on creative expression, surface design, sculptural quality, and glaze effect. Upon completion, students should be able to demonstrate a high level of technical competence in forming and glazing with a development of three-dimensional awareness. |
ART 285* Ceramics III
Prerequisites: ART 284
Corequisites: None

This course provides the opportunity for advanced self-determined work in sculptural and functional ceramics. Emphasis is placed on developing the technical awareness of clay bodies, slips, engobes, and firing procedures necessary to fulfill the student’s artistic goals. Upon completion, student should be able to demonstrate knowledge of materials and techniques necessary to successfully create original projects in the clay medium.

ART 286* Ceramics IV
Prerequisites: ART 285
Corequisites: None

This course provides the opportunity for self-determined work in sculptural and functional ceramics. Emphasis is placed on developing the technical awareness of glaze materials, glaze formulation, and firing techniques necessary to fulfill the students’ artistic goals. Upon completion, student should be able to demonstrate knowledge of materials and techniques necessary to successfully create original projects in the clay medium.

ART 288* Studio
Prerequisites: None
Corequisites: None

This course provides the opportunity for advanced self-determined work beyond the limits of regular studio course sequences. Emphasis is placed on creative self-expression and in-depth exploration of techniques and materials. Upon completion, students should be able to create original projects specific to media, materials, and techniques.

ART 292 Intro to Automation
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   AND
   a. A grade of “C” or better in MAT 060 OR successful completion of DMA 010, DMA 020, and DMA 030
   b. A grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: or MAT 121 or or MAT 171 or or successful completion of DMA 040 an DMA 050 OR
   d. Required placement test score(s)
Corequisites: None

This course introduces the basic principles of automated manufacturing and describes the tasks that technicians perform on the job. Topics include the history, development, and current applications of robots and automated systems including their configuration, operation, components, and controls. Upon completion, students should be able to understand the basic concepts of automation and robotic systems.

AUB 111 Painting & Refinishing I
Prerequisites: None
Corequisites: None

This course introduces the proper procedures for using automotive refinishing equipment and materials in surface preparation and application. Topics include federal, state, and local regulations, personal safety, refinishing equipment and materials, surface preparation, masking, application techniques, and other related topics. Upon completion, students should be able to identify and use proper equipment and materials in refinishing following accepted industry standards.

AUB 112 Painting & Refinishing II
Prerequisites: AUB 111
Corequisites: None

This course covers advanced painting techniques and technologies with an emphasis on identifying problems encountered by the refinishing technician. Topics include materials application, color matching, correction of refinishing problems, and other related topics. Upon completion, students should be able to perform spot, panel, and overall refinishing repairs and identify and correct refinish problems.

AUB 114 Special Finishes
Prerequisites: AUB 111
Corequisites: None

This course introduces multistage finishes, custom painting, and protective coatings. Topics include base coats, advanced intermediate coats, clear coats, and other related topics. Upon completion, students should be able to identify and apply specialized finishes based on accepted industry standards.

AUB 121 Non-Structural Damage I
Prerequisites: None
Corequisites: None

This course introduces safety, tools, and the basic fundamentals of body repair. Topics include shop safety, damage analysis, tools and equipment, repair techniques, materials selection, materials usage, and other related topics. Upon completion, students should be able to identify and repair minor direct and indirect damage including removal/repairing/ replacing of body panels to accepted standards.

AUB 122 Non-Structural Damage II
Prerequisites: AUB 121
Corequisites: None

This course covers safety, tools, and advanced body repair. Topics include shop safety, damage analysis, tools and equipment, advanced repair techniques, materials selection, materials usage, movable glass, and other related topics. Upon completion, students should be able to identify and repair or replace direct and indirect damage to accepted standards including movable glass and hardware.
AUB 131 Structural Damage I
Prerequisites: None
Corequisites: None
This course introduces safety, equipment, structural damage analysis, and damage repairs. Topics include shop safety, design and construction, structural analysis and measurement, equipment, structural glass, repair techniques, and other related topics. Upon completion, students should be able to analyze and perform repairs to a vehicle which has received light/moderate structural damage.

AUB 136 Plastics & Adhesives
Prerequisites: None
Corequisites: None
This course covers safety, plastic and adhesive identification, and the various repair methods of automotive plastic components. Topics include safety, identification, preparation, material selection, and the various repair procedures including refinishing. Upon completion, students should be able to identify, remove, repair, and/or replace automotive plastic components in accordance with industry standards.

AUB 141 Mech & Elec Components I
Prerequisites: None
Corequisites: None
This course covers the basic principles of automotive mechanical and electrical components. Topics include personal and environmental safety and suspension and steering, electrical, brake, heating and air-conditioning, cooling, drive train, and restraint systems. Upon completion, students should be able to identify system components and perform basic system diagnostic checks and/or repairs according to industry standards.

AUB 162 Autobody Estimating
Prerequisites: None
Corequisites: None
This course provides a comprehensive study of autobody estimating. Topics include collision damage analysis, industry regulations, flat-rate and estimated time, and collision estimating manuals. Upon completion, students should be able to prepare and interpret a damage report.

AUC 114 Custom Fiberglass Skills
Prerequisites: None
Corequisites: None
This course will provide instruction in non-metallic customizing and repair techniques. Emphasis will be placed on diagnosis and repair of cracks, proper use of bonding agents, fiberglass body parts removal/replacement, and custom fabrication techniques using fiberglass materials. Upon completion, students should be able to identify types of fiberglass and demonstrate the ability to properly prepare, apply, and finish fiberglass components.

AUB 116 Engine Repair
Prerequisites: None
Corequisites: None
This course covers the theory, construction, inspection, diagnosis, and repair of internal combustion engines and related systems. Topics include fundamental operating principles of engines and diagnosis, inspection, adjustment, and repair of automotive engines using appropriate service information. Upon completion, students should be able to perform basic diagnosis, measurement and repair of automotive engines using appropriate tools, equipment, procedures, and service information.

AUB 123 Powertrain Diagnosis and Service
Prerequisites: TRN 110
Corequisites: AUT 116
This course covers the diagnosis, repair and service of the vehicle powertrain and related systems. Topics include fundamental operating principles of engines and transmissions and use of proper service procedures for diagnosis, service and R & R of major components. Upon completion students should be able to perform basic service and diagnosis of the powertrain and related systems, the students should also be able to perform in vehicle repairs and R & R components.

AUB 141 Suspension & Steering Sys
Prerequisites: TRN 110
Corequisites: None
This course covers principles of operation, types, and diagnosis/repair of suspension and steering systems to include steering geometry. Topics include manual and power steering systems and standard and electronically controlled suspension and steering systems. Upon completion, students should be able to service and repair steering and suspension components, check and adjust alignment angles, repair tires, and balance wheels.
COURSE DESCRIPTIONS

AUT 141A Suspension & Steering Lab 0 3 0 1
Prerequisites: None
Corequisites: AUT 141

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include manual and power steering systems and standard and electronically controlled suspension and steering systems. Upon completion, students should be able to service and repair steering and suspension components, check and adjust alignment angles, repair tires, and balance wheels.

AUT 151 Brake Systems 2 3 0 3
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 080
   b. Grade of “C” or better in ENG 085
   c. Grade of “C” or better in DRE 097
   d. Required placement test score(s)
Corequisites: AUT 151A

This course covers principles of operation and types, diagnosis, service, and repair of brake systems. Topics include drum and disc brakes involving hydraulic, vacuum boost, hydra-boost, electrically powered boost, and anti-lock and parking brake systems. Upon completion, students should be able to diagnose, service, and repair various automotive braking systems.

AUT 151A Brakes Systems Lab 0 3 0 1
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 080
   b. Grade of “C” or better in ENG 085
   c. Grade of “C” or better in DRE 097
   d. Required placement test score(s)
Corequisites: AUT 151

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include drum and disc brakes involving hydraulic, vacuum-boost, hydra-boost, electrically powered boost, and anti-lock, parking brake systems and emerging brake systems technologies. Upon completion, students should be able to diagnose, service, and repair various automotive braking systems.

AUT 163 Adv Auto Electricity 2 3 0 3
Prerequisites: TRN 120
Corequisites: AUT 163

This course covers the principles of operation, wiring diagrams, test equipment, and diagnosis, repair, and replacement of electronics, lighting, gauges, horn, wiper, accessories, and body modules. Topics include networking and module communication, circuit construction, wiring diagrams, circuit testing, and troubleshooting. Upon completion, students should be able to properly use wiring diagrams, diagnose, test, and repair wiring, lighting, gauges, accessories, modules, and electronic concerns.

AUT 163A Adv Auto Electricity Lab 0 3 0 1
Prerequisites: TRN 120
Corequisites: AUT 163

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include networking and module communication, circuit construction, wiring diagrams, circuit testing, troubleshooting and emerging electrical/electronic systems technologies. Upon completion, students should be able to properly use wiring diagrams, diagnose, test, and repair wiring, lighting, gauges, accessories, modules, and electronic concerns.

AUT 181 Engine Performance I 2 3 0 3
Prerequisites: TRN 110
Corequisites: None

This course covers the introduction, theory of operation, and basic diagnostic procedures required to restore engine performance to today’s vehicles equipped with complex engine control systems. Topics include an overview of engine operation, ignition components and systems, fuel delivery, injection components and systems and emission control devices. Upon completion students should be able to describe operation of and diagnose/repair basic ignition, fuel and emission related driveability problems using appropriate test equipment and service information.

AUT 181A Engine Performance I Lab 0 3 0 1
Prerequisites: None
Corequisites: AUT 181

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include overviews of engine operation, ignition components and systems, fuel delivery, injection components and systems and emission control devices and emerging engine performance technologies. Upon completion, students should be able to describe operation and diagnose/repair basic ignition, fuel and emission related driveability problems using appropriate test equipment/service information.

AUT 212 Auto Shop Management 3 0 0 3
Prerequisites: TRN 110
Corequisites: None

This course covers the principles of management essential to decision-making, communication, authority, and leadership. Topics include shop supervision, shop organization, customer relations, cost effectiveness and work place ethics. Upon completion, students should be able to describe basic automotive shop operation from a management standpoint.
AUT 213 Automotive Servicing II
Prerequisites: None
Corequisites: None

This course is a lab used as an alternative to co-op placement. Emphasis is placed on shop operations, troubleshooting, testing, adjusting, repairing, and replacing components using appropriate test equipment and service information. Upon completion, students should be able to perform a variety of automotive repairs using proper service procedures and to operate appropriate equipment.

AUT 221 Auto Transm/Transaxles
Prerequisites: TRN 110
Corequisites: None

This course covers operation, diagnosis, service, and repair of automatic transmissions/transaxles. Topics include hydraulic, pneumatic, mechanical, and electrical/electronic operation of automatic drive trains and the use of appropriate service tools and equipment. Upon completion, students should be able to explain operational theory, diagnose and repair automatic drive trains.

AUT 221A Auto Transm/Transax Lab
Prerequisites: None
Corequisites: AUT 221

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include hydraulic, pneumatic, mechanical, and electrical/electronic operation of automatic drive trains and the use of appropriate service tools and equipment. Upon completion, students should be able to diagnose and repair automatic drive trains.

AUT 231 Manual Transmission/Transaxles and Drivetrains
Prerequisites: TRN 110
Corequisites: None

This course covers the operation, diagnosis, and repair of manual transmissions/transaxles, clutches, driveshafts, axles, and final drives. Topics include theory of torque, power flow, and manual drive train servicing and repair using appropriate service information, tools, and equipment. Upon completion, students should be able to explain operational theory, diagnose and repair manual drive trains.

AUT 231A Man Trans/Ax/Drtrain Lab
Prerequisites: None
Corequisites: AUT 231

This course is an optional lab for the program that needs to meet NATEF hour standards but does not have a co-op component in the program. Topics include manual drive train diagnosis, service and repair using appropriate service information, tools, and equipment. Upon completion, students should be able to diagnose and repair manual drive trains.

AUT 281 Adv Engine Performance
Prerequisites: AUT 181 or AUT 183
Corequisites: None

This course utilizes service information and specialized test equipment to diagnose and repair power train control systems. Topics include computerized ignition, fuel and emission systems, related diagnostic tools and equipment, data communication networks, and service information. Upon completion, students should be able to perform diagnosis and repair.
**BIO 106 Intro to Anat/Phys/Micro**  2 2 0 3  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 090  
b. Grade of “C” or better in ENG 095  
c. Grade of “C” or better in DRE 098  
d. Required placement test score(s)  
Corequisites: None  

This course covers the fundamental and principal concepts of human anatomy and physiology and microbiology. Topics include an introduction to the structure and function of cells, tissues, and human organ systems, and an overview of microbiology, epidemiology, and control of microorganisms. Upon completion, students should be able to identify structures and functions of the human body and describe microorganisms and their significance in health and disease.  

**BIO 110* Principles of Biology**  3 3 0 4  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 090  
b. Grade of “C” or better in ENG 095  
c. Grade of “C” or better in DRE 098  
d. Required placement test score(s)  
Corequisites: None  

This course provides a survey of fundamental biological principles for non-science majors. Emphasis is placed on basic chemistry, cell biology, metabolism, genetics, taxonomy, evolution, ecology, diversity, and other related topics. Upon completion, students should be able to demonstrate increased knowledge and better understanding of biology as it applies to everyday life. Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14] The online lab will require a Custom Lab Kit which can be purchased through the CFCC Bookstore.  

**BIO 111* General Biology I**  3 3 0 4  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 090  
b. Grade of “C” or better in ENG 095  
c. Grade of “C” or better in DRE 098  
d. Required placement test score(s)  
Corequisites: None  

This course introduces the principles and concepts of biology. Emphasis is placed on basic biological chemistry, cell structure and function, metabolism and energy transformation, genetics, evolution, classification, and other related topics. Upon completion, students should be able to demonstrate understanding of life at the molecular and cellular levels. Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]  

**BIO 112* General Biology II**  3 3 0 4  
Prerequisites: BIO 111  
Corequisites: None  

This course is a continuation of BIO 111. Emphasis is placed on organisms, biodiversity, plant and animal systems, ecology, and other related topics. Upon completion, students should be able to demonstrate comprehension of life at the organismal and ecological levels. Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]  

**BIO 120* Introductory Botany**  3 3 0 4  
Prerequisites: BIO 110 OR BIO 111  
Corequisites: None  

This course provides an introduction to the classification, relationships, structure, and function of plants. Topics include reproduction and development of seed and non-seed plants, levels of organization, form and function of systems, and a survey of major taxa. Upon completion, students should be able to demonstrate comprehension of plant form and function, including selected taxa of both seed and non-seed plants.  

**BIO 130* Introductory Zoology**  3 3 0 4  
Prerequisites: BIO 110 or BIO 111  
Corequisites: None  

This course provides an introduction to the classification, relationships, structure, and function of major animal phyla. Emphasis is placed on levels of organization, reproduction and development, comparative systems, and a survey of selected phyla. Upon completion, students should be able to demonstrate comprehension of animal form and function including comparative systems of selected groups.  

**BIO 140* Environmental Biology**  3 0 0 3  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 090  
b. Grade of “C” or better in ENG 095  
c. Grade of “C” or better in DRE 098  
d. Required placement test score(s)  
Corequisites: BIO 140A  

This course introduces environmental processes and the influence of human activities upon them. Topics include ecological concepts, population growth, natural resources, and a focus on current environmental problems from scientific, social, political, and economic perspectives. Upon completion, students should be able to demonstrate an understanding of environmental interrelationships and of contemporary environmental issues.

This course provides a comprehensive study of the anatomy and physiology of the human body. Topics include body organization, homeostasis, cytology, histology, and the integumentary, skeletal, muscular, nervous, special senses, and endocrine systems. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. Labs may require gloves which can be purchased through the CFCC Bookstore. Please attend the first class before purchasing.

This course covers principles of microbiology with emphasis on microorganisms and human disease. Topics include an overview of microbiology and aspects of medical microbiology, identification and control of pathogens, disease transmission, host resistance, and immunity. Upon completion, students should be able to demonstrate knowledge of microorganisms and the disease process as well as aseptic and sterile techniques. Lab will require a lab coat, gloves and goggles which can be purchased through the CFCC Bookstore. Please attend the first class before purchasing.
Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

purchased through the CFCC Bookstore. Please attend the first class before purchasing.

**BIO 250* Genetics**
Prerequisites: BIO 112
Corequisites: None

This course covers principles of prokaryotic and eukaryotic cell genetics. Emphasis is placed on the molecular basis of heredity, chromosome structure, patterns of Mendelian and non-Mendelian inheritance, evolution and biotechnological applications. Upon completion, students should be able to recognize and describe genetic phenomena and demonstrate knowledge of important genetic principles.

**BMS 117 Marine Spray Finishing**
Prerequisites: BTB 115
Corequisites: None

This course covers the fundamental techniques used in the preparation and application of marine finishes, using modern coatings and spray equipment common to the marine manufacturing and service industry. Emphasis is placed on safety, product data sheets, mixing ratios, proper spray technique, troubleshooting finishes and equipment. Upon completion, students should be able to correctly operate tools to efficiently prepare surfaces, apply fairing compounds, primers and finish coats to industry standards.

**BPR 111 Print Reading**
Prerequisites: None
Corequisites: None

This course introduces the basic principles of blueprint reading. Topics include line types, orthographic projections, dimensioning methods, and notes. Upon completion, students should be able to interpret basic blueprints and visualize the features of a part or system.

**BPR 121 Blueprint Reading: Mech**
Prerequisites: BPR 111 or MAC 131
Corequisites: None

This course covers the interpretation of intermediate blueprints. Topics include tolerancing, auxiliary views, sectional views, and assembly drawings. Upon completion, students should be able to read and interpret a mechanical working drawing.

**BPR 130 Print Reading-Construction**
Prerequisites: None
Corequisites: None

This course covers the interpretation of prints and specifications that are associated with design and construction projects. Topics include interpretation of documents for foundations, floor plans, elevations, and related topics. Upon completion, students should be able to read and interpret a set of construction prints and documents.

**BTB 101 Boat Building I**
Prerequisites: None
Corequisites: DFT 100

This course introduces the modern wood and composite boat shop. Topics include maintaining, sharpening, and safely using hand and power tools; lofting; and properly utilizing materials common in the boat-building industry. Upon completion, students should be able to loft a simple flat or V-bottom boat and build it using sheet plywood construction methods. This is a diploma-level course.

**BTB 101-A Boat Building I**
Prerequisites: None
Corequisites: DFT 100

This course introduces the modern wood and composite boat shop. Topics include maintaining, sharpening, and safely using hand and power tools; lofting; and properly utilizing materials common in the boat-building industry.

**BTB 101-B Boat Building I**
Prerequisites: BTB 101-A, DFT 100
Corequisites: None

Upon completion, students should be able to loft a simple flat or V-bottom boat and build it using sheet plywood construction methods.

**BTB 102 Boat Building II**
Prerequisites: BTB 101
Corequisites: None

This course introduces more advanced hull development. Topics include advanced lofting, building jigs and birdcage building forms, wood and composite lamination techniques, marine finishing materials and methods, and quality control procedures. Upon completion, students should be able to build, fit out, and finish a small boat using modern fabrics, core materials, and methods of construction.

**BTB 103 Yacht Joiner Practices I**
Prerequisites: BTB 101
Corequisites: BTB 102

This course introduces the fundamental skills and attention to detail necessary to fine yacht joinery. Emphasis is placed on fitting, mortise/tenon, and dowel joints; fitting dados in grooves; and building a project to close tolerances from a blueprint. Upon completion, students should be able to build a cabinet carcass with face frame, round corner posts, laminate surfaces, and a dove-tailed drawer.
This course is an extension of BTB 103 and emphasizes finishing cabinets and rough-in of yacht interiors. Topics include manufacturing and fitting moldings, door construction methods, bright work finishing, and bulkhead and cabin sole fitting and installation. Upon completion, students should be able to build raised panel doors and moldings, apply modern finishes, and rough in bulkheads, soles, and yacht furniture.

This course introduces repair/renovation principles and methods for wood and fiberglass boats. Emphasis is placed on surveying boats for needed repairs, planning repairs, and estimating costs in tools, materials, and techniques used in repair and renovation. Upon completion, students should be able to plan and execute repairs in wood and fiberglass boats (structural and cosmetic) and execute marine refinishing techniques.

This course familiarizes students with marine engines and related systems, installation, troubleshooting and minor repairs. Topics covered are drivetrains and cooling, fuel, exhaust, and electrical systems for a typical inboard engine. Upon completion, students should be able to install, troubleshoot, and perform minor repairs on marine engines and related systems.

This course teaches students the skills necessary to wire 12-volt direct current and 120-volt alternating current electrical systems found on modern boats. Topics covered are electrical system and wiring sizing, batteries, wire harnesses, distribution panels, electronic component installation, and electrical system troubleshooting. Upon completion, students should be able to install a complete electrical system on a mock-up yacht.

This course is an introduction to the plumbing systems used on modern yachts. Topics will include pressurized hot water systems, water closets, sanitation systems, thru hulls, and sea cocks. Upon completion, students should be able to install heads, showers, and drains found on yachts.

This course provides an introduction of Marlinspike Seamanship, rigging and tuning masts, and commissioning yachts. Topics covered are knot tying, whipping lines, standing and running rigging on spars, maintaining winches, anchoring systems and care and rigging of sails. Upon completion, students should be able to efficiently complete yacht rigging competencies to industry standards. This course is approved only at the certificate and diploma level.

This course introduces fiberglass boat building using polyester and vinylester resins in conjunction with single skin and composite covered construction. Topics covered are the types and uses of resins, fabrics, and cores, and chopper and gel coat guns. Upon completion, students should be able to build a composite core boat and a single skin boat.

This course covers the skills necessary to build fiberglass molds for hulls and decks. Topics include the proper use of tooling gel coats, proper lay-ups, heat problems during lay-ups, reinforcing techniques and resin infusion. Upon completion, students should be able to build a female mold, a “quickie” female deck mold and various “quickie” male molds for custom parts.

This course covers the proper techniques for prepping all boat surfaces for stain, paint or varnish. Emphasis is placed on the safe use of fairing and glazing compounds and various primers. Upon completion, students should be able to demonstrate the techniques required to prepare a boat hull for various finishes and topcoats.
COURSE DESCRIPTIONS

BUS 115* Business Law I  
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course introduces the ethics and legal framework of business. Emphasis is placed on contracts, negotiable instruments, Uniform Commercial Code, and the working of the court systems. Upon completion, students should be able to apply ethical issues and laws covered to selected business decision-making situations.

BUS 121 Business Math  
Prerequisites: A grade of “C” or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030.
Corequisites: None

This course covers fundamental mathematical operations and their application to business problems. Topics include payroll, pricing, interest and discount, commission, taxes, and other pertinent uses of mathematics in the field of business. Upon completion, students should be able to apply mathematical concepts to business.

BUS 125 Personal Finance  
Prerequisites: A grade of “C” or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030.
Corequisites: None

This course provides a study of individual and family financial decisions. Emphasis is placed on building useful skills in buying, managing finances, increasing resources, and coping with current economic conditions. Upon completion, students should be able to develop a personal financial plan.

BUS 137* Principles of Management  
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course is designed to be an overview of the major functions of management. Emphasis is placed on planning, organizing, controlling, directing, and communicating. Upon completion, students should be able to work as contributing members of a team utilizing these functions of management.

BUS 225 Business Finance  
Prerequisites: A grade of “C” or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030, and ACC 120 and BUS 121
Corequisites: None

This course provides an overview of business financial management. Emphasis is placed on financial statement analysis, time value of money, management of cash flow, risk and return, and sources of financing. Upon completion, students should be able to interpret and apply the principles of financial management.

BUS 230 Small Business Management  
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course introduces the challenges of entrepreneurship including the startup and operation of a small business. Topics include market research techniques, feasibility studies, site analysis, financing alternatives, and managerial decision making. Upon completion, students should be able to develop a small business plan.

BUS 239 Bus Applications Seminar  
Prerequisites: ACC 120, BUS 115, BUS 137, MKT 120 and (ECO 151 or ECO 251 or ECO 252)
Corequisites: None

This course is designed as a capstone course for Business Administration majors. Emphasis is placed on decision making in the areas of management, marketing, production, purchasing, and finance. Upon completion, students should be able to apply the techniques, processes, and vital professional skills needed in the work place.

BUS 240 Business Ethics  
Corequisites: None

This course introduces contemporary and controversial ethical issues that face the business community. Topics include moral reasoning, moral dilemmas, law and morality, equity, justice and fairness, ethical standards, and moral development. Upon completion, students should be able to demonstrate an understanding of their moral responsibilities and obligations as members of the workforce and society.

BUS 260 Business Communication  
Prerequisites: ENG 110 or ENG 111 and CIS 110 or CIS 111
Corequisites: None

This course is designed to develop skills in writing business communications. Emphasis is placed on business reports, correspondence, and professional presentations. Upon
completion, students should be able to communicate effectively in the workplace.

**BUS 280 REAL Small Business**  
Prerequisites: None  
Corequisites: None

This course introduces hands-on techniques and procedures for planning and opening a small business, including the personal qualities needed for entrepreneurship. Emphasis is placed on market research, finance, time management, and day-to-day activities of owning/operating a small business. Upon completion, students should be able to implement a viable business plan and seek funding.

**CAR 111 Carpentry I**  
Prerequisites: None  
Corequisites: None

This course introduces the theory and construction methods associated with the building industry, including framing, materials, tools, and equipment. Topics include safety, hand/power tool use, site preparation, measurement and layout, footings and foundations, construction framing, and other related topics. Upon completion, students should be able to safely lay out and perform basic framing skills with supervision.

**CAR 112 Carpentry II**  
Prerequisites: CAR 111  
Corequisites: None

This course covers the advanced theory and construction methods associated with the building industry including framing and exterior finishes. Topics include safety, hand/power tool use, measurement and layout, construction framing, exterior trim and finish, and other related topics. Upon completion, students should be able to safely frame and apply exterior finishes to a residential building with supervision.

**CAR 113 Carpentry III**  
Prerequisites: CAR 111  
Corequisites: None

This course covers interior trim and finishes. Topics include safety, hand/power tool use, measurement and layout, specialty framing, interior trim and finishes, cabinetry, and other related topics. Upon completion, students should be able to safely install various interior trim and finishes in a residential building with supervision.

**CAR 114 Residential Bldg Codes**  
Prerequisites: None  
Corequisites: None

This course covers building codes and the requirements of state and local construction regulations. Emphasis is placed on the minimum requirements of the North Carolina building codes related to residential structures. Upon completion, students should be able to determine if a structure is in compliance with North Carolina building codes.

**CCT 250 Network Vulnerabilities I**  
Prerequisites: CTI 120 or NET 110  
Corequisites: None

This course introduces students to penetration testing, network vulnerabilities, and hacking. Topics include analyzing advanced techniques for circumventing network security hardware and software. Upon completion, students should be able to assemble test kits for multiple operating systems, scan and footprint networks, and perform advanced forensic investigation.

**CCT 251 Network Vulnerabilities II**  
Prerequisites: CCT 250  
Corequisites: None

This course advances students knowledge of penetration testing, network vulnerabilities, and hacking. Topics include analyzing advanced techniques for circumventing network security hardware and software. Upon completion, students should be able to assemble test kits for multiple operating systems, scan and footprint networks, and perform advanced forensic investigation.

**CCT 260 Mobile Phone Examination**  
Prerequisites: CET 150  
Corequisites: None

This course introduces the unique skills and methodologies necessary to assist in the investigation and prosecution of cyber crimes involving mobile phones. Topics include the basics of the cellular networks as well as data extraction from GSM, iDEN and CDMA handsets. Upon completion, students should be able to use the course processes and methodologies to obtain forensic evidence from GSM, iDEN and CDMA handsets.

**CET 111 Computer Upgrade/Repair I**  
Prerequisites: None  
Corequisites: None

This course covers repairing, servicing, and upgrading computers and peripherals in preparation for industry certification. Topics include CPU/memory/bus identification, disk subsystems, hardware/software installation/configuration, common device drivers, data recovery, system maintenance, and other related topics. Upon completion, students should be able to safely repair and/or upgrade computer systems to perform within specifications.

**CET 125 Voice and Data Cabling**  
Prerequisites: None  
Corequisites: None

This course provides an understanding of the industry and its worldwide standards, types of media and cabling, physical
and logical networks, including signal transmission. Topics include network design documentation, part list set-up, pulling and mounting cable, cable management, wiring closets, patch panel installation and termination including cable testing. Upon completion, students should be able to understand documentation, design, installation and safety issues associated with voice and data cabling.

CET 130 Operating System Prin 2 3 0 3
Prerequisites: None
Corequisites: None

This course introduces the concepts, usage, internals and applications of operating systems used in engineering technology. Topics include resource management, shells, schedulers, file systems, networking, software considerations and other related topics. Upon completion, students should be able to choose and evaluate an operating system for engineering applications.

CET 150 Computer Forensics I 2 3 0 3
Prerequisites: CET 130 or CTS 120
Corequisites: None

This course is an introduction to computer forensic concepts, with emphasis on computer forensic methods and best practices. Topics include computer system analysis, physical and logical storage methods for different types of media, tools to recover and analyze data from storage media, system security. Upon completion, students should be able to use diagnostic and investigative techniques to identify and retrieve data from various types of computer media.

CET 172 Internet Technologies 2 3 0 3
Prerequisites: None
Corequisites: None

The goal of this course is to provide an introduction to Internet technologies and prepare students to pass vendor independent internet technology certification exams. Topics cover using different Internet protocols, programming on the Internet, the OSI model, the Internet infrastructure, security, and e-commerce. Upon completion, students should be prepared to take vendor independent Internet technology certification exams.

CET 211 Computer Upgrade/Repair II 2 3 0 3
Prerequisites: None
Corequisites: CIS 110

This course covers concepts of repair service, and upgrade of computers and peripherals in preparation for industry certification. Topics may include resolving resource conflicts and system bus specifications, configuration and troubleshooting peripherals, operating system configuration and optimization, and other related topics. Upon completion, students should be able to identify and resolve system conflicts and optimize system performance.

CET 240 Network Security 2 2 0 3
Prerequisites: CET 172
Corequisites: None

This course is to provide a comprehensive study of network and computer security. Topics include security principles, establishing baselines, policies, network hardening, legal issues, disaster recovery, attack and defense techniques and technologies. Upon completion, students should be able to identify, establish, and maintain an appropriate security model on a computer network.

CET 245 Internet Servers 2 3 0 3
Prerequisites: CET 130
Corequisites: None

This course covers the setup and management of Internet server hardware and software. Topics include TCP/IP, FTP, SMTP, and HTTP; installation and configuration of server software for web, FTP, DNS, mail, and other services. Upon completion, students should be able to set up and maintain Internet servers.

CET 250 Computer Forensics II 2 3 0 3
Prerequisites: CET 150
Corequisites: None

This course is a study in computer forensic practices with emphasis placed on methods used for prevention, detection, and apprehension of perpetrators of cyber-criminal activity. Topics include the roles of Chief Security Officers in the securing of system breaches, vulnerabilities, network and server security issues, OS and application security risks. Upon completion students should be able to identify and collect evidence to prove unauthorized and inappropriate access on computer systems and networks.

CHM 130* Gen, Org, & Biochemistry 3 0 0 3
Prerequisites: Completion of one of the following:
a. Grade of "C" or better in RED 090
b. Grade of "C" or better in ENG 095
c. Grade of "C" or better in DRE 098
d. Required placement test score(s)
   AND A grade of "C" or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030
Corequisites: None

This course provides a survey of basic facts and principles of general, organic, and biochemistry. Topics include measurement, molecular structure, nuclear chemistry, solutions, acid-base chemistry, gas laws, and the structure, properties, and reactions of major organic and biological groups. Upon completion, students should be able to demonstrate an understanding of fundamental chemical concepts.

</table>
COURSE DESCRIPTIONS

CHM 252* Organic Chemistry II  
Prerequisites: CHM 251  
Corequisites: None

This course provides continuation of the systematic study of the theories, principles, and techniques of organic chemistry. Topics include nomenclature, structure, properties, reactions, and mechanisms of aromatics, aldehydes, ketones, carboxylic acids and derivatives, amines, and heterocyclics; multi-step synthesis will be emphasized. Upon completion, students should be able to demonstrate an understanding of organic concepts as needed to pursue further study in chemistry and related professional fields.

CIS 110* Introduction to Computers  
Prerequisites: Proficiency in Reading

Completion of one of the following:
- Grade of “C” or better in RED 090
- Grade of “C” or better in ENG 095
- Grade of “C” or better in DRE 098
- Required placement test score(s)
  AND
  - Successful completion of DMA 010, DMA 020, DMA 030 DMA 040 or MAT 121 or MAT 171

Corequisites: None

This course introduces computer concepts, including fundamental functions and operations of the computer. Topics include identification of hardware components, basic computer operations, security issues, and use of software applications. Upon completion, students should be able to demonstrate an understanding of the role and function of computers and use the computer to solve problems.

CIS 111 Basic PC Literacy  
Prerequisites: None  
Corequisites: None

This course provides a brief overview of computer concepts. Emphasis is placed on the use of personal computers and software applications for personal and workplace use. Upon completion, students should be able to demonstrate basic personal computer skills.

CIS 115* Intro to Prog & Logic  
Prerequisites: Successful completion of DMA010, DMA020, DMA 030 and DMA 040 OR MAT 121 or MAT 171  
Corequisites: CIS 110

This course introduces computer programming and problem solving in a structured program logic environment. Topics include language syntax, data types, program organization, problem solving methods, algorithm design, and logic control structures. Upon completion, students should be able to manage files with operating system commands, use top-down algorithm design, and implement algorithmic solutions in a programming language.

CJC 100 Basic Law Enforcement Training  
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 080 and ENG-080
- Grade of “C” or better in ENG 085
- Grade of “C” or better in DRE 097
- Required placement test score(s)

Corequisites: None

This course covers the basic skills and knowledge needed for entry-level employment as a law enforcement officer in North Carolina. Topics are divided into general units of study: legal, patrol duties, law enforcement communications, investigations, practical application and sheriff-specific. Upon successful completion, the student will be able to demonstrate competence in topics and areas required for the state comprehensive certification examination. This is a certificate-level course.

CJC 111* Intro to Criminal Justice  
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 090
- Grade of “C” or better in ENG 095
- Grade of “C” or better in DRE 098
- Required placement test score(s)

Corequisites: None

This course introduces the components and processes of the criminal justice system. Topics include history, structure, functions, and philosophy of the criminal justice system and their relationship to life in our society. Upon completion, students should be able to define and describe the major system components and their interrelationships and evaluate career options.

CJC 112 Criminology  
Prerequisites: None  
Corequisites: None

This course introduces deviant behavior as it relates to criminal activity. Topics include theories of crime causation; statistical analysis of criminal behavior; past, present, and future social control initiatives; and other related topics. Upon completion, students should be able to explain and discuss various theories of crime causation and societal response.

CJC 113 Juvenile Justice  
Prerequisites: None  
Corequisites: None

This course covers the juvenile justice system and related juvenile issues. Topics include an overview of the juvenile justice system, treatment and prevention programs, special areas and laws unique to juveniles, and other related topics. Upon completion, students should be able to identify/discuss juvenile court structure/procedures, function and jurisdiction of juvenile agencies, processing/detention of juveniles, and case disposition.
Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

</table>
| CMT 112 Construction Mgt I | Prerequisites: None  
Corequisites: None  
This course introduces students to the field of construction management technology. Topics include job planning, work methods, materials, equipment, and other related topics. Upon completion, students should be able to demonstrate basic knowledge of methods, materials, equipment, and the logical sequence of a construction project. | 4     | 4   | 0        | 6      |
| CMT 120 Codes and Inspections | This course covers building codes and the code inspections process used in the design and construction of residential and commercial buildings. Emphasis is placed on commercial, residential, and accessibility (handicapped) building codes. Upon completion, students should be able to understand the building code inspections process and apply building code principals and requirements to construction projects. | 3     | 0   | 0        | 3      |
| CMT 210 Construction Management Fund | This course introduces the student to the fundamentals of effective supervision emphasizing professionalism through knowledge and applied skills. Topics include safety, planning and scheduling, contract, problem-solving, communications, conflict resolution, recruitment, employment laws and regulations, leadership, motivation, teamwork, discipline, setting objectives, and training. Upon completion, the student should be able to demonstrate the basic skills necessary to be successful as a supervisor in the construction industry. | 3     | 0   | 0        | 3      |
| CMT 212 Total Safety Performance | Prerequisites: None  
Corequisites: CMT 210  
This course covers the importance of managing safety and productivity equally by encouraging people to take individual responsibility for safety and health in the workplace. Topics include safety management, controlling construction hazards, communicating and enforcing policies, OSHA compliance, personal responsibility and accountability, safety planning, training, and personal protective equipment. Upon completion, students should be able to supervise safety at a construction job site and qualify for the OSHA Training Certification. | 3     | 0   | 0        | 3      |
| CMT 214 Planning and Scheduling | Prerequisites: CMT 210 and BPR 130  
Corequisites: None  
This course covers the need for the process of planning construction projects, as well as the mechanics and vocabulary of project scheduling. Topics include project preplanning, | 3     | 0   | 0        | 3      |

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.
scheduling format, planning for production, short interval planning, schedule updating and revising, and computer-based planning and scheduling. Upon completion, the student should be able to understand the need for planning and scheduling, the language and logic of scheduling, and use of planning skills.

CMT 218 Human Relations Issues  
Prerequisites: CMT 210  
Corequisites: None

This course provides instruction on human relations issues as they relate to construction project supervision. Topics include relationships, human behavior, project staffing issues, teamwork, effective communication networks, laws and regulations, and identifying and responding to conflict, crisis, and discipline. Upon completion, the student will demonstrate an understanding of the importance of human relations in the success of a construction project.

COM 110* Intro to Communication  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 090  
  b. Grade of “C” or better in ENG 095  
  c. Grade of “C” or better in DRE 098  
Corequisites: None

This course provides an overview of the basic concepts of communication and the skills necessary to communicate in various contexts. Emphasis is placed on communication theories and techniques used in interpersonal, group, public, intercultural, and mass communication situations. Upon completion, students should be able to explain and illustrate the forms and purposes of human communication in a variety of contexts.

COM 111* Voice and Diction I  
Prerequisites: None  
Corequisites: None

This course provides guided practice in the proper production of speech. Emphasis is placed on improving speech, including breathing, articulation, pronunciation, and other vocal variables. Upon completion, students should be able to demonstrate effective natural speech in various contexts.

COM 120* Introduction to Interpersonal Communication  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 090  
  b. Grade of “C” or better in ENG 095  
  c. Grade of “C” or better in DRE 098  
  d. Required placement test score(s)  
Corequisites: None

This course introduces the practices and principles of interpersonal communication in both dyadic and group settings. Emphasis is placed on the communication process, perception, listening, self-disclosure, speech apprehension, ethics, nonverbal communication, conflict, power, and dysfunctional communication relationships. Upon completion, students should be able to demonstrate interpersonal communication skills, apply basic principles of group discussion, and manage conflict in interpersonal communication situations.

COM 140* Introduction to Intercultural Communication  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 090  
  b. Grade of “C” or better in ENG 095  
  c. Grade of “C” or better in DRE 098  
  d. Required placement test score(s)  
Corequisites: None

This course introduces techniques of cultural research, definitions, functions, characteristics, and impacts of cultural differences in public address. Emphasis is placed on how diverse backgrounds influence the communication act and how cultural perceptions and experiences determine how one sends and receives messages. Upon completion, students should be able to demonstrate an understanding of the principles and skills needed to become effective in communicating outside one’s primary culture.

COM 150* Introduction to Mass Communication  
Prerequisites: ENG 111  
Corequisites: ENG 112 or ENG 113 or ENG 114

This course introduces print and electronic media and the new information technologies in terms of communication theory and as economic, political, and social institutions. Emphasis is on the nature, history, functions, and responsibilities of mass communication industries in a global environment and their role and impact in American society. Upon completions, students should have an awareness of the persuasive nature of the mass media and how the media operate in an advanced post-industrial society.

COM 160* Small Group Communication  
Prerequisites: None  
Corequisites: None

This course provides an overview of the theory, practice, and critical analysis of communication in the small group setting. Emphasis is placed on group development, conflict, and conformity; leadership skills and styles; group roles and ranks; and decision making, problem solving, and conflict resolution. Upon completion, students should be able to apply topics of gender, culture, and social-emotional functions within group settings.

#### Prerequisites and Corequisites

- **COM 231** Public Speaking
  - Corequisites: None
  - Prerequisites: Completion of one of the following:
    - Grade of “C” or better in RED 090
    - Grade of “C” or better in ENG 095
    - Grade of “C” or better in DRE 098
    - Required placement test score(s)

- **COM 232** Election Rhetoric
  - Corequisites: None
  - Prerequisites: Completion of one of the following:
    - Grade of “C” or better in RED 090
    - Grade of “C” or better in ENG 095
    - Grade of “C” or better in DRE 098
    - Required placement test score(s)

- **COM 233** Persuasive Speaking
  - Corequisites: None
  - Prerequisites: ENG 112 or ENG 113

- **COM 250** Public Communication
  - Corequisites: None
  - Prerequisites: ENG 113 or ENG 114 and COM 120 or COM 231

- **COM 251** Debate I
  - Corequisites: None
  - Prerequisites: None
  - This course introduces the principles of debate. Emphasis is placed on argument, refutation, research, and logic. Upon completion, students should be able to use research skills and logic in the presentation of ideas within the context of formal debate.

- **COM 252** Debate II
  - Corequisites: None
  - Prerequisites: COM 251
  - This course continues the study of debate begun in COM 251. Emphasis is placed on argument, refutation, research, and logic. Upon completion, students should be able to demonstrate proficiency in research skills, logic, and presentation of ideas within the context of formal debate.

- **COS 111** Cosmetology Concepts I
  - Corequisites: COS 112
  - Prerequisites: Completion of one of the following:
    - Grade of “C” or better in RED 080
    - Grade of “C” or better in ENG 085
    - Grade of “C” or better in DRE 097
    - Required placement test score(s)

- **COS 112** Salon I
  - Corequisites: COS 111
  - Prerequisites: None
  - This course introduces basic salon services. Topics include scalp treatments, shampooing, rinsing, hair color, design, haircutting, permanent waving, pressing, relaxing, wigs, and other related topics. Upon completion, students should be able to safely and competently apply cosmetology concepts in the salon setting.

- **COS 113** Cosmetology Concepts II
  - Corequisites: COS 114
  - Prerequisites: COS 111 and COS 112
  - This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, chemistry, manicuring, chemical restructuring, and hair coloring. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting.
This course provides experience in a simulated salon setting. Topics include basic skin care, manicuring, nail application, scalp treatments, shampooing, rinsing, hair color, design, haircutting, chemical restructuring, pressing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services.

This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, salon management, salesmanship, skin care, electricity/light therapy, wigs, thermal hair styling, lash and brow tinting, superfluous hair removal, and other related topics. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting.

This course provides comprehensive experience in a simulated salon setting. Emphasis is placed on intermediate-level of skin care, manicuring, scalp treatments, shampooing, hair color, design, haircutting, chemical restructuring, pressing, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services.

This course covers advanced cosmetology concepts. Topics include chemistry and hair structure, advanced cutting and design, and an overview of all cosmetology concepts in preparation for the licensing examination. Upon completion, students should be able to demonstrate an understanding of these cosmetology concepts and meet program completion requirements.

This course provides advanced experience in a simulated salon setting. Emphasis is placed on efficient and competent delivery of all salon services in preparation for the licensing examination and employment. Upon completion, students should be able to demonstrate competence in program requirements and the areas covered on the Cosmetology Licensing Examination and meet entry-level employment requirements.

This course covers the concepts of esthetics. Topics include orientation, anatomy, physiology, hygiene, sterilization, first aid, chemistry, basic dermatology, and professional ethics. Upon completion, students should be able to demonstrate an understanding of the concepts of esthetics and meet course requirements.

This course covers the techniques of esthetics in a comprehensive experience in a simulated salon setting. Topics include client consultation, facials, body treatments, hair removal, make-up applications, and color analysis. Upon completion, students should be able to safely and competently demonstrate esthetic services on clients in a salon setting.

This course covers techniques of nail technology, hand and arm massage, and recognition of nail diseases and disorders. Topics include OSHA/safety, sanitation, bacteriology, product knowledge, salesmanship, manicures, artificial applications, pedicures, massage, and other related topics. Upon completion, students should be able to safely and competently perform nail care, including manicures, pedicures, massage, decorating, and artificial applications in a salon setting.

This course covers more comprehensive esthetics concepts. Topics include nutrition, business management, makeup, and color analysis. Upon completion students should be able to demonstrate an understanding of the advanced esthetics concepts and meet course requirements.

This course provides experience in a simulated esthetics setting. Topics include machine facials, aromatherapy, massage therapy, electricity, and apparatus. Upon completion, students should be able to demonstrate competence in program requirements and the areas covered on the Cosmetology Licensing Examination for Estheticians.
COS 223 Contemp Hair Coloring
Prerequisites: COS 111 and COS 112
Corequisites: None

This course covers basic color concepts, hair coloring problems, and application techniques. Topics include color theory, terminology, contemporary techniques, product knowledge, and other related topics. Upon completion, students should be able to identify a client’s color needs and safely and competently perform color applications and correct problems.

COS 224 Trichology & Chemistry
Prerequisites: None
Corequisites: None

This course is a study of hair and the interaction of applied chemicals. Emphasis is placed on pH actions and the reactions and effects of chemical ingredients. Upon completion, students should be able to demonstrate an understanding of chemical terminology, pH testing, and chemical reactions on hair.

COS 240 Contemporary Design
Prerequisites: COS 111 and COS 112
Corequisites: None

This course covers methods and techniques for contemporary designs. Emphasis is placed on contemporary designs and other related topics. Upon completion, students should be able to demonstrate and apply techniques associated with contemporary design.

COS 253 Esthetics Ins. Concepts I
Prerequisites: Valid NC Cosmetology or Esthetician License
Corequisites: None

This course introduces esthetic instructional concepts and skills. Topics include orientation, theories of education, unit planning, daily lesson plans, laboratory management, student assessment, record keeping, and other related topics. Upon completion, students should be able to demonstrate esthetic services and instruct and objectively assess student performance in a classroom setting.

COS 254 Esthetic Ins. Concepts II
Prerequisites: COS 253
Corequisites: None

This course covers advanced esthetic instructional concepts and skills. Topics include practical demonstrations, lesson planning, lecture techniques, development and administration of assessment tools, record keeping and other related topics. Upon completion, students should be able to demonstrate competencies in the areas covered by the Esthetics Instructor Licensing Examination and meet program requirements.

COS 260 Design Applications
Prerequisites: None
Corequisites: None

This course provides an overview of the design concepts used in cosmetology. Topics include the application of art principles and elements to artistically design hair, nails, and make-up and other related topics. Upon completion, students should be able to demonstrate knowledge and techniques associated with design concepts.

COS 271 Instructor Concepts I
Prerequisites: Valid NC Cosmetology License
Corequisites: COS 272

This course introduces the basic cosmetology instructional concepts. Topics include orientation, theories of education, unit planning, daily lesson planning, laboratory management, student assessment, record keeping, and other related topics. Upon completion, students should be able to identify theories of education, develop lesson plans, demonstrate supervisory techniques, and assess student performance in a classroom setting.

COS 272 Instructor Practicum I
Prerequisites: None
Corequisites: COS 271

This course covers supervisory and instructional skills for teaching entry-level cosmetology students in a laboratory setting. Topics include demonstrations of services, supervision, and entry-level student assessment. Upon completion, students should be able to demonstrate salon services and instruct and objectively assess the entry-level student.

COS 273 Instructor Concepts II
Prerequisites: COS 271 and COS 272
Corequisites: COS 274

This course covers advanced cosmetology instructional concepts. Topics include practical demonstrations, lesson planning, lecture techniques, development and administration of assessment tools, record keeping, and other related topics. Upon completion, students should be able to develop lesson plans, demonstrate supervision techniques, assess student performance in a classroom setting, and keep accurate records.

COS 274 Instructor Practicum II
Prerequisites: COS 271 and COS 272
Corequisites: COS 273

This course is designed to develop supervisory and instructional skills for teaching advanced cosmetology students in a laboratory setting. Topics include practical demonstrations, supervision, and advanced student assessment. Upon completion, students should be able to demonstrate competence in the areas covered by the Instructor Licensing Examination and meet program completion requirements.
This course introduces computer programming using the C programming language with structured programming principles. Topics include input/output operations, iteration, arithmetic operations, arrays, pointers, filters, and other related topics. Upon completion, students should be able to design, code, test and debug at a beginning level.

**CSC 139* Visual BASIC Programming**

Corequisites: None

This course introduces concepts and techniques for the design and interaction of the mechanical systems of high performance buildings. Topics include building envelope, heating, ventilation and air conditioning (HVAC), indoor air quality, lighting, plumbing and electrical. Upon completion, students should be able to understand building systems interaction and performance.
Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

This course covers the procedures involved in planning and estimating a construction/building project. Topics include performing quantity take-offs of materials necessary for a building project. Upon completion, students should be able to accurately complete a take-off of materials and equipment needs involved in a construction project.

This course introduces the basic principles of chemistry with emphasis on applications to chemical technology. Topics include measurement, elements, compounds, moles, solutions, reactions, gases, molecular structure, electron configurations, nomenclature, periodic trends, stoichiometry, and basic laboratory tools, techniques, and safety. Upon completion, students should be able to demonstrate an understanding of basic chemical calculations and routine laboratory procedures.

This course covers the nomenclature and properties of organic functional groups with a focus on applications to chemical technology. Emphasis is placed on properties of aliphatic and aromatic hydrocarbons, including alkanes, cycloalkanes, alkenes, alkynes, alcohols and ethers. Upon completion, students should be able to name, identify, and predict reactions for organic molecules.

This course introduces intermediate nomenclature and properties of organic functional groups with emphasis on applications to chemical technology. Topics include the preparation, reactions, and analysis of alcohols, amines, ethers, epoxides, and carbonyl compounds. Upon completion, students should be able to predict products from intermediate reactions and determine structures of organic compounds by utilizing IR, UV, and RI.

This course introduces chemistry at the biological level. Topics include nitrogen compounds, polymers, stereochemistry, carbohydrates, lipids, amino acids, proteins, nucleic acids, protein and nucleic purification, electrophoresis, PCR, and enzymes. Upon completion, students should be able to recognize biologically active compounds, describe their structure and activity, and predict organic products of biological reactions.

This course covers appropriate use of equipment and instruments in pharmaceutical and industrial settings as well as qualitative chemical analysis of selected inorganic ions. Emphasis is placed on sample preparation, statistical parameters, titrations, potentiometric methods and various forms of spectroscopy, including UV, AA, AE, IR, NMR, and mass spectroscopy. Upon completion, students should be able to carry out all analytical schemes presented.

This course covers the use of various instruments and analytical methods in pharmaceutical, academic, or industrial settings. Emphasis is placed on various forms of chromatography, including GC, HPLC, IC, TLC, and size exclusion, as well as chemiluminescence and radioactive labels. Upon completion, students should be able to carry out all analytical schemes presented and be able to utilize all applicable instruments.
This course covers the introduction of the tools and resources available to students in programming, mark-up language and services on the Internet. Topics include standard mark-up language Internet services, creating web pages, using search engines, file transfer programs; and database design and creation with DBMS products. Upon completion students should be able to demonstrate knowledge of programming tools, deploy a web-site with mark-up tools, and create a simple database table.

This course introduces students to the Network concepts, including networking terminology and protocols, local and wide area networks, and network standards. Emphasis is placed on securing information systems and the various implementation policies. Upon completion, students should be able to perform basic tasks related to networking mathematics, terminology, media and protocols.

This course provides the skills to implement environmentally sound techniques such as disposal, conservation of power, and reduction of an organization’s carbon footprint. Topics include identifying Green organizations and standards, implementing virtualization on IT systems, and calculating the ROI involved in implementing green initiatives. Upon completion, students should be able to develop an environmental policy for a computer network infrastructure.

This course introduces cloud computing and storage concepts. Emphasis is placed on cloud terminology, virtualization, storage networking and access control. Upon completion, students should be able to perform tasks related to installation, configuration and management of cloud storage systems.

This course covers datacenter virtualization concepts. Topics include data storage, virtual network configuration, virtual machine and virtual application deployment. Upon completion, students should be able to perform tasks related to virtual machine and hypervisor installation and configuration.

This course covers administration of datacenter virtualization infrastructure. Topics include access control, fault tolerance, scalability, resource management, virtual machine migration and troubleshooting. Upon completion, students should be able to perform tasks related to virtualization security, data protection and resource monitoring.

The course introduces the role of IT in managing business processes and the need for business process and IT alignment. Emphasis is placed on industry need for understanding business challenges and developing/managing information systems to contribute to the decision making process based on these challenges. Upon completion, students should be able to demonstrate knowledge of the ‘hybrid business manager’ and the potential offered by new technology and systems.

This course covers the basic hardware of a personal computer, including installation, operations and interactions with software. Topics include component identification, memory-system, peripheral installation and configuration, preventive maintenance, hardware diagnostics/repair, installation and optimization of system software, commercial programs, system configuration, and device-drivers. Upon completion, students should be able to select appropriate computer equipment and software, upgrade/maintain existing equipment and software, and troubleshoot/repair non-functioning personal computers.

This course introduces basic spreadsheet design and development. Topics include writing formulas, using functions, enhancing spreadsheets, creating charts, and printing. Upon completion, students should be able to design and print basic spreadsheets and charts.

This course provides advanced knowledge and competencies in hardware and operating system technologies for computer technicians to support personal computers. Emphasis is placed on: configuring and upgrading; diagnosis and troubleshooting; as well as preventive maintenance of hardware and system software. Upon completion, students should be able to install,
CUL 110A Sanitation & Safety Lab  0 2 0 1
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites:  CUL 110

This course provides a laboratory experience for enhancing student skills in the basic principles of sanitation and safety. Emphasis is placed on personal hygiene, sanitation and safety regulations, use and care of equipment, the principles of food-borne illness, and other related topics. Upon completion, students should be able to demonstrate practical applications of sanitation and safety procedures in the hospitality industry.

CUL 120 Purchasing  2 0 0 2
Prerequisites:  None
Corequisites:  CUL 120A

This course covers purchasing for foodservice operations. Emphasis is placed on yield tests, procurement, negotiating, inventory control, product specification, purchasing ethics, vendor relationships, food product specifications and software applications. Upon completion, students should be able to apply effective purchasing techniques based on the end-use of the product.

CUL 120A Purchasing Lab  0 2 0 1
Prerequisites:  None
Corequisites:  CUL 120

This course provides a laboratory experience for enhancing student skills in purchasing for foodservice operations. Emphasis is placed on practical experiences in yield tests, procurement, negotiating, inventory control, product specification, purchasing ethics, vendor relationships, food product specifications and software applications. Upon completion, students should be able to demonstrate practical applications of purchasing within the hospitality industry.

CUL 125 Hospitality Info Systems  1 2 0 2
Prerequisites:  None
Corequisites:  None

This course introduces hospitality and food service information systems. Topics include planning, cost controls, forecasting, inventory control, recipe control, production control, and nutritional analysis. Upon completion, students should be able to demonstrate competence in utilizing contemporary information application systems in a hospitality setting.

CUL 130 Menu Design  2 0 0 2
Prerequisites:  None
Corequisites:  None

This course introduces menu design and its relationship to foodservice operations. Topics include layout, marketing,
concept development, dietary concerns, product utilization, target consumers and trends. Upon completion, students should be able to design, create and produce menus for a variety of foodservice settings.

CUL 135 Food & Beverage Service 2 0 0 2
Prerequisites: None
Corequisites: CUL 135A

This course is designed to cover the practical skills and knowledge necessary for effective food and beverage service in a variety of settings. Topics include greeting/service of guests, dining room set-up, profitability, menu sales and merchandising, service styles and reservations. Upon completion, students should be able to demonstrate competence in human relations and the skills required in the service of foods and beverages.

CUL 135A Food & Bev Serv Lab 0 2 0 1
Prerequisites: None
Corequisites: CUL 135

This course provides a laboratory experience for enhancing student skills in effective food and beverage service. Emphasis is placed on practical experiences including greeting/service of guests, dining room set-up, profitability, menu sales and merchandising, service styles and reservations. Upon completion, students should be able to demonstrate practical applications of human relations and the skills required in the service of foods and beverages.

CUL 140 Culinary Skills I 2 6 0 5
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: CUL 110 and CUL 110A

This course introduces the fundamental concepts, skills and techniques in basic cookery, and moist, dry and combination heat. Emphasis is placed on recipe conversion, measurements, terminology, classical knife cuts, safe food/equipment handling, flavorings/seasonings, stocks/sauces/soups, and related topics. Upon completion, students should be able to exhibit the basic cooking skills used in the foodservice industry.

CUL 142 Fundamentals of Food 2 6 0 5
Prerequisites: None
Corequisites: CUL 110

This course introduces the student to the basic principles of cooking, baking and kitchen operations. Topics include preparation methods for protein, starch, vegetable/fruit identification/selection, storage; breakfast cookery, breads, sweet dough/pastry, basic fabrication, knife skills, and mise en place. Upon completion, students should be able to execute efficiently a broad range of basic cooking/baking skills as they apply to different stations in foodservice operations.

CUL 150 Food Science 1 2 0 2
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: CUL 110 and CUL 110A

This course covers the chemical and physical changes in foods that occur with cooking, handling, and processing. Emphasis is placed on practical application of heat transfer and its effect on color/flavor/texture, emulsification, protein coagulation, leavening agents, viscosity, and gel formation. Upon completion, students should be able to demonstrate an understanding of these principles as they apply to food preparation in an experimental setting.

CUL 160 Baking I 1 4 0 3
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: CUL 110 and CUL 110A

This course covers basic ingredients, techniques, weights and measures, baking terminology and formula calculations. Topics include yeast/chemically leavened products, laminated doughs, pastry dough batter, pies/tarts, merinque, custard, cakes and cookies, icings, glazes and basic sauces. Upon completion, students should be able to demonstrate proper scaling and measurement techniques, and prepare and evaluate a variety of bakery products.

CUL 170 Garde-Manger I 1 4 0 3
Prerequisites: CUL 140
Corequisites: CUL 110 and CUL 110A

This course introduces basic cold food preparation techniques and pantry production. Topics include salads, sandwiches, appetizers, dressings, basic garnishes, cheeses, cold sauces, and related food items. Upon completion, students should be able to present a cold food display and exhibit an understanding of the cold kitchen and its related terminology.

CUL 210 Food Service for Spec Pop 1 8 0 5
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: CUL 110 and CUL 110A

This course covers nutrition and menu planning principles, food preparation, and food management skills needed to provide meals to special populations. Topics include food preparation for child care, geriatric, and school settings. Upon completion, students should be able to plan, organize, and
prepare appealing and nutritious meals for special populations within appropriate guidelines.

Prerequisites: CUL 110, CUL 140 and CUL 240
Corequisites: None

This course covers the sequential steps to successful catering that include sales, client needs, menu planning, purchasing, costing, event pricing, staffing and sanitation concerns. Emphasis is placed on new culinary competencies and skills specific to catering preparation, presentation, and customer service. Upon completion, students should be able to demonstrate proficiency in the successful design and execution of various types of catering events. 
This course includes confections and candy, chocolate techniques, transfer sheets, pulled and blown sugar, pastillage, marzipan and custom silicon molding. Emphasis is placed on showpieces, pre-set molding, stencil cutouts, pattern tracing and/or free-hand shaping. Upon completion, students should be able to design and produce centerpieces and showpieces.

This course introduces students to the cooperation between sustainable farmers and foodservice operations. Emphasis is placed on environmental relationships, including how foods are grown, processed, and distributed, as well as related implications on quality and sustainability. Upon completion, students should be able to demonstrate an understanding of environmental stewardship and its impact on cuisine.

This course provides practical experience in the planning, techniques, and procedures required for culinary competitions and exhibitions. Emphasis is placed on competition strategies including menu planning, teamwork, plate design, flavor profiles, recipe development, nutrition, advanced knife/culinary skills, professionalism, and portfolio development. Upon completion, students should be able to apply competition/exhibition skills and standards in the competition arena and professional kitchen.

This course provides active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations.

This course provides continued participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations.

This course covers cardiac anatomy and introduces cardiac scanning techniques. Topics include normal cardiac anatomy, Doppler physics, and 2-D and M-mode imaging. Upon completion, students should be able to perform 2-D and M-mode studies.

This course is a continuation of CVS 163 with continued study of 2-D and M-mode imaging. Emphasis is placed on continuous wave, pulsed wave, color, and power Doppler imaging of normal and abnormal cardiac conditions. Upon completion, students should be able to perform and recognize normal and abnormal cardiac studies.

This course provides an introduction to the field of cardiovascular sonography. Topics include applications, sonographic terminology, basic anatomy of the heart and vascular system, and basic scanning skills. Upon completion, students should be able to recognize anatomy of the heart and vascular system and be able to perform preliminary scanning techniques.

This course provides an overview of cardiovascular topics in preparation for certification examinations. Emphasis is placed on registry preparation. Upon completion, students should be able to sit for the registry examinations.

This course introduces database design and creation using a DBMS product. Emphasis is placed on data dictionaries,
normalization, data integrity, data modeling, and creation of simple tables, queries, reports, and forms. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports, and forms.

Prerequisites: None
Corequisites: None

This course is an overview of the digital effects and animation technology field from the most simple processes to the most complex. Topics covered include digitizing existing images, creating digital images, manipulation of images and various forms of computer animation. Upon completion, students should be able to demonstrate a vocabulary of the digital effects and animation field and knowledge of outstanding examples of work in the field.

**DEN 101 Preclinical Procedures**

Prerequisites: Enrollment in the Dental Assisting Program
Corequisites: DEN 111

This course provides instruction in procedures for the clinical dental assistant as specified by the North Carolina Dental Practice Act. Emphasis is placed on orientation to the profession, infection control techniques, instruments, related expanded functions, and diagnostic, operative, and specialty procedures. Upon completion, students should be able to demonstrate proficiency in clinical dental assisting procedures.

COURSE DESCRIPTIONS

DEN 125 Dental Office Emergencies 0 2 0 1  
Prerequisites: Enrollment in the Dental Hygiene program
Corequisites: None

This course provides a study of the management of dental office emergencies. Topics include methods of prevention, necessary equipment/drugs, medicolegal considerations, recognition and effective initial management of a variety of emergencies. Upon completion, the student should be able to recognize, assess, and manage various dental office emergencies and activate advanced medical support when indicated.

DEN 130 Dental Hygiene Theory I 2 0 0 2  
Prerequisites: DEN 120
Corequisites: DEN 131

This course is a continuation of the didactic dental hygiene concepts necessary for providing an oral prophylaxis. Topics include deposits/removal, instrument sharpening, patient education, fluorides, planning for dental hygiene treatment, charting, and clinical records and procedures. Upon completion, students should be able to demonstrate knowledge needed to complete a thorough oral prophylaxis.

DEN 131 Dental Hygiene Clinic I 0 0 9 3  
Prerequisites: DEN 121
Corequisites: DEN 130

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of the recall patients with gingivitis or light deposits. Upon completion, students should be able to assess these patients’ needs and complete the necessary dental hygiene treatment.

DEN 140 Dental Hygiene Theory II 1 0 0 1  
Prerequisites: DEN 130
Corequisites: DEN 141

This course provides a continuation of the development, theory, and practice of patient care. Topics include modification of treatment for special needs patients, and advanced radiographic interpretation. Upon completion, students should be able to differentiate necessary treatment modifications, and radiographic abnormalities.

DEN 141 Dental Hygiene Clinic II 0 0 6 2  
Prerequisites: DEN 131
Corequisites: DEN 140

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of patients with early periodontal disease and subgingival deposits. Upon completion, students should be able to assess these patients’ needs and complete the necessary dental hygiene treatment.

DEN 220 Dental Hygiene Theory III 2 0 0 2  
Prerequisites: DEN 140
Corequisites: DEN 221

This course provides a continuation in developing the theories and practices of patient care. Topics include periodontal debridement, pain control, subgingival irrigation, air polishing, and case presentations. Upon completion, students should be able to demonstrate knowledge of methods of treatment and management of periodontally compromised patients.

DEN 221 Dental Hygiene Clinic III 0 0 12 4  
Prerequisites: DEN 141
Corequisites: DEN 220

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of patients with moderate to advanced periodontal involvement and moderate deposits. Upon completion, students should be able to assess these patients’ needs and complete the necessary dental hygiene treatment.

DEN 222 General & Oral Pathology 2 0 0 2  
Prerequisites: BIO 163 or BIO 165 or BIO 168 and DEN 110
Corequisites: None

This course provides a general knowledge of oral pathological manifestations associated with selected systemic and oral diseases. Topics include developmental and degenerative diseases, selected microbial diseases, specific and nonspecific immune and inflammatory responses with emphasis on recognizing abnormalities. Upon completion, students should be able to differentiate between normal and abnormal tissues and refer unusual findings to the dentist for diagnosis.

DEN 223 Dental Pharmacology 2 0 0 2  
Prerequisites: Enrollment in the Dental Hygiene program
Corequisites: BIO 163 or BIO 165 or BIO 168

This course provides basic drug terminology, general principles of drug actions, dosages, routes of administration, adverse reactions, and basic principles of anesthesiology. Emphasis is placed on knowledge of drugs in overall understanding of patient histories and health status. Upon completion, students should be able to recognize that each patient’s general health or drug usage may require modification of the treatment procedures.

DEN 224 Materials and Procedures 1 3 0 2  
Prerequisites: DEN 111
Corequisites: None

This course introduces the physical properties of materials and related procedures used in dentistry. Topics include restorative and preventive materials, fabrication of casts and appliances, and chair side functions of the dental hygienist. Upon completion, students should be able to demonstrate proficiency in the laboratory and/or clinical application of routinely used dental materials and chair side functions.
### DES 110 Architectural Graphics

**Prerequisites:** DES 125, DES 135 and DES 225

This course introduces basic drafting skills and techniques. Emphasis is placed on the use of drafting equipment, lettering, dimensioning, elevations, sections, construction details, and actual fixture sizes as related to interior design situations. Upon completion, students should be able to complete working drawings skillfully utilizing principles of drafting.

### DES 111 Creative Problem Solving

**Prerequisites:** DES 110, DES 125, and DES 135

This course is designed to improve conceptual abilities as applied to problems involved with creating practical furniture designs. Emphasis is placed on the awareness of creative thinking techniques that are involved with producing a workable design in an innovative fashion. Upon completion, students should be able to apply creative thinking techniques to find innovative solutions to furniture problems.

### DES 115 Color Theory

**Prerequisites:** DES 110, DES 125, DES 135, and DES 225

This course introduces the element of color as a major design factor. Emphasis is placed on the physical, psychological, and other implications of color in design. Upon completion, students should be able to demonstrate knowledge of color and its effects on the human environment.

### DES 120 CAD for Interior Design

**Prerequisites:** DES 110

This course introduces basic computer-aided design and drafting skills and techniques within interior design applications. Emphasis is placed on the most common computer commands used in architectural drafting and design to draw, edit, manipulate layers, and create reusable drawings. Upon completion, students should be able to use specific computer applications to complete drawings and plot/print.

### DES 121 CAD for Int Des/Advanced

**Prerequisites:** DES 120

This course provides advanced techniques in drafting on the computer and the applications of computer-aided design for various projects. Emphasis is placed on specific exercises that integrate and reinforce the presentation topics into a scaled drawing. Upon completion, students should be able to draw, transfer, and plot assigned floorplans in an efficient and accurate manner using the computer equipment and software provided.

### DES 125 Graphic Presentation I

**Prerequisites:** DES 110, DES 135 and DES 225

This course introduces graphic presentation techniques for communicating ideas. Topics include drawing, perspective drawing, and wet and dry media. Upon completion, students should be able to produce a pictorial presentation.
COURSE DESCRIPTIONS

DES 126 Graphic Presentation II  
Prerequisites:  DES 125  
Corequisites:  None  
This course provides a more in-depth study of graphic techniques. Topics include extensive wet and dry media experience and advanced measured perspective techniques. Upon completion, students should be able to illustrate interiors and other elements.

DES 135 Principles and Elements of Design I  
Prerequisites:  None  
Corequisites:  DES 110, DES 125 and DES 225  
This course introduces the basic concepts and terminology of design as they relate to the design profession. Topics include line, pattern, space, mass, shape, texture, color, unity, variety, rhythm, emphasis, balance, proportion, scale, and function. Upon completion, students should be able to demonstrate an understanding of the principles covered through hands-on application.

DES 136 Prin & Elem of Design II  
Prerequisites:  DES 135  
Corequisites:  None  
This course provides continued study of design principles introduced in DES 135. Emphasis is placed on studying composition, color, furnishings, collages, and illustration. Emphasis is placed on spatial relationships, craftsmanship, and visual presentation techniques. Upon completion, students should be able to originate a color program for interiors.

DES 210 Bus Prac/Interior Design  
Prerequisites:  Completion of one of the following:  
   a. Grade of “C” or better in RED 090  
   b. Grade of “C” or better in ENG 095  
   c. Grade of “C” or better in DRE 098  
   d. Required placement test score(s)  
Corequisites:  None  
This course introduces contemporary business practices for interior design. Topics include employment skills, business formations, professional associations, preparation of professional contracts and correspondence, and means of compensation. Upon completion, students should be able to describe the basic business formations and professional associations and compose effective letters and contracts.

DES 220 Principles of Interior Design  
Prerequisites:  1. (ARC 111 and DES 135) or DES 110 or DFT 115 and (DES 125 and DES 135 and DES 225)  
2. Completion of one of the following:  
   a. Grade of “C” or better in RED 090  
   b. Grade of “C” or better in ENG 095  
   c. Grade of “C” or better in DRE 098  
   d. Required placement test score(s)  
Corequisites:  None  
This course covers the basic principles of design as they relate specifically to interior design, furniture arrangement, wall composition, color, furnishings, collages, and illustration. Emphasis is placed on spatial relationships, craftsmanship, and visual presentation techniques. Upon completion, students should be able to arrange furnishings in rooms for various purposes, select furnishings and colors, and illustrate ideas graphically.

DES 225 Textiles/Fabrics  
Prerequisites:  None  
Corequisites:  DES 110, DES 125, and DES 135  
This course includes the study of woven and non-woven fabrics for interiors. Topics include characteristics of fibers, yarns, weaving, felting, and knitting; processing of leather; and adornning and finishing of interior fabrics. Upon completion, students should be able to recognize and use correct terminology for upholstery, window treatments, and rugs/carpets with regard to flammability, performance, and durability.

DES 230 Residential Design I  
Prerequisites:  DES 125, DES 136, DES 220  
Corequisites:  None  
This course includes principles of interior design for various residential design solutions. Emphasis is placed on visual presentation and selection of appropriate styles to meet specifications. Upon completion, students should be able to complete scaled floor plans, elevations, specifications, color schemes and fabrics, and finishes and furniture selection.

DES 231 Residential Design II  
Prerequisites:  DES 230  
Corequisites:  None  
This course provides advanced projects with a client profile that utilizes the skills developed in DES 230. Emphasis is placed on a total concept and the presentation of appropriate and creative design solutions. Upon completion, students should be able to complete a detailed floor plan, space planning, furniture plan, specifications, program schedules, finishes, and detailed window treatments.
**DES 235 Products**  
Prerequisites: DES 110, DES 135  
Corequisites: None  

This course provides an overview of interior finishing materials and the selection of quality upholstery and case goods. Topics include hard and resilient floor coverings; wall coverings and finishes; ceilings, moldings, and furniture construction techniques; and other interior components. Upon completion, students should be able to recognize and use correct terminology, select appropriate materials for interior surfaces, and choose furniture based on sound construction.

**DES 240 Commercial/Contract Design I**  
Prerequisites: DES 220  
Corequisites: None  

This course introduces commercial/contract design including retail, office, institutional, restaurant, and hospitality design. Emphasis is placed on ADA requirements, building codes and standards, space planning, and selection of appropriate materials for non-residential interiors. Upon completion, students should be able to analyze and design introductory non-residential projects using graphic presentation concepts.

**DES 241 Commercial/Contract Design II**  
Prerequisites: DES 240  
Corequisites: None  

This course provides an in-depth study of non-residential design exploring more comprehensive design solutions such as health care facilities, furniture gallery design, and large office complexes. Emphasis is placed on design of commercial interiors and suitability of materials to meet ADA requirements, codes, and standards. Upon completion, students should be able to design non-residential spaces meeting ADA requirements and select furniture, materials, fabrics, and accessories meeting codes and flammability standards.

**DES 255 History/Int & Furn I**  
Prerequisites: None  
Corequisites: None  

This course covers interiors, exteriors, and furnishings from ancient Egypt through French Neo-Classicism. Emphasis is placed on vocabulary, chronology, and style recognition. Upon completion, students should be able to classify and date interior and exterior architecture and furnishings and be conversant with pertinent vocabulary.

**DES 256 History/Int and Furn II**  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 090  
b. Grade of “C” or better in ENG 095  
c. Grade of “C” or better in DRE 098  
d. Required placement test score(s)  
Corequisites: None  

This course covers English, American, and various styles of nineteenth- and twentieth-century furniture, interiors, and exteriors. Emphasis is placed on style recognition, vocabulary, and chronology. Upon completion, students should be able to recognize and describe major styles of furniture, interiors, and exteriors.

**DES 260 Materials Calc/Int Design**  
Prerequisites: DES 225 and DES 235  
Corequisites: None  

This course includes the study of calculations for square footage, square yardage, and cut-length yardage. Emphasis is placed on the development of workable formulas, worksheets, and order forms that can be used in an interior design business. Upon completion, students should be able to produce electronic worksheets and order forms for calculating window treatments, wall coverings, and floor coverings for a given space.

**DES 265 Lighting/Interior Design**  
Prerequisites: None  
Corequisites: None  

This course introduces theory and contemporary concepts in lighting. Topics include light levels, light quality, lamps and fixtures, and their use in interior design. Upon completion, students should be able to determine light levels and requirements based on national standards and select luminaries for specific light qualities.

**DES 285 Capstone/Interior Design**  
Prerequisites: DES 210, DES 230, and DES 240  
Corequisites: None  

This course provides additional studio time to investigate areas of special interest, upgrade weaknesses, and/or capitalize on strengths. Topics include a broad range of options, both residential and non-residential, combining individual research and instructional guidance. Upon completion, students should be able to complete the graphics, client folder, and all schedules for a professional project.

**DFT 100 Marine Drafting**  
Prerequisites: None  
Corequisites: BTB 101  

This course introduces blueprint reading, sketching, marine drafting equipment, and the lines plan. Topics include utilization of mechanical drafting tools, blueprint lines, pictorial sketching, blueprint reading, and manually drawing plans for boats from...
This course introduces basic drafting skills, equipment, and applications. Topics include sketching, measurements, lettering, dimensioning, geometric construction, orthographic projections and pictorial drawings, sections, and auxiliary views. Upon completion, students should be able to understand and apply basic drawing principles and practices.

DFT 112 Technical Drafting II
Prerequisites: DFT 111, DFT 151
Corequisites: DFT 112A

This course provides for advanced drafting practices and procedures. Topics include detailed working drawings, hardware, fits and tolerances, assembly and sub-assembly, geometric dimensioning and tolerancing, intersections, and developments. Upon completion, students should be able to produce detailed working drawings.

DFT 112A Technical Drafting II Lab
Prerequisites: DFT 111, DFT 151
Corequisites: DFT 112

This course provides a laboratory setting to enhance advanced drafting skills. Emphasis is placed on practical experiences that enhance the topics presented in DFT 112. Upon completion, students should be able to apply the laboratory experiences to the concepts presented in DFT 112.

DFT 119 Basic CAD
Prerequisites: MAC 132
Corequisites: None

This course introduces computer-aided drafting software for specific technologies to non-drafting majors. Emphasis is placed on understanding the software command structure and drafting standards for specific technical fields. Upon completion, students should be able to create and plot basic drawings.

DFT 211 Gears, Cams, & Pulleys
Prerequisites: DFT 111 and MAT 121 or , MAT 171
Corequisites: None

This course introduces the principles of motion transfer. Topics include gears, cams, pulleys, and drive components. Upon completion, students should be able to solve problems and produce drawings dealing with ratios.

DFT 221 Electrical Drafting
Prerequisites: DFT 111 and DFT 151
Corequisites: None

This course covers the practices used for making electrical drawings. Emphasis is placed on symbol identification and various types of electrical diagrams. Upon completion, students should be able to properly utilize electrical symbols in the construction of various electrical diagrams.

DFT 231 Jig and Fixture Design
Prerequisites: DFT 254
Corequisites: None

This course introduces the study of jigs and fixtures. Topics include different types, components, and uses of jigs and fixtures. Upon completion, students should be able to analyze, design, and complete a set of working drawings for a jig or fixture.

DFT 254 Intern Solid Model/Render
Prerequisites: DFT 154
Corequisites: None

This course presents a continuation of basic three-dimensional solid modeling and design software. Topics include advanced
study of parametric design, creation, editing, rendering and analysis of solid model assemblies, and multiview drawing generation. Upon completion, students should be able to use parametric design techniques to create and analyze the engineering design properties of a model assembly.

DMA 010 Operations With Integers .75 .50 0 1
Prerequisites: None
Corequisites: None

This course provides a conceptual study of integers and integer operations. Topics include integers, absolute value, exponents, square roots, perimeter and area of basic geometric figures, Pythagorean theorem, and use of the correct order of operations. Upon completion, students should be able to demonstrate an understanding of pertinent concepts and principles and apply this knowledge in the evaluation of expressions.

DMA 020 Fractions and Decimals .75 .50 0 1
Prerequisites: DMA 010
Corequisites: None

This course provides a conceptual study of the relationship between fractions and decimals and covers related problems. Topics include application of operations and solving contextual application problems, including determining the circumference and area of circles with the concept of pi. Upon completion, students should be able to demonstrate an understanding of the connections between fractions and decimals.

DMA 030 Propor/Ratio/Rate/Percent .75 .50 0 1
Prerequisites: DMA 010 and DMA 020
Corequisites: None

This course provides a conceptual study of the problems that are represented by rates, ratios, percent, and proportions. Topics include rates, ratios, percent, proportion, conversion of English and metric units, and applications of the geometry of similar triangles. Upon completion, students should be able to use their understanding to solve conceptual application problems.

DMA 040 Express/Lin Equat/Inequal .75 .50 0 1
Prerequisites: DMA 010 and DMA 020 and DMA 030
Corequisites: None

This course provides a conceptual study of problems involving linear expressions, equations, and inequalities. Emphasis is placed on solving contextual application problems. Upon completion, students should be able to distinguish between simplifying expressions and solving equations and apply this knowledge to problems involving linear expressions, equations, and inequalities.

DMA 050 Graphs/Equations of Lines .75 .50 0 1
Prerequisites: DMA 010 and DMA 020 and DMA 030 and DMA 040
Corequisites: None

This course provides a conceptual study of problems involving graphic and algebraic representations of lines. Topics include slope, equations of lines, interpretation of basic graphs, and linear modeling. Upon completion, students should be able to solve contextual application problems and represent real-world situations as linear equations in two variables.

DMA 060 Polynomials/Quadratic Appl .75 .50 0 1
Prerequisites: DMA 010 and DMA 020 and DMA 030 and DMA 040 and DMA 050
Corequisites: None

This course provides a conceptual study of problems involving graphic and algebraic representations of quadratics. Topics include basic polynomial operations, factoring polynomials, and solving polynomial equations by means of factoring. Upon completion, students should be able to find algebraic solutions to contextual problems with quadratic applications.

DMA 065 Algebra for Precalculus 1.5 1 0 2
Prerequisites: DMA-010 DMA-020 DMA-030 DMA-040 and DMA-050
Corequisites: None

This course provides a study of problems involving algebraic representations of quadratic, rational, and radical equations. Topics include simplifying polynomial, rational, and radical expressions and solving quadratic, rational, and radical equations. Upon completion, students should be able to find algebraic solutions to contextual problems with quadratic and rational applications.

DMA 070 Rational Express/Equation .75 .50 0 1
Prerequisites: DMA 010 and DMA 020 and DMA 030 and DMA 040 and DMA 050 and DMA 060
Corequisites: None

This course provides a conceptual study of problems involving graphic and algebraic representations of rational equations. Topics include simplifying and performing operations with rational expressions and equations, understanding the domain, and determining the reasonableness of an answer. Upon completion, students should be able to find algebraic solutions to contextual problems with rational applications.

DMA 080 Rational Express/Equation .75 .50 0 1
Prerequisites: DMA 010 and DMA 020 and DMA 030 and DMA 040 and DMA 050 and DMA 060 and DMA 070
Corequisites: None

This course provides a conceptual study of the manipulation of radicals and the application of radical equations to real-world
problems. Topics include simplifying and performing operations with radical expressions and rational exponents, solving equations, and determining the reasonableness of an answer. Upon completion, students should be able to find algebraic solutions to contextual problems with radical applications.

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production.
This course provides an applied laboratory study of the processes involved in production of a dramatic television program. Emphasis is placed on the fundamental practices, principles, and techniques associated with producing dramatic television programming. Upon completion, students should be able to participate in an assigned position with a college dramatic television production.

DRA 176 Teleplay Production II

Prerequisites: DRA 175
Corequisites: None

This course provides an applied laboratory study of the processes involved in production of a sit-com television program. Emphasis is placed on the fundamental practices, principles, and techniques associated with producing sit-com television programming. Upon completion, students should be able to participate in an assigned position with a college sit-com television production.

DRA 211* Theatre History I

Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course covers the development of theatre from its origin to the closing of the British theatre in 1642. Topics include the history, aesthetics, and representative dramatic literature of the period. Upon completion, students should be able to trace the evolution of theatre and recognize the styles and types of world drama.

DRA 212* Theatre History II

Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course covers the development of theatre from 1660 through the diverse influences which shaped the theatre of the twentieth century. Topics include the history, aesthetics, and representative dramatic literature of the period. Upon completion, students should be able to trace the evolution of theatre and recognize the styles and types of world drama.

DRA 230* Acting III

Prerequisites: DRA 131
Corequisites: None

This course is designed to include an exploration of acting styles. Emphasis is placed on putting the actor’s skills to work in a major theatrical form-musical, comedy, or drama. Upon completion, students should be able to explore their creativity in an acting ensemble.

DRA 231* Acting IV

Prerequisites: DRA 230
Corequisites: None

This course is designed to include further exploration of acting styles. Emphasis is placed on putting the actor’s skills to work in a major theatrical form-musical, comedy, or drama. Upon completion, students should be able to explore their creativity in an acting ensemble.

DRA 240* Lighting for the Theatre

Prerequisites: None
Corequisites: None

This course is an applied study of theatre lighting and is designed to train theatre technicians. Emphasis is placed on lighting technology including the mechanics of lighting and light control equipment by practical work with lighting equipment. Upon completion, students should be able to demonstrate competence with lighting equipment.

DRA 260* Directing

Prerequisites: DRA 130
Corequisites: DRA 140

This course provides an analysis and application of the techniques of theatrical directing. Topics include script selection, analysis, casting, rehearsal planning, blocking, stage business, tempo, and technical considerations. Upon completion, students should be able to plan, execute, and critically discuss a student-directed production.

DRA 270* Play Production III

Prerequisites: DRA 171
Corequisites: None

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production.

DRA 271* Play Production IV

Prerequisites: DRA 270
Corequisites: None

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental
practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production.

**DRA 275 Teleplay Production III**  
0 9 0 3  
Prerequisites: DRA 176  
Corequisites: None

This course provides an applied laboratory study of the processes involved in production of an action television program. Emphasis is placed on the fundamental practices, principles, and techniques associated with producing action television programming. Upon completion, students should be able to participate in an assigned position with a college action television production.

**DRA 276* Teleplay Production IV**  
0 9 0 3  
Prerequisites: DRA 176  
Corequisites: None

This course provides an applied laboratory study of the processes involved in production of a variety television program. Emphasis is placed on the fundamental practices, principles, and techniques associated with producing variety television programming. Upon completion, students should be able to participate in an assigned position with a college variety television production.

**DRE 096 Integrated Reading and Writing**  
2.5 1 0 3  
Prerequisites: None  
Corequisites: None

This course is designed to develop proficiency in specific integrated and contextualized reading and writing skills and strategies. Topics include reading and writing processes, critical thinking strategies, and recognition and composition of well-developed, coherent, and unified texts; except where noted, these topics are taught at a reinforcement level using texts primarily in a Lexile (TM) range of 1070 to 1220. Upon completion, students should be able to demonstrate and apply those skills toward understanding a variety of complex academic and career texts and composing essays incorporating relevant, valid evidence. Please note: (TM) represents registered trademark.

**DRE 098 Integrated Reading Writing III**  
2.5 1 0 3  
Prerequisites: Completion of one of the following:  
 a. Grade of “C” or better in RED 080 and ENG-080  
 b. Grade of “C” or better in ENG 085  
 c. Grade of “C” or better in DRE 097  
 d. Required placement test score(s)  
Corequisites: None

This course is designed to develop proficiency in integrated and contextualized reading and writing skills and strategies. Topics include reading and writing processes, critical thinking strategies, and recognition and composition of well-developed, coherent, and unified texts; these topics are taught using texts primarily in the Lexile (TM) range of 1185 to 1385. Upon completion, students should be able to apply those skills toward understanding a variety of texts at the career and college ready level and toward composing a documented essay. Note: (TM) represents registered trademark.

**ECO 151* Survey of Economics**  
3 0 0 3  
Prerequisites: Completion of one of the following:  
 a. Grade of “C” or better in DRE 098  
 b. Grade of “C” or better in ENG 095  
 c. Grade of “C” or better in RED 090  
 d. Required placement test score(s)  
Corequisites: None

This course introduces basic concepts of micro- and macroeconomics. Topics include supply and demand, optimizing economic behavior, prices and wages, money, interest rates, banking system, unemployment, inflation, taxes, government spending, and international trade. Upon completion, students should be able to explain alternative solutions for economic problems faced by private and government sectors.

**ECO 251* Prin of Microeconomics**  
3 0 0 3  
Prerequisites: Completion of one of the following:  
 a. Grade of “C” or better in RED 090  
 b. Grade of “C” or better in ENG 095  
 c. Grade of “C” or better in DRE 098  
 d. Required placement test score(s)  
Corequisites: None

This course introduces economic analysis of individual, business, and industry choices in the market economy. Topics include the price mechanism, supply and demand, optimizing economic behavior, costs and revenue, market structures, factor markets, income distribution, market failure, and government
intervention. Upon completion, students should be able to identify and evaluate consumer and business alternatives in order to efficiently achieve economic objectives. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

**EDU 114 Intro to Family Childcare**  
Prerequisites: Grade of “C” or better in ENG 085 or grade of “C” or better in ENG 080 and RED 080 or minimum Accuplacer scores of 57 on Reading and 66 on Writing

This course introduces the student to family child care home environments with emphasis on standards and developmentally effective approaches for supporting diverse children and families. Topics include standards for quality, curriculum for multiple age groups, authentic assessment methods, business practices, building positive family and community partnerships, and professionalism. Upon completion, students should be able to design a family child care handbook that reflects a healthy, respectful, supportive, and stimulating learning environment.

**EDU 119 Intro to Early Child Educ**  
Prerequisites: None

This course covers the foundations of the education profession, the diverse educational settings for young children, professionalism and planning developmentally appropriate programs for all children. Topics include historical foundations, program types, career options, professionalism and creating inclusive environments and curriculum responsive to the needs of all children and families. Upon completion, students should be able to design career plans and develop schedules, environments and activity plans appropriate for all children.

**EDU 131 Child, Family, & Commun**  
Prerequisites: EDU 119

This course covers the development of partnerships between culturally and linguistically diverse families, children, schools and communities. Emphasis is placed on developing skills and identifying benefits for establishing, supporting, and maintaining respectful, collaborative relationships between diverse families, programs/schools, and community agencies/resources. Upon completion, students should be able to explain appropriate relationships between families, educators, and professionals that enhance development and educational experiences of all children.

**EDU 144 Child Development I**  
Prerequisites: PSY 150, EDU 119

This course includes the theories of child development, needs, milestones, and factors that influence development, from conception through approximately 36 months. Emphasis is placed on developmental sequences in physical/motor, emotional/social, cognitive, and language domains and the impact of multiple influences on development and learning. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain environmental factors that impact development, and identify strategies for enhancing development.

**EDU 145 Child Development II**  
Prerequisites: PSY 150, EDU 119

This course includes the theories of child development, needs, milestones, and factors that influence development, from preschool through middle childhood. Emphasis is placed on developmental sequences in physical/motor, emotional/social, cognitive, and language domains and the impact of multiple influences on development and learning. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain environmental factors that impact development, and identify strategies for enhancing development.

**EDU 146 Child Guidance**  
Prerequisites: PSY 150, EDU 119

This course introduces principles and practical techniques including the design of learning environments for providing developmentally appropriate guidance for all children, including those at risk. Emphasis is placed on observation skills, cultural influences, underlying causes of behavior, appropriate expectations, development of self control and the role of communication and guidance. Upon completion, students should be able to demonstrate direct/indirect strategies for preventing problem behaviors, teaching appropriate/acceptable skills, cultural influences, underlying causes of behavior, appropriate expectations, development of self control and the role of communication and guidance. Upon completion, students should be able to demonstrate direct/indirect strategies for preventing problem behaviors, teaching appropriate/acceptable

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.
behaviors, negotiation, setting limits and recognizing at risk behaviors.

Prerequisites: None  
Corequisites: EDU 151A, DRE 097

This course covers planning, creation and adaptation of developmentally supportive learning environments with attention to curriculum, interactions, teaching practices and learning materials. Emphasis is placed on creating and adapting integrated, meaningful, challenging and engaging developmentally supportive learning experiences in art, music, movement and dramatics for all children. Upon completion, students should be able to create, adapt, implement and evaluate developmentally supportive learning materials, experiences and environments.

Prerequisites: EDU 119  
Corequisites: DRE 097

This course covers promoting and maintaining the health and well-being of all children. Topics include health and nutritional guidelines, common childhood illnesses, maintaining safe and healthy learning environments, recognition and reporting of abuse and neglect and state regulations. Upon completion, students should be able to demonstrate knowledge of health, safety, and nutritional needs, safe learning environments, and adhere to state regulations.

Prerequisites: Completion of one of the following:  
- EDU 144, EDU 145, EDU 119  
- PSY 244, PSY 245, EDU 119  
Corequisites: DRE 098

This course introduces children with exceptionalities, their families, support services, inclusive/diverse settings, and educational/family plans based on the foundations of child development. Emphasis is placed on the characteristics of exceptionalities, observation and assessment of children, strategies for adapting the learning environment, and identification of community resources. Upon completion, students should be able to recognize diverse abilities, describe the referral process, and depict collaboration with families/professionals to plan/implement, and promote best practice.

Prerequisites: EDU 119, EDU 144  
Corequisites: DRE 098, EDU 234A

This course covers the unique needs and rapid changes that occur in the first three years of life and the inter-related factors that influence development. Emphasis is placed on recognizing and supporting developmental milestones through purposeful strategies, responsive care routines and identifying elements of quality, inclusive early care and education. Upon completion, students should be able to demonstrate respectful relationships that provide a foundation for healthy infant/toddler/twos development, plan/select activities/materials, and partner with diverse families.

Prerequisites: EDU 119, EDU 144  
Corequisites: EDU 234, DRE 098

This course focuses on practical applications that support the healthy development of very young children by applying principles of quality inclusive early care and education. Emphasis is placed on recognizing the interrelated factors that impact children’s development through planning, evaluating and adapting quality environments, including activities and adult/child interactions. Upon completion, students should be able to demonstrate the ability to engage in respectful, responsive care that meets the unique needs of individual children/families.

assessments and inclusive practices. Upon completion, students should be able to select, plan, implement and evaluate developmentally appropriate and diverse language/literacy experiences.

**EDU 280A Literacy Exp Lab**  
Class: 0  
Lab: 2  
Clinical: 0  
Credit: 1  
Prerequisites: EDU 119  
Corequisites: EDU 280, DRE 098

This course provides a laboratory component to complement EDU 280. Emphasis is placed on practical experiences that enhance concepts introduced in the classroom. Upon completion, students should be able to demonstrate a practical understanding of the development and implementation of appropriate early literacy experiences.

**EDU 284 Early Child Capstone Prac**  
Class: 1  
Lab: 9  
Clinical: 0  
Credit: 4  
Prerequisites: Successful completion of one of the following:

- a. EDU 119, EDU 144, EDU 145, EDU 146, EDU 151 and EDU 259  
- b. EDU 119, PSY 244, PSY 245, EDU 146, EDU 151 and EDU 259  
- c. EDU 119, PSY 245, EDU 144, EDU 146, EDU 151 and EDU 259  
- d. EDU 119, PSY 244, EDU 145, EDU 146, EDU 151 and EDU 259  
Corequisites: DRE 098

This course is designed to allow students to apply skills in a three star (minimum) or NAEYC accredited or equivalent, quality early childhood environment. Emphasis is placed on designing, implementing and evaluating developmentally appropriate activities and environments for all children; supporting/involving families; and modeling reflective and professional practices. Upon completion, students should be able to demonstrate developmentally appropriate plans/assessments, appropriate guidance techniques and ethical/professional behaviors as indicated by assignments and onsite faculty visits.

**EGR 110 Intro to Engineering Tech**  
Class: 1  
Lab: 2  
Clinical: 0  
Credit: 2  
Prerequisites: None  
Corequisites: None

This course introduces general topics relevant to engineering technology. Topics include career assessment, professional ethics, critical thinking and problem solving, usage of college resources for study and research, and using tools for engineering computations. Upon completion, students should be able to choose a career option in engineering technology and utilize college resources to meet their educational goals.

**EGR 115 Intro to Technology**  
Class: 2  
Lab: 3  
Clinical: 0  
Credit: 3  
Prerequisites: None  
Corequisites: None

This course introduces the basic skills and career fields for technicians. Topics include career options, technical vocabulary, dimensional analysis, measurement systems, engineering graphics, calculator applications, professional ethics, safety practices, and other related topics. Upon completion, students should be able to demonstrate an understanding of the basic technologies, prepare drawings and sketches, and perform computations using a scientific calculator.

**EGR 251 Statics**  
Class: 2  
Lab: 2  
Clinical: 0  
Credit: 3  
Prerequisites: None  
Corequisites: None

This course covers the concepts and principles of statics. Topics include systems of forces and moments on structures in two- and three-dimensions in equilibrium. Upon completion, students should be able to analyze forces and moments on structures.

**EGR 252 Strength of Materials**  
Class: 2  
Lab: 2  
Clinical: 0  
Credit: 3  
Prerequisites: EGR 251  
Corequisites: None

This course covers the principles and concepts of stress analysis. Topics include centroids, moments of inertia, shear/moment diagrams, and stress and strain. Upon completion, students should be able to perform a stress and strain analysis on structural components.

**ELC 111 Intro to Electricity**  
Class: 2  
Lab: 2  
Clinical: 0  
Credit: 3  
Prerequisites: None  
Corequisites: None

This course introduces the fundamental concepts of electricity and test equipment to non-electrical/electronic majors. Topics include basic DC and AC principles (voltage, resistance, current, impedance); components (resistors, inductors, and capacitors); power; and operation of test equipment. Upon completion, students should be able to construct and analyze simple DC and AC circuits using electrical test equipment.
COURSE DESCRIPTIONS

ELC 112 DC/AC Electricity

Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098

   AND
   a. A grade of “C” or better in MAT 060 OR successful completion of DMA 010, DMA 020, and DMA 030
   b. A grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 171 or DMA 040 and DMA 050
   c. Required placement test score(s)

Corequisites: None

This course introduces the fundamental concepts of and computations related to DC/AC electricity. Emphasis is placed on DC/AC circuits, components, operation of test equipment; and other related topics. Upon completion, students should be able to construct, verify, troubleshoot, and repair DC/AC circuits.

ELC 113 Residential Wiring

Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098

   AND
   a. A grade of “C” or better in MAT 060 OR successful completion of DMA 010, DMA 020, and DMA 030
   b. A grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 171 or DMA 040 and DMA 050
   c. Required placement test score(s)

Corequisites: None

This course introduces the care/usage of tools and materials used in electrical installations and the requirements of the National Electrical Code. Topics include NEC; safety; electrical blueprints; planning, layout, and installation of equipment and conduits; and wiring devices such as panels and overcurrent devices. Upon completion, students should be able to properly install equipment and conduit associated with electrical installations.

ELC 114 Commercial Wiring

Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098

   AND
   a. A grade of “C” or better in MAT 060 OR successful completion of DMA 010, DMA 020, and DMA 030
   b. A grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 171 or DMA 040 and DMA 050
   c. Required placement test score(s)

Corequisites: None

This course provides instruction in the application of electrical tools, materials, and test equipment associated with electrical installations. Topics include the NEC; safety; electrical blueprints; planning, layout, and installation of equipment and conduits; and wiring devices such as panels and overcurrent devices. Upon completion, students should be able to properly install equipment and conduit associated with electrical installations.

ELC 115 Industrial Wiring

Prerequisites: ELC 113
Corequisites: None

This course covers layout, planning, and installation of wiring systems in industrial facilities. Emphasis is placed on industrial wiring methods and materials. Upon completion, students should be able to install industrial systems and equipment.

ELC 117 Motors and Controls

Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098

   AND
   a. A grade of “C” or better in MAT 060 OR successful completion of DMA 010, DMA 020, and DMA 030
   b. A grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 171 or DMA 040 and DMA 050
   c. Required placement test score(s)

Corequisites: None

This course introduces the fundamental concepts of motors and motor controls. Topics include ladder diagrams, pilot devices, contactors, motor starters, motors, and other control devices. Upon completion, students should be able to properly select, connect, and troubleshoot motors and control circuits.
CAPE FEAR COMMUNITY COLLEGE

ELC 118 National Electrical Code 1 2 0 2
Prerequisites: ELC 111 or ELC 112 or ELC 113
Corequisites: None

This course covers the use of the current National Electrical Code. Topics include the NEC history, wiring methods, overcurrent protection, materials, and other related topics. Upon completion, students should be able to effectively use the NEC.

ELC 119 NEC Calculations 1 2 0 2
Prerequisites: ELC 118
Corequisites: None

This course covers branch circuit, feeder, and service calculations. Emphasis is placed on sections of the National Electrical Code related to calculations. Upon completion, students should be able to use appropriate code sections to size wire, conduit, and overcurrent devices for branch circuits, feeders, and service.

ELC 121 Electrical Estimating 1 2 0 2
Prerequisites: ELC 113
Corequisites: None

This course covers the principles involved in estimating electrical projects. Topics include take-offs of materials and equipment, labor, overhead, and profit. Upon completion, students should be able to estimate simple electrical projects.

ELC 125 Diagrams and Schematics 1 2 0 2
Prerequisites: None
Corequisites: None

This course covers the interpretation of electrical diagrams, schematics, and drawings common to electrical applications. Emphasis is placed on reading and interpreting electrical diagrams and schematics. Upon completion, students should be able to read and interpret electrical diagrams and schematics.

ELC 128 Intro to PLC 2 3 0 3
Prerequisites: ELC 117 or ELC 131
Corequisites: None

This course introduces the programmable logic controller (PLC) and its associated applications. Topics include ladder logic diagrams, input/output modules, power supplies, surge protection, selection/installation of controllers, and interfacing of controllers with equipment. Upon completion, students should be able to install PLCs and create simple programs.

ELC 131 Circuit Analysis I 3 3 0 4
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: MAT 121

This course introduces DC and AC electricity with an emphasis on circuit analysis, measurements, and operation of test equipment. Topics include DC and AC principles, circuit analysis laws and theorems, components, test equipment operation, circuit simulation, and other related topics. Upon completion, students should be able to interpret circuit schematics; design, construct, verify, and analyze DC/AC circuits; and properly use test equipment.

ELC 133 Circuit Analysis II 3 3 0 4
Prerequisites: ELC 131
Corequisites: None

This course covers additional concepts of DC/AC electricity, the use of test equipment, and measurement techniques for electrical/electronics majors. Topics include the application of network theorems such as delta/wye transformations, Superposition Theorem, and other advanced circuit analysis principles. Upon completion, students should be able to construct and analyze DC/AC circuits used advanced circuit analysis theorems, circuit simulators, and test equipment.

ELC 213 Instrumentation 3 2 0 4
Prerequisites: ELC 111 or ELC 112 or ELC 131
Corequisites: None

This course covers the fundamentals of instrumentation used in industry. Emphasis is placed on electric, electronic, and other instruments. Upon completion, students should be able to install, maintain, and calibrate instrumentation.

ELC 220 Photovoltaic Sys Tech 2 3 0 3
Prerequisites: ALT120 or ELC 111
Corequisites: None

This course introduces the concepts, tools, techniques, and materials needed to understand systems that convert solar energy into electricity with photovoltaic (pv) technologies. Topics include site analysis for system integration, building codes, and advances in photovoltaic technology. Upon completion, students should be able to demonstrate an understanding of the principles of photovoltaic technology and current applications.

ELC 221 Adv PV Sys Designs 2 3 0 3
Prerequisites: ELC 220
Corequisites: None

This course introduces specific elements to photovoltaic (pv) systems technologies including efficiency, modules, inverters, charge controllers, batteries, and system installation.
Topics include National Electrical Code (NEC), electrical specifications, photovoltaic system components, array design and power integration requirements that combine to form a unified structure. Upon completion, students should be able to demonstrate an understanding of various photovoltaic designs and proper installation of NEC compliant solar electric power systems.

**ELC 228 PLC Applications**

Prerequisites: ELC 128
Corequisites: None

This course covers programming and applications of programmable logic controllers. Emphasis is placed on programming techniques, networking, specialty I/O modules, and system troubleshooting. Upon completion, students should be able to specify, implement, and maintain complex PLC controlled systems.

**ELC 229 Applications Project**

Prerequisites: ELC 117 and ELC 128
Corequisites: None

This course provides an individual and/or integrated team approach to a practical project as approved by the instructor. Topics include project selection and planning, implementation and testing, and a final presentation. Upon completion, students should be able to plan and implement an applications-oriented project.

**ELC 230 Wind & Hydro Power Sys**

Prerequisites: None
Corequisites: None

This course introduces concepts, designs, tools, techniques, and material requirements for systems that convert wind and water into usable energy. Topics include the analysis, measurement, and estimation of potential energy of wind and water systems. Upon completion, students should be able to demonstrate an understanding of the technologies associated with converting wind and water into a viable energy source.

**ELN 114 Marine Electronics**

Prerequisites: None
Corequisites: None

This course introduces a wide variety of marine electronics that are used in the marine research industry. Topics include basic theory, components, circuits, testing, troubleshooting, and installation of AC and DC marine electronics. Upon completion, students should be able to install, troubleshoot, and operate basic marine electronics used in the marine research industry.

**ELN 131 Analog Electronics I**

Prerequisites: ELC 131 and MAT 121 or MAT 171
Corequisites: None

This course introduces the characteristics and applications of semiconductor devices and circuits. Emphasis is placed on analysis, selection, biasing, and applications. Upon completion, students should be able to construct, analyze, verify, and troubleshoot analog circuits using appropriate techniques and test equipment.

**ELN 132 Analog Electronics II**

Prerequisites: ELN 131
Corequisites: None

This course covers additional applications of analog electronic circuits with an emphasis on analog and mixed signal integrated circuits (IC). Topics include amplification, filtering, oscillation, voltage regulation, and other analog circuits. Upon completion, students should be able to construct, analyze, verify, and troubleshoot analog electronic circuits using appropriate techniques and test equipment.

**ELN 133 Digital Electronics**

Prerequisites: ELN 131 and ELN 131
Corequisites: None

This course covers combinational and sequential logic circuits. Topics include number systems, Boolean algebra, logic families, medium scale integration (MSI) and large scale integration (LSI) circuits, Analog to digital (AD) and digital to analog (DA) conversion, and other related topics. Upon completion, students should be able to construct, analyze, verify, and troubleshoot digital circuits using appropriate techniques and test equipment. *This course is also available through the Virtual Learning Community (VLC).*

**ELN 231 Industrial Controls**

Prerequisites: ELN 131
Corequisites: None

This course introduces the fundamental concepts of control of rotating machinery and associated peripheral devices. Topics include rotating machine theory, ladder logic, electromechanical and solid state relays, motor controls, pilot devices, three-phase power systems, and other related topics. Upon completion, students should be able to interpret schematics and demonstrate an understanding of electromechanical and electronic control of rotating machinery.

**ELN 232 Intro to Microprocessors**

Prerequisites: CSC 133, ELN 133
Corequisites: None

This course introduces microprocessor architecture and microcomputer systems including memory and input/output interfacing. Topics include low-level language programming, bus architecture, I/O systems, memory systems, interrupts,
and other related topics. Upon completion, students should be able to interpret, analyze, verify, and troubleshoot fundamental microprocessor circuits and programs using appropriate techniques and test equipment.

**ELN 234 Communication Systems** 3 3 0 4
Prerequisites: ELC 133, ELN 131, ELN 132, and MAT 121 or MAT 171
Corequisites: None

This course introduces the fundamentals of electronic communication systems. Topics include the frequency spectrum, electrical noise, modulation techniques, characteristics of transmitters and receivers, and digital communications. Upon completion, students should be able to interpret analog and digital communication circuit diagrams, analyze transmitter and receiver circuits, and use appropriate communication test equipment.

**ELN 235 Data Communication Sys** 3 3 0 4
Prerequisites: ELN 234
Corequisites: None

This course covers data communication systems and the transmission of digital information from source to destination. Topics include data transmission systems, interfaces and modems, protocols, networks, and other related topics. Upon completion, students should be able to demonstrate knowledge of the concepts associated with data communication systems.

**ELN 236 Fiber Optics and Lasers** 3 2 0 4
Prerequisites: ELC 131, MAT 121
Corequisites: ELN 234

This course introduces the fundamentals of fiber optics and lasers. Topics include the transmission of light; characteristics of fiber optic and lasers and their systems; fiber optic production; types of lasers; and laser safety. Upon completion, students should be able to understand fiber optic communications and basic laser fundamentals. In addition, opto-electronic devices and optical transmitters and receivers will be investigated and analyzed.

**ELN 237 Local Area Networks** 2 3 0 3
Prerequisites: CIS 110 and CET 172
Corequisites: None

This course introduces the fundamentals of local area networks and their operation. Topics include the characteristics of network topologies, system hardware, system configuration, installation and operation of the LAN. Upon completion, students should be able to install and maintain a local area network.

**ELN 238 Advanced LANs** 2 3 0 3
Prerequisites: ELN 237
Corequisites: None

This course covers advanced concepts, tools, and techniques associated with servers, workstations, and overall local area network performance. Topics include network security and configuration, system performance and optimization, communication protocols and packet formats, troubleshooting techniques, multi-platform integration, and other related topics. Upon completion, students should be able to use advanced techniques to install, manage, and troubleshoot networks and optimize server and workstation performance.

**ELN 260 Prog Logic Controllers** 3 3 0 4
Prerequisites: None
Corequisites: None

This course provides a detailed study of PLC applications, with a focus on design of industrial controls using the PLC. Topics include PLC components, memory organization, math instructions, documentation, input/output devices, and applying PLCs in industrial control systems. Upon completion, students should be able to select and program a PLC system to perform a wide variety of industrial control functions.

**ELN 275 Troubleshooting** 1 3 0 2
Prerequisites: ELN 133 or ELN 141
Corequisites: None

This course covers techniques of analyzing and repairing failures in electronic equipment. Topics include safety, signal tracing, use of service manuals, and specific troubleshooting methods for analog, digital, and other electronics-based circuits and systems. Upon completion, students should be able to logically diagnose and isolate faults and perform necessary repairs to meet manufacturers’ specifications.

**EMS 110 EMT** 6 6 0 8
Prerequisites: None
Corequisites: None

This course introduces basic emergency medical care. Topics include preparatory, airway, patient assessment, medical emergencies, trauma, infants and children, and operations. Upon completion, students should be able to demonstrate the knowledge and skills necessary to achieve North Carolina State or National Registry EMT certification.

**EMS 120 Advanced EMT** 4 6 0 6
Prerequisites: EMS 110
Corequisites: EMS 121

This course is designed to provide the essential information on interventions/treatments appropriate to the Advanced EMT and is required for Advanced EMT certification. Topics include airway management, automatic external defibrillation, cardiac electrophysiology, vascular access, acid-base balance,
pharmacology, medical emergencies, traumatic injuries, and fluids and electrolytes. Upon completion, students should be able to properly obtain vascular access, manage medical and trauma patients, utilize simple and advanced airways, and correctly interpret arterial blood gases.

**EMS 121 AEMT Clinical Practicum**

Prerequisites: EMS 110  
Corequisites: EMS 120  
This course provides the hospital and field internship/clinical experiences required in preparation for the Advanced EMT certification. Emphasis is placed on performing patient assessments, treatments, and interactions appropriate at the Advanced EMT level of care. Upon completion, students should be able to demonstrate competence at the Advanced EMT skill level.

**EMS 130 Pharmacology**

Prerequisites: EMS 110  
Corequisites: EMS 122  
This course introduces the fundamental principles of pharmacology and medication administration and is required for paramedic certification. Topics include medical terminology, pharmacological concepts, weights, measures, drug calculations, vascular access for fluids and medication administration and legislation. Upon completion, students should be able to accurately calculate drug dosages, properly administer medications, and demonstrate general knowledge of pharmacology.

**EMS 131 Advanced Airway Management**

Prerequisites: EMS 110  
Corequisites: None  
This course is designed to provide advanced airway management techniques and is required for paramedic certification. Topics include respiratory anatomy and physiology, airway/ventilation, adjuncts, surgical intervention, and rapid sequence intubation. Upon completion, students should be able to properly utilize all airway adjuncts and pharmacology associated with airway control and maintenance.

**EMS 140 Rescue Scene Management**

Prerequisites: None  
Corequisites: None  
This course introduces rescue scene management. Topics include response to hazardous material conditions, incident command, and extrication of patients from a variety of situations. Upon completion, students should be able to recognize and manage rescue operations based upon initial and follow-up scene assessment.

**EMS 150 Emerg Vehicles & EMS Comm**

Prerequisites: None  
Corequisites: None  
This course covers the principles governing emergency vehicles, maintenance of emergency vehicles, and EMS communication equipment. Topics include applicable motor vehicle laws affecting emergency vehicle operation, defensive driving, collision avoidance techniques, communication systems, and information management systems. Upon completion, students should have knowledge of emergency vehicles, maintenance, and communication needs.

**EMS 210 Adv. Patient Assessment**

Prerequisites: EMS 120, EMS 130, EMS 131 and either EMS 121 or EMS 122  
Corequisites: None  
This course covers advanced patient assessment techniques and is required for paramedic certification. Topics include initial assessment, medical-trauma history, field impression, complete physical exam process, on-going assessment, and documentation skills. Upon completion, students should be able to utilize basic communication skills and record and report collected patient data.

**EMS 220 Cardiology II**

Prerequisites: EMS 122, EMS 130, EMS 160  
Corequisites: None  
This course provides an in-depth study of cardiovascular emergencies and is required for paramedic certification. Topics include assessment and treatment of cardiac emergencies, application and interpretation of advanced electrocardiography utilizing the twelve-lead ECG, cardiac pharmacology, and patient care. Upon completion, students should be able to assess and treat patients utilizing American Heart Association guidelines.

**EMS 221 EMS Clinical Practicum II**

Prerequisites: EMS 122, EMS 130  
Corequisites: None  
This course provides clinical experiences in the hospital and/or field. Emphasis is placed on increasing the proficiency of students’ skills and abilities in patient assessments and the delivery of care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care.

**EMS 231 EMS Clinical Practicum III**

Prerequisites: EMS 130, EMS 221  
Corequisites: None  
This course provides clinical experiences in the hospital and/or field. Emphasis is placed on enhancing the students’ skills and abilities in providing advanced-level care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care.
This course stresses the principles of managing a modern emergency medical service system. Topics include structure and function of municipal governments, EMS grantsmanship, finance, regulatory agencies, system management, legal issues, and other topics relevant to the EMS manager. Upon completion, students should be able to understand the principles of managing emergency medical service delivery systems.

This course includes concepts of crisis intervention and techniques of interacting with patients with special challenges and is required for paramedic certification. Topics include appropriate intervention and interaction for neglected, abused, terminally ill, chronically ill, technology assisted, bariatric, physically challenged, mentally challenged, or assaulted patients as well as behavioral emergencies. Upon completion, students should be able to recognize and manage the care of patients with special challenges.

This course provides clinical experiences in the hospital and/or field. Emphasis is placed on mastering the skills/competencies required of the paramedic providing advanced-level care. Upon completion, students should be able to provide advanced-level patient care as an entry-level paramedic.

This course provides an in-depth study of medical conditions frequently encountered in the prehospital setting and is required for paramedic certification. Topics include appropriate interventions/treatments for disorders/diseases/injuries affecting the following systems: respiratory, neurological, abdominal/gastrointestinal, endocrine, genitourinary, musculoskeletal, and immunological as well as oncology, infectious diseases and diseases of the eyes, ears, nose and throat. Upon completion, students should be able to recognize, assess and manage the care of frequently encountered medical conditions based upon initial patient assessment.

This course provides in-depth study of trauma including pharmacological interventions for conditions frequently encountered in the prehospital setting and is required for paramedic certification. Topics include an overview of thoracic, abdominal, genitourinary, orthopedic, neurological, and multisystem trauma, soft tissue trauma of the head, neck, and face as well as environmental emergencies. Upon completion, students should be able to recognize and manage trauma situations based upon patient assessment and should adhere to standards of care.

This course covers medical/ethical/legal issues and the spectrum of age-specific emergencies from conception through death required for paramedic certification. Topics include gynecological, obstetrical, neonatal, pediatric, and geriatric emergencies and pharmacological therapeutics. Upon completion, students should be able to recognize and treat age-specific emergencies.

This course provides an opportunity to demonstrate problem-solving skills as a team leader in simulated patient scenarios and is required for paramedic certification. Emphasis is placed on critical thinking, integration of didactic and psychomotor skills, and effective performance in simulated emergency situations. Upon completion, students should be able to recognize and appropriately respond to a variety of EMS-related events.

This course is designed to enhance reading and writing skills for the workplace. Emphasis is placed on technical reading, job-related vocabulary, sentence writing, punctuation, and spelling. Upon completion, students should be able to identify main ideas with supporting details and produce mechanically correct short writings appropriate to the workplace. This course may meet the communication requirement for DIP and CER programs.

This course is designed to enhance writing and speaking skills for the workplace. Emphasis is placed on generating short writings such as job application documents, memoranda, and reports and developing interpersonal communication skills with employees and the public. Upon completion, students should be able to prepare effective, short, and job-related written and oral communications. This course may meet the communication requirement for DIP and CER programs.
ENG 111* Writing and Inquiry 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090 and ENG-090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None

This course is designed to develop the ability to produce clear writing in a variety of genres and formats using a recursive process. Emphasis includes inquiry, analysis, effective use of rhetorical strategies, thesis development, audience awareness, and revision. Upon completion, students should be able to produce unified, coherent, well-developed essays using standard written English. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

ENG 112* Argument-Based Research 3 0 0 3
Prerequisites: ENG 111
Corequisites: None

This course, the second in a series of two, introduces research techniques, documentation styles, and argumentative strategies. Emphasis is placed on analyzing and incorporating research findings into documented argumentative essays and research projects. Upon completion, students should be able to summarize, paraphrase, interpret, and synthesize information from primary and secondary sources using standard research format and style. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

ENG 113* Literature-Based Research 3 0 0 3
Prerequisites: ENG 111
Corequisites: None

This course, the second in a series of two, expands the concepts developed in ENG 111 by focusing on writing that involves literature-based research and documentation. Emphasis is placed on critical reading and thinking and the analysis and interpretation of prose, poetry, and drama: plot, characterization, theme, cultural context, etc. Upon completion, students should be able to construct mechanically sound, documented essays and research papers that analyze and respond to literary works. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in English composition. This course may meet the SACS communication requirement for AA, AS, AFA, AGE, AAS, DIP, or CER programs.

ENG 114* Prof Research & Report 3 0 0 3
Prerequisites: ENG 111
Corequisites: None

This course, the second in a series of two, is designed to teach professional communication skills. Emphasis is placed on research, listening, critical reading and thinking, analysis, interpretation, and design used in oral and written presentations. Upon completion, students should be able to work individually and collaboratively to produce well-designed business and professional written and oral presentations. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in English composition. This course may meet the Comprehensive Articulation Agreement general education core requirement in English composition. This course may meet the SACS communication requirement for AA, AS, AFA, AGE, AAS, DIP, or CER programs.

ENG 125* Creative Writing I 3 0 0 3
Prerequisites: ENG 111
Corequisites: None

This course is designed to provide students with the opportunity to practice the art of creative writing. Emphasis is placed on writing, fiction, poetry, and sketches. Upon completion, students should be able to craft and critique their own writing and critique the writing of others. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. This course may meet the SACS humanities/fine arts requirement for AGE, AAS, DIP, or CER programs.

ENG 126* Creative Writing II 3 0 0 3
Prerequisites: ENG 125
Corequisites: None

This course is designed as a workshop approach for advancing imaginative and literary skills. Emphasis is placed on the discussion of style, techniques, and challenges for first publications. Upon completion, students should be able to submit a piece of their writing for publication.

ENG 131* Introduction to Literature 3 0 0 3
Prerequisites: ENG 111
Corequisites: ENG 112 or ENG 113 or ENG 114

This course introduces the principal genres of literature. Emphasis is placed on literary terminology, devices, structure, and interpretation. Upon completion, students should be able to analyze and respond to literature.

ENG 231* American Literature I 3 0 0 3
Prerequisites: ENG 112 or ENG 113 or ENG 114
Corequisites: None

This course covers selected works in American literature from its beginnings to 1865. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

ENG 232* American Literature II 3 0 0 3
Prerequisites: ENG 112 or ENG 113 or ENG 114
Corequisites: None

This course covers selected works in American literature from 1865 to the present. Emphasis is placed on historical
This course covers selected works in British literature from the Romantic Period to the present. Emphasis is placed on historical and cultural contexts. Upon completion, students should be able to interpret, analyze, and discuss selected works.

- **ENG 272* Southern Literature** 3 0 0 3
  Prerequisites: ENG 112 or ENG 113 or ENG 114
  Corequisites: None
  This course provides an analytical study of the works of several Southern authors. Emphasis is placed on the historical and cultural contexts, themes, aesthetic features of individual works, and biographical backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and respond to selected works.

- **ENG 273* African-American Literature** 3 0 0 3
  Prerequisites: ENG 112 or ENG 113 or ENG 114
  Corequisites: None
  This course provides a survey of the development of African-American literature from its beginnings to the present. Emphasis is placed on historical and cultural context, themes, literary traditions, and backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and respond to selected texts.

- **ENG 274* Literature by Women** 3 0 0 3
  Prerequisites: ENG 112 or ENG 113 or ENG 114
  Corequisites: None
  This course provides an analytical study of the works of several women authors. Emphasis is placed on the historical and cultural contexts, themes and aesthetic features of individual works, and biographical backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and discuss selected works.

- **ENT 114 Entertainment Law** 3 0 0 3
  Prerequisites: None
  Corequisites: None
  This course provides an introduction to legal aspects of the entertainment industry. Topics include performance rights, songwriting and personal appearance contracts, copyright law, trademarks, and the like. Upon completion, students should be able to explain the basic elements of a contract, recognizing, explaining, and evaluating elements of law that pertain to entertainment.

- **ENV 110 Environmental Science** 3 0 0 3
  Prerequisites: None
  Corequisites: None
  This course covers the environmental problems facing society today. Topics include population, natural resources, air and water pollution, and waste disposal problems. Upon completion, students should be able to demonstrate insight into the role the individual plays in shaping the environment.
ENV 226 Environmental Law 3 0 0 3
Prerequisites: None
Corequisites: None

This course covers federal laws and acts concerning environmental quality standards and the use of resources, legal procedures for enforcing laws, and problems concerning enforcement. Emphasis is placed on environmental law basics, water quality laws, air quality laws, waste disposal laws, and biological resource protection laws. Upon completion, students should be able to demonstrate an understanding of federal/state environmental laws and their importance to the protection of environmental quality.

FIP 120 Intro to Fire Protection 3 0 0 3
Prerequisites: None
Corequisites: None

This course provides an overview of the development, methods, systems and regulations that apply to the fire protection field. Topics include history, evolution, statistics, suppression, organizations, careers, curriculum, and related subjects. Upon completion, students should be able to demonstrate a broad understanding of the fire protection field.

FIP 124 Fire Prevention & Public Ed 3 0 0 3
Prerequisites: None
Corequisites: None

This course introduces fire prevention concepts as they relate to community and industrial operations referenced in NFPA standard 101. Topics include the development and maintenance of fire prevention programs, educational programs, and inspection programs. Upon completion, students should be able to research, develop, and present a fire safety program to a citizens or industrial group.

FIP 128 Detection & Investigation 3 0 0 3
Prerequisites: None
Corequisites: None

This course covers procedures for determining the origin and cause of accidental and incendiary fires referenced in NFPA standard 921. Topics include collection and preservation of evidence, detection and determination of accelerants, courtroom procedure and testimony, and documentation of the fire scene. Upon completion, students should be able to conduct a competent fire investigation and present those findings to appropriate officials or equivalent.

FIP 132 Building Construction 3 0 0 3
Prerequisites: None
Corequisites: None

This course covers the principles and practices reference in NFPA standard 220 related to various types of building construction, including residential and commercial, as impacted by fire conditions. Topics include types of construction and related elements, fire resistive aspects of construction materials, building codes, collapse, and other related topics. Upon completion, students should be able to understand and recognize various types of construction and their positive or negative aspects as related to fire conditions.

FIP 136 Inspections & Codes 3 0 0 3
Prerequisites: None
Corequisites: None

This course covers the fundamentals of fire and building codes and procedures to conduct an inspection referenced in NFPA standard 1730. Topics include review of fire and building codes, writing inspection reports, identifying hazards, plan reviews, site sketches, and other related topics. Upon completion, students should be able to conduct a fire code compliance inspection and produce a written report.

FIP 152 Fire Protection Law 3 0 0 3
Prerequisites: None
Corequisites: None

This course covers fire protection law as referenced in NFPA standard 1. Topics include legal terms, contracts, liability, review of case histories, and other related topics. Upon completion, students should be able to discuss laws, codes, and ordinances as they relate to fire protection.

FIP 156 Computers in Fire Service 1 2 0 2
Prerequisites: None
Corequisites: None

This course covers the use of computers by fire protection organizations. Topics include operating systems, networking concepts, fire incident reporting systems, and other software applications in fire protection. Upon completion, students should be able to demonstrate knowledge of computers and their applications to fire protection.

FIP 164 OSHA Standards 3 0 0 3
Prerequisites: None
Corequisites: None

This course covers public and private sector OSHA work site requirements referenced in NFPA standard 1250. Emphasis is placed on accident prevention and reporting, personal safety, machine operations, and hazardous material handling. Upon completion, students should be able to analyze and interpret specific OSHA regulations and write workplace policies designed to achieve compliance.

FIP 220 Fire Fighting Strategies 3 0 0 3
Prerequisites: None
Corequisites: None

This course provides preparation for command of initial incident operations involving emergencies within both the public and private sector referenced in NFPA standards 1561, 1710, 193
and 1720. Topics include incident management, fire-ground tactics and strategies, incident safety, and command/control of emergency operations. Upon completion, students should be able to describe the initial incident system as it relates to operations involving various emergencies in fire and non-fire situations.

**FIP 221 Advanced Fire Fighting Strategies**  
Prerequisites: FIP 220  
Corequisites: None

This course covers command-level operations for multi-company/agency operations involving fire and non-fire emergencies. Topics include advanced use of the Incident Command System (ICS), advanced incident analysis, command-level fire operations, and control of both man made and natural major disasters. Upon completion, students should be able to describe proper and accepted systems for the mitigation of emergencies at the level of overall scene command.

**FIP 228 Local Govt Finance**  
Prerequisites: None  
Corequisites: None

This course introduces local governmental financial principles and practices. Topics include budget preparation and justification, revenue policies, statutory requirements, audits, and the economic climate. Upon completion, students should be able to comprehend the importance of finance as it applies to the operations of a department.

**FIP 236 Emergency Management**  
Prerequisites: None  
Corequisites: None

This course covers the four phases of emergency management: mitigation, preparedness, response, and recovery. Topics include organizing for emergency management, coordinating for community resources, public sector liability, and the roles of government agencies at all levels. Upon completion, students should be able to demonstrate an understanding of comprehensive emergency management and the integrated emergency management system.

**FIP 240 Fire Service Supervision**  
Prerequisites: None  
Corequisites: None

This course covers supervisory skills and practices in the fire protection field. Topics include the supervisor’s job, supervision skills, the changing work environment, managing change, organizing for results, discipline and grievances, and safety. Upon completion, students should be able to demonstrate an understanding of the roles and responsibilities of effective fire service supervision, meeting elements of NFPA 1021.

**FIP 256 Municipal Public Relations**  
Prerequisites: None  
Corequisites: None

This course is a general survey of municipal public relations and their effect on the governmental process. Topics include principles of public relations, press releases, press conferences, public information officers, image surveys, and the effects of perceived service on fire protection delivery. Upon completion, students should be able to manage public relations functions of organizations which meet elements of NFPA 1021 for Fire Officer I and II.

**FIP 276 Managing Fire Services**  
Prerequisites: None  
Corequisites: None

This course provides an overview of fire department operative services referenced in NFPA standard 1021. Topics include finance, staffing, equipment, code enforcement, management information, specialized services, legal issues, planning, and other related topics. Upon completion, students should be able to understand concepts and apply fire department management and operations principles.

**FRE 111* Elementary French I**  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 080  
  b. Grade of “C” or better in ENG 085  
  c. Grade of “C” or better in DRE 097  
  d. Required placement test score(s)  
Corequisites: FRE 181

This course introduces the fundamental elements of the French language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written French and demonstrate cultural awareness. Students who have completed two units of foreign language in high school are advised to take the CLEP (College Level Examination for Placement) before registering for FRE 111. The CLEP is given daily at the University of North Carolina-Wilmington Testing Center and requires a fee. Students should make an appointment by calling 910-362-7444. CFCC discourages students from taking elementary levels of global languages if they have had satisfactory grades in high school language courses.

**FRE 112* Elementary French II**  
Prerequisites: FRE 111  
Corequisites: FRE 182

This course is a continuation of FRE 111 focusing on the fundamental elements of the French language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written French and to demonstrate further cultural awareness.

**FRE 181* French Lab 1**

**Prerequisites:** Completion of one of the following:
- Grade of “C” or better in **RED 080**
- Grade of “C” or better in **ENG 085**
- Grade of “C” or better in **DRE 097**
- Required placement test score(s)

**Corequisites:** **FRE 111**

This course provides an opportunity to enhance acquisition of the fundamental elements of the French language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written French and demonstrate cultural awareness.

Students who have completed two units of foreign language in high school are advised to take the CLEP (College Level Examination for Placement) before registering for **FRE 111**. The CLEP is given daily at the University of North Carolina-Wilmington Testing Center and requires a fee. Students should make an appointment by calling 910-362-7444. CFCC discourages students from taking elementary levels of global languages if they have had satisfactory grades in high school language courses.

**FRE 182* French Lab 2**

**Prerequisites:** **FRE 181**

**Corequisites:** **FRE 112**

This course provides an opportunity to enhance acquisition of the fundamental elements of the French language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written French and demonstrate cultural awareness.

**FRE 211* Intermediate French I**

**Prerequisites:** **FRE 112**

**Corequisites:** None

This course provides a review and expansion of the essential skills of the French language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future.

**FRE 212* Intermediate French II**

**Prerequisites:** **FRE 211**

**Corequisites:** None

This course is a continuation of **FRE 211**. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication.

**FST 102 Foodservice Skills I**

**Prerequisites:** None

**Corequisites:** **CUL 110**

This course introduces the concepts, skills, and techniques for volume food production in an institutional or commercial setting. Emphasis is placed on knife skills, tool and equipment handling, and applying principles of basic hot and cold food preparation. Upon completion, students should be able to demonstrate entry-level skills for foodservice operations.

**FVP 111 Intro to Film and Video**

**Prerequisites:** None

**Corequisites:** None

This course is an overview of the film making process from conceptualization to execution and examines film genres in the context of history, theory, creativity, and commerce. Topics include the history of film and video in the US, technical terminology, relationships between various job categories, and the language of film. Upon completion, students should be able to demonstrate a film vocabulary and knowledge of working conditions in the film/video production field.

**FVP 112 Art Dept Operations I**

**Prerequisites:** None

**Corequisites:** None

This course introduces practical fabrication skills for wood and other materials required to build both props and sets from blueprints, photographs, or sketches. Emphasis is placed on the safe use of hand and power tools, and the skills required for collaborative efforts in set and prop construction. Upon completion students should be able to demonstrate a working knowledge of the equipment and skills necessary to assist in constructing sets and props.

**FVP 113 Grip & Electrical I**

**Prerequisites:** None

**Corequisites:** None

This course covers various grip/support packages used in different environments for studio and location. Topics include lighting units, hardware, stands, color media, and electrical theory with emphasis on safety. Upon completion, students should be able to execute basic grip and electrical directions given by the key grip, and/or gaffer.

**FVP 114 Camera & Lighting I**

**Prerequisites:** None

**Corequisites:** None

This course covers the basic principles of video camera and recorder operations in professional formats, crew protocol and safety, and basic lighting theory and application. Emphasis is placed on terminology, the characteristics of light, basic lighting procedures, and proper procedures of field recording with video equipment. Upon completion, students should be able...
to demonstrate an understanding of the basic technical terms of camera operation, video recording and lighting equipment.

**FVP 115 Camera & Lighting II**
Prerequisites: FVP 114
Corequisites: None

This course offers advanced principles of video camera and recorder operations and introduces students to film formats and equipment as well as advanced lighting theory applications. Emphasis is placed on terminology, lighting for effect, and color correction. Upon completion, students should be able to demonstrate an understanding of camera terms and equipment, lighting theory and applications, and assist on studio and location shoots.

**FVP 116 Sound Operation**
Prerequisites: None
Corequisites: None

This course provides an overview of sound theory, methods, and technologies for location and studio recording, and hands-on work in location sound gathering. Emphasis is placed on terminology, protocol, cabling, trouble-shooting, mixing skills and safety aspects associated with hands-on work in sound gathering. Upon completion, students should be able to demonstrate an understanding of sound theory and terminology and assist professionals in sound gathering in both film and audio production.

**FVP 117 Make-up & Wardrobe**
Prerequisites: None
Corequisites: None

This course covers talent presentation for camera including period and genre make-up styles, materials and methods of fabrication. Emphasis is placed on understanding the wardrobe department, make-up application, prosthetics and special effects make-up with emphasis on safety, hygiene, durability and continuity. Upon completion, students should understand the functions of the wardrobe department and demonstrate competence in the use of various make-up applications.

**FVP 120 Art Dept. Operations II**
Prerequisites: FVP 112
Corequisites: None

This course provides a more in depth coverage of the skills necessary to assist in the set construction, paint, set dressing, props and greens departments. Emphasis is placed on the skill range required for each craft including, but not limited to, plumbing, casting, wallpapering, furniture construction, upholstery, wiring and drapery. Upon completion students should be competent to assist in all fields related to the fabrication and decoration of sets and props.

**FVP 130 Grip and Electrical II**
Prerequisites: FVP 113
Corequisites: None

This course provides a more in depth coverage of grip/support packages used in studio work and on location. Topics include advanced coverage of lighting, color media, and camera dollies, rigging, and electrical distribution with emphasis on safety issues. Upon completion students should be able to execute grip and electrical directions given by the key grip, gaffer, cinematographer and/or director of photography.

**FVP 212 Production Techniques I**
Prerequisites: FVP 111 and FVP 115 and FVP 116
Corequisites: None

This course provides experience working in a variety of crew positions with both student and professional productions and covers advanced film production concepts. Emphasis is placed on successful interaction with other advanced students and/or professionals as well as competency in advanced film production concepts. Upon completion, students should be able to demonstrate professional skills needed to pursue careers in key positions in the film and video industry.

**FVP 213 Production Techniques II**
Prerequisites: FVP 212
Corequisites: None

This course provides experience working in a variety of crew positions with both student and professional productions and covers advanced film production concepts. Emphasis is placed on successful interaction with other advanced students and/or professionals as well as competency in advanced film production concepts. Upon completion, students should be able to demonstrate professional skills needed to pursue careers in key positions in the film and video industry.

**FVP 215 Production Management**
Prerequisites: FVP 111
Corequisites: FVP 238

This course emphasizes the activity of script breakdown in pre-production as well as the activities of the production office in both the production and post-production stages. Emphasis is placed on procedures, use of industry standard forms and software, as well as the functions and practices of the production office. Upon completion students should be able to demonstrate the people and technical skills necessary to assist above-the-line professionals in all types of film and video production.

**FVP 220 Editing I**
Prerequisites: None
Corequisites: None

This course covers film and video editing from traditional methods to digital non-linear systems and basic film lab and...
transfer facility procedures. Topics include terminology, technologies, aesthetics, basic picture-only editing skills; and the editor’s role augmented by hands-on experience. Upon completion, students should be able to use editing equipment and basic digitizing, logging, and picture only editing skills.

**FVP 221 Editing II**

Prerequisites: FVP 220  
Corequisites: None

This course covers editing in the digital environment, starting from the camera negative through the transfer, the non-linear digital edit and going back to negative matching. Topics include terminology, technologies, aesthetics, advanced sound and picture editing skills, and the editor’s role augmented by hands-on experience. Upon completion student should be able to demonstrate proficiency in using editing equipment and sound and picture editing skills.

**FVP 223 Postproduction Sound Design**

Prerequisites: FVP 116 or FVP 220  
Corequisites: None

This course covers audio postproduction recording, mixing, and editing techniques, technologies, and aesthetics for the development of a compelling soundtrack for film and video media. Topics include using library effects, recording sound, effects and Foley to reinforce images and the story, preparing and mixing sound tracks for media productions. Upon completion students should be able to record, edit and mix sound design projects that strengthen narrative elements and perform critique of media sound design.

**FVP 227 Multimedia Production**

Prerequisites: FVP 212  
Corequisites: None

This course covers technical terms used in the multimedia industry and introduces skills related to digital manipulation of audio and video materials. Emphasis is placed on technical terms used in multimedia work and integration of sound, video, graphics, and text into a single production. Upon completion, students should be able to define technical terms in multimedia work and work with a variety of computer hardware and software.

**FVP 240 Introduction to Screenwriting**

Prerequisites: ENG 111  
Corequisites: None

This course introduces the principles and practices of the screenwriting craft. Emphasis is placed on analysis of screenwriting and script components and the preparation and development of motion picture and television treatments and scripts. Upon completion, students should be able to critically analyze the components of both motion picture and television treatments and scripts, and prepare effective, camera-ready motion picture and television scripts.

**FVP 250 Production Specialities I**

Prerequisites: FVP 111 and FVP 114  
Corequisites: None

This course provides education and training through contextual learning in the film production areas of art department, camera, sound, grip, electric, locations, script, and continuity. Emphasis is placed on successful professional level interaction with other students and industry professionals through pre-production and initial production of an actual film/video project. Upon completion, students should demonstrate an understanding of the film/video pre-production and initial production process, and the relationship among the departments in these areas.

**GEL 111* Geology**

Prerequisites: Completion of one of the following:  
- Grade of “C” or better in RED 090  
- Grade of “C” or better in ENG 095  
- Grade of “C” or better in DRE 098  
- Required placement test score(s)

Corequisites: None

This course introduces basic landforms and geological processes. Topics include rocks, minerals, volcanoes, fluvial processes, geological history, plate tectonics, glaciers, and coastal dynamics. Upon completion, students should be able to describe basic geological processes that shape the earth. Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

**GEL 113* Historical Geology**

Prerequisites: GEL 111 or GEL 120;  
Completion of one of the following:  
- Grade of “C” or better in RED 090  
- Grade of “C” or better in ENG 095  
- Grade of “C” or better in DRE 098  
- Required placement test score(s)  
AND GEL 111 or GEL 120

Corequisites: None

This course covers the geological history of the earth and its life forms. Emphasis is placed on the study of rock strata, fossil groups, and geological time. Upon completion, students should be able to identify major fossil groups and associated rock strata and approximate ages of geological formations.

**GEL 120* Physical Geology**

Prerequisites:  
Completion of one of the following:  
- Grade of “C” or better in RED 090  
- Grade of “C” or better in ENG 095  
- Grade of “C” or better in DRE 098  
- Required placement test score(s)

Corequisites: None

This course provides a study of the structure and composition of the earth’s crust. Emphasis is placed on weathering, erosional and depositional processes, mountain building forces, rocks
CAFE FEAR COMMUNITY COLLEGE

and minerals, and structural changes. Upon completion, students should be able to explain the structure, composition, and formation of the earth’s crust.

GEL 220 Marine Geology 3 2 0 4
Prerequisites: GEL 120 or GEL 111
Corequisites: None

This course presents a detailed examination of coastal and sea floor geology. Emphasis is placed on coastal and sea floor landforms and processes that shape these features. Upon completion, students should be able to describe the origin and evolution of both coastal and sea floor landforms.

GEL 230 Environmental Geology 3 2 0 4
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
   AND GEL 111, GEL 120 or PHS 130
Corequisites: None

This course provides insights into geologic forces that cause environmental changes influencing man’s activities. Emphasis is placed on natural hazards and disasters caused by geologic forces. Upon completion, students should be able to relate to major hazards and disasters to the geologic forces responsible for their occurrence.

GER 111 Elementary German I 3 0 0 3
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 080
   b. Grade of “C” or better in ENG 085
   c. Grade of “C” or better in DRE 097
   d. Required placement test score(s)
Corequisites: GER181

This course introduces the fundamental elements of the German language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written German and demonstrate cultural awareness.

Students who have completed two units of foreign language in high school are advised to take the CLEP (College Level Examination for Placement) before registering for GER 111. The CLEP is given daily at the University of North Carolina-Wilmington Testing Center and requires a fee. Students should make an appointment by calling 910-362-7444. CFCC discourages students from taking elementary levels of global languages if they have had satisfactory grades in high school language courses.

GER 112 Elementary German II 3 0 0 3
Prerequisites: GER 111
Corequisites: GER 182

This course is a continuation of GER 111 focusing on the fundamental elements of the German language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written German and to demonstrate further cultural awareness.

GER 181 German Lab 1 0 2 0 1
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 080
   b. Grade of “C” or better in ENG 085
   c. Grade of “C” or better in DRE 097
   d. Required placement test score(s)
Corequisites: GER 111

This course provides an opportunity to enhance acquisition of the fundamental elements of the German language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written German and demonstrate cultural awareness.

Students who have completed two units of foreign language in high school are advised to take the CLEP (College Level Examination for Placement) before registering for GER 111. The CLEP is given daily at the University of North Carolina-Wilmington Testing Center and requires a fee. Students should make an appointment by calling 910-362-7444. CFCC discourages students from taking elementary levels of global languages if they have had satisfactory grades in high school language courses.

GER 182 German Lab 2 0 2 0 1
Prerequisites: GER 181
Corequisites: GER 112

This course provides an opportunity to enhance acquisition of the fundamental elements of the German language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written German and demonstrate cultural awareness.

GER 211 Intermediate German I 3 0 0 3
Prerequisites: GER 112
Corequisites: None

This course provides a review and expansion of the essential skills of the German language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon
COURSE DESCRIPTIONS

COURSES DESIGNATED WITH AN Asterisk (*) ARE COLLEGE TRANSFER COURSES. CHECK WITH YOUR SENIOR INSTITUTION TO ENSURE THE COURSE WILL BE APPROPRIATE FOR YOUR PROGRAM AT THAT INSTITUTION.

HBI 250  Data Mgmt and Utilization  
Prerequisites: DBA-110 or DBA-120 or DBA-210
Corequisites: None

This course covers the management and usage of data in healthcare settings according to current practices in healthcare informatics. Topics include data warehousing, data integrity, data security, data mining, and report generating in healthcare settings. Upon completion, students should be able to demonstrate an understanding of using healthcare data to support reporting and decision making in healthcare settings.

HBI 289  HBI Project  
Prerequisites: HBI-250
Corequisites: None

This course provides an opportunity to complete a significant healthcare business informatics project with minimal instructor assistance. Emphasis is placed on written and oral communication skills, project definition, documentation, installation, testing, presentation, and user training. Upon completion, students should be able to complete a healthcare informatics project from the definition phase through implementation.

HBI 110  Issues and Trends in HBI  
Prerequisites: None
Corequisites: None

This course is a survey of current and emerging technology applications and data standards in the healthcare industry. Topics include the history, implementation, use, management, and impact of information technology in healthcare settings. Upon completion, students should have an understanding of the current trends and issues in healthcare informatics.

HBI 113  Survey of Med Insurance  
Prerequisites: None
Corequisites: None

This course is a survey of the healthcare insurance system. Emphasis is placed on the foundation necessary for understanding the healthcare delivery system, terminology and practices of healthcare insurance, and provider reimbursement. Upon completion, students should have an understanding of healthcare insurance and how outcomes are addressed through healthcare informatics.

HBI 289  HBI Project  
Prerequisites: HBI-250
Corequisites: None

This course provides an opportunity to complete a significant healthcare business informatics project with minimal instructor assistance. Emphasis is placed on written and oral communication skills, project definition, documentation, installation, testing, presentation, and user training. Upon completion, students should be able to complete a healthcare informatics project from the definition phase through implementation.

HEA 111  First Aid & Safety  
Prerequisites: None
Corequisites: None

This course provides first aid and safety education. Emphasis is placed on safe attitudes, accident prevention, and response to accidents and injuries. Upon completion, students should be able to demonstrate proper first aid and safety skills.

HET 110  Diesel Engines  
Prerequisites: TRN 110
Corequisites: MRN 121

This course introduces theory, design, terminology, and operating adjustments for diesel engines. Emphasis is placed on safety, theory of operation, inspection, measuring, and rebuilding diesel engines according to factory specifications. Upon completion, students should be able to measure, diagnose problems, and repair diesel engines.

HET 114  Power Trains  
Prerequisites: None
Corequisites: None

This course introduces power transmission devices. Topics include function and operation of gears, chains, clutches, planetary gears, drive lines, differentials, and transmissions. Upon completion, students should be able to identify, research specifications, repair, and adjust power train components.

HET 115  Electronic Engines  
Prerequisites: TRN 120
Corequisites: None

This course introduces the principles of electronically controlled diesel engines. Emphasis is placed on testing and adjusting diesel engines in accordance with manufacturers’ specifications. Upon completion, students should be able to diagnose, test, and calibrate electronically controlled diesel engines.

HET 125  Preventive Maintenance  
Prerequisites: None
Corequisites: None

This course introduces preventive maintenance practices used on medium and heavy duty vehicles and rolling assemblies. Topics include preventive maintenance schedules, services, DOT rules and regulations, and roadability. Upon completion,

COURSE DESCRIPTIONS

HIS 122* Western Civilization II 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None

This course introduces western civilization from the early modern era to the present. Topics include the religious wars, the Industrial Revolution, World Wars I and II, and the Cold War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in modern western civilization.

HIS 131* American History I 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  a. Required placement test score(s))
Corequisites: None

This course is a survey of American history from pre-history through the Civil War era. Topics include the migrations to the Americas, the colonial and revolutionary periods, the development of the Republic, and the Civil War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in early American history. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

HIS 132* American History II 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None

This course is a survey of American history from the Civil War era to the present. Topics include industrialization, immigration, the Great Depression, the major American wars, the Cold War, and social conflict. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in American history since the Civil War. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

HIS 221* African-American History 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None

This course covers African-American history from the Colonial period to the present. Topics include African origins, the slave trade, the Civil War, Reconstruction, the Jim Crow era, the civil rights movement, and contributions of African Americans. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the history of African Americans.

HIS 227* Native American History 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None

This course surveys the history and cultures of Native Americans from pre-history to the present. Topics include Native American civilizations, relations with Europeans, and the continuing evolution of Native American cultures. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments among Native Americans.

HIS 228* History of the South 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None

This course covers the origin and development of the South as a distinct region of the United States. Emphasis is placed on Southern identity and its basis in cultural, social, economic, and political developments during the 19th and 20th centuries. Upon completion, students should be able to identify and analyze the major cultural, social, economic, and political developments in the South.

HIS 229* History of the Old South 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  a. Required placement test score(s))
Corequisites: None

This course is a study of the development of the South from European settlement through the Civil War. Topics include the multi-ethnic character of colonization, the plantation economy, relations between social classes, the nature of slavery, and issues leading to the Civil War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the antebellum South.
This course covers landscape principles and practices for residential and commercial sites. Emphasis is placed on drafting, site analysis, and common elements of good design, plant material selection, and proper plant utilization (encouraged use of native plants and discouraged use of invasive species). Upon completion, students should be able to read plans and draft a landscape design according to sustainable practices.

HOR 114 Landscape Construction  
Prerequisites: None  
Corequisites: None

This course introduces the design and fabrication of landscape structures/features. Emphasis is placed on safety, tool identification and use, material selection, construction techniques, and fabrication. Upon completion, students should be able to design and construct common landscape structures/features.

HOR 134 Greenhouse Operations  
Prerequisites: None  
Corequisites: None

This course covers the principles and procedures involved in the operation and maintenance of greenhouse facilities. Emphasis is placed on the operation of greenhouse systems, including the environmental control, record keeping, scheduling, and production practices. Upon completion, students should be able to demonstrate the ability to operate greenhouse systems and facilities to produce greenhouse crops.

HOR 160 Plant Materials I  
Prerequisites: None  
Corequisites: None

This course covers identification, culture, characteristics, and use of plants in a sustainable landscape. Emphasis is placed on nomenclature, identification, growth requirements, cultural requirements, soil preferences, and landscape applications. Upon completion, students should be able to demonstrate knowledge of the proper selection and utilization of plant materials, including natives and invasive plants.

HOR 161 Plant Materials II  
Prerequisites: HOR 160  
Corequisites: None

This course provides a supplementary opportunity to cover identification, culture, characteristics, and use of plants in a sustainable landscape, giving students a broader knowledge of available landscape plants for utilization in landscapes and plant production. Emphasis is placed on nomenclature, identification, growth requirements, cultural requirements, soil preferences, landscape applications and expansion of the plant palette. Upon completion, students should be able to demonstrate knowledge of the proper selection and utilization of plant materials, including natives and invasive plants.

HOR 164 Hort Pest Management  
Prerequisites: None  
Corequisites: None

This course covers the identification and management of plant pests including insects, diseases, and weeds. Topics include pest identification and beneficial organisms, pesticide application safety and use of least toxic methods of management. Upon completion, students should be able to manage common landscape pests using least toxic methods of control and be prepared to sit for North Carolina Commercial Pesticide Ground Applicators license.

HOR 213 Landscape Design II  
Prerequisites: HOR 112  
Corequisites: None

This course covers residential and commercial landscape design, cost analysis, and installation. Emphasis is placed on job cost estimates, installation of the landscape design, and maintenance techniques. Upon completion, students should be able to read landscape design blueprints, develop cost estimates, and implement the design.

HOR 235 Greenhouse Production  
Prerequisites: None  
Corequisites: None

This course covers the production of greenhouse crops. Emphasis is placed on product selection and production based on market needs and facility availability, including record keeping. Upon completion, students should be able to select and make production schedules to successfully produce greenhouse crops.

HOR 257 Arboriculture Practices  
Prerequisites: HOR 160 or LSG 111  
Corequisites: None

This course covers the culture and maintenance of trees and shrubs. Topics include fertilization, pruning, approved climbing techniques, pest control, and equipment use and safety. Upon completion, students should be able to properly prune trees and shrubs and perform arboricultural practices.

HOR 260 Plant Materials II  
Prerequisites: HOR 160  
Corequisites: None

This course covers important landscape plants. Emphasis is placed on identification, plant nomenclature, growth characteristics, culture requirements, and landscape uses. Upon completion, students should be able to demonstrate knowledge of the proper selection and utilization of plant materials.

HRM 230 Club & Resort Management
Prerequisites: None
Corequisites: None
This course introduces specific principles of managing a hospitality operation in a resort or club setting. Topics include operational efficiencies, resort and club marketing, recreational and sport activity management, and retail management. Upon completion, students should be able to demonstrate an understanding of the specialized skills involved in resort and club management.

HRM 240 Marketing for Hospitality
Prerequisites: None
Corequisites: None
This course covers planning, organizing, directing, and analyzing the results of marketing programs for the hospitality industry. Emphasis is placed on target marketing, marketing mix, analysis, product and image development, use of current media, sales planning, advertising, public relations, and collateral materials. Upon completion, students should be able to apply the marketing process as it relates to the hospitality industry.

HRM 245 Human Resource Mgmt-Hosp
Prerequisites: None
Corequisites: None
This course introduces a systematic approach to human resource management in the hospitality industry. Topics include training/development, staffing, selection, hiring, recruitment, evaluation, benefit administration, employee relations, labor regulations/laws, discipline, motivation, productivity, shift management, contract employees and organizational culture. Upon completion, students should be able to apply human resource management skills for the hospitality industry.

HRM 260 Procurement for Hosp
Prerequisites: None
Corequisites: None
This course provides information for management decisions regarding needs analysis and fulfillment for hospitality operations. Emphasis is placed on supply chain sourcing, environmental impacts, procurement technologies, and packaging of products such as food, beverages, supplies, furniture, and equipment. Upon completion, students should be able to demonstrate competence in planning and executing the procurement function.

HRM 275 Leadership-Hospitality
Prerequisites: None
Corequisites: None
This course introduces leadership traits, styles, and the roles and responsibilities of successful hospitality leaders while developing the student’s personal leadership skills. Topics include formal and informal hospitality leadership; defining effective and ineffective leadership behavior; and leadership organizational change and planning within the hospitality industry. Upon completion, students will be able to apply appropriate leadership actions in real-world situations ranging from local to global hospitality environments.

HRM 280 Mgmt Problems-Hospitality
Prerequisites: HRM 110
Corequisites: None
This course is designed to introduce students to timely issues within the hospitality industry and is intended to move students into a managerial mindset. Emphasis is placed on problem-solving skills using currently available resources. Upon completion, students should be able to demonstrate knowledge of how hospitality management principles may be applied to real challenges facing industry managers.

HRM 285 Service Projects-Hosp
Prerequisites: None
Corequisites: None
This course introduces the application of hospitality management through engaging in community service. Emphasis is placed on problem solving skills, critical thinking, and applying academic concepts while using limited resources. Upon completion, students should be able to plan and execute hospitality-related projects that meet community needs.

HUM 110* Technology and Society
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None
This course considers technological change from historical, artistic, and philosophical perspectives and its effect on human needs and concerns. Emphasis is placed on the causes and consequences of technological change. Upon completion, students should be able to critically evaluate the implications of technology.

HUM 115* Critical Thinking
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 090 and ENG 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
  d. Required placement test score(s)
Corequisites: None
This course introduces the use of critical thinking skills in the context of human conflict. Emphasis is placed on evaluating information, problem solving, approaching cross-cultural perspectives, and resolving controversies and dilemmas. Upon
completion, students should be able to demonstrate orally and in writing the use of critical thinking skills in the analysis of appropriate texts.

This course covers legally enforceable agreements, forms of organization, and selected portions of the Uniform Commercial Code. Topics include drafting and enforcement of contracts, leases, and related documents and selection and implementation of business organization forms, sales, and commercial papers. Upon completion, students should be able to apply the elements of a contract, prepare various business documents, and understand the role of commercial paper.

This course is a continuation of LEX 150 and covers advanced topics in Business and Commercial Law. Topics include agency and employment, insurance, computer law, intellectual property, personal property and bailment, corporate organizations and bankruptcy. Upon completion, students will understand and be able to apply legal principles governing these topics and be able to draft a variety of financial instruments.

This course introduces substantive criminal law and procedural rights of the accused. Topics include elements of state/federal crimes, defenses, constitutional issues, pre-trial and trial process, and other related topics. Upon completion, students should be able to explain elements of specific crimes and assist an attorney in preparing a criminal case.

This course covers the scope, authority, and regulatory operations of various federal, state, and local administrative agencies. Topics include social security, worker’s compensation, unemployment, zoning, and other related topics. Upon completion, students should be able to research sources of administrative law, investigate, and assist in representation of clients before administrative agencies.

This course introduces the study of real property law. Topics include the distinction between real and personal property, various estates, mechanics of conveyance and encumbrance, recordation, special proceedings, and other related topics. Upon completion, students should be able to identify estates, forms of deeds, requirements for recording, and procedures to enforce rights to real property.

This course continues the study of real property law relating to title examination and preparation of closing documents. Topics include use of courthouse and other public records in title examination and preparation of documents required in real estate transactions and closings. Upon completion, students should be able to plot/draft a description, perform complete title examination, draft closing documents including title insurance forms, and prepare disbursement reconciliation.

This course introduces the fundamentals of investigation. Topics include compiling/assembling data for cases; investigative planning/information gathering techniques; locating/interviewing witnesses; collection/preserving/evaluating sufficiency/admissibility of evidence; preparation of reports; and evidence presentation at depositions/court proceeding. Upon completion, students should be able to plan/use investigative checklists, understand/demonstrate investigative techniques, prepare reports, and enhance verbal and interpersonal communications skills and interviewing techniques.

This course covers laws governing domestic relations. Topics include marriage, separation, divorce, child custody, support, property division, adoption, domestic violence, and other related topics. Upon completion, students should be able to interview clients, gather information, and draft documents related to family law.

This course covers various types of wills, trusts, probate, estate administration, and intestacy. Topics include types of wills and execution requirements, caveats and dissents, intestate succession, inventories and accountings, distribution and settlement, and other related topics. Upon completion, students should be able to draft simple wills, prepare estate forms, understand administration of estates including taxation, and explain terms regarding trusts.
**LEX 260 Bankruptcy & Collections** 3 0 0 3
Prerequisites: None
Corequisites: None

This course provides an overview of the laws of bankruptcy and the rights of creditors and debtors. Topics include bankruptcy procedures and estate management, attachment, claim and delivery, repossession, foreclosure, collection, garnishment, and post-judgment collection procedure. Upon completion, students should be able to prepare and file bankruptcy forms, collection letters, statutory liens, and collection of judgments.

**LEX 270 Law Office Mgt/Technology** 1 2 0 2
Prerequisites: None
Corequisites: None

This course provides an overview of law office management and organization. Topics include office forms, filing systems, billing/time keeping, computer systems, calendar systems, library administration, case management, office/personnel procedures, ethics, and technology. Upon completion, students should be able to set up and maintain various law office systems, monitor case progress, and supervise non-lawyer personnel.

**LEX 271 Law Office Writing** 1 2 0 2
Prerequisites: None
Corequisites: None

This course covers the basics of writing for the law office including the drafting of general correspondence, the briefing of cases, and the preparation of settlement brochures. Emphasis is placed on legal vocabulary in the context of letter writing, briefing judicial opinions, and the preparation of the settlement brochure. Upon completion, students should be able to draft letters to clients, opposing counsel, government entities, and insurance companies and prepare the settlement brochure.

**LEX 280 Ethics & Professionalism** 2 0 0 2
Prerequisites: None
Corequisites: None

This course reinforces legal ethics and the role of the paralegal in a professional work environment. Topics include a review of ethics, employment opportunities, and search techniques; paralegal certification; and other related topics. Upon completion, students should be able to understand the paralegal’s role in the ethical practice of law.

**LEX 287 CLA Review Seminar** 2 0 0 2
Prerequisites: LEX 210, LEX 211
Corequisites: None

This course is designed to prepare students for voluntary national certification sponsored by the National Association of Legal Assistants to demonstrate significant competencies in paralegalism. Topics include Communications, Ethics, Human Relations, Interviewing Techniques, Judgment and Analytical Analysis, Legal Research, Legal Terminology, General Law and nine tested specialty areas of law. Upon completion, students should be able to demonstrate that they are eligible to take the NALA's Certified Legal Assistant Exam.

**LEX 289 U.S. Constitutional Law** 2 2 0 3
Prerequisites: LEX 110, LEX 120, and LEX 140
Corequisites: None

This course covers the creation, content, and interpretation of the Constitution of the United States and its amendments as it relates to civil law and practice. Topics include constitutional formation, structure, court interpretation and the implication of legal decision for legal practitioners. Upon completion, students should be able to discuss the formation of the Constitution, its interpretation and application to the practice of civil law.

**LSG 111 Basic Landscape Tech** 2 0 0 2
Prerequisites: None
Corequisites: LSG 121 or LSG 122 or LSG 123

This course introduces basic principles essential to sustainable landscape gardening. Topics include soils, propagation, watering, fertilizing, pruning, pest control, and planting. Upon completion, students should be able to perform basic sustainable gardening techniques essential to maintaining a sustainable landscape.

**LSG 121 Fall Gardening Lab** 0 6 0 2
Prerequisites: None
Corequisites: LSG 111

This course provides basic hands-on experience in fall gardening techniques. Emphasis is placed on pruning, irrigation, planting, fertilizing, pest control, equipment operation, and turf maintenance. Upon completion, students should be able to perform various techniques essential to maintaining the fall landscape.

**LSG 122 Spring Gardening Lab** 0 6 0 2
Prerequisites: None
Corequisites: None

This course provides basic hands-on experience in spring gardening techniques by performing practical hands-on exercises required for the spring season. Emphasis is placed on pruning, irrigation, planting, fertilizing, pest control, equipment operation, turf maintenance, and landscape construction. Upon completion, students should be able to satisfactorily perform various practices essential to maintaining the landscape in the spring season.

**LSG 123 Summer Gardening Lab** 0 6 0 2
Prerequisites: None
Corequisites: None

This course provides basic hands-on experience in summer gardening techniques. Emphasis is placed on pruning, irrigation,
planning, fertilizing, pest control, equipment operation, turf maintenance, landscape construction, and maintaining fruits and vegetables. Upon completion, students should be able to perform various techniques essential to maintaining the summer landscape.

**LSG 231 Landscape Supervision**  
2 6 0 4  
Prerequisites: LSG 123 and HOR 260  
Corequisites: None

This course provides experience in planning, implementing, and supervising various landscape management projects. Emphasis is placed on supervisory skills, organizing, and scheduling. Upon completion, students should be able to supervise employees in various landscape management jobs.

**LSG 232 Garden Management**  
1 2 0 2  
Prerequisites: LSG 123 and HOR 161  
Corequisites: None

This course covers the implementation of knowledge gained in previous landscape gardening courses. Emphasis is placed on scheduling, designing, renovation, and plant management. Upon completion, students should be able to collate the material learned in the Landscape Gardening curriculum and apply it to various landscape gardening situations.

**MAC 111 Machining Technology I**  
2 12 0 6  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 080  
b. Grade of “C” or better in ENG 085  
c. Grade of “C” or better in DRE 097  
d. Required placement test score(s)  
Corequisites: None

This course introduces machining operations as they relate to the metalworking industry. Topics include machine shop safety, measuring tools, lathes, drilling machines, saws, milling machines, bench grinders, and layout instruments. Upon completion, students should be able to safely perform the basic operations of measuring, layout, drilling, sawing, turning, and milling.

**MAC 112 Machining Technology II**  
2 12 0 6  
Prerequisites: MAC 111  
Corequisites: None

This course provides additional instruction and practice in the use of precision measuring tools, lathes, milling machines, and grinders. Emphasis is placed on setup and operation of machine tools including the selection and use of work holding devices, speeds, feeds, cutting tools, and coolants. Upon completion, students should be able to perform basic procedures on precision grinders and advanced operations of measuring, layout, drilling, sawing, turning, and milling.

**MAC 113 Machining Technology III**  
2 12 0 6  
Prerequisites: MAC 112 and MEC 231  
Corequisites: None

This course provides an introduction to advanced and special machining operations. Emphasis is placed on working to specified tolerances with special and advanced setups. Upon completion, students should be able to produce a part to specifications. This class will also incorporate practical applications of computer numerical control programming and operations.

**MAC 121 Intro to CNC**  
2 0 0 2  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 080  
b. Grade of “C” or better in ENG 085  
c. Grade of “C” or better in DRE 097  
d. Required placement test score(s)  
Corequisites: None

This course introduces the concepts and capabilities of computer numerical control machine tools. Topics include setup, operation, and basic applications. Upon completion, students should be able to explain operator safety, machine protection, data input, program preparation, and program storage.

**MAC 122 CNC Turning**  
1 3 0 2  
Prerequisites: MAC 124  
Corequisites: None

This course introduces the programming, setup, and operation of CNC turning centers. Topics include programming formats, control functions, program editing, part production, and inspection. Upon completion, students should be able to manufacture simple parts using CNC turning centers.

**MAC 124 CNC Milling**  
1 3 0 2  
Prerequisites: (MAC 111 and MAC 121) OR (MEC 111 and MAC 121)  
Corequisites: None

This course introduces the manual programming, setup, and operation of CNC machining centers. Topics include programming formats, control functions, program editing, part production, and inspection. Upon completion, students should be able to manufacture simple parts using CNC machining centers.
This course covers advanced methods in setup and operation of CNC turning centers. Emphasis is placed on gear ratios, lead screws, indexing problems, and interpretation of complex parts. Upon completion, students should be able to design and build simple jigs and fixtures. Additionally, computer aided manufacturing software, along with computer controlled machine tools will be used in order to design and manufacture jigs and fixtures.

MAC 242 Jigs & Fixtures II 1 9 0 4
Prerequisites: MAC 241
Corequisites: None

This course provides continued study in the application of jigs and fixtures. Emphasis is placed on design and manufacture of complex jigs and fixtures. Upon completion, students should be able to design and build complex jigs and fixtures. Additionally, computer aided manufacturing software, along with computer controlled machine tools, will be used in order to design and manufacture jigs and fixtures.

MAC 245 Mold Construction I 2 6 0 4
Prerequisites: MEC 232
Corequisites: None

This course introduces the principles of mold making. Topics include types, construction, and application of molds. Upon completion, students should be able to design and build simple molds.

MAC 248 Production Procedures 1 2 0 2
Prerequisites: MAC 113 and MAC 152
Corequisites: None

This course covers product planning and control and scheduling and routing of operations. Topics include cost-effective production methods, dimensional and statistical quality control, and the tooling and machines required for production. Upon completion, students should be able to plan, set up, and produce cost-effective quality machined parts.
COURSE DESCRIPTIONS

MAT 101 Applied Mathematics I
Prerequisites: Grade of “C” or better in MAT 060 or MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of DMA 010, DMA 020, and DMA 030
Corequisites: None

This course is a comprehensive review of arithmetic with basic algebra designed to meet the needs of certificate and diploma programs. Topics include arithmetic and geometric skills used in measurement, ratio and proportion, exponents and roots, applications of percent, linear equations, formulas, and statistics. Upon completion, students should be able to solve practical problems in their specific areas of study.

MAT 110 Math Measurement & Literacy
Prerequisites: DMA 010, DMA 020, DMA 030
Corequisites: None

This course provides an activity-based approach that develops measurement skills and mathematical literacy using technology to solve problems for non-math intensive programs. Topics include unit conversions and estimation within a variety of measurement systems; ratio and proportion; basic geometric concepts; financial literacy; and statistics including measures of central tendency, dispersion, and charting of data. Upon completion, students should be able to demonstrate the use of mathematics and technology to solve practical problems, and to analyze and communicate results.

MAT 115 Mathematical Models
Prerequisites: a. Grade of “C” or better in MAT 060 OR successful completion of DMA 010, DMA 020, and DMA 030
b. A grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 161 or MAT 171 or MAT 175 or successful completion of DMA 040 and DMA 050
Corequisites: None

This course develops the ability to utilize mathematical skills and technology to solve problems at a level found in non-mathematics-intensive programs. Topics include applications to percent, ratio and proportion, formulas, statistics, functional notation, linear functions, probability, sampling techniques, scatter plots, and modeling. Upon completion, students should be able to solve practical problems, reason and communicate with mathematics, and work confidently, collaboratively, and independently.

MAT 120 Geometry and Trigonometry
Prerequisites: a. Grade of “C” or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030
b. Proficiency in Elementary Algebra. A grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 121 or MAT 161 or MAT 171 or MAT 175 or successful completion of DMA 040
Corequisites: None

This course introduces the concepts of plane trigonometry and geometry with emphasis on applications to problem solving. Topics include the basic definitions and properties of plane and solid geometry, area and volume, right triangle trigonometry, and oblique triangles. Upon completion, students should be able to solve applied problems both independently and collaboratively using technology.

MAT 121 Algebra/Trigonometry I
Prerequisites: a. Grade of “C” or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030
b. Grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of DMA 040 DMA 050 and DMA 060
Corequisites: None

This course provides an integrated approach to technology and the skills required to manipulate, display, and interpret mathematical functions and formulas used in problem solving. Topics include simplification, evaluation, and solving of algebraic and radical functions; complex numbers; right triangle trigonometry; systems of equations; and the use of technology. Upon completion, students should be able to demonstrate an understanding of the use of mathematics and technology to solve problems and analyze and communicate results.

MAT 122 Algebra/Trigonometry II
Prerequisites: MAT 121
Corequisites: None

This course extends the concepts covered in MAT 121 to include additional topics in algebra, function analysis, and trigonometry. Topics include exponential and logarithmic functions, translation and scaling of functions, Sine Law, Cosine Law, complex numbers, vectors, and statistics. Upon completion, students should be able to demonstrate an understanding of the use of technology to solve problems and to analyze and communicate results.
This course provides an introduction in a non-technical setting to selected topics in mathematics. Topics may include, but are not limited to, sets, logic, probability, statistics, matrices, mathematical systems, geometry, topology, mathematics of finance, and modeling. Upon completion, students should be able to understand a variety of mathematical applications, think logically, and be able to work collaboratively and independently.

**MAT 141* Mathematical Concepts I** 3 0 0 3

Prerequisites: a. Grade of “C” or better in MAT 060 or successful completion of DMA010, DMA020, and DMA 030
b. Grade of “C” or better in MAT 070 or MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 161 or MAT 171 or MAT 175 or successful completion of DMA 040

Corequisites: None

This course is the first of a two-course sequence that develops a deeper understanding and appreciation of the basic concepts of mathematics. Emphasis is placed on sets, logic, number bases, elementary number theory, introductory algebra, measurement including metrics, and problem solving. Upon completion, students should be able to communicate orally and in writing these basic mathematical concepts.

**MAT 142* Mathematical Concepts II** 3 0 0 3

Prerequisites: MAT 141

Corequisites: None

This course is the second of a two-course sequence that develops a deeper understanding and appreciation of the basic concepts of mathematics. Emphasis is placed on probability, statistics, functions, introductory geometry, and mathematics of finance. Upon completion, students should be able to communicate orally and in writing these basic mathematical concepts and utilize technology as a mathematical tool.

**MAT 143* Quantitative Literacy** 2 2 0 3

Prerequisites: Completion of one of the following:

a. Grade of “C” or better in MAT 060 or successful completion of DMA010, DMA020, and DMA 030
b. Grade of “C” or better in MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 161 or MAT 171 or MAT 175 or successful completion of DMA 040 and DMA 050
c. DRE 098

Corequisites: None

This course is designed to engage students in complex and realistic situations involving the mathematical phenomena of quantity, change and relationship, and uncertainty through project- and activity-based assessment. Emphasis is placed on authentic contexts which will introduce the concepts of numeracy, proportional reasoning, dimensional analysis, rates of growth, personal finance, consumer statistics, practical probabilities, and mathematics for citizenship. Upon completion, students should be able to utilize quantitative information as consumers and to make personal, professional, and civic decisions by decoding, interpreting, using, and communicating quantitative information found in modern media and encountered in everyday life. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

**MAT 152* Statistical Methods I** 3 2 0 4

Prerequisites: Completion of one of the following:

a. Grade of “C” or better in MAT 060 or successful completion of DMA010, DMA020, and DMA 030
b. Grade of “C” or better in MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 or MAT 161 or MAT 171 or MAT 175 or successful completion of DMA 040 and DMA 050

OR Required placement test score(s)

Corequisites: None

This course provides a project-based approach to introductory statistics with an emphasis on using real-world data and statistical literacy. Topics include descriptive statistics, correlation and regression, basic probability, discrete and continuous probability distributions, confidence intervals and hypothesis testing. Upon completion, students should be able to use appropriate technology to describe important characteristics of a data set, draw inferences about a population from sample data, and interpret and communicate results. This is a Universal
COURSE DESCRIPTIONS

General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

MAT 155 Statistical Analysis
Prerequisites: Proficiency in Reading
Completion of one of the following:
  a. Grade of “C” or better in RED 090
  b. Grade of “C” or better in ENG 095
  c. Grade of “C” or better in DRE 098
AND
  a. A grade of “C” or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030
  b. A grade of “C” or better in MAT 080 or MAT 090 or MAT 095 or successful completion of one of the following: MAT 120 or MAT 121 MAT 171 or successful completion of DMA 040 and DMA 050
OR Required placement test score(s)
Corequisites: None

This course is an introduction to descriptive and inferential statistics. Topics include sampling, distributions, plotting data, central tendency, dispersion, Central Limits Theorem, confidence intervals, hypothesis testing, correlations, regressions, and multinomial experiments. Upon completion, students should be able to describe data and test inferences about populations using sampling data.

MAT 171* Precalculus Algebra
Prerequisites:
  a. DMA 010, DMA 020, DMA 030, DMA 040, DMA 050, DMA 060, DMA 070, DMA 080 OR
  b. DMA 010, DMA 020, DMA 030, DMA 050, DMA 065 OR
  c. MAT 121
Corequisites: None

This course is designed to develop topics which are fundamental to the study of Calculus. Emphasis is placed on solving equations and inequalities, solving systems of equations and inequalities, and analysis of functions (absolute value, radical, polynomial, rational, exponential, and logarithmic) in multiple representations. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to algebra-related problems with and without technology. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

MAT 172* Precalculus Trigonometry
Prerequisites: MAT 171
Corequisites: None

This is the second of two courses designed to emphasize topics which are fundamental to the study of calculus. Emphasis is placed on properties and applications of transcendental functions and their graphs, right and oblique triangle trigonometry, conic sections, vectors and polar coordinates. Upon completion, students should be able to solve practical problems and use appropriate models for analysis and prediction. This is a

Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

MAT 175 Precalculus
Prerequisites:
  a. A grade of “C” or better in MAT 060 or successful completion of DMA 010, DMA 020, and DMA 030
  b. A grade of “C” or better in MAT 080 or MAT 090 or MAT 095 or successful completion of MAT 161 or successful completion of DMA 040, DMA 050, DMA 060, DMA 070, and DMA 080
Corequisites: None

This course provides an intense study of the topics which are fundamental to the study of calculus. Emphasis is placed on functions and their graphs with special attention to polynomial, rational, exponential, logarithmic and trigonometric functions, and analytic trigonometry. Upon completion, students should be able to solve practical problems and use appropriate models for analysis and prediction.
(It is recommended that students take high school Algebra III/Trigonometry or its equivalent before they enroll in MAT 175.)

MAT 263* Brief Calculus
Prerequisites: MAT 171
Corequisites: None

This course is designed for students needing only one semester of calculus. Topics include functions, graphing, differentiation, and integration with emphasis on applications drawn from business, economics, and biological and behavioral sciences. Upon completion, students should be able to demonstrate an understanding of the use of basic calculus and technology to solve problems and to analyze and communicate results. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

MAT 271* Calculus I
Prerequisites: MAT 172
Corequisites: None

This course covers in depth the differential calculus portion of a three-course calculus sequence. Topics include limits, continuity, derivatives, and integrals of algebraic and transcendental functions of one variable, with applications. Upon completion, students should be able to apply differentiation and integration techniques to algebraic and transcendental functions. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

MAT 272* Calculus II
Prerequisites: MAT 271
Corequisites: None

This course provides a rigorous treatment of integration and is the second calculus course in a three-course sequence. Topics include applications of definite integrals, techniques of integration, indeterminate forms, improper integrals, infinite

This course covers the calculus of several variables and is third calculus course in a three-course sequence. Topics include functions of several variables, partial derivatives, multiple integrals, solid analytical geometry, vector-valued functions, and line and surface integrals. Upon completion, students should be able to solve problems involving vectors and functions of several variables.

This course introduces shop safety, hand tools, machine processes, measuring instruments, and the operation of machine shop equipment. Topics include use and care of tools, safety, measuring tools, and the basic setup and operation of common machine tools. Upon completion, students should be able to safely machine simple parts to specified tolerances.

This course introduces the purpose and action of various mechanical devices. Topics include cams, cables, gear trains, differentials, screws, belts, pulleys, shafts, levers, lubricants, and other devices used to transmit or control signals. Upon completion, students should be able to analyze, maintain, and troubleshoot the components of mechanical systems.

This course covers the physical behavior of fluids and fluid systems. Topics include fluid statics and dynamics, laminar and turbulent flow, Bernoulli’s Equation, components, applications, and other related topics. Upon completion, students should be able to apply fluid power principles to practical applications.

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.
COURSE DESCRIPTIONS

MED 118 Medical Law and Ethics  
Prerequisites: None  
Corequisites: None  
2 0 0 2

This course covers legal relationships of physicians and patients, contractual agreements, professional liability, malpractice, medical practice acts, informed consent, and bioethical issues. Emphasis is placed on legal terms, professional attitudes, and the principles and basic concepts of ethics and laws involved in providing medical services. Upon completion, students should be able to meet the legal and ethical responsibilities of a multi-skilled health professional.

MED 121 Medical Terminology I  
Prerequisites: Completion of one of the following:  
   a. Grade of “C” or better in RED 090  
   b. Grade of “C” or better in ENG 095  
   c. Grade of “C” or better in DRE 098  
   d. Required placement test score(s)  
Corequisites: None  
3 0 0 3

This course introduces prefixes, suffixes, and word roots used in the language of medicine. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders.

MED 122 Medical Terminology II  
Prerequisites: MED 121  
Corequisites: None  
3 0 0 3

This course is the second in a series of medical terminology courses. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders.

MKT 120 Principles of Marketing  
Prerequisites: None  
Corequisites: None  
3 0 0 3

This course introduces principles and problems of marketing goods and services. Topics include promotion, placement, and pricing strategies for products. Upon completion, students should be able to apply marketing principles in organizational decision making.

MKT 121 Retailing  
Prerequisites: None  
Corequisites: None  
3 0 0 3

This course examines the role of retailing in the economy. Topics include the development of present retail structure, functions performed, effective operations, and managerial problems resulting from current economic and social trends. Upon completion, students should be able to demonstrate an understanding of the basic principles of retailing.

MKT 123 Fundamentals of Selling  
Prerequisites: MKT 120  
Corequisites: None  
3 0 0 3

This course is designed to emphasize the necessity of selling skills in a modern business environment. Emphasis is placed on sales techniques involved in various types of selling situations. Upon completion, students should be able to demonstrate an understanding of the techniques covered.

MKT 223 Customer Service  
Prerequisites: None  
Corequisites: None  
3 0 0 3

This course stresses the importance of customer relations in the business world. Emphasis is placed on learning how to respond to complex customer requirements and to efficiently handle stressful situations. Upon completion, students should be able to demonstrate the ability to handle customer relations.

MKT 224 International Marketing  
Prerequisites: None  
Corequisites: None  
3 0 0 3

This course covers the basic concepts of international marketing activity and theory. Topics include product promotion, placement, and pricing strategies in the international marketing environment. Upon completion, students should be able to demonstrate a basic understanding of the concepts covered.

MNT 110 Intro to Maint Procedures  
Prerequisites: None  
Corequisites: None  
1 3 0 2

This course covers basic maintenance fundamentals for power transmission equipment. Topics include equipment inspection, lubrication, alignment, and other scheduled maintenance procedures. Upon completion, students should be able to demonstrate knowledge of accepted maintenance procedures and practices according to current industry standards.

MNT 111 Maintenance Practices  
Prerequisites: None  
Corequisites: None  
2 2 0 3

This course provides in-depth theory and practical applications relating to predictive and preventive maintenance programs. Emphasis is placed on equipment failure analysis, maintenance management software, and techniques such as vibration and infrared analysis. Upon completion, students should be able to demonstrate an understanding of modern analytical and documentation methods.
MNT 131 Metalworking Processes  2 3 0 3  
Prerequisites: None  
Corequisites: None  
This course introduces the standard practices that are found in a metal workshop. Topics include the proper care/use of basic hand tools and precision measuring instruments and layout procedures/operation of lathes, drill presses, grinders, milling machines, and power saws. Upon completion, students should be able to work safely in the metal workshop and use basic metalworking equipment.

MNT 220 Rigging & Moving  1 3 0 2  
Prerequisites: None  
Corequisites: None  
This course covers the principles of safe rigging practices for handling, placing, installing, and moving heavy machinery and equipment. Topics include safety, weight and dimensional estimation, positioning of equipment slings, rollers, jacks, levers, dollies, ropes, chains, padding, and other related topics. Upon completion, students should be able to safely relocate and set up equipment using accepted rigging practices.

MNT 230 Pumps & Piping Systems  1 3 0 2  
Prerequisites: None  
Corequisites: None  
This course covers pump installation and maintenance and related valves and piping systems. Topics include various types of pump systems and their associated valves, piping requirements, and other related topics. Upon completion, students should be able to select and install pump and piping systems and demonstrate proper maintenance and troubleshooting procedures.

MRN 121 Marine Engines  2 6 0 4  
Prerequisites: TRN 110  
Corequisites: HET 110  
This course covers two and four cycle diesel engines that are used for marine vessel propulsion. Emphasis is placed on construction, design, cooling systems, lubrication systems, and air-intake systems. Upon completion, students should be able to test, troubleshoot, diagnose and repair marine engine systems.

MRN 147 Marine Power Trans  3 6 0 4  
Prerequisites: None  
Corequisites: None  
This course covers the principles and function of marine power trains. Emphasis is placed on marine gears, drive lines, gear reduction, and installation aboard vessels. Upon completion, students should be able to test, service, and troubleshoot marine power trains.

MRN 150 Adv Marine Electrical Sys  2 9 0 5  
Prerequisites: TRN 120  
Corequisites: None  
This course covers the skills necessary to wire 12-volt direct current and 120-volt alternating current electrical systems found on modern boats and marine applications. Topics include wiring sizing, batteries, wire harnesses, distribution panels, electronic component installation, and electrical system troubleshooting, including generators operation and disassembly. Upon completion, students should be able to diagnose, test, and repair advanced electrical systems in marine applications and boats.

MSC 110 Training Cruise I  0 3 0 1  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 080  
b. Grade of “C” or better in ENG 085  
c. Grade of “C” or better in DRE 097  
d. Required placement test score(s)  
Corequisites: Full time Marine Technology enrollment or by permission of the department chair  
This course covers the skills necessary to live and work safely aboard ocean going research vessels. Emphasis is placed on the unique safety requirements aboard ocean going vessels and the skills needed for oceanographic work. Upon completion, students should be able to safely live and work aboard an oceanographic research vessel conducting offshore scientific operations.

MSC 112 Training Cruise II  0 3 0 1  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 080  
b. Grade of “C” or better in ENG 085  
c. Grade of “C” or better in DRE 097  
d. Required placement test score(s)  
Corequisites: Full time Marine Technology enrollment or by permission of the department chair  
This course covers the skills necessary to live and work safely aboard ocean going research vessels. Emphasis is placed on maintaining a 24-hour navigation log and weather watch and safely conducting over-the-side biological sampling operations. Upon completion, students should be able to maintain a weather log, plot a cruise track, and safely use biological sampling gear.

MSC 114 Training Cruise III  0 3 0 1  
Prerequisites: MSC 112 or MSC 110  
Corequisites: Full-time Marine Technology enrollment or by permission of the department chair  
This course covers the skills necessary to live and work safely aboard ocean going research vessels. Emphasis is placed on utilizing the navigational and hydrographical techniques needed to conduct an offshore bathymetric survey. Upon completion, students should be able to accurately navigate a vessel, gather bathymetric data, and prepare a depth contour plot of a predetermined quadrant.
COURSE DESCRIPTIONS

MSC 122 Boat Handling/Seamanship 2 3 0 3  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 080  
  b. Grade of “C” or better in ENG 085  
  c. Grade of “C” or better in DRE 097  
  d. Required placement test score(s)  
Corequisites: None  
This course covers the skills of boat handling, the practice of seamanship, and safety and survival in the marine environment. Topics include safe boat handling, seamanship under adverse conditions, fire fighting, man overboard rescue, PFDs, EPIRBs, distress signals, lifeboats, and life rafts. Upon completion, students should be able to demonstrate proficiency in the use of marine fire fighting and lifesaving equipment.

MSC 124 Industrial Skills 1 4 0 3  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 080  
  b. Grade of “C” or better in ENG 085  
  c. Grade of “C” or better in DRE 097  
  d. Required placement test score(s)  
Corequisites: None  
This course offers a practical approach to the mechanical and technical skills needed by technicians in a variety of marine-related jobs. Topics include industrial safety, measurement systems, hand and power tools, fasteners, corrosion protection, project design, and construction and cost estimation. Upon completion, students should be able to safely use hand and/or power tools and understand a variety of measurement and pricing systems.

MSC 126 Marine Engines 1 2 0 2  
Prerequisites: None  
Corequisites: None  
This course covers fundamental theory, troubleshooting, and maintenance of marine engines and related equipment, especially outboards. Emphasis is placed on maintenance and operational procedures, including corrosion control, lubrication, propellers, carburetors, two-cycle theory, magneto ignition, batteries, starters, alternators, and trailers. Upon completion, students should be able to understand how a marine engine and related components work, perform minor repairs, and properly maintain them.

MSC 132 Fishing Gear Tech I 2 3 0 3  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 080  
  b. Grade of “C” or better in ENG 085  
  c. Grade of “C” or better in DRE 097  
  d. Required placement test score(s)  
Corequisites: None  
This course introduces modern rope seamanship and fishing gear theory, design, repair, and analysis as it relates to fisheries research. Emphasis is placed on various practical knots, rope splicing, marine hardware, biological sampling gear classifications, and the basics of net construction, repair, and design. Upon completion, students should be able to implement marlinspike skills; repair netted material; and identify, design, and construct various types of biological entrapment and entanglement gear.

MSC 134 Fishing Gear Tech II 1 2 0 2  
Prerequisites: MSC 132  
Corequisites: None  
This course offers further experience and instruction in fishing gear theory and design and the collection and recording of biological data. Emphasis is placed on the general skills needed to design, construct, and repair complex sampling gear and be employed as a fisheries technician. Upon completion, students should be able to understand and apply fishing gear design and construction techniques and collect, compile, and record biological data.

MSC 150 Marine Navigation 2 3 0 3  
Prerequisites: Completion of one of the following:  
  a. Grade of “C” or better in RED 080  
  b. Grade of “C” or better in ENG 085  
  c. Grade of “C” or better in DRE 097  
  d. Required placement test score(s)  
Corequisites: None  
This course provides training in marine piloting and electronic navigation techniques. Topics include use of charts, instruments, navigational aids, compasses, nautical publications, RADAR, GPS, LORAN, and depth sounders, with an emphasis on plotting techniques. Upon completion, students should be able to demonstrate competence in the safe navigation of vessels utilizing and interpreting information obtained from navigational aids. Use of navigational computer software will also be introduced.

MSC 152 Marine Instrumentation 1 2 0 2  
Prerequisites: None  
Corequisites: None  
This course introduces the various types of oceanographic instrumentation used for the collection of data and samples by the oceanographic community. Emphasis is placed on data recording procedures, proper operation, safe handling, and calibration, maintenance, and repair of instruments. Upon completion, students should be able to safely and correctly use the instruments covered to conduct accurate field measurements.
This course introduces the basic concepts, processes, and techniques of photography with emphasis on marine applications. Topics include proper camera operation, composition, exposure, lighting techniques, and the processing of black and white films and papers. Upon completion, students should be able to demonstrate proficiency in the operation of a camera and portable lighting tools with consistent exposures and darkroom techniques.

**MSC 161 Advanced Marine Photography**
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 080
- Grade of “C” or better in ENG 085
- Grade of “C” or better in DRE 097
- Required placement test score(s)
Corequisites: None

This course provides a general description of the geology, chemistry, and physics of the oceans. Topics include a history of oceanography, bathymetry, plate tectonics, seawater chemistry and physics, atmospheric circulation, currents, waves, tides, sedimentation, and coastal geology. Upon completion, students should be able to describe bathymetric features, the chemistry and physics of seawater, atmospheric and ocean circulations, marine sediments, and coastal processes.

**MSC 162 Physical Oceanography**
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 080
- Grade of “C” or better in ENG 085
- Grade of “C” or better in DRE 097
- Required placement test score(s)
Corequisites: None

This course utilizes field trips to the beach, salt marsh, and other habitats to study marine animals and plants in their natural communities. Topics include divisions of the marine environment, distribution of life in the ocean, and the interrelationships of marine organisms in various habitats. Upon completion, students should be able to scientifically identify various marine species and describe the role they fill in their biological communities.

**MSC 163 Marine Biology**
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 080
- Grade of “C” or better in ENG 085
- Grade of “C” or better in DRE 097
- Required placement test score(s)
Corequisites: None

This course covers the behavior and classification of marine invertebrates. Topics include identification, feeding behavior, reproduction, and symbiotic relationships of marine invertebrates. Upon completion, students should be able to identify and classify marine invertebrates and demonstrate an understanding of their basic anatomy and physiology.

**MSC 164 Marine GIS**
Prerequisites: None
Corequisites: None

This course covers the practical analysis of water samples with an emphasis on marine-oriented techniques and procedures. Topics include basic laboratory skills, microbiology techniques, and the use of wet chemistry and instruments to quantify chemically and biologically important parameters. Upon completion, students should be able to culture microbes, and measure pH, salinity, turbidity, dissolved oxygen, and nutrients in natural water samples.

**MSC 165 Marine Technology**
Prerequisites: Completion of one of the following:
- Grade of “C” or better in RED 080
- Grade of “C” or better in ENG 085
- Grade of “C” or better in DRE 097
- Required placement test score(s)
Corequisites: None

This course covers the skills necessary to live and work safely aboard oceangoing research vessels. Emphasis is placed on conducting standard hydrographic stations using various oceanographic samplers. Upon completion, students should be able to set up and conduct a hydrographic station and collect accurate data using various types of marine instrumentation.

**MSC 166 Training Cruise IV**
Prerequisites: MSC 114, MSC 152 and (MSC 110 or MSC 112)
Corequisites: Full time Marine Technology enrollment or by permission of the department chair

This course covers the skills necessary to live and work safely aboard oceangoing research vessels. Emphasis is placed on conducting a broad range of oceanographic survey techniques, including chemical, meteorological, geological, physical, and biological surveys. Upon completion, students should be able to demonstrate competence in the skills required of a marine technician aboard an oceanographic or survey vessel.

**MSC 167 Training Cruise V**
Prerequisites: MSC 152 and (MSC 114 or MSC 216)
Corequisites: Full time Marine Technology enrollment by permission of the department chair

This course introduces students to the software and data components of a Geographic Information System. Topics include data collection, management, and analysis, and the creation of marine-based GIS maps. Upon completion, students should be able to use GIS software in marine applications.
### COURSE DESCRIPTIONS

**MSC 254 Marine Data Processing**
- **Prerequisites:** CIS 110 or CIS 111, MSC 152
- **Corequisites:** MSC 256

This course introduces standard oceanographic procedures used to process and analyze oceanographic data. Emphasis is placed on the use of standard recording procedures and computer applications for processing and analyzing oceanographic data. Upon completion, students should be able to record and analyze oceanographic data using standard procedures along with computer-based applications.

**MSC 256 Hydrographic Surveying**
- **Prerequisites:** CIS 110 or CIS 111, MSC 152
- **Corequisites:** MSC 254

This course covers basic hydrographic survey and cartography techniques as they apply to marine research. Topics include topographic map bathymetric chart basics, contours, elevations, depths, coordinate systems, survey instruments, data collection and processing, modeling, and field surveys. Upon completion, students should be able to use topographic and bathymetric maps as a research tool and set up and conduct a basic survey.

**MSC 258 CAD & Multimedia Display**
- **Prerequisites:** CIS 110 or CIS 111, MSC 154
- **Corequisites:** None

This course introduces and provides experience with a variety of technically oriented digital applications. Emphasis is placed on contemporary visual presentation methods and techniques, as well as on an introduction to plotting, editing, and file management with CAD software. Upon completion, students should be able to produce a computerized technical presentation using CAD software and create cross sections and profiles using CAD software.

**MSC 276 Marine Vertebrate Zoo**
- **Prerequisites:** None
- **Corequisites:** None

This course covers the behavior and classification of marine fishes, reptiles, birds, and mammals. Topics include identification, feeding behavior, reproduction, migration, and other marine vertebrate characteristics. Upon completion, students should be able to identify marine vertebrates and demonstrate an understanding of the methods marine vertebrates use to survive in the ocean.

**MUS 110* Music Appreciation**
- **Prerequisites:** None
- **Corequisites:** None

This course is a basic survey of the music of the Western world. Emphasis is placed on the elements of music, terminology, composers, form, and style within a historical perspective. Upon completion, students should be able to demonstrate skills in basic listening and understanding of the art of music.

<table>

**MUS 112* Introduction to Jazz**
- **Prerequisites:** None
- **Corequisites:** None

This course introduces the origins and musical components of jazz and the contributions of its major artists. Emphasis is placed on the development of discriminating listening habits, as well as the investigation of the styles and structural forms of the jazz idiom. Upon completion, students should be able to demonstrate skills in listening and understanding this form of American music. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

**MUS 113* American Music**
- **Prerequisites:** None
- **Corequisites:** None

This course introduces various musical styles, influences, and composers of the United States from pre-Colonial times to the present. Emphasis is placed on the broad variety of music particular to American culture. Upon completion, students should be able to demonstrate skills in basic listening and understanding of American music.

Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance.
COURSE DESCRIPTIONS

MUS 151* Class Music I
Prerequisites: None
Corequisites: None

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance.

MUS 152* Class Music II
Prerequisites: MUS 151
Corequisites: None

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance.

MUS 161* Applied Music I
Prerequisites: None
Corequisites: None

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. Colleges may use a letter suffix to designate a specific instrument or voice, for example MUS 161P for piano.

MUS 162* Applied Music II
Prerequisites: MUS 161
Corequisites: None

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. Colleges may use a letter suffix to designate a specific instrument or voice, for example MUS 162P for piano.

MUS 175 Recording Techniques I
Prerequisites: None
Corequisites: None

This course introduces the recording studio from an artistic and operational point of view. Emphasis is placed on audio consoles, microphones, multi-track recorders, and echo chambers. Upon completion, students should be able to demonstrate understanding of operation and function of recording equipment and its relationship to musician, sound engineer, and producer.

MUS 176 Recording Techniques II
Prerequisites: MUS 175
Corequisites: None

This course continues the study and application of recording techniques begun in MUS 175. Emphasis is placed on multi-track recording and mix-down, microphone placement, and patch bay function. Upon completion, students should be able to create projects demonstrating proficiency in the skills and use of the equipment studied.

MUS 210* History of Rock Music
Prerequisites: None
Corequisites: None

This course is a survey of Rock music from the early 1950’s to the present. Emphasis is placed on musical groups, soloists, and styles related to the evolution of this idiom and on related historical and social events. Upon completion, students should be able to identify specific styles and to explain the influence of selected performers within their respective eras.

MUS 211* History of Country Music
Prerequisites: None
Corequisites: None

This course introduces the varied origins of country music and the commercialization of this art form. Emphasis is placed on historical, sociocultural, and stylistic factors related to country music and musicians. Upon completion, students should be able to identify specific styles and explain the influence of pop culture on the development of country music.

MUS 212* American Musical Theatre
Prerequisites: None
Corequisites: None

This course covers the origins and development of the musical from Show Boat to the present. Emphasis is placed on the investigation of the structure of the musical and its components through listening and analysis. Upon completion, students should be able to demonstrate skills in listening and understanding this form of American music.

MUS 214* Electronic Music
Prerequisites: MUS 111
Corequisites: None

This course provides an opportunity to study and explore various electronic instruments and devices. Emphasis is placed on fundamental MIDI applications and implementation, features and application of sequences, sound modules, and digital keyboards. Upon completion, students should be able to demonstrate proficiency by creation of appropriate musical projects using the equipment and techniques covered.

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

NET 125 Networking Basics  
Prerequisites: None  
Corequisites: CIS 110  
This course introduces the networking field. Emphasis is placed on network terminology and protocols, local-area networks, wide-area networks, OSI model, cabling, router programming, Ethernet, IP addressing, and network standards. Upon completion, students should be able to perform tasks related to networking mathematics, terminology, and models, media, Ethernet, subnetting, and TCP/IP Protocols.

NET 126 Routing Basics  
Prerequisites: NET 125  
Corequisites: None  
This course focuses on initial router configuration, router software management, routing protocol configuration, TCP/IP, and access control lists (ACLs). Emphasis will be placed on the fundamentals of router configuration, managing router software, routing protocol, and access lists. Upon completion, students should have an understanding of routers and their role in WANs, router configuration, routing protocols, TCP/IP, troubleshooting, and ACLs.

NET 225 Routing & Switching I  
Prerequisites: NET 126  
Corequisites: None  
This course focuses on advanced IP addressing techniques, intermediate routing protocols, command-line interface configuration of switches, Ethernet switching, VLANs, STP, and VTP. Emphasis will be placed on application and demonstration of skills acquired in pre-requisite courses. Upon completion, students should be able to perform tasks related to VLSM, routing protocols, switching concepts and configuration, STP, VLANs, and VTP.

NET 226 Routing & Switching II  
Prerequisites: NET 225  
Corequisites: None  
This course introduces WAN theory and design, WAN technology, PPP, Frame Relay, ISDN, and additional case studies. Topics include network congestion problems, TCP/IP transport and network layer protocols, advanced routing and switching configuration, ISDN protocols, PPP encapsulation operations on a router. Upon completion, students should be able to provide solutions for network routing problems, identify ISDN protocols, and describe the Spanning Tree protocol.

NOS 110 Operating System Concepts  
Prerequisites: None  
Corequisites: CIS 110 or CIS 111  
This course introduces students to a broad range of operating system concepts, including installation and maintenance. Emphasis is placed on operating system concepts, management, maintenance, and resources required. Upon completion of this course, students will have an understanding of OS concepts, installation, management, maintenance, using a variety of operating systems.

NOS 130 Windows Single User  
Prerequisites: NOS 110 or CET 211  
Corequisites: None  
This course introduces operating system concepts for single-user systems. Topics include hardware management, file and memory management, system configuration/optimization, and utilities. Upon completion, students should be able to perform operating systems functions at the support level in a single-user environment.

NOS 230 Windows Admin I  
Prerequisites: NOS 130  
Corequisites: None  
This course covers the installation and administration of a Windows Server network operating system. Topics include managing and maintaining physical and logical devices, access to resources, the server environment, managing users, computers, and groups, and Managing/Implementing Disaster Recovery. Upon completion, students should be able to manage and maintain a Windows Server environment.

NUC 110 Nuclear Reactor Systems  
Prerequisites: Completion of one of the following:  
a. Grade of “C” or better in RED 090  
b. Grade of “C” or better in ENG 095  
c. Grade of “C” or better in DRE 098  
d. Required placement test score(s)  
Corequisites: None  
This course provides an introduction to nuclear power plants with emphasis on boiling water reactor (BWR) technology. Topics include the description and function of each major component of the primary and secondary systems of a BWR. Upon completion, students should be able to demonstrate a working knowledge of major BWR systems, including their application during refueling operations.

NUC 120 Nuclear Reactor Theory  
Prerequisites: NUC 110 and MAT 122 or MAT 172  
Corequisites: None  
This course covers the fundamental operating theory of boiling water reactors used by electric utilities. Topics include nuclear fission, radioactivity, radiation, reactivity effects from control rods, fission products, and the burnable poisons created during reactor steady-state and transient operations. Upon completion, students should be able to demonstrate a working knowledge of the neutron life cycle, reactor kinetics, reactivity coefficients, and the effects from xenon.
NUC 130 Applied NDE-Nuclear  
Prerequisites: Completion of one of the following:  
a. Take ENG 085 RED 080 MAT 121(S23927)  
b. Take RED 090 MAT 121(S23927)  
c. Take DRE 097 MAT 121(S23927)  
d. Take ENG-111(S24022) MAT 121(S23927)  
e. Take ENG 085 RED 080 MAT 171(S23934)  
f. Take RED 090 MAT 171(S23934)  
g. Take DRE 097 MAT 171(S23934)  
h. Take ENG-111(S24022) MAT 171(S23934)  
Corequisites: None  
This course introduces the principles of nondestructive examination (NDE) of the quality of stainless steel pipe, reactor vessel, and nozzle welds. Topics include practical applications of visual inspection along with dye penetrant, magnetic particle, ultrasonic, and radiographic testing, of acceptable and unacceptable welds. Upon completion, students should be able to select and apply the proper testing method to detect surface and subsurface flaws.

NUR 101 Practical Nursing I  
Prerequisites: Enrollment in the Practical Nursing program  
Corequisites: BIO 163, PSY 150  
This course introduces concepts as related to the practical nurse’s caregiver and discipline-specific roles. Emphasis is placed on the nursing process, legal/ethical/professional issues, wellness/illness patterns, and basic nursing skills. Upon completion, students should be able to demonstrate beginning understanding of nursing process to promote/maintain/restore optimum health for diverse clients throughout the life span.

NUR 102 Practical Nursing II  
Prerequisites: NUR 101, BIO 163, or BIO 168 and BIO 169, PSY 150  
Corequisites: PSY 241 and ENG 111  
This course includes more advanced concepts as related to the practical nurse’s caregiver and discipline-specific roles. Emphasis is placed on the nursing process, delegation, cost effectiveness, legal/ethical/professional issues, and wellness/illness patterns. Upon completion, students should be able to begin participating in the nursing process to promote/maintain/restore optimum health for diverse clients throughout the life span.

NUR 103 Practical Nursing III  
Prerequisites: NUR 102, PSY 241  
Corequisites: None  
This course focuses on use of nursing/related concepts by practical nurses as providers of care/members of discipline in collaboration with health team members. Emphasis is placed on the nursing process, wellness/illness patterns, entry-level issues, accountability, advocacy, professional development, evolving technology, and changing health care delivery systems. Upon completion, students should be able to use the nursing process to promote/maintain/restore optimum health for diverse clients throughout the life span.

NUR 107 LPN Refresher  
Prerequisites: Completion of an LPN program  
Verification of Previous Licensure as an LPN  
Corequisites: None  
This refresher course is designed to provide an independent didactic review for the previously licensed Practical Nurse whose license has lapsed. Emphasis is placed on common medical-surgical conditions and nursing approaches to their management, including mental health principles, pharmacological concepts, and safe clinical practice. Upon completion, students will be eligible to apply for reinstatement of licensure.

NUR 111 Intro to Health Concepts  
Prerequisites: Admission to ADN Program  
Corequisites: BIO 168, PSY 150  
This course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including medication administration, assessment, nutrition, ethics, interdisciplinary teams, informatics, evidence-based practice, individual-centered care, and quality improvement. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

NUR 112 Health-Illness Concepts  
Prerequisites: NUR 111, BIO 168, PSY 150  
Corequisites: BIO 169, PSY 241  
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of acid-base, metabolism, cellular regulation, oxygenation, infection, stress/coping, health-wellness-illness, communication, caring interventions, managing care, safety, quality improvement, and informatics. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

NUR 113 Family Health Concepts  
Prerequisites: NUR 111, NUR 114, PSY 241, BIO 169  
Corequisites: CIS 111  
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of oxygenation, sexuality, reproduction, grief/loss, mood/affect, behaviors, development, family, health-wellness-illness, communication, caring interventions, managing care, safety, and advocacy. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.
This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of cellular regulation, perfusion, inflammation, sensory perception, stress/coping, mood/affect, cognition, self, violence, health-wellness-illness, professional behaviors, caring interventions, and safety. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course.

This course introduces word processing concepts and applications. Topics include preparation of a variety of documents and mastery of specialized software functions. Upon completion, students should be able to work effectively in a computerized word processing environment.

This course introduces CPT and ICD coding as they apply to medical insurance and billing. Emphasis is placed on accuracy in coding, forms preparation, and posting. Upon completion, students should be able to describe the steps of the total billing cycle and explain the importance of accuracy.

This course is designed to be a capstone course for the office professional and provides a working knowledge of modern office procedures. Emphasis is placed on scheduling, telephone procedures, travel arrangements, event planning, office design, and ergonomics. Upon completion, students should be able to adapt in an office environment.

| **OTA 110 Fundamentals of OT** | 2 3 0 3 | | | | | |
| Prerequisites: Enrollment in the Occupational Therapy Assistant Program | | | | | Corequisites: OTA 120, OTA 140 and (BIO 165 or BIO 168) |

This course introduces occupational therapy theory, practice, philosophy, and principles. Emphasis is placed on providing a basic understanding of the profession as well as beginning to develop interaction and observation skills. Upon completion, students should be able to demonstrate basic understanding of OT practice options, uniform terminology, activity analysis, principles, process, philosophies, and frames of reference. Students will also begin exploration of medical terminology and abbreviations found within health care.

| **OTA 120 OT Media I** | 1 3 0 2 | | | | | |
| Prerequisites: Enrollment in the Occupational Therapy Assistant Program | | | | | Corequisites: OTA 110, OTA 140 |

This course provides training in recognizing the therapeutic value of and using a wide variety of leisure, self-care, and work activities. Topics include crafts, games, personal care and work activities, as well as teaching and learning methods and styles. Upon completion, students should be able to design, select, and complete/perform leisure, self-care, and work activities that would be therapeutic for designate client populations.

| **OTA 130 Assessment Skills** | 2 3 0 3 | | | | | |
| Prerequisites: OTA 120, OTA 140 | | | | | Corequisites: OTA 110, OTA 150, OTA 161, OTA 170 |

This course provides training in appropriate and accurate assessment and intervention skills related to sensory, movement, perceptual/cognitive, affective systems, and ADL skills. Topics include kinesiology, body mechanics, sensory, ROM, MMT, cognitive/perceptual, psychosocial, self-care, and work-related assessments; treatment approaches; and basics of group structure and dynamics. Upon completion, students should be able to administer various assessment tools and appropriate treatment approaches regarding sensation, movement, perception/cognition, affect, self-care, and work-related skills.

| **OTA 140 Professional Skills I** | 0 3 0 1 | | | | | |
| Prerequisites: Enrollment in the Occupational Therapy Assistant Program | | | | | Corequisites: OTA 110, OTA 120 |

This course introduces the roles and responsibilities of COTAs/OTRs in OT practice and facilitates development of observation, documentation, and therapeutic use of self skills. Topics include Code of Ethics, roles/responsibilities, credentialing/licensing, documentation, therapeutic use of self and professional identity/behavior, supervisory relationships, time management, and observation skills. Upon completion, students should be able to demonstrate ethical behavior, discriminate between roles/responsibilities of OTAs/OTs, and participate in acceptable supervision, documentation, and scheduling.

| **OTA 150 Life Span Skills I** | 2 3 0 3 | | | | | |
| Prerequisites: OTA 110, OTA 120, OTA 140 | | | | | Corequisites: OTA 130, OTA 161, PSY 241 and OTA 170 |

This course is designed to use knowledge gained from PSY 241 as it applies to OT practice from birth to adolescence. Topics include review of normal growth and development, identification/discussion of common disabilities/delays, assessment, treatment planning, and intervention approaches used with these populations. Upon completion, students should be able to identify/use assessments/screenings and interventions for infants through adolescents for selected disabilities/developmental delays in various settings.

| **OTA 161 Fieldwork I-Placement I** | 0 0 3 1 | | | | | |
| Prerequisites: OTA 120 and OTA 140, OTA 110 | | | | | Corequisites: OTA 130, OTA 150, OTA 170 |

This course provides introductory-level clinical training opportunities. Emphasis is placed on observational and basic interactional skills in a setting with a culturally diverse client population. Upon completion, students should be able to use observational and interactional skills to relate effectively with clients under the guidance/direction of fieldwork supervisors.

| **OTA 162 Fieldwork I-Placement II** | 0 0 3 1 | | | | | |
| Prerequisites: OTA 120, OTA 140, OTA 150, OTA 161, OTA 170 | | | | | Corequisites: OTA 130 OTA 220 |

This course provides introductory-level clinical training opportunities. Emphasis is placed on observational and basic interactional skills in a setting with a culturally diverse client population. Upon completion, students should be able to use observational and interactional skills to relate effectively with clients under the guidance/direction of fieldwork supervisors.
OTA 163 Fieldwork I-Placement III
Prerequisites: OTA 120, OTA 140, OTA 220
Corequisites: OTA 130, OTA 180, OTA 240, OTA 250
This course provides introductory-level clinical training opportunities. Emphasis is placed on observational and basic interactional skills in a setting with a culturally diverse client population. Upon completion, students should be able to use observational and interactional skills to relate effectively with clients under the guidance/direction of fieldwork supervisors.

OTA 170 Physical Dysfunction
Prerequisites: OTA 110, OTA 120, OTA 140
Corequisites: OTA 130, OTA 150, OTA 161
This course is designed to provide knowledge and skills needed for working with individuals experiencing varied medical/physical conditions within their socioeconomic and cultural environments. Topics include medical terminology, common diagnoses, structures/functions that change with disease processes, assessment/treatment priorities for specific problems/conditions, treatment planning, and intervention. Upon completion, students should be able to recognize common symptoms, prioritize problems, and provide for patient safety and infection control when planning and implementing treatment. Kinesiology and fundamentals of movement analysis will also be included in this course.

OTA 180 Psychosocial Dysfunction
Prerequisites: OTA 220 and PSY 281
Corequisites: OTA 130, OTA 163, OTA 240, OTA 250
This course uses theories/principles related to psychological/psychiatric health and illnesses and provides training in assessing/treating symptoms of dysfunction and therapeutic use of self and groups. Topics include psychiatric illnesses, symptoms of dysfunction, assessment and treatment of individuals, planning and facilitating therapeutic groups, client safety, and psychosocial aspects of practice. Upon completion, students should be able to effectively plan and conduct individual and group treatment for client conditions related to psychosocial dysfunction recognizing temporal/socioeconomic/cultural contexts.

OTA 220 Media II
Prerequisites: OTA 120, OTA 130, OTA 150, OTA 161, OTA 170
Corequisites: OTA 162
This course provides training in appropriate and accurate assessment and intervention skills related to orthotics, prosthetics, assistive devices, environmental controls, and ADA issues. Topics include ergonomics and hand function, splint selection/fabrication, changes that improve access for persons with disabilities, use of modalities in treatment, and computers in OT intervention. Upon completion, students should be able to demonstrate proficiency fabricating/monitoring orthotic devices, constructing/modifying assistive devices, using ADA guidelines, and using computers for therapeutic purposes.

OTA 240 Professional Skills II
Prerequisites: OTA 140, OTA 220
Corequisites: OTA 163, OTA 180, OTA 250
This course builds upon and expands skills developed in OTA 140 with emphasis on documentation, supervisory relationships, involvement in the profession, and clinical management skills. Topics include clarification of roles/responsibilities, detailed examination of the supervisory process, professional participation in organizations, and the mechanics of assisting in clinic operations. Upon completion, students should be able to work effectively with a supervisor, plan/implement a professional activity, and perform routine clinic management tasks.

OTA 250 Life Span Skills II
Prerequisites: OTA 220
Corequisites: OTA 163, OTA 170, OTA 180, OTA 240, PSY 241
This course uses knowledge gained from PSY 241 as it applies to OT practice from young adulthood through old age. Emphasis is placed on identification/discussion of common disabilities/chronic diseases, assessments, planning and interventions used with these populations, and activity programming. Upon completion, students should be able to identify/use assessments, interventions, and activities for adults with selected disabilities/losses in various settings.

OTA 260 Fieldwork II-Placement I
Prerequisites: Completion of all OTA Program Didactic Coursework
Corequisites: OTA 261, OTA 280
This course provides clinical experience under the direct supervision of experienced OTR or COTA personnel working in various practice settings. Emphasis is placed on final clinical preparation for entry-level practice in the profession. Upon completion, students should be able to meet all critical competencies established by the curriculum and AOTA guidelines for entry-level practice.

OTA 261 Fieldwork II-Placement II
Prerequisites: Completion of OTA Program Didactic Coursework
Corequisites: OTA 260, OTA 280
This course provides clinical experience under the direct supervision of experienced OTR or COTA personnel working in various practice settings. Emphasis is placed on final clinical preparation for entry-level practice in the profession. Upon completion, students should be able to meet all critical competencies established by the curriculum and AOTA guidelines for entry-level practice.
This course introduces the concepts associated with the measurement of different process variables. Topics include theory and applications involved with the process variables of flow, level, pressure, and temperature. Upon completion, students should be able to understand basic process measurements and demonstrate the ability to calibrate process control instrumentation.

### Prerequisites
- PCI 162

### Corequisites
- None

### Course Description
This course surveys industrial process control instrumentation concepts, devices, and systems. Topics include process control devices and process control applications associated with industrial instrumentation. Upon completion, students should be able to demonstrate a basic understanding of the various industrial process control and instrumentation systems.

### Prerequisites
- None

### Corequisites
- PCI 162

This course is designed to investigate and apply the basic concepts and principles of lifetime physical fitness and other health-related factors. Emphasis is placed on wellness through the study of nutrition, weight control, stress management, and consumer facts on exercise and fitness. Upon completion, students should be able to plan a personal, lifelong fitness program based on individual needs, abilities, and interests. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a premajor and/or elective course requirement.

### Prerequisites
- Completion of one of the following:
  a. Grade of “C” or better in RED 080
  b. Grade of “C” or better in ENG 085
  c. Grade of “C” or better in DRE 097
  d. Required placement test score(s)
    - Proficiency in Reading - A grade of “C” or better in ENG 085 or RED 080 OR minimum Accuplacer score of 57 on Reading.

### Corequisites
- None

### Course Description
Note: Most PED 110 distance learning courses require membership at an approved commercial facility.

This course introduces the basics of weight training. Emphasis is placed on developing muscular strength, muscular endurance, and muscle tone. Upon completion, students should be able to establish and implement a personal weight training program. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

### Prerequisites
- None

### Corequisites
- None

### Course Description
Note: This course requires membership to an approved commercial facility. Membership costs approximately $144.00 (subject to change). No textbook is required. The first class meeting is always on the CFCC campus, and subsequent classes will meet at the off-campus site.
COURSE DESCRIPTIONS

PED 120* Walking for Fitness 0 3 0 1
Prerequisites: None
Corequisites: None

This course introduces fitness through walking. Emphasis is placed on stretching, conditioning exercises, proper clothing, fluid needs, and injury prevention. Upon completion, students should be able to participate in a recreational walking program. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a premajor and/or elective course requirement.

PED 124* Run, Swim, Cycle 0 3 0 1
Prerequisites: None
Corequisites: None

This course introduces the sport of the triathlon. Topics include the rules, equipment, and skills necessary for the triathlon. Upon completion, students should be able to participate in a triathlon competition. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a premajor and/or elective course requirement.

Note: This course requires membership to an approved commercial facility. Membership costs approximately $144.00 (subject to change). No textbook is required. The first class meeting is always on the CFCC campus, and subsequent classes will meet at the off-campus site.

PED 125* Self-Defense-Beginning 0 2 0 1
Prerequisites: None
Corequisites: None

This course is designed to aid students in developing rudimentary skills in self-defense. Emphasis is placed on stances, blocks, punches, and kicks as well as non-physical means of self-defense. Upon completion, students should be able to demonstrate basic self-defense techniques of a physical and non-physical nature. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PED 128* Golf-Beginning 0 2 0 1
Prerequisites: None
Corequisites: None

This course emphasizes the fundamentals of golf. Topics include the proper grips, stance, alignment, swings for the short and long game, putting, and the rules and etiquette of golf. Upon completion, students should be able to perform the basic golf shots and demonstrate a knowledge of the rules and etiquette of golf. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PED 129* Golf-Intermediate 0 2 0 1
Prerequisites: PED 128
Corequisites: None

This course the more advanced phases of golf. Emphasis is placed on refining the fundamental skills and learning more advanced phases of the games such as club selection, trouble shots, and course management. Upon completion, students should be able to demonstrate the knowledge and ability to play a recreational round of golf. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

PED 130* Tennis-Beginning 0 2 0 1
Prerequisites: None
Corequisites: None

This course emphasizes the fundamentals of tennis. Topics include basic strokes, rules, etiquette, and court play. Upon completion, students should be able to play recreational tennis. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

Note: The first class meeting is always on the CFCC campus, and subsequent classes will meet at an off-campus site.

PED 131* Tennis-Intermediate 0 2 0 1
Prerequisites: PED 130
Corequisites: None

This course emphasizes the refinement of playing skills. Topics include continuing the development of fundamentals, learning advanced serves, and strokes and pace and strategies in singles and doubles play. Upon completion, students should be able to play competitive tennis. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

Note: The first class meeting is always on the CFCC campus, subsequent classes will meet at an off-campus site.

PED 132* Racquetball-Beginning 0 2 0 1
Prerequisites: None
Corequisites: None

This course introduces the fundamentals of racquetball. Emphasis is placed on rules, fundamentals, and strategies of beginning racquetball. Upon completion, students should be able to play recreational racquetball. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

Note: This course requires membership at an approved commercial facility. Membership costs approximately $144.00 (subject to change). No textbook is required. The first class meeting is always on the CFCC campus, and subsequent classes will meet at an off-campus site.

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

*Note: The first class meeting is always on the CFCC campus, and subsequent classes will meet at an off-campus site.*

- **PED 143* Volleyball-Beginning**
  - Prerequisites: None
  - Corequisites: None
  - This course covers the fundamentals of volleyball. Emphasis is placed on the basics of serving, passing, setting, spiking, blocking, and the rules and etiquette of volleyball. Upon completion, students should be able to participate in recreational volleyball.

- **PED 145* Basketball-Beginning**
  - Prerequisites: None
  - Corequisites: None
  - This course covers the fundamentals of basketball. Emphasis is placed on skill development, knowledge of the rules, and basic game strategy. Upon completion, students should be able to participate in recreational basketball.

- **PED 147* Soccer**
  - Prerequisites: None
  - Corequisites: None
  - This course introduces the basics of soccer. Emphasis is placed on rules, strategies, and fundamental skills. Upon completion, students should be able to participate in recreational soccer.

- **PED 148* Softball**
  - Prerequisites: None
  - Corequisites: None
  - This course introduces the fundamental skills and rules of softball. Emphasis is placed on proper techniques and strategies for playing softball. Upon completion, students should be able to participate in recreational softball.

- **PED 149* Flag Football**
  - Prerequisites: None
  - Corequisites: None
  - This course introduces the fundamentals and rules of flag football. Emphasis is placed on proper techniques and strategies for playing game situations. Upon completion, students should be able to participate in recreational flag football.

- **PED 154* Swimming for Fitness**
  - Prerequisites: None
  - Corequisites: None
  - This course introduces lap swimming, aquacises, water activities, and games. Emphasis is placed on increasing cardiovascular efficiency through aquatic exercise. Upon completion, students should be able to develop an individualized aquatic fitness program.

  *Note: This course requires membership to an approved commercial facility. Membership costs approximately $144.00 (subject to change). No textbook is required. The first class meeting is always on the CFCC campus, and subsequent classes will meet at the off-campus site.*

- **PED 170* Backpacking**
  - Prerequisites: None
  - Corequisites: None
  - This course covers the proper techniques for establishing a campsite, navigating in the wilderness, and planning for an overnight trip. Topics include planning for meals, proper use of maps and compass, and packing and dressing for extended periods in the outdoors. Upon completion, students should be able to identify quality backpacking equipment, identify the principles of no-trace camping, and successfully complete a backpacking experience.

  *Note: This course requires an overnight camping trip. Contact Doc Wilson at dwilson@cfcc.edu for more information.*

- **PED 210* Team Sports**
  - Prerequisites: None
  - Corequisites: None
  - This course introduces the fundamentals of popular American team sports. Emphasis is placed on rules, equipment, and motor skills used in various sports. Upon completion, students should be able to demonstrate knowledge of the sports covered.

- **PED 211* New Games**
  - Prerequisites: None
  - Corequisites: None
  - This course includes explanation, demonstration, and participation in games that provide an alternative to traditional sports. Emphasis is placed on playing for pleasure rather than for competitive purposes. Upon completion, students should be able to participate and lead others in participating in non-competitive games.

  *Note: The first class meeting is always on the CFCC campus, and subsequent classes will meet at an off-campus site.*

</table>
theory formation. Topics include the relationship between the philosophy of science and inductive/deductive logic, analytic philosophy, logical empiricism, and explanatory paradigms. Upon completion, students should be able to describe the development and role of scientific explanation, prediction, theory formation, and explanatory paradigms in the natural and social sciences.

**PHM 110 Introduction to Pharmacy** 3 0 0 3
Prerequisites: Enrollment In the Pharmacy Technology program
Corequisites: None

This course introduces pharmacy practice and the technician’s role in a variety of pharmacy settings. Topics include medical terminology and abbreviations, drug delivery systems, law and ethics, prescription and medication orders, and the health care system. Upon completion, students should be able to explain the role of pharmacy technicians, read and interpret drug orders, describe quality assurance, and utilize pharmacy references.

**PHM 111 Pharmacy Practice I** 3 3 0 4
Prerequisites: Enrollment in the Pharmacy Technology program
Corequisites: PHM 110, 115, 115A, BIO 163

This course provides instruction in the technical procedures for preparing and dispensing drugs in the hospital and retail settings under supervision of a registered pharmacist. Topics include drug packaging and labeling, out-patient dispensing, hospital dispensing procedures, controlled substance procedures, inventory control, and non-sterile compounding. Upon completion, students should be able to perform basic supervised dispensing techniques in a variety of pharmacy settings.

**PHM 115 Pharmacy Calculations** 3 0 0 3
Prerequisites: None
Corequisites: PHM 110, PHM 111, PHM 115A, BIO 163

This course provides an introduction to the metric, avoirdupois, and apothecary systems of measurement and the calculations used in pharmacy practice. Topics include ratio and proportion, dosage determinations, percentage preparations, reducing and enlarging formulas, dilution and concentration, aliquots, specific gravity and density, and flow rates. Upon completion, students should be able to correctly perform calculations required to properly prepare a medication order.

**PHM 115A Pharm Calculations Lab** 0 2 0 1
Prerequisites: None
Corequisites: PHM 110, PHM 111, PHM 115, BIO 163

This course provides an opportunity to practice and perform calculations encountered in pharmacy practice. Emphasis is placed on ratio and proportion, dosage calculations, percentage, reduction/enlargement formulas, aliquots, flow rates, and specific gravity/density. Upon completion, students should be able to perform the calculations required to properly prepare a medication order.

**PHM 118 Sterile Products**
Prerequisites: PHM 110, 111
Corequisites: PHM 120, 136

This course provides an introduction to intravenous admixture preparation and other sterile products, including total parenteral nutrition and chemotherapy. Topics include aseptic techniques; facilities, equipment, and supplies utilized in admixture preparation; incompatibility and stability; laminar flow hoods; immunizations and irrigation solutions; and quality assurance. Upon completion, students should be able to describe and demonstrate the steps involved in preparation of intermittent and continuous infusions, total parenteral nutrition, and chemotherapy.

**PHM 120 Pharmacology I** 3 0 0 3
Prerequisites: PHM 110, 111
Corequisites: PHM 118, 136

This course introduces the study of the properties, effects, and therapeutic value of the primary agents in the major drug categories. Topics include nutritional products, blood modifiers, hormones, diuretics, cardiovascular agents, respiratory drugs, and gastrointestinal agents. Upon completion, students should be able to place major drugs into correct therapeutic categories and identify indications, side effects, and trade and generic names.

**PHM 125 Pharmacology II** 3 0 0 3
Prerequisites: PHM 110, 111, 120
Corequisites: PHM 133, 140

This course provides a continuation of the study of the properties, effects, and therapeutic value of the primary agents in the major drug categories. Topics include autonomic and central nervous system agents, anti-inflammatory agents, and anti-infective drugs. Upon completion, students should be able to place major drugs into correct therapeutic categories and identify indications, side effects, and trade and generic names.

**PHM 133 Pharmacy Clinical** 0 0 9 3
Prerequisites: None
Corequisites: None

This course provides an opportunity to work in pharmacy settings under a pharmacist’s supervision. Emphasis is placed on effective communication with personnel, developing proper employee attitude, and dispensing of medications. Upon completion, students should be able to demonstrate an understanding of pharmacy operations, utilize references, dispense medications, prepare patient charges, and efficiently operate computers.

PHY 110A* Conceptual Physics Lab  0 2 0 1
Prerequisites: Completion of one of the following:
   a. Grade of "C" or better in RED 090
   b. Grade of "C" or better in ENG 095
   c. Grade of "C" or better in DRE 098
   d. Required placement test score(s)
Corequisites: PHY 110

This course is a laboratory for PHY 110. Emphasis is placed on laboratory experiences that enhance materials presented in PHY 110. Upon completion, students should be able to apply the laboratory experiences to the concepts presented in PHY 110. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

PHY 131 Physics-Mechanics  3 2 0 4
Prerequisites: Completion of one of the following:
   a. Grade of "C" or better in RED 090
   b. Grade of "C" or better in ENG 095
   c. Grade of "C" or better in DRE 098
   d. Required placement test score(s)
       AND MAT 121 or MAT 171
Corequisites: None

This algebra/trigonometry-based course introduces fundamental physical concepts as applied to engineering technology fields. Topics include systems of units, problem-solving methods, graphical analysis, vectors, motion, forces, Newton’s laws of motion, work, energy, power, momentum, and properties of matter. Upon completion, students should be able to apply the principles studied to applications in engineering technology fields.

PHY 132 Physics-Elec & Magnetism  3 2 0 4
Prerequisites: PHY 131
Corequisites: None

This algebra/trigonometry-based course is a study of fundamental physical concepts as applied to engineering technology fields. Topics include systems of units, problem-solving methods, graphical analysis, waves, electricity, magnetism, circuits, transformers, motors, and generators. Upon completion, student should be able to apply the principles studied to applications in engineering technology fields. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a premajor and/or elective course requirement. This course may meet the SACS natural science requirement for AGE, AAS, DIP, or CER program.

PHY 151* College Physics I  3 2 0 4
Prerequisites: MAT 171
Corequisites: None

This course uses algebra- and trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include units and measurement, vectors, linear kinematics and dynamics, energy, power, momentum, fluid mechanics, and heat. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

PHY 152* College Physics II  3 2 0 4
Prerequisites: PHY 151
Corequisites: None

This course uses algebra- and trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include electrostatic forces, electric fields, electric potentials, direct-current circuits, magnetostatic forces, magnetic fields, electromagnetic induction, alternating-current circuits, and light. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

PLU 110 Modern Plumbing  4 15 0 9
Prerequisites: None
Corequisites: None

This course introduces the tools, equipment, and materials associated with the plumbing industry. Topics include safety, use and care of tools, recognition and assembly of fittings and pipes, and other related topics. Upon completion, students should be able to safely assemble various pipes and fittings in accordance with state code requirements.

PLU 111 Intro to Basic Plumbing  1 3 0 2
Prerequisites: None
Corequisites: None

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system.

PLU 120 Plumbing Applications  4 15 0 9
Prerequisites: None
Corequisites: None

This course covers general plumbing layout, fixtures, and water heaters. Topics include drainage, waste and vent pipes, water service and distribution, fixture installation, water heaters, and other related topics. Upon completion, students should be able to safely install common fixtures and systems in compliance with state and local building codes.

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.
This course introduces the basic principles of psychology as they relate to personal and professional development. Emphasis is placed on personality traits, communication/leadership styles, effective problem solving, and cultural diversity as they apply to personal and work environments. Upon completion, students should be able to demonstrate an understanding of these principles of psychology as they apply to personal and professional development.

**PSY 150* General Psychology**

- **Prerequisites:** Completion of one of the following:
  - Grade of “C” or better in RED 090
  - Grade of “C” or better in ENG 095
  - Grade of “C” or better in DRE 098
  - Required placement test score(s)
- **Corequisites:** None

This course provides an overview of the scientific study of human behavior. Topics include history, methodology, biopsychology, sensation, perception, learning, motivation, cognition, abnormal behavior, personality theory, social psychology, and other relevant topics. Upon completion, students should be able to demonstrate a basic knowledge of the science of psychology. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

**PSY 211* Psychology of Adjustment**

- **Prerequisites:** PSY 150
- **Corequisites:** None

This course introduces the study of the adjustment process focusing on contemporary challenges individuals must deal with in everyday life. Topics include theories of behavior, career choices, self-understanding, coping mechanisms, human relationships, intimacy, sociocultural factors influencing healthy personal adjustment, and other related topics. Upon completion, students should be able to demonstrate an awareness of the processes of adjustment.

**PSY 241* Developmental Psych**

- **Prerequisites:** PSY 150
- **Corequisites:** None

This course is a study of human growth and development. Emphasis is placed on major theories and perspectives as they relate to the physical, cognitive, and psychosocial aspects of development from conception to death. Upon completion, students should be able to demonstrate knowledge of development across the life span.

**PSY 259* Human Sexuality**

- **Prerequisites:** PSY 150
- **Corequisites:** None

This course provides the biological, psychological, and sociocultural aspects of human sexuality and related research. Topics include reproductive biology, sexual and psychosexual development, sexual orientation, contraception, sexually
transmitted diseases, sexual disorders, theories of sexuality, and related issues. Upon completion, students should be able to demonstrate an overall knowledge and understanding of human sexuality.

**PSY 263* Educational Psychology**  
Prerequisites:  
Corequisites: None
This course examines the application of psychological theories and principles to the educational process and setting. Topics include learning and cognitive theories, achievement motivation, teaching and learning styles, teacher and learner roles, assessment, and developmental issues. Upon completion, students should be able to demonstrate an understanding of the application of psychological theory to educational practice.

**PSY 281* Abnormal Psychology**  
Prerequisites:  
Corequisites: None
This course provides an examination of the various psychological disorders, as well as theoretical, clinical, and experimental perspectives of the study of psychopathology. Emphasis is placed on terminology, classification, etiology, assessment, and treatment of the major disorders. Upon completion, students should be able to distinguish between normal and abnormal behavior patterns as well as demonstrate knowledge of etiology, symptoms, and therapeutic techniques.

**RAD 110 Rad Intro & Patient Care**  
Prerequisites:  
Corequisites: RAD 111, and RAD 151
This course provides an overview of the radiography profession and student responsibilities. Emphasis is placed on basic principles of patient care, radiation protection, technical factors, and medical terminology. Upon completion, students should be able to demonstrate basic skills in these areas.

**RAD 111 RAD Procedures I**  
Prerequisites:  
Corequisites: RAD 110, and RAD 151
This course provides the knowledge and skills necessary to perform standard radiographic procedures. Emphasis is placed on radiography of the chest, abdomen, extremities, spine, and pelvis. Upon completion, students should be able to demonstrate competence in these areas.

**RAD 112 RAD Procedures II**  
Prerequisites: RAD 110, RAD 111, and RAD 151  
Corequisites: None
This course provides the knowledge and skills necessary to perform standard radiographic procedures. Emphasis is placed on radiography of the skull, bony thorax, and gastrointestinal, biliary, and urinary systems. Upon completion, students should be able to demonstrate competence in these areas.

**RAD 121 Radiographic Imaging I**  
Prerequisites: RAD 110, RAD 111, and RAD 151  
Corequisites: RAD 112 and RAD 161
This course provides the basic principles of imaging. Emphasis is placed on the factors that impact density, contrast, recorded detail, and distortion. Upon completion, students should be able to demonstrate an understanding of basic radiographic imaging.

**RAD 122 Radiographic Imaging II**  
Prerequisites: RAD 112, RAD 121, and RAD 161  
Corequisites: RAD 131 and RAD 171
This course provides advanced principles of imaging including digital radiography. Emphasis is placed on the factors that impact brightness, contrast, recorded detail, and distortion. Upon completion, students should be able to demonstrate an understanding of advanced principles of imaging.

**RAD 131 Radiographic Physics I**  
Prerequisites: RAD 121  
Corequisites: RAD 122 and RAD 171
This course introduces the principles of radiation characteristics and production. Emphasis is placed on imaging equipment. Upon completion, students should be able to demonstrate a basic understanding of radiation characteristics and production.

**RAD 151 RAD Clinical Ed I**  
Prerequisites:  
Corequisites: RAD 110 and RAD 111
This course introduces patient management and basic radiographic procedures in the clinical setting. Emphasis is placed on mastering positioning of the chest and extremities, manipulating equipment, and applying principles of ALARA. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

**RAD 161 RAD Clinical Ed II**  
Prerequisites: RAD 110, RAD 111, and RAD 151  
Corequisites: RAD 112 and RAD 121
This course provides additional experience in patient management and in more complex radiographic procedures. Emphasis is placed on mastering positioning of the spine, pelvis, head and neck, and thorax and adapting procedures to meet patient variations. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

**RAD 171 RAD Clinical Ed III**  
Prerequisites: RAD 112, RAD 121, and RAD 161  
Corequisites: RAD 122 and RAD 131
This course provides experience in patient management specific to fluoroscopic and advanced radiographic procedures. Emphasis is placed on applying appropriate technical factors to all studies and mastering positioning of gastrointestinal and
urolological studies. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

**RAD 181 RAD Clinical Elective**  
Prerequisites: Enrollment in the Radiography Program  
Corequisites: None

This course provides advanced knowledge of clinical applications. Emphasis is placed on enhancing clinical skills. Upon completion, students should be able to successfully complete the clinical course objectives.

**RAD 211 RAD Procedures III**  
Prerequisites: RAD 122, RAD 131 and RAD 171  
Corequisites: RAD 231, RAD 241, and RAD 251

This course provides the knowledge and skills necessary to perform standard and specialty radiographic procedures. Emphasis is placed on radiographic specialty procedures, sectional anatomy, and advanced imaging. Upon completion, students should be able to demonstrate an understanding of these areas.

**RAD 231 Radiographic Physics II**  
Prerequisites: RAD 171 or RAD 131  
Corequisites: RAD 211, RAD 241 and RAD 251

This course provides advanced principles of radiation characteristics and production including digital imaging and Computed Tomography (CT). Emphasis is placed on imaging equipment. Upon completion, students should be able to demonstrate an understanding of radiation characteristics and production.

**RAD 241 Radiobiology Protection**  
Prerequisites: RAD 122, RAD 131, and RAD 171  
Corequisites: RAD 211, RAD 231, and RAD 251

This course covers the principles of radiation protection and radiobiology. Topics include the effects of ionizing radiation on body tissues, protective measures for limiting exposure to the patient and personnel, and radiation monitoring devices. Upon completion, students should be able to demonstrate an understanding of the effects and uses of radiation in diagnostic radiology.

**RAD 245 Image Analysis**  
Prerequisites: RAD 211, RAD 231, RAD 241 and RAD 251  
Corequisites: RAD 261 and RAD 271

This course provides an overview of image analysis and introduces methods of quality management. Topics include image evaluation, pathology, quality control, and quality assurance. Upon completion, students should be able to demonstrate a basic knowledge of image analysis and quality management.

procedures, the Real Estate Settlement Procedures Act and closings. Topics include contract law concepts, residential sales contract preparation and procedures, closing procedures and closing statement preparation. Upon completion, students should be able to handle sales contract negotiations, prepare residential sales contracts, assist sellers/buyers prepare for closing and verify closing statements.

**RLS 123 Select Real Estate Issues**  2  0  0  2
Prerequisites: RLS 112
Corequisites: None

This course provides post-licensing instruction in real estate on selected topics of special importance to licensees. Topics include commercial real estate brokerage, residential property management, land use controls, loan fraud, license law, fair housing, establishing a brokerage firm, and manufactured/modular homes. Upon completion, students should be able to demonstrate knowledge of commercial real estate brokerage, residential property management, and the other topics addressed in this course.

**SEC 110 Security Concepts**  3  0  0  3
Prerequisites: None
Corequisites: None

This course introduces the concepts and issues related to securing information systems and the development of policies to implement information security controls. Topics include the historical view of networking and security, security issues, trends, security resources, and the role of policy, people, and processes in information security. Upon completion, students should be able to identify information security risks, create an information security policy, and identify processes to implement and enforce policy.

**SEC 160 Security Administration I**  2  2  0  3
Prerequisites: SEC 110 and NET 110 OR SEC 110 and NET 125
Corequisites: None

This course provides an overview of security administration and fundamentals of designing security architectures. Topics include networking technologies, TCP/IP concepts, protocols, network traffic analysis, monitoring, and security best practices. Upon completion, students should be able to identify normal network traffic using network analysis tools and design basic security defenses.

**SEC 260 Security Admin II**  2  2  0  3
Prerequisites: SEC 160
Corequisites: None

This course provides the skills necessary to design and implement information security controls. Topics include advanced networking and TCP/IP concepts, network vulnerability analysis, and monitoring. Upon completion, students should be able to distinguish between normal and anomalous network traffic, identify common network attack patterns, and implement security solutions.

**SOC 210* Introduction to Sociology**  3  0  0  3
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course introduces the scientific study of human society, culture, and social interactions. Topics include socialization, research methods, diversity and inequality, cooperation and conflict, social change, social institutions, and organizations. Upon completion, students should be able to demonstrate knowledge of sociological concepts as they apply to the interplay among individuals, groups, and societies. This is a Universal General Education Transfer Component (UGETC) course. [SBCC/BOG 02/21/14]

**SOC 213* Sociology of the Family**  3  0  0  3
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course covers the institution of the family and other intimate relationships. Emphasis is placed on mate selection, gender roles, sexuality, communication, power and conflict, parenthood, diverse lifestyles, divorce and remarriage, and economic issues. Upon completion, students should be able to analyze the family as a social institution and the social forces which influence its development and change.

**SOC 220* Social Problems**  3  0  0  3
Prerequisites: Completion of one of the following:
   a. Grade of “C” or better in RED 090
   b. Grade of “C” or better in ENG 095
   c. Grade of “C” or better in DRE 098
   d. Required placement test score(s)
Corequisites: None

This course provides an in-depth study of current social problems. Emphasis is placed on causes, consequences, and possible solutions to problems associated with families, schools, workplaces, communities, and the environment. Upon completion, students should be able to recognize, define, analyze, and propose solutions to these problems. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in social/behavioral sciences. This course may meet the SACS social/behavioral science requirement for AA, AS, AFA, AGE, AAS, DIP, or CER programs.

This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and technically evaluate sonographic examinations.
completion, students should be able to image, process, and evaluate sonographic examinations.

**SON 130 Abdominal Sonography I**  
Prerequisites: None  
Corequisites: None  
This course introduces abdominal and small parts sonography. Emphasis is placed on the sonographic anatomy of the abdomen and small parts with correlated laboratory exercises. Upon completion, students should be able to recognize and acquire basic abdominal and small parts images.

**SON 131 Abdominal Sonography II**  
Prerequisites: SON 130  
Corequisites: None  
This course covers abdominal and small parts pathology recognizable on sonograms. Emphasis is placed on abnormal sonograms of the abdomen and small parts with correlated sonographic cases. Upon completion, students should be able to recognize abnormal pathological processes in the abdomen and on small parts sonographic examinations.

**SON 140 Gynecological Sonography**  
Prerequisites: SON 110  
Corequisites: None  
This course is designed to relate gynecological anatomy and pathology to sonography. Emphasis is placed on gynecological relational anatomy, endovaginal anatomy, and gynecological pathology. Upon completion, students should be able to recognize normal and abnormal gynecological sonograms.

**SON 220 Sonography Clinical Ed III**  
Prerequisites: SON 121  
Corequisites: None  
This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations.

**SON 221 SON Clinical Ed IV**  
Prerequisites: SON 220  
Corequisites: None  
This course provides continued active participation off campus in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations.

**SON 225 Case Studies**  
Prerequisites: SON 110 or CVS 163  
Corequisites: None  
This course offers the opportunity to present interesting cases found during clinical education. Emphasis is placed on presentation methods which integrate patient history, laboratory results, and sonographic findings with reference to current literature. Upon completion, students should be able to correlate information necessary for complete presentation of case studies.

**SON 241 Obstetrical Sonography I**  
Prerequisites: SON 110  
Corequisites: None  
This course covers normal obstetrical sonography techniques, the normal fetal environment, and abnormal first trimester pregnancy states. Topics include gestational dating, fetal anatomy, uterine environment, and first trimester complications. Upon completion, students should be able to produce gestational sonograms which document age, evaluate the uterine environment, and recognize first trimester complications.

**SON 242 Obstetrical Sonography II**  
Prerequisites: SON 241  
Corequisites: None  
This course covers second and third trimester obstetrical complications and fetal anomalies. Topics include abnormal fetal anatomy and physiology and complications in the uterine environment. Upon completion, students should be able to identify fetal anomalies, fetal distress states, and uterine pathologies.

**SON 250 Vascular Sonography**  
Prerequisites: SON 111  
Corequisites: None  
This course provides an in-depth study of the anatomy and pathology of the vascular system. Topics include peripheral arterial, peripheral venous, and cerebrovascular disease testing. Upon completion, students should be able to identify normal vascular anatomy and recognize pathology of the vascular system.

**SON 272 Advanced Pathology**  
Prerequisites: SON 110  
Corequisites: None  
This course is designed to concentrate on complex pathological states seen on sonograms. Emphasis is placed on systemic diseases and multi-organ disease states as seen on sonograms. Upon completion, students should be able to research, present, and discuss system diseases presented on sonograms.
This course provides an overview of sonographic topics in preparation for certification examinations. Emphasis is placed on registry preparation. Upon completion, students should be able to demonstrate a comprehensive knowledge of sonography and be prepared for the registry examinations.

SP A 111* Elementary Spanish I 3 0 0 3
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 080
  b. Grade of “C” or better in ENG 085
  c. Grade of “C” or better in DRE 097
  d. Required placement test score(s)
Corequisites: SPA 181

This course introduces the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written Spanish and demonstrate cultural awareness.

Students who have completed two units of foreign language in high school are advised to take the CLEP (College Level Examination for Placement) before registering for SPA 111. The CLEP is given daily at the University of North Carolina-Wilmington Testing Center and requires a fee. Students should make an appointment by calling 910-362-7444. CFCC discourages students from taking elementary levels of global languages if they have had satisfactory grades in high school language courses.

SP A 112* Elementary Spanish II 3 0 0 3
Prerequisites: SPA 111
Corequisites: SPA 182

This course is a continuation of SPA 111 focusing on the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written Spanish and demonstrate further cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement general education core requirement in humanities/fine arts. This course may meet the second SACS humanities/fine arts requirement for AA, AS, or AFA programs.

SP A 120 Spanish for the Workplace 3 0 0 3
Prerequisites: None
Corequisites: None

This course offers applied Spanish for the workplace to facilitate basic communication with people whose native language is Spanish. Emphasis is placed on oral communication and career-specific vocabulary that targets health, business, and/or public service professions. Upon completion, students should be able to communicate at a functional level with native speakers and demonstrate cultural sensitivity.

SP A 141* Culture and Civilization 3 0 0 3
Prerequisites: None
Corequisites: None

This course provides an opportunity to explore issues related to the Hispanic world. Topics include historical and current events, geography, and customs. Upon completion, students should be able to identify and discuss selected topics and cultural differences related to the Hispanic world.

SP A 161* Cultural Immersion 2 3 0 3
Prerequisites: SPA 111
Corequisites: None

This course explores Hispanic culture through intensive study on campus and field experience in a host country or comparable area within the United States. Topics include an overview of linguistic, historical, geographical, sociopolitical, economic, and/or artistic concerns of the area visited. Upon completion, students should be able to exhibit first-hand knowledge of issues pertinent to the host area and demonstrate understanding of cultural differences.

SP A 181* Spanish Lab 1 0 2 0 1
Prerequisites: Completion of one of the following:
  a. Grade of “C” or better in RED 080
  b. Grade of “C” or better in ENG 085
  c. Grade of “C” or better in DRE 097
  d. Required placement test score(s)
Corequisites: SPA 111

This course provides an opportunity to enhance acquisition of the fundamental elements of the Spanish language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of various supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written Spanish and demonstrate cultural awareness. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a premajor and/or elective course requirement.

Students who have completed two units of foreign language in high school are advised to take the CLEP (College Level Examination for Placement) before registering for SPA 111. The CLEP is given daily at the University of North Carolina-Wilmington Testing Center and requires a fee. Students should make an appointment by calling 910-362-7444. CFCC discourages students from taking elementary levels of global languages if they have had satisfactory grades in high school language courses.
### SPA 182* Spanish Lab 2
Prerequisites: SPA 181
Corequisites: SPA 112

This course provides an opportunity to enhance acquisition of the fundamental elements of the Spanish language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of various supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written Spanish and demonstrate cultural awareness.

### SPA 211* Intermediate Spanish I
Prerequisites: SPA 112
Corequisites: None

This course provides a review and expansion of the essential skills of the Spanish language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future.

### SPA 212* Intermediate Spanish II
Prerequisites: SPA 211
Corequisites: None

This course provides a continuation of SPA 211. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication.

### SPA 215 Spanish Phonetics/Structure
Prerequisites: None
Corequisites: None

This course is designed to improve the understanding of Spanish phonetics and the structure of the Spanish language. Topics include the structure of the Spanish language, phonology, morphology, and syntax. Upon completion, students should have an understanding of the phonetics and structure of the Spanish language and be able to contrast the structure of the Spanish and English languages.

### SPA 221* Spanish Conversation
Prerequisites: SPA 212
Corequisites: None

This course provides an opportunity for intensive communication in spoken Spanish. Emphasis is placed on vocabulary acquisition and interactive communication through the discussion of media materials and authentic texts. Upon completion, students should be able to discuss selected topics, express ideas and opinions clearly, and engage in formal and informal conversations.

### SPA 231* Reading and Composition
Prerequisites: SPA 212
Corequisites: None

This course provides an opportunity for intensive reading and composition in Spanish. Emphasis is placed on the use of literary and cultural materials to enhance and expand reading and writing skills. Upon completion, students should be able to demonstrate in writing an in-depth understanding of assigned readings. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a pre-major and/or elective course requirement.

### SPA 281* Spanish Lab 3
Prerequisites: SPA 182
Corequisites: SPA 211

This course provides an opportunity to enhance the review and expansion of the essential skills of the Spanish language. Emphasis is placed on the study of authentic and representative literary and cultural texts through the use of various supplementary learning media and materials. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future.

### SPA 282* Spanish Lab 4
Prerequisites: SPA 281
Corequisites: SPA 212

This course provides an opportunity to enhance the review and expansion of the essential skills of the Spanish language. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts through the use of various supplementary learning media and materials. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication.

### SPI 113 Intro to Spanish Interpreting
Prerequisites: ENG 111
Corequisites: None

This course introduces the field of interpreting, interpretation models, cognitive processes associated with interpretation, professional ethical standards, employment opportunities, and working conditions. Topics include specialized jargon, code of ethics, interpreter assessments/qualifications, and protocol associated with various settings. Upon completion, students should be able to explain the rationale for placement of interpreters and apply ethical standards to a variety of working situations.

### SPI 114 Analytical Skills
Prerequisites: None
Corequisites: None

This course is designed to improve cognitive processes associated with interpreting, listening, short-term memory,
Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COURSE DESCRIPTIONS

SPI 213 Review of Grammar  3 0 0 3
Prerequisites: None
Corequisites: None

This course is designed to review the common elements of Spanish grammar in oral and written form. Emphasis is placed on the fundamental grammatical concepts of the Spanish language. Upon completion, students should be able to demonstrate comprehension and correct usage of specified grammatical concepts in both oral and written form.

SPI 214 Intro to Translation  3 0 0 3
Prerequisites: None
Corequisites: None

This course is designed to improve the quality of Spanish translation. Emphasis is placed on the practice of Spanish to English and English to Spanish translation in a variety of prose styles. Upon completion, students should be able to demonstrate the usage and understanding of the processes involved in translating.

SPI 241 Legal Interpreting I  2 3 0 3
Prerequisites: None
Corequisites: SPI-221 and WBL 111

This course is designed for students planning to specialize in legal interpreting in areas such as the courtroom, attorney offices and law enforcement. Emphasis is placed on the development of legal terminology vocabulary and application of legal standards. Upon completion, students should be able to consecutively interpret and provide on-site translation renderings of basic messages in a variety of legal settings.

SPI 243 Medical Interpreting I  2 3 0 3
Prerequisites: None
Corequisites: SPI-221 and WBL 111

This course is designed for students planning to specialize in medical interpreting in settings such as hospitals, physicians’ offices and clinics. Emphasis is placed on the development of medical terminology vocabulary through active role-play. Upon completion, students should be able to apply medical interpretation techniques in a variety of medical situations.

SPI 245 Community Interpreting I  2 3 0 3
Prerequisites: None
Corequisites: None

This course is designed to expose students to interpreting in areas such as social services, business and industry. Emphasis is placed on the development of social services, business and industry vocabulary through role-play. Upon completion, students should be able to consecutively interpret basic messages in a variety of social services, business and industry situations.

SST 110 Intro to Sustainability  3 0 0 3
Prerequisites: None
Corequisites: None

This course introduces sustainability issues and individual contributions toward environmental sustainability. Topics include management processes needed to maximize renewable/non-renewable energy resources, economics of sustainability, and reduction of environmental impacts. Upon completion, students should be able to discuss sustainability practices and demonstrate an understanding of their effectiveness and impacts.

SST 120 Energy Use Analysis  2 2 0 3
Prerequisites: Grade of “C” or better in MAT 060 OR successful completion of DMA 010, DMA 020, and DMA 030
Corequisites: None

This course introduces the principles of analyzing energy use, energy auditing tools and techniques, conservation techniques, and calculating energy savings. Topics include building system control theory, calibrating digital controls, energy loss calculations, and applicable conservation techniques. Upon completion, students should be able to demonstrate an understanding of energy use, audits, and controls in the analysis of energy consumption.

SST 130 Modeling Renewable Energy  2 2 0 3
Prerequisites: None
Corequisites: None

This course introduces software and other technologies used for modeling renewable energy systems. Topics include renewable energy modeling software applications, data analysis, renewable energy sources, and cost of renewable energy systems. Upon completion, students should be able to use appropriate technology to model the effectiveness of renewable energy systems.

SST 140 Green Building and Design Concepts  3 0 0 3
Prerequisites: None
Corequisites: None

This course is designed to introduce the student to sustainable building design and construction principles and practices. Topics include sustainable building rating systems and certifications, energy efficiency, indoor environmental quality, sustainable building materials and water use. Upon completion, students should be able to identify the principles and practices of sustainable building design and construction.

COURSES DESIGNATED WITH AN ASTERISK (*) ARE COLLEGE TRANSFER COURSES. CHECK WITH YOUR SENIOR INSTITUTION TO ENSURE THE COURSE WILL BE APPROPRIATE FOR YOUR PROGRAM AT THAT INSTITUTION.
SST 210  Issues in Sustainability
Prerequisites:  SST 110
Corequisites:  None

This course introduces the long-term impacts and difficulties of applying sustainability concepts in an organization, business, or society. Topics include the application of sustainable technologies and the analysis of affordability, efficiencies, recycling, and small and large-scale design. Upon completion, students should be able to recognize the possible limitations of sustainable technologies and be prepared to reconcile such conflicts.

SST 250  Sustain Capstone Project
Prerequisites:  SST 110
Corequisites:  None

This course introduces an integrated team approach to a sustainability topic of interest to students, faculty, or professional community. Topics include problem identification, proposal preparation, conceptual design, and an effective project work schedule. Upon completion, students should be able to integrate the many facets of a topic based on environmental sustainability into a completed project.

SUR 110  Intro to Surg Tech
Prerequisites:  None
Corequisites:  SUR 111

This course provides a comprehensive study of peri-operative care, patient care concepts, and professional practice concepts within the profession of surgical technology. Topics include: introductory concepts, organizational structure and relationships, legal, ethical and moral issues, medical terminology, pharmacology, anesthesia, wound healing management concepts, and the technological sciences. Upon completion, students should be able to apply theoretical knowledge of the course topics to the practice of surgical technology.

SUR 111  Periop Patient Care
Prerequisites:  None
Corequisites:  SUR 110

This course provides the surgical technology student the theoretical knowledge required to function in the pre-operative, intra-operative, and post-operative role. Topics include asepsis, disinfection and sterilization, physical environment, instrumentation, equipment, peri-operative patient care, and peri-operative case management. Upon completion, students should be able to apply the principles and practice of the peri-operative team member to the operative environment.

SUR 122 Surgical Procedures I
Prerequisites:  SUR 110 and SUR 111
Corequisites:  SUR 123

This course provides an introduction to selected basic and intermediate surgical specialties that students are exposed to the first clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies, and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment.

SUR 123  SUR Clinical Practice I
Prerequisites:  SUR 110 and SUR 111
Corequisites:  SUR 122

This course provides clinical experience with a variety of perioperative assignments to build upon skills learned in SUR 111. Emphasis is placed on the scrub and circulating roles of the surgical technologist including aseptic technique and basic case preparation for selected surgical procedures. Upon completion, students should be able to prepare, assist with, and dismantle basic surgical cases in both the scrub and circulating roles.

SUR 134 Surgical Procedures II
Prerequisites:  SUR 123 or STP 101
Corequisites:  None

This course provides a comprehensive study of intermediate and advanced surgical specialties that students are exposed to in the second clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies, and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment.

SUR 135  SUR Clinical Practice II
Prerequisites:  SUR 123
Corequisites:  SUR 134

This course provides clinical experience with a variety of perioperative assignments to build skills required for complex perioperative patient care. Emphasis is placed on greater technical skills, critical thinking, speed, efficiency, and autonomy in the operative setting. Upon completion, students should be able to function in the role of an entry-level surgical technologist.

SUR 137 Prof Success Prep
Prerequisites:  SUR 123
Corequisites:  SUR 134 and SUR 135

This course provides employability skills and an overview of theoretical knowledge in preparation for certification. Topics include test-taking strategies, resume preparation, interviewing...
strategies, communication skills, and teamwork concepts. Upon completion, students should be able to prepare a resume, demonstrate appropriate interview techniques, and identify strengths and weaknesses in preparation for certification.

**SUR 210 Adv SUR Clinical Practice**

- **Prerequisites:** None
- **Corequisites:** None

This course is designed to provide individualized experience in advanced practice, education, circulating, and managerial skills. Emphasis is placed on developing and demonstrating proficiency in skills necessary for advanced practice. Upon completion, students should be able to assume leadership roles in a chosen specialty area.

**SUR 211 Adv Theoretical Concepts**

- **Prerequisites:** None
- **Corequisites:** None

This course covers theoretical knowledge required for extension of the surgical technologist role. Emphasis is placed on advanced practice in complex surgical specialties, educational methodologies, and managerial skills. Upon completion, students should be able to assume leadership roles in a chosen specialty area.

**TNE 245 Netwk Perimeter Security**

- **Prerequisites:** CET 240
- **Corequisites:** None

This course introduces a variety of ways to implement security into network designs and upgrades. Topics include securing the network through the use of access lists, routers, firewalls, Ipchains, and stateful packet filtering. Upon completion, students should be able to demonstrate a variety of techniques to harden the network from outside threats.

**TNE 255 Network Servers**

- **Prerequisites:** CET 130
- **Corequisites:** None

This course covers the activities and methods required to assure productive and reliable operation of network servers. Topics include planning, installing, configuring, and maintaining servers, including knowledge of server-level hardware implementations, operating systems, data storage subsystems, data recovery, and I/O subsystems. Upon completion, students should be able to configure and maintain a network server.

**TRF 110 Intro Turfgrass Cult & ID**

- **Prerequisites:** None
- **Corequisites:** None

This course covers the principles of reproduction, growth development, species characteristics, establishment and maintenance of golf courses and sports fields, and lawn applications. Upon completion, students should be able to identify turfgrass species and develop an establishment and maintenance plan for high quality turf areas in accordance with sustainable practices.

**TRN 110 Intro to Transport Tech**

- **Prerequisites:** None
- **Corequisites:** None

This course covers workplace safety, hazardous materials, environmental regulations, hand tools, service Information, basic concepts, vehicle systems, and common transportation industry terminology. Topics include familiarization with major vehicle systems, proper use of various hand and power tools, material safety data sheets, and personal protective equipment. Upon completion, students should be able to demonstrate appropriate safety procedures, identify and use basic shop tools, and describe government regulations regarding transportation repair facilities.

**TRN 120 Basic Transp Electricity**

- **Prerequisites:** Completion of one of the following:
  a. Grade of “C” or better in RED 080
  b. Grade of “C” or better in ENG 085
  c. Grade of “C” or better in DRE 097
  d. Required placement test score(s)

- **Corequisites:** None

This course covers basic electrical theory, wiring, diagrams, test equipment, and diagnosis, repair and replacement of batteries, starters, and alternators. Topics include Ohm’s Law, circuit construction, wiring diagrams, circuit testing, and basic troubleshooting. Upon completion, students should be able to properly use wiring diagrams, diagnose, test and repair basic wiring, battery, starting, charging, and electrical concerns.

**TRN 130 Intro to Sustainable Transp**

- **Prerequisites:** None
- **Corequisites:** None

This course provides an overview of alternative fuels and alternative fuel vehicles. Topics include composition and use of alternative fuels including compressed natural gas, biodiesel, ethanol, hydrogen, and synthetic fuels, hybrid/electric, and vehicles using alternative fuels. Upon completion, students should be able to identify alternative fuel vehicles, explain how each alternative fuel delivery system operates, and perform minor repairs.

**TRN 140 Transp Climate Control**

- **Prerequisites:** None
- **Corequisites:** None

This course covers the theory of refrigeration and heating, electrical/automatic/pneumatic controls, and diagnosis and repair of climate control systems. Topics include diagnosis and repair of climate control components and system, recovery/
This course provides experiences for enhancing student skills in the diagnosis and repair of transportation climate control systems. Emphasis is placed on reclaiming, recovery, recharging, leak detection, climate control components, diagnosis, air conditioning equipment, tools and safety. Upon completion, students should be able to describe the operation, diagnose, and safely service climate control systems using appropriate tools, equipment, and service information.

This course covers advanced transportation electronic systems including programmable logic controllers, on-board data networks, telematics, high voltage systems, navigation, collision avoidance systems and electronic accessories. Topics include interpretation of wiring schematics, reprogramming PLSs, diagnosing and testing data networks and other electronic concerns. Upon completion, students should be able to reprogram PLSs, diagnose and test data networks and electronic concerns, and work safely with high voltage systems.

This course covers the terms and procedures for welding various metals used in the transportation industry with an emphasis on personal safety and environmental health. Topics include safety and precautionary measures, setup/operation of MIG equipment, metal identification methods, types of welds/joints, techniques, inspection methods, cutting processes and other related issues. Upon completion, students should be able to demonstrate a basic knowledge of welding operations and safety procedures according to industry standard.

This course provides training in inspecting and driving tractor trailers and assuming driver responsibilities on the road and at pickup and delivery points. Emphasis is placed on defensive driving, federal motor carrier safety regulations, trip planning, cargo handling, vehicle systems, hours of service, and accident prevention. Upon completion, students should be able to demonstrate the skills required for the commercial driver’s license and employment.

WBL 111 Work-Based Learning I
Prerequisites: None
Corequisites: None

This course provides a work-based learning experience with a college-approved employer in an area related to the student’s program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

WBL 112 Work-Based Learning I
Prerequisites: None
Corequisites: None

This course provides a work-based learning experience with a college-approved employer in an area related to the student’s program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

WBL 113 Work-Based Learning I
Prerequisites: None
Corequisites: None

This course provides a work-based learning experience with a college-approved employer in an area related to the student’s program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

WBL 115 Work-Based Learning Seminar I
Prerequisites: None
Corequisites: WBL 111, WBL 112, WBL 113 or WBL 114

This course is designed to be a corequisite seminar to accompany Work-Based Learning 111. Topics include: examination and analysis of the organizational structure, career path, job descriptions, job breakdowns and management style.

WBL 121 Work-Based Learning II
Prerequisites: None
Corequisites: None

This course provides a work-based learning experience with a college-approved employer in an area related to the student’s program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

WBL 125 Work-Based Learning Seminar II
Prerequisites: None
Corequisites: WBL 121, WBL 122, WBL 123, WBL 124

WBL 131 Work-Based Learning III
Prerequisites: None
Corequisites: None

This course provides a work-based learning experience with a college-approved employer in an area related to the student’s program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies.

WEB 111 Intro to Web Graphics
Prerequisites: None
Corequisites: None

This course introduces the creation of web graphics, and addressing problems peculiar to WWW display using appropriate software. Topics include web graphics file types, optimization, RGB color, web typography, elementary special effects, transparency, animation, slicing, basic photo manipulation, and other related topics. Upon completion, students should be able to create graphics, such as animated banners, buttons, backgrounds, logos, and manipulate photographic images for Web delivery.

WEB 151 Mobile Application Dev I
Prerequisites: None
Corequisites: None

This course introduces students to programming technologies, design and development related to mobile applications. Topics include accessing device capabilities, industry standards, operating systems, and programming for mobile applications using an OS Software Development Kit (SDK). Upon completion, students should be able to create basic applications for mobile devices.

WEB 179 JAVA Web Programming
Prerequisites: None
Corequisites: None

This course introduces the development of dynamic, database-driven web applications using the JAVA programming languages. Topics include Object Oriented Programming JAVA Server Pages, servlets, database interactions, and form handling. Upon completion, students should be able to create and modify JAVA-based internet applications.

WEB 210 Web Design
Prerequisites: CIS 110 or CIS 111
Corequisites: None

This course introduces intermediate to advanced web design techniques. Topics include customer expectations, advanced markup language, multimedia technologies, usability and accessibility practices, and techniques for the evaluation of web design. Upon completion, students should be able to employ advanced design techniques to create high impact and highly functional web sites.

WEB 213 Internet Mkt & Analytics
Prerequisites: None
Corequisites None

This course introduces students to Search Engine Optimization (SEO), Search Engine Marketing (SEM) and web analytics. Topics include Search Engine Optimization (SEO), Pay Per Click advertising (PPC), Search Engine Marketing (SEM), web analytics, eye-tracking software and email marketing. Upon completion, students should be able to set up, monitor and maintain SEO optimized websites; and develop strategies for online marketing and advertising plans.

WLD 110 Cutting Processes
Prerequisites: None
Corequisites: None

This course introduces oxy-fuel and plasma-arc cutting systems. Topics include safety, proper equipment setup, and operation of oxy-fuel and plasma-arc cutting equipment with emphasis on straight line, curve and bevel cutting. Upon completion, students should be able to oxy-fuel and plasma-arc cut metals of varying thickness.

WLD 112 Basic Welding Processes
Prerequisites: None
Corequisites: None

This course introduces basic welding and cutting. Emphasis is placed on beads applied with gases, mild steel fillers, and electrodes and the capillary action of solder. Upon completion, students should be able to set up welding and oxy-fuel equipment and perform welding, brazing, and soldering processes.

WLD 115 SMAW (Stick) Plate
Prerequisites: None
Corequisites: None

This course introduces the shielded metal arc (stick) welding process. Emphasis is placed on padding, fillet, and groove welds in various positions with SMAW electrodes. Upon completion, students should be able to perform SMAW fillet and groove welds on carbon plate with prescribed electrodes.

This course is designed to enhance skills with the shielded metal arc (stick) welding process. Emphasis is placed on advancing manipulative skills with SMAW electrodes on varying joint geometry. Upon completion, students should be able to perform groove welds on carbon steel with prescribed electrodes in the flat, horizontal, vertical, and overhead positions.

| WLD 121 GMAW (MIG) FCAW/Plate | 2 | 6 | 0 | 4 |  |  |  |  |
| Prerequisites: WLD 110 or WLD 112 | Corequisites: None |  |

This course introduces metal arc welding and flux core arc welding processes. Topics include equipment setup and fillet and groove welds with emphasis on application of GMAW and FCAW electrodes on carbon steel plate. Upon completion, students should be able to perform fillet welds on carbon steel with prescribed electrodes in the flat, horizontal, and overhead positions.

| WLD 131 GTAW (TIG) Plate | 2 | 6 | 0 | 4 |  |  |  |  |
| Prerequisites: None | Corequisites: None |  |

This course introduces the gas tungsten arc (TIG) welding process. Topics include correct selection of tungsten, polarity, gas, and proper filler rod with emphasis placed on safety, equipment setup, and welding techniques. Upon completion, students should be able to perform GTAW fillet and groove welds with various electrodes and filler materials.

| WLD 132 GTAW (TIG) Plate/Pipe | 1 | 6 | 0 | 3 |  |  |  |  |
| Prerequisites: WLD 131 | Corequisites: None |  |

This course is designed to enhance skills with the gas tungsten arc (TIG) welding process. Topics include setup, joint preparation, and electrode selection with emphasis on manipulative skills in all welding positions on plate and pipe. Upon completion, students should be able to perform GTAW welds with prescribed electrodes and filler materials on various joint geometry.

| WLD 141 Symbols & Specifications | 2 | 2 | 0 | 3 |  |  |  |  |
| Prerequisites: None | Corequisites: None |  |

This course introduces the basic symbols and specifications used in welding. Emphasis is placed on interpretation of lines, notes, welding symbols, and specifications. Upon completion, students should be able to read and interpret symbols and specifications commonly used in welding.

| WLD 143 Welding Metallurgy | 1 | 2 | 0 | 2 |  |  |  |  |
| Prerequisites: None | Corequisites: None |  |

This course introduces the concepts of welding metallurgy. Emphasis is placed on basic metallurgy, effects of welding on various metals, and metal classification and identification. Upon completion, students should be able to understand basic metallurgy, materials designation, and classification systems used in welding.

| WLD 215 SMAW (Stick) Pipe | 1 | 9 | 0 | 4 |  |  |  |  |
| Prerequisites: WLD 115 or WLD 116 | Corequisites: None |  |

This course covers the knowledge and skills that apply to welding pipe. Topics include pipe positions, joint geometry, and preparation with emphasis placed on bead application, profile, and discontinuities. Upon completion, students should be able to perform SMAW welds to applicable codes on carbon steel pipe with prescribed electrodes in various positions.

| WLD 231 GTAW (TIG) Pipe | 1 | 6 | 0 | 3 |  |  |  |  |
| Prerequisites: WLD 132 | Corequisites: None |  |

This course covers gas tungsten arc welding on pipe. Topics include joint preparation and fit up with emphasis placed on safety, GTAW welding technique, bead application, and joint geometry. Upon completion, students should be able to perform GTAW welds to applicable codes on pipe with prescribed electrodes and filler materials in various pipe positions.

| WLD 262 Inspection & Testing | 2 | 2 | 0 | 3 |  |  |  |  |
| Prerequisites: None | Corequisites: None |  |

This course introduces destructive and non-destructive testing methods. Emphasis is placed on safety, types and methods of testing, and the use of testing equipment and materials. Upon completion, students should be able to understand and/or perform a variety of destructive and non-destructive testing processes.

Courses designated with an asterisk (*) are college transfer courses. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

Lauren Wilson  
Assistant Registrar  
B.A., Hiram College  
e-mail: lwilson@cfcc.edu

Diane Withrow  
Hotel/Restaurant Management Program Coordinator  
B.S., Illinois State University  
M.S., Florida International University  
e-mail: dwithrow@cfcc.edu

John Wojciechowski  
Sustainability Technologies Lead Instructor  
B.Arch., M.Arch., Tulane University  
Registered NC Architect  
Member, American Institute of Architects  
LEED Accredited Professional  
Certified Energy Auditor  
e-mail: jwojciechowski@cfcc.edu

Danielle Woods  
English  
B.A., B.S., M.A., University of North Carolina,  
Wilmington  
e-mail: dwoods@cfcc.edu

Rodney Young  
Counselor  
B.S., M.S., East Carolina University  
e-mail: ryoung@cfcc.edu

Susan Zenner  
Mathematics  
B.A., University of Texas  
M.A., East Carolina University  
e-mail: szenner@cfcc.edu

Larolyn S. Zylicz  
Psychology  
B.A., M.A., East Carolina University  
Ed.D., Clemson University  
e-mail: lzylicz@cfcc.edu
