

About the College

President's Welcome

Thank you for considering Cape Fear Community College! As one of the largest and oldest community colleges in North Carolina, CFCC has helped thousands of students improve their lives through education for more than half a century. At CFCC, there are many opportunities awaiting you, and it is our hope that you will find a class, a program, and ultimately a career path that you will find rewarding.

Our curriculum features over 200 academic and job training programs which include two-year associate degrees along with a variety of diploma and certificate options for specialized training. Many of our programs have been recognized by national and regional accrediting agencies and other professional organizations for achieving high standards and best practices.

We take pride in our college, but more importantly, we take pride in the success of our students. Each member of our faculty and staff is here to help you reach your goal. Our class sizes, whether offered online or face-to-face, are designed to be small so that students can experience engaged, hands-on instruction. In addition, there are numerous resources outside the classroom which can provide extra academic and personal support if you need it.

Our faculty and staff are experts in their fields and are the most dedicated and talented you'll find at any college or university. All of these resources are offered as part of the collective CFCC experience, which is designed to help you reach your educational goal, whether it is to earn a degree, improve your job skills, prepare for a new career, or for your personal enrichment.

For the North Carolina Community College System

Mission Statement

The mission of the North Carolina Community College System is to open the door to high-quality, accessible educational opportunities that minimize barriers to post-secondary education, maximize student success, and improve the lives and well-being of individuals by providing:

- Education, training and retraining for the workforce, including basic skills and literacy education, occupational and pre-baccalaureate programs.
- Support for economic development through services to and in partnership with business and industry.
- Services to communities and individuals, which improve the quality of life.

Adopted by the State Board of Community Colleges, October 1993; revised March 1994, April 1994; reaffirmed January 1998; revised and adopted June 1998; revised and adopted September 2006.

For Cape Fear Community College

Provide high-quality, dynamic, and innovative educational, cultural, training, and workforce development opportunities for individuals, businesses, and industries in New Hanover and Pender counties.

Approved by the CFCC Board of Trustees, November 14, 2018.

Vision Statement

Cape Fear Community College: A world-class college serving diverse communities, promoting excellence through innovation in education, and empowering students for life-long success.

Approved by the CFCC Board of Trustees, November 14, 2018.

College Goals

- Provide exceptional professional, technical, pre-baccalaureate, and life-long education.
- Enhance the regional economy by providing training and educational programs that support a skilled workforce and are responsive to the needs of local employers.
- Promote the region's technological, cultural, and artistic development and civic involvement.
- Support learning environments that celebrate and value diversity, inclusiveness, and respect, and encourage the personal and intellectual growth of all students, faculty, and staff.
- Provide safe, well-maintained facilities and campuses that leverage industry standard technologies to promote student learning and engagement.
- Support and promote the holistic development of all learners' personal abilities and well-being.

Approved by the CFCC Board of Trustees, November 14, 2018.

About the College

Cape Fear Community College is a comprehensive community college that offers education and training services through numerous (1) **TECHNICAL/VOCATIONAL CURRICULA** in such broad areas as health care, business, engineering technologies, computer sciences, architecture/construction/ interior design, law enforcement and numerous other fields, (2) **COLLEGE TRANSFER/UNIVERSITY PARALLEL** studies in the freshman and sophomore years of baccalaureate programs, and (3) a host of **CONTINUING EDUCATION** programs that can be broadly clustered into such categories as Basic Skills (including Adult High School and GED, among other programs), Occupational Extension (custom-designed training related directly to the in-service training needs of various professions), and Community Services/Self-Supporting classes that may include a wide range of avocational interests.

The core of the College's mission is world-class workforce development.

CFCC is one of fifty-eight institutions comprising the North Carolina Community College System. The North Carolina Community College System and its constituent institutions operate in accord with legislation enacted by the North Carolina General Assembly and as contained in Chapter 115D of the North Carolina General Statutes. Governance of Cape Fear Community College is further defined by policies, rules, and procedures as promulgated in accord with state and federal laws by the North Carolina State Board of Community Colleges, the Cape Fear Community College Board of Trustees, and College officials.

Cape Fear Community College's official service area includes New Hanover and Pender counties. CFCC's Wilmington campus is located in downtown Wilmington and the North Campus is located in Castle Hayne. CFCC offers classes at the Burgaw Center and at the Alston W. Burke Center in Pender County. Several CFCC technical and vocational programs are unique to southeastern North Carolina and to the state as a whole, and the College therefore serves as a regional provider of workforce training. The number of different students annually enrolling at the College typically exceeds 27,000.

Note

The catalog and handbook are published for the purpose of providing information about the College and its programs. Announcements contained herein are subject to change without notice and may not be regarded in the nature of binding obligations on the College or the State. Efforts will be made to keep changes to a minimum, but changes in policy by the North Carolina State Legislature, the North Carolina Community College System, or by local conditions may make some alterations in curricula, fees, etc., necessary.

Non-Discrimination Policy

Cape Fear Community College, its faculty and staff, and the Board of Trustees are committed to equality of educational opportunity. The College does not discriminate against applicants, students, or employees. Moreover, the College is committed to cultural diversity and actively seeks larger numbers of minorities within the College community. This policy applies to both students and employees at all levels of the College's operations.

Cape Fear Community College (CFCC) upholds the freedoms of speech and expression guaranteed by the First Amendment of the U.S. Constitution for all members of the college community. CFCC is a place where all ideas and opinions may be expressed freely. The right to free speech and expression does not include unlawful activity that endangers the safety or well-being of any member of the college community. Furthermore, it does not include any activity that interferes with the educational pursuit of its students or the mission of the college.

To provide a safe learning and work environment, and protect all students, employees, and visitors of the college, solicitation is prohibited and includes, but is not limited to, third-party unsolicited verbal or written communications by mail or email, circulars and/or petitions, handbills, leaflets, pamphlets, posters, flyers, or any literature and printed materials. Salespersons, solicitors and/or external agencies will not be allowed to solicit or distribute these materials or items on college-owned property, or premises, to students or employees unless it is a recognized nonprofit/charitable organization or has prior approval from the President of the college. In addition, salespersons, solicitors, and/or external agencies may not erect a fixed or temporary structure on CFCC campus property or premises unless approved by the CFCC President or designee. Solicitation for personal or financial benefit is prohibited by CFCC employees during designated working hours.

Employees and students wishing to fundraise on campus must obtain prior approval from the Institutional Advancement office, or the President of the college. It is suggested that no employee or student accept monetary gifts.

CFCC reserves the right to remove any individual or organization engaging in solicitation activities on campus without prior approval.

Institutional Accreditation

Cape Fear Community College is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate degrees, diplomas, and certificates. Questions about the accreditation of Cape Fear Community College may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website.

Cape Fear Community College (CFCC) provides the above information to enable interested constituents (1) to learn about the accreditation status of CFCC, (2) to file a third-party comment at the time of CFCC's decennial review, or (3) to file a complaint against CFCC for alleged non-compliance with a standard or requirement. The Commission on Colleges should be contacted only if there is evidence that appears to support Cape Fear Community College's significant non-compliance with a requirement or standard. Otherwise, the Commission on College's website provides membership information and the accreditation status of its members on SACSCOC's website. All other inquiries about Cape Fear Community College should be addressed directly to the college and not to the Commission on College's office.

Member Of

Cape Fear Community College is a member institution of the North Carolina Community College System.

Accreditations and Certifications of Select Programs

Associate Degree Nursing: Accreditation Commission for Education in Nursing, Inc. (ACEN). The address and telephone number of Accreditation Commission for Education in Nursing, Inc. is 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326, (404) 975-5000.

Admissions

Cape Fear Community College operates under an open door admission policy. This means the College is here to assist anyone who can benefit from a CFCC education. To enroll, students must either be a high school graduate (or equivalent) *or* at least 18 years of age. While CFCC advises all students seek a high school diploma or equivalent, admission to certain certificate programs may be granted without prior completion of a high school diploma or equivalency. In addition, admission to the college does not mean that students will be admitted immediately to a program with specified admissions requirements.

General Admissions Process

First-Year Applicants:

Admission to CFCC requires the following:

- Admissions Application – the application can be accessed online on the CFCC Admissions webpage.

- Residency Application – the residency application is available via the Residency Determination Service. Residency determination establishes if a student pays in-state or out-of-state tuition. This is required for all students.
- Official secondary transcript *OR* equivalency (accepted equivalencies include: GED®/HiSET/TASC)

Students are required to submit official high school transcripts with a graduation date or equivalent transcripts with a completion date. Home school students must submit a copy of the home school's approved registration from the state in which they are registered (if applicable) and a home school transcript with graduation date.

Public, private, and home school seniors may be provisionally admitted under one of the following conditions:

-Condition 1: Upon receipt of an official transcript indicating they are a current high school senior. Students admitted provisionally under this condition are required to submit final/official transcripts with a graduation date up until the last day of classes for the session in which the student wishes to enroll.

OR

-Condition 2: Upon receipt of an official letter signed and dated by the high school principal certifying that the student has completed all requirements necessary for high school graduation including an official high school graduation date. The letter must be submitted up until the last day to add a class in the session in which the student wishes to enroll. Students admitted provisionally under this condition are also required to submit final/official transcripts with a graduation date by the next term following initial enrollment or the student will not be allowed to register for classes during the next term.

Provisionally admitted students (*condition 1 and condition 2*) are not eligible for financial aid until a final/official high school transcript with a graduation date is received.

If you have earned an associate's degree or higher from a regionally accredited college or university, you may submit an official college transcript with a graduation date in place of an official high school transcript.

Students wishing to access veteran's benefits are required to submit official transcripts from all schools attended.

In addition to general admission requirements, some programs, including health sciences and Basic Law Enforcement Training, have additional admission requirements, including an approved official high school transcript with a graduation date.

Foreign Transcripts:

Foreign transcripts must be evaluated and translated (if applicable), by a current member of the National Association of Credential Evaluation Services (naces.org) or a current member of the Association of International Credential Evaluators (aice-eval.org). Completed evaluations, along with

copies of the original transcript(s), should be sent directly from the evaluation agency to CFCC Admissions. If the evaluation is sent directly to you, in order for it to be considered official, it must remain in the original sealed envelope. Once opened, it is no longer considered official.

Transfer Applicants:

If you have previously attended a college or university, please follow the general admissions process. While it's not required to submit official college transcripts for general admission, transcripts are required to earn transfer credit, potentially waive placement testing (if applicable), and receive veterans' benefits. Only courses with a grade of "C-" or higher from an accredited college or university are transferable.

Questions regarding your transcript evaluation should be directed to the Registrar's Office. As part of the enrollment process, you will be required to provide a valid Residency Certification Number from the State of North Carolina or complete a Residency Application with the Residency Determination Service (RDS) at ncresidency.org. RDS determines if you will pay in-state or out-of-state tuition.

Students interested in health science programs are required to submit transcripts in advance of individual program deadlines. Visit the CFCC Health Sciences Admissions webpage for more information.

Additional Information Regarding Transfer Credit:

Credits are transferable from regionally accredited two and four-year institutions within the United States. Courses are transferred that compare in content, quality, and credit hours to those offered within the North Carolina Community College System.

Transcripts from institutions that are not regionally accredited are not evaluated by CFCC since the coursework is not generally accepted. A student may request to have the chairperson of the department under which the transfer coursework falls review the coursework to see if it may be accepted by CFCC. If the chairperson decides to award credit, he or she must notify the Registrar's office in writing, who will then post the appropriate credit to the student's record. It is the student's responsibility to provide all of the documentation necessary to complete the evaluation, including course descriptions, syllabi, and any other materials requested by the department chair. Any final decision regarding the acceptance of credits from unaccredited institutions is subject to approval by the Vice President of Academic Affairs. For information about requesting an evaluation of credits from an institution without regional accreditation, the student should contact the Registrar's Office.

Transcripts of coursework completed at a college or university located outside of the United States must be accompanied by a certified English translation course evaluation and course descriptions. Transcripts must be evaluated and translated by a CFCC-approved agency. Qualifying agency evaluations include those approved by a NACES (www.naces.org) or AICE (www.aice-eval.org) before CFCC will review transcripts for admission or transfer credit purposes. An official copy of the evaluation must be sent directly to CFCC or presented in a sealed/official envelope.

Credit for Military Experience - Veteran applicants should request an Official military transcript be sent to the college so that they may receive college credits for military experience and training. Army, Navy, Marine Corps, and Coast Guard go to Joint Services Transcript and request that an official transcript be sent to CFCC. For the Air Force to airforeuniversity.af.edu and request an official transcript. The college grants credit where applicable for military service schools in accordance with the recommendations of the American Council on Education's Guide To the Evaluation of Education Experiences in the Armed Services. Credit recommended must be consistent with the requirements and objectives of an academic program in order to be granted.

Students should be aware that the transferability of these credits is totally at the discretion of the receiving institution and that Cape Fear Community College makes no guarantee of such transfer.

Some courses that depend heavily on technology, speed and accuracy, physical skills, and/or language skills will be subject to review after five years unless the student has been continuously enrolled. Courses subject to review may include, but not limited to, computer, foreign languages, sciences, and trades courses. CFCC reserves the right to not award credit based on the discretion of the appropriate academic area.

Credits transferred from other institutions will be noted on the student's CFCC transcript. Grades achieved at other institutions will not display on a CFCC transcript and will not be used in the grade point average computation at CFCC.

Credit gained through advanced placement testing will require official transcripts from the testing agency.

Experiential learning, proficiency testing from other institutions, and work based learning experience that was evaluated by another institution will not be transferred as course work to CFCC.

Students who wish to receive transfer credit should submit official copies of all transcripts two weeks prior to registration so that evaluation of transfer credit can be completed. It is the student's responsibility to provide transcripts and to make the college aware of potential transfer credits. Students should not sign up for courses for which they could potentially be awarded transfer credit for. Students who choose to remain in courses that they may receive transfer credit for are subject to the college's stated refund policy if they decide to drop the course after courses begin. Faxed transcripts are not acceptable.

To receive a degree, diploma or certificate from CFCC, transfer students must complete at least 25 percent of program credits/requirements from CFCC.

Re-Admission of Curriculum Students:

Students (including CFCC graduates) returning to CFCC who have not been enrolled for one (1) or more academic years must submit a new admissions application. If you have had a period of non-enrollment, you may be required to complete the Residency Determination Service Application. This application determines if you will pay in-state or out-of-state tuition and is mandated by the State of North Carolina

via the Residency Determination Service. For further information, please see the General Admissions Process.

Health Science Enrollment Center (HSEC) / Health Science Programs:

The HSEC is an information portal for students interested in the healthcare field. Students can get information about CFCC's health-related programs through Curriculum and /or Economic and Workforce Development. The college offers programs that are selective admissions or open enrollment. The staff in the center are available to help students understand specific program requirements and the scope of the various professions. They can make referrals based on the student's needs, including career exploration. The Health Science Center is located on the Wilmington Campus on the second floor of Union Station (U-297), and can be reached by phone at 910-362-7139 or by email at healthsciences@cfcc.edu. For additional information and to review selective admission programs, please visit the appropriate academic program page or Health Sciences Enrollment Center on the CFCC website.

Selective Admission Health Science Programs:

Associate Degree Nursing (AAS)

Associate Degree Nursing Transition (AAS)

Cardiovascular Sonography (AAS & Diploma)

Dental Assisting (Diploma)

Dental Hygiene (AAS)

Medical Assisting (AAS & Diploma)

Medical Laboratory Technology (AAS)

Medical Sonography (AAS)

Occupational Therapy Assistant (AAS)

Pharmacy Technology (AAS & Diploma)

Practical Nursing (Diploma)

PN to RN Accelerated Path (AAS)

Radiography (AAS)

RIBN (in collaboration with ECU)

Surgical Technology (AAS)

Veterinary Medical Technology (AAS)

In addition to meeting general college admission requirements, students applying to selective admission programs must first meet program specific requirements. These include:

- Complete the college and program application processes by established deadlines
- Ensure that official high school and college transcripts (if applicable) are on file at CFCC
- Meet CFCC minimum GPA requirements
- Meet minimum English and math requirements
- Meet science course requirements
- Meet admissions test requirements (TEAS)
- Meet any additional requirements as described in the information packets of each selective health science program (these are accessible at the individual health science webpage)

An overview of these requirements can be found on the CFCC Health Sciences Enrollment webpage and the CFCC Health Sciences Admission Steps webpage.

Open Enrollment Health Science Programs:

Emergency Medical Science (Curriculum and Workforce Development)

Health and Fitness Science (Curriculum only)

Nurse Aid (CCP High School and Workforce Development only)

Phlebotomy (Workforce Development only)

Human Services Technology (Curriculum and Workforce Development)

In addition to the above-listed programs, CFCC also offers a variety of health science career paths that reflect market needs through the Economic and Workforce Development Department. These can be accessed on the CFCC Economic and Workforce Development Healthcare careers webpage.

Admission as a Special Credit Student (Non-Degree Seeking):

Students who do not wish to enter a degree, diploma, or certificate program may enter CFCC as "special credit" students. To be admitted as a Special Credit student, the student need only submit a completed college application, residency determination, and must be 18 years of age or older. Special credit students must meet course prerequisites. Admission as a special credit student does not constitute admission to any other curriculum program. Students who enter a curriculum program from special credit status must meet all standard admissions requirements prior to changing their program and prior to registration. Special Credit students are not eligible to receive financial aid or Veteran's benefits.

Admission of Visiting Students:

Visiting students are those who are admitted and enrolled at another college or university and wish to enroll at CFCC to supplement their coursework. Applicants should follow the general admissions process and select "visiting student or special credit" as the program of study/major on the admission application. Visiting students must meet and verify course prerequisites prior to registration.

Provisional Admission:

Provisional admission is granted prior to the last day to register. Students whose official high school transcripts have not been received by the Admissions Office at the time of registration may be admitted provisionally. Financial Aid will not be available to a student who is provisionally accepted until the final official transcript is received in the Admissions Office. All admissions requirements must be met within thirty (30) calendar days from the first day of the academic session. Those students who do not meet admissions requirements within thirty (30) calendar days may be dropped from courses. Students will not be allowed to register for upcoming semesters until all admission requirements are met.

Admission of International Students:

Cape Fear Community College does not issue the necessary documents to obtain the F, J, or M student visas. Other visas may be acceptable for admission. Contact the Director of Admissions for further information.

Undocumented Immigrants & Deferred Action Childhood Arrival (DACA) Students:

Undocumented Immigrants

According to state board code 1D SBCCC 400.2 Admission to Colleges, community colleges shall admit an undocumented immigrant only if he or she attended and graduated from a US public high school, private high school, or home school that operates in compliance with State or local law. Undocumented immigrants will be charged the out-of-state tuition rate, can be prohibited from enrolling in programs that lead to professional licenses, and are required to register on the final day of registration.

DACA Students

Current North Carolina Community College System policy allows DACA applicants to enroll at CFCC at the out-of-state tuition cost. Acceptance to the college does not guarantee admission to certain programs.

Pre-Registration Requirements:

Prior to registering for classes, students must:

- Complete Orientation
- Determine Course Placement
 - Students who graduated from a US public, private, or home school will be placed based on their unweighted high school GPA.
 - Students who earned the GED from 2014-present will be placed based on their GED scores.

- Students who graduated high school more than 10 years ago or who have an Adult High School Diploma, GED prior to 2014, HiSet, TASC, or Foreign High School Diploma have the option to take a placement test to improve their course placement. Placement testing is not required in order to be admitted to the college.

Information about other ways course placement can be improved besides placement testing can be found at Course Placement and Placement Testing Options.

Students who are eligible to test and would like to take the placement test in order to improve course placement can visit the Placement Testing Reservation Calendar webpage to learn more about how to schedule the placement test.

There is no charge for the placement test. You may take the placement test twice (one initial test and one retest). In order to request accommodations based on a documented disability, requests for approval, assistance, and scheduling must be arranged through CFCC's Student Accessibility Services office (910-362-7800).

Medical Examinations:

A medical history and/or drug screening is required for certain programs, including Marine Technology and Health Sciences programs. Students are notified of this requirement as applicable to their programs of study. Contact Program Director or Department Chair for further information.

Right to Deny Admission:

The College reserves the right to refuse admission or readmission to any applicant during any period of time that the student is suspended or expelled from any other educational entity. 23 SBCCC 02C.0301 (d).

The College reserves the right to refuse admission to any applicant if it is necessary to protect the safety of the applicant or other individuals. 23 SBCCC 02C.0301 (e) and (f).

Applicants who are refused admission have the right to an appeal. To initiate such an appeal, the applicant must submit a written appeal to the Vice President for Student Services within five (5) calendar days after being notified of the refusal to admit. The Vice President for Student Services will present the appeal to the Judicial Board within (5) calendar days of receipt of the written appeal. If the student wishes to appear before the Judicial Board, the request must be included in the written appeal. The Vice President for Student Services will notify the applicant of the Judicial Board's decision. The decision of the Judicial Board shall be final with no further appeals.

Contacting the Office of Admissions

Mail official correspondence to:

Office of Admissions

Cape Fear Community College

411 North Front Street

Wilmington, NC 28401

Official Documentation Statement:

High school transcripts, equivalency score reports, ACT/SAT score reports, college transcripts, and other official documentation related to admission, must be received directly from the high school or organization by mail or electronically from an approved provider. Official electronic transcripts should be e-mailed to transcripts@cfcc.edu (this must be from an approved agency or organization). If you have questions regarding your documents, please contact the Registrar or Admission Office.

Campus Visits

Cape Fear Community College encourages prospective students to visit the campus and tour our facilities. Guided tours may be scheduled Monday through Friday when classes are in session. Appointments are necessary to ensure that appropriate staff will be available to answer questions. Information pertaining to academic programs, student services, and the admissions/registration processes will be presented during the tour. Tour dates and times are available on the CFCC Campus Tour webpage.

Housing

The College does not have housing facilities. However, upon request and if known, college officials will provide students information concerning available housing. Students are advised to have a clear understanding with landlords regarding all rental and/or lease agreements. Students are urged to make housing arrangements well in advance of enrollment.

Supplemental Studies

To help ensure student success, the college offers courses to students who need help in the basic skills: mathematics, reading, and writing. These courses are required for those students who have been identified as needing enhancement in these skills.

Supplemental courses count toward registered credits as it applies to financial aid, veterans benefits, and enrollment status. These courses do not count as attempted or earned hours, nor do they count in a student's academic grade-point average.

CFCC will recognize courses completed with an equivalent grade of "C" or above at other North Carolina accredited institutions. The transfer evaluation will be used for class placement by the advisor.

Please Note:

Prerequisites: A course taken prior to another course.

Corequisites: A course taken at the same time as another course or prior to the course to be taken.

Some courses in communications, humanities/fine arts, mathematics, natural science, or social/behavioral science may fulfill a general education requirement in one of the following programs: AA (Associate in Arts), AS (Associate in Science), AFA (Associate in Fine Arts), AGE (Associate in General Education), AAS (Associate in Applied Science), DIP (Diploma), or CER (Certificate). Please refer to the programs of study section of this catalog for courses that satisfy each program's general education requirements.

Orientation

The Student Services and Enrollment Management Division offers an orientation program to acquaint new students to the College, its facilities, resources, services, activities, organizations, and policies. This orientation is mandatory for all new students prior to class registration.

Testing

Course placement for all applicants to the college is determined by the unweighted high school GPA. Some applicants to degree, diploma, and certain certificate programs may have the option to take the RISE placement test in order to improve curriculum course placement. The placement test is not an entrance exam. The primary purpose of the placement test is to determine the individual's skill level and readiness. Test results will be used to determine the need, if any, for supplemental placement.

Placement tests are administered in the following areas: English and Math.

Reinforced Instruction for Student Excellence: RISE

Beginning academic year 2020/21, students' math and English placement will be determined primarily by their unweighted high school GPA using the following guidelines:

- Students with a GPA of 2.8 or higher may register for college-level math and English courses.
- Students with a GPA of 2.2 to 2.799 will be directed to appropriate prerequisite courses, which must be completed prior to taking college-level math and English courses.
- Students with a GPA below 2.2 will be required to enroll in math and English transition courses through the Learning Resource Center.

Students who graduated from high school more than 10 years ago or who graduated from an Adult High School or Foreign High School or received a pre-2014 GED high school credential or a HiSet or TASC high school credential are eligible to take the placement test to improve course placement. Placement testing is not required for admission to the College.

The RISE Placement Test

The The RISE Placement Test is an un-timed test taken on a computer. Fluency using a computer is not needed to take the test. The test is divided into two sections: English and Math. There is no fee for the test.

Testers need to bring a picture ID when coming to a test session. Testers should arrive at the testing center fifteen (15) minutes prior to the start of the testing session. Parking for testers is available in visitor parking on the open surface lots on the Wilmington or North Campuses.

Testers can access the testing schedule and sign up for a testing session by visiting the Testing Services website: CFCC Placement Testing Reservation Calendar webpage.

Testing is generally offered every week that the college is open. To request accommodations based on a documented disability, requests for approval, assistance, and scheduling must be arranged through CFCC's Student Accessibility Services office (910-362-7800).

A schedule of dates/times of the Placement Tests can be obtained from CFCC's Placement Testing Reservation Calendar webpage.

Testing for First Responder Programs:

Applicants to First Responder Programs that require pre-admissions tests will be referred to Testing Services for testing and be given information by the programs regarding what tests they need to take.

Retest Policy

Testers may only take the placement test twice.

High School Equivalency Exam Testing

The General Educational Development (GED®) Exam is a computer based High School Equivalency (HSE) test administered at CFCC. GED® exam registration is done on the website <https://ged.com/>. Please see CFCC's Academic and Career Readiness Dept. for information about taking GED® classes to help prepare for GED® exams.

Tuition & Fees

Tuition is established by the North Carolina State Legislature and is subject to change without prior notification. Current tuition costs can be found on CFCC's Tuition and Fees webpage or in the Admissions Office.

Tuition is due and payable on the day of registration unless otherwise noted. Any deferred payment or exceptions must be approved by the Vice President for Business Services. Self-supporting classes are not free for any student. If tuition is a major factor in the student's determination to attend CFCC, the student should contact the Financial Aid Office as soon as possible.

Students who register for a course and do not attend at least once during the first 10 percent of the course will be dropped as a no show and not allowed to proceed with the course.

Payments can be made by cash, check, debit card, MasterCard, Visa, American Express, and Discover. Self Service is available for making payments by debit, credit cards, and checks. Payments are not accepted via the telephone. There is a third-party Payment Plan option available on the website if you need to make monthly payments.

Student Fees

A non-refundable student fee is charged to all curriculum students for the Fall and Spring semesters. This fee is due and payable on the day of registration. The maximum fee charged is \$105.00 per academic year but is subject to change.

Funds collected from activity fees are used to support the costs of student publications, athletics, social activities sponsored by the Student Government Association, and student identification cards.

In the fall of 2003, the Board of Trustees of Cape Fear Community College approved a non-refundable "Technology Fee" to be charged to all curriculum students for the Fall, Spring, and Summer sessions. The \$3.00 per credit hour fee, not to exceed \$48.00 in a semester, is due and payable on the day of registration.

Refund of Curriculum Tuition

A 100 percent tuition refund will be made if the pre-registered curriculum student officially drops any/all classes prior to the first day of the College's academic session/semester. Students are also eligible for a 100 percent tuition refund if the College cancels the class. Drops within the 75% refund period must be processed online through Self Service.

A 75 percent refund will be made if the student officially drops a class(es) during the period starting from the first day and ending on the 10 percent day of the course.

Classes beginning at times other than the first week (seven calendar days) of the semester

A 100 percent refund shall be made if the student officially drops from the class prior to the first class meeting. Students are also eligible for a 100 percent tuition refund if the College cancels the class.

A 75 percent refund shall be made if the student officially drops from the class prior to or on the 10 percent point of the class.

Students who have not attended at least once by the 10 percent date of the class will be dropped by the instructor as a "No Show" and not allowed to continue with the course.

Return Check & Credit Card Chargeback Guidelines

Tuition payment made with a check or credit card returned by the bank will be considered nonpayment of tuition. Students will lose their classes or will not be able to attend classes until full restitution is made. Absences incurred due to nonpayment of fees will be counted in accordance with the College's attendance policy.

A returned check processing fee will be charged in the amount of \$35.00 for a paper check or e-check when payment is refused by the bank for any reason. A chargeback processing fee will be charged in the amount of \$35.00 for a credit card chargeback.

Tuition Refund Appeal Procedure

Tuition refund appeals must be in writing and are reviewed by the Vice President for Student Services and appropriate area staff (in direct consultation with the Business Office). Appeals that do not represent a sound basis for reimbursement will be denied.

Written notification of approval/denial of appeals normally occurs within two weeks.

If a tuition refund appeal is denied by the Vice President of Student Services, a second-level appeal may be initiated by a student in writing. The Executive Vice President (or designee) conducts the second-level review. The Executive Vice President (or designee) will respond to a second-level appeal in writing within 10 working days. The decision made at the second level is final. Should an appeal be approved, Cape Fear Community College will promptly refund tuition and/or cancel a financial charge from a student's account.

Submitting an Appeal

Tuition refund appeals will not be considered unless the student has officially withdrawn from the class(es). Students who are receiving financial aid should check with the Financial Aid Office prior to withdrawal to determine what effect this action may have on future financial aid eligibility and/or balances that may be owed if students withdraw from all classes before the 60% point. All tuition appeals must be in writing and submitted with supporting documentation to the Vice President for Student Services no later than fifteen (15) workdays after the start of the subsequent school term.

Tuition appeals may generally be approved for the following reasons as long as the appropriate written supporting documentation is provided

- Extended incapacitation/hospitalization of the student (which caused the student to miss 20 percent or more of scheduled instruction) documented by a physician's statement on the doctor's official letterhead (copies of the student's medical records will not be accepted). This must be an unscheduled medical emergency diagnosed after the last day to drop for a tuition refund. The physician's letter (on his/her letterhead) must include the date the student was first seen for the medical condition, as well as the beginning and end date the student was incapacitated/hospitalized, and must state that the student was physically unable to participate in classes during this period of time. A letter that does not specifically state, "the student was physically unable to attend classes" will not be grounds to approve an appeal.
- Extended incapacitation/hospitalization or death of a student's immediate family member (which caused the student to miss 20 percent or more of the scheduled instruction) – verified

with appropriate documentation. Immediate family is defined as father, mother, spouse, child, sibling, stepfather, stepmother, stepchild, stepbrother or step sister.

- Administrative difficulties with internships, placements or practicums involving the single enrollment of a student with supporting material from placement official.
- Late notifications of denial to a specific degree program with supporting documents.
- Institutional errors by CFCC that cause the delay of administrative processes relative to registration or the delivery of financial aid funds.

*Other items may be considered with valid supporting documentation and/or evidence.

Tuition appeals will not be approved in the following instances:

- Personal errors in judgment or irresponsibility involving transportation, availability of finances, academic ability, time management, etc.
- Misinterpretation or lack of knowledge of college policies and procedures as published in the CFCC Catalog & Student Handbook or CFCC Schedule of Classes.
- Dissatisfaction with course content; issues concerning academic instruction must be addressed with the appropriate Department Chair and/or Academic Dean.
- Dissatisfaction with academic progress in course(s).
- Non-attendance or minimal attendance of class.
- Inadequate investigation of course requirements prior to registration and attendance.
- Non-qualification, late application, or loss of eligibility for financial aid or scholarship.
- Non-receipt of mail or electronic mail due to obsolete address on file with the Registrar's Office.
- Changes of, or personal conflicts with, the instructor of record.
- Student error resulting in the delay of administrative processes relative to registration or the delivery of financial aid funds.
- Voluntary/involuntary acceptance of employment or other activity affecting the ability to attend class. (i.e. work schedule/hours changed; lack of childcare; vacation).
- Incarceration in a civilian or military facility.
- Other reasons not already specified.

Last updated: Approved 1/19/17

Statement on Involuntary Military Orders*

Involuntary changes in military orders that result in the active duty member moving outside the New Hanover or Pender County areas are automatically refunded 100% of tuition unless the active duty member decides to remain enrolled in online classes after redeployment. Such changes will be documented by the commanding officer or the student providing valid and properly endorsed orders (includes dependents enrolled at Cape Fear Community College).

Orders must be Permanent Change of Duty Orders. Short-term orders (for more than 20 percent of the class sessions) associated with a national emergency may qualify.

(Approved 1/11/17- College Council).

Electronic Signature Policy for Students

Cape Fear Community College (CFCC) recognizes an electronic signature as a valid signature from employees and students subject to Conditions 1 and 2 below:

Condition 1: Campus Network Username and Password

- Institution provides student with a unique username
- Student sets his or her own password
- Student logs into the campus network and secure site using both the username and the password

Condition 2: Student Login ID and Personal Identification Number (PIN)

- Institution provides student with a unique PIN
- Student sets his or her own PIN
- Student logs into a secure site using both the login ID and PIN

An electronic signature is defined as any electronic process signifying an approval to terms, and/or ensuring the integrity of the document, presented in electronic format.

Students use electronic signatures to register, check financial aid awards, pay student bills, obtain unofficial transcripts, update contact information, log into campus computers, complete forms, submission of class work, tests, etc.

It is the responsibility and obligation of each individual to keep their passwords and PIN private so others cannot use their credentials. This is further explained in the CFCC Student Catalog section on "Computer Acceptable Use Policy."

Once logged in, the student is responsible for any information they provide, update, or remove. CFCC will take steps to ensure both the passwords and PIN are protected and kept confidential. Furthermore, users are responsible for logging out of all systems and exercising the necessary precautions when using publicly accessible computers.

This policy is in addition to all applicable federal and state statutes, policies, guidelines, and standards. The policy as it applies to employees is explained in Section 9.13.1 Computer Use Policies of the CFCC Faculty and Staff Handbook.

Student Identification Card

The student ID card is included as part of the curriculum student tuition and fees. The ID card should be carried at all times and presented upon request to a College representative. The ID card serves as the

College library card, permits access to campus parking decks, and is required for participation in campus events and sports activities. Lost cards should be reported and a replacement card purchased for \$10.00. To obtain an ID card, students need to present their current CFCC schedule, proof of tuition payment, and a photo ID, such as a driver's license, passport, or military ID.

Insurance

Student Accident Insurance is a secondary policy and provided at no additional cost to all registered and enrolled curriculum and continuing education students for injuries sustained while the insured student is:

- Participating in activities sponsored, and supervised, by the college, excluding intercollegiate athletics;
- Traveling during college-sponsored activities when transportation is provided, or arranged by the college;
- Traveling directly to or from the insured's home premises and the site of such covered college-sponsored activities.

Students are encouraged to seek medical attention from their primary provider as soon as it is needed.

Student Professional Liability Insurance

Nursing and Allied Health, selective admission programs, and/or programs that require time in clinical settings and/or work based learning, may require additional student professional liability insurance to protect the student, the college, and the community site or partner. Please see the respective program coordinator or director for more information concerning additional fees that may be associated with admission.

United Healthcare Short-Term Insurance Program

Short-term health insurance is designed for individuals who do not currently have health insurance, are seeking alternative health insurance coverage for the short term basis, and/or low deductible (co-pay) alternative medical plans. CFCC partners with CCSI (Community College Student Insurance) to offer a student health insurance program with individual coverage to any CFCC student. To learn more about this short-term health insurance, and specific eligibility and/or requirements, please register online at Community College Student Insurance, and one of their licensed insurance agents will assist you in selecting a plan to meet your objectives and/or needs.

Textbooks, Educational Tools, and Fees

Students are expected to purchase textbooks which are usually available from the college bookstore at the beginning of each academic session. Although not required in all courses, additional educational tools are required in certain courses and programs. Some PED courses require an off-campus gym fee.

Cameras, chef's tools, safety eyewear, steel-toed boots, and computers are examples of educational tools that are required for specific courses and/or programs. The bookstore does not have a charge or credit system; therefore, books and tools must be paid for at the time of purchase. Effective July 1, 2010, textbook pricing information for curriculum courses will be available on the College's website as required by the Higher Education Opportunity Act.

Bookstore

There are two CFCC bookstores. The Wilmington Campus store is located on the ground floor of the Health Sciences (L) building. The North Campus store is located in room NA114 in the McKeithan Center. The bookstores provide textbooks, supplies and other collegiate materials. Hours of operation and policies governing textbook refunds and buybacks are posted in the bookstores.

Transcript of Record

(Curriculum and Continuing Education)

Upon written request of the student, a transcript of classes taken and credits earned at Cape Fear Community College will be sent to other colleges or third parties. Transcripts must be requested through the College's website on the Request a Transcript webpage. The non-refundable cost for an official transcript is \$7.00 each.

Graduation Fees

The cost for caps and gowns is paid by the student directly to either the bookstore or to the company representative from whom they are being ordered. There are no additional fees to apply for graduation.

Institutional Indebtedness

No student will be permitted to receive their degree, diploma or certificate, register for classes, or have a transcript issued until all financial obligations to the College are satisfied.

Personnel in the Armed Services

Any active duty member of the armed services or a military dependent who does not qualify as a North Carolina resident for tuition purposes may be eligible to pay a reduced tuition rate if eligibility requirements for the Military Tuition Benefit (N.C.General Statute Section 116-143.3) have been met. Members for reserve components are not eligible for the benefit unless they have been called up for active duty.

Financial Aid

Cape Fear Community College administers Federal, State and institutional aid programs designed to assist students and their families in meeting the cost of obtaining a college education. These aid programs are intended to supplement available family resources, considered to be the primary source of educational funding.

Financial Aid Self-Service

Financial Aid self-service is a personalized, automated, online checklist that keeps everyone on track and up to speed from submission to completion of the student's Financial Aid package. Self-Service can be accessed via a mobile device. This feature allows Cape Fear Community College students to access their financial aid information in one location.

1. Log into mycfcc. 2. Select Self-Service, and 3. Then select Financial Aid.

Students can view:

- To verify if the FAFSA application has been received.
- An interactive checklist of things needed for the completion of their application.
- Their award(s) details.
- Their Satisfactory Academic Progress (SAP). This means the student can track their SAP status to make sure they are making the cumulative 67% completion and 2.0 GPA necessary to be eligible for aid.
- Loan history - so students can keep track of the total amount borrowed.
- Lifetime Pell eligibility - which maximizes out at 600%.
- Student Finance Account Summary.

Available Aid Programs

Federal Pell Grant

The foundation of federal student financial aid, Pell Grants are awarded only to undergraduate students (those who have not earned a bachelor's or graduate degree) who demonstrate financial need.

Federal Supplemental Educational Opportunity Grant (FSEOG)

Supplemental Grants are awarded to undergraduate students. Federal Pell Grant recipients receive priority for FSEOG awards.

Federal Work Study (FWS)

Work-study awards provide part-time employment opportunities for eligible students to earn money to meet college expenses.

Federal Direct Stafford Loan

The U.S. Department of Education provides the funding for student loans which are borrowed money that must be repaid with interest. Student must be enrolled in at least six credits each semester to be eligible. Returning student must have earned 30 credit hours to be eligible to borrow a second-year loan.

Federal Direct PLUS Loan

PLUS loans are available to eligible parents of dependent students who are enrolled in at least six credits each semester. Parent loans are borrowed money that must be repaid with interest.

North Carolina Grant

The NC Scholarship works with federal aid to provide a guaranteed amount of financial assistance with additional state funding provided to students with exceptional need.

Students enrolling at a North Carolina Community College with an Adjusted Gross Income (AGI) of \$75,000 or less and an Expected Family Contribution (EFC) of 7,500 or less, as reported on the FAFSA, are guaranteed at least \$2,800 from combined federal and state aid.

Eligibility

- Be a North Carolina resident as defined by North Carolina Residency Manual
- Enroll for at least 6 credit hours
- Be admitted, enrolled, and classified as an undergraduate student in a degree, certificate or diploma program at one of the North Carolina Community Colleges

Institutional Scholarships

Scholarships are awarded on the basis of financial need, academic excellence, special talent, or any combination thereof. A separate application is required.

Applying for Financial Aid

Apply for FSA ID. It will allow a student to apply online for federal and state financial aid and "sign" the application electronically-no paper is involved. Go to the Federal Student Aid website anytime to request your FSA ID.

Complete the Free Application for Federal Student Aid (FAFSA).

Go to the Federal Student Aid website to apply for financial aid. A "FAFSA on the Web" worksheet is available online to assist in completing the application.

Financial Need and Expected Family Contribution (EFC)

Most federal and state financial aid is awarded based on need. An EFC number is used to determine financial need:

Cost of Attendance
- EFC
= Financial Need

The EFC is a measure of a family's financial strength and indicates how much of the family's resources should be available to help pay educational costs. The EFC is calculated from the information provided on the FAFSA according to a formula established by law.

Verification

Copies of federal tax transcripts and other documents may be required of financial aid applicants to verify the accuracy of the information submitted on the FAFSA. CFCC will notify applicants of documents required to complete the process upon receipt of FAFSA data.

Notification of Awards

Students will receive a notice announcing that the financial aid award has been processed.

Students who are awarded Financial Aid and register for classes, but do not attend at least once by the 10 percent date of the class will be dropped by the instructor as "never attended." Financial aid awards will be adjusted accordingly.

Students who do not qualify for federal or state grant programs will be notified of their non-eligible status.

Eligibility After Graduation

Upon graduation, a student's Program of Study will end and they will no longer be eligible to receive financial aid and veteran's benefits until a new program is declared. Therefore, students must contact the Financial Aid, Veteran and Advising offices if they plan to continue enrollment in another program beyond graduation.

Programs Not Eligible for Financial Aid at Cape Fear Community College

Students enrolling in the following programs cannot receive financial aid because the programs do not meet the U.S. Department of Education eligibility requirements.

- Air Conditioning, Heating & Refrigeration Technology (certificate)
- Accounting Analytics (certificate)
- Automotive Customizing Technology (certificate)
- Boat Building (Wooden) (certificate)
- Business Analytics (certificate)
- Carpentry (certificate)
- Collision Repair & Refinishing Technology (certificate)
- Construction Management Technology (certificate)
- Criminal Justice Technology (certificate) and Industrial Security (certificate)
- Electrical Systems Technology (certificate)
- Electronics Engineering Technology (certificate)
- Financial Planning (certificate)
- Industrial Systems Technology (certificate)
- Information Technology Database Programming & Administration (certificate)
- Landscape Design (certificate)
- Landscape Gardening (certificate)
- Sustainable Gardening (certificate)
- Retention Pond Management (certificate)
- Leadership and Business Etiquette (certificate)
- Mechanical Engineering Technology: CAD Drafting (certificate)
- Plumbing (certificate)
- Special Credit (major)
- Sustainability Technologies:
- Sustainability Technology (certificate)
- Sustainability Renewable Energy Technology (certificate)
- Sustainable Building Technologies (certificate)
- Truck Driver Training (certificate)
- Welding Technology SMAW/GTAW (certificate)
- Welding Technology GTAW/GMAW (certificate)

NOTE: Associate in General Education (AGE) Program – No financial assistance is available for free elective courses taken from curriculum programs that are ineligible for financial aid unless the courses are required for completion of the diploma and/or degree programs in the same discipline.

Ineligible Coursework

Title IV aid (Federal Pell Grants and Direct Student Loans) may only be used towards coursework that fulfill the requirements of the current Program of Study. Title IV aid will be adjusted to exclude payment for coursework not required for the current program of study. Students will be responsible for the tuition and fees for those courses that are not covered by Title IV aid. To avoid unexpected charges, students should run a Program Evaluation through Self Service Student Planning after registering for classes to ensure the courses for which they've registered count towards completion of their Program of Study.

Satisfactory Academic Progress for Financial Aid Recipients

Federal and state regulations require that students receiving financial aid maintain satisfactory academic progress (SAP) to be eligible to continue to receive funding. This policy applies to all students receiving assistance from any financial aid program administered by the Financial Aid Office at CFCC.

Qualitative and Quantitative Standards

Financial aid recipients must meet both a "qualitative" and a "quantitative" standard to maintain eligibility for financial aid. Students must maintain a cumulative 2.0 grade point average (GPA) to meet the qualitative standard. Students must also successfully complete 67 percent of all credits in which they enroll to meet the quantitative standard.

Developmental Education courses (designated by course numbers below "100") are included in the calculation of a student's enrollment status. However, no more than 30 Developmental Education course hours can be used to determine a student's enrollment status for financial aid purposes. "Foundation" courses in math and English are NOT eligible for financial aid funding or inclusion in the determination of enrollment status because their content is below the post-secondary level.

Transfer credits from institutions other than CFCC will be totaled and counted in the determination of completion rate and maximum time frame.

Grades of "W", "WP", "WF", "NC", "NS", "I", "R", "U", "XF" and "F" do not count as successfully completed courses but do count as credits attempted and are used in the determination of enrollment status and maximum time frame. Audited courses are not eligible for financial aid funding and are not included in the determination of a student's enrollment status for financial aid purposes.

A student is permitted to repeat a previously passed course one additional time for the repeated course to be eligible for financial aid. A student can repeat a previously-failed course an unlimited number of times. All earned grades will be used to determine a student's compliance with the 2.0 cumulative GPA requirement and all attempted hours will be included in the calculation of maximum time frame.

Timing of Measurement

Satisfactory academic progress is measured after every semester. All terms of enrollment at CFCC are included in the measurement, even if the student did NOT receive financial aid. Summer and mini-sessions are also included.

Failure to Achieve Satisfactory Academic Progress

Students who fail to meet either of the progression standards will receive a warning notice. The preferred method of notification is electronic; messages are sent to the student's CFCC e-mail account. Students on warning are eligible to receive one additional semester of financial aid and are expected to use this period to reestablish satisfactory academic progress.

If a student fails to meet either standard for a second consecutive semester, s/he will receive a suspension notice. No financial aid will be awarded to a student on suspension until the student corrects the academic progress deficiencies. Students who do not meet the satisfactory academic progress requirements for financial aid eligibility can enroll at CFCC without financial aid to correct the deficiencies.

Appeal Process for Probationary Semester

The right to appeal is granted to any student whose financial aid eligibility has been suspended. An appeal must be based on significant mitigating circumstances that seriously impacted academic performance.

The student should submit a written appeal to the Financial Aid Office. An appeal letter must include why the student failed to make satisfactory academic progress and what has changed that will allow the student to make progress at the next evaluation (i. e., at the end of the next semester of enrollment).

An appeal letter must be accompanied by:

- A typed academic plan clearly stating how the student intends to meet progress standards, and
- A copy of the student's degree progress, which is available on the student's Self Service Student Planning account. The degree progress displays completed courses and courses still required for program completion.
- Students are strongly advised to submit third party documentation supporting significant mitigating circumstances. For example, in case of significant medical issues, documentation may require medical reports and signed statements by physicians regarding the circumstances.

An appeal submitted without adequate documentation will be denied.

The appeal letter and supporting documentation submitted by the student will be forwarded to the Financial Aid Committee.

Please note that merely filing an appeal does NOT guarantee continued eligibility for financial aid.

The Financial Aid Appeals Committee will review the appeal within 15 weekdays. Students will be notified of the Committee's decision. The preferred method of notification is electronic; the decision notice is sent to the student's CFCC e-mail account. The decision of the Financial Aid Appeals Committee is final and no further appeals are allowed.

If the appeal is denied, the student may reestablish financial aid eligibility for subsequent semesters ONLY by taking courses, without benefit of financial aid, until s/he is in compliance with all components of the CFCC satisfactory academic progress policy (67% completion rate and 2.0 minimum cumulative GPA).

If the appeal is approved, the student regains financial aid eligibility for one probationary semester. During the probationary semester and all subsequent semesters, the student must achieve a 75% completion rate and maintain a term GPA of 2.0. Failure to do so will result in suspension of financial aid after which the student will regain eligibility ONLY by taking a minimum of six (6) credits, without benefit of financial aid, until s/he is in compliance with all components of the CFCC satisfactory academic progress policy (75% completion rate and 2.0 minimum cumulative GPA). The classes in which a student registers to regain eligibility must be required for program completion. Previously-passed courses which the student retakes will not be included in the determination of Continued on Appeal status.

Maximum Time Frame

To be eligible for financial aid at CFCC, you must complete your degree within the maximum timeframe. This means graduating before accumulating 150% of the attempted credits required for completing your major. Attempted credits include all courses taken at the institution, regardless of whether or not you passed the class. Progression will be monitored using the students' current Program Evaluation. If you do not graduate within the maximum timeframe, your aid will be suspended. If a student earns 67 percent of the credits attempted each semester, the student should complete the program of study within the maximum timeframe. If you have extenuating circumstances, you can appeal your financial aid suspension for maximum timeframe violation only one time.

The 150% count will include transfer credits and all credits attempted in all programs of study in which the student has been enrolled, regardless of whether or not the earned credits apply towards the student's current program or to a previous program. A maximum of 30 hours of developmental coursework will be excluded from the maximum timeframe calculation. Once the student completes a certificate, diploma or degree the credits applied towards that credential will not be included in calculating maximum timeframe.

Maximum Time Frame Appeal

Students who have exceeded the maximum time frame for their declared program of study must submit an "Exceeding Maximum Time Frame" appeal. The student must be meeting the cumulative 2.0 grade point average and 67% cumulative completion rate in order to submit a maximum time frame appeal. An appeal must be based on significant mitigating circumstances that seriously impacted academic performance.

A student is ineligible when it becomes mathematically impossible for the student to complete their active program within 150% (example 2 year degree within 3 years)

A complete maximum time frame appeal will include:

1. The "Exceeding Maximum Time Frame" Appeal form, and
2. A copy of the student's degree progress, which is available on the student's Self-Service Student Planning account. The degree progress displays completed courses and courses still required for program completion.
3. Students are strongly advised to submit third-party documentation supporting significant mitigating circumstances. For example, in case of significant medical issues, documentation may require medical reports and signed statements by physicians regarding the circumstances.

A student for whom a maximum time frame appeal is approved must complete 75% of all attempted credit hours with a minimum 2.0-grade point average each semester following the appeal approval. Failure to do so will result in suspension of financial aid eligibility.

Additional information and forms required to submit an appeal can be found on the Financial Aid Office website.

Student Responsibilities

It is the student's responsibility to monitor satisfactory academic progress as it relates to maintaining eligibility for financial aid. The Financial Aid Office assists with periodic measurement and notification to students who fail to meet the standards.

It is the student's responsibility to notify the Financial Aid Office of any grade change made after the official posting of semester grades.

It is the student's responsibility to follow up with the Financial Aid Office if s/he does not receive an appeal determination notice within three weeks of submitting the appeal.

NOTE: The Satisfactory Academic Progress Policy for financial aid recipients is different than the College's satisfactory progress standards maintained by the Counseling Department that places students on academic warning, probation or suspension for failure to achieve a 2.0 grade point average.

Return of Federal Funds

Financial aid is awarded to students under the assumption that they will attend school for the entire period for which financial assistance is provided to them. Per the U.S. Department of Education,

students must attend at least 60% of the term to be eligible to earn the funds they are awarded. If student receives all "XF" grades for a semester, aid will be recalculated.

Federal regulations require the College to perform a Return of Title IV calculation for students who enroll at the College using Title IV Funds, but who later stop attending classes, without initiating an official withdrawal. The results of the calculations may include full or partial cancellation of Title IV Funds (Pell Grant, FSEOG, Loans), which may result in the student owing funds back to the U.S. Department of Education.

An account balance will be created if the calculation results in the return of financial aid to the Department of Education's Title IV programs. The funds will be returned to the appropriate federal programs in the following order:

1. Unsubsidized Direct Loan
2. Subsidized Direct Loan
3. Federal PLUS Loans
4. Federal Pell Grants
5. Federal Supplemental Educational Opportunity Grants (FSEOG)

Unpaid balances due to CFCC that result from amounts returned will be charged back to the student and must be repaid under the conditions set by the College. Students with unpaid balances may be subjected to the following actions:

- Accounts forwarded to collections for non-payment.
- Registrations for future classes may be dropped.
- Future transcripts requests may be denied.
- Ability to register for classes and/or make changes to class schedules may be suspended.

Last updated: Approved 5/27/17

Tuition/Fees/Books

Students who are eligible for financial aid can charge their tuition, fees, and books up to the amount of their awards. If the amount of financial aid received is less than tuition, fees, and books, the student is required to pay the remaining balance at the time of registration or purchase of books.

Students who have been awarded financial aid and registered for classes, but do not attend at least once by the 10 percent date of the class may be administratively dropped as a "No Show." No-Show students will be removed from the class roster and will not be allowed to continue in the class. Financial aid awards will be adjusted accordingly.

Students will receive a refund for the excess amount of financial aid remaining on their account following the payment of tuition, fees, and books. In order to receive the refund electronically, students may sign up for direct deposit through Self Service under bank information. If a student decides not to sign up for direct deposit then a paper check will be mailed to the address that is currently on file. It is the student's responsibility to make certain that the mailing address on file with CFCC is correct to avoid delays in delivery of refund checks.

Foundation Scholarships

Student scholarships are established through donations to the CFCC Foundation. Criteria for scholarships are specified by a donor in collaboration with Foundation staff, ensuring the most efficient use of the donation while helping as many students as possible.

The Foundation establishes endowed and Annual scholarships. Endowed scholarships are generated through the investment of permanently held principals from which only the interest is used. Annual scholarships are those from which all funds are dispersed as scholarships rather than as long-term investments. These scholarships are commonly referred to as "pass-through" scholarships.

Merit Scholarships

Many outstanding local high school students want to attend CFCC. To assist them, the CFCC Foundation awards ten Merit Scholarships annually to deserving New Hanover and Pender County seniors who exhibit academic excellence. To qualify for a CFCC Merit Scholarship, you must:

- Be a current high school senior
- Have applied for or been approved to enroll in CFCC in a curriculum program
- Submit a letter of recommendation from your high school principal, guidance counselor, or a high school teacher
- Demonstrate academic potential through high school grades, rank in class, and/or aptitude test results
- Be a US citizen or documented alien

Consideration will be given for non-school activities, work experience, and community service. To apply for a Merit Scholarship, students should see their high school counselor or download an application from the Foundation website.

The CFCC Financial Aid Office administers scholarships to CFCC students. Students should contact the Financial Aid office for applications, forms, and specific information (910-362-7338). Scholarships are subject to change without notice. For a current list of available scholarships, please go to the CFCC Foundation webpage. To learn more, please visit the CFCC Foundation website for scholarship applications and additional information.

Student Ambassadors

During the spring semester, Student Ambassadors are selected to represent the College and the Foundation at a variety of college-sponsored events such as student registration and orientation, donor recognition events, and graduation.

Student Ambassadors should possess:

- An outgoing personality
- A professional appearance

- High academic achievement
- Strong oral and written communication skills
- Knowledge of the college and community
- The ability to make a positive impression
- Scheduling flexibility
- Access to transportation
- A high level of commitment to CFCC

Ambassadors must maintain at least 6 credit hours per semester, a 3.0 GPA, and perform 4 hours of work per week during their one-year appointment. Candidates must complete an application package and submit three letters of recommendation from faculty and staff of the College and other mentors from external sources. A committee appointed by the Coordinator of Student Recruitment interviews ambassador candidates and selects students to serve in the following year. Extensive training for new ambassadors is held during the summer.

Ambassadors who maintain program requirements receive funds toward their tuition and fees at the end of each term. Ambassadors are responsible to pay tuition and fees by the stated deadline. Official items of clothing are also provided. Applications for the Ambassador program are available to students in March of each year. For more information contact the Admissions Office.

Vocational Rehabilitation

This is a program administered by the North Carolina Department of Human Resources. The Division may provide services as are necessary to enable a physically, mentally and/ or educationally disabled person to become self-employed. If a prospective student has a disability or is limited in his/her activity because of a disability, he/she may contact the nearest Division of Vocational Rehabilitation Office for consideration of assistance. The Wilmington Unit Office is located at 3340 Jaeckle Drive, Suite 201, Wilmington, NC. The telephone number is (910) 746-6800.

Veterans' Educational Benefits

The Veterans Services Coordinator is located in the Bob Philpott Veterans Center (U-124), and in the Veterans Center on North Campus (NB-200). The coordinator assists our military-affiliated and Veteran students, processes essential documentation, certifies enrollment, monitors academic progress, and ensures classes match program requirements.

The Veterans Services staff provides assistance to our students who are military-affiliated and veterans who are transitioning from military culture to civilian and academic life. The staff also provides guidance on veterans' educational benefits, veterans' resource assistance, and veterans' healthcare.

The eligibility for Veterans' educational benefits is based upon time in service and/or circumstance (disability or death) of the veteran, active duty service member, reserve component member, and National Guardsmen. Military affiliated students include the military student as well as any spouse, child, surviving spouse, or surviving child of a "military student" as defined in 37 U.S.C&101(3).

In order to activate your VA education benefit, the following will need to occur:

- Apply for and obtain the VA certificate of eligibility (COE) on the Veterans Affairs website.
- Submit all official transcripts to CFCC
- Register for classes that are approved within your program evaluation
- Go to your Softdocs account, and submit the VA Benefit Certification form (VBCF)
- Submit the VBCF; it will automatically go to the School Certifying Officials

NOTE: Students must submit their VA Benefit Certification form every semester after they register to receive their benefits.

As of 8/1/22 VA requires all schools to charge the following students in state Tuition and Fees if they are living in the state where the school is located as of the first day of class:

- A Veteran using chapter 30 or chapter 33 who served on a period of active duty of at least 90 days.
- A spouse or child of a Veteran or active-duty service member using transferred benefits.
- A spouse or child using benefits using the Fry Scholarship.
- A spouse or child using Survivors' and Dependents' Educational Assistance Program (DEA/Chapter 35).
- A Veteran using chapter 31

Veteran benefit holders are entitled to priority registration.

Prospective students who are eligible or believe they may be eligible to receive veterans' educational benefits should contact the Veterans Affairs Staff at va@cfcc.edu.

Visit the CFCC Veterans Services webpage for additional information.

Maintaining Eligibility for Veterans Educational Benefits

Satisfactory Academic Progress

Veterans Benefits Administration requires that students receiving VA educational benefits maintain a 2.0 GPA, and Cape Fear Community College's satisfactory academic progress (SAP) to be eligible to continue to receive funding. If the cumulative GPA remains below 2.0 for two consecutive semesters and/or does not meet the 67 percent completion rate, the student will not be eligible to receive veterans' educational benefits. The student has the right to appeal for SAP by contacting the Director of Veterans Affairs office. This policy applies to all students receiving any educational benefit from the VA.

Qualitative and Quantitative Standards

VA educational benefit recipients must meet both a "qualitative" and a "quantitative" standard to maintain eligibility for VA educational benefits. Students must maintain a cumulative 2.0 grade point average (GPA) to meet the qualitative standard. Students must also successfully complete 67 percent of all credits in which they enroll to meet the quantitative standard.

Transfer credits from institutions other than CFCC will be totaled and counted in the determination of completion rate and maximum time-frame.

Grades of "W", "WP", "WF", "NC", "NS", "I", "R", "U", "XF" and "F" do not count as successfully completed courses but do count as credits attempted and are used in the determination of enrollment status and maximum time frame. Audited courses are not eligible for VA educational benefits funding and are not included in the determination of a student's enrollment status for VA educational benefits purposes.

A student can repeat a previously-failed course once. All earned grades will be used to determine a student's compliance with the 2.0 cumulative GPA requirement and all attempted hours will be included in the calculation of maximum time frame.

Timing of Measurement

Satisfactory academic progress is measured after every semester. All terms of enrollment at CFCC are included in the measurement, even if the student did NOT receive VA educational benefits. Summer and mini-sessions are also included.

Failure to Achieve Satisfactory Academic Progress

Students who fail to meet either of the progression standards will receive a warning notice. The preferred method of notification is electronic; messages are sent to the student's CFCC e-mail account. Students on warning are eligible to receive one additional semester of VA educational benefits and are expected to use this period to reestablish satisfactory academic progress.

If a student fails to meet either standard for a second consecutive semester, s/he will receive a suspension (resulting in non-certification) notice. VA educational benefits will not be certified for a student on suspension until the student corrects the academic progress deficiencies. Students who do not meet the satisfactory academic progress requirements for VA educational benefits eligibility can enroll at CFCC without use of VA educational benefits to correct the deficiencies.

Appeal Process for Probationary Semester

The right to appeal is granted to any student whose VA educational benefits eligibility has been suspended. An appeal must be based on significant mitigating circumstances that seriously affected academic performance.

The student should submit a written appeal to the Financial Aid Office. An appeal letter must include why the student failed to make satisfactory academic progress and what has changed that will allow the student to make progress at the next evaluation (i. e., at the end of the next semester of enrollment).

An appeal letter must be accompanied by:

- A typed academic plan clearly stating how the student intends to meet progress standards, and
- A copy of the student's degree progress, which is available on the student's Self Service Student Planning account. The degree progress displays completed courses and courses still required for program completion.
- Students are strongly advised to submit third party documentation supporting significant mitigating circumstances. For example, in case of significant medical issues, documentation may require medical reports and signed statements by physicians regarding the circumstances.

An appeal submitted without adequate documentation will be denied.

Please note that merely filing an appeal does NOT guarantee continued eligibility for VA educational benefits.

The Financial Aid Office will review the appeal within 15 weekdays. Students will be notified of the Financial Aid Office's decision. The preferred method of notification is electronic; the decision notice is sent to the student's CFCC e-mail account. The decision of the Financial Aid Office is final and no further appeals are allowed.

If the appeal is denied, the student may reestablish VA educational benefits eligibility for subsequent semesters ONLY by taking courses, without VA educational benefits, until s/he complies with all components of the CFCC satisfactory academic progress policy (67% completion rate and 2.0 minimum cumulative GPA).

If the appeal is approved, the student regains VA educational benefits eligibility for one probationary semester. During the probationary semester and all subsequent semesters, the student must achieve a 75% completion rate and maintain a term GPA of 2.0. Failure to do so will result in suspension (non-certification) of VA educational benefits after which the student will regain eligibility ONLY by taking a minimum of six (6) credits, without VA educational benefits, until s/he is in compliance with all components of the CFCC satisfactory academic progress policy (75% completion rate and 2.0 minimum cumulative GPA). The classes in which a student registers to regain eligibility must be required for program completion.

Maximum Time Frame

To be eligible for VA educational benefits at CFCC, you must complete your degree within the maximum timeframe. This means graduating before accumulating 150% of the attempted credits required for completing your major. Attempted credits include all courses taken at the institution, regardless of whether or not you passed the class. Progression will be monitored using the students' current Program Evaluation. If you do not graduate within the maximum timeframe, your VA educational benefit will not be certified. If a student earns 67 percent of the credits attempted each semester, the student should complete the program of study within the maximum timeframe. If you have extenuating circumstances, you can appeal your VA educational benefits suspension for maximum timeframe violation only one time.

The 150% count will include transfer credits and all credits attempted in all programs of study in which the student has been enrolled, regardless of whether or not the earned credits apply towards the student's current program or to a previous program. Any developmental coursework will be excluded from the maximum timeframe calculation. Once the student completes a certificate, diploma or degree the credits applied towards that credential will not be included in calculating maximum timeframe.

Maximum Time Frame Appeal

Students who have exceeded the maximum time frame for their declared program of study must submit an "Exceeding Maximum Time Frame" appeal. The student must be meeting the cumulative 2.0 grade point average and 67% cumulative completion rate in order to submit a maximum time frame appeal. An appeal must be based on significant mitigating circumstances that seriously impacted academic performance.

A complete maximum time frame appeal will include:

1. The "Exceeding Maximum Time Frame" Appeal form, and
2. A copy of the student's degree progress, which is available on the student's Self-Service Student Planning account. The degree progress displays completed courses and courses still required for program completion.
3. Students are strongly advised to submit third-party documentation supporting significant mitigating circumstances. For example, in case of significant medical issues, documentation may require medical reports and signed statements by physicians regarding the circumstances.

A student for whom a maximum time frame appeal is approved must complete 75% of all attempted credit hours with a minimum 2.0-grade point average each semester following the appeal approval. Failure to do so will result in suspension (non-certification) of VA educational benefits eligibility.

Additional information and forms required to submit an appeal can be found on the Financial Aid Office website.

Student Responsibilities

It is the student's responsibility to monitor satisfactory academic progress as it relates to maintaining eligibility for VA educational benefits. The Financial Aid Office assists with periodic measurement and notification to students who fail to meet the standards.

It is the student's responsibility to notify the Financial Aid Office of any grade change made after the official posting of semester grades.

It is the student's responsibility to follow up with the Financial Aid Office if s/he does not receive an appeal determination notice within three weeks of submitting the appeal.

NOTE: The Satisfactory Academic Progress Policy for VA educational benefit recipients is different than the College's satisfactory progress standards maintained by the Counseling Department that places students on academic warning, probation or suspension for failure to achieve a 2.0-grade point average.

Registration is the term used for enrolling in classes. Students who need help with course planning should reach out to their faculty advisor or the Academic Advising Center for assistance.

Registering for Classes

Semester System

The academic year is divided into two semesters and summer sessions. The Fall and Spring semesters offer courses in sixteen (16) weeks, a four (4) week mini session, two eight (8) week mini sessions, and one twelve (12) week late start session. The Summer terms are provided either in a ten (10) week session, an eight (8) week late start session, or two five(5) week sessions. Consult the Schedule of Classes for specific scheduling information.

Semester Hour Credit

Each course listed in the catalog and class schedule is followed by a notation on the number of semester hours it earns. Normally, the number of semester hours earned is based on the number of class, laboratory or shop hours spent under the supervision of the course instructor per week for the semester. Usually one semester hour credit is given for each lecture hour of class per week, for each two hours of laboratory work per week, or for each three hours of shop or manipulative laboratory per week. (A class hour is usually defined as 50 minutes of instruction). Exceptions may be made in cases where specific classification is not feasible.

Course Load/Overload

Students enrolled in a fall or spring semester for 12 or more credit hours are designated as full-time students. Students taking 11 or fewer credits during a fall or spring semester are considered part-time. Students enrolled in the Summer Session for 9 or more credit hours are designated as full-time students for insurance purposes. Students receiving Financial Aid benefits must be enrolled for 12 or more credit hours each semester, including the summer, to receive full benefits. Veteran's benefits for the Summer-full time is eight (8) hours for the 10 week session or four (4) hours each five (5) week session. Students who are placed on academic probation may be required to take a reduced course load.

Maximum course loads for which students may enroll are as follows:

- Fall and/or Spring Semester(s)-Eighteen (18) credit hours except when program requirements determine otherwise.
- Summer Term-Thirteen (13) credit hours except when program requirements determine otherwise.

Any exception to maximum course load must be approved by the Director of the Academic Advising Center or the Dean of Student Support Services.

Prerequisites and Corequisites

A prerequisite is a course that must be taken prior to another course. A corequisite is a course that must be taken prior to or concurrently with another course. The college may mandate prerequisites and corequisites to ensure students are prepared to meet the requirements of the course material. Prerequisites and corequisites are identified in the catalog with the course descriptions. Students are responsible for meeting their program requirements, including prerequisites and corequisites. If students sign up for a class and do not meet the prerequisite and/or corequisite requirements they will be administratively dropped from the course.

Students who drop on their own or who are administratively dropped after the first day of class may not be eligible for a full refund. Students are advised to review published course prerequisites and co-requisites carefully before enrolling.

Waiver of Prerequisites and Corequisites

The Vice President for Academic Affairs may waive prerequisites and corequisites. Normally, a waiver will be recommended by the appropriate program director and approved by the department chair, dean, and the Vice President for Academic Affairs.

Priority Registration

Currently enrolled students are assigned registration priorities based on their number of completed CFCC credit hours. Registration information is emailed to students' CFCC email account. Students may register online using Self Service Student Planning. A listing of priority dates and times are listed on the CFCC Records and Registration website.

Auditing Courses

Students who wish to audit courses must register for the audit by following the regular admissions and registration procedures and indicating in writing on an audit form which course(s) they are auditing. Auditing students must meet all course pre-requisites. A student who audits a course section shall not displace students enrolling or registering to receive a grade, academic credit, continuing education unit (CEU) or certificate of completion in the course section. If it is determined by the 10% date of the course that a student seeking a grade, credit, CEU, or certificate needs the course, an auditing student may be administratively dropped to allow space for the other student. The audit form must be signed by the instructor and turned into the Registrar's Office on or before the course start date but not later than the 10% date of the course. Auditing students receive no credit and are not required to participate in class discussion or take tests. At the end of the term, auditing students will receive a grade of "AU" (Audit) or "SR" (Senior Audit). Tuition and fees for audited courses are the same as those taken for credit. Students will be responsible for paying any/all tuition, fees and/or textbook costs. (Seniors age 65+ who plan to audit a course, please read the "Tuition Waiver for Auditing Seniors" paragraph below.) Changes from

audit to credit or credit to audit may only be done during registration and through the last day to add a course for the term. Students should be aware that Financial Aid and Veteran benefits do not pay for audited courses. Audited courses do not transfer.

Seniors (age 65+) who wish to audit a course will follow the same policy and procedure information listed in the "Auditing Courses" paragraph above except that they will receive a waiver of tuition. Auditing seniors are still responsible to pay fees and for any books and supplies needed for the course. In order to receive the waiver, seniors must provide proof of age through a driver's license, state identification card, or other government-issued document. Seniors who receive the waiver are not eligible to change from audit to credit.

Academic Advising

Cape Fear Community College views student advisement as an important, on-going process. Academic advising engages students in developing a plan to reach educational and career goals. Advisors assist students in selecting and scheduling appropriate classes to fulfill educational requirements.

All new students should schedule their **FIRST ADVISING MEETING** with an advisor from the Academic Advising Center. Visit the Academic Advising Center webpage, and click on the blue box labeled "Make an Appointment NEW STUDENT." Find the advisor you should meet with by searching for the first letter of your last name in the list of advisors or you may schedule with the first available advisor.

From that point on, students should meet with their assigned advisor. Students in Career and Technical programs, as well as Health Science programs, are assigned a faculty advisor, an instructor from the student's program of study. Students in University Transfer, General Education, and Pre-Health Science programs, as well as non-degree-seeking students, are assigned an advisor from the Academic Advising Center. The assigned advisor's name is posted in Self-Service Student Planning (accessed from the myCFCC portal) and can also be found in the student's Aviso dashboard.

Students should meet with their assigned advisor each semester for assistance in planning and scheduling classes. Students must accept the responsibility of familiarizing themselves with specific course prerequisites and corequisites and program requirements. While advising is an ongoing process, specific times are designated prior to each registration period for advising.

Self-Service

Self-Service is a web-based portal that is accessed through the myCFCC portal (under Launchpad). Students may use Self-Service Student Planning to review their program progress. Students are encouraged to use the Student Planning feature in Self-Service to plan their entire program of study, register for classes, view class schedules, check grades, view unofficial transcripts, and more. Students may also check financial aid information and make payments in Self-Service.

Academic Program of Study

A Program of Study is a specific or specialized academic field. Students seeking a degree, diploma, or certificate are enrolled in a program of study. All programs of study/curriculum programs can be found in our online catalog.

Program Progress

Self-Service Student Planning is a tool for tracking program completion progress based on the student's catalog of record. Student Planning helps students, advisors, and counselors follow the progress toward completion of a degree, diploma, and/or certificate. Students can also use the system for "what if" scenarios when considering changing majors.

Academic Advising Center

The Academic Advising Center provides both academic advising and career development services including assistance with course selection and registration, transfer planning, career exploration and counseling, job search, and major changes. The center is located on the Wilmington Campus in the Union Station building, room U-240. An academic advisor is also available at the North Campus in the Student Services office suite located on the first floor of the McKeithan Center, room NA-100. Please refer to the Academic Advising Center website to schedule an appointment or for other helpful information. Students may also schedule an advising appointment through Aviso at cfcc.avisoapp.com. Students may choose an on-campus appointment (preferred), virtual appointment using Google Hangouts Meet, or a phone appointment. Walk-ins are also welcome on a first-come, first-served basis.

All new students should schedule their **FIRST ADVISING MEETING** with an advisor from the Academic Advising Center. During this **FIRST ADVISING MEETING**, advisors will teach new students how to use Self-Service Student Planning to register for classes. Students may use the center's computers for web registration. From that point on, students will meet with their assigned advisor (see Academic Advising above). Faculty advisor offices are not located in the Academic Advising Center. They are located in the program department office locations as listed in the Faculty and Staff Directory.

Students who wish to request a change of major should schedule an appointment with an advisor or career counselor in the Academic Advising Center (more information below).

Students enrolled in university transfer programs should meet with their advisor for help in constructing a transfer plan to a four-year college or university. During registration, this transfer plan will guide the student in selecting courses that will help meet admission and program requirements at the four-year school. To further support students with transfer planning, the center hosts visits from regional four-year college and university admission representatives throughout the academic year.

Major Change: Changing Your Official Academic Program

Students who desire to change from one academic program (major) to another must see an advisor or career counselor in the Academic Advising Center to complete a Program Change Form. The advisor will evaluate program requirements and prerequisites and advise the student of any academic deficiencies. Prior to March 2018, incoming transcripts were evaluated for specific majors. Beginning in March 2018, CFCC began to transfer in all courses that meet our transfer criteria. If a transcript was evaluated prior to March 2018 and the student is requesting to change their major, they will need to request a transcript re-evaluation as part of the major change process. Students should complete this process prior to any registration period. Programs changed after the designated deadline date in a term (usually in the first week of the term) will not be effective until the next academic term. The advisor submits the completed form to the Registrar's Office for processing.

Online Learning

Online Learning is dedicated to the design, implementation, and evaluation of high-quality online education. Online Learning staff provides resources and services to assist faculty with learning and utilizing engaging, current technologies and designing and teaching online courses.

Online learning (OL) happens in classes in which all or a portion of instruction takes place online. There are four types of classes with online learning components at CFCC: Internet, Internet Synchronous, Hybrid, and Blended.

- Internet class instruction is delivered 100% online, where the students and instructors do not meet face-to-face but interact entirely in an online environment asynchronously. These classes are always indicated by an "I" in the section code (e.g. CIS-110-I02 and BIO- 240-I01).
- Internet Synchronous class instruction is delivered 100% online, where the students and instructors do not meet face-to-face but interact in an online environment synchronously (Note: Some Internet Synchronous classes could have an asynchronous portion as well). The days/times for the required online synchronous meetings will be posted on students' schedules when they sign up for the class. Internet synchronous courses depend heavily on student interaction during the virtual class meeting; therefore, students must have access to a camera and microphone. Faculty may require students to utilize the camera and microphone to participate during some or all class meetings. These classes are always indicated by an "IS" in the section code (e.g. ENG 111 IS01, SOC 210 IS04).
- Hybrid class instruction is delivered online asynchronously with a requirement that students also meet face-to-face (in-classroom). The days/times for the required face-to-face meetings will be posted on students' schedules when they sign up for the class. These classes are always

indicated by a "Y" in the section code (e.g. BIO-112-DY01 and ACA-122-NY01A). Hybrid classes may be scheduled with 51-99% of instruction being delivered online.

- Blended class instruction is delivered face-to-face with a requirement that students also complete work online, asynchronously. The days/times for the required face-to-face meetings will be posted on students' schedules when they sign up for the course. These classes are always indicated by an "L" in the section code (e.g. ENG 111 DL01, SOC 210 NL04). Blended classes may be scheduled with 1-50% of instruction being delivered online.

In addition to the Internet, Internet Synchronous, Hybrid, and Blended classes, CFCC's face-to-face classes are often web-assisted. In a web-assisted class, all instruction is delivered face-to-face, and supplemental materials are available online. This means that certain course materials are made available to students through a learning management system (LMS) such as Blackboard. These materials typically include a class schedule, course syllabus, instructor contact information, and a gradebook though some instructors may choose to provide other course materials through the LMS. In addition, some instructors may choose to administer quizzes or tests through the LMS. To access these materials, students are required to have access to a computer and the Internet.

Note: Internet classes may have required face-to-face, proctored exams. Please contact the individual instructor or department to determine if a particular section has such a requirement.

Online Learning classes follow the same college requirements as traditional classes. College policies, such as admission, withdrawal, financial aid, etc. apply to online classes. Online classes are not self-paced. They follow the same college calendar as face-to-face classes.

Online Learning class materials become available at specific times as the class progresses, and students are required to meet regular deadlines. These classes can, when fully online, require several hours of independent work each week. Because of this, online classes are best suited for students who are strongly self-motivated, self-disciplined, and have excellent time management skills. Additionally, because all online classes require the use of a computer, they should only be taken by students who are already comfortable using computers for various types of applications, such as word processing, web browsing, chat, discussion boards, etc.; who are proficient in written communication; and who have regular access to a computer and Internet service. For online learning help, Blackboard help, resources, and tutorials, please visit the CFCC Online Learning webpage. Students should also reach out to the CFCC IT Help Desk for technical assistance if needed.

Online Learning Attendance

Attendance in Internet, Internet Synchronous, Hybrid, and Blended classes is demonstrated by completing an initial "Enrollment Verification" assignment or completing required coursework on or before the Census Date for the course. In Hybrid and Blended classes, where students meet face-to-face and online, attendance for Enrollment Verification purposes may be measured by one of the following on or before the Census Date: being physically present at face-to-face meetings and/or completion and submission of the online "Enrollment Verification" assignment or other assigned coursework.

An "Enrollment Verification" (EV) assignment requires the student to (1) login to the Blackboard class site and (2) complete an activity that involves engagement with course material. Failure to log in and complete the EV activity for an Internet, Internet Synchronous, Hybrid, or Blended class by the Census date of the course may result in the student being withdrawn from the class. For questions regarding completing the Enrollment Verification activity, please contact your instructor.

Catalog of Record

Students are expected to meet the catalog requirements in effect at the time of their enrollment into a curriculum program. Anyone not in continuous enrollment for more than one semester (not counting summer) will be readmitted under the requirements of the current catalog. A student who changes programs must meet the requirements of the catalog in effect at the time of the change of program.

Most courses can be counted for credit toward graduation for an indefinite period of time. Some courses that depend heavily on technology, speed and accuracy, physical skills, and language skills will be subject to review after five years unless the student has been continuously enrolled. Courses subject to review may include, but not limited to computer, foreign languages, health science, developmental, and trades courses.

Credit by Proficiency

For selected courses, students may request credit by proficiency examination for previous experience or training. The student must be currently enrolled at CFCC and **must not have enrolled in the course prior to taking the proficiency exam**. The student must request the Credit by Proficiency Application from the Registrar and have it approved by the department chair in order to challenge the course. Students may challenge a course only once. Students successfully passing a proficiency exam will receive credit for the course as a "CR" (credit for record). Credit by Proficiency does not usually transfer. CLEP and AP exams (see below) may be used in lieu of proficiency exams.

CLEP - College Level Examination Program®

The College-Level Examination Program® or CLEP provides students of any age with the opportunity to demonstrate college-level achievement through a program of exams in undergraduate college courses.

CFCC may grant credit in appropriate courses on the basis of CLEP examination results. The following guide describes the cutoff scores and credits that may be earned through the CLEP. ***Credit may be awarded for other CLEP tests not listed.*** Students should submit official CLEP scores to the Registrar's Office prior to registration for possible credit and proper course placement.

AP[®]- Advanced Placement

CFCC may grant credit in appropriate courses on the basis of AP[®] examination results. The following guide describes the cutoff scores and credits that may be earned through AP[®]. Credit may be awarded for other AP tests not listed. Students should submit official AP[®] scores prior to registration for possible credit and proper course placement.

IB (International Baccalaureate)

Students may receive credit by examination for achieving acceptable scores on the High Level (HL IB) International Baccalaureate examinations. Official test scores should be sent to the registrar's office for evaluation prior to registration for possible credit and proper course placement. CFCC only accepts certain exams of the "High Level."

DSST (DANTES Subject Standardized Tests)

Students may receive credit by examination for achieving acceptable scores on the DSST (DANTES Subject Standardized Tests). Students should submit official DSST scores prior to registration for possible credit and proper course placement.

Note: Course credit awarded by CFCC on the basis of CLEP, AP, IB, or DSST exam scores may not transfer to other institutions.

Credit for Prior Learning Experiences

In some circumstances, students may be eligible to receive academic credit for non-credit learning experiences. Examples of non-credit learning experiences include Continuing Education classes and programs, military education and training, industry-recognized certifications, and certain apprenticeship programs. A student may only petition for the conversion of non-credit learning experiences to academic credit for courses in the student's declared curriculum program of study. No more than 25% of a student's curriculum program credits will be awarded through the conversion of non-credit learning experiences. In addition, credit for prior learning for coursework completed at the college (ie. CE to CU) cannot be used to satisfy the 25% institutional credits needed for program completion. CFCC reserves the right to require documentation supporting the equivalent quality of the learning outcomes, instructional content, and instructor qualifications of any non-credit learning experiences for which a student petitions conversion to academic credit. CFCC will also require documentation that a student satisfactorily completed within the last five years any non-credit learning experiences for which the student petitions credit conversion. CFCC's Chief Academic Officer must approve each student petition for credit conversion. Students who feel they may be eligible for the conversion of non-credit learning experiences to academic credit should contact their academic program's director for additional information.

Partnerships with Business Industry

Cape Fear Community College and its partners work together to provide a variety of academic, cultural, and work-based experiences designed to enhance the educational experience of students and improve the quality of life for local residents.

Work Based Learning

CFCC partners with local business and industry to offer students on-the-job training opportunities through Work Based Learning. Participating students may earn college credit using approved work experience(s) specifically related to their educational program goals. Work Based Learning classes include WBL 110, WBL 111, WBL 112, WBL 115, WBL 121, WBL 125, WBL 131, and WBL 215. Employers and organizations interested in having a Work-Based-Learning student are urged to contact the Coordinator of Career and Technical Education at 910-362-7144 and see our Work-Based Learning web page.

Student Enrollment Criteria: To qualify for one of these classes, students must meet the following criteria:

- Must be at least 18 years old. Students under 18 years old may participate if they have approval from the college and worksite. They must also complete an online NCDOL Youth Employment Certificate. The responsibility for filing the certificate lies with the employer.
- Must be enrolled in a program that offers WBL courses.
- Transcripts or degree audit must be attached with your application.

Please Note: Individual programs may have additional requirements for enrolling in a Work-Based-Learning work experience course.

Registration Process: To register for a Work-Based Learning course, a student must submit an application directly to the WBL instructor. After the college has approved the application, the student may register using Self-Service Student Planning or through his/her academic advisor during the registration period. A Work-Based Learning application is required each semester the student plans to enroll. The application is available online on the Work-Based Learning webpage.

Please note: Work-Based-Learning courses may not transfer to four-year institutions. Students should always check with the receiving college or university to verify the transferability of any course. The college reserves the right to limit work-based learning experiences based on the appropriateness, applicability, and location of the position.

For more information, please see the Work-Based Learning Webpage or contact the Dean of Career and Technical Education at 910-362-7009 or your lead instructor (AAS programs only).

Partnerships with Community Agencies

Service Learning

CFCC partners with local community service-based agencies to provide students enrolled in select classes the opportunity to complete service learning activities to fulfill requirements for a course project. The goal of service learning is to integrate into an assignment meaningful community service activities that help students better understand the course content. These activities should:

- Provide opportunity to apply ideas and theories learned in class to a reflective, service-based experience;

- Help students become more interconnected with the community through their contributions.

Partnerships with Four-Year Institutions:

CFCC partners with public and private North Carolina four-year colleges and universities to provide a clear pathway from associate degree coursework to baccalaureate studies.

Statewide Comprehensive Articulation Agreements: The following transfer articulation agreements between North Carolina community colleges and North Carolina colleges and universities provide qualifying AA, AE, AS, and AFA graduates clear guidelines for transferring from CFCC to a four-year college or university in North Carolina:

- The North Carolina Comprehensive Articulation Agreement between North Carolina community colleges and North Carolina public universities.
- The Uniform Articulation Agreement between the University Of North Carolina Baccalaureate Engineering Programs and North Carolina Community College System Associate in Engineering Programs.
- The Independent Comprehensive Articulation Agreement between North Carolina community colleges and 24 North Carolina independent colleges and universities.

Bilateral Agreements: CFCC and select UNC institutions have bilateral agreements that provide qualifying graduates of AA, AS, and some AAS programs a pathway for transferring coursework into a four-year degree.

Select AAS programs:

- Qualifying graduates have the opportunity to transfer to UNC-Pembroke and earn a Bachelor's of Interdisciplinary Studies through online learning courses or face-to-face courses that UNC-Pembroke offers on the campus of CFCC.
- Qualifying graduates have the opportunity to transfer into UNC-Wilmington's Education of Young Children bachelor's program.
- Qualifying graduates can transfer to NC Wesleyan College to earn either a Bachelor of Science in Business Administration or a Bachelor of Science in Education. Both degrees are offered partly at a CFCC campus and partly online.

AA and AS (college transfer) programs:

- CFCC and UNCW Bilateral Agreement: Qualifying graduates have assured acceptance into UNC-Wilmington, provided graduates have completed the UNC-Wilmington application process and met all criteria stipulated in its bilateral agreement with CFCC. Graduates are admitted to UNC-Wilmington on a space-available basis; spring applicants may be deferred to the FALL SEMESTER if space is not available.

- CFCC and NC Wesleyan College Bilateral Agreement: Qualifying graduates can transfer to NC Wesleyan College to earn either a Bachelor of Science in Business Administration or a Bachelor of Science in Education. Both degrees are offered partly at a CFCC campus and partly online.

For more information, refer to the "College Transfer General Information and Articulation Agreements" section of this handbook and see the University Transfer Information webpage.

C-STEP

The Carolina Student Transfer Excellence Program (C-STEP) is a partnership between Cape Fear Community College and the University of North Carolina at Chapel Hill. The goal of C-STEP is to identify high-achieving students who would not otherwise attend a selective college or university; to enroll these students in the Associate in Arts/Science program at one of the partnering community colleges; to mentor these students through successful completion of an Associate degree (AA/AS); to transfer these students, as juniors, to UNC-Chapel Hill; and to support their successful completion of a baccalaureate degree. Students who successfully complete their Associates degree (AA/AS), and remain in good standing with the C-STEP program are guaranteed future admission to the University of North Carolina - Chapel Hill. Students who are interested in the program should contact the program liaisons via email cerrante@cfcc.edu (Associate in Arts) or hwalters@cfcc.edu (Associate in Science).

PIRATE PROMISE

The Pirate Promise program is a partnership between Cape Fear Community College (CFCC) and East Carolina University (ECU). This partnership guarantees admission to ECU for CFCC students who meet the qualifying requirements. The program is designed for students in their first year of coursework at CFCC. Participating students will receive the benefit of a waived ECU application fee, be invited to attend special events, and receive joint academic advising and support as they apply to ECU. By participating, CFCC students will have a seamless degree completion pathway to ECU. Students interested in this program should visit the ECU Transfer Programs webpage.

Independent Study

CFCC provides the opportunity for students to pursue, on an individual basis, subjects in the students' major area of study. Independent study is not intended, nor will it be allowed, as a substitute for existing courses as listed in the schedule of classes. If the student is preparing to complete the last full semester of study prior to graduation and the college is unable to offer a major course required for a degree, independent study may be considered. In an independent study arrangement, the student first seeks approval from the respective department chair who then works to identify an instructor to supervise the study. The chair will contact the student to let them know if there is an instructor available to supervise the study. The student then meets with the instructor. The instructor provides a course outline and discusses course requirements and expectations with the student. The instructor then notifies the appropriate chair who authorizes scheduling of the course. The number of credits may vary. Current tuition rates apply, as do standard grading policies. Independent study opportunities are for students who:

- are currently enrolled in classes at CFCC
- have earned a 2.0 or higher cumulative GPA
- have completed 12 credits in their major program of study
- have met the pre-requisites and/or co-requisites of the course proposed for independent study

Independent study courses are subject to the consent of the department chair and the availability of qualified instructors. Courses are run by semester and all work must be completed within the semester dates. Only one (1) course taken as independent study may be applied toward an associate degree, diploma, or certificate.

North Carolina High School to Community College Articulation Agreement

Through an agreement between the North Carolina State Department of Public Instruction and the North Carolina Community College System, high school graduates are eligible to receive CFCC credits for certain courses upon presentation and evaluation of a high school transcript. Courses eligible for CFCC credit can be found in the articulation agreement. Copies of the agreement are located in the offices of high school counselors. Award of credit will only be given for courses that are required in a student's CFCC program of study. Criteria to award college credit:

- Students must enroll at the community college within two years of their high school graduation date.
- A grade of "B" or higher is required for the course.
- A raw score of 90 or higher is required on the standardized Career and Technical Education (CTE) post-assessment score report.

Any student wishing to receive credit should submit both an official high school transcript and CTE post-assessment score report. The Registrar's Office should then be contacted for transcript evaluation.

Career and College Promise (Dual Enrollment/Early College)

The Career and College Promise Program allows qualifying high school students the opportunity to enroll in college classes in order to earn both high school and college credit upon successful completion of CFCC courses. This program offers the following pathways:

- Career and Technical Education Pathway
- College Transfer Pathway
- Economic & Workforce Development (EWD) Pathways (school by school basis)
- Cooperative Innovative High School Pathway (or Early College High School)

The Career and Technical Education Pathway allows high school juniors and seniors the opportunity to enroll in a CFCC CTE Pathway that aligns with their high school career cluster programs. To be accepted into this program, students must meet the following criteria*:

- Be a high school junior or senior; and
- Have an unweighted, cumulative GPA of 2.8 or higher on high school courses, or
- Demonstrate college readiness in English, reading and mathematics on an assessment, or
- Have the recommendation of the high school principal or his/her designee and his/her rationale for recommendation in place of GPA requirement (assessment scores should be considered) and have the recommendation of the college's Chief Academic Officer or Chief Student Development Administrator (*A recommendation for eligibility will not be permitted for CTE pathways that include UGETC (Universal General Education Transfer Component) course(s)*)

The College Transfer Pathway allows high school juniors and seniors the opportunity to complete core general education classes required during the first two years of a four-year degree. To be accepted to this program, students must meet the following criteria:

- Be a high school junior or senior; and
- Have unweighted, cumulative GPA of 2.8 on high school courses, or
- Demonstrate college readiness on an approved assessment or placement test

****Students interested in the Engineering pathway must also prove Calculus 1 eligibility in order to be admitted to that program of study.**

The Cooperative Innovative High School Pathway (or Early College High School) allows students the opportunity to earn a high school diploma and up to two years of college credit within five years. CFCC partners with New Hanover County Schools and Pender County Schools to host three early college high schools. Pender Early College High School (PECHS), Wilmington Early College High School (WECHS), and Southeast Area Technical High School (SEA-TECH) are connected to CFCC. Students must have the desire to attend a smaller school with high expectations for academics and behavior. Admission to the program is granted by each respective school system.

The Economic and Workforce Development (EWD) Pathway allows high school juniors and seniors the opportunity to enroll in a CFCC Workforce Career Training Pathway to start training for a career while in high school. To be accepted into this program, students must meet the following criteria*:

- Be a high school junior or senior
- Have a weighted GPA of 2.8 on high school courses or your principal's approval
- If GPA is lower than 2.8, assessment testing is required
- For details on eligibility and admissions requirements, please speak to your high school career counselor

***If you are a Home School or Private School Student interested in an EWD pathway, please contact a Workforce Development Coordinator at (910) 362-7370 to determine eligibility.**

For more information on college courses available to qualifying high school students, visit our Career and College Promise/Dual Enrollment webpage.

myCFCC

myCFCC is a web-based portal that links all aspects of campus life to create a community environment. It provides services such as e-mail, campus announcements, message boards, calendars, and discussion groups. Accounts are created upon acceptance to the College. Students are encouraged to check myCFCC on a regular basis to receive important college information. A link to myCFCC is on the CFCC website.

Student Support Services

Career Development	Library
Counseling	Learning Lab
Student Accessibility Services	TV Studio
Nixon Leaders Program	

Career Development

Career development services are available through the Academic Advising Center. Career counselors assist students with career decision-making and choosing a major, including guidance in considering 4-year school transfer options and opportunities. They also provide information related to employment trends, educational requirements, and important data related to different industries. Job search assistance including resume writing, interview techniques and preparation, as well as other employment readiness planning is also available to students and graduates. Career events are planned throughout the year to bring employers and students together. Current job listings are provided through Career Connection, CFCC's online job board. This resource gives students, graduates, and employers an opportunity to connect with each other through the myCFCC web portal. For more information, visit our Career Development webpage. To schedule an appointment, students may call (910) 362-7768, email careerdevelopment@cfcc.edu, or schedule through Aviso.

Counseling

Counseling Services is committed to student success and provides a variety of services to help support, retain, and graduate students. When admitted to the college, all CFCC curriculum students will have an assigned Counselor who will help support the student throughout their time at Cape Fear.

Support services available through Counseling Services include student wellness, academic success, and personal counseling. Stressors inside and outside of the classroom can affect academic performance, student well-being, and mental health. The professional counseling staff is experienced in assisting students in developing skills and attitudes needed to effectively navigate their academic environment. Confidential counseling services are provided on an ongoing basis to all students. The Counseling staff also provides educational information through campus events, speakers, and handouts that promote mental health awareness, risk prevention, and overall well-being.

When appropriate, and with the student's permission, the counseling staff may make referrals to community resources/agencies.

Students who are experiencing academic difficulty are encouraged to meet with a Counselor to develop success strategies. Counselors will work closely with students on academic warning or academic probation status to meet satisfactory progress standards toward obtaining the declared degree, diploma, or certificate.

The Counseling staff is available Monday through Friday, 8:00 AM - 5:00 PM on both campuses. Summer hours may vary. Students may select an in person, virtual, or phone appointment with a counselor during non-peak times. In person appointments at our Burgaw and Surf City satellite sites are available upon request.

If you have questions or need assistance, Counseling Services can be reached by calling (910) 362-7017 Downtown or (910) 362-7053 at North or by email at counseling@cfcc.edu.

Student Accessibility Services

Cape Fear Community College works to ensure that students with disabilities have equal, effective, and meaningful access to all goods and services, through the use of nondiscriminatory policies and procedures, and the provision of reasonable accommodations, auxiliary aids, and services, as indicated necessary by the functional limitations of a qualified disability.

The Student Accessibility Services (SAS) office is the designated office that determines appropriate supports and services for students with disabilities, who are enrolled at Cape Fear Community College. These determinations are made in compliance with The Rehabilitation Act of 1973 and its attachments, and the Americans with Disabilities Act as amended in 2008 (ADAAA).

In order to qualify for services, students must self-disclose & provide appropriate disability documentation to the Student Accessibility Services (SAS) office. Once it has been determined that the documentation submitted satisfies SAS's documentation requirements, the student will then be required to meet with a SAS staff member, in order to complete the registration process.

SAS provides services that may assist students with disabilities in reaching their academic goals. Students who have been diagnosed with a disability and who are in need of support and/or services, can initiate the registration process by: (1) contacting a SAS staff member directly, (2) calling the SAS office's front office at 910.362.7800, (3) emailing the general SAS email at sas@cfcc.edu, or (4) visiting the SAS Office in person. Services are available at all CFCC locations, to include the Downtown Campus (Union Station, Suite 218), the North Campus (McKeithan Center), Alston W. Burke Center at Surf City, as well as the Burgaw Center location.

GRIEVANCE PROCEDURES: A student with a grievance based on discrimination, an accommodation issue, and/or denial of services based on their disability, should initially file their complaint with the Director of SAS. If this action does not result in an acceptable resolution of the issue (within the standards of CFCC's policies and procedures and/or the standards of the class/curriculum) the student should then file their complaint with the Office of the Dean of Students by completing an Online Complaint Form.

Nixon Leaders Center

The Nixon Leaders Center is a student mentoring initiative designed to support the educational and professional aspirations of underrepresented populations of students enrolled at CFCC. The center is located on the first floor of the Union Station building in room U-152 and provides resources that assist students in reaching academic goals and career attainment. The objectives of the center are to facilitate higher retention, persistence, graduation and/or transfer rates for all participants. All students are welcome to the center as it works to achieve the mission of the college by offering tutoring, professional development workshops, social empowerment activities, and student coaching. Our graduates and transfers move on to universities and careers across the United States. We strive to continue to develop students into hard working, productive, socially conscious citizens that are prepared to lead. Whether it is providing study skills training, networking events, or finding scholarships for promising students, the Nixon Leaders Center endeavors to improve student success through the academic program completion and career achievement of a diverse population of students.

Library

The Wilmington and North Campus libraries provide resources, services, and instruction that directly contribute to student success. The libraries have approximately 45,000 books, 500 current print periodical subscriptions, and over 7,000 audiovisual items. A wide range of more than 100 electronic resources, including NC LIVE, is accessible online through the libraries. These e-resources contain thousands of full-text articles from more than 65,000 newspapers, journals, magazines, and encyclopedias and access to 200,000+ ebooks and 5,000+ videos. Students may use the libraries' 60 computers or their own devices to access these resources online. Individual and group study spaces are also available. A current CFCC ID is required to check out library materials. For individual reference or research assistance or to schedule an instruction session or tour for a class, contact the Reference Desk at (910) 362-7034 or via email: lrcref@cfcc.edu. Library staff and resources will assist you with reference

questions, help you meet your course objectives, supplement classroom assignments, and enable you to pursue topics of interest. Visit the CFCC Libraries website for more information, locations, and hours.

Learning Lab

The Learning Lab provides free educational support and access to computers to promote student success and academic independence. Masters and Bachelors prepared tutors along with experienced student tutors cater to individual learning styles to help students develop self-reliance and build self-esteem.

The Lab provides the following:

Free tutorial assistance:

- in many CFCC curriculum courses (face-to-face as well as online), Adult Basic Skills, and GED/Adult High School readiness
- through Supplemental Instruction that assists students in traditionally challenging courses in facilitated group sessions. Supported courses may include ACC, BIO, CHM, PHY, MAT, MSC, and other courses as needed

Drop-in help is available for the following:

- basic skills in reading, writing, and grammar
- all math classes from the basics to advanced calculus
- all science courses such as anatomy & physiology, biology, chemistry, physics
- Spanish and French language courses
- Film and Video Production courses
- free access to computers for students to complete assignments and type papers
- assistance developing computer skills applicable to schoolwork and students' future careers

Visit the CFCC Learning Lab website for more information, locations, and hours.

TV Studio

The TV studio provides students with a laboratory setting for learning the tools and tasks needed to produce television content. The studio creates promotional videos highlighting CFCC students and programs and provides video services in support of the curriculum.

Student Life

Athletics and Intramural Activities	Phi Theta Kappa
Student Government Association (SGA)	Honors Program

Clubs and Organizations	Student Publications
Ambassador Program	Expressive Activity Policy

Extra-curricular activities are an important part of the total educational experience here at Cape Fear Community College and fulfills the College's mission by providing a variety of activities that enrich students' lives. The goal of Student Life is to accommodate student diversity in backgrounds, abilities, interests, and career objectives; enhance academic success; and promote diplomacy, unity, self-discipline, physical and emotional well-being, and develop leadership skills. The social development of the CFCC student is an important phase of the total educational program at Cape Fear Community College. Under the sponsorship of Student Life, social events include concerts, cookouts, holiday celebrations, charity events, tournaments, athletic events, and various other student body activities. Student Life provides services, programs, and facilities for all students, faculty, and staff of the College. The Student Life office is located in the L-Building on the Downtown Campus. Please go to the college's Student Life webpage for more exciting opportunities here on campus.

Student success at Cape Fear Community College is based upon academic excellence. Accordingly, students should attempt to attend all scheduled class and laboratory sessions. Participation in extra-curricular activities is also important to the total education and personal development of CFCC students. Occasionally, a student may be required to miss a class session in order to participate in college-sponsored activities such as Athletics, Phi Theta Kappa Honor Society (PTK), CFCC Ambassadors, Student Government Association, program conferences and/or competitions, and other activities approved by Student Life.

College officials sponsoring such approved extracurricular activities are expected to provide advance notice to faculty of anticipated absences and the list of students who will be participating. In addition, participating students must also inform their instructors in advance of such anticipated absences and are expected to make advance arrangements for making up all missed assignments. In such cases, class time missed should not be counted absent provided participating students are in good academic standing.

If a faculty member believes that missing class due to a student activity or event is detrimental to the academic success of a specific student, the faculty member may request that the Vice President of Student Services (or his/her designee) review that student's overall academic and attendance records to determine if the student's absence warrants exemption from the College's attendance policy. Students who disagree with the Vice President's decision may appeal to CFCC's Judicial Board according to the College's Grievance Procedure.

Athletics and Intramural Activities

Cape Fear Community College is a member of the National Junior College Athletic Association (NJCAA), competing in Region 10. College athletics include men's and women's basketball, women's volleyball, men's and women's soccer, and cheerleading. Individuals participating in college athletics must be a high school graduate, or obtained a GED. The student athlete must be currently enrolled at CFCC and be

in good academic standing. In addition, students participating in intercollegiate athletics must meet NJCAA eligibility requirements and standards. The goals and objectives of intercollegiate athletics are listed below:

Goals:

- To enhance academic success of student-athletes
- To provide opportunities for participation in competitive collegiate sports
- To promote the development of self-discipline and leadership skills

Objectives:

- Monitor the academic grade point average of collegiate student-athletes
- Monitor the retention and graduation/transfer rates of student-athletes

For more information go to *Sea Devil Athletics*.

Intramural Program

The CFCC Intramural Program is specifically designed to provide opportunities for students, faculty and staff to have fun, socialize, manage stress and improve personal health and wellness by participating in organized competitive sports and recreational activities.

The intramural program includes a wide variety of events. Past activities have included a table tennis tournament, 3 on 3 basketball tournaments, kick ball games, flag football leagues, volleyball games, and other competitive activities based upon the overall interest of the CFCC students, faculty, and staff. General information and registration materials for intramural sports may be obtained through the Student Life office.

Student Government Association

The Student Government Association (SGA) is the official organization authorized by the administration to represent all students at Cape Fear Community College. The SGA is a democratic organization and as such elects officers each year. The State Board of Community Colleges, the CFCC Board of Trustees, and the administration, faculty, and staff fully support the SGA. This support is most visible in the office of the SGA President who, upon election to that office, automatically becomes a member of the Board of Trustees and the College Council. Additionally, students have SGA representatives on standing college committees. These committees are charged with annually reviewing and recommending changes to the College.

The Student Government Association is an active organization; it is the voice of the student body and has paved the way for good lines of communication between students and the administration. Students receive practical experience in responsible citizenship through participation in a program of self-government.

The SGA is governed by its Constitution and By-Laws. Copies of these documents are available on the college's SGA website.

Clubs and Organizations

CFCC official student organizations and clubs help fulfill the mission of CFCC, accommodate student diversity, enhance academic success, promote diplomacy, unity, discipline, physical/emotional well-being, and develop leadership skills are an important part of Cape Fear Community College's culture.

- Surfrider

New, or former, clubs and organizations must be approved by the Student Life Coordinator annually, in consultation with the Dean of Student Affairs, by submitting an application to the Student Life Coordinator. The written application must state the proposed name of the club/organization, the names of all students actively joining the club/organization, the name of at least one faculty/staff member (full-time CFCC employee) who has agreed to serve as an advisor, and a complete description of the group including, but not limited to, (1) name and purpose statement, (2) goals/initiatives, and (3) a complete description of the club/organization's proposed activities.

Once a student club/organization is approved, each activity during the academic year must be individually approved by the Student Life Coordinator before it is undertaken. It is the primary responsibility of the proposing organization to provide accurate and complete descriptions of individual activities of the organization. Inactive student organizations and/or clubs may be disbanded at the College's discretion. Student Life forms are available on the college's Student Life webpage.

Student Activity Fee Allocation Committee

The Student Activity Fee Allocation Committee (SAFAC) was established to review and approve funding requests to encourage and financially support student extracurricular activities including, but not limited to, leadership, cultural, educational, recreational, social, service and civic-oriented opportunities, and/or educational endeavors provided by CFCC's academic programs. The primary goals and objectives are to provide student life opportunities; improve student engagement; implement specialized services and programs for diverse populations; enrich the campus environment; and encourage student body involvement, thereby promoting academic achievement and offering a student-centered, holistic approach to overall student development.

The SAFAC ensures collaboration and inclusivity in the process of reviewing and approving funding

requests that are fair and represent the diversity of the campus community. The diverse composition of the committee serves as a safeguard that provides checks and balances so that all students and interest groups associated with the college are supported. All SAFAC funding recommendations are subject to final approval by the Dean of Students and/or the Vice President of Student Services.

Ambassador Program

Each year, CFCC conducts interviews and selects Student Ambassadors to represent the school in various ways including but not limited to individual and group tours. Student Ambassadors also support Community Relations and CFCC Foundation events. These students are selected based on academics, leadership qualities, and their ability to represent the positive environment portrayed at CFCC. The program also provides the opportunity for Student Ambassadors to develop strong communication skills in both small and large group settings and creates a positive, student-friendly environment guided by the Student Recruitment Coordinator.

Student Ambassadors learn to be leaders and well-rounded representatives of the College by providing a firsthand experience of CFCC, to both current and potential students, and their families. They also develop skills to help them become successful in both their educational and future endeavors with an emphasis on teamwork and responsibility.

Phi Theta Kappa

Phi Theta Kappa International Honor Society seeks to encourage college completion and scholarly success by recognizing students who have already achieved a cumulative college GPA of 3.5 or higher and a minimum of 12 college credits. Once eligible, students will receive an invitation via email and USPS mail during three different PTK membership cycles throughout the year. Membership includes local, regional, and international dues on a one-time only basis (not annual) and is documented on a student's transcript and diploma, as well as with an official certificate from the international headquarters. Once student scholars join our local chapter of PTK, Alpha Chi Sigma, they access opportunities to network with one another and with prospective employers, colleges, and universities; to gain leadership skills, service opportunities, and new academic experiences; and to apply for scholarships offered through the PTK International Foundation, its corporate partners, and top-notch public and private universities and colleges throughout the world. While PTK is a chance to be recognized while at the two-year college, it seeks to serve members throughout their academic journey and well into their careers. Joining PTK means being celebrated as one of the upper ten percent of all students enrolled in the two-year college system, as well as becoming professionally vested in the largest honor society in American higher education with nearly four million members and 1,300 chapters in 11 different nations. The innovative programs and professional services and array of membership benefits offered to Phi Theta Kappa members are unequalled among honor societies. Programs and projects focus on the Society's hallmarks of scholarship, leadership, service, and fellowship. Students are welcome and encouraged to attend monthly "Member Merge" meetings to obtain further information before joining. Click on Local Chapter when following the link to the college's PTK webpage.

Honors Program

Mission Statement: The Honors Program at Cape Fear Community College is an academic enrichment program designed to increase the educational experience of students who demonstrate academic excellence. The program offers students distinctive coursework that provides an opportunity to engage in an academically rigorous experience with other outstanding students; and the program allows students to develop skills in effective communication, critical thinking, independent learning, and scholarly exploration. The Honors Program will assist the growth of students both academically and personally and help ensure their continued academic success at Cape Fear Community College and beyond.

Honors Program Eligibility

Students must be enrolled in an Associate in Arts, Associate in Science, or Associate in Fine Arts program and meet one of the following criteria:

- **Current CFCC Student:** If you are a **current** CFCC student with a **3.5 GPA** in at least **12 Credit Hours** completed at college level, then you are eligible for the Honors Program.
- **Recent High School Graduate:** If you are a recent high school graduate with a **3.5 GPA (unweighted)** or a **3.75 GPA (weighted)** in high school, then you are eligible for the Honors Program.
- **Early College High School:** If you are currently enrolled in an early college high school with a **3.5 GPA (unweighted)** or a **3.75 GPA (weighted)** in high school **or** a **3.5 GPA** in at least **12 Credit Hours** completed at college level, then you are eligible for the Honors Program.
- **Career and College Promise (Dual Enrollment):** If you are currently in high school and taking college courses through a Career and College Promise program with a **3.5 GPA (unweighted)** or a **3.75 GPA (weighted)** in high school **or** a **3.5 GPA** in at least **12 Credit Hours** completed at the college level, then you are eligible for the Honors Program.

Benefits to Honors Students

- Honors designation on the degree/diploma
- Recognition at graduation as an "Honors Program" graduate after the successful completion of at least 12 SHC of honors work (4 honors designated academic courses)
- Transferability of CFCC honors credit to several honors programs at North Carolina four-year institutions
- Increased competitiveness and preparation for leadership roles
- Smaller class sizes
- Increased academic rigor
- Honors advising and mentoring

- Priority registration

To apply to the CFCC Honors Program or for additional information go to the Honors Program webpage.

Student Publications

All student publications, printed and electronic, are supervised by the Student Life Coordinator, and ultimately the Vice President of Student Services. Students are invited to submit information to the Student Life Coordinator for possible inclusion in printed material. All material must adhere to the canons of responsible journalism, including the avoidance of libel, indecency, vulgarity, undocumented allegations, attacks on personal integrity, and the techniques of harassment and innuendo.

The Vice President of Student Services has the authority to determine responsible student journalism and to prohibit the publication of any material in violation of the canons of responsible journalism.

Guidelines for Display or Distribution of Handbills, Posters, or Other Materials by Student Clubs, Community and Non-Profit Organizations, and Individuals

The College would like to provide educational opportunities to its students and others in the college community and believes that public expression through displays or distribution of handbills, posters, or other materials can play an important role in accomplishing this goal. The College also believes firmly in its obligation to college employees and its students to provide an environment that is conducive to learning. Public expression that enhances this environment by affording students and others in the college community exposure to a variety of ideas is encouraged. Subject to the terms and conditions set forth in these procedures, to any rules or regulations established by the College pertaining to display or distribution, and to other applicable laws, rules, and regulations, an organization or individual may display or distribute handbills, posters, or other materials that are aimed at providing information to students.

The following guidelines apply to materials posted on the campus of Cape Fear Community College, regardless of the source of those materials. They include:

- Posted information shall not contain obscene or libelous information or other information that is not protected by law.
- Information will not be placed over existing notices. Outdated material will be removed to make room for timely information.
- All event items must be removed by the sponsoring organization immediately following the event.

- All notes to be posted in stairwells, at doorways, or in other college locations not otherwise permitted in these guidelines, require approval by the Vice President of Student Services five work days (Monday through Friday) in advance of the proposed posting.

Due to extreme space limitations, information to be posted by student groups, community groups, or individuals in areas other than those reserved for academically-oriented student club/organizations, will be posted for a maximum of two weeks and must be no larger than 8.5" x 11".

Items not approved in the prescribed manner will be removed and discarded.

Placement of information on vehicles of others on campus is prohibited.

The College reserves exclusive rights to re-arrange materials to accommodate the display of additional materials, to establish limits on the amount of information organizations may display, and to deny additional requests when all designated space is being used.

Failure by any organization or individual to abide by these CFCC guidelines will be grounds for denying additional requests from the same organization or individual.

The College will grant access by an eligible organization or individual to areas of College premises, designated for public expression on a neutral basis, in accordance with these procedures. A grant of access to any particular organization or individual does not mean that the College endorses the beliefs, practices, or views expressed by that organization or individual, and outside organizations and individuals are expressly prohibited from stating, implying, or suggesting in any manner that they are endorsed by or associated with the College or that any publication, announcement, or other form of expression provided by the organization or individual has been approved by or is associated with the College. Areas of college premises designated for public expression will not be denied to any organization or individual on the basis of the content of information sought to be provided by or the convictions or affiliations of that organization or individual. Any organization or individual who believes that the opportunity to display or distribute handbills, posters, or other materials has been denied improperly may appeal by providing a written statement to the Vice President of Student Services within three business days of the date on which the organization or group has been advised of the denial. The Judicial Board will make a final decision within five business days of receiving the appeal.

Given the varying nature of different organizations and the wide-range of notices that individual students and/or college personnel may wish to post on occasion, additional guidelines apply to certain types of organizations and individuals, as noted in the following.

Academically-Oriented Publications

Academically-oriented student clubs/organizations that are directly linked in name, purpose, and practice to specific instructional disciplines or programs offered at CFCC may post discipline-related displays and materials, including announcements of upcoming club meetings, on College bulletin boards in their respective academic departments, subject to advance approval of faculty sponsors, department heads, and the appropriate division deans.

Other student clubs and community and non-profit organizations may distribute or display information relating to the approved purpose including announcements of upcoming meetings, in accordance with the following guidelines:

All items displayed by other student clubs/organizations in the category must be approved by the faculty/staff sponsor and the Vice President of Student Services. Items submitted by community and non-profit organizations must be approved for display by the Vice President of Student Services. The Vice President of Student Services will consider all requests for display and distribution in light of the availability of areas that are designated for such purposes and the availability of space for the proposed display or distribution within any designated area(s). Requests for access to distribute or display publications will be reviewed and granted on a first-come, first-serve basis. The College will communicate its approval, or disapproval, of access for distribution or display and any conditions of access to the requesting organization or group, generally within three business days after the request is submitted. Access for display or distribution of materials will not be provided if previously approved requests for access to display or distribute materials have resulted in space being unavailable for additional displays or distributions within any designated area(s). Approved materials may be displayed on the designated bulletin board(s). No one club/organization may use a disproportionate amount of the allotted space. Committee organizations and individuals may display approved notices on designated bulletin board(s).

Expressive Activity Policy

1. POLICY STATEMENT

Cape Fear Community College (CFCC) upholds the freedoms of speech and expression guaranteed by the First Amendment of the U.S. Constitution for all members of the College community. The College is a place where all ideas and opinions may be expressed freely. The right to free speech and expression does not include unlawful activity that endangers the safety or well-being of any member of the College community. Further, it does not include any activity that interferes with the education of other students or the mission of the institution.

The College has the right, under appropriate circumstances, to regulate the time, place, and manner of exercising these and other constitutionally protected rights.

Providing forums for expressive activity is important because members of the College community have a right to hear, see, and experience diverse intellectual and creative inquiry. Defending that right is a fundamental obligation of the College. Controversy cannot be permitted to abridge the freedoms of speech, thought, expression or assembly.

2. NO ENDORSEMENT

Although expressive activity is allowed, it is not endorsed by the Board of Trustees or the College unless specifically approved as a College-sanctioned activity. No individual or group may claim approval or endorsement by the College except with prior written approval by the President or designee.

3. FORUMS FOR EXPRESSIVE ACTIVITY

To facilitate the free exchange of ideas, the College has established space on the College's premises that may be used by any person, including external groups and other campus guests, for expressive activities. Such activities are inclusive of literature distribution. This use may be without permission or approval from the College so long as the area has not been previously reserved or scheduled for a particular function; no sound amplification is used; and the participants do not violate other College policies. Although it is not necessary for a person using one of the designated outdoor spaces to obtain prior permission from the College, CFCC encourages such persons to contact the Office of Community Relations for scheduling purposes to minimize possible conflicts.

3.1 OUTDOOR LOCATIONS

The College has set aside outdoor areas for forums, rallies, demonstrations, and other similar activities. These areas may also be reserved through the College's space reservation system (Community Relations Office). Organizations or individuals who reserve these areas have priority. The outdoor areas currently designated for expressive activity are:

3.1.1. Downtown Campus: The grassy area in front of the Burnett (W) Building on Water Street.

3.1.2. North Campus: The covered brick patio between the Eric B. McKeithan Center and the soccer field.

3.2 ADDITIONAL SPACES FOR EXPRESSIVE ACTIVITY

Members of the College community and external guests may also utilize other spaces on College premises for expressive activities on a first-come-first-serve basis such as: courtyards, walkways, grassy areas, and all other areas of the College's premises (including without limitation hallways, lobbies, offices, classrooms, libraries, cafeterias, and auditoriums). Participants must not violate College policies or use sound amplification for expressive activities. Similar to the guidelines outlined in Section 3.1, CFCC encourages the College community and external guests to contact the Office of Community Relations for scheduling purposes to minimize opportunities for disruption to the College's educational and administrative functions.

3.3 External groups and individuals also have access to those public forums that may exist on the city sidewalks, city parks, and other public non-College properties that are near or adjacent to the College campuses.

4. POLICY EXPECTATIONS

At CFCC, anyone may distribute printed material, offer petitions for signature, make speeches, and hold protests or demonstrations on college premises. To ensure the safety of all members of the College community and the functional integrity of the institution's educational mission, the following points are emphasized as policy expectations:

4.1. All such activities must be peaceful, avoiding acts or credible threats of violence and preserving the normal operation of the College.

4.2. No event shall infringe upon the rights or privileges of anyone who disagrees with the content of expression conveyed.

4.3. No one will be permitted to harm others, damage or deface property, block access to College buildings, or disrupt classes.

4.4. The enforcement of these conditions will not depend in any way on the message or sponsorship of the act or event.

4.5. Members of the College community who engage in expressive activity shall continue to be fully responsible for their educational or occupational obligations.

If an expressive activity does not satisfy these policy expectations, disrupts College operations or creates a safety hazard, College officials will require the activity to be relocated or rescheduled. Students, employees, and or community visitors who do not abide by the established policy expectations may be subject to discipline by the College and/or law enforcement.

5. SPACE RESERVATION PROCEDURES

The President or designee shall implement space reservation procedures that comply with this Policy.

5.1 CONSIDERATIONS FOR EVALUATING SPACE REQUESTS

CFCC administration and the Office of Community Relations will consider the anticipated size, required accommodations, noise levels, traffic, time, relationship to nearby areas, security needs, and the evaluation of other relevant scenarios to determine (a) whether a suitable location exists and (b) whether health and safety concerns require special precautions or arrangements.

6. DEFINITIONS

For the purposes of this Policy, (1) "expressive activity" means public speech protected by the First Amendment to the U.S. Constitution, which includes, by way of example and not limitation, attempts to address all or portions of the College community with the intention of expressing social, political, religious, artistic, or other views; to disseminate written materials; or to request, accept, collect donations or contributions for a non-profit purpose and (2) "College premises" means property owned, leased, managed, or otherwise controlled by the College including without limitation green space, courtyards, walkways, buildings, and vehicles.

Right to Know Act

Anyone wishing to obtain information about first-time students' rate of persistence and/or graduation rates should contact the Office of the Director of Institutional Effectiveness and Planning.

Cape Fear Community College measures and reports retention, graduation, and transfer rates, along with seven other institutional performance standards, on an annual basis and in accordance with definitions and standards established by the North Carolina State Board of Community Colleges. Establishment of these common performance measures of institutional effectiveness, along with definitions and standards for each, is the result of a mandate by the N.C. General Assembly to review past performance and define standards of performance to ensure the quality and effectiveness of programs and services in all of the 58 community colleges. Please refer to CFCC's performance report on these measures. Historical data and additional details may be viewed on the Institutional Effectiveness, Planning, and Compliance webpage.

What is FERPA?

The Family Educational Rights and Privacy Act (FERPA) affords eligible students certain rights with respect to their education records. (An "eligible student" under FERPA is a student who is 18 years of age or older **or who attends a postsecondary institution at any age.**)

What rights do students have under FERPA?

FERPA affords students certain rights with respect to their education records.

These rights include:

1. The right to inspect and review their education records. Cape Fear Community College requires written authorization from the student prior to the release of academic records. A minimum of 48 working hours will be required by the College to access the requested academic information. The student may inspect, copy, and review his/her records in the Registrar's Office. There may be a charge for copies. The Registrar will arrange for access and will notify the student of the time and place where the records may be inspected.
2. The right to request the amendment of the student's education records that the student believes is inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA. A student who wishes to ask Cape Fear Community College to amend a record should write the Registrar, clearly identify the part of the record the student wants changed, and specify why it should be changed. If the College decides not to amend the record as requested, the College will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. FERPA does not address issues involved with assigning grades for academic work. A student interested in appealing grades should follow the grade appeal procedure found in the College Catalog.
3. The right to provide written consent before Cape Fear Community College discloses personally identifiable information from the student's education records, except to the extent that FERPA authorizes disclosure without consent. The College discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is typically a person employed by Cape Fear Community College in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person serving on the board of trustees; or a student serving on an official committee, such as a disciplinary or grievance committee. A school official also may include a volunteer or contractor outside of the College who performs an institutional service of function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of Personally Identifiable Information (PII) from education records, such as an attorney, auditor, or collection agent or a student volunteering to assist another school official in performing his or her tasks. A school official typically has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the College. Upon request, the College may also disclose education records without consent to officials of another school in which a student seeks or intends to enroll. See more on this below under the area titled "Disclosure without student consent."
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Cape Fear Community College to comply with the requirements of FERPA.

Written complaints should be sent to:

Family Policy Compliance Office

U.S. Department of Education

400 Maryland Avenue SW

Washington DC 20202-5920

What is Directory Information at Cape Fear Community College?

The following items are designated as "Directory Information" and this information may be released at the discretion of the College without the student's consent unless a student files a request to withhold directory information:

- Name
- City/county of residence
- Major field of study
- Full time/Part-time enrollment
- The most recent college attended
- Dates of enrollment
- Degrees and awards received
- The College assigned email address

How may a student request to withhold disclosure of Directory Information?

Students have the right to withhold disclosure of any directory information to third parties by completing the "Disclosure Request Form" with the Registrar's Office. The request will remain active for the duration that a student is attending the College, unless the student rescinds the withholding. The College assumes that a student's failure to file a request for non-disclosure indicates approval for disclosure.

Third-party requests for directory information:

The request for student directory information from third-party individuals or companies must be submitted through the college's "Public Information Request Form" online. Directory information will only be disclosed at the discretion of the Registrar. Requests that could potentially violate college policies, be considered harmful to the students, or without specific purpose, may be denied. If the request is denied, the Registrar will respond in writing.

How may a student authorize for the college to release information to parent, spouse, or another person or third party?

Cape Fear Community College recognizes that some students would like to authorize someone else to have access to or to be able to discuss their grades, financial records, academic records, and other records.

When a student, regardless of age, enters an institution of higher education such as Cape Fear Community College, all rights to inspect and review the education record transfer from the parent to the

student under FERPA. With a student's written permission, we may share the student's records (academic records, account/billing information, and/or financial aid records) with the student's parent(s), spouse, and/or other individuals the student chooses to designate. This privacy release will remain in effect for the duration of the student's enrollment at Cape Fear Community College, unless rescinded by the student in writing. If a student would like to grant access to release his/her student records to someone such as a parent, the student must complete the "Disclosure Release Form" with the Registrar's Office and allow at least 48 hours for processing.

Disclosure without student consent:

FERPA permits the disclosure of Personally Identifiable Information (PII) from students' education records, without consent of the student, if the disclosure meets certain conditions found in § 99.31 of the FERPA regulations. Eligible students have a right to inspect and review the record of disclosures.

More information about disclosures that do not require student consent can be found on the U.S. Department of Education website.

Solomon Amendment & FERPA

The Solomon Amendment is a federal law that allows military recruiters to access some address, biographical, and academic program information on students age 17 and older who have not filed any full block FERPA restrictions.

The U.S. Department of Education has determined the Solomon Amendment supersedes most elements of FERPA. An institution is therefore obligated to release data included in the list of "student recruiting information," which may or may not match our FERPA directory information list. Solomon Amendment "student recruitment information" includes:

- Name
- Address
- Telephone (not specific if local or permanent)
- Electronic mail addresses (which shall be the electronic mail addresses provided by the institution, if available)
- Age and date of birth
- Place of birth
- Level of education
- Academic major
- Degrees received
- Educational institution in which the student was most recently enrolled

This information may be distributed once per term to each of the 12 eligible units within the five branches of the service.

Faculty and FERPA

The faculty of the College have a legitimate educational interest in a student's academic records. Therefore, access to those records is authorized by the institution. Along with this access comes certain obligations and responsibilities.

A faculty member shall not access educational records of any student for which he/she does not have a direct advisory responsibility. Those with direct advisory responsibility include the current instructors of the student, the student's faculty advisor, and the appropriate department head and division chair. A faculty member not professionally associated with a student shall not access educational records of the student without the written consent of the student.

A faculty member shall not disclose any information from a student's record to a third party (i.e., other students, other faculty members, employers, etc.) without the written consent of the student. Parents of the student do not have special access rights and should not be given information without the student's written consent.

A faculty member shall be responsible for the security of all academic information in his/her possession. These records must not be accessible to students and unauthorized personnel.

A faculty member shall refrain from disclosing academic information by phone without the expressed written consent of the student.

Administration and FERPA

Student Services and Enrollment Management and specifically the Registrar's Office, has the responsibility of maintaining and safeguarding the academic records of all students of the College. Consistent with this responsibility, the personnel of Student Services and Enrollment Management will access student records as needed. However, these individuals bear the responsibility for ensuring that no unauthorized disclosure of student academic information occurs without the expressed written consent of that student.

The president, vice presidents and deans of the College may access student records when needed to facilitate the student's educational pursuit. College administrators may disclose a student's educational records to appropriate parties in connection with a health or safety emergency. Furthermore, College administrators have the right to contact parents of any student under the age of 21 who has violated a federal, state, or local law, or any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance.

The educational records of a student will not be accessed for employment decisions without the expressed written consent of the student. Information from student academic records may be shared in aggregate for educational research purposes.

Patent and Copyright Policy

Every invention, discovery, material, work, product, or any part thereof, that results from the efforts of a full or part-time employee, student, or outside consultant carried out while in the employment of, or

under contract or agreement of any kind with, the College and that is produced or brought about in any fashion with the aid of the College's facilities, staff, or through funds administered by the College shall, as between the College and the full or part-time employee, student, or outside consultant, be the property of the College. Any patents, trademarks, trade names, and/or trade secrets shall belong to the College and any legal protection applied for shall be applied for by the College or through an authorized agent, assignee, or licensee in the name of the College.

As a general rule, all rights to copyrightable material are the property of the creator. The creator shall be deemed to be the College where a specific contract so provides, where a full or part-time employee, student, or outside consultant is employed for the purpose of producing a specific copyrightable work, or where necessary to reflect the contribution of the College to the work, as in the case of software or audiovisual material of any kind.

As between the College and The State Board of Community Colleges, ownership of any of the above-described items shall be determined in accordance with applicable regulations of the State Board of Community Colleges.

The College may charge a reasonable rental fee for use of any of the above-described items and, further, if such item is a learned journal, work of art, book, publication, textbook, library book, form bulletin, or instructional supply, then it may, as allowed by the Umstead Act, be offered for sale by the College.

This policy shall be deemed to be a part of any existing and/or future employment or consulting agreements of the College. (approved by the CFCC Board of Trustees, March 17, 1994)

Online Learning & Student Information

Verification of Student Identity

The College's Computer Acceptable Use Policy governs students' use of account names and login credentials in any classes that have an online component: "An access account assigned to a user must not be used by any other individual. Users are responsible for the proper use of their accounts, including proper password protection and appropriate use of the College's computing resources. Obtaining another user's password, allowing friends, family, co-workers, or any other individual use of your or another user's account, or other unauthorized use of an access account is a serious violation of this policy." The College may employ a variety of measures, including multi-factor authentication and biometric assessments, to verify that a student who accesses and participates in a class with an online learning component is the same student who registered for and receives credit for that class.

Privacy Information

Cape Fear Community College has procedures in place to protect the privacy of all students and their education records, whether students are enrolled in online learning activities or attend class on campus. Cape Fear Community College protects the security, confidentiality, and integrity of all student records

(including online learning students) in accordance with the US Department of Education Family Education Rights and Privacy Act of 1974 (FERPA). Students are notified of their rights under FERPA during student orientation, through the CFCC website, and the CFCC Catalog and Student Handbook. New faculty and staff receive FERPA information during the mandatory new employee orientation. Faculty and staff also receive annual online refresher training on FERPA. Faculty and staff agree to a statement regarding the confidentiality of student records each time they access the College's student information system (Colleague Disclosure Statement), the College's electronic means of accessing student records.

The College's online services employ encryption to protect the data in transit and at rest. Data in transit is protected by Secure Socket Layer (SSL), providing authentication of the server, encryption of all data sent to and from the server, and integrity checks of the data. Data at rest is protected by full disk encryption (ex: Bitlocker or AWS EBS encryption). Encryption is used for myCFCC, Blackboard, Self-Service, and Google Apps.

All students and employees accessing the myCFCC portal agree to the College's Acceptable Use Policy.

Change of Name, Address, Phone Number

It is extremely important for the College to have accurate name, address, and phone information for each student. Name, address, phone number, or personal e-mail updates may be requested by completing and submitting the "Change of Student Information" form through Softdocs or in person at the Registrar's Office. Name changes requested while a student is actively in process of any course(s) will be held and processed by the college after the conclusion of the course(s). Legal name changes will require government issued documentation such as a signed social security card, driver's license, passport, government-issued visa, or applicable court documents.

Cape Fear Community College (CFCC) acknowledges and supports personal expression in hopes to provide a safe and inclusive learning and working environment for its students, employees and visitors of the college. A student or employee may request to identify by a chosen name (sometimes called a preferred name) instead of their legal name. Where appropriate, the chosen name will be recorded and a good faith effort will be made by the college to utilize when made available by the individual. Due to certain legalities, only the first name may be designated for the chosen name, and the last name must remain the individual's legal last name. As such, all individuals should routinely identify themselves with their chosen name to ensure consistent records, to streamline processes, and offer name recognition as accurately as possible.

Definitions:

Chosen Name – A chosen name is an alternative to the individual's legal name, as designated by the individual, instead of using their legal name, whenever reasonably possible.

Legal Name – A legal name is the name a person uses for official governmental documents, such as a license, passport, social security card, and tax forms; and within the requirements of the college's information systems, an official transcript.

It should be understood that even when a chosen name has been entered in various college information systems, the legal name may be required for college business, or to satisfy legal needs. CFCC cannot guarantee that the chosen name will display in all college communications, applications, information systems, databases, and processes.

Specific examples that may require use of a legal name include, but are not limited to:

- Financial, medical, and law enforcement documents
- CFCC Student ID Cards
- Official transcripts
- W-4 forms, I-9 forms, and payroll documents
- Visa/immigration documents
- Employment-related documents and personnel files
- Background check documents
- Insurance documents
- Financial Aid records
- Student account, billing, and/or cashier's records
- Federal reporting
- Inability for college information systems, learning management systems, databases, or processes to display

Under the Family Educational Rights and Privacy Act (FERPA) a student's chosen name or legal may be disclosed to the public as "directory information" per the college's FERPA policy, unless the student chooses to opt out by contacting the Registrar's office.

CFCC reserves the right to refuse a chosen name if it is deemed inappropriate, includes offensive or obscene language, and/or interferes with college business or the mission of the college. Chosen names cannot be used for misrepresentations, avoiding legal obligations, or in any manner that violates CFCC policies or federal, state, or local laws.

Attendance Policy

College instruction is designed for students to learn by way of class attendance, and regular attendance is a key to academic success. Attendance is based on class meetings and calculated from the first class meeting, not based on when the student enrolls in the class. Students are expected to punctually attend all class sessions in the courses for which they are registered. Late arrivals and/or early departures may count toward total absences in classes.

Students who have not attended at least once by the Census date of the course may be administratively dropped as a "No Show." No-Show students will be removed from the class roster and will not be allowed to continue in the class.

Within their respective departmental guidelines, instructors are responsible for stating their own course attendance and tardiness requirements on course syllabi distributed at the beginning of the academic term. It is the student's responsibility to know and understand the attendance requirements for each

instructor and to understand how attendance in class might affect his or her final grade. Regardless of how attendance is used in grading, faculty are required to keep a timely record of attendance for each student through the end of the semester using college-approved, record-keeping software.

Attendance in online (Internet, Internet Synchronous, Hybrid, Blended, and Hyflex) courses is measured not only by completion of an initial enrollment verification assignment (on or before the Census Date of the course) but also by completion of the required coursework and/or online participation, as defined by the instructor on the course syllabus. In courses with synchronous meeting times (Internet Synchronous, Hybrid, and Blended), students **MUST** meet on the required meeting dates specified (first class meeting, lab, etc.). Log into MyCFCC from the CFCC website for course information or contact your instructor.

Attendance policy for students enrolling in a prerequisite English or math course:

Students who enroll in a prerequisite math or English course must attend **at least 80%** of the meeting dates. Students who exceed the maximum allowable absences in the prerequisite support course may be administratively withdrawn by the instructor and may receive a grade of "W".

Special note: Some programs may require that students participate in instructional activities during a holiday or semester break when students are normally off. When such occurs, students must participate. Some examples are Marine Technology and Veterinary Medical Technology.

Adding a course late: After the last day to add a class for a term, students who wish to add a class or be reinstated to a class, must complete a Late Add/Reinstatement Request Form for review & approval or disapproval.

Excused Absences due to Public Health Emergencies

If a student is asked to remain home due to a public health emergency, every effort will be made to ensure that the student remains on track with all coursework. This may include allowing the student to complete assignments and participate in the class remotely when possible. Absences incurred during the recommended or directed self-isolation period will not violate an instructor's attendance policy as long as the student has contacted the Dean of Students' office prior to missing class. The college acknowledges that some classes include content and experiences that cannot be completed remotely. In these cases, instructors, department chairs, and the Vice President of Academic Affairs and the Vice President of Student Services will discuss what options are available to assist students in completing their course of study.

Veteran & Military Service Member Attendance Policy

CFCC recognizes the unique situations that our students who are veterans and/or military service members of the US Armed Forces sometimes endure situations which can affect their attendance. If a veteran and/or military service member student receives orders for unexpected short-term deployment or training, or for medical appointments and/or hospitalization due to service related injuries, absences that result from these orders or appointments will not count toward the total number of absences allowable per the attendance policy of each class in which that student is enrolled.

A student seeking an excused absence should first present military orders and/or medical documentation from an approved provider (Military Hospitals, Veterans Healthcare Administration, and/or Veterans Community Care Program) in relation to service-connected injuries to the Director of Veterans Affairs or Veterans Services Coordinator, to be verified for the respective department chair and the student's instructor. CFCC will adhere to the Excused Absence for Military Service policy, prescribed by the State Board of Community Colleges (SBCCC.500.1), for those service members forward deployed or in training, contingent upon orders submitted to the Director of Veterans Affairs and Veteran Services Coordinator.

The college acknowledges that some classes, such as biology and clinicals in nursing and allied health programs, have unique content; it may not be possible for a student to receive an extension on the assignments in these courses.

We also recognize that there will be unique cases that will require the exercise of sound judgment. Instructors, department chairs, and the Director of Veteran Affairs and Veteran Services Coordinator will collectively discuss these cases to determine the best way to assist our veteran and/or military service member students in completing their course of study.

Students who are currently serving in the Guard/Reserve must adhere to the College's No Show policy by attending all of their classes before the deployment or training begins. Students unable to attend class on or prior to the census date (10% point of class) should register for another class session when available.

Religious Observance Notification

Students will be allowed two days of excused absence each academic year for religious observances required by the faith of the student. Students are required to provide written notice of the request for an excused absence by completing the Religious Observance Absence form available in Student Services and Enrollment Management. The completed form must be submitted to the Vice President for Student Services and Enrollment Management or his/her designee a minimum of ten (10) school days prior to the religious observance. The Vice President for Student Services and Enrollment Management or his/her designee will notify the instructor within three (3) school days of receiving the request. Students will be given the opportunity to make up any tests or other work missed due to the excused absence and should work with their instructors in advance of the excused absence to delineate how to make up the missed coursework (N.C.G.S. 115D-5).

College Closings or Delays

In the event of inclement weather, Cape Fear Community College may close or delay classes depending on the weather forecast and local conditions. All official college closings and delays will be posted on the college website at www.cfcc.edu, myCFCC online portal, the CFCC Emergency Information Hotline (877) 799-2322, and through the local news media. Students who subscribe to the text messaging alert system through CFCC online portal will be notified of closings and delays through text messages. Students are encouraged to familiarize themselves with these resources as soon as possible.

Inclement Weather

While the College makes every effort to provide a safe environment on campus, the College does not take responsibility for student safety while traveling to and from campus. During periods of inclement or hazardous weather, students must use their best judgment when deciding to come to class. College officials do not expect students to take extreme risks to their personal safety to attend class. However, if a student chooses not to come to class due to inclement weather when the college is open, the student will be counted as absent in accordance with the attendance policies for that student's class(es). Classes that are canceled due to inclement weather may, at the discretion of a class's instructor, be made up using the online or web-assisted components of those classes to deliver instruction.

Modifications to Instructional Methods

CFCC values the importance of offering students a variety of instructional delivery options, including traditional face-to-face instruction, online instruction, and blended (face-to-face and online) instruction. In certain circumstances such as public health emergencies or natural disasters, it may be necessary for the college to transition face-to-face and blended classes to online delivery; by modifying the start and end dates of a class; or by other methods of adjusting instructional delivery arrangements in order to ensure the safety and wellbeing of CFCC students, faculty, and staff. Should such changes in instructional delivery become necessary, CFCC will notify all students in a timely manner and will make every effort to assist students with the transition through outreach and offering services such as Counseling, Tutoring, Learning Lab, etc. In such circumstances, CFCC instructors will work to ensure that students continue to have the opportunity to attain the learning outcomes listed in the course description.

Grades

Grading and Grade Point Averages

Grading is done by the traditional method of "A" through "F." Grades are assigned a numerical value when determining a student's Grade Point Average (GPA).

Grading System

Grades and Quality Points

Grade	Significance/Description	Grade Value
A	Superior	4
B	Good	3
C	Average	2
D	Poor	1
F	Failure	0
XF	Unofficial Withdrawal (failure)	0
R	Repeat (remedial courses only)	n/a
I	Incomplete	n/a
W	Official Withdrawal	n/a
AU	Audit	n/a
SR	Senior Audit	n/a
CR	Credit by Proficiency Exam	n/a
CT	Credit by Transfer	n/a
P	RISE Corequisite (pass)	n/a
P1	Transition course - Tier 1 complete	n/a
P2	Transition course - Tier 2 complete	n/a
P3	Transition course - Tier 3 complete	n/a

Grades no longer issued

IE	Incomplete Emergency (Covid)	n/a
NC	Unofficial Withdrawal (failure)	0
NS	No Show (never attended)	n/a
PA	Passing (remedial courses only)	n/a
PB	Passing (remedial courses only)	n/a

PC	Passing (remedial courses only)	n/a
WE	Withdrawal Emergency (Covid)	n/a

Grading Scale

The College grading scale is:

A=92 - 100

B=84 - 91

C=76 - 83

D=68 - 75

F=0 - 67

Translating Course Grades into GPA

By taking the number of semester hours assigned to a course and multiplying that credit value by the value of the grade, you determine the grade points for each course attempted. Example: If you take five courses that are assigned a total of 18 semester hours, you may determine your term GPA in the following manner:

Course	Grade	Hours Attempted	Grade Value	Quality Points
1	B	2	X 3	= 6
2	A	6	X 4	= 24
3	C	4	X 2	= 8
4	B	3	X 3	= 9
5	F	<u>3</u>	X 0	= <u>0</u>
TOTALS		18		47

Divide the total quality points by the number of credit hours attempted (per the example this is 47 divided by 18) and that will give you your GPA; in this case 2.61 is the GPA. If a course was repeated, only use the course with the best grade when calculating the GPA. For example, if ENG-111 was taken in the spring 2020 term with an earned grade of D and then it was retaken in the fall 2020 term with

a grade of B, you will only include the attempt from fall 2020 which has the highest grade. Only the highest grade per course is used in the GPA calculation at CFCC.

Final Grades

Final grades will be available through Self Service for students after the end of each academic session. Course grades, along with semester and cumulative grade point average (GPA), will be displayed. Grade reports are not mailed to students.

Incomplete Grades

A grade of incomplete (I) will be given only when circumstances justify additional time to complete a class. Students must contact their instructor in writing to request a grade of incomplete at least one week prior to the last day of classes of the section for which they are requesting an incomplete. Students must have successfully completed at least 75% of the required coursework for a class to be eligible to receive a grade of incomplete. Students may be required to provide documentation of the circumstances justifying their request for additional time. When an incomplete is granted, the class requirements must be completed within six weeks of the beginning date of the next academic semester (including summer). Incompletes (I) not finalized within the appropriate time frame will convert to a grade of "F". After the Incomplete Grade form has been approved by the student, the student must proceed with the Incomplete and cannot later request to be issued another grade such as a "W" for withdrawal. Extensions to the six-week time frame may be requested by faculty and must be approved by the Vice President of Academic Affairs in consideration of students' extenuating circumstances.

Course Repeat Policy

Courses that are repeated fall into three different categories:

1. Courses with an earned grade of "C" or better may be repeated two times.
2. Courses with an earned grade of "D," "F," "W," "WP," "XF," or "WF" may be repeated until successfully completed.
3. Audit courses may be repeated a maximum of two times unless an exception is made.

When a course has been repeated, the higher grade will be used in the Grade Point Average (GPA) calculation. Lower grades will be removed from GPA calculation; however, these grades will continue to appear on the academic transcript.

Students who receive veteran benefits or financial aid should be advised that they may not receive funds for repeating courses which they have already passed.

Also, students who have received a degree from CFCC should be advised that the policy will not apply to courses which were taken to fulfill previous graduation requirements. A final student program GPA is computed at the time of graduation, and this GPA may not be recalculated as courses are repeated.

Academic Forgiveness

Academic Forgiveness is designed to provide returning students with low grades a fresh start upon re-enrolling after at least three terms of non-enrollment at CFCC (one full year). Prior to applying for academic forgiveness, the student must demonstrate a renewed academic interest and effort by earning at least a 2.0 term GPA in the first six (6) semester hours completed after re-enrollment. Developmental course credits will not count toward the first six (6) hours. At the time of application for Academic Forgiveness, the student should not have any failing grades during the re-enrollment period. Students returning to their same program of study may be best served by retaking courses for replacement grades instead of pursuing Academic Forgiveness.

After completing 6 credit hours with a 2.0 or higher term GPA, students should consult with their CFCC assigned academic advisor and/or counselor to determine if they are eligible for academic forgiveness. If the determination is made that the student is eligible for academic forgiveness, then the student must complete and submit the Academic Forgiveness form. Once submitted, the Registrar's Office will review the student's academic record for eligibility and students will be notified of a decision via their CFCC student email account.

The following points apply regarding the consideration of academic forgiveness:

1. Academic forgiveness is not reversible and may only be applied once during an academic career at CFCC.
2. Students granted academic forgiveness will have their cumulative grade point averages recalculated. While the forgiven grades will continue to appear on the official transcript, they will be marked as forgiven.
3. Grades which may be disregarded from students' grade point averages are "F," "XF," "WF," and "NC." Grades of D may be forgiven if it is determined by the Registrar that the course is unable to be retaken for a better grade.
4. Courses that have been applied toward an awarded certificate, diploma, or degree at CFCC are not eligible for academic forgiveness.
5. Grades that are included in academic forgiveness are not exempt from academic progress relating to financial aid and VA educational benefits.
6. Since developmental course work does not count in the student's cumulative GPA, developmental course grades are not eligible for academic forgiveness.
7. Academic Forgiveness has no bearing on any other institution or how they calculate grade point averages. Students planning to transfer should ask their receiving institution how Academic Forgiveness will be considered.

Note: The three-term period of non-enrollment starts the term after the last enrollment and goes for three full terms. For example, if the student stops attending after the Fall term, they must not enroll the following Spring, Summer, or Fall to be eligible.

Grade Appeal Procedure

The purpose of the Student Grade Appeal Procedure is to provide an orderly and equitable process for resolving differences between students and faculty relating to final grades where the student believes he/she is being treated unfairly or arbitrarily.

Procedure

Step 1. The student with the conflict must first make an appeal in writing to the class instructor to attempt to resolve the difference. This initial appeal must be made by the student within five (5) weekdays of the posting of final grades for the term. Every reasonable effort should be made to resolve the matter at this level (Step 1). The instructor will notify his/her department chair in writing of the grade appeal.

Step 2. If the student is not satisfied with the decision of his/her instructor in Step 1, he/she may, within five (5) weekdays of the date of notification of the instructor's decision on the grade appeal, file a written appeal to the instructional dean responsible for the course in question. The dean will review and evaluate the appeal to determine what action, if any, should be taken to resolve the conflict. Written notification of that determination will be sent to the student within five (5) weekdays of receipt of student's written notice.

Step 3. If the student is dissatisfied with the outcome of Step 2, he/she may, within five (5) weekdays of the date of notification of Step 2, file a written notice of appeal to the Vice President for Student Services. The Vice President for Student Services will convene the Academic Subcommittee of the Judicial Board to hear the appeal and make a determination regarding the appeal. The Vice President for Student Services will then notify, in writing, the student, the dean, the department chair, and the instructor of the Academic Subcommittee's decision. The student may appeal the Academic Subcommittee's decision to the President of the College or his/her designee. This appeal must be made within ten (10) weekdays of the student's receipt of the Academic Subcommittee's decision. The appeal process consists of the President of the College or his/her designee reviewing the written record submitted to date and does not involve an additional hearing. The President of the College or his/her designee will respond with his/her final decision to the appeal within ten (10) weekdays of receipt of the appeal.

Students dismissed from the clinical area in Health Sciences and Nursing programs will follow the appeals process outlined in the program student handbook.

Academic Standing: Warning and Probation

The policies governing academic standing at CFCC are intended to assist students in successfully completing their programs of study. Procedures are designed to identify students experiencing academic difficulty and to ensure effective corrective action. These procedures are supported by both faculty and staff, who are committed to

1. informing all students of minimum academic standards and grading procedures

2. identifying and alerting students displaying signs of academic difficulty early in the semester through an early alert process
3. providing recommendations and opportunities for corrective actions to such students
4. immediately notifying students with a cumulative grade point average of below a 2.0 following the end of the semester

Students enrolled in a degree, diploma, or certificate program are expected to maintain satisfactory academic progress toward the completion of the requirements for their program. A minimum grade point average (GPA) of at least 2.0 is required to graduate with a credential from CFCC.

Academic Warning

Students whose cumulative grade point averages fall below a 2.0 for any given semester will be placed on academic warning for the following semester. The notice of the warning will be sent to the students and their advisor for documentation purposes. Students on academic warning are encouraged to access CFCC resources including the Learning Lab, Counseling, enrolling in ACA 122 (if applicable to student's program), the Academic Advising Center, Student Accessibility Services, Financial Aid, and/or Career Services.

Academic Probation

Students on academic warning whose cumulative grade point average remains below a 2.0 for the subsequent semester will be placed on academic probation for the upcoming semester. Students on academic probation are required to meet with their assigned Counselor and/or Academic Advisor to develop an Academic Improvement Plan before registering for classes. The Academic Improvement Plan may include the following interventions to assist the student with improving his/her GPA:

- Limiting the number of courses in which the student may register in the subsequent semester. The student may not be allowed to register as a full-time student. Based on the student's academic record, a Counselor and/or academic advisor has the authority to limit students to a reduced course load. This information will be outlined in the student's Academic Improvement Plan.
- Repeating a course in which the student earned a low grade.
- Meeting with someone in the Learning Lab, and attending appropriate student success seminars and/or tutoring sessions.

Furthermore, students on academic probation whose cumulative grade point average remains below 2.0 in any subsequent semester thereafter will remain on academic probation until the 2.0 cumulative GPA is met. Students continuing on academic probation are required to meet with their assigned Counselor and/or Academic Advisor as determined in the Academic Improvement Plan until their cumulative GPA reaches 2.0.

Students receiving financial aid must maintain satisfactory academic progress (SAP) to be eligible to continue to receive funding. All earned grades will be used to determine a student's compliance with the

2.0 cumulative GPA requirement, and all attempted hours will be included in the calculation of maximum time frame.

Academic Integrity / Cheating and Plagiarism

Academic-Related Violations include, but are not limited to the following:

A. Plagiarism – Plagiarism includes submitting as one's own work or creation of any kind that which is wholly or in part created by another. All sources, including Internet content, whether paraphrased or quoted, must be cited correctly. Direct quotes must have quotation marks around them, or they are considered plagiarism even if the quote is correctly cited. Rearranging parts of author's sentences or substituting a few words is NOT paraphrasing and also constitutes plagiarism. Plagiarism also includes submission of any work that is generated using artificial intelligence (AI) software or applications that auto-generate content.

B. Cheating – is any practice which gives one student a dishonorable advantage over another student engaged in the same or similar course of study. It shall include, but is not limited to the following: securing or giving assistance during examinations or on required work; the improper use of books, notes, or other sources of information; or the altering of any grade or academic record.

C. Aiding Acts of Academic Dishonesty – Providing information to another student and knowing, or reasonably should have known, that the student intends to use the information for cheating or other deceptive purposes.

When a faculty member observes an academic-related violation on the part of the student, the case shall be handled in accordance with the following procedures:

1. The faculty member shall notify the student who has been observed cheating or plagiarizing that he/she will receive a grade of "F" on the assignment, or "F" in the course. The faculty member, however, shall afford the student an opportunity to clarify his/her position. If the faculty issues an "F" in the course, and the student wishes to appeal the final grade, the student may remain in the class until due process is completed.
2. The faculty member shall submit a written report of the incident stating the facts and the action taken to the appropriate department chair, academic dean, and Dean of Student Affairs, within five (5) weekdays from the time the incident was discovered. Upon request, the student shall receive a copy of the written report as submitted by the faculty member.

Right of Appeal

If the student and department chair and/or academic dean fail to reach a mutual agreement, the student may submit a written appeal to the Vice President of Academic Affairs within five (5) weekdays.

The Vice President of Academic Affairs will present the appeal to the Dean of Student Affairs to serve as a student advocate and to coordinate a hearing with the Academic Subcommittee of the Judicial Board within ten (10) weekdays of notification. To ensure the student receives due process, the student will meet with the Dean of Student Affairs prior to the hearing to answer any questions or concerns that the student may have during the appeal process.

The subcommittee of the Judicial Board should include:

- a. Two (2) faculty and/or staff members appointed by the Dean of Student Affairs.
- b. The Vice President of Instruction who will serve as the chair without a vote (unless there is a tie). At the conclusion of the appeal hearing, the Vice President of Academic Affairs will notify the student, faculty member, department chair, and dean of the committee's decision. The student may appeal the Academic Subcommittee's decision to the President of the College or his/her designee. This appeal must be made within five (5) weekdays of the student's receipt of the notification made by the Vice President of Academic Affairs. . The appeal process consists of the President of the College or his/her designee reviewing the written record submitted to date and does not involve an additional hearing. The President of the College or his/her designee will respond with his/her final decision to the appeal within ten (10) weekdays of receipt of the appeal.

Withdrawal From a Course

During the add/drop period, students can drop classes using Self-Service. After the add/drop period ends, students must follow the withdrawal process. Students who wish to withdrawal from a course after the add/drop period should first consult their instructor and/or assigned counselor before requesting to be withdrawn from a course. Students that are dual enrolled at CFCC should consult with their high school counselor and/or CFCC Career Coach prior to withdrawing from a course. Course withdrawals also may impact a student's financial aid status; therefore, students are strongly recommended to consult with a financial aid representative prior to withdrawing. Veteran students should consult with the Veterans Services Coordinator in financial aid.

To officially withdraw from a class, students must submit a Course Withdrawal Request form. Students who officially withdraw from a class by the established withdrawal deadline (75 percent point of the class) will receive a grade of "W" on their official record and transcript.

Exceptions to 75% Withdrawal Date

The Vice President of Student Services may make exceptions to extend the 75% date when warranted in cases of extenuating circumstances at his/her discretion. Such cases shall include, but are not limited to, national or local emergencies, weather related events, or student medical related absences. In such cases a grade of "W" will be issued during the final twenty five percent (25%) of the academic term. In addition, if another grade was already issued for the course(s) prior to an appeal approval, it will be changed to the grade of "W." If the request for an extended withdrawal originates from a student (or

their legal power of attorney or guardian in cases where the student is incapacitated) for the purposes of medical related absences, they must comply with the following steps:

1. Submit medical documentation supporting a request for a medical withdrawal within thirty (30) calendar days of the last attended class unless medical documentation is provided that satisfactorily explains a longer time period. It is most feasible that the request and documentation be submitted before the end of the semester (and end of the classes) in question. The documentation must be submitted to the Vice President.
2. The decision of the Vice President will be communicated to the student via registered mail, hand-delivered, or electronically with confirmation of receipt from the student. The Vice President's decision is final.
3. Students who are granted medical withdrawals will receive the grade of "W" in all courses in progress and/or specified in the request.

Withdrawing may have a negative impact on students' Satisfactory Academic Progress status, and as a result, withdrawals may lead to a loss of eligibility for future financial aid (including loans). Students are urged to review the college policies on Satisfactory Academic Progress for Financial Aid Recipients and contact the Financial Aid Office before withdrawing to discuss potential impact on their bill and/or financial aid eligibility.

Unofficial Withdrawals:

- An "unofficial withdrawal" occurs when a student stops attending a course and does not actively and consistently participate in any academic-related activities beyond the 60percent date of the term.
- Students who are unofficially withdrawn will be issued final grades of XF. The grade of XF will be assigned as a student's course grade when all of the following conditions are met:
 - Failed a course (no credits earned).
 - Attended a course at least once in the first 10 percent of the course.
 - Stopped attending and/or did not participate in any academic-related activity (as defined below) on or before the 60 percent date of the term.
 - Did not officially withdraw or return to the course beyond the 60 percent date of the term.

No tuition or fee adjustments will be made. The XF grade will calculate the same as an F (failure) grade, affecting GPA in the same manner as an F. Students who receive an XF or W grade may be required to repay a percentage of their Federal Aid back to the Department of Education or to the Veterans Administration.

Notes:

Examples of "academic-related" activities that may count as attendance are inclusive of (but not limited to): physically attending class, participating in class with a "clicker" device, submitting an assignment/exam/tutorial, attending a study group assigned by the instructor, or participating in an

online discussion about academic matters. Simply logging into an online course does not count as an academic-related activity.

Please refer to the Academic Calendar for the withdrawal deadlines for each term.

Go to <http://cfcc.edu/finaid/> for more information about financial rules and policies.

Computer Acceptable Use Policy

Purpose

College-owned or operated computing resources are reserved for the educational, instructional, research, and administrative computing needs of the faculty, students, staff, and other individuals authorized by the College. The College's computing resources include but are not limited to all College computers and hardware, access to the Internet or access to any College intranet provided through College-owned or operated computers, online and offline storage, and network and communications facilities. Access to these computing resources is a privilege and, therefore, it is essential that all users exercise responsible ethical behavior when using these resources. Users are expected to read, understand, and comply with the College's Acceptable Use Policy.

The College monitors access to the computing resources and reserves the right, without prior notice to users, to access the College's computing resources and to use any and all information retrieved from the computing resources. Users do not have an expectation of privacy regarding their use of the computing resources, and by accessing and using the College's computing resources, users expressly consent to such monitoring, access, and use by the College. Further, information contained on the College's computing resources and in College accounts, including but not limited to e-mail, may be subject to inspection under the Public Records Law of the State of North Carolina.

The College does not attempt to articulate all required or unacceptable behavior by its users. Therefore, each user's judgment on appropriate conduct must be relied upon. To assist in such judgment, users will follow this policy:

1. College computing resources are to be used only for educational, research, or instructional purposes for which access is provided, and are not to be used for any unauthorized purpose, including but not limited to commercial purposes, unauthorized access to remote computers or non-College related activities.
2. An access account assigned to a user must not be used by any other individual. Users are responsible for the proper use of their accounts, including proper password protection and appropriate use of the College's computing resources. Obtaining another user's password, allowing friends, family, co-workers, or any other individual use of your or another user's account, or other unauthorized use of an access account is a serious violation of this policy.
3. Users may not attempt to impersonate another person or organization. Users may likewise not misuse or appropriate the College's name, network names, or network address spaces.

4. All computer software is protected by federal copyright law. In addition, most software is proprietary and protected by legal licensing agreements. Users are responsible for being aware of the licensing restrictions for any software used on the College's computing resources.
5. Users shall not download, reproduce and/or distribute copyrighted or licensed materials without proper authorization from the author or creator. Additionally, users shall not publish information, messages, graphics, or photographs on any web page, without the expressed permission of the author or creator.
6. Users shall not engage in activities to damage or disrupt the hardware, software, or any communication associated with the College's computing resources, such as virus creation and propagation, wasting system resources, overloading networks with excessive data, or any attempt to circumvent data protection schemes or uncover security loopholes.
7. Users shall not waste, monopolize, interfere or misuse the College's computing resources by, for example, requesting an excessive number of copies from a printer, playing games or participating in chain letters or Ponzi schemes.
8. Users shall not access or damage any portion of the College's computing resources or other College property, such as College records, applications or data. The College's computing resources shall not be used for illegal activities.
9. Users learning of the misuse of the College's computing resources or violations of the Acceptable Use Policy must notify a faculty member of the College or other College official immediately.
10. Any student identified as initiating or participating in the verbal, social, or physical bullying; whether in person, through social media or through electronic devices will be subject to disciplinary action as determined by the Office of the Vice President of Student Services and Enrollment Management.

Enforcement

Failure to follow the Acceptable Use policy and/or any misuse of the College's computing resources may result in the suspension or revoking of access accounts, removal from the class with a grade of "F", as well as other College disciplinary sanctions including but not limited to conduct warning, probation, suspension, or dismissal from the College. All College policies and procedures are applicable to users of the College's computing resources. A violation of the Acceptable Use Policy is considered participation in an activity which disrupts the educational process of the College and is a violation of the Code of Conduct, as well as other applicable policies and procedures of the College. Any conduct, which violates local, state, or federal laws, will result in the immediate loss of all access to the College computing resources and will be referred to appropriate College offices and/or law enforcement authorities.

*Last updated: Approved 1/19/17

Children on Campus Policy

Children cannot be taken into classrooms, laboratories or shops unless authorized by College personnel. Children cannot be left unattended on campus including the Learning Resources Center, lounge areas, registration sites, administrative offices or parking lots.

Failure to comply with this policy will lead to disciplinary action as outlined in the College Catalog, Student Handbook and Faculty and Staff Handbook. Visitors violating this policy will be notified of the violation and continued violation will result in the individual being asked to leave campus.

Dress & Attire

In an effort to provide a professional and safe learning environment that is inclusive for all students, CFCC expects all individuals to dress appropriately and in a manner that will not disrupt or distract from the educational purpose of this institution. Students are required to wear shoes at all times to ensure safety and promote good hygiene. Clothing or attire that is objectively offensive, and/or sexually explicit is not acceptable. Students enrolled in certain Technical/Vocational or Health Science curriculum, may be required to wear special attire for clinical or laboratory classes. If special attire is required, students may not attend classes, laboratory, or clinical site work if their dress is in violation of specific program requirements.

Furthermore, students' should take positive steps to exercise good hygiene and personal care in order to improve their physical and mental well-being, and overall health. If a student's dress or hygiene interferes with the learning process, the student will be referred to counseling and/or the Dean of Students. Failure to adhere to these minimum standards and guidelines could result in the denial of admission, re-enrollment, and/or removal from CFCC premises/property.

Tobacco Free Campus Policy

Cape Fear Community College (CFCC) is committed to a Tobacco-Free Campus to ensure the health and safety of its students, employees, and visitors of the College. CFCC recognizes the use of tobacco products on college premises is detrimental to the health and safety of its students, employees, and visitors and exercises the legal authority to prohibit tobacco use pursuant to G.S. 143-599.

For the purposes of this policy, tobacco is defined as any type of tobacco product including, but not limited to, cigarettes, cigars, cigarillos, pipes, bidis, hookahs, smokeless or spit tobacco or snuff, e-cigarettes or any product simulating smoking instruments.

Use of tobacco is prohibited by students, employees, and visitors:

- in all campus buildings, facilities, or property owned, maintained, or leased by Cape Fear Community College and outside areas of the campus;
- on campus grounds, facilities, or in vehicles that are the property of the college;
- in personal vehicles while on property owned or leased by Cape Fear Community College;
- at lectures, conferences, meetings, and athletic, social, and cultural events held on college property;

- except at a specific location(s) on the North Campus, Surf City, and Burgaw Centers as approved by the college President due to unsafe conditions going off-campus.

The sale or free distribution of tobacco products, including merchandise, on campus or at college-sponsored events is prohibited.

Student clubs/organizations are prohibited from accepting money or gifts from tobacco companies, including, but not limited to:

- events sponsored by tobacco companies and allowing them to distribute free, reduced-price, or fully priced tobacco products (T-shirts, hats, etc.) on campus;
- all tobacco advertising, such as billboards and signs in all campus buildings, facilities or property owned or leased and operated by Cape Fear Community College.

Tobacco advertisements are prohibited in college-run publications and on grounds or facilities, including athletic facilities, owned or operated by Cape Fear Community College.

Cape Fear Community College will provide access to tobacco cessation programs on campus. These tobacco treatment programs shall be publicized regularly in student and employee publications by Student Services and/or Human Resources respectively.

Implementation & Compliance:

To assist with compliance of this policy, the college provides appropriate signage and other physical indicators. Violators of the policy shall be issued a verbal reminder. Employees who repeatedly violate the policy shall be referred to their supervisor, and if warranted, Human Resources. Repeated violations by employees can result in further personnel action such as verbal or written reprimand. In accordance with the CFCC student Code of Conduct, students who violate this policy shall be referred to the Dean of Students for disciplinary action. Visitors who repeatedly violate the policy shall be asked to leave campus, and if warranted, referred to Campus Safety.

Drug and Alcohol Policy

1. Cape Fear Community College does not differentiate among unlawful users, sellers, or pushers of drugs or alcohol. Any employee or student who unlawfully uses, possesses, sells, gives, or in any way transfers alcoholic beverages or a controlled substance is subject to disciplinary proceedings by the College, and referred for prosecution.
2. The term controlled substance means any drug listed in CFR part 1308 and other federal regulations, as well as those listed in Article V, Chapter 90 of North Carolina General Statutes. Generally, these are drugs which have a high potential for abuse such as: Marijuana, Cocaine, PCP, Heroin, and Crack among others. They also include legal drugs that are not prescribed by a licensed physician. The term alcoholic beverage includes beer, wine, whiskey and any other beverage listed in Chapter 188 of the General Statutes of North Carolina. Persons within the College community are responsible for knowing about and complying with the Cape Fear Community College Drug/Alcohol Policy.

3. Any employee or student who is convicted of violating any criminal drug or alcoholic beverage statute while in the workplace, on College premises, or as part of any College sponsored activity will be subject to disciplinary action by the College up to and including termination or expulsion and referred for prosecution. Specifically, any such person convicted of a felony, or a misdemeanor which results in an active prison sentence will, if a student, be expelled, or if an employee, be terminated from employment (subject to existing disciplinary policies applicable to state or federal law which may apply to employees). Other misdemeanors or convictions will be evaluated on a case-by-case basis and the specific penalties may range from written warnings with probationary status to enrollment expulsions and employment discharges. The College may also require the employee or student to successfully complete a drug abuse treatment program as a precondition for continued employment or enrollment. Persons charged with illegal drug/alcohol involvement may be suspended pending any legal proceedings, if it is determined by the president or designee that the persons continued presence within the College would pose a serious and immediate danger to the health or welfare of other persons within the College.
4. Each employee or student is required to inform the Executive Director of Human Resources or the Vice President for Student Services and Enrollment Management, respectively, in writing within five (5) days after a conviction of any criminal drug or alcoholic beverage control statute where such violations occurred in the College workplace, on College premises, or as part of any College sponsored activity. A conviction means a plea or a finding of guilt (including a plea of nolo contendere) and the imposition of a sentence by a judge or jury in any federal or state court.
5. College Administrators have the right to contact parents of any student under the age of 21 who has violated a federal, state, or local law, or any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance.

For those students or employees receiving or working under a federal grant, the College must notify the United States governmental agency from which a grant was made within ten (10) days of receipt of such notice from the grant employee, or otherwise after receiving actual notice of a criminal drug conviction. Appropriate disciplinary action will be taken by the College within 30 calendar days from the receipt of such notice. The law requires that all employees abide by this policy as a condition for continued employment on any federal grant.

Legal Consequences

The illegal use of drugs and alcohol constitutes a serious crime under federal, state and local laws. Convictions may result in imprisonment, fines and/or mandatory community service. A drug conviction can disqualify a student for federal student aid. A record of a felony conviction may prevent a person from entering a chosen career. North Carolina law makes it illegal to manufacture, to sell or deliver, to possess with intent to sell or deliver, or to traffic controlled substances.

Under North Carolina law, the minimum age to purchase, possess, or consume any alcoholic beverage is 21 years old. Consumption of liquor or fortified wine by anyone 18 years old and younger is a Class 1

misdemeanor. Those 19- and 20-year-olds who drink beer or wine will be charged with a Class 3 misdemeanor. A person convicted for the first time of selling or providing alcohol to someone under 21 will receive a minimum sentence of a \$250 fine and 25 hours of community service. For a second or subsequent offense within four years, the penalty is no less than a \$500 fine and 150 hours of community service. A person convicted of aiding and abetting the sale or provision of alcohol to someone under 21 for a second or subsequent offense within four years, the sentence is no less than a \$1000 fine and 150 hours of community service. A driver may not consume any alcoholic beverages while driving. Driving after drinking with an alcohol concentration of .08 means a person is driving while impaired. No person may transport in the passenger area spirituous liquors in any container other than the manufacturer's unopened original container. Violations may result in imprisonment, fine, mandatory community service and/or loss of driving privileges. Therefore, 19- or 20-year-olds who are convicted of an alcohol violation may have a criminal history that would affect professional organizations, and employers could use such a record to reject an applicant.

Federal Penalties and Sanctions for Illegal Possession of a Controlled Substance

- 21 U.S.C. 844(a) – 1st conviction: Up to 1 year imprisonment and fined at least \$1000 but not more than \$100,000, or both. After 1 prior drug conviction: At least 15 days in prison, not to exceed 2 years and fined at least \$2,500 but not more than \$250,000, or both. After 2 or more prior drug convictions: At least 90 days in prison, not to exceed 3 years and fined at least \$5,000 but not more than \$250,000, or both. Special sentencing provisions for possession of crack cocaine: Mandatory at least 5 years in prison, not to exceed 20 years and fined up to \$250,000, or both, if:
 - 1st conviction and the amount of crack possessed exceeds 5 grams.
 - 2nd crack conviction and the amount of crack possessed exceeds 3 grams.
 - 3rd or subsequent crack conviction and the amount of crack possessed exceeds 1 gram.
- 21 U.S.C. 853 (a)(2) and 881 (a)(7) Forfeiture of personal and real property used to possess or to facilitate possession of a controlled substance if that offense is punishable by more than 1 year imprisonment. (See special sentencing provisions re: crack)
- 21 U.S.C. 881(a)(4) Forfeiture of vehicles, boats, aircraft or any other conveyance used to transport or conceal a controlled substance.
- 21 U.S.C. 844a Civil fine of up to \$10,000.
- 21 U.S.C. 853a Denial of Federal benefits may apply, such as student loans, grants, contracts, and professional and commercial licenses.
- 18 U.S.C. 922(g) Ineligible to receive or purchase a firearm.

Miscellaneous: Revocation of certain Federal licenses and benefits, e.g. pilot licenses, public housing tenancy, etc., are vested within the authorities of individual federal agencies. Note: These are only federal penalties and sanctions. Additional state penalties and sanctions may apply.

Health Risks

No illicit drug is free of health risks. Most carry the danger of psychological or physical addiction. All cause distortion of brain functioning and can alter thinking, perception, and memory, as well as, affect behavior. The use of intravenous drugs also presents the risk of infection with potentially deadly diseases (e.g. AIDS develop as result of damage to the respiratory, circulatory, and other body systems). Every illicit drug has the potential to result in death-whether from the body's own reaction to the abuse of drugs or from accidents caused by persons who are impaired. Although alcohol is not an illegal substance when consumed by adults over the age of 21, it presents many of the same health risks as illicit drugs. Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increases the incidence of a variety of aggressive acts, including spouse and child abuse. Moderate to high doses of alcohol cause marked impairments in higher mental functions; severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described. Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver. Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

Available Resources

Many public and private resources are available for those needing assistance with drug or alcohol issues. In New Hanover County, call (910) 251-6530. In Brunswick County, call (910) 253-4485. In Pender County, call (910) 259-5476.

Another resource is the Alcohol/Drug Council of NC Information and Referral Service: (800) 688-4232. This is a drug abuse information and treatment referral line where individuals can get information and referrals to appropriate treatment facilities.

Counseling and Rehabilitation Services to Prevent Substance Abuse

Students, faculty, and staff may seek assistance with an alcohol or drug-related problem through Cape Fear Community College. A listing of available services and referrals will be provided in the Counseling Office of Student Services and Enrollment Management.

A copy of this policy is distributed annually to students and employees.

Zero Tolerance Statement

The College reserves the exclusive right to immediately suspend any activity that is not being conducted in exact accord with the college-approved description of the activity or any activity that substantially disrupts or materially interferes with the work, discipline, and/or educational activities of the College (e.g., by violating reasonable college rules and regulations, interrupting classes or other college programs or activities, or inciting or producing imminent violence or other lawless action on college premises) as adjudged by designated college officials. The College reserves the exclusive right to disband any student organization and/or club that; (1) conducts such inappropriate and/or unapproved activities; and (2) fails to follow the College guidelines.

Moreover, Cape Fear Community College has "zero tolerance" when it comes to drugs and alcohol consumption while representing the College during college events. Any violation will result in immediate suspension from the College for one academic year and complete withdrawal from all current classes; no exceptions. In addition, the suspended individual will have a notation placed on their permanent CFCC record.

Cape Fear Community College does not differentiate among unlawful users, sellers or pushers of drugs or alcohol. Any student who uses, possesses, sells, gives or in any way transfers alcoholic beverages or a controlled substance is subject to disciplinary proceedings by the College and referred for prosecution. For more information refer to the Cape Fear Community College's Drug and Alcohol Policy.

CFCC Student Code of Conduct

The College makes every effort to maintain a safe and healthy learning environment for its students and employees alike. When a student is in violation of the Code of Conduct, they will be subject to disciplinary action by the College, and if warranted, referred to the appropriate law enforcement agency. It is expected that students are courteous, respectful, accountable, and conduct themselves as responsible members of the College community. Participation in any activity which, in the opinion of the administration, disrupts the educational process or functioning of the College may result in disciplinary action. Specific violations of the Code of Conduct and/or college policy include, but are not limited to the following:

Academic Integrity (*cheating and/or plagiarism*)

Bullying/Hazing (*initiating or participating in verbal, social, or physical bullying; whether in person, through social media, electronic devices, or any other means*)

Children on Campus

Communicating Threats

Computer Acceptable Use

Destruction of College Property

Discrimination

Drug, Alcohol and Controlled Substance

Fighting

Forgery

Fraud

Gambling

General Disruptive Behavior

Harassment

Larceny/Theft

Profanity/Obscene Language

Sexual Misconduct

Substance Abuse and/or Possession (*any drug as defined under North Carolina General Statutes*)

Tobacco Free Campus

Violation of Federal, State, or Local Law

Weapons on Campus (*possess or carry, any weapon on campus, whether openly or concealed*)

Zero Tolerance

Violation of these rules of conduct and/or policy will not be tolerated in or on any part of the campus, its satellites, equipment it operates, or wherever its employees or students are required to be while performing their duties as employees or students. Any violation of these standards of behavior may result in disciplinary sanctions and/or dismissal from the College. Additional classroom rules may be designated by instructors or supervisors and must be followed at all times. College administrators have the right to contact parents of any student under the age of 21 who has violated a federal, state, or local law, or any rule or policy of the institution, governing the use or possession of alcohol or a controlled substance.

Any person observing a conduct violation(s) should immediately contact the Dean of Student Affairs or the Vice President for Student Services.

Conduct Warning, Probation, Suspension, and Expulsion

CFCC students are expected to conduct themselves in accordance with college rules, regulations, policy and/or local, state or federal law. Any student whose conduct or behavior becomes unsatisfactory may be placed on conduct warning, probation, suspension, or may be expelled from the college. If an act of misconduct threatens the safety, health or well-being of the College community or severely disrupts the educational process/learning environment, the Dean of Student Affairs or his/her designee, may impose an interim suspension, or campus ban, from the College and/or College premises until disciplinary proceedings are completed and due process is provided to the student. Interim suspension may result in exclusion from class and/or other College related privileges or activities until a final decision can be made concerning the alleged violation. A student is subject to immediate suspension and expulsion, if deemed necessary, by the Dean of Student Affairs or Vice President for Student Services.. CFCC has the right and responsibility to protect the welfare of the college community and has the discretion to impose disciplinary sanctions under the CFCC Student Code of Conduct.

Warning – is a status of "conduct warning" through the duration at CFCC.

Probation – is a status of "conduct probation" for the duration at CFCC.

As part of conduct probation a student may have restrictions placed on specific student privileges or may be required to satisfy certain conditions to return as determined by an administrative hearing and/or the Dean of Student Affairs. In the event of a further violation of the Code of Conduct, or other College rules while on disciplinary probation, the College may seek the penalty of suspension or expulsion if warranted.

Suspension – is the status of "conduct suspension", which involves immediate removal from campus, withdrawal from enrollment for a specific period of time, registration privileges revoked, and will remain on the student's permanent record.

Expulsion – is the permanent dismissal of a student from the College. Expulsion will result in immediate removal from campus, withdrawal from enrollment, registration privileges revoked, and will result in a permanent notation on the CFCC official transcript.

Conditions to Return

Any student that is on conduct probation, suspension or removed from classes due to a code of conduct violation may be required to submit appropriate documentation or satisfy certain conditions to return as determined by an administrative hearing and/or the Dean of Student Affairs. Those conditions may include, but are not limited to, counseling, evaluation/assessment by a mental health provider, anger management, proof of rehabilitation and/or other required documentation.

All suspended students must meet with the Dean of Student Affairs or designee to make clear the terms of their suspension from the College. Re-enrollment after a suspension period requires that

the student apply to the Dean of Student Affairs at the close of the imposed period, and the Dean will determine whether the student has met the conditions imposed and is otherwise eligible for re-enrollment. To ensure due process, a denial may be appealed to the Judicial Board.

Cape Fear Community College has the authority, exercised in its reasoned judgment, to ban students, employees, and visitors, using existing policies, and/or procedures (i.e. Code of Conduct suspensions, expulsions). Likewise, the college may ban a student on an interim basis if he or she is deemed to pose an imminent threat to college property or operations, to the safety or well-being of others, or otherwise has engaged in unacceptably disruptive conduct that disturbs the CFCC learning and working environment. During the term of suspension and/or expulsion, the student may not come onto campus (campus ban) and may be served with a No-Trespass Order. Failure to abide by this condition may result in arrest for criminal trespassing and/or referred for prosecution.

A student who is suspended or expelled after the deadline for withdrawal ("W"), shall be assigned a grade of "W" and administratively withdrawn regardless of academic performance.

Right of Appeal

If a student wishes to appeal a conduct sanction or action taken by the College, he/she may file a written appeal within five (5) weekdays of the incident to the Vice President for Student Services.

The Vice President of Student Services will present the appeal to the Dean of Student Affairs to serve as a student advocate and to coordinate a hearing with the Code of Conduct Subcommittee of the Judicial Board within ten (10) weekdays of notification. To ensure the student receives due process, the student will meet with the Dean of Student Affairs prior to the hearing to answer any questions or concerns that the student may have during the appeal process.

The subcommittee of the Judicial Board should include:

1. Two faculty and/or staff members appointed by the Dean of Student Affairs.
2. The Vice President of Student Services who will serve as the chair without a vote, (unless there is a tie).

At the conclusion of the appeal hearing, the Vice President of Student Services will notify the student and Dean of Student Affairs of the committee's decision. The student may appeal the Code of Conduct Subcommittee's decision to the President of the College or his/her designee. This appeal must be made within five (5) weekdays of the student's receipt of the Code of Conduct Subcommittee's decision. The appeal process consists of the President of the College or his/her designee reviewing the written record submitted to date and does not involve an additional hearing. The President of the College or his/her designee will respond with his/her final decision to the appeal within ten (10) weekdays of receipt of the appeal.

Judicial Board

Cape Fear Community College supports students' constitutional right to due process. The Judicial Board is the vehicle to ensure the right of appeal.

The right of appeal is granted to any student who has a grievance concerning final grades, academic integrity (cheating/plagiarism), conduct suspension or expulsion, or feels he/she has been discriminated against or denied service on the basis of race, color, national origin, age, religion, disability or sex.

The Judicial Board will consist of seven (7) representatives from all areas of the College including faculty, staff, and administration. The Judicial Board's subcommittees will act on the following categories of student appeals. The Judicial Board will hear appeals concerning final grades, academic integrity, conduct suspension or expulsion, and charges of discrimination and/or denial of service on the basis of race, color, national origin, age, religion, handicap or sex. The subcommittee's areas of responsibility of the Judicial Board are listed below.

Academic Subcommittee of the Judicial Board

The Academic Subcommittee will hear appeals in the matter of academic integrity (cheating or plagiarism) and grade appeal (final grades). The subcommittee will consist of members selected from the Judicial Board membership and others as deemed necessary by the Dean of Student Affairs. The committee will consist of two (2) or more representatives from the Judicial Board and the Vice President of Academic Affairs will serve as chair.

Code of Conduct (Disciplinary and Sexual Misconduct) Subcommittee of the Judicial Board

The Code of Conduct Subcommittee will hear appeals concerning conduct from the college's Office of Student Affairs. The subcommittee will consist of members selected from the Judicial Board membership and others as deemed necessary by the Dean of Student Affairs. The committee will consist of two (2) or more representatives from the Judicial Board and the Vice President of Student Services will serve as chair.

Title IX & Sexual Misconduct

Non-Discrimination and Harassment Policy and Procedures

Cape Fear Community College, its faculty and staff, and the Board of Trustees are fully committed to the principles and practice of equal employment and educational opportunities. The College does not discriminate against applicants, students, or employees in any programs and activities provided on the basis of race, color, national origin, sex (including pregnancy and sexual orientation), gender (including gender identity and status as a transgender or transsexual individual), disability, religion, age, genetic

information, veteran status or any other protected status as required by Title IX of the Educational Amendments of 1972, Americans with Disabilities Act of 1990, Section 504 of the Rehabilitation Act of 1973, Title VII of the Civil Rights Act of 1964 and any other applicable statutes and CFCC policies.

This statement applies to all students and employees at Cape Fear Community College. The Dean of Student Affairs serves as CFCC's Title IX Coordinator and has primary responsibility for coordinating the College's efforts to comply with and carry out its responsibilities under Title IX, which prohibits sex discrimination in all the operations of the College, as well as any other protected status as delineated above and retaliation for the purpose of interfering with any right or privilege.

CFCC Board of Trustees, Approved, July 30, 2020

DEFINITIONS

The following definitions shall apply to this policy and shall be collectively referred to herein as "Discrimination". The definitions are not intended to operate as speech codes, promote content and viewpoint discrimination or suppress individual viewpoints in the academic setting. Indeed, just because a student's or employee's speech or expression is deemed offensive by others, it does not mean it constitutes discrimination or harassment. In applying these definitions, College administrators shall view the speech or expression in its context and totality.

Discrimination: any act or failure to act that unreasonably differentiates treatment of others based solely on their protected status and is sufficiently serious, based on the perspective of a reasonable person, to unreasonably interfere with or limit the ability of that individual to participate in, access or benefit from the College's programs and activities. Discrimination may be intentional or unintentional.

Harassment: a type of discrimination that happens when verbal, physical, electronic or other behavior based on a person's protected status interferes with a person's participation in the College's programs and activities and it either creates an environment that a reasonable person would find hostile, intimidated or abusive or where submitting to or rejecting the conduct is used as the basis for decisions that affect the person's participation in the College's programs and activities. Harassment may include, but is not limited to: threatening or intimidating conduct directed at another because of the individual's protected status; ethnic slurs, negative stereotypes and hostile acts based on an individual's protected status.

Protected Status: race, color, national origin, sex, religion, pregnancy, disability, genetic information, age, political affiliation or veterans' status.

Standard of Evidence: the College uses the "preponderance of evidence standard", or "more likely than not", as the standard for proof of whether a violation occurred. In the student due process hearing and employee grievance process, legal terms like "guilt, "innocence" and "burden of proof" are not applicable. Student and employee due process hearings are conducted to take into account the totality of all evidence available from all relevant sources. The College will find the alleged perpetrator, or respondent, either "responsible" or "not responsible" for violating College policies and procedures.

If the aforementioned conduct is viewed by a reasonable person and/or complainant to be so ***"severe, pervasive, and objectively offensive"*** that it effectively denies a person equal access to CFCC's educational programs or activities, it will then be determined by the Title IX Coordinator whether the behavior constitutes "Sexual Harassment". For formal complaints related to allegations of sexual harassment, including *quid pro quo*, sexual assault, dating violence, domestic violence, and/or stalking, please refer to **"CFCC's Sexual Harassment Policy and Procedures"**.

STATEMENTS OF PROHIBITION

Prohibition of Retaliation

The College strictly prohibits punishing students or employees for asserting their rights to be free from Discrimination. Retaliation against any person participating in connection with a complaint of Discrimination is strictly prohibited. Reports of retaliation will be addressed through this procedure and/or other applicable College procedures. Retaliation includes, but is not limited to, any form of intimidation, punitive actions from authority figures or peers, reprisal (acts of vengeance) or harassment. Retaliation is a serious violation and should be reported immediately. The College will take appropriate disciplinary action against any employee or student found to have retaliated against another.

Prohibition of Providing False Information

Any individual who knowingly files a false report or complaint, who knowingly provides false information to College officials, or who intentionally misleads College officials involved in the investigation or resolution of a complaint may be subject to disciplinary action including, but not limited to expulsion or employment termination. The College recognizes that an allegation made in good faith will not be considered false when the evidence does not confirm the allegation(s) of Discrimination.

REQUESTING ACCOMMODATIONS

Students and employees with disabilities wishing to make a request for reasonable accommodations, auxiliary communication aids or services, or materials in alternative accessible formats should contact Student Accessibility Services or Human Resources. Information provided by individuals is voluntary and strict confidentiality is maintained. All requests for accommodations will be considered following the appropriate state and federal laws. The College will also provide reasonable accommodation of an individual's religious beliefs/practices provided such expression/practice does not create a hostile environment for other students and employees and/or the accommodation does not cause an undue hardship for the College.

REPORTING OPTIONS

Any student wishing to make a report relating to discrimination may do so by reporting the concern to the Dean of Student Affairs. For discrimination incidents between students and employees, the Dean of Student Affairs will work in partnership with the Vice President of Human Resources, or designee, to investigate and resolve the allegations.

Any employee wishing to make a report relating to discrimination may do so by reporting the concern to CFCC Human Resources.

INITIAL INVESTIGATION

As these Procedures apply to both students and employees as either the Complainant or the Respondent, the administrator receiving the incident report will determine if the case should be handled by: 1) the Dean of Student Affairs, or designee (student/student); 2) the Vice President of Human Resources, or designee (employee/employee); or 3) both (student/employee). For incidents involving students and employees, the College will utilize due process and grievance procedures as applicable.

- Individuals ("Complainants") are urged to do so in writing as soon as possible, but no later than thirty (30) days after disclosure or discovery of the facts giving rise to the complaint. Complaints submitted after the thirty (30) day period will still be investigated, however, Complainants should recognize that delays in reporting may significantly impair the ability of College officials to investigate and respond to such complaints. As stated any complaint involving a student and employee, the Dean of Student Affairs will collaborate with the College's Vice President of Human Resources, or designee. During the course of the investigation, consultation may be required with other relevant College administrators and the College attorney, if appropriate.
- During the investigation, and if applicable to the complaint, the Dean of Student Affairs and/or the Vice President of Human Resources, shall meet with the Complainant and the alleged Respondent separately and give each party an equal opportunity to provide evidence, including potential witnesses. Both parties will be given access to any information provided by the other in accordance with any state or federal confidentiality laws.
- During the investigation process, the Dean of Student Affairs and/or the Vice President of Human Resources, may implement temporary measures in order to facilitate an efficient and

thorough investigation process as well as to protect the rights of all parties involved. The temporary actions or supportive measures include, but are not limited to: reassignment of class schedules or work assignments; temporary removal from campus; "no contact" agreements; if such action is the best interest of the College and parties involved.

- As appropriate, a confidential file regarding the complaint shall be maintained by the Dean of Student Affairs and/or the Vice President of Human Resources. To the extent possible, the College will keep all information relating to the complaint and investigations confidential; however, to maintain compliance with the Clery Act, both parties will be informed of the outcome of any institutional proceedings under these procedures.
- The Dean of Student Affairs and/or the Vice President of Human Resources shall make every effort to conclude the investigation as soon as possible, but no later than thirty (30) calendar days. If the nature of the investigation requires additional time, all parties involved will be notified of this extension.
- Complainants will be notified of available counseling services and other interim supportive or protective as needed.

RECOMMENDATION AND APPEAL

After the investigation is complete, the Dean of Student Affairs and/or the Vice President of Human Resources, will put forward a recommendation of finding, based on the standard of evidence, and sanction(s) to both the Complainant and Respondent. If the recommendation is accepted by both parties involved, the recommendation and sanction(s) will become effective. The Dean of Student Affairs and/or the Vice President of Human Resources will submit to each party a final outcome letter that will include, but not limited to, the following:

- Determination if the respondent is responsible, or not responsible, for violating these Policies and Procedures;
- Sanction(s) if appropriate;
- Monitoring of academic or work schedules if needed between the involved;
- Short-term College counseling services available to each party.

If the Dean of Student Affairs and/or the Vice President of Human Resources recommendations are not accepted by either the Complainant or the Respondent, both may appeal and request a formal hearing. If the Dean of Student Affairs and/or the Vice President of Human Resources recommends sanctions that s/he cannot impose (i.e., suspension, expulsion/termination), the matter shall automatically be set for a hearing. The Complainant and the Respondent are allowed to be accompanied by an advocate. The advocate may not present on behalf of either party unless otherwise instructed to do so by the hearing officer. If the Complainant or the Respondent chooses to have an advocate who is an attorney, notification must be provided to the hearing officer at least three (3) College business days prior to the hearing date. In this case, the College Attorney will also be present.

SANCTIONS

The following sanctions may be imposed for those who have violated these Policy and Procedures herein.

For Students:

Conduct Warning (verbal or written);

Conduct Probation;

Administrative Withdrawal / Interim Conduct Suspension;

Required Counseling;

"No Contact Agreement";

Conduct Suspension;

Expulsion;

Other consequences as deemed appropriate.

For Employees:

Verbal or Written Warning;

Performance Improvement Plan;

Required Counseling;

Required Training or Education;

Demotion;

Interim Suspension;

Suspension, with or without pay;

Termination;

Other consequences as deemed appropriate.

Any student complaint or inquiries concerning discrimination or harassment may be reported to the Dean of Student Affairs. For more information, please refer to the CFCC Catalog & Student Handbook, *Student Policies*.

Any employee complaint or inquiries concerning discrimination or harassment may be reported to CFCC Human Resources. For more information, please refer to the CFCC Faculty and Staff Handbook, *5.11, Disciplinary and Grievance Policies and Procedures*.

TITLE IX SEXUAL HARASSMENT POLICY & PROCEDURES

Cape Fear Community College (CFCC) is committed to providing a safe learning and working environment that promotes respect, responsibility, and accountability that is free of sexual misconduct, including discrimination, harassment, and/or sexual harassment. All forms violate an individual's fundamental right to CFCC's educational programs and activities.

In compliance with, and as required by Title IX of the Education Amendments Act of 1972: "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance."

Title IX is a comprehensive federal law that prohibits discrimination on the basis of sex in any federally funded education program or activity. Under Title IX, "sexual harassment" includes *quid pro quo* harassment; sexual assault, dating or domestic violence; and stalking (collectively referred to as "sexual harassment"). If the unwelcome conduct is viewed by a reasonable person and/or complainant to be so "severe, pervasive, and objectively offensive" that it effectively denies a person equal access to CFCC's educational programs or activities, then it will be determined by the Title IX Coordinator whether the behavior constitutes as "Sexual Harassment" under CFCC's Sexual Harassment Policy and Procedures. The College's Title IX Coordinator has oversight responsibility for handling sexual harassment complaints and for identifying and addressing any patterns and/or systemic problems involving sexual discrimination or harassment.

CFCC considers discrimination and sexual harassment in all its forms to be a serious offense (Title 20 U.S.C. Sections 1681-1688). CFCC has a responsibility to ensure compliance by demonstrating that our educational programs and other activities are operated in a manner consistent with Title IX mandates, regulations and provisions. In response, Cape Fear Community College offers training on awareness and prevention efforts on an annual basis to its student body, and employees alike, to ensure proper guidance and ultimately to provide a safe and healthy learning and working environment.

All allegations involving sexual harassment should be directed to the College's Title IX Coordinator and addressed under these procedures. For complaints related to allegations of discrimination and harassment, not related to sexual harassment, please refer to CFCC's **Non-Discrimination and Harassment Policy and Procedures**.

The Dean of Student Affairs at CFCC serves as the College's Title IX Coordinator and has primary responsibility for coordinating the College's efforts to comply with and carry out its responsibilities under Title IX. CFCC's Title IX Coordinator is Robert McGee, whose office is located at the Wilmington Campus, Union Station Building, Room U-146. This office can be contacted by phone at 910-362-7191, or by email, at rmcgee@cfcc.edu.

For more information about CFCC's Title IX Policy and/or Procedures, please go to the CFCC website.

Grievance Procedures

If you believe that you have a legitimate grievance against another CFCC student or college employee, in a matter other than those covered by the aforementioned, or those outside the jurisdiction of the CFCC Code of Conduct, you may seek a resolution of that grievance through an informal written complaint to the Dean of Student Affairs. If your grievance cannot be resolved at an informal level, you may file a formal complaint with the Vice President of Student Services and Enrollment Management to initiate a hearing with the Judicial Board to seek additional understanding and/or resolution.

Student Complaint Procedures

As a matter of practice, CFCC subscribes to the philosophy that student complaints are best resolved on an informal basis. When a student has a complaint he/she should attempt to resolve concerns with college personnel having responsibilities directly at the source of the complaint. When informal procedures do not resolve concerns, written student complaints should be sent to the Dean of Student Affairs who will determine the appropriate college personnel to review the complaint. The student should receive written acknowledgment of receipt of the complaint from the Dean of Student Affairs or designee within 24 hours.

The complaint will be reviewed and a collaborative effort will be made to resolve the complaint within twenty (20) working days of receipt of the complaint. The student will receive notification of the resolution of the complaint, or of the College's position on the complaint.

Public Complaint Procedures

Members of the public may also file a complaint by forwarding a written statement, signed by the complainant, to the Office of the President, Cape Fear Community College, 411 N. Front Street, Wilmington, North Carolina. CFCC will not entertain complaints that are not in writing or which are anonymous, nor will it consider complaints sent electronically or through facsimile transmission. The President, or the President's designee, may require further information from the complainant and may seek information from appropriate college offices, as needed, to respond to the complaint.

Cape Fear Community College has an online incident reporting system where students, employees, and/or visitors of the College may file a grievance, complaint, report concerns such as code of conduct violations, Title IX or sexual misconduct, concerning or threatening behavior, etc. This incident report can be located through the Office of Student Affairs webpage.

Graduation

Requirements for Graduation

To receive an Associate Degree, Diploma, or Certificate, a student must maintain satisfactory grades in all laboratory and class subjects and a cumulative grade point average of at least 2.0. Students must earn a minimum of 25 percent of credit hour requirements at Cape Fear Community College. Credit for Prior learning credit cannot count towards the 25% requirement.

Intent to Graduate

Candidates for graduation must file an Intent to Graduate online for Degrees, Diplomas, and Certificates. At that time, candidates will also complete the Graduating Student Opinion Survey. Deadlines to file the Intent to Graduate are:

Academic Year 2023-2024

- Fall - Friday, November 3, 2023
- Spring - Friday, February 9, 2024
- Summer - Friday, June 7, 2024

Upon completion of program requirements, the College may award the credential without student request.

Commencement exercises are held following the spring semester (May) and at the end of the summer session (August).

Students who graduate in December are invited to participate in the May commencement exercises.

Upon graduation, a student's Program of Study will end. Therefore, students must contact Academic Advising to declare a new Program of Study if they plan to continue enrollment at CFCC.

Graduation Honors

President's Award

Graduating students who have achieved an "A" average, defined as a cumulative grade point average of 4.0, by the end of the term preceding graduation are recognized each year at commencement exercises for academic excellence. Courses numbered below the 100 level are not used to determine Graduation Honors.

Departmental Honors

Students who have demonstrated outstanding leadership, attitude and ability will be awarded Departmental Honors. Recipients for these awards are selected by lead instructors in cooperation with appropriate faculty.

Graduation Needs

Orders for caps and gowns will be accepted by a company representative or the bookstore during announced dates. Students who anticipate participating in spring or summer graduation ceremonies will be provided a limited number of commencement tickets. The number of tickets distributed to each graduate is determined by how many graduates plan to walk in the ceremony. Other graduation items may be purchased from the company vendor or the college bookstore. Students completing graduation requirements at the close of the fall academic session will be invited to participate in the May ceremony.

Academic Honors

Academic Honors are calculated at the end of each term in which a student is enrolled and become part of the student's permanent academic record. Courses numbered below the 100 level or that are considered developmental are not used to determine Academic Honors.

President's List

Students who complete 12 or more credit hours during fall and spring semesters and 9 or more credit hours in the summer semester who have earned a grade point average of 4.00 will be placed on the President's List.

Dean's List

Students who complete 12 or more credit hours during fall and spring semesters and 9 or more credit hours in the summer semester who have earned a grade point average of 3.50 with no grade lower than a "C" will be placed on the Dean's List.

Honors List

Students who complete at least 4 credit hours and earned a grade point average of 3.50 with no grade lower than a "C" will be placed on the Honors List. For the fall and spring semesters this would be 4 to 11 completed credits and for summer this would be 4 to 8 completed credits.

Campus Health & Safety

Health Services	Weapons on Campus
Crime Awareness & Campus Safety Policies	Communicable Disease Policy

Jeanne Clery Act	Evacuation of Buildings & Emergency Evacuation
Behavioral Intervention Team	Lost and Found

Health Services

Cape Fear Community College does not maintain health facilities or medical services. The responsibility for medical services rests with the student. In the case of illness or injury on campus, Emergency Medical Services may be called to assist individuals.

First aid kits are available in labs and the Student Services and Enrollment Management office.

Crime Awareness & Campus Safety Policies

I. Intro

The goal of Cape Fear Community College is to provide students, faculty, staff, and visitors with a safe educational environment. The Campus Safety Office is comprised of both sworn Law Enforcement and non-sworn Campus Security Officers, as well as, Parking Enforcement. CFCC works in conjunction with New Hanover County Sheriff's Office, Pender County Sheriff's Office, Burgaw Police Department, and Surf City Police Department, along with Allied Universal Security Services to patrol and protect our students, employees, guests, facilities, and properties.

II. College Safety

Law Enforcement

Sworn Deputies/Officers are armed and identified by their uniforms, shoulder patch, and badge. They have full authority on College property under the provisions of Chapter 17C of the General Statutes of the State of North Carolina. Law enforcement commissions are granted under that statute by the Attorney General of North Carolina. Deputies/Officers possess all the powers to make arrests for both felonies and misdemeanors, as well as, charge for infractions within the agency's jurisdiction.

Security

Non-sworn Campus Security Officers are unarmed and identified by the yellow or blue and black uniforms with a distinctive white and blue shoulder patch and security badge. They perform tasks such as providing escorts to/from class and/or vehicles, notifying law enforcement of suspicious individuals or activities, etc. Security Officers do not have the power of arrest. An arrest (if necessary) will be referred to law enforcement.

Parking Enforcement

Parking Enforcement Officers are unarmed and are identified by the white and black uniforms with a

distinctive shoulder patch and badge. They assist with parking management and enforcement throughout campus, including ticketing, booting, towing, and other parking-specific violations.

III. Reporting and Notifications

Students who are victim, or witness, to a criminal incident, or are aware of a potential threat on campus have the responsibility to report it immediately to law enforcement. Reporting a crime helps law enforcement agencies find and arrest a suspect, track criminal activity, recover stolen property, and identify trends in various areas of the college and surrounding community to ensure a safe learning and working environment.

Methods

If you are, or feel like you're in immediate danger, call 911. For any non-emergent situation, reporting, questions, or to request Security assistance, call 910-362-7855, Downtown Campus; 910-362-7580, North Campus; 910-800-1666, Burgaw Center; or 910-362-7931, Alston W. Burke Center.

Emergency "Blue Light" Telephones: Emergency phones are installed throughout CFCC campuses/centers, particularly in parking lots/decks and the more remote/secluded areas. Pressing the call button on this box will connect you immediately to the 911 Dispatch Center, which then notifies local law enforcement of an emergency.

Cape Fear Community College has an online incident reporting system where students may report concerns such as code of conduct violations, Title IX or sexual misconduct, concerning or threatening behavior, etc. This incident report is located on the Office of Student Affairs webpage.

In addition, on CFCC's Campus Safety website, students may utilize the link to "Submit a Crime Tip." This system directly links to the New Hanover County Sheriff's Office.

Notification Systems

Cape Fear Community College has an Emergency Notification System intended to rapidly disseminate emergency information about an incident or emerging situation in addition to providing instructions to Students, Faculty, and Staff. In the event that a situation arises, either on or off campus, that, in the judgment of the President, his/her senior administrative staff, or the Director, Safety and Training is a potential threat, a campus-wide "timely warning" will be issued. The warning will be issued through the most effective and efficient means available and may include text messages, emails, voicemails, and/or social media.

Campus Sex Crimes Prevention Act

Persons who have been convicted of an offense against a minor, or a sexually violent offense, are required by law to register with the Sheriff's Department in the county and/or state where they reside. The law also requires that registered sex offenders must provide notice to an institution of higher education (post-secondary) that they have intentions to enroll as a student, if conditions allow. Registered sex offenders who are attending in person, or located on college-owned property and/or premises, without prior notification, and/or situational approval, will be in violation of NC G.S.14-208.18 and may be criminally charged.

The Campus Sex Crimes Prevention Act enacted on October 28, 2000, is a federal law that requires all colleges to issue a statement advising the campus community where information on registered sex offenders who are enrolled, employed, or volunteering at Cape Fear Community College can be obtained.

Notifications of registered sex offenders are public knowledge and may be found at the following sites:

North Carolina Sex Offender and Public Protection Registry
U.S. Department of Justice, National Sex Offender Public Website

Protect Yourself

Students and employees can do much to protect themselves from crime. Many crimes occur only because there was an opportunity for them to happen. For example, most crimes of theft are random, not calculated. They occur because personal property is left unattended. Locking doors and windows, securing valuables in your car trunk are methods of reducing temptation and opportunity which can result in a thwarted burglary or theft. Personal protection is also important. When walking, plan the safest and most well-lit route. Be aware of your surroundings including persons, places, and things. Remember, you can take steps to protect yourself from being the victim of a crime, educate yourself, protect yourself, and report all criminal activity or suspected criminal activity to local law enforcement agencies.

The Jeanne Clery Act

Cape Fear Community College seeks to protect the college learning environment and provide a safe campus for all students, faculty, staff, and visitors while on college premises. CFCC complies with the Jeanne Clery Act that requires all colleges and universities who receive federal funding to share information publicly about crime on campus and their efforts to improve campus safety. Disclosure of the CFCC campus crime statistics (Clery Report) may be found at the following website for review: U.S. Department of Education Campus Safety and Security Website.

Behavioral Intervention Team (BIT)

Cape Fear Community College is committed to providing the best possible and working environment that is free of discrimination, harassment and/or sexual violence. By establishing a Behavioral Intervention Team (BIT) at CFCC, formal lines of communication will be clear and efforts will be strengthened during heightened security threats at all college campuses and sites. The BIT will provide a college-wide, integrated approach to addressing extraordinary discipline and/or safety issues on campus. The ongoing development and coordination of a team of CFCC administrators to address crisis intervention situations will ultimately reinforce the college's overall safety and security infrastructure.

Weapons on Campus

As stated in the North Carolina General Statute, G.S.14-269.2, it is unlawful for any person to possess or carry, openly or concealed, any weapon on campus, or any CFCC educational property. This includes any person knowingly to possess or carry, whether openly or concealed, any gun, rifle, pistol, or other weapon of any kind on educational property or to a curricular or extracurricular activity sponsored by the College. Unauthorized weapons include, but are not limited to, bomb, grenade, mine, fireworks, or any explosive; any gun, rifle, air pistol/rifle, BB gun, stun gun, taser; bowie knife, dirk, dagger, switchblade knife; slingshot, leaded cane, blackjack, metallic knuckles, razors, and razor blades, any sharp-pointed or edged instrument, or any other weapon of like kind. Exceptions may include instructional supplies; unaltered nail file or clips; ordinary pocket knife (closed position /carried in pocket or purse); tools used solely for preparation of food, instruction, and maintenance on the educational property.

The possession of a handgun by a person who has a concealed handgun permit valid under Chapter 14 Article 54B of the N.C.G.S., or is exempt from obtaining a permit according to that Article, as long as the handgun remains and is properly contained in the person's locked vehicle or in a locked container securely affixed to the person's vehicle. Authorized possession includes unlocking, entering and exiting the vehicle as necessary to properly contain the handgun for storage, conceal the handgun on the person or allow a passenger to enter the vehicle, as more specifically provided in N.C.G.S. 14-269.2(k).

Authorized possession may only include persons in law enforcement, those in legislative, executive and judicial branches of the government, as permitted by North Carolina General Statute, G.S. 14-269 and 14-269.2.

Individuals in violation of this College policy may be subject to criminal prosecution and/or disciplinary action. Students may be subject to disciplinary action up to and including suspension or expulsion and employees may be subject to disciplinary action up to termination. Guests, visitors, and/or contractors found in violation of this policy may be permanently trespassed, or prohibited from returning to campus.

If you have any questions please refer to the North Carolina General Statute, G.S.14-269.2. Inquiries regarding the Weapons on Campus policy should be directed to CFCC Campus Safety.

Communicable Disease Policy

As required by the State Board of Community Colleges, 1C SBCCC 200.94, CFCC is committed to providing a safe and healthy learning environment. The purpose of this policy is to prevent and protect all students, faculty, staff and visitors from the spread of a communicable disease, while also prohibiting discrimination against persons with a reportable communicable disease.

A communicable disease is any condition that may be transmitted directly, or indirectly, to a person from an infected person whether via airborne or by physical contact. As defined, a communicable disease is an illness due to a specific infectious agent or its toxic products that arises through transmission of that agent or its products from an infected person, animal or reservoir, to a susceptible host, through an intermediate plant or animal host, vector, or the inanimate environment (Dictionary of Epidemiology, 2001). By definition and determination by the Centers for Disease Control and Prevention, and the NC Department of Health and Human Services - Epidemiology (NCDHSS), any

reportable communicable disease or condition must be evaluated and assessed by a medical physician to protect the health and safety of the College.

Students who suspect, or have reason to believe, that they have a communicable disease are expected to seek expert medical advice about their health circumstances and are obligated, legally and ethically, to conduct themselves responsibly for the protection of themselves and others. Students who know that they are infected with a communicable disease are encouraged to contact the Dean of Student Affairs, so that the College can assist in the appropriate response to their health and/or educational needs and can make any reasonable accommodations, if necessary. As a general rule, individuals that have been diagnosed with a reportable communicable disease and have been cleared by a physician, and provide appropriate documentation, will be permitted to attend classes, access facilities, services, programs or activities provided by the College. Additionally, all inquiries will be handled on a case-by-case basis to ensure the appropriate measures have been executed.

Students of the College who may be infected with a reportable communicable disease, as defined by the NCDHHS, shall not be excluded from enrollment or restricted in their access to College facilities, services, programs, or activities, unless it has been determined by a healthcare professional and/or the NCDHHS that exclusion or restriction is reasonably necessary because the infected individual poses a significant risk of substantial harm to the health or safety of him/herself or others at the College that cannot be eliminated or reduced through other reasonable accommodations.

Specific health conditions and medical information will remain confidential, unless authorized by the individual in writing to be released, except when appropriate health care providers and/or College officials on a need to know basis and required by local, state and federal law to prevent and/or protect the surrounding community.

Please refer to the Excused Absences due to Public Health Emergencies policy in the student handbook for further guidance regarding these procedures.

Use of Personal Protective Equipment

Cape Fear Community College is committed to the safety of our students, faculty and staff. Accordingly, the use of personal protective equipment (PPE) may be required for students and visitors to campus in certain areas or within classroom or laboratory spaces as directed by instructors and/or external requirements such as those set by the American National Standards Institute (ANSI), the Occupational Safety and Health Administration (OSHA), and/or the Centers for Disease Control (CDC). Notification will be provided on our website and other media when PPE is required in CFCC buildings and public spaces due to a public health emergency. PPE requirements for specific classes and instructional spaces will be listed on class syllabi.

Evacuation of Buildings & Emergency Evacuation

Evacuation of Buildings

An evacuation diagram is located on each floor and in each room of every building. The primary route for evacuating a building is indicated by a solid red line. If, for any reason, the primary route is blocked, use the secondary escape route indicated by a broken red line on the diagram. All occupants will follow this procedure unless otherwise directed by law enforcement or security officials. Those persons needing assistance should wait in the designated Areas of Rescue for help.

Emergency Evacuation

Everyone must exit the building when the fire alarm sounds. IT IS NOT AN OPTION TO REMAIN IN THE BUILDING. Treat all alarms as the real thing. Students should take all personal belongings with them when evacuating the building.

Lost and Found

The Campus Safety Office will accept articles found on campus. If contact information is available, the owners will be notified. Inquiries about lost or misplaced articles may be made by calling Campus Security at (910) 362-7855. Anyone claiming property must be prepared to present proper identification and sign for returned items. Articles will be held for thirty days and then donated to charitable organizations and/or departments within CFCC.

Academic Calendar 2023-2024 (Print)

Fall Semester 2023

Advising Begins for All Students (for Summer 2023 and Fall 2023)	Mon, March 20, 2023
Priority Registration Begins for Currently Enrolled Students (for Summer 2023 and Fall 2023, date/time assigned according to completed credits)	Mon, April 10, 2023
Registration Open for All Students (for Summer 2023 and Fall 2023 - Current, New and Returning)	Mon, April 17, 2023
Faculty Return	Tues, Aug 15, 2023
In-Service for Faculty and Staff	Wed, Aug 16, 2023

Programs of Study (A-Z)

Accounting Analytics Certificate (C25800B)

The Accounting Analytics certificate program is designed to provide a basic understanding of financial accounting and select software tools used in the analysis of data as it pertains to accounting professionals. The focuses include analytic techniques for decision making and the examination of "data" involving accounting information.

Required Courses (18 credits)

- ACC 120 - Prin of Financial Accounting **Credits: 4**
- ACC 122 - Prin of Financial Acct II **Credits: 3**
- ACC 150 - Accounting Software Appl **Credits: 2**
- BAS 120 - Intro to Analytics **Credits: 3**
- BAS 121 - Data Visualization **Credits: 3**

BUS 110 - Introduction to Business **Credits: 3**

Total Credits: 18

Recommended Course Sequence

Fall Semester I

ACC 120 - Prin of Financial Accounting **Credits: 4**

BAS 120 - Intro to Analytics **Credits: 3**

BUS 110 - Introduction to Business **Credits: 3**

Spring Semester I

ACC 122 - Prin of Financial Acct II **Credits: 3**

ACC 150 - Accounting Software Appl **Credits: 2**

Accounting Fraud Analytics (Cert) C25800A

This certificate provides exposure to the investigative techniques used by accountants to conduct forensic examinations as well as the common schemes and techniques used to commit fraud. The skills acquired will enable students to assist businesses in detecting, investigating, documenting, and preventing fraud.

Graduates should be able to understand both the pervasiveness and the causes of fraud and white-collar crime in our society, examine the types of fraud and fraud schemes that affect business enterprises, explore methods of fraud detection and prevention, and increase their ability to recognize potential fraudulent situations.

The certificate helps to prepare students determine the probability and/or extent of the occurrence of fraud. By analyzing definite financial and non-financial information, checking public records, and administering fact-finding and admission-seeking questioning and evaluation, suspicions or accusations will be resolved and refuted.

Major Requirements

ARC 114 - Architectural CAD **Credits: 2**

Other Major Requirements

ARC 114A - Architectural CAD Lab **Credits: 1**

ARC 220 - Adv Architect CAD **Credits: 2**

ARC 225A - Architectural BIM I Lab **Credits: 1**

ARC 225 - Architectural BIM I **Credits: 2**

Total Credits: 15

Recommended Course Sequence

Fall Semester I

ARC 111 - Intro to Arch Technology **Credits: 3**

ARC 114 - Architectural CAD **Credits: 2**

ARC 114A - Architectural CAD Lab **Credits: 1**

Spring Semester I

ARC 112 - Constr Matls & Methods **Credits: 4**

ARC 220 - Adv Architect CAD **Credits: 2**

ARC 225 - Architectural BIM I **Credits: 2**

ARC 225A - Architectural BIM I Lab **Credits: 1**

Architectural Technology CTE Pathway (C40100CP)

A program that prepares individuals to assist architects, engineers, and construction professionals in developing plans and related documentation for residential and commercial projects in both the private and public sectors. Includes instruction in architectural drafting, computer-assisted drafting, construction materials and methods, environmental systems, codes and standards, structural principles, cost estimation, planning, graphics, and presentation.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Technical Core (4 credits)

ARC 112 - Constr Matls & Methods **Credits: 4**

Concentration Requirements (5 credits)

ARC 111 - Intro to Arch Technology **Credits: 3**

ARC 114 - Architectural CAD **Credits: 2**

Other Major Requirements (6 credits)

ARC 225 - Architectural BIM I **Credits: 2**
ARC 225A - Architectural BIM I Lab **Credits: 1**
ARC 114A - Architectural CAD Lab **Credits: 1**
ARC 220 - Adv Architect CAD **Credits: 2**

Total Credits: 15

Architectural Technology, A.A.S. (A40100)

The Architectural Technology curriculum prepares individuals with knowledge and skills that can lead to employment in the field of architecture or one of the associated professions.

Students receive instruction in construction document preparation, materials and methods, environmental and structural systems, building codes and specifications, and computer applications as well as completing a design project. Optional courses may be provided to suit specific career needs.

Upon completion, graduates have career opportunities within the architectural, engineering, and construction professions as well as positions in industry and government. A strong emphasis on sustainable design and construction techniques is included.

General Education Requirements (15 credits)

Humanities/Fine Arts Electives

(Take 3 credits)

ART 111 - Art Appreciation **Credits: 3**

Social/Behavioral Science Electives

(Take 3 credits)

ANT 210 - General Anthropology **Credits: 3**

HIS 132 - American History II **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

English Requirement

ENG 111 - Writing and Inquiry **Credits: 3**

Communications Requirement

(Take 3 credits)

COM 110 - Introduction to Communication **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

Math Requirement

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Major Requirements (29 credits)

Technical Core

ARC 112 - Constr Matls & Methods **Credits: 4**

ARC 132 - Specifications & Contracts **Credits: 2**

CST 241 - Planning/Estimating I **Credits: 3**

SST 140 - Green Bldg & Design Concepts **Credits: 3**

Architectural Technology

ARC 111 - Intro to Arch Technology **Credits: 3**

ARC 113 - Residential Arch Tech **Credits: 3**

ARC 211 - Light Constr Technology **Credits: 3**

ARC 213 - Design Project **Credits: 4**

ARC 230 - Environmental Systems **Credits: 4**

Other Major Requirements (18 credits)

(Take 18 credits)

ARC 114 - Architectural CAD **Credits: 2**

ARC 114A - Architectural CAD Lab **Credits: 1**

ARC 220 - Adv Architect CAD **Credits: 2**

ARC 225 - Architectural BIM I **Credits: 2**

ARC 225A - Architectural BIM I Lab **Credits: 1**

ARC 231 - Arch Presentations **Credits: 4**

ARC 235 - Architectural Portfolio **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

ARC 226 - Architectural BIM II **Credits: 2**

ARC 226A - Architectural BIM II Lab **Credits: 1**

Total Credits: 65

Fall Semester I

ARC 111 - Intro to Arch Technology **Credits: 3**
ARC 114 - Architectural CAD **Credits: 2**
ARC 114A - Architectural CAD Lab **Credits: 1**
CIS 110 - Introduction to Computers **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**

Spring Semester I

ARC 112 - Constr Matls & Methods **Credits: 4**
ARC 220 - Adv Architect CAD **Credits: 2**
ARC 225 - Architectural BIM I **Credits: 2**
ARC 225A - Architectural BIM I Lab **Credits: 1**
MAT 121 - Algebra/Trigonometry I **Credits: 3**

Summer Semester I

ARC 230 - Environmental Systems **Credits: 4**
ARC 231 - Arch Presentations **Credits: 4**
Communications Requirement **Credits: 3**

Fall Semester II

ARC 113 - Residential Arch Tech **Credits: 3**
ARC 132 - Specifications & Contracts **Credits: 2**
ARC 211 - Light Constr Technology **Credits: 3**
ARC 226 - Architectural BIM II **Credits: 2**
ARC 226A - Architectural BIM II Lab **Credits: 1**
ART 111 - Art Appreciation **Credits: 3**

Spring Semester II

ARC 213 - Design Project **Credits: 4**
ARC 235 - Architectural Portfolio **Credits: 3**
CST 241 - Planning/Estimating I **Credits: 3**
Social Behavioral Science Elective **Credits: 3**
SST 140 - Green Bldg & Design Concepts **Credits: 3**

Associate in Arts (A10100)

As a result of a legislative mandate from the NC General Assembly, fall of 1997, the 58 North Carolina community colleges and the 16 institutions in the University of North Carolina (UNC) System entered into an agreement called the statewide Comprehensive Articulation Agreement, better known as the CAA. This agreement has been updated, and the revisions were implemented in the fall of 2014. This agreement includes two degrees—the Associate in Arts and the Associate in Science—and enables North Carolina community college graduates to receive junior status if the graduates meet certain criteria. Students are encouraged to complete their degree before they transfer. Admission to a UNC institution is a competitive process.

The Associate in Arts degree requires 60-61 credit hours. It allows students to take the first two years of their baccalaureate degree at CFCC and enables them to transfer to one of the 16 institutions in the UNC System with junior status. To graduate from CFCC under this agreement, students must meet all prerequisite and corequisite requirements, successfully complete all the required CAA courses with a grade of "C" or better, and earn at least a 2.0 overall grade-point average. (Note: To enroll at a senior institution, students must meet the grade-point average requirement of the receiving institution, which may be higher than a 2.0. While CFCC will accept a grade of "C-" from another institution, students should be aware that some UNC institutions will not accept this grade.)

It is the responsibility of the student to meet all graduation requirements.

Students are advised to take ACA 122 - College Transfer Success in their first or second semester and create a suitable plan of study.

Students must meet the receiving institution's foreign language and/or health and physical education course, if applicable, prior to or after transfer to the senior institution.

Website that houses the four-year baccalaureate plans at the 16 institutions in the University of North Carolina System: <http://cfcc.edu/transfer/curriculum-pathways/>.

The Associate in Arts program requirements are outlined as follows:

Universal General Education Transfer Component (32- 33 semester-hour credits)—These courses are sometimes referred to as the UGETC courses and are supposed to transfer for equivalency credit at the 16 University of North Carolina institutions.

Additional General Education Courses (14 semester-hour credits)—These may be additional general education courses that CFCC has selected for its students and/ or additional general education courses that a senior institution has recommended or required for an intended major.

Other Requirements (14 semester-hour credits)—A few electives are mandated by CFCC. Students should select the remaining electives based on the intended major of the senior institution.

Universal General Education Transfer Component (Credits: 32-33)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

UGETC Humanities/Fine Arts

COM/HUM/FA

Choose three of the following courses from two different disciplines. Take 9 credits:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

ENG 232 - American Literature II **Credits: 3**

ENG 241 - British Literature I **Credits: 3**

ENG 242 - British Literature II **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

MUS 112 - Introduction to Jazz **Credits: 3**

PHI 215 - Philosophical Issues **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

UGETC Social/Behavioral Sciences

Choose three courses:

Choose three of the following courses from at least two different disciplines. Take 9 credits:

ECO 251 - Prin of Microeconomics **Credits: 3**

ECO 252 - Prin of Macroeconomics **Credits: 3**

HIS 111 - World Civilizations I **Credits: 3**

HIS 112 - World Civilizations II **Credits: 3**

HIS 131 - American History I **Credits: 3**

HIS 132 - American History II **Credits: 3**

POL 120 - American Government **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

UGETC Mathematics

Take 3-4 credits:

MAT 143 - Quantitative Literacy **Credits: 3**

MAT 152 - Statistical Methods I **Credits: 4**

MAT 171 - Precalculus Algebra **Credits: 4**

UGETC Natural Sciences

Take 4 credits (Reminder: AST 111 and PHY 110 have mandatory labs.):

AST 111 - Descriptive Astronomy **Credits: 3**

AST 111A - Descriptive Astronomy Lab **Credits: 1**

AST 151 - General Astronomy I **Credits: 3**

AST 151A - General Astronomy I Lab **Credits: 1**

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

CHM 151 - General Chemistry I **Credits: 4**

GEL 111 - Geology **Credits: 4**

PHY 110 - Conceptual Physics **Credits: 3**

PHY 110A - Conceptual Physics Lab **Credits: 1**

Additional General Education Courses (Credits: 14)

General Education Courses

Take 14 credits:

ANT 210 - General Anthropology **Credits: 3**

ANT 220 - Cultural Anthropology **Credits: 3**

ANT 221 - Comparative Cultures **Credits: 3**

ANT 230 - Physical Anthropology **Credits: 3**

ANT 230A - Physical Anthropology Lab **Credits: 1**

Total Requirement in Semester Hours: 61

Associate in Arts Elementary Education (A10100EE)

This program is specifically designed for students desiring to transfer into UNCW's Watson College of Education under the SEAPath agreement. Students who are undecided on their four-year institution should speak to their advisor about equivalent program options to pursue a degree in education.

Universal General Education Transfer Component (Credits: 32)

English Composition

Take 6 credits:

ENG 112 - Writing/Research in the Disc **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**

Humanities/Fine Arts

Select one course from each group below. Take 9 credits:

Group I

Choose one course.

COM 231 - Public Speaking **Credits: 3**

Group II

Choose one course.

PHI 215 - Philosophical Issues **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Group III

Choose one course.

ENG 231 - American Literature I **Credits: 3**

Social/Behavioral Sciences

Select one course from each group below. Take 9 credits:

Group I

Choose one course.

HIS 111 - World Civilizations I **Credits: 3**

HIS 112 - World Civilizations II **Credits: 3**

Group II

Choose one course.

HIS 131 - American History I **Credits: 3**

HIS 132 - American History II **Credits: 3**

Group III

Choose one course.

PSY 150 - General Psychology **Credits: 3**

Mathematics

Take 4 credits:

MAT 171 - Precalculus Algebra **Credits: 4**

Natural Sciences

Select one course below. Take 4 credits:

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

Additional General Education Courses (Credits: 16)

Critical Thinking

Take two courses. Take 7 credits:

PSY 263 - Educational Psychology **Credits: 3**

Choose a second science from the following 4:

CHM 151 - General Chemistry I **Credits: 4**

GEL 111 - Geology **Credits: 4**

PHY 110 - Conceptual Physics **Credits: 3**

PHY 110A - Conceptual Physics Lab **Credits: 1**

Global Awareness/Foreign Language

Take 9 credits:

ASL 111 - Elementary ASL I **Credits: 3**

ASL 112 - Elementary ASL II **Credits: 3**

ASL 211 - Intermediate ASL I **Credits: 3**

SPA 111 - Elementary Spanish I **Credits: 3**

SPA 112 - Elementary Spanish II **Credits: 3**

SPA 211 - Intermediate Spanish I **Credits: 3**

SPA 212 - Intermediate Spanish II **Credits: 3**

Other Required Hours

Required Course: Academic Transition

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Other Required Hours

Take 11 credits:

ASL 181 - ASL Lab 1 **Credits: 1**
ASL 182 - ASL Lab 2 **Credits: 1**
SOC 210 - Introduction to Sociology **Credits: 3**
MAT 141 - Mathematical Concepts I **Credits: 3**
EDU 216 - Foundations of Education **Credits: 3**

Total Credits: 60

Fall Semester I

ACA 122 - College Transfer Success **Credits: 1**
COM 231 - Public Speaking **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**
MAT 171 - Precalculus Algebra **Credits: 4**
SPA 111 - Elementary Spanish I **Credits: 3**
SPA 181 - Spanish Lab 1 **Credits: 1**
OR
ASL 111 - Elementary ASL I **Credits: 3**
ASL 181 - ASL Lab 1 **Credits: 1**

15 Credits

Spring Semester I

ENG 112 - Writing/Research in the Disc **Credits: 3**

BIO 110 - Principles of Biology **Credits: 4**
OR
BIO 111 - General Biology I **Credits: 4**

HIS 131 - American History I **Credits: 3**

HIS 132 - American History II **Credits: 3**

SPA 112 - Elementary Spanish II **Credits: 3**
SPA 182 - Spanish Lab 2 **Credits: 1**

OR

ASL 112 - Elementary ASL II **Credits: 3**

ASL 182 - ASL Lab 2 **Credits: 1**

14 Credits

Summer Semester I

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

6 Credits

Fall Semester II

EDU 216 - Foundations of Education **Credits: 3**

PSY 263 - Educational Psychology **Credits: 3**

HIS 111 - World Civilizations I **Credits: 3**

OR

HIS 112 - World Civilizations II **Credits: 3**

SPA 211 - Intermediate Spanish I **Credits: 3**

OR

ASL 211 - Intermediate ASL I **Credits: 3**

15 Credits

Spring Semester II

PHI 215 - Philosophical Issues **Credits: 3**

OR

PHI 240 - Introduction to Ethics **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

MAT 141: 3 Credits

Lab Science Elective: 4 credits

13 Credits

Associate in Arts in Teacher Preparation (A1010T)

The Associate in Arts in Teacher Preparation degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in arts programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.7 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT (Credits: 45)

English Composition

Take 6 credits:

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

Communications

Take 3 credits:

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts

Take 6 credits:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

ENG 242 - British Literature II **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**
MUS 112 - Introduction to Jazz **Credits: 3**
PHI 215 - Philosophical Issues **Credits: 3**
PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

Choose two courses from two different disciplines: Take 6 credits:

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**
POL 120 - American Government **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Math

Take 3-4 credits:

MAT 143 - Quantitative Literacy **Credits: 3**
MAT 152 - Statistical Methods I **Credits: 4**
MAT 171 - Precalculus Algebra **Credits: 4**

Natural Sciences

Take 4 credits:

Group 1:
AST 111 - Descriptive Astronomy **Credits: 3**
and
AST 111A - Descriptive Astronomy Lab **Credits: 1**
Group 2:
AST 151 - General Astronomy I **Credits: 3**
and
AST 151A - General Astronomy I Lab **Credits: 1**

Group 3:

PHY 110 - Conceptual Physics **Credits: 3**

and

PHY 110A - Conceptual Physics Lab **Credits: 1**

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

CHM 115 - Concepts in Chemistry **Credits: 3**

GEL 111 - Geology **Credits: 4**

Other Required General Education Hours

Other Required Hours (14-15 SHC)

Choose 14-15 hours from the following:

ANT 210 - General Anthropology **Credits: 3**

ANT 220 - Cultural Anthropology **Credits: 3**

ANT 221 - Comparative Cultures **Credits: 3**

ANT 230 - Physical Anthropology **Credits: 3**

Take 3 credits:

SOC 225 - Social Diversity **Credits: 3**

Other Required Hours

Education

Take 14 credits:

EDU 187 - Teaching and Learning for All **Credits: 4**
EDU 216 - Foundations of Education **Credits: 3**
EDU 250 - Teacher Licensure Preparation **Credits: 3**

EDU 279 - Literacy Develop and Instruct **Credits: 4**

Required Course: Academic Transition

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Total Semester Hours Credits: 60-61

Optional General Education Hours

A student may **take up to 8 SHC** of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

Associate in Engineering (A10500)

The Associate in Engineering (AE) degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use. The degree plan includes required general education and prerequisite courses that are acceptable to all state-funded Bachelor of Engineering programs.

Students who follow the degree progression plan will meet the entrance requirements at all of the North Carolina public Bachelor of Science Engineering programs. Associate in Engineering graduates may then apply to any of these programs without taking additional and sometimes duplicative courses. Admission to Engineering programs is highly competitive and admission is not guaranteed. To be eligible for the transfer of credits under the AE to the Bachelor of Science in Engineering Articulation Agreement, community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.5 on a 4.0 scale.

General Education Requirements (Credits:45)

Optional General Education Hours

A student may take up to 8 SHC of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General

Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

Associate in Fine Arts, Music (A10700)

It is the responsibility of the student to know and to comply with the prerequisites and the corequisites listed in this catalog. If students have previous college credits from other institutions, students are advised to check first with a counselor at the receiving institution (the institution in which they plan to attend upon leaving CFCC). A counselor at the receiving institution should advise students of the courses to take at CFCC if the students have credits from other institutions. Otherwise, students will be encouraged to 1) complete their associate degree, which consists of 64-65 semester hours, or, the general education core, which consists of 28 semester hours; 2) contact their CFCC advisor, register early, and pay their tuition on time; and 3) earn a grade of "C" or higher on the first attempt. Since this program has only 28 credit hours in the general education core, students may be required to fulfill their basic studies requirement after they transfer. While some UNC institutions accept students with a 2.0 grade-point average, other UNC institutions require at least a 2.5 grade point average. (Reminder: While CFCC will accept a grade of "C-," some senior institutions will not accept this grade.) Students must always comply with the admission requirements of the receiving institution.

Important Websites

The following website provides more CFCC college transfer and advising information:

<http://cfcc.edu/transfer/>. The following website lists the academic programs offered at the sixteen (16) UNC institutions: <http://www.northcarolina.edu/apps/programs/index.php>.

Students who need assistance in deciding their major may visit CFCC's Career and Testing Services or visit the website about academic majors from their institution of choice. Example:

https://www1.cfnc.org/Plan/For_A_Career/_default.aspx.

The general education core consists of 28 semester hour credits.

While the courses in this program are not taught every semester, every effort is made to see that each course is taught at least once per year. When planning a class schedule, students should consider the frequency of the course offerings.

Associate in Fine Arts, Visual Arts (A10600)

It is the responsibility of the student to know and to comply with the prerequisites and the corequisites listed in this catalog. If students have previous college credits from other institutions, students are advised to check first with a counselor at the receiving institution (the institution in which they plan to attend upon leaving CFCC). A counselor at the receiving institution should advise students of the courses to take at CFCC if the students have credits from other institutions. Otherwise, students will be encouraged to 1) complete their associate degree, which consists of 60-61 semester hours, or, the general education core, which consists of 25 semester hours; 2) contact their CFCC advisor, register early, and pay their tuition on time; and 3) earn a grade of "C" or higher on the first attempt. Since this program has only 25 credit hours in the general education core, students may be required to fulfill their basic studies requirements after they transfer. While some UNC institutions accept students with a 2.0 grade-point average, other UNC institutions require at least a 2.5 grade-point average. Students must always comply with the admission requirements of the receiving institution. Reminder: CFCC accepts a grade of "C-," but some UNC institutions will not accept this grade.

Important Websites

The following website provides more CFCC college transfer and advising information:
<http://cfcc.edu/transfer/>.

The following website lists the academic programs offered at the sixteen (16) UNC institutions:
<http://www.northcarolina.edu/apps/programs/index.php>.

Students who need assistance in deciding their major may visit CFCC's Career and Testing Services or visit the website about academic majors from their institution of choice. Example:
https://www1.cfnc.org/Plan/For_A_Career/_default.aspx.

While the courses in this pre-major are not taught every semester, every effort is made to see that each course is taught at least once per year. When planning a class schedule, students should consider the frequency of the course offerings.

Since requirements vary, each student should first contact the senior institution of choice to determine the specific requirements of that institution and to determine whether it is better to complete this pre-major or the Associate in Arts program or the minimum transfer hours of the receiving institution. Some senior institutions offer a Bachelor in Fine Arts degree while others offer a Bachelor in Arts degree. Depending on the institution of choice, some students will not have satisfied the general education core or the basic studies requirements even if the students complete this degree. Students are encouraged to contact the senior institution to confirm degree offerings.

Universal General Education Transfer Component (Credits: 25-26)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**
ENG 112 - Writing/Research in the Disc **Credits: 3**

COM/Humanities/Fine Arts

Take 6 credits from 2 disciplines.

ART 111 - Art Appreciation **Credits: 3**
COM 120 - Intro Interpersonal Com **Credits: 3**
COM 231 - Public Speaking **Credits: 3**
DRA 111 - Theatre Appreciation **Credits: 3**
ENG 231 - American Literature I **Credits: 3**
ENG 232 - American Literature II **Credits: 3**

MUS 112 - Introduction to Jazz **Credits: 3**
PHI 215 - Philosophical Issues **Credits: 3**
PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

Select one course from each group below. Take 6 credits:

Group I

HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**

Group II

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
POL 120 - American Government **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Mathematics

Take 3/4 credits:

MAT 143 - Quantitative Literacy **Credits: 3**
MAT 152 - Statistical Methods I **Credits: 4**
MAT 171 - Precalculus Algebra **Credits: 4**
MAT 271 - Calculus I **Credits: 4**

Natural Sciences

Choose one natural science option from the list below. Take 4 credits:

(Reminder: AST 111 and PHY 110 have mandatory labs.)

AST 111 - Descriptive Astronomy **Credits: 3 and**
AST 111A - Descriptive Astronomy Lab **Credits: 1**

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

CHM 151 - General Chemistry I **Credits: 4**

GEL 111 - Geology **Credits: 4**

PHY 110 - Conceptual Physics **Credits: 3 and**
PHY 110A - Conceptual Physics Lab **Credits: 1**

Other Required Hours (Credits: 35)

College Success Course

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Additional UGETC ART Courses

Take 6 credits:

ART 114 - Art History Survey I **Credits: 3**
ART 115 - Art History Survey II **Credits: 3**

Other Required ART Courses

Take 9 credits:

- ART 121 - Two-Dimensional Design **Credits: 3**
- ART 122 - Three-Dimensional Design **Credits: 3**
- ART 131 - Drawing I **Credits: 3**

Additional Hours

An additional **19 SHC** of courses should be selected from the courses listed below. Students should select these courses based on their intended major and transfer university. Can take up to 9 SHC in sequential foreign language courses. SPA-111, 112, 211/ FRE-111, 112, 211/ GER-111, 112, 211

- ART 113 - Art Methods and Materials **Credits: 3**

Associate in General Education, A.G.E.(A10300)

The Associate in General Education (AGE) curriculum is designed for individuals who wish to broaden their education, with emphasis on personal interest, growth, and development. The two-year General Education program provides students opportunities to study English, literature, fine arts, philosophy, social science, and science and mathematics at the college level. All courses in the program are college-level courses which may be selected based upon a student's personal interests rather than specific technical or professional requirements. Many of the courses are equivalent to college transfer courses; however, the program is not principally designed for college transfer.

General Education Courses

English

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts Elective

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

ART 116 - Survey of American Art **Credits: 3**

ART 117 - Non-Western Art History **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

DRA 122 - Oral Interpretation **Credits: 3**

DRA 126 - Storytelling **Credits: 3**

DRA 211 - Theatre History I **Credits: 3**

DRA 212 - Theatre History II **Credits: 3**
ENG 131 - Introduction to Literature **Credits: 3**
ENG 231 - American Literature I **Credits: 3**
ENG 232 - American Literature II **Credits: 3**
ENG 233 - Major American Writers **Credits: 3**
ENG 241 - British Literature I **Credits: 3**
ENG 242 - British Literature II **Credits: 3**
ENG 252 - Western World Literature II **Credits: 3**
ENG 261 - World Literature I **Credits: 3**
ENG 262 - World Literature II **Credits: 3**
HUM 115 - Critical Thinking **Credits: 3**
HUM 130 - Myth in Human Culture **Credits: 3**
HUM 160 - Introduction to Film **Credits: 3**
HUM 161 - Advanced Film Studies **Credits: 3**
HUM 220 - Human Values and Meaning **Credits: 3**
MUS 110 - Music Appreciation **Credits: 3**
MUS 112 - Introduction to Jazz **Credits: 3**
MUS 113 - American Music **Credits: 3**
MUS 114 - Introduction to World Music **Credits: 3**
PHI 215 - Philosophical Issues **Credits: 3**
PHI 240 - Introduction to Ethics **Credits: 3**
REL 110 - World Religions **Credits: 3**
REL 111 - Eastern Religions **Credits: 3**
REL 112 - Western Religions **Credits: 3**
REL 211 - Intro to Old Testament **Credits: 3**
REL 212 - Intro to New Testament **Credits: 3**
REL 221 - Religion in America **Credits: 3**

Natural Science/Mathematics Elective

Take 3 credits:

BIO 110 - Principles of Biology **Credits: 4**
BIO 111 - General Biology I **Credits: 4**
BIO 112 - General Biology II **Credits: 4**
BIO 140 - Environmental Biology **Credits: 3**
BIO 140A - Environmental Biology Lab **Credits: 1**
CHM 131 - Introduction to Chemistry **Credits: 3**
CHM 131A - Intro to Chemistry Lab **Credits: 1**
CHM 151 - General Chemistry I **Credits: 4**
CHM 152 - General Chemistry II **Credits: 4**
GEL 111 - Geology **Credits: 4**

GEL 113 - Historical Geology **Credits: 4**
MAT 121 - Algebra/Trigonometry I **Credits: 3**
MAT 122 - Algebra/Trigonometry II **Credits: 3**
MAT 143 - Quantitative Literacy **Credits: 3**
MAT 171 - Precalculus Algebra **Credits: 4**
MAT 172 - Precalculus Trigonometry **Credits: 4**
MAT 263 - Brief Calculus **Credits: 4**
MAT 271 - Calculus I **Credits: 4**
MAT 272 - Calculus II **Credits: 4**
MAT 273 - Calculus III **Credits: 4**
PHY 110 - Conceptual Physics **Credits: 3**
PHY 151 - College Physics I **Credits: 4**

Social/Behavioral Sciences Elective

Take 3 credits:

ANT 210 - General Anthropology **Credits: 3**
ANT 220 - Cultural Anthropology **Credits: 3**
ECO 151 - Survey of Economics **Credits: 3**
ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
HIS 115 - Intro to Global History **Credits: 3**
HIS 121 - Western Civilization I **Credits: 3**
HIS 122 - Western Civilization II **Credits: 3**

Total Credits: 64/65

Associate in General Education: Nursing (A1030N)

The Associate in General Education (AGE)-Nursing is designed for students who wish to begin their study toward the Associate in Nursing degree and a Baccalaureate degree in Nursing as based on Blocks 1 through 3 of the Uniform Articulation Agreement between the University of North Carolina's Registered Nurse (RN) to Bachelor of Science in Nursing (BSN) programs and the North Carolina Community College Associate Degree Nursing Programs which was approved by the State Board of Community Colleges and the UNC Board of Governors in February 2015. The AGE-Nursing shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of courses.

A student who completes an Associate in Applied Science (AAS) in Nursing with a GPA of at least 2.0 and a grade of C or better in the AGE-Nursing courses listed below and who holds a current unrestricted license as a Registered Nurse in North Carolina will have fulfilled the UNC institutions lower-division general education requirements as well as nursing program entry requirements. However, because nursing program admissions are competitive, no student is guaranteed admission to the program of his or her choice.

General Education Requirements (Credits: 53 -54)

English Composition (Credits: 6)

Group 1 - Take 3 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

Group 2 - Take 3 credits:

ENG 112 - Writing/Research in the Disc **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts (Credits: 9)

Take 3 Groups:

Group 1 - Take 3 credits:

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

MUS 112 - Introduction to Jazz **Credits: 3**

Group 2 - Take 3 credits:

ENG 231 - American Literature I **Credits: 3**

ENG 232 - American Literature II **Credits: 3**

Group 3 - Take 3 credits:

PHI 215 - Philosophical Issues **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences (Credits:15)

Group 1 - Take 9 credits:

PSY 150 - General Psychology **Credits: 3**

PSY 241 - Developmental Psych **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Group 2 - Take 3 credits:

SOC 213 - Sociology of the Family **Credits: 3**

SOC 220 - Social Problems **Credits: 3**
SOC 225 - Social Diversity **Credits: 3**
SOC 230 - Race and Ethnic Relations **Credits: 3**
SOC 240 - Social Psychology **Credits: 3**

Group 3 - Take 3 credits:

HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**

Natural Sciences (Credits: 15-16)

Take 3 Groups:

Group 1 - Take 8 credits:

BIO 168 - Anatomy and Physiology I **Credits: 4**
BIO 169 - Anatomy and Physiology II **Credits: 4**

Group 2 - Take 3 credits:

BIO 175 - General Microbiology **Credits: 3**

Group 3 - Take 4 credits:

CHM 151 - General Chemistry I **Credits: 4**

Math (Credits: 8)

MAT 152 - Statistical Methods I **Credits: 4**
MAT 171 - Precalculus Algebra **Credits: 4**

Other Required Hours (Credits: 7)

Required Courses (Credits: 1)

ACA 122 - College Transfer Success **Credits: 1**

Economics Requirements (Credits: 3)

Take 3 credits:

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**

Additional Transfer Credit (Credit: 3)

Take 3 credits:

ACC 120 - Prin of Financial Accounting **Credits: 4**
ACC 121 - Prin of Managerial Accounting **Credits: 4**
ANT 210 - General Anthropology **Credits: 3**
ANT 220 - Cultural Anthropology **Credits: 3**
ANT 240 - Archaeology **Credits: 3**

SPA 182 - Spanish Lab 2 **Credits: 1**

SPA 211 - Intermediate Spanish I **Credits: 3**
SPA 212 - Intermediate Spanish II **Credits: 3**
SPA 221 - Spanish Conversation **Credits: 3**
SPA 231 - Reading and Composition **Credits: 3**

Total Credits: 60-62

Associate in Science (A10400)

As a result of a legislative mandate from the NC General Assembly, fall of 1997, the 58 North Carolina community colleges and the 16 institutions in the University of North Carolina (UNC) System entered into an agreement called the statewide Comprehensive Articulation Agreement, better known as the CAA. This agreement has been updated, and the revisions were implemented fall of 2014. This agreement includes two degrees—the Associate in Arts and the Associate in Science—and enables North Carolina community college graduates to receive junior status if the graduates meet certain criteria. Students are encouraged to complete their degree before they transfer. Admission to a UNC institution is a competitive process.

The Associate in Science degree requires 60-61 credit hours. It allows students to take the first two years of their baccalaureate degree at CFCC and enables them to transfer to one of the 16 institutions in the University of North Carolina System with junior status. Students in this program may choose majors in architecture, agriculture, biology, chemistry, computer science, dentistry, forestry, mathematics, medicine, pharmacy, and textiles. To graduate from CFCC, students must meet all prerequisite and corequisite requirements, successfully complete all the required CAA courses with a grade of "C" or above, and earn at least a 2.0 overall grade-point average. (Note: To enroll at a senior institution, students must meet the grade-point average requirement of the receiving institution, which may be higher than a 2.0. While CFCC may accept a grade of "C-" from another institution, students should be aware that some UNC institutions will not accept this grade.)

This plan of study is subject to change when the college thinks that such action is in the best interest of the student or the program. It is the responsibility of the student to meet all graduation requirements.

When students enroll at CFCC, they are advised to take ACA 122 - College Transfer Success in their first or second semester and create a suitable plan of study. Students must also demonstrate their computer competency before graduation by taking CIS 110 or CIS 115 or CSC 151. If a student is enrolled in the last semester of course work, is computer competent, but has not fulfilled the computer requirement, the student may opt to take a computer competency in the Learning Lab at the North or the Wilmington campus.

Students must meet the receiving institution's foreign language and/or health and physical education course, if applicable, prior to or after transfer to the senior institution.

Website that houses CFCC's college transfer curriculum worksheets: <http://cfcc.edu/transfer/current-student/>.

Website that houses the four-year baccalaureate plans at the 16 institutions in the University of North Carolina System: <http://cfcc.edu/transfer/curriculum-pathways/>.

The Associate in Science program requirements are outlined as follows:

Universal General Education Transfer Component (34 semester hour credits)—These courses are sometimes referred to as the UGETC courses and will transfer for equivalency credit at the 16 University of North Carolina institutions.

Additional General Education Courses (11 semester hour credits)— These may be additional general education courses that CFCC has selected for its students and/or additional general education courses that a senior institution has recommended or required for an intended major.

Other Requirements (15 semester hour credits)—A few electives are mandated by CFCC. Students should select the remaining electives based on their intended major and the senior institution of choice.

Universal General Education Transfer Component (Credits: 45)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

COM/Humanities/Fine Arts

Take 6 credits from 2 disciplines below:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

ENG 232 - American Literature II **Credits: 3**

ENG 241 - British Literature I **Credits: 3**

ENG 242 - British Literature II **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

MUS 112 - Introduction to Jazz **Credits: 3**

PHI 215 - Philosophical Issues **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

Select any 6 credits from 2 disciplines below.

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**
POL 120 - American Government **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Mathematics

Take 8 credits:

MAT 171 - Precalculus Algebra **Credits: 4**
MAT 172 - Precalculus Trigonometry **Credits: 4**
MAT 263 - Brief Calculus **Credits: 4**
MAT 271 - Calculus I **Credits: 4**
MAT 272 - Calculus II **Credits: 4**

Natural Sciences

Choose one pair of courses from one group. Take 8 credits:

Group 1

BIO 111 - General Biology I **Credits: 4**
BIO 112 - General Biology II **Credits: 4**

Group II

CHM 151 - General Chemistry I **Credits: 4**
CHM 152 - General Chemistry II **Credits: 4**

Group III

PHY 151 - College Physics I **Credits: 4**
PHY 152 - College Physics II **Credits: 4**

Group IV

PHY 251 - General Physics I **Credits: 4**

PHY 252 - General Physics II **Credits: 4**

Group V

BIO 110 - Principles of Biology **Credits: 4**

GEL 111 - Geology **Credits: 4**

Group VI

AST 151 - General Astronomy I **Credits: 3**

AST 151A - General Astronomy I Lab **Credits: 1**

GEL 111 - Geology **Credits: 4**

Group VII

AST 151 - General Astronomy I **Credits: 3**

AST 151A - General Astronomy I Lab **Credits: 1**

BIO 110 - Principles of Biology **Credits: 4**

Additional General Education Courses (Credits: 11)

Select any **11 credits** from the disciplines below.

Science and Quantitative Reasoning

AST 111 - Descriptive Astronomy **Credits: 3**

AST 111A - Descriptive Astronomy Lab **Credits: 1**

AST 151 - General Astronomy I **Credits: 3**

AST 151A - General Astronomy I Lab **Credits: 1**

AST 152 - General Astronomy II **Credits: 3**

AST 152A - General Astronomy II Lab **Credits: 1**

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

BIO 112 - General Biology II **Credits: 4**

BIO 120 - Introductory Botany **Credits: 4**

BIO 130 - Introductory Zoology **Credits: 4**

BIO 140 - Environmental Biology **Credits: 3**

BIO 140A - Environmental Biology Lab **Credits: 1**

CHM 131 - Introduction to Chemistry **Credits: 3**

CHM 131A - Intro to Chemistry Lab **Credits: 1**
CHM 132 - Organic and Biochemistry **Credits: 4**
CHM 151 - General Chemistry I **Credits: 4**
CHM 152 - General Chemistry II **Credits: 4**
CIS 110 - Introduction to Computers **Credits: 3**
CIS 115 - Intro to Prog & Logic **Credits: 3**
GEL 111 - Geology **Credits: 4**
GEL 113 - Historical Geology **Credits: 4**
GEL 230 - Environmental Geology **Credits: 4**
MAT 141 - Mathematical Concepts I **Credits: 3**
MAT 142 - Mathematical Concepts II **Credits: 3**
MAT 143 - Quantitative Literacy **Credits: 3**
MAT 152 - Statistical Methods I **Credits: 4**
MAT 171 - Precalculus Algebra **Credits: 4**
MAT 172 - Precalculus Trigonometry **Credits: 4**
MAT 263 - Brief Calculus **Credits: 4**
MAT 271 - Calculus I **Credits: 4**
MAT 272 - Calculus II **Credits: 4**
MAT 273 - Calculus III **Credits: 4**
PHY 110 - Conceptual Physics **Credits: 3**
PHY 110A - Conceptual Physics Lab **Credits: 1**
PHY 151 - College Physics I **Credits: 4**
PHY 152 - College Physics II **Credits: 4**
PHY 251 - General Physics I **Credits: 4**
PHY 252 - General Physics II **Credits: 4**

Communications

COM 110 - Introduction to Communication **Credits: 3**
COM 120 - Intro Interpersonal Com **Credits: 3**
COM 140 - Intro Intercultural Com **Credits: 3**

Other Required Electives (Credits:15)

Reminder: ACA 122 is a required course, and students should take it during their first or second semester of enrollment at CFCC. The selection of the additional unused courses should be based on the student's intended major and respective senior institution. AST 111, BIO 140, CHM 131, PHY 110, all elementary foreign languages, and ASL 211 have mandatory labs.

Required course:

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Electives

Take 14 credits:

Accounting:

ACC 120 - Prin of Financial Accounting **Credits: 4**

ACC 121 - Prin of Managerial Accounting **Credits: 4**

Anthropology:

ANT 210 - General Anthropology **Credits: 3**

ANT 220 - Cultural Anthropology **Credits: 3**

ANT 240 - Archaeology **Credits: 3**

ANT 240A - Archaeology Field Lab **Credits: 2**

Art:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

ART 116 - Survey of American Art **Credits: 3**

ART 117 - Non-Western Art History **Credits: 3**

ART 118 - Art by Women **Credits: 3**

ART 121 - Two-Dimensional Design **Credits: 3**

ART 122 - Three-Dimensional Design **Credits: 3**

ART 131 - Drawing I **Credits: 3**

ART 132 - Drawing II **Credits: 3**

Total Requirement in Semester Hours: 60-61

Associate in Science in Teacher Preparation (A1040T)

The Associate in Science in Teacher Preparation degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and the basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in science programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.7 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT(Credits: 45)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

Communications

Take 3 credits:

Take 1 course:

COM 120 - Intro Interpersonal Com **Credits: 3**
COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**
ART 114 - Art History Survey I **Credits: 3**
ART 115 - Art History Survey II **Credits: 3**
DRA 111 - Theatre Appreciation **Credits: 3**
ENG 242 - British Literature II **Credits: 3**
ENG 232 - American Literature II **Credits: 3**
ENG 241 - British Literature I **Credits: 3**
ENG 231 - American Literature I **Credits: 3**
MUS 110 - Music Appreciation **Credits: 3**
MUS 112 - Introduction to Jazz **Credits: 3**
PHI 215 - Philosophical Issues **Credits: 3**
PHI 240 - Introduction to Ethics **Credits: 3**

Social /Behavioral Sciences

Take 3 credits:

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**
POL 120 - American Government **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Math

Take 8 credits:

MAT 171 - Precalculus Algebra **Credits: 4**
MAT 172 - Precalculus Trigonometry **Credits: 4**
MAT 263 - Brief Calculus **Credits: 4**
MAT 271 - Calculus I **Credits: 4**

MAT 272 - Calculus II **Credits: 4**

Natural Sciences

Take 8 credits:

AST 151 - General Astronomy I **Credits: 3**

AST 151A - General Astronomy I Lab **Credits: 1**
and

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

and

OTHER REQUIRED HOURS (Credits: 15)

Education

Take 14 credits:

EDU 187 - Teaching and Learning for All **Credits: 4**
EDU 216 - Foundations of Education **Credits: 3**
EDU 250 - Teacher Licensure Preparation **Credits: 3**
EDU 279 - Literacy Develop and Instruct **Credits: 4**

Academic Transition

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Total Semester Hours Credit: 60-61

Optional General Education Hours

A student may take up to 8 SHC of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

Automotive Customizing Technology Certificate (C60190)

Major Requirements

Core

Total Credits: 14

Automotive Customizing Technology Diploma (D60190)

The curriculum prepares individuals to modify existing automotive vehicle components, fabrication techniques to create custom vehicle components, non-structural damage repair, custom painting and refinishing techniques, custom upholstery and glass removal/replacement/custom modifications, and other automotive technology related systems.

Course work may include transportation systems theory, custom fabrication, custom fiberglass skills, auto shop management, and basic welding for transportation.

Graduates of this pathway should be prepared to take professional licensure exams, which correspond to certain programs of study, and to enter careers as entry-level technicians in the transportation industry.

Automotive Systems Technology, A.A.S. (A60160)

The curriculum prepares individuals for employment as automotive service technicians. It provides an introduction to automotive careers and increases student awareness of the challenges associated with this fast and ever-changing field.

Classroom and lab experiences integrate technical and academic coursework. Emphasis is placed on theory, servicing and operation of brakes, electrical/electronic systems, engine performance, steering/suspension, automatic transmission/transaxles, engine repair, climate control, and manual drive trains.

Upon completion of this curriculum, students should be prepared to take the ASE exam and be ready for full-time employment in dealerships and repair shops in the automotive service industry.

Baking and Pastry Arts CTE Pathway (C55130CP)

This curriculum is designed to provide students with the skills and knowledge required for employment in the baking/pastry industry, including restaurants, hotels, independent bakeries/pastry shops, wholesale/retail markets, and high-volume bakeries, and/or further academic studies.

Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Course work includes specialty/artisanal breads, desserts/pastries, decorative work, high-volume production and food marketing.

Graduates should qualify for entry-level positions, such as pastry/bakery assistant, area pastry chef and assistant pastry chef. American Culinary Federation certification may be available to graduates.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (12 credits)

- BPA 150 - Artisan & Specialty Bread **Credits: 4**
- BPA 210 - Cake Design & Decorating **Credits: 3**
- CUL 110 - Sanitation & Safety **Credits: 2**
- CUL 160 - Baking I **Credits: 3**

Other Major Requirements (4 credits)

- BPA 165 - Hot and Cold Desserts **Credits: 3**
- CUL 110A - Sanitation & Safety Lab **Credits: 1**

Total Credits: 16

This curriculum is designed to provide students with the skills and knowledge required for employment in the baking/pastry industry, including restaurants, hotels, independent bakeries/pastry shops, wholesale/retail markets, and high-volume bakeries, and/or further academic studies. Students will be

provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Course work includes specialty/artisanal breads, desserts/pastries, decorative work, high-volume production and food marketing. Graduates should qualify for entry-level positions, such as pastry/bakery assistant, area pastry chef and assistant pastry chef. American Culinary Federation certification may be available to graduates.

General Education Requirements (15 credits)

English

Take 3 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

Communications

Take 3 credits:

COM 120 - Intro Interpersonal Com **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

HUM 115 - Critical Thinking **Credits: 3**

Social/Behavioral Science Electives

Take 3 credits:

HIS 132 - American History II **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Natural Sciences/Math

Take 3 credits:

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (25 credits)

Required

Take 23 credits:

- BPA 150 - Artisan & Specialty Bread **Credits: 4**
- BPA 210 - Cake Design & Decorating **Credits: 3**
- BPA 250 - Dessert/Bread Production **Credits: 5**
- BPA 260 - Pastry & Baking Marketing **Credits: 3**
- CUL 110 - Sanitation & Safety **Credits: 2**
- CUL 160 - Baking I **Credits: 3**
- HRM 245 - Human Resource Mgmt-Hosp **Credits: 3**

Work-Based Learning Electives

Take 2 credits:

- WBL 111Y - Work-Based Learning I **Credits: 1**
- WBL 112Y - Work-Based Learning I **Credits: 2**
- WBL 121Y - Work-Based Learning II **Credits: 1**

Other Major Requirements (24 credits)

Take 24 credits:

- BPA 120 - Petit Fours & Pastries **Credits: 3**
- BPA 130 - European Cakes and Tortes **Credits: 3**
- BPA 165 - Hot and Cold Desserts **Credits: 3**
- BPA 220 - Confection Artistry **Credits: 3**
- BPA 230 - Chocolate Artistry **Credits: 3**
- BPA 230A - Chocolate Artistry Lab **Credits: 1**
- BPA 240 - Plated Desserts **Credits: 3**
- CUL 110A - Sanitation & Safety Lab **Credits: 1**
- CUL 260 - Baking II **Credits: 3**
- WBL 115Y - Work-Based Learning Seminar **Credits: 1**

Other Requirements (2 credits)

- CIS 111 - Basic PC Literacy **Credits: 2**

Total Credits: 66

Fall Semester I

BPA 120 - Petit Fours & Pastries **Credits: 3**
CIS 111 - Basic PC Literacy **Credits: 2**
CUL 110 - Sanitation & Safety **Credits: 2 and**
CUL 110A - Sanitation & Safety Lab **Credits: 1**
CUL 160 - Baking I **Credits: 3**
CUL 260 - Baking II **Credits: 3**

Spring Semester I

BPA 150 - Artisan & Specialty Bread **Credits: 4**
BPA 165 - Hot and Cold Desserts **Credits: 3**
BPA 210 - Cake Design & Decorating **Credits: 3**
HRM 245 - Human Resource Mgmt-Hosp **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**

Summer Semester I

WBL 115Y - Work-Based Learning Seminar I **Credits: 1 ***
Humanities/Fine Arts Elective **Credits: 3**
Social/Behav Science Elective **Credits: 3**
Work-Based Learn Elective **Credits: 2**

Fall Semester II

BPA 130 - European Cakes and Tortes **Credits: 3**
BPA 220 - Confection Artistry **Credits: 3**
BPA 240 - Plated Desserts **Credits: 3**
COM 120 - Intro Interpersonal Com **Credits: 3**

Spring Semester II

BPA 230 - Chocolate Artistry **Credits: 3 and**
BPA 230A - Chocolate Artistry Lab **Credits: 1**
BPA 250 - Dessert/Bread Production **Credits: 5**
BPA 260 - Pastry & Baking Marketing **Credits: 3**
MAT 110 - Math Measurement & Literacy **Credits: 3**

Note:

*Students may take WBL 112Y (320 hrs) in lieu of taking WBL 111Y (160 hrs) and WBL 121Y (160 hrs).

Boat Building (Wooden) Certificate (C35120)

(EVENINGS)

Major Requirements

BTB 101A - Boat Bldg I (part 1) **Credits: 5**

BTB 101B - Boat Bldg I (part 2) **Credits: 5**

DFT 100 - Marine Drafting **Credits: 2**

Total Credits: 12

Fall Semester I

BTB 101A - Boat Bldg I (part 1) **Credits: 5**

DFT 100 - Marine Drafting **Credits: 2**

Spring Semester I

BTB 101B - Boat Bldg I (part 2) **Credits: 5**

Boat Building (Wooden) Diploma (D35120)

The Boat Building curriculum prepares individuals for employment in the boat building and boat repair industry. Today's boat builders are highly skilled craftspeople who can create complex shapes out of wood.

Course work includes reading boat plans, lofting, setting up the building jig, fashioning the structural timbers, and different planking techniques. Interior joinery, exterior joinery, and yacht rigging is also covered.

Graduates may find work with yacht manufacturers, high end furniture shops, architectural millwork shops, and companies installing built in furniture in homes. Other opportunities can be found in boat maintenance and repair yards.

General Education Requirements (6 credits)

Take 6 credits:

ENG 101 - Applied Communications I **Credits: 3**

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (35 credits)

Take 35 credits:

BTB 101 - Boat Building I **Credits: 10**
BTB 102 - Boat Building II **Credits: 9**
BTB 103 - Yacht Joiner Practices I **Credits: 4**
BTB 104 - Yacht Joiner Practices II **Credits: 3**
BTB 105 - Yacht Repair/Renovation **Credits: 5**
BTB 109 - Yacht Rigging **Credits: 2**
DFT 100 - Marine Drafting **Credits: 2**

Other Major Requirements (2 credits)

Take 2 credits:

CIS 111 - Basic PC Literacy **Credits: 2**

Total Credits: 43

Fall Semester I

BTB 101 - Boat Building I **Credits: 10**
CIS 111 - Basic PC Literacy **Credits: 2**
DFT 100 - Marine Drafting **Credits: 2**
MAT 110 - Math Measurement & Literacy **Credits: 3**

Spring Semester I

BTB 102 - Boat Building II **Credits: 9**
BTB 103 - Yacht Joiner Practices I **Credits: 4**
ENG 101 - Applied Communications I **Credits: 3**

Summer Semester I

BTB 104 - Yacht Joiner Practices II **Credits: 3**
BTB 105 - Yacht Repair/Renovation **Credits: 5**
BTB 109 - Yacht Rigging **Credits: 2**

Boat Building CTE Pathway (C35120CP)

The Boat Building curriculum prepares individuals for employment in the boat building and boat repair industry. Today's boat builders are highly skilled craftspeople who can create complex shapes out of wood.

Course work includes reading boat plans, lofting, setting up the building jig, fashioning the structural timbers, and different planking techniques. Interior

joinery, exterior joinery, and yacht rigging is also covered.

Graduates may find work with yacht manufacturers, high end furniture shops, architectural millwork shops, and companies installing built in furniture in homes. Other opportunities can be found in boat maintenance and repair yards.

Major Requirements (12 credits)

BTB 101 - Boat Building I **Credits: 10**

DFT 100 - Marine Drafting **Credits: 2**

Total Credits: 12

Boat Manufacture and Service Diploma (D60330)

The Boat Manufacture and Service Technology program prepares students for employment in the manufacture and service of boats. Students learn the basics of boat design and the implementation of those designs in various components and/or complete boats or yachts.

Course work includes reading and interpreting marine blueprints, manuals, and other documents common to the industry; lofting; constructing forms and mold-making; application of concepts and techniques in composite, and fiberglass; marine woodworking; interior finishing; and marine mechanical, electrical, and plumbing systems.

Graduates may find employment with boat/yacht manufacturers, service yards, dealerships doing commissioning work, and companies doing custom boat building.

General Education Requirements (6 credits)

Take 6 credits:

ENG 101 - Applied Communications I **Credits: 3**

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (27 credits)

Required

Take 13 credits:

- BTB 110 - Fiberglass Boat Bldg I **Credits: 5**
- BTB 111 - Fiberglass Boat Bldg II **Credits: 5**
- BTB 112 - Fiberglass Boat Repairs **Credits: 3**

Marine Services

Take 14 credits:

- BTB 106 - Engine Install/Systems **Credits: 5**
- BTB 107 - Boat Electrical Systems **Credits: 5**
- BTB 108 - Boat Plumbing Systems **Credits: 4**

Other Major Requirements (6 credits)

Take 6 credits:

- BMS 117 - Marine Spray Finishing **Credits: 2**
- BMS 118 - Basic Boat Operation **Credits: 2**
- CIS 111 - Basic PC Literacy **Credits: 2**

Total Credits: 39

Fall Semester I

- BTB 107 - Boat Electrical Systems **Credits: 5**
- BTB 110 - Fiberglass Boat Bldg I **Credits: 5**
- BMS 118 - Basic Boat Operation **Credits: 2**
- MAT 110 - Math Measurement & Literacy **Credits: 3**

Spring Semester I

- BMS 117 - Marine Spray Finishing **Credits: 2**
- BTB 108 - Boat Plumbing Systems **Credits: 4**
- BTB 111 - Fiberglass Boat Bldg II **Credits: 5**
- ENG 101 - Applied Communications I **Credits: 3**

Summer Semester I

- BTB 106 - Engine Install/Systems **Credits: 5**
- BTB 112 - Fiberglass Boat Repairs **Credits: 3**

CIS 111 - Basic PC Literacy **Credits: 2**

Business Administration Certificate CTE Pathway (C25120DP)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (3 credits)

Computer Applications

Take:

CIS 110 - Introduction to Computers **Credits: 3**

Other Required Courses (12 credits)

Take:

CTS 130 - Spreadsheet **Credits: 3**

DBA 110 - Database Concepts **Credits: 3**

OMT 156 - Problem-Solving Skills **Credits: 3**

OST 136 - Word Processing **Credits: 3**

Total credits: 15 SHC

Recommended Course Sequence

Fall Semester I

CIS 110 - Introduction to Computers **Credits: 3**

OMT 156 - Problem-Solving Skills **Credits: 3**

Spring Semester I

OST 136 - Word Processing **Credits: 3**

CTS 130 - Spreadsheet **Credits: 3**

DBA 110 - Database Concepts **Credits: 3**

Business Administration, A.A.S. (A25120)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

General Education Requirements (15- 16 credits)

Required

Take 2 Groups; Take 6 credits

Group 1

ENG 111 - Writing and Inquiry **Credits: 3**

Group 2

Take 1 course

ENG 114 - Prof Research & Reporting **Credits: 3**

COM 120 - Intro Interpersonal Com **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**

Business Administration, International Bus CTE Pathway (C25120GP)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (15 credits)

BUS 110 - Introduction to Business **Credits: 3**
BUS 137 - Principles of Management **Credits: 3**
ECO 151 - Survey of Economics **Credits: 3**
INT 110 - International Business **Credits: 3**
MKT 223 - Customer Service **Credits: 3**

Other Major Requirements (3 credits)

Take 3 credits from the following courses:

MKT 224 - International Marketing **Credits: 3**

Total Credits: 18

Business Analytics Certificate (C25350)

The Business Analytics curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in analytical professions. Business analysts process and analyze essential information about business operations and also assimilate data for forecasting purposes.

Students will complete course work in business analytics, including general theory, best practices, data mining, data warehousing, predictive modeling, project and operations management, statistical analysis, and software packages. Related skills include business communication, critical thinking and decision making.

Graduates should qualify for employment as data technicians, data scientists, business and data analytics engineers, and business analysts in the fields of finance, banking, logistics, marketing, healthcare, manufacturing, information technology, and government organizations.

Required Courses (18 credits)

- BAS 120 - Intro to Analytics **Credits: 3**
- BAS 121 - Data Visualization **Credits: 3**
- BAS 150 - Intro to Analytical Program. **Credits: 3**

Cardiovascular Sonography Diploma (D45160)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Cardiovascular Sonography curriculum provides the individual with the knowledge and skills necessary to acquire, process, and evaluate the human heart and vascular structures. A cardiovascular sonographer uses high frequency sound waves to produce images of the heart and vascular structures.

The Cardiovascular program's goal is to prepare competent entry-level adult cardiac sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Course work includes effective communication and patient care skills combined with a knowledge of physics, human anatomy, physiology, and pathology, all of which are essential to obtaining high quality sonographic images.

Graduates may be eligible to apply to the American Registry of Diagnostic Medical Sonographers for examinations in physics, cardiovascular physics, vascular physics, and adult echocardiography. Graduates may find employment in hospitals, physicians' offices, mobile services, and educational institutions.

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of The Joint Review Committee on Education in Diagnostic Medical Sonography. The CAAHEP address is 9355-113th St. N, #7709 Seminole, Florida 33775 Phone: 727-210-2350

Chemical Technology CCP (C20120CP)

The Chemical Technology curriculum prepares individuals for work as analytical technicians in chemical laboratories associated with chemical production, environmental concerns, pharmaceuticals, or general analysis.

Course work includes general chemistry, organic chemistry, introductory chemical engineering, qualitative analysis, and quantitative analysis, including such instrumental techniques as spectroscopy (UV-Vis, IR, AA) and chromatography (GC, LC). Students also utilize computerized data collection, reduction, and graphic presentation.

Graduates should qualify as entry-level chemical laboratory technicians. Their duties may include chemical solution preparation; raw material, product, or environmental sampling; and/or sample testing via wet chemistry or instrumental techniques.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

English

Take the following courses:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts

Take 1 course from the following:

ART 111 - Art Appreciation **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

HUM 115 - Critical Thinking **Credits: 3**
MUS 110 - Music Appreciation **Credits: 3**
REL 110 - World Religions **Credits: 3**

Major Requirements

CTC 110 - Chemical Safety & Technology **Credits: 2**
CTC 114 - Wet Laboratory Techniques **Credits: 5**
CTC 115 - Quality Control Laboratory **Credits: 5**
CTC 145 - Advanced Laboratory Methods **Credits: 6**
CTC 150 - Standards & Solutions **Credits: 2**
CTC 210 - Forensic Laboratory **Credits: 2**
CTC 235 - Food Chemistry **Credits: 2**
CTC 240 - Instru I: Spectroscopy **Credits: 6**
CTC 250 - Instru II: Chromatography **Credits: 6**
CTC 260 - Chemical Technology Capstone **Credits: 2**

Total Credits: 47

Chemical Technology, A.A.S. (A20120)

The Chemical Technology curriculum prepares individuals for work as analytical technicians in chemical laboratories associated with chemical production, environmental concerns, pharmaceuticals, or general analysis.

Course work includes general chemistry, organic chemistry, introductory chemical engineering, qualitative analysis, and quantitative analysis, including such instrumental techniques as spectroscopy (UV-Vis, IR, AA) and chromatography (GC, LC, IC). Students also utilize computerized data collection, reduction, and graphic presentation.

Graduates should qualify as entry-level chemical laboratory technicians. Their duties may include chemical solution preparation, raw material, product, or environmental sampling, and/or sample testing via wet chemistry or instrumental techniques.

General Education Requirements Credits: 20

Required

Take 6 credits.

ENG 111 - Writing and Inquiry **Credits: 3**
ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits.

- ART 111 - Art Appreciation **Credits: 3**
- DRA 111 - Theatre Appreciation **Credits: 3**
- HUM 115 - Critical Thinking **Credits: 3**
- MUS 110 - Music Appreciation **Credits: 3**
- REL 110 - World Religions **Credits: 3**

Natural Sciences

Take 8 credits

- CHM 151 - General Chemistry I **Credits: 4**
- CHM 152 - General Chemistry II **Credits: 4**

Social/Behavioral Science Electives

Take 3 credits.

- ANT 210 - General Anthropology **Credits: 3**
- HIS 132 - American History II **Credits: 3**
- POL 120 - American Government **Credits: 3**
- PSY 150 - General Psychology **Credits: 3**
- SOC 210 - Introduction to Sociology **Credits: 3**

Major Requirements Credits: 38

- CTC 110 - Chemical Safety & Technology **Credits: 2**
- CTC 114 - Wet Laboratory Techniques **Credits: 5**
- CTC 115 - Quality Control Laboratory **Credits: 5**
- CTC 145 - Advanced Laboratory Methods **Credits: 6**
- CTC 150 - Standards & Solutions **Credits: 2**

These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

College Transfer Pathway - Associate in General Education, Nursing CCP (P1032C)

The Associate in General Education (AGE)-Nursing is designed for students who wish to begin their study toward the Associate in Nursing degree and a Baccalaureate degree in Nursing as based on Blocks 1 through 3 of the Uniform Articulation Agreement between the University of North Carolina's Registered Nurse (RN) to Bachelor of Science in Nursing (BSN) programs and the North Carolina Community College Associate Degree Nursing Programs which was approved by the State Board of Community Colleges and the UNC Board of Governors in February 2015. The AGE-Nursing shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of courses.

A student who completes an Associate in Applied Science (AAS) in Nursing with a GPA of at least 2.0 and a grade of C or better in the AGE-Nursing courses listed below and who holds a current unrestricted license as a Registered Nurse in North Carolina will have fulfilled the UNC institutions lower-division general education requirements as well as nursing program entry requirements. However, because nursing program admissions are competitive, no student is guaranteed admission to the program of his or her choice.

College Transfer Pathway - Associate in Science CCP (P1042C)

The Associate in Science degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and the basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in science programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.0 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions. GENERAL ED

(Take 6 credits. Must be from 2 different disciplines.)

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**
POL 120 - American Government **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Mathematics

(Take 3 credits)

MAT 143 - Quantitative Literacy **Credits: 3**
MAT 152 - Statistical Methods I **Credits: 4**
MAT 171 - Precalculus Algebra **Credits: 4**
MAT 271 - Calculus I **Credits: 4**

Natural Science

(Take 4 credits)

AST 111 - Descriptive Astronomy **Credits: 3**
AST 111A - Descriptive Astronomy Lab **Credits: 1**
AST 151 - General Astronomy I **Credits: 3**
AST 151A - General Astronomy I Lab **Credits: 1**
BIO 110 - Principles of Biology **Credits: 4**
BIO 111 - General Biology I **Credits: 4**
CHM 151 - General Chemistry I **Credits: 4**
GEL 111 - Geology **Credits: 4**
PHY 110 - Conceptual Physics **Credits: 3**
PHY 110A - Conceptual Physics Lab **Credits: 1**

Other Required Courses (7 credits)

Music

(Take 4 credits)

MUS 111 - Fundamentals of Music **Credits: 3** and
MUS 151 - Class Music I **Credits: 1**

Ensemble

(Take 2 Credits)

MUS 131 - Chorus I **Credits: 1**
MUS 132 - Chorus II **Credits: 1**
MUS 133 - Band I **Credits: 1**
MUS 134 - Band II **Credits: 1**
MUS 135 - Jazz Ensemble I **Credits: 1**
MUS 136 - Jazz Ensemble II **Credits: 1**
MUS 137 - Orchestra I **Credits: 1**
MUS 138 - Orchestra II **Credits: 1**
MUS 141 - Ensemble I **Credits: 1**
MUS 142 - Ensemble II **Credits: 1**

Academic Transition (1 credit)

ACA 122 - College Transfer Success **Credits: 1**

Total Credits: 32

Optional General Education Hours

A student may take up to 8 SHC of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

College Transfer Pathway-Associate in Fine Arts in Theatre (P1082C) (CCP)

The CCP College Transfer Pathway Leading to the Associate in Fine Arts in Theatre is designed for high school juniors and seniors who wish to begin study toward the Associate in Fine Arts in Theatre and a baccalaureate degree in Fine Arts-Theatre.

General Education (25 credits)

English Composition

(Take 6 credits)

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

Communications

(Take 3 credits)

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts

(Take 3 credits)

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

ENG 232 - American Literature II **Credits: 3**

ENG 241 - British Literature I **Credits: 3**

ENG 242 - British Literature II **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

MUS 112 - Introduction to Jazz **Credits: 3**

PHI 215 - Philosophical Issues **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Science

(Take 6 credits from 2 different disciplines)

ECO 251 - Prin of Microeconomics **Credits: 3**

ECO 252 - Prin of Macroeconomics **Credits: 3**

HIS 111 - World Civilizations I **Credits: 3**

HIS 112 - World Civilizations II **Credits: 3**

HIS 131 - American History I **Credits: 3**

Collision Repair and Refinishing Technology Certificate (C60130)

Major Requirements

Fundamental Trans Skills

TRN 110 - Intro to Transport Tech **Credits: 2**

Intermediate Trans Skills

TRN 180 - Basic Welding for Transp **Credits: 3**

Required

AUB 111 - Painting & Refinishing I **Credits: 4**

AUB 121 - Non-Structural Damage I **Credits: 3**

Total Credits: 12

Day

Fall Semester I

AUB 111 - Painting & Refinishing I **Credits: 4**

AUB 121 - Non-Structural Damage I **Credits: 3**

TRN 110 - Intro to Transport Tech **Credits: 2**

Spring Semester I

TRN 180 - Basic Welding for Transp **Credits: 3**

Collision Repair and Refinishing Technology CTE Pathway (C60130CP)

A program that prepares individuals to apply technical knowledge and skills to repair, reconstruct and finish automobile bodies, fenders, and external features. Includes instruction in structure analysis, damage repair, non-structural analysis, mechanical and electrical components, plastics and adhesives, painting and refinishing techniques, and damage analysis and estimating.

Major Requirements (12 credits)

AUB 111 - Painting & Refinishing I **Credits: 4**

AUB 121 - Non-Structural Damage I **Credits: 3**

TRN 110 - Intro to Transport Tech **Credits: 2**

TRN 180 - Basic Welding for Transp **Credits: 3**

Total Credits: 12

Collision Repair and Refinishing Technology Diploma (D60130)

The Collision Repair and Refinishing Technology curriculum prepares individuals to become qualified technicians who possess the diverse skills required to perform quality repairs and proper refinishing techniques on automobile bodies and to diagnose and repair mechanical and electrical systems.

Coursework includes classroom and laboratory experiences that integrate technical application with academic theory. Emphasis is placed on autobody fundamentals, painting and refinishing, structural and non-structural damage repair, mechanical and electrical component repair or replacement, and common industry practices.

Graduates should be qualified to take National Institute for Automotive Service Excellence (ASE) certification examinations and also for entry-level employment in automotive dealerships, independent repair shops, or through self-employment, as collision repair and refinishing technicians.

General Education Requirements

English

ENG 101 - Applied Communications I **Credits: 3**

Math

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements

Fundamental Trans Skills

TRN 110 - Intro to Transport Tech **Credits: 2**

Intermediate Trans Skills

TRN 180 - Basic Welding for Transp **Credits: 3**

Specialized Trans Skills

TRN 140 - Transp Climate Control **Credits: 2**

Required

AUB 111 - Painting & Refinishing I **Credits: 4**

AUB 121 - Non-Structural Damage I **Credits: 3**

AUB 131 - Structural Damage I **Credits: 4**

AUB 136 - Plastics & Adhesives **Credits: 3**

Other Major Requirements

AUB 112 - Painting & Refinishing II **Credits: 4**

AUB 114 - Special Finishes **Credits: 2**

AUB 122 - Non-Structural Damage II **Credits: 4**

AUB 141 - Mech & Elec Components I **Credits: 3**

AUB 162 - Autobody Estimating **Credits: 2**

CIS 111 - Basic PC Literacy **Credits: 2**
TRN 140A - Transp Climate Cont Lab **Credits: 2**

Total Credits: 46

Fall Semester I

AUB 111 - Painting & Refinishing I **Credits: 4**
AUB 121 - Non-Structural Damage I **Credits: 3**
AUB 131 - Structural Damage I **Credits: 4**
CIS 111 - Basic PC Literacy **Credits: 2**
TRN 110 - Intro to Transport Tech **Credits: 2**

Spring Semester I

AUB 112 - Painting & Refinishing II **Credits: 4**
AUB 122 - Non-Structural Damage II **Credits: 4**
AUB 141 - Mech & Elec Components I **Credits: 3**
TRN 180 - Basic Welding for Transp **Credits: 3**

Community Spanish Interpreter CTE Pathway (C55370CP)

The Community Spanish Interpreter curriculum prepares individuals to work as entry-level bilingual professionals who will provide communication access in interview and interactive settings. In addition, this curriculum provides educational training for working professionals who want to acquire Spanish language

skills.

Course work includes the acquisition of Spanish: grammar, structure, and sociolinguistic properties, cognitive processes associated with interpretation between Spanish and English; the structure and character of the Hispanic community; and acquisition of communication skills.

Graduates should qualify for entry-level jobs as para-professional bilingual employees in educational systems or a variety of community settings. Individuals may choose from part-time, full-time, or self-employment/free-lance positions, or apply language skills to other human service related areas.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (17 credits)

- SPA 111 - Elementary Spanish I **Credits: 3**
- SPA 112 - Elementary Spanish II **Credits: 3**
- SPA 120 - Spanish for the Workplace **Credits: 3**
- SPA 181 - Spanish Lab 1 **Credits: 1**
- SPA 182 - Spanish Lab 2 **Credits: 1**
- SPI 113 - Intro. to Spanish Inter. **Credits: 3**
- SPI 243 - Medical Interpreting I **Credits: 3**

Total Credits: 17

Community Spanish Interpreter, A.A.S. (A55370)

The Community Spanish Interpreter curriculum prepares individuals to work as entry-level bilingual professionals who will provide communication access in interview and interactive settings. Computer-Integrated Machining CTE Pathway (C50210CP)

The Computer-Integrated Machining curriculum prepares students with the analytical, creative and innovative skills necessary to take a production idea from an initial concept through design, development and production, resulting in a finished product.

Coursework may include manual machining, computer applications, engineering design, computer-aided drafting (CAD), computer-aided machining (CAM), blueprint interpretation, advanced computerized numeric control (CNC) equipment, basic and advanced machining operations, precision measurement and high-speed multi-axis machining.

Graduates should qualify for employment as machining technicians in high-tech manufacturing, rapid-prototyping and rapid-manufacturing industries, specialty machine shops, fabrication industries, and high-tech or emerging industries such as aerospace, aviation, medical, and renewable energy, and to sit for machining certification examinations.

Major Requirements

Construction Management Technology, Project Management Certificate (C35190A)

These curriculums are designed to prepare individuals to apply technical knowledge and skills to the fields of architecture, construction, construction management, and other associated professions.

Course work includes instruction in sustainable building and design, print reading, building codes, estimating, construction materials and methods, and other topics related to design and construction occupations.

Graduates of this pathway should qualify for entry-level jobs in architectural, engineering, construction and trades professions as well as positions in industry and government.

Construction Management Technology, A.A.S. (A35190)

This curriculum is designed to prepare individuals for careers in the construction management field. Such positions may include project manager, superintendent, estimator, or foreman.

Course work includes safety, planning, scheduling, cost control, productivity, human relations, estimating, and building codes. Students will also gain proficiency in specific construction related skills.

Graduates should qualify for entry-level positions in the field of construction management.

Construction Management, Building Performance Certificate (C35190S)

These curriculums are designed to prepare individuals to apply technical knowledge and skills to the fields of architecture, construction, construction management, and other associated professions.

Course work includes instruction in sustainable building and design, print reading, building codes, estimating, construction materials and methods, and other topics related to design and construction occupations.

Graduates of this pathway should qualify for entry-level jobs in architectural, engineering, construction and trades professions as well as positions in industry and government.

A program that prepares individuals to supervise, manage, and inspect construction sites, buildings, and associated facilities. Includes instruction in site safety, personnel supervision, labor relations, diversity training, construction documentation, scheduling, resource and cost control, bid strategies, rework prevention, construction insurance and bonding, accident management and investigation, applicable law and regulations, and communication skills.

Cosmetology Certificate (C55140)

Uniforms and name tags are required at an additional cost.

Students will be required to meet all applicable requirements of the State Board of Cosmetic Arts Rules and Regulations for graduation and licensure.

****Successful completion of this certificate program will give the student 1,200 hours of cosmetology training and allow the student to sit for the North Carolina State Board of Cosmetic Arts Apprenticeship License Examination. Passing the North Carolina written and practical exam will qualify the student to pay for and receive an apprenticeship license. The student must then complete a 1,040 hour mentorship with a licensed cosmetologist in order to earn a full cosmetology license.**

Cosmetology Certificate CTE Pathway, C55140CP

The Cosmetology curriculum is designed to provide competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the cosmetology industry. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional imaging, hair design, chemical processes, skin care, nail care, multi-cultural practices, business/computer principles, product knowledge, and other selected topics.

Graduates should qualify to sit for the State Board of Cosmetic Arts examination. Upon successfully passing the State Board exam, graduates will be issued a license. Employment is available in beauty salons and related businesses.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (32 credits)

Criminal Justice Technology CTE Pathway (C55180CP)

The Criminal Justice Technology curriculum is designed to provide knowledge of criminal justice systems and operations. Study will focus on local, state, and federal law enforcement, judicial processes, corrections, and security services. The criminal justice system's role within society will be explored.

Emphasis is on criminal justice systems, criminology, juvenile justice, criminal and constitutional law, investigative principles, ethics, and community relations. Additional study may include issues and concepts of government, counseling, communications, computers, and technology.

Employment opportunities exist in a variety of local, state, and federal law enforcement, corrections, and security fields. Examples include police officer, deputy sheriff, county detention officer, state trooper, intensive probation/parole surveillance officer, correctional officer, and loss prevention specialist.

Major Requirements (13 credits)

CJC 111 - Intro to Criminal Justice **Credits: 3**

CJC 112 - Criminology **Credits: 3**

CJC 113 - Juvenile Justice **Credits: 3**

CJC 221 - Investigative Principles **Credits: 4**

Total Credits: 13

Criminal Justice Technology, A.A.S. (A55180)

The Criminal Justice Technology curriculum is designed with a core of courses to afford one the opportunity to acquire basic knowledge, skills and attitudes in the generally accepted subject areas associated with a two-year study of law enforcement services. It includes subjects such as interpersonal communications, law, psychology and sociology.

In addition to core subjects, students are given instruction in topic areas where they will become exposed to and need knowledge of in order to become entry level professionals within the criminal justice community such as, but not limited to areas of study such as the correctional services program such as confinement facility administration, correctional law, counseling, probation-parole services and rehabilitation options. Similarly, the law enforcement option provides an opportunity to study other generally accepted subjects included in a law enforcement services program such as criminal behavior, criminal investigation, patrol operation, traffic management, and other aspects of law enforcement

administration and operations. The security services option provides an opportunity to study other generally accepted subjects related to a security services program such as accident prevention and safety management, common carrier protection, fire prevention, private security, industrial security, retail security, security systems cyber security, private investigations and surveillance.

Job opportunities are available with federal, state, county and municipal governments. In addition, knowledge, skills and attitudes acquired in this course of study qualify one for job opportunities with private enterprise in such areas as industrial, retail physical, cyber, and private security.

Culinary Arts CTE Pathway (C55150CP)

This curriculum provides specific training required to prepare students to assume positions as trained culinary professionals in a variety of foodservice settings including full service restaurants, hotels, resorts, clubs, catering operations, contract food service and health care facilities. Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism.

Courses include sanitation/safety, baking, garde manger, culinary fundamentals/production skills, nutrition, customer service, purchasing/cost control, and human resource management.

Graduates should qualify for entry-level opportunities including prep cook, line cook, and station chef. American Culinary Federation certification may be

available to graduates. With experience, graduates may advance to positions including sous chef, pastry chef, executive chef, or foodservice manager.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Social/Behavioral Science Electives

Take 3 credits:

HIS 132 - American History II **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Major Requirements(30 credits)

Take 21 credits:

CUL 110 - Sanitation & Safety **Credits: 2**

CUL 140 - Culinary Skills I **Credits: 5**

CUL 160 - Baking I **Credits: 3**

CUL 170 - Garde Manger I **Credits: 3**

CUL 240 - Culinary Skills II **Credits: 5**

HRM 245 - Human Resource Mgmt-Hosp **Credits: 3**

Customer Service

Take either

CUL 135 - Food & Beverage Service **Credits: 2**

or take

HRM 124 - Guest Service Management **Credits: 3**

Nutrition

Take 3 credits:

CUL 112 - Nutrition for Foodservice **Credits: 3**

NUT 110 - Nutrition **Credits: 3**

Purchasing/Cost Control

Take either

CUL 120 - Purchasing **Credits: 2**

or take

HRM 260 - Procurement for Hosp **Credits: 3**

Work Based Learning Elective

Take 2 Credits:

WBL 111 - Work-Based Learning I **Credits: 1**

WBL 112 - Work-Based Learning I **Credits: 2**

WBL 121 - Work-Based Learning II **Credits: 1**

Other Major Requirements (22 credits)

Take 12 credits:

CIS 111 - Basic PC Literacy **Credits: 2**

CUL 110A - Sanitation & Safety Lab **Credits: 1**

CUL 130 - Menu Design **Credits: 2**

CUL 150 - Food Science **Credits: 2**

HRM 220 - Cost Control-Food & Bev **Credits: 3**

HRM 220A - Cost Control-Food & Bev Lab **Credits: 1**

WBL 115 - Work-Based Learning Seminar I **Credits: 1**

Culinary Electives I

Take 5 credits:

- CUL 230 - Global Cuisines **Credits: 5**
- CUL 245 - Contemporary Cuisines **Credits: 5**
- CUL 250 - Classical Cuisine **Credits: 5**

Culinary Electives II

Take 5 credits:

CUL 120A Purchasing Lab

Credits / Units: 1

CUL 135A Food and Beverage Serv Lab

Credits / Units: 1

- CUL 214 - Wine Appreciation **Credits: 2**
- CUL 260 - Baking II **Credits: 3**
- CUL 270 - Garde Manger II **Credits: 3**
- CUL 275 - Catering Cuisine **Credits: 5**
- CUL 280 - Pastry & Confections **Credits: 3**
- CUL 283 - Farm-To-Table **Credits: 5**
- CUL 285 - Competition Fundamentals **Credits: 3**
- HRM 225 - Beverage Management **Credits: 3**

Cyber Crime Technology, A.A.S (A55210)

This curriculum will prepare students to enter the field of computer crime investigations and private security. Students completing this curriculum will be capable of investigating computer crimes, properly seize and recover computer evidence and aid in the prosecution of cyber criminals. Course work in this curriculum will include a division of work in the disciplines of criminal justice and computer information systems. Additionally, students will be required to take specific cyber crime classes. Graduates should qualify to become computer crime investigators for local or state criminal justice agencies. Also these graduates should be competent to serve as computer security specialists or consultants with private business.

Dental Assisting Diploma (D45240)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Dental Assisting curriculum prepares individuals to assist the dentist in the delivery of dental treatment and to function as integral members of the dental team while performing chairside and related office and laboratory procedures.

Course work includes instruction in general studies, biomedical sciences, dental sciences, clinical sciences, and clinical practice. A combination of lecture, laboratory, and clinical experiences provide students with knowledge in infection/hazard control, radiography, dental materials, preventive dentistry, and clinical procedures.

Graduates may be eligible to take the Dental Assisting National Board Examination to become Certified Dental Assistants. As a Dental Assistant II, defined by the Dental Laws of North Carolina, graduates work in dental offices and other related areas.

The program in Dental Assisting is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of accreditation without reporting requirements. The Commission is a specialized accrediting body recognized by the United States Department of Education.

The Commission on Dental Accreditation will review complaints that relate to a program's compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs, but it does not intervene on behalf of individuals or act as a court of appeal for individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of the appropriate accreditation standards and/or the Commission's policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611 or by calling 1-800-621-8099 extension 4653.

Note:

There are additional requirements for equipment, insurance, books, and vaccinations. These requirements and expenses are outlined in the Dental Assisting information packet, available upon admittance.

Dental Hygiene, A.A.S. (A45260)

This program has selective admission requirements. Contact the Health Sciences Enrollment Center for information and application deadlines.

The Dental Hygiene curriculum provides individuals with the knowledge and skills to assess, plan, implement, and evaluate dental hygiene care for the individual and the community.

Students will learn to prepare the operatory, take patient histories, note abnormalities, plan care, teach oral hygiene, clean teeth, take x-rays, apply preventive agents, complete necessary chart entries, and perform other procedures related to dental hygiene care.

Graduates of this program may be eligible to take national and state/regional examinations for licensure which are required to practice dental hygiene. Employment opportunities include dental offices, clinics, schools, public health agencies, industry, and professional education.

The program in dental hygiene is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of accreditation without reporting requirements. The Commission is a specialized accrediting body recognized by the United States Department of Education.

Students, faculty, constituent dental societies, state boards of dentistry, patients, and other interested parties may submit an appropriate, signed, formal complaint to the Commission on Dental Accreditation regarding the program. An appropriate complaint is one that directly addresses a program's compliance with the Commission's standards, policies, and procedures. The Commission is interested in the continued improvement and sustained quality of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for treatment received by patients or individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of the appropriate accreditation standards and/or the Commission's policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611 or by calling 1-312-440-4654.

Diesel and Heavy Equipment Technology, A.A.S. (A60460)

This curriculum provides training for individuals interested in becoming technicians who service and maintain the propulsion systems of boats and other types of marine and industrial equipment.

The course work includes the maintenance and repair procedures of mechanical, electrical, hydraulics equipment used on marine systems. Students will inspect and test equipment to determine the cause of faulty operation, and then repair and replace defective parts.

Graduates of the curriculum should qualify as marine technicians which may be employed in marinas, shipyards, industrial and trucking industries.

Early Childhood Education, B-K Licensure Transfer (A55220L)

The Early Childhood Education curriculum prepares individuals to work with children from birth through eight in diverse learning environments. Students will combine learned theories with practice in actual settings with young children under the supervision of qualified teachers.

Course work includes child growth and development; physical/nutritional needs of children; care and guidance of children; and communication skills with families and children. Students will foster the cognitive/language, physical/motor, social/emotional, and creative development of young children.

Graduates are prepared to plan and implement developmentally appropriate programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Head Start Programs, and school-age programs.

General Education Requirements (29 credits)

General Education

Early Childhood Education, Infant / Toddler Care Certificate(C55220IT)

The curriculum prepares individuals to work with children from infancy to three years of age in diverse learning environments. Students will combine learned theories, competency-based knowledge, and practice in actual settings with infants and toddlers.

Course work includes infant/toddler growth and development: physical/nutritional needs of infants and toddlers; safety issues in the care of infants and toddlers; care and guidance; communication skills with families and children; design an implementation of appropriate curriculum; and other related topics.

Graduates should be prepared to plan and implement developmentally appropriate infant/toddler programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Early Head Start Programs, and other infant/toddler programs.

Major Requirements

Technical Core

EDU 119 - Intro to Early Child Education **Credits: 4**
EDU 131 - Child, Family, and Community **Credits: 3**
EDU 144 - Child Development I **Credits: 3**

Electrical Systems Technology CTE Pathway (C35130CP)

This curriculum is designed to provide training for persons interested in the installation and maintenance of electrical systems found in residential, commercial, and industrial facilities.

Coursework, most of which is hands-on, will include such topics as AC/DC theory, basic wiring practices, programmable logic controllers, industrial motor controls, applications of the National Electric Code, and other subjects as local needs require.

Graduates should qualify for a variety of jobs in the electrical field as an on-the-job trainee or apprentice assisting in the layout, installation, and maintenance of electrical systems.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

ENG 111 - Writing and Inquiry **Credits: 3**

Summer Semester I

ALT 120 - Renewable Energy Tech **Credits: 3**
ELC 115 - Industrial Wiring **Credits: 4**
ELC 119 - NEC Calculations **Credits: 2**

Fall Semester II

ELC 121 - Electrical Estimating **Credits: 2**
ELC 128 - Intro to PLC **Credits: 3**
ELC 220 - Photovoltaic Sys Tech **Credits: 3**
ENG 114 - Prof Research & Reporting **Credits: 3**
HYD 110 - Hydraulics/Pneumatics I **Credits: 3**
Humanities/Fine Arts Elective **Credits: 3**

Spring Semester II

ELC 213 - Instrumentation **Credits: 4**

ELC 221 - Adv PV Sys Designs **Credits: 3**

ELC 228 - PLC Applications **Credits: 4**

Social/Behavioral Science Elective **Credits: 3**

Electronics Engineering Drone Systems CTE Pathway(C40200DP)

A course of study that prepares the students to apply basic engineering principles and technical skills to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems. Includes instruction in mathematics, basic electricity, solid-state fundamentals, digital concepts, and microprocessors or programmable logic controllers. Graduates should qualify for employment as electronics engineering technician, field service technician, instrumentation technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Major Requirements

Take 4 credits

ELC 131 - Circuit Analysis I **Credits: 4**

Other Major Requirements

Take 12 credits

ELN 152 - Fabrication Techniques **Credits: 2**

ELN 275 - Troubleshooting **Credits: 2**

UAS 110 - Intro to UAS Operations **Credits: 3**

UAS 111 - Unmanned Aircraft Systems **Credits: 3**

UAS 115 - Small UAS Certification **Credits: 2**

Total Credits: 16

Recommended Course Sequence

Fall Semester I

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 152 - Fabrication Techniques **Credits: 2**

Spring Semester I

ELN 275 - Troubleshooting **Credits: 2**

UAS 110 - Intro to UAS Operations **Credits: 3**

UAS 111 - Unmanned Aircraft Systems **Credits: 3**

UAS 115 - Small UAS Certification **Credits: 2**

Electronics Engineering Drone Systems(C40200DS)

A course of study that prepares the students to apply basic engineering principles and technical skills to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems. Includes instruction in mathematics, basic electricity, solid-state fundamentals, digital concepts, and microprocessors or programmable logic controllers. Graduates should qualify for employment as electronics engineering technician, field service technician, instrumentation technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Major Requirements

Take 4 credits

ELC 131 - Circuit Analysis I **Credits: 4**

Electronics Engineering Tech, LAN Cabling Technician Certificate (C40200L)

A course of study that prepares the students to apply basic engineering principles and technical skills to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls,

manufacturing systems, communication systems, and power electronic systems. Includes instruction in mathematics, basic electricity, solid-state fundamentals, digital concepts, and microprocessors or programmable logic controllers. Graduates should qualify for employment as electronics engineering technician, field service technician, instrumentation technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Major Requirements (4 credits)

ELC 131 - Circuit Analysis I **Credits: 4**

Other Major Requirements(6 credits)

ELN 152 - Fabrication Techniques **Credits: 2**

ELN 236 - Fiber Optics and Lasers **Credits: 4**

Other Required Courses (3 credits)

CET 125 - Voice and Data Cabling **Credits: 3**

Total Credits: 13

Recommended Course Sequence

Fall Semester I

ELN 152 - Fabrication Techniques **Credits: 2**

ELC 131 - Circuit Analysis I **Credits: 4**

Spring Semester I

CET 125 - Voice and Data Cabling **Credits: 3**

ELN 236 - Fiber Optics and Lasers **Credits: 4**

Electronics Engineering Technology Certificate (C40200)

The EET Certificate Program is designed for part-time students who want to learn the fundamentals of electricity, semiconductors, and the test equipment and troubleshooting procedures found in the field of Electronics. The certificate program can be completed in one year. Certificate students can always continue on to pursue the A.A.S. 2 year degree.

General Education Requirements

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Major Requirements

Technical Core

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 131 - Analog Electronics I **Credits: 4**

ELN 133 - Digital Electronics **Credits: 4**

Electronics Engineering Technology, A.A.S. (A40200)

The Electronics Engineering Technology curriculum prepares individuals to become technicians who build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and electronic systems.

A broad-based core of courses, including basic electricity, solid-state fundamentals, digital concepts, and microprocessors, ensures the student will develop the skills necessary to perform entry-level tasks. Emphasis is placed on developing the student's ability to analyze and troubleshoot electronic systems.

Graduates should qualify for employment as engineering assistants or electronic technicians with job titles such as electronics engineering technician, field service technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

General Education Requirements (15 credits)

Take 9 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**

HUM 115 - Critical Thinking **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

Emergency Management A.A.S (A55460)

The Emergency Management curriculum is designed to provide students with a foundation of technical and professional knowledge needed for emergency services delivery in local and state government

agencies. Study involves both management and technical aspects of law enforcement, fire protection, emergency medical services, and emergency planning.

Course work includes classroom and laboratory exercises to introduce the student to various aspects of emergency preparedness, protection, and enforcement. Students will learn technical and administrative skills such as investigative principles, hazardous materials, codes, standards, emergency agency operations, and finance.

Employment opportunities include ambulance services, fire/rescue agencies, law enforcement agencies, fire marshal offices, industrial firms, educational institutions, emergency management offices, and other government agencies. Employed persons should have opportunities for skilled and supervisory-level positions.

General Education Requirements (15 credits)

Communications

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts

Take 3 credits:

HUM 115 - Critical Thinking **Credits: 3**

Mathematics

Take 3 credits:

MAT 143 - Quantitative Literacy **Credits: 3**

Social/Behavioral Sciences

Take 3 credits:

Emergency Medical Science, A.A.S. (A45340)

The Emergency Medical Science curriculum provides individuals with the knowledge, skills and attributes to provide advanced emergency medical care as a paramedic for critical and emergent patients who access the emergency medical system and prepares graduates to enter the workforce.

Students will gain complex knowledge, competency, and experience while employing evidence based practice under medical oversight, and serve as a link from the scene into the healthcare system.

Graduates of this program may be eligible to take state and/or national certification examinations. Employment opportunities include providers of emergency medical services, fire departments, rescue agencies, hospital specialty areas, industry, educational and government agencies.

General Education Requirements (16 credits)

Esthetics Technology Certificate (C55230)

Uniforms and name tags are required at an additional cost.

Students will be required to meet all applicable requirements of the State Board of Cosmetic Arts Rules and Regulations for graduation and licensure.

The Esthetics Technology curriculum provides competency-based knowledge, scientific/artistic principles and hands-on fundamentals associated with the art of skin care. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional Esthetics Technology, business/human relations, product knowledge, and other related topics.

Graduates should be prepared to take the North Carolina Cosmetology State Board Licensing Exam and upon passing be licensed and qualify for employment in beauty and cosmetic/skin care salons, as a platform artist, and in related businesses.

Major Requirements

COS 119 - Esthetics Concepts I **Credits: 2**
COS 120 - Esthetics Salon I **Credits: 6**
COS 125 - Esthetics Concepts II **Credits: 2**
COS 126 - Esthetics Salon II **Credits: 6**

Total Credits: 16

Fall Semester I

FVP 111 - Intro. to Film and Video **Credits: 3**

FVP 112 - Art Dept Operations I **Credits: 3**

FVP 113 - Grip & Electrical I **Credits: 3**

FVP 114 - Camera & Lighting I **Credits: 3**

FVP 115 - Camera & Lighting II **Credits: 3**

FVP 116 - Sound Operations **Credits: 3**

FVP 120 - Art Dept. Operations II **Credits: 3**

FVP 212 - Production Techniques I **Credits: 5**

Other Major Requirements (9 credits)

Take 9 credits:

CIS 110 - Introduction to Computers **Credits: 3**

FVP 220 - Editing I **Credits: 3**

FVP 250 - Production Specialties I **Credits: 3**

Total Credits: 41

Fall Semester I

COM 120 - Intro Interpersonal Com **Credits: 3**

FVP 111 - Intro. to Film and Video **Credits: 3**

FVP 112 - Art Dept Operations I **Credits: 3**

FVP 113 - Grip & Electrical I **Credits: 3**
FVP 114 - Camera & Lighting I **Credits: 3**

Spring Semester I

CIS 110 - Introduction to Computers **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**
FVP 115 - Camera & Lighting II **Credits: 3**
FVP 116 - Sound Operations **Credits: 3**
FVP 120 - Art Dept. Operations II **Credits: 3**
FVP 250 - Production Specialties I **Credits: 3**

Summer Semester I

FVP 212 - Production Techniques I **Credits: 5**
FVP 220 - Editing I **Credits: 3**

Film and Video Production Technology, A.A.S. (A30140)

Note: Limited classes are offered in this program. Please check with Public Services Department Chair or Student Development.

The Film and Video Production Technology curriculum prepares students for entry-level employment in production support and selected technical areas of film, video, and associated media production. Instruction provides training for entry-level crew and/or production and post-production assistants in many moving image media forms.

The first year content includes exposure to the entire production process. Students are taught by industry professionals who provide extensive hands-on instruction. In the second year, students receive professional training by performing in various crew positions on actual production projects.

Graduates may find employment as entry-level crew and/or production assistants in feature and short films, commercials, and industrial, educational, and documentary productions. Other opportunities include entry-level employment in pre-production and post-production areas for film and video.

General Education Requirements

Required

COM 120 - Intro Interpersonal Com **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**

Math

MAT 143 - Quantitative Literacy **Credits: 3**

Humanities/Fine Arts Elective

HUM 160 - Introduction to Film **Credits: 3**

Social/Behavioral Science Electives

(Take 3 credits)

HIS 132 - American History II **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Major Requirements

FVP 111 - Intro. to Film and Video **Credits: 3**

FVP 112 - Art Dept Operations I **Credits: 3**

FVP 113 - Grip & Electrical I **Credits: 3**

FVP 114 - Camera & Lighting I **Credits: 3**

FVP 115 - Camera & Lighting II **Credits: 3**

FVP 116 - Sound Operations **Credits: 3**

FVP 120 - Art Dept. Operations II **Credits: 3**

FVP 130 - Grip and Electrical II **Credits: 3**

FVP 212 - Production Techniques I **Credits: 5**

FVP 213 - Production Techniques II **Credits: 5**

Other Major Requirements

Required

CIS 110 - Introduction to Computers **Credits: 3**

FVP 220 - Editing I **Credits: 3**

FVP 240 - Introduction to Screenwriting **Credits: 3**

FVP 250 - Production Specialties I **Credits: 3**

Film and Video Electives

(Take 6 credits)

DEA 111 - Introduction to DEAT **Credits: 3**

FVP 117 - Make-Up & Wardrobe **Credits: 3**

FVP 215 - Production Management **Credits: 3**
FVP 223 - Postproduct. Sound Design **Credits: 3**
FVP 227 - Multimedia Production **Credits: 3**
FVP 251 - Product. Specialities II **Credits: 3**
WBL 111V - Work-Based Learning I **Credits: 1**
WBL 115V - Work-Based Learning Seminar I **Credits: 1**

Total Credits: 67

Fall Semester I

ENG 111 - Writing and Inquiry **Credits: 3**
FVP 111 - Intro. to Film and Video **Credits: 3**
FVP 112 - Art Dept Operations I **Credits: 3**

Fire Protection Technology CTE Pathway (C55240CP)

The Fire Protection Technology curriculum is designed to provide students with knowledge and skills in the technical, managerial, and leadership areas necessary for advancement within the fire protection community and related firefighting industries, and to provide currently employed firefighters with knowledge and skills often required for promotional consideration.

Course work includes diverse fire protection subject areas, including fire prevention and safety, public education, building construction, fire ground strategies and tactics, and local government finance and laws, as they apply to emergency services management. Emphasis includes understanding fire characteristics and the structural consequences of fire; risk assessment and management; and relevant research, communications, and leadership methodologies.

Employment opportunities exist with fire departments, governmental agencies, industrial firms, insurance rating organizations, and educational organizations.

Required Courses (12 credits)

FIP 120 - Intro to Fire Protection **Credits: 3**

FIP 124 - Fire Prevention & Public Ed **Credits: 3**

FIP 132 - Building Construction **Credits: 3**

FIP 220 - Fire Fighting Strategies **Credits: 3**

Other Major Requirements (3 credits)

FIP 162 - Firefighter Safety & Wellness **Credits: 3**

Total Credits: 15

Fire Protection Technology, A.A.S. (A55240)

The Fire Protection Technology curriculum is designed to provide students with knowledge and skills in the technical, managerial, and leadership areas necessary for advancement within the fire protection community and related firefighting industries, and to provide currently employed firefighters with knowledge and skills often required for promotional consideration.

Course work includes diverse fire protection subject areas, including fire prevention and safety, public education, building construction, fire ground strategies and tactics, and local government finance and laws, as they apply to emergency services management. Emphasis includes understanding fire characteristics and the structural consequences of fire; risk assessment and management; and relevant research, communications, and leadership methodologies.

Employment opportunities exist with fire departments, governmental agencies, industrial firms, insurance rating organizations, and educational organizations.

General Education Requirements (15 credits)

Take 15 credits:

- ENG 111 - Writing and Inquiry **Credits: 3**
- ENG 114 - Prof Research & Reporting **Credits: 3**
- HUM 115 - Critical Thinking **Credits: 3**
- MAT 143 - Quantitative Literacy **Credits: 3**
- POL 120 - American Government **Credits: 3**

Major Requirements (18 credits)

Take 18 credits:

- FIP 120 - Intro to Fire Protection **Credits: 3**
- FIP 124 - Fire Prevention & Public Ed **Credits: 3**
- FIP 132 - Building Construction **Credits: 3**
- FIP 152 - Fire Protection Law **Credits: 3**
- FIP 220 - Fire Fighting Strategies **Credits: 3**
- FIP 228 - Local Govt Finance **Credits: 3**

Other Major Requirements (32 credits)

Take 32 credits:

- CIS 110 - Introduction to Computers **Credits: 3**
- EPT 140 - Emergency Management **Credits: 3**
- FIP 128 - Detection & Investigation **Credits: 3**
- FIP 136 - Inspections & Codes **Credits: 3**
- FIP 156 - Computers in Fire Svc **Credits: 2**
- FIP 162 - Firefighter Safety & Wellness **Credits: 3**
- FIP 164 - OSHA Standards **Credits: 3**
- FIP 221 - Adv Fire Fighting Strat **Credits: 3**
- FIP 240 - Fire Service Supervision **Credits: 3**

FIP 256 - Munic Public Relations **Credits: 3**
FIP 276 - Managing Fire Services **Credits: 3**

Total Credits: 65

Fall Semester I

ENG 111 - Writing and Inquiry **Credits: 3**
CIS 110 - Introduction to Computers **Credits: 3**
FIP 120 - Intro to Fire Protection **Credits: 3**
FIP 124 - Fire Prevention & Public Ed **Credits: 3**

Spring Semester I

FIP 152 - Fire Protection Law **Credits: 3**
FIP 240 - Fire Service Supervision **Credits: 3**
HUM 115 - Critical Thinking **Credits: 3**

FIP 220 - Fire Fighting Strategies **Credits: 3**

Spring Semester II

ENG 114 - Prof Research & Reporting **Credits: 3**
FIP 156 - Computers in Fire Svc **Credits: 2**
FIP 162 - Firefighter Safety & Wellness **Credits: 3**
FIP 221 - Adv Fire Fighting Strat **Credits: 3**
FIP 228 - Local Govt Finance **Credits: 3**

Summer Semester II

EPT 140 - Emergency Management **Credits: 3**

FIP 276 - Managing Fire Services **Credits: 3**

Health & Fitness - Exercise Science(A45630E)

General Education Requirements

Communications

Take 6 credits from the following courses:

COM 120 - Intro Interpersonal Com **Credits: 3**

ENG 111 - Writing and Inquiry **Credits: 3**

Humanities/Fine Arts

Take 3 credits from the following courses:

ART 111 - Art Appreciation **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

MUS 112 - Introduction to Jazz **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Beh Science

Take the following courses:

SOC 220 - Social Problems **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

Natural Science/Math

Take 1 course from the following:

MAT 171 - Precalculus Algebra **Credits: 4**

Major Requirements

Take the following courses:

BIO 155 - Nutrition **Credits: 3**

HEA 112 - First Aid & CPR **Credits: 2**

HFS 110 - Exercise Science **Credits: 4**

HFS 111 - Fitness & Exer Testing I **Credits: 4**
HFS 116 - Pvnt & Care Exer Injuries **Credits: 3**
HFS 118 - Fitness Facility Mgmt **Credits: 4**
HFS 120 - Group Exer Instruction **Credits: 3**
HFS 210 - Personal Training **Credits: 3**
HFS 212 - Exercise Programming **Credits: 3**
HFS 218 - Lifestyle Chng & Wellness **Credits: 4**

Anatomy & Physiology

BIO 168 - Anatomy and Physiology I **Credits: 4**
BIO 169 - Anatomy and Physiology II **Credits: 4**

Other Major Hours

Take the following courses:

ACA 122 - College Transfer Success **Credits: 1**
BIO 111 - General Biology I **Credits: 4**
PED 110 - Fit and Well for Life **Credits: 2**
PED 113 - Aerobics I **Credits: 1**
PED 117 - Weight Training I **Credits: 1**
PED 118 - Weight Training II **Credits: 1**
PED 119 - Circuit Training **Credits: 1**
PSY 271 - Sports Psychology **Credits: 3**
WBL 111 - Work-Based Learning I **Credits: 1**
WBL 115 - Work-Based Learning Seminar I **Credits: 1**

Total Credits: 76

Fall Semester I

ENG 111 - Writing and Inquiry **Credits: 3**
HFS 110 - Exercise Science **Credits: 4**
HFS 111 - Fitness & Exer Testing I **Credits: 4**
PED 110 - Fit and Well for Life **Credits: 2**
ACA 122 - College Transfer Success **Credits: 1**
SOC 220 - Social Problems **Credits: 3**

Spring Semester I

BIO 111 - General Biology I **Credits: 4**
HFS 116 - Pvnt & Care Exer Injuries **Credits: 3**
HFS 120 - Group Exer Instruction **Credits: 3**
PED 117 - Weight Training I **Credits: 1**
MAT 171 - Precalculus Algebra **Credits: 4**
PED Elective - Take 1 course
PED 113 - Aerobics I **Credits: 1**
or
PED 119 - Circuit Training **Credits: 1**

Summer Semester I

BIO 168 - Anatomy and Physiology I **Credits: 4**
PED 118 - Weight Training II **Credits: 1**
PSY 150 - General Psychology **Credits: 3**
HEA 112 - First Aid & CPR **Credits: 2**
HFS 210 - Personal Training **Credits: 3**
Students will be eligible to sit for the NASM Certified Personal Trainer Exam
Students will be eligible to sit for the AFAA Certified Group Fitness Instructor Exam

Fall Semester II

HFS 118 - Fitness Facility Mgmt **Credits: 4**
BIO 169 - Anatomy and Physiology II **Credits: 4**

Health & Fitness Science (A45630)

The Health and Fitness Science program is designed to provide students with the knowledge and skills necessary for employment in the fitness and exercise industry. Students will be trained in exercise science and be able to administer basic fitness tests and health risk appraisals, teach specific exercise and fitness classes and provide instruction in the proper use of exercise equipment and facilities. Graduates should qualify for employment opportunities in commercial fitness clubs, YMCA's/YWCA's, wellness programs in business and industry, Parks & Recreation Departments and other organizations implementing exercise & fitness programs.

General Education Requirements (Credits: 15-16)

Communications

Take 6 credits from the following courses:

ENG 111 - Writing and Inquiry **Credits: 3**

COM 120 - Intro Interpersonal Com **Credits: 3**

Humanities/Fine Arts

Take 3 credits from the following courses:

ART 111 - Art Appreciation **Credits: 3**

Healthcare Business Informatics CCP Certificate (C25510CP)

The Healthcare Business Informatics curriculum prepares individuals for employment as specialists in installation, data management, data archiving/retrieval, system design and support, and computer training for medical information systems.

Students learn about the field through multidisciplinary coursework including the study of terminology relating to informatics, systems analysis, networking technology, computer/network security, data warehousing, archiving and retrieval of information, and healthcare computer infrastructure support.

Graduates should qualify for employment as database/data warehouse analysts, technical support professionals, informatics technology professionals, systems analysts, networking and security technicians, and computer maintenance professionals in the healthcare field.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Required Courses (15 credits)

CTS 120 - Hardware/Software Support **Credits: 3**
HBI 110 - Issues and Trends in HBI **Credits: 3**
HBI 113 - Survey of Med Insurance **Credits: 3**
HMT 110 - Intro to Healthcare Mgt **Credits: 3**
MED 121 - Medical Terminology I **Credits: 3**

Other Major Requirements (3 credits)

CIS 111 - Basic PC Literacy **Credits: 2**

Total Credits: 17

Healthcare Business Informatics Diploma (D25510)

The Healthcare Business Informatics curriculum prepares individuals for employment as specialists in installation, data management, data archiving/retrieval, system design and support, and computer training for medical information systems.

Students learn about the field through multidisciplinary coursework including the study of terminology relating to informatics, systems analysis, networking technology, computer/network security, data warehousing, archiving and retrieval of information, and healthcare computer infrastructure support.

Graduates should qualify for employment as database/data warehouse analysts, technical support professionals, informatics technology professionals, systems analysts, networking and security technicians, and computer maintenance professionals in the healthcare field.

General Education Requirements

Hospitality Management CTE Pathway (C21510CP)

This curriculum prepares individuals to understand and apply the administrative and practical skills needed for supervisory and managerial positions in hotels, motels, resorts, inns, restaurants, institutions, and clubs.

Course work includes guest services, leadership, management, restaurant operations, lodging operations, marketing, sanitation, food preparation, food and beverage management and other critical areas.

Graduates should qualify for management or entry-level supervisory positions in food and lodging operations, including restaurants, foodservice, beverage service, catering, front office, reservations and housekeeping. Opportunities are also available in product services, and technology support and sales.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (14 credits)

CUL 110 - Sanitation & Safety **Credits: 2**

HRM 110 - Intro to Hosp & Tourism **Credits: 3**

HRM 220 - Cost Control-Food & Bev **Credits: 3**

HRM 240 - Marketing for Hospitality **Credits: 3**

HRM 245 - Human Resource Mgmt-Hosp **Credits: 3**

Other Required Hours (2 credits)

CUL 110A - Sanitation & Safety Lab **Credits: 1**

HRM 220A - Cost Control-Food & Bev Lab **Credits: 1**

Total Credits: 16

Human Services Technology (A45380)

The Human Services Technology curriculum prepares students for entry-level positions in institutions and agencies which provide social, community, and educational services. Along with core courses, students take courses which prepare them for specialization in specific human service areas.

Students will take courses from a variety of disciplines. Emphasis in core courses is placed on development of relevant knowledge, skills, and attitudes in human services. Fieldwork experience will provide opportunities for application of knowledge and skills learned in the classroom.

Graduates should qualify for positions in mental health, child care, family services, social services, rehabilitation, correction, and educational agencies. Graduates choosing to continue their education may select from a variety of transfer programs at senior public and private institutions.

Human Services Technology, Mental Health Certificate (C4538C)

The Human Services Technology/Addiction and Recovery Studies concentration prepares students to assist in drug and alcohol counseling, prevention-oriented educational activities, rehabilitation with recovering clients, managing community-based programs, counseling in residential facilities, and pursuit of four-year degrees.

Course work includes classroom and experiential activities oriented toward an overview of chemical dependency, psychological/sociological process, the twelve Core Functions, intervention techniques with individuals in groups, and follow-up activities with recovering clients.

Graduates should qualify for positions as substance abuse counselors, DWI counselors, halfway house workers, residential facility employees, and substance education specialists. With educational and clinical experiences, graduates can obtain certification by the North Carolina Addiction Specialist Professional Practice Board.

NOTES: *This certificate is designed for individuals who already hold a degree in a Human Services related field. Students are encouraged to meet with a Human Services Technology Faculty Advisor before registering for courses in the Addiction and Recovery Studies certificate. Upon completion of this certificate, students will be eligible to sit for Certification and/or Licensure for the North Carolina Addictions Specialists Professional Practice Board.*

Take 1 course:

SAB 215 - Arrest Test and Assess **Credits: 1**

HSE 170 - Recovery Services **Credits: 3**

Total Credits: 72-74 SHC

Recommended Course Sequence

Fall Semester I

ENG 111 - Writing and Inquiry **Credits: 3**

HSE 110 - Intro to Human Services **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SAB 110 - Substance Abuse Overview **Credits: 3**

Spring Semester I

ENG 114 - Prof Research & Reporting **Credits: 3**

HSE 112 - Group Process I **Credits: 2**

HSE 123 - Interviewing Techniques **Credits: 3**

HSE 125 - Counseling **Credits: 3**

SAB 120 - Intake and Assessment **Credits: 3**

Summer Semester I

HSE 210 - Human Services Issues **Credits: 2**

SAB 137 - Co-Dependency **Credits: 3**

SAB 210 - Addiction and Recovery Counsel **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Humanities /Fine Arts Elective **Credits / Units: 3**

Fall Semester II

PSY 241 - Developmental Psych **Credits: 3**

SAB 135 - Addictive Process **Credits: 3**

SAB 240 - Sab Issues in Client Serv **Credits: 3**

Required Subject Areas:

SOC 213 - Sociology of the Family **Credits: 3**

or

SOC 220 - Social Problems **Credits: 3**

WBL 111U - Work-Based Learning I **Credits: 1**

WBL 115U - Work-Based Learning Seminar I **Credits: 1**

Spring Semester II

HSE 225 - Crisis Intervention **Credits: 3**

MAT 110 - Math Measurement & Literacy **Credits: 3**

PSY 281 - Abnormal Psychology **Credits: 3**

SAB 125 - SA Case Management **Credits: 3**

WBL 121 - Work-Based Learning II **Credits: 1**

WBL 125 - Work-Based Learning Seminar II **Credits: 1**

SAB 215 - Arrest Test and Assess **Credits: 1**

or

HSE 170 - Recovery Services **Credits: 3**

Human Services Technology, Mental Health (A4538C)

The Human Services Technology/Mental Health concentration prepares students for job opportunities in the mental health field. The curriculum enables students to understand culturally and emotionally handicapped, developmentally disabled, or addicted clients through a variety of models and diagnoses.

Course work includes a history of the mental health movement, current developments and future trends, and theoretical models affecting individual development and behavior in a diverse client population. Fieldwork experiences provide opportunities for application of knowledge in agency and institutional settings.

Graduates should qualify for employment in mental health treatment centers serving a diverse multicultural client population in public and private settings. Graduates will work with individuals, families, groups, organizations, and communities in providing a therapeutic arena of care.

General Education Requirements (15 credits)

Communications

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**
ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts

Take 3 credits:

HUM 115 - Critical Thinking **Credits: 3**
PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

Take 3 credits:

PSY 241 - Developmental Psych **Credits: 3**

Natural Sciences/Math

Take 3 credits:

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (25 credits)

Take the following courses:

HSE 110 - Intro to Human Services **Credits: 3**
HSE 112 - Group Process I **Credits: 2**
HSE 123 - Interviewing Techniques **Credits: 3**
HSE 125 - Counseling **Credits: 3**
HSE 210 - Human Services Issues **Credits: 2**
HSE 225 - Crisis Intervention **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
PSY 281 - Abnormal Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Concentration Requirements (14 credits)

Take the following courses:

HSE 226 - Intellectual Disabilities **Credits: 3**
MHA 150 - Mental Health Systems **Credits: 3**
MHA 155 - Psychological Assessment **Credits: 3**

MHA 240 - Advocacy **Credits: 2**
PSY 265 - Behavioral Modification **Credits: 3**

Other Major Requirements (17 credits)

Take the following courses:

HSE 135 - Orientation Lab I **Credits: 1**
HSE 220 - Case Management **Credits: 3**
MHA 140 - Treatment Modalities **Credits: 3**
SAB 110 - Substance Abuse Overview **Credits: 3**
SWK 113 - Working With Diversity **Credits: 3**
WBL 111 - Work-Based Learning I **Credits: 1**
WBL 115 - Work-Based Learning Seminar I **Credits: 1**
WBL 125 - Work-Based Learning Seminar II **Credits: 1**
WBL 121 - Work-Based Learning II **Credits: 1**

Total Credits: 71 SHC

Recommended Course Sequence

Fall Semester I

ENG 111 - Writing and Inquiry **Credits: 3**
HSE 110 - Intro to Human Services **Credits: 3**
HSE 135 - Orientation Lab I **Credits: 1**
MHA 150 - Mental Health Systems **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SAB 110 - Substance Abuse Overview **Credits: 3**

Spring Semester I

HSE 112 - Group Process I **Credits: 2**
HSE 123 - Interviewing Techniques **Credits: 3**
HSE 125 - Counseling **Credits: 3**
MHA 155 - Psychological Assessment **Credits: 3**
ENG 114 - Prof Research & Reporting **Credits: 3**
HUM/FA Elective

Credits / Units: 3

Summer Semester I

HSE 210 - Human Services Issues **Credits: 2**
HSE 226 - Intellectual Disabilities **Credits: 3**

WBL 121 - Work-Based Learning II **Credits: 1**

Human Services Technology, Substance Abuse CTE Pathway Certificate (C4538ECP)

The Human Services Technology/Substance Abuse concentration prepares students to assist in drug and alcohol counseling, prevention-oriented educational activities, rehabilitation with recovering clients, managing community-based programs, counseling in residential facilities, and pursuit of four-year degrees.

Course work includes classroom and experiential activities oriented toward an overview of chemical dependency, psychological/sociological process, the twelve Core Functions, intervention techniques with individuals in groups, and follow-up activities with recovering clients.

Graduates should qualify for positions as substance abuse counselors, DUI counselors, halfway house workers, residential facility employees, and substance education specialists. With educational and clinical experiences, graduates can obtain certification by the North Carolina Substance Abuse Board.

Major Requirements (13 credits)

Take:

HSE 110 - Intro to Human Services **Credits: 3**
HSE 112 - Group Process I **Credits: 2**
HSE 123 - Interviewing Techniques **Credits: 3**
HSE 210 - Human Services Issues **Credits: 2**
HSE 225 - Crisis Intervention **Credits: 3**

Total Credits: 13

Information Technology, A.A.S. (A25590)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

General Education Requirements (15 - 16 credits)

English Requirement

Take 3 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

Communications Electives

Take 3 credits:

COM 110 - Introduction to Communication **Credits: 3**

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

HUM 115 - Critical Thinking **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Science Electives

Take 3 credits:

POL 120 - American Government **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Natural Sciences/Math

Take 3-4 credits:

MAT 121 - Algebra/Trigonometry I **Credits: 3**

MAT 171 - Precalculus Algebra **Credits: 4**

Major Requirements (12 credits)

Take 12 credits:

CTI 110 - Web, Pgm, & Db Foundation **Credits: 3**

CTI 120 - Network & Sec Foundation **Credits: 3**

CTS 115 - Info Sys Business Concepts **Credits: 3**

CTS 120 - Hardware/Software Support **Credits: 3**

Concentration Requirements (Take 6 credits)

Take 6 credits:

Systems Security

SEC 110 - Security Concepts **Credits: 3**

NET 125 - Introduction to Networks **Credits: 3**

Other Major Requirements (42 credits)

Information Technology Electives

Take 36 credits:

Students pursuing an Associate in Applied Science Degree in Information Technology have the option of completing a diploma in Information Technology at the same time provided that they choose the required IT Electives listed for the IT diploma of their choice. Please see your IT instructor or the Business Technologies Department Chair for more information and advising assistance.

CCT 250 - Network Vulnerabilities I **Credits: 3**

NET 126 - Switching and Routing **Credits: 3**

CET 245 - Internet Servers **Credits: 3**

CTI 240 - Virtualization Admin I **Credits: 3**

TNE 255 - Network Servers **Credits: 3**

OMT 156 - Problem-Solving Skills **Credits: 3**

Summer Semester I

CTI 241 - Virtualization Admin II **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

ELN 238 - Advanced LANs **Credits: 3**

COM 110 or

COM 120 or

COM 231

Information Technology, Systems Administration Certificate (C25590F)

The Information Technology (IT) Systems Administration Certificate includes development of core knowledge related to information support and services, network systems, and security foundations. The program will incorporate competencies of industry recognized certification exams.

Major Requirements

CTS 120 - Hardware/Software Support **Credits: 3**
CTI 120 - Network & Sec Foundation **Credits: 3**

Other Major Requirements

CET 130 - Operating System Prin **Credits: 3**
CET 245 - Internet Servers **Credits: 3**
TNE 255 - Network Servers **Credits: 3**

Other Required Courses

CTS 220 - Adv Hard/Software Support **Credits: 3**

Total Credits: 18

Fall Semester I

CTS 120 - Hardware/Software Support **Credits: 3**
CET 130 - Operating System Prin **Credits: 3**
CTI 120 - Network & Sec Foundation **Credits: 3**

Spring Semester I

CET 245 - Internet Servers **Credits: 3**
CTS 220 - Adv Hard/Software Support **Credits: 3**
TNE 255 - Network Servers **Credits: 3**

Information Technology, Web Designer Certificate (C25590W)

The Information Technology (IT) Web Designer Certificate includes development of core knowledge related to interactive media programming and design. The program will incorporate competencies of industry recognized certification exams.

Major Hours

Core

CTI 110 - Web, Pgm, & Db Foundation **Credits: 3**
DME 110 - Intro to Digital Media **Credits: 3**
WEB 111 - Intro to Web Graphics **Credits: 3**
WEB 115 - Web Markup and Scripting **Credits: 3**

WEB 210 - Web Design **Credits: 3**
WEB 213 - Internet Mkt & Analytics **Credits: 3**

Total Semester Hours: 18

Fall Semester I

CTI 110 - Web, Pgm, & Db Foundation **Credits: 3**
WEB 115 - Web Markup and Scripting **Credits: 3**
DME 110 - Intro to Digital Media **Credits: 3**

Spring Semester I

WEB 111 - Intro to Web Graphics **Credits: 3**
WEB 210 - Web Design **Credits: 3**
WEB 213 - Internet Mkt & Analytics **Credits: 3**

Interior Design Certificate(C30220)

The Interior Design curriculum is designed to prepare students for a variety of job opportunities in the field of both residential and non-residential interior design. The focus of the studies is technical knowledge, professional practices, and aesthetic principles and design process.

Curriculum content includes residential and non-residential interior design, architectural drafting, computer-aided design, and universal design. Also included are basic design, code standards, history of interiors and furnishings, color theory, products, professional practices, visual presentations, and sustainable principles.

Graduates should qualify for interior design opportunities in numerous residential and commercial environments such as hospitality, corporate, mercantile, educational, and healthcare. Interior designers also have employment opportunities in real estate, entertainment, visual merchandising, government, sales and marketing, and other specialties dealing with interiors.

Major Requirements (13 credits)

Required Courses

Take 13 credits:

DES 110 - Architectural Graphics **Credits: 2**
DES 120 - CAD for Interior Design **Credits: 2**
DES 125 - Visual Presentation I **Credits: 2**
DES 135 - Prin & Elem of Design I **Credits: 4**

DES 220 - Interior Design Fundamentals **Credits: 3**

Total Credits: 13

Fall Semester I

DES 110 - Architectural Graphics **Credits: 2**

DES 125 - Visual Presentation I **Credits: 2**

DES 135 - Prin & Elem of Design I **Credits: 4**

Spring Semester I

DES 120 - CAD for Interior Design **Credits: 2**

DES 220 - Interior Design Fundamentals **Credits: 3**

Interior Design CTE Pathway (C30220CP)

Interpreter Education, A.A.S. (A55300)

The Interpreter Education curriculum prepares individuals to work as entry-level Sign Language Interpreters who will provide communication access in interview and interactive settings. In addition, this curriculum provides in-service training for working interpreters who want to upgrade their skills.

Course work includes the acquisition of American Sign Language (ASL); grammar, structure, and sociolinguistic properties; cognitive processes associated with interpretation between ASL and English; the structure and character of the deaf community; and acquisition of consecutive and simultaneous interpreting skills.

Entry-level jobs for para-professional interpreters are available in educational systems or a variety of community settings. Individuals may choose from part-time, full-time, or self-employment/freelance positions or apply language skills to other human service related areas.

General Education Requirements (15 credits)

English

Take 3 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

Communications

Take 3 credits:

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

HUM 115 - Critical Thinking **Credits: 3**

Social/Behavioral Science Electives

Take 3 credits:

HIS 132 - American History II **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Natural Sciences/Math

Take 3 credits:

MAT 143 - Quantitative Literacy **Credits: 3**

Major Requirements (33 credits)

ASL 111 - Elementary ASL I **Credits: 3**

ASL 112 - Elementary ASL II **Credits: 3**

ASL 211 - Intermediate ASL I **Credits: 3**

ASL 250 - Linguistics of ASL **Credits: 3**

IPP 111 - Intro to Interpretation **Credits: 3**

IPP 112 - Comparative Cultures **Credits: 3**

IPP 152 - ASL/English Translation **Credits: 3**

IT Systems Administration CTE Pathway (C25590FP)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

Technical Core (12 credits)

CTI 120 - Network & Sec Foundation **Credits: 3**
CTS 120 - Hardware/Software Support **Credits: 3**
CTS 220 - Adv Hard/Software Support **Credits: 3**

DBA 210 - Database Administration **Credits: 3**

Total Credits: 12

Fall Semester

CTS 120 - Hardware/Software Support **Credits: 3**

CTI 120 - Network & Sec Foundation **Credits: 3**

Spring Semester

CTS 220 - Adv Hard/Software Support **Credits: 3**

DBA 210 - Database Administration **Credits: 3**

Landscape Gardening & Horticulture Science Certificate (C15260)

Major Requirements (8 Credits)

Required

Take 8 credits:

HOR 160 - Plant Materials I **Credits: 3**

HOR 164 - Hort Pest Management **Credits: 3**

LSG 121 - Fall Gardening Lab **Credits: 2**

Other Major Requirements

HOR 162 - Applied Plant Science **Credits: 3**

TRF 110 - Intro Turfgrass Cult & ID **Credits: 4**

Total Credits: 15

Fall Semester I

HOR 160 - Plant Materials I **Credits: 3**

LSG 121 - Fall Gardening Lab **Credits: 2**

TRF 110 - Intro Turfgrass Cult & ID **Credits: 4**

Landscape Gardening and Horticultural Science A.A.S. (A15260)

Landscape Gardening curriculum is designed to prepare individuals for various careers in horticulture. Classroom instruction and practical laboratory applications of horticultural principles and practices are included in the program of study.

Course work includes plant identification, pest management, plant science and soil science. Also included are courses in sustainable plant production and management, landscaping, and the operation of horticulture businesses.

Graduates should qualify for employment in a variety of positions associated with nurseries, garden centers, greenhouses, landscape operations, governmental agencies/parks, golf courses, sports complexes, highway vegetation, turf maintenance companies, and private and public gardens. Graduates should also be prepared to take the North Carolina Pesticide Applicator's Examination and/or the North Carolina Certified Plant Professional Examination.

Landscape Gardening: A program that prepares individuals to manage and maintain indoor and/or outdoor ornamental and recreational plants and groundcovers and related conceptual designs established by landscape architects, interior designers, enterprise owners or managers, and individual clients. Potential course work includes instruction in applicable principles of horticulture, gardening, plant and soil irrigation and nutrition, turf maintenance, plant maintenance, equipment operation and maintenance, personnel supervision, and purchasing.

General Education Requirements Credits: 15

Take 9 credits.

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

MAT 110 - Math Measurement & Literacy **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits.

Landscape Gardening, Horticulture Production Certificate (C15260HP)

A program that focuses on the general production and management of cultivated plants, shrubs, flowers, foliage, trees, groundcovers, and related plant materials; the management of technical and business operations connected with horticultural services; and the basic scientific principles needed to understand plants and their management and care.

Required Courses (15 credits)

HOR 124 - Nursery Operations **Credits: 3**
HOR 134 - Greenhouse Operations **Credits: 3**
HOR 162 - Applied Plant Science **Credits: 3**
HOR 164 - Hort Pest Management **Credits: 3**
HOR 168 - Plant Propagation **Credits: 3**

Total Credits: 15

Recommended Course Sequence

Fall Semester I

HOR 124 - Nursery Operations **Credits: 3**
HOR 162 - Applied Plant Science **Credits: 3**
HOR 168 - Plant Propagation **Credits: 3**

Spring Semester I

HOR 134 - Greenhouse Operations **Credits: 3**
HOR 164 - Hort Pest Management **Credits: 3**

Landscape Gardening, Retention Pond Management Certificate (C15260R)

The Retention Pond Management Certificate Program provides a heavy concentration of hands-on retention pond management experience using retention ponds at the CFCC North Campus. Students will learn how to select aquatic and wetland plants for use around a retention pond including planting, fertilization and pruning. Students will also learn the basics of aquatic and wetland weed management and pest control and will receive the North Carolina Commercial Aquatic Pest Control license and the Commercial Pesticide Ground Applicators license.

Major Requirements

Plant Identification

HOR 160 - Plant Materials I **Credits: 3**

Pest Management

HOR 164 - Hort Pest Management **Credits: 3**

Horticulture Technology

HOR 162 - Applied Plant Science **Credits: 3**

Landscape Gardening

LSG 121 - Fall Gardening Lab **Credits: 2**

LSG 122 - Spring Gardening Lab **Credits: 2**

Total Credits: 13

Fall Semester I

HOR 160 - Plant Materials I **Credits: 3**

LSG 121 - Fall Gardening Lab **Credits: 2**

HOR 162 - Applied Plant Science **Credits: 3**

Spring Semester I

HOR 164 - Hort Pest Management **Credits: 3**

LSG 122 - Spring Gardening Lab **Credits: 2**

Landscape Gardening, Sustainable Gardening Certificate (C15260S)

These curricula are designed to prepare individuals for various careers in horticulture. Landscape Gardening, Sustainable Gardening CTE Pathway(C15260SP)

These curricula are designed to prepare individuals for various careers in horticulture. Classroom instruction and practical laboratory applications of horticultural principles and practices are included in the program of study. Course work includes plant identification, pest management, plant science and soil science. Also included are courses in sustainable plant production and management, landscaping, and the operation of horticulture businesses. Graduates should qualify for employment in a variety of positions associated with nurseries, garden centers, greenhouses, landscape operations, governmental agencies/parks, golf courses, sports complexes, highway vegetation, turf maintenance companies, and private and public gardens. Graduates should also be prepared to take the North Carolina Pesticide Applicator's Examination and/or the North Carolina Certified Plant Professional Examination.

Major Requirements

Pest Management

HOR 164 - Hort Pest Management **Credits: 3**

Horticulture Technology

HOR 162 - Applied Plant Science **Credits: 3**

Landscape Gardening

HOR 134 - Greenhouse Operations **Credits: 3**

LSG 121 - Fall Gardening Lab **Credits: 2**

Other Major Requirements

AGR 139 - Intro to Sustainable Ag **Credits: 3**

Total Credit Hours: 14

Marine Technology Certificate CTE Pathway (C15320CP)

These curricula prepare individuals for a variety of marine-related occupations such as marine conservation, water analysis, marine scientific research support and commercial fishing. Individuals will be prepared as naturalists within the ecotourism industry and be trained in observational and measurement techniques aboard a variety of vessels including ocean-going research vessels.

Course work includes a unique blend of traditional and contemporary vocational, technical, and scientific marine education. Course work specific for Marine Sciences includes instruction in biological sciences, environmental sciences, and marine sciences. Field and laboratory experiences prepare students to identify, observe, and collect scientific data associated with the fauna and flora found in the rivers, estuaries, sounds, and ocean. Course work in Marine Technologies includes instruction in the use of physical, chemical, meteorological, biological, and geological oceanographic instrumentation and sampling equipment.

Graduates are prepared for employment opportunities with aquariums, fisheries, corps of engineers, marine patrol, ecotourism companies, commercial fishing industries, entry-level field or laboratory positions with industries, state and federal agencies, and educational facilities associated with marine science and research. Career opportunities include oceanography, environmental science, marine biology, geophysical exploration, and fisheries-related employment.

Marine Technology: A program that provides the practical and academic skills essential for success in marine scientific support. Training in the operation and maintenance of seismic and hydrographic instrumentation including: side scan sonar, multibeam echo sounders, and sub-bottom profilers is provided in the classroom and underway at sea. Additional course work includes: classic and digital navigation techniques, practical applications of boat handling, seamanship, marlinspike seamanship, and safety at sea. Instruction applicable to fisheries science and environmental assessment is provided.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

MSC 172 - Marine Biology **Credits: 3**

Spring Semester I

MSC 150 - Marine Navigation **Credits: 3**
MSC 276 - Marine Vertebrate Zoo **Credits: 4**

Marine Technology, A.A.S. (A15320)

Marine Technology students are required, for completion of their degree, to complete 5 separate training cruises. During these cruises students should not be excused from assignments and tests but are required to arrange makeups with

faculty well in advance of departure. If the faculty maintains a graded attendance policy, cruises should be treated as an excused absence and not be punitive.

These curricula prepare individuals for a variety of marine-related occupations such as marine conservation, water analysis, marine scientific research support and commercial fishing. Individuals will be prepared as naturalists within the ecotourism industry and be trained in observational and measurement techniques aboard a variety of vessels including ocean-going research vessels. Course work includes a unique blend of traditional and contemporary vocational, technical, and scientific marine education. Course work specific for Marine Sciences includes instruction in biological sciences, environmental sciences, and marine sciences. Field and laboratory experiences prepare students to identify, observe, and collect scientific data associated with the fauna and flora found in the rivers, estuaries, sounds, and ocean. Course work in Marine Technologies includes instruction in the use of physical, chemical, meteorological, biological, and geological oceanographic instrumentation and sampling equipment. Graduates are prepared for employment opportunities with aquariums, fisheries, corps of engineers, marine patrol, ecotourism companies, commercial fishing industries, entry-level field or laboratory positions with industries, state and federal agencies, and educational facilities associated with marine science and research. Career opportunities include oceanography, environmental science, marine biology, geophysical exploration, and fisheries-related employment.

Marine Technology: A program that provides the practical and academic skills essential for success in marine scientific support. MSC 220 - Marine GIS **Credits: 3**

MSC 254 - Marine Data Processing **Credits: 2**

MSC 256 - Cartogr/Hydro Surveying **Credits: 2**

Note:

As a student participating on training cruises in the Marine Technology program at Cape Fear Community College, all students must have a licensed physician complete a physical in addition to passing a drug screen (documentation is available in the MT department office). This exam and test will be conducted at the student's expense.

The physical will be valid for the two years that the student is enrolled in the program. After this time period the student will be required to complete another physical if the training cruises are not completed.

If a student demonstrates behavior causing concern as to alcohol or drug use they will be required to submit to an immediate drug screening at his/her expense. Failure to comply or evidence of drug or alcohol in a screening test will result in revocation of training cruise participation for 1 year. After this time, the student must submit a clean drug test for consideration.

Mechanical Engineering Technology Certificate CTE Pathway (C40320CP)

A course of study that prepares the students to use basic engineering principles and technical skills to design, develop, test, and troubleshoot projects involving mechanical systems. Includes instruction in principles of mechanics, applications to specific engineering systems, design testing procedures, prototype and operational testing and inspection procedures, manufacturing system-testing procedures, test equipment operation and maintenance, computer applications, critical thinking, planning and problem solving, and oral and written communications. Graduates of the curriculum will find employment opportunities in the manufacturing or service sectors of engineering technology. Engineering technicians may obtain professional certification by application to organizations such as ASQC, SME, and NICET.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Mechanical Engineering Technology, A.A.S. (A40320)

The Mechanical Engineering Technology curriculum prepares graduates for employment as technicians in the diversified mechanical and manufacturing engineering fields. Mechanical Engineering technicians assist in design, development, testing, process design and improvement, and troubleshooting and repair of engineered systems. Emphasis is placed on the integration of theory and hands-on application of engineering principles.

In addition to course work in engineering graphics, engineering fundamentals, materials and manufacturing processes, mathematics, and physics, students will study computer applications, critical thinking, planning and problem solving, and oral and written communications.

Graduates of the curriculum will find employment opportunities in the manufacturing or service sectors of engineering technology. Engineering technicians may obtain professional certification by application to organizations such as ASQ, SME, and NICET.

Mechatronics Engineering Technology Automation CCP (C40350MP)

A course of study that prepares the students to use basic engineering principles and technical skills in developing and testing automated, servomechanical, and other electromechanical systems. Includes instruction in prototype testing, manufacturing and operational testing, systems analysis and maintenance procedures. Graduates should be qualified for employment in industrial maintenance and manufacturing including assembly, testing, startup, troubleshooting, repair, process improvement, and

control systems, and should qualify to sit for Packaging Machinery Manufacturers Institute (PMMI) mechatronics or similar industry examinations.

Medical Assisting A.A.S. (A45400)

The Medical Assisting curriculum prepares multi-skilled health care professionals qualified to perform administrative, clinical, and laboratory procedures.

Course work includes instruction in scheduling appointments, coding and processing insurance accounts, billing, collections, computer operations; assisting with examinations/treatments, performing routine laboratory procedures, electrocardiography, supervised medication administration; and ethical/legal issues associated with patient care.

Graduates of CAAHEP-accredited medical assisting programs may be eligible to sit for the American Association of Medical Assistants' Certification Examination to become Certified Medical Assistants.

Employment opportunities include physicians' offices, health maintenance organizations, health departments, and hospitals.

General Education Requirements (15 credits)

Communications

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

Take 3 credits from:

COM 120 - Intro Interpersonal Com **Credits: 3**

or

COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts

Take 3 credits:

HUM 115 - Critical Thinking **Credits: 3**

or

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

Take 3 credits:

PSY 150 - General Psychology **Credits: 3**

Natural Science/Math

Take 3 credits:

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (32 credits)

Required Courses

Take 20 credits:

MED 110 - Orientation to Med Assist **Credits: 1**

MED 130 - Admin Office Proc I **Credits: 2**

MED 131 - Admin Office Proc II **Credits: 2**
MED 140 - Exam Room Procedures I **Credits: 5**
MED 150 - Laboratory Procedures I **Credits: 5**
MED 260 - MED Clinical Practicum **Credits: 5**

Required Subject Areas

Take 12 credits:

MED 116 - Introduction to A & P **Credits: 4**
MED 118 - Medical Law and Ethics **Credits: 2**
MED 121 - Medical Terminology I **Credits: 3**
MED 122 - Medical Terminology II **Credits: 3**

Other Major Requirements (20-21 credits)

Other Major Requirements

Take 15 credits:

MED 264 - Med Assisting Overview **Credits: 2**
MED 270 - Symptomatology **Credits: 3**
MED 272 - Drug Therapy **Credits: 3**
MED 136 - Preventive Health **Credits: 2**
MED 276 - Patient Education **Credits: 2**
MED 274 - Diet Therapy/Nutrition **Credits: 3**

Computer Competency

Take 1 course:

CIS 110 - Introduction to Computers **Credits: 3**
CIS 111 - Basic PC Literacy **Credits: 2**

Other Major Requirements

Take 3 credits:

SPA 120 - Spanish for the Workplace **Credits: 3**

Total Credits: 67-68 SHC

Recommended Course Sequence

Fall Semester I

ENG 111 - Writing and Inquiry **Credits: 3**
MED 110 - Orientation to Med Assist **Credits: 1**
MED 116 - Introduction to A & P **Credits: 4**
MED 118 - Medical Law and Ethics **Credits: 2**
MED 121 - Medical Terminology I **Credits: 3**
MED 130 - Admin Office Proc I **Credits: 2**
MED 131 - Admin Office Proc II **Credits: 2**

Spring Semester I

MAT 110 - Math Measurement & Literacy **Credits: 3**
MED 122 - Medical Terminology II **Credits: 3**
MED 140 - Exam Room Procedures I **Credits: 5**

Medical Laboratory Technology (A45420)

The Medical Laboratory Technology curriculum prepares individuals to perform clinical laboratory procedures in chemistry, hematology, microbiology, and immunohematology that may be used in the maintenance of health and diagnosis/treatment of disease. Course work emphasizes mathematical and scientific concepts related to specimen collection, laboratory testing and procedures, quality assurance and reporting/recording and interpreting findings involving tissues, blood, and body fluids. Graduates may be eligible to take the examination given by the Board of Certification of the American Society for Clinical Pathology. Employment opportunities include laboratories in hospitals, medical offices, industry, and research facilities.

General Education Requirements Credits: 15

Communications

Take 6 credits

Medical Office Administration Certificate CTE Pathway (C25310CP)

The Medical Office Administration curriculum prepares individuals for employment as medical administrative personnel in the areas of medical office, medical billing and coding, dental office, patient services, and medical documents.

Course work includes medical terminology, computer applications, medical office management, medical coding, medical insurance and billing, medical legal and ethical issues, oral and written communication, and other topics depending on the subject area selected within this curriculum.

Graduates should qualify for employment opportunities in a variety of medical office positions in medical and dental offices, hospitals, insurance companies, laboratories, medical supply companies, and other healthcare related organizations. Upon graduation, students may be eligible to sit for industry recognized certification exams.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (17 credits)

Computers/Information Systems

CIS 110 - Introduction to Computers **Credits: 3**

Medical Terminology

MED 121 - Medical Terminology I **Credits: 3**

MED 122 - Medical Terminology II **Credits: 3**

Office Administration

OST 149 - Medical Legal Issues **Credits: 3**

MED 121 - Medical Terminology I **Credits: 3**

MED 122 - Medical Terminology II **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

Spring Semester I

OST 149 - Medical Legal Issues **Credits: 3**

BIO 163 - Basic Anat & Physiology **Credits: 5**

Medical Office Administration, A.A.S. (A25310)

This curriculum prepares individuals for employment in medical and other health-care related offices.

Course work will include medical terminology; information systems; office management; medical coding, billing and insurance; legal and ethical issues; and formatting and word processing.

Students will learn administrative and support functions and develop skills applicable in medical environments. Employment opportunities are available in medical and dental offices, hospitals, insurance companies, laboratories, medical supply companies, and other health-care related organizations.

Medical Sonography, A.A.S. (A45440)

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of The Joint Review Committee on Education in Diagnostic Medical Sonography. The CAAHEP address is 9355-113th St. N, #7709 Seminole, Florida 33775 Phone: 727-210-2350

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Medical Sonography curriculum provides knowledge and clinical skills in the application of high frequency sound waves to image internal body structures. The goal of the Medical Sonography Program is to prepare competent medical sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Course work includes physics, cross-sectional anatomy, abdominal, introductory vascular, and obstetrical/gynecological sonography. Competencies are attained in identification of normal anatomy and pathological processes, use of equipment, fetal growth and development, integration of related imaging, and patient interaction skills.

Graduates of accredited programs are eligible to take National Registry Examinations in ultrasound physics and instrumentation and specialty examinations administered by the American Registry of Diagnostic Medical Sonographers. Graduates may find employment in clinics, physicians' offices, mobile services, equipment manufacturers, hospitals, and educational institutions.

Nuclear Technology CCP Pathway (C50460CP)

The Nuclear Technology curriculum prepares individuals to become qualified reactor field technicians who are employed by licensed nuclear reactor facilities.

Course work includes theory and application related to industrial and engineering technology disciplines including nuclear reactor theory, reactor systems, industrial and nuclear safety, instrumentation, electrical generation, automation and robotics, and may include quality control, welding, and various metallurgical inspection procedures.

Upon completion, graduates should qualify as entry-level nuclear reactor technicians and have academic preparations to advance into other industrial or engineering technician positions within the commercial nuclear power industry.

Required Courses (13 Credits)

CIS 110 - Introduction to Computers **Credits: 3**

HYD 110 - Hydraulics/Pneumatics I **Credits: 3**

NUC 110 - Nuclear Reactor Systems **Credits: 3**

WLD 112 - Basic Welding Processes **Credits: 2**

WLD 143 - Welding Metallurgy **Credits: 2**

Total Credits: 13

Nuclear Technology, A.A.S. (A50460)

The Nuclear Technology curriculum prepares individuals to become qualified reactor field technicians who are employed by licensed nuclear reactor facilities.

Course work includes theory and application related to industrial and engineering technology disciplines including nuclear reactor theory, reactor systems, industrial and nuclear safety, instrumentation, electrical generation, automation and robotics, and may include quality control, welding, and various metallurgical inspection procedures.

Upon completion, graduates should qualify as entry-level nuclear reactor technicians and have academic preparations to advance into other industrial or engineering technician positions within the commercial nuclear power industry.

General Education Requirements (15 credits)

English (6 credits)

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts (3 credits)

HUM 115 - Critical Thinking **Credits: 3**

Natural Sciences/Math (3 credits)

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Social/Behavioral Science Electives (3 credits)

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

HIS 132 - American History II **Credits: 3**

Major Requirements (30 credits)

Required (27 credits)

Take:

HYD 110 - Hydraulics/Pneumatics I **Credits: 3**
ISC 130 - Intro to Quality Control **Credits: 3**
NUC 110 - Nuclear Reactor Systems **Credits: 3**
NUC 120 - Nuclear Reactor Theory **Credits: 4**
NUC 130 - Applied NDE-Nuclear **Credits: 2**
PHY 131 - Physics-Mechanics **Credits: 4**
PHY 132 - Physics-Elec & Magnetism **Credits: 4**
WLD 112 - Basic Welding Processes **Credits: 2**
WLD 143 - Welding Metallurgy **Credits: 2**

Computers (3 credits)

Take:

CIS 110 - Introduction to Computers **Credits: 3**

Other Major Requirements (19 credits)

Required Courses (13 credits)

Take:

ELC 131 - Circuit Analysis I **Credits: 4**
ISC 112 - Industrial Safety **Credits: 2**
ISC 121 - Envir Health & Safety **Credits: 3**
WBL 111 - Work-Based Learning I **Credits: 1**
MEC 111 - Machine Processes I **Credits: 3**

Nuclear Electives (6 credits)

Take 6 credits:

ATR 112 - Intro to Automation **Credits: 3**
ELC 213 - Instrumentation **Credits: 4**
ELC 230 - Wind & Hydro Power Sys **Credits: 3**
MEC 130 - Mechanisms **Credits: 3**

Engineering (3 credits)

Take:

EGR 115 - Intro to Technology **Credits: 3**

Total Credits: 67

Fall Semester I

CIS 110 - Introduction to Computers **Credits: 3**
EGR 115 - Intro to Technology **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**
ISC 112 - Industrial Safety **Credits: 2**
NUC 110 - Nuclear Reactor Systems **Credits: 3**
MAT 121 - Algebra/Trigonometry I **Credits: 3**

Spring Semester I

ELC 131 - Circuit Analysis I **Credits: 4**
HYD 110 - Hydraulics/Pneumatics I **Credits: 3**
Nuclear Technology Elective **Credits: 3**
Social Behavioral Elective **Credits: 3**

Summer I

PHY 131 - Physics-Mechanics **Credits: 4**
WLD 112 - Basic Welding Processes **Credits: 2**
Nuclear Technology Elective **Credits: 3**
ISC 121 - Envir Health & Safety **Credits: 3**

Fall Semester II

ENG 114 - Prof Research & Reporting **Credits: 3**
PHY 132 - Physics-Elec & Magnetism **Credits: 4**
NUC 120 - Nuclear Reactor Theory **Credits: 4**
HUM 115 - Critical Thinking **Credits: 3**

Spring Semester II

WBL 111N - Work-Based Learning I Nuc Tech **Credits: 1**

Summer II

ISC 130 - Intro to Quality Control **Credits: 3**
MEC 111 - Machine Processes I **Credits: 3**
NUC 130 - Applied NDE-Nuclear **Credits: 2**
WLD 143 - Welding Metallurgy **Credits: 2**

Note:

Actual course sequence may vary from that stated above depending upon prior college credits. Contact the Lead Instructor regarding individual schedule and course selections.

This program includes a cooperative work experience course at a nuclear power plant that requires students to meet Federal regulations for fitness for duty and access authorization. Prior to registering for WBL 111N, students must complete a process that supports the security criteria for their assigned nuclear plant that includes a background check, drug screen, and psychological assessment. The college has agreements with the service providers of this process and students will be charged a fee that totals about \$150. Please contact the Lead Instructor, Nuclear Technology for further details.

Nursing, A.A.S LPN to RN

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The LPN to RN hybrid option provides the Licensed Practical Nurse the opportunity to continue to study to become a Registered Nurse. This is a two-semester program involving a combination of online and in class instruction as well as a clinical component.

The LPN to RN curriculum provides individuals with the knowledge and skills to provide nursing care to clients and groups of clients throughout the lifespan in a variety of settings.

Graduates of this program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN), which is required for practice as a Registered Nurse. Employment opportunities include a wide variety of health care settings such as hospitals, long-term care facilities, clinics, physician's offices, industry, and community health agencies.

General Education Requirement

Required

BIO 168 - Anatomy and Physiology I **Credits: 4**

BIO 169 - Anatomy and Physiology II **Credits: 4**

ENG 111 - Writing and Inquiry **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

English

Take 3 credits:

ENG 112 - Writing/Research in the Disc **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts Elective

Take 3 credits:

- ART 111 - Art Appreciation **Credits: 3**
- ART 114 - Art History Survey I **Credits: 3**
- ART 115 - Art History Survey II **Credits: 3**
- HUM 115 - Critical Thinking **Credits: 3**
- MUS 110 - Music Appreciation **Credits: 3**
- MUS 112 - Introduction to Jazz **Credits: 3**
- PHI 215 - Philosophical Issues **Credits: 3**
- PHI 240 - Introduction to Ethics **Credits: 3**

LPN Requirements

- NUR 221 - LPN to ADN Concepts I **Credits: 9**
- NUR 223 - LPN to ADN Concepts II **Credits: 9**

Other Major Requirements

Required

- BIO 175 - General Microbiology **Credits: 3**
- PSY 241 - Developmental Psych **Credits: 3**

NUR 223 - LPN to ADN Concepts II **Credits: 9**

Nursing, A.A.S LPN Transition

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Nursing Transition Program provides the Licensed Practical Nurse the opportunity to continue to study to become a Registered Nurse by enrolling in the Associate Degree Nursing Transition Program.

The Associate Degree Nursing curriculum provides knowledge, skills, and strategies to integrate safety and quality into nursing care, to practice in a dynamic environment, and to meet individual needs which impact health, quality of life, and achievement of potential.

Course work includes and builds upon the domains of healthcare, nursing practice, and the holistic individual. Content emphasizes the nurse as a member of the interdisciplinary team providing safe, individualized care while employing evidence-based practice, quality improvement, and informatics.

Graduates of this program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN). Employment opportunities are vast within the global health care system and may include positions within acute, chronic, extended, industrial, and community health care facilities.

General Education Requirements

Required

BIO 168 - Anatomy and Physiology I **Credits: 4**

BIO 169 - Anatomy and Physiology II **Credits: 4**

Occupational Therapy Assistant, A.A.S. (A45500)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Occupational Therapy Assistant curriculum prepares individuals to work under the supervision of a registered/licensed occupational therapist in screening, assessing, planning, and implementing treatment and documenting progress for clients receiving occupational therapy services.

Course work includes human growth and development, conditions which interfere with activities of daily living, theory and process of occupational therapy, individual/group treatment activities, therapeutic use of self, activity analysis, and grading/adapting activities and environments.

Graduates may be eligible to take the national certification examination for practice as a certified occupational therapy assistant. Employment opportunities include hospitals, rehabilitation facilities, long-term/extended care facilities, sheltered workshops, schools, home health programs, and community programs. Successful completion of the program is required for certification and licensure.

The National Board of Certification in Occupational Therapy administers the national certification examination. The NBCOT is the certifying body for occupational therapy practitioners.

Total Credits: 74/75

The associate-degree-level occupational therapy assistant program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its Web address is www.acoteonline.org. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT).

After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Students in the OTA program must achieve a "C" or higher in each course within the curriculum in order to fulfill graduation requirements. OTA core courses cannot be taken out of sequence.

Level II fieldwork placements must be completed within 12 months of completion of the didactic course work.

Paralegal Technology CCP (C25380CP)

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Course work includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses also include subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

Major Requirements (14 Credits)

- LEX 110 - Intro to Paralegal Study **Credits: 2**
- LEX 120 - Legal Research/Writing I **Credits: 3**
- LEX 130 - Civil Injuries **Credits: 3**
- LEX 150 - Commercial Law I **Credits: 3**

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks, and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Coursework includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses also include subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

*Graduates of the A.A.S. program will be eligible to take the North Carolina Paralegal Certification Examination and the National Association of Legal Assistants (NALA) exam. Please contact the Paralegal Department for further information.

General Education Requirements (15 credits)

Take 9 credits:

- ENG 111 - Writing and Inquiry **Credits: 3**

Paralegal Technology, Elder Law Certificate (C25380E)

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Course work includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses also include subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

Note: Standing alone, the Elder Law Certificate does not qualify an applicant to sit for the NC Paralegal Certification Exam.

Required Courses (9 credits)

- LEX 210 - Real Property I **Credits: 3**
- LEX 240 - Family Law **Credits: 3**
- LEX 250 - Wills, Estates, & Trusts **Credits: 3**

Other Major Requirements (3 credits)

- LEX 280 - Ethics & Professionalism **Credits: 2**
- LEX 288 - Elder Law **Credits: 3**

Total Credits: 14

Recommended Course Sequence

Fall Semester I

- LEX 210 - Real Property I **Credits: 3**
- LEX 240 - Family Law **Credits: 3**

Spring Semester I

- LEX 250 - Wills, Estates, & Trusts **Credits: 3**
- LEX 280 - Ethics & Professionalism **Credits: 2**
- LEX 288 - Elder Law **Credits: 3**

Pharmacy Technology Diploma (D45580)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Pharmacy Technology Program prepares individuals to assist the pharmacist in duties that a technician can legally perform and to function within the boundaries prescribed by the pharmacist and the employment agency.

Students will prepare prescription medications, mix intravenous solutions and other specialized medications, update patient profiles, maintain inventories, package medications in unit-dose or med-card form, and gather data used by pharmacists to monitor drug therapy.

Employment opportunities include retail, hospitals, nursing homes, research laboratories, wholesale drug companies, and pharmaceutical manufacturing facilities. Graduates from the program may be eligible to take the National Certification Examination to become a certified pharmacy technician.

General Education Requirements

General Education

- BIO 163 - Basic Anat & Physiology **Credits: 5**
- ENG 111 - Writing and Inquiry **Credits: 3**

Psychology

(Take 3 credits)

- PSY 118 - Interpersonal Psychology **Credits: 3**
- PSY 150 - General Psychology **Credits: 3**

Major Requirements

- PHM 110 - Introduction to Pharmacy **Credits: 3**
- PHM 111 - Pharmacy Practice I **Credits: 4**
- PHM 115 - Pharmacy Calculations **Credits: 3**
- PHM 118 - Sterile Products **Credits: 4**
- PHM 120 - Pharmacology I **Credits: 3**
- PHM 125 - Pharmacology II **Credits: 3**
- PHM 133 - Pharmacy Clinical **Credits: 3**
- PHM 136 - Pharmacy Clinical **Credits: 6**

- PHM 140 - Trends in Pharmacy **Credits: 2**
- PHM 165 - Pharmacy Prof Practice **Credits: 2**

Other Major Requirements

Other Major Course

- PHM 115A - Pharmacy Calculations Lab **Credits: 1**

Total Credits: 47/48

Fall Semester I

- BIO 163 - Basic Anat & Physiology **Credits: 5**
- PHM 110 - Introduction to Pharmacy **Credits: 3**
- PHM 111 - Pharmacy Practice I **Credits: 4**
- PHM 115 - Pharmacy Calculations **Credits: 3 and**
- PHM 115A - Pharmacy Calculations Lab **Credits: 1**

Spring Semester I

- PHM 118 - Sterile Products **Credits: 4**
- PHM 120 - Pharmacology I **Credits: 3**
- PHM 136 - Pharmacy Clinical **Credits: 6**
- PSY 118 - Interpersonal Psychology **Credits: 3 or**

Note:

** Students must achieve a "C" or higher in each course in the curriculum in order to progress semester by semester and to graduate.

Public Safety Administration (A55480)

The Public Safety Administration curriculum is designed to provide students, as well as practitioners, with knowledge and skills in the technical, managerial, and administrative areas necessary for entrance or advancement within various public safety and government organizations. Course work in diverse subject areas includes public safety administration and education, interagency operations, crisis leadership, government and agency financial management, professional standards, incident management, administrative law, and supervision, while providing a streamlined pathway that recognizes the value of previously earned skillsets and credentials within the public safety sector. Employment opportunities exist with fire or police departments, emergency management organizations,

governmental agencies, industrial firms, correctional facilities, private industries, insurance organizations, educational organizations, security and protective organizations, and through self-employment opportunities.

General Education Requirements(18 credits)

Communications

Take 9 credits from the following courses:

- ENG 111 - Writing and Inquiry **Credits: 3**
- ENG 114 - Prof Research & Reporting **Credits: 3**
- COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts

Take 3 credits from the following courses:

- HUM 115 - Critical Thinking **Credits: 3**

Social/Behavioral Sciences

Take 3 credits from the following courses:

- POL 120 - American Government **Credits: 3**
- PSY 150 - General Psychology **Credits: 3**

Natural Sciences/Math

Take 3 credits from the following courses:

- MAT 143 - Quantitative Literacy **Credits: 3**

Major Requirements (20 - 21 credits)

Required

Take 12 credits from the following courses:

- EPT 150 - Incident Management **Credits: 3**
- PAD 151 - Intro to Public Admin **Credits: 3**
- PAD 252 - Public Policy Analysis **Credits: 3**

- PAD 254 - Grant Writing **Credits: 3**

Other Required

Take 8-9 credits from the following groups:

Group 1: Take 3 Credits

- EPT 124 - EM Services Law & Ethics **Credits: 3**
- FIP 152 - Fire Protection Law **Credits: 3**
- PAD 152 - Ethics in Government **Credits: 3**

Group 2: Take 3 Credits

- FIP 228 - Local Govt Finance **Credits: 3**
- PAD 251 - Public Finance & Budgeting **Credits: 3**

Group 3: Take 3 Credits

- EMS 235 - EMS Management **Credits: 2**
- FIP 276 - Managing Fire Services **Credits: 3**
- CJC 240 - Law Enfor Mgt. & Supervis **Credits: 3**

Concentration Tracks

Take 1 of the 4 Concentration Requirements:

Correction Services

Take 1 of 3 Groups

Group 1:

- PST 120 - NCDPS Correct'l Officer Train **Credits: 8**

Group 2:

- CJC 141 - Corrections **Credits: 3**
- CJC 225 - Crisis Intervention **Credits: 3**
- CJC 232 - Civil Liability **Credits: 3**

Group 3:

- CJC 141 - Corrections **Credits: 3**
- CJC 225 - Crisis Intervention **Credits: 3**
- CJC 233 - Correctional Law **Credits: 3**

Emergency/Fire Management

Take 12 credits from the following courses:

- EPT 120 - Sociology of Disaster **Credits: 3**
- EPT 130 - Mitigation & Preparedness **Credits: 3**
- EPT 140 - Emergency Management **Credits: 3**
- EPT 150 - Incident Management **Credits: 3**

Concentration Track **Credits: 3**

- HUM 115 - Critical Thinking **Credits: 3**

Other Major Requirements **Credits: 3**

Spring Semester II

- PAD 252 - Public Policy Analysis **Credits: 3**
- CJC 240 - Law Enfor Mgt. & Supervis **Credits: 3**

or

- FIP 276 - Managing Fire Services **Credits: 3**

or

- EMS 235 - EMS Management **Credits: 2**
- SOC 210 - Introduction to Sociology **Credits: 3**

or

- SOC 220 - Social Problems **Credits: 3**

or

- SOC 230 - Race and Ethnic Relations **Credits: 3**

Other Major Required **Credits: 3**

Concentration Track **Credits: 3**

Public Safety Administration Certificate (C55480)

The Public Safety Administration curriculum is designed to provide students, as well as practitioners, with knowledge and skills in the technical, managerial, and administrative areas necessary for entrance or advancement within various public safety and government organizations. Course work in diverse subject areas includes public safety administration and education, interagency operations, crisis leadership, government and agency financial management, professional standards, incident management, administrative law, and supervision while providing a streamlined pathway that recognizes the value of previously earned skillsets and credentials within the public safety sector. Employment opportunities exist with fire or police departments, emergency management organizations, governmental agencies, industrial firms, correctional facilities, private industries, insurance organizations, educational organizations, security and protective organizations, and through self-employment opportunities

Major Hours (12 Credits)

- EPT 150 - Incident Management **Credits: 3**
- PAD 252 - Public Policy Analysis **Credits: 3**
- PAD 151 - Intro to Public Admin **Credits: 3**
- PAD 254 - Grant Writing **Credits: 3**

Other Major Hours (6 Credits)

Take 3 Credits

- FIP 228 - Local Govt Finance **Credits: 3**

Or

- PAD 251 - Public Finance & Budgeting **Credits: 3**

Take 3 Credits

- PAD 152 - Ethics in Government **Credits: 3**

Or

- EPT 124 - EM Services Law & Ethics **Credits: 3**

Or

- FIP 152 - Fire Protection Law **Credits: 3**

Total Credits 18

Fall Semester I

- PAD 151 - Intro to Public Admin **Credits: 3**
- EPT 150 - Incident Management **Credits: 3**

Spring Semester I

- PAD 252 - Public Policy Analysis **Credits: 3**
- PAD 152 - Ethics in Government **Credits: 3**

Or

- EPT 124 - EM Services Law & Ethics **Credits: 3**

Or

- FIP 152 - Fire Protection Law **Credits: 3**

Fall Semester II

- PAD 254 - Grant Writing **Credits: 3**
- PAD 251 - Public Finance & Budgeting **Credits: 3**

Or

- FIP 228 - Local Govt Finance **Credits: 3**

Radiography, A.A.S. (A45700)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Radiography curriculum prepares the graduate to be a radiographer, a skilled health care professional who uses radiation to produce images of the human body.

Course work includes clinical rotations to area health care facilities, radiographic exposure, image processing, radiographic procedures, physics, pathology, patient care and management, radiation protection, quality assurance, anatomy and physiology, and radiobiology.

Graduates of this program are eligible to apply to take the American Registry of Radiologic Technologists' national examination for certification and registration as medical radiographers. Graduates may be employed in hospitals, clinics, physicians' offices, public health, mobile x-ray companies, and industry. With more specialized education, a qualified Radiographer may advance into the areas of Radiation Therapy, Nuclear Medicine, Ultrasonography, Computerized Tomography (CT), Magnetic Resonance Imaging (MRI), education, or hospital administration.

General Education Requirements (20 - 24 credits)

Required Courses

Take 3 credits:

- ENG 111 - Writing and Inquiry **Credits: 3**

Mathematics

Take 3-4 credits:

- MAT 110 - Math Measurement & Literacy **Credits: 3**
- MAT 143 - Quantitative Literacy **Credits: 3**
- MAT 152 - Statistical Methods I **Credits: 4**
- MAT 171 - Precalculus Algebra **Credits: 4**

Communications

Take 3 credits:

- COM 110 - Introduction to Communication **Credits: 3**
- COM 120 - Intro Interpersonal Com **Credits: 3**
- COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

- HUM 115 - Critical Thinking **Credits: 3**
- PHI 215 - Philosophical Issues **Credits: 3**
- PHI 230 - Introduction to Logic **Credits: 3**
- PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Science Electives

Take 3 credits:

- PSY 150 - General Psychology **Credits: 3**
- SOC 210 - Introduction to Sociology **Credits: 3**

Biology Electives

Take 1 of 2 Groups:

Group 1

- BIO 163 - Basic Anat & Physiology **Credits: 5**

Group 2

- BIO 168 - Anatomy and Physiology I **Credits: 4**
- BIO 169 - Anatomy and Physiology II **Credits: 4**

Major Requirements (50 credits)

Take:

- RAD 110 - Rad Intro & Patient Care **Credits: 3**
- RAD 111 - RAD Procedures I **Credits: 4**
- RAD 112 - RAD Procedures II **Credits: 4**
- RAD 121 - Image Production I **Credits: 3**
- RAD 122 - Image Production II **Credits: 2**
- RAD 141 - Radiation Safety **Credits: 2**
- RAD 151 - RAD Clinical Ed I **Credits: 3**
- RAD 161 - RAD Clinical Ed II **Credits: 5**
- RAD 171 - RAD Clinical Ed III **Credits: 3**
- RAD 211 - RAD Procedures III **Credits: 3**
- RAD 231 - Image Production III **Credits: 2**
- RAD 251 - RAD Clinical Ed IV **Credits: 7**
- RAD 261 - RAD Clinical Ed V **Credits: 7**
- RAD 271 - Radiography Capstone **Credits: 3**

Other Major Requirements (4 credits)

Take:

- RAD 113 - RAD Lab Elective **Credits: 1**
- RAD 182 - RAD Clinical Elective **Credits: 2**

- RAD 281 - RAD Clinical Elective **Credits: 1**

Total Credits: 74-78

Fall Semester I

- ENG 111 - Writing and Inquiry **Credits: 3**
- RAD 110 - Rad Intro & Patient Care **Credits: 3**
- RAD 111 - RAD Procedures I **Credits: 4**
- RAD 151 - RAD Clinical Ed I **Credits: 3**
- RAD 182 - RAD Clinical Elective **Credits: 2**

Biology Elective

Spring Semester I

- RAD 112 - RAD Procedures II **Credits: 4**
- RAD 121 - Image Production I **Credits: 3**
- RAD 161 - RAD Clinical Ed II **Credits: 5**

Communications Elective

Math Elective

Summer Semester I

- RAD 122 - Image Production II **Credits: 2**
- RAD 141 - Radiation Safety **Credits: 2**
- RAD 171 - RAD Clinical Ed III **Credits: 3**
- RAD 281 - RAD Clinical Elective **Credits: 1**

Fall Semester II

- RAD 211 - RAD Procedures III **Credits: 3**
- RAD 231 - Image Production III **Credits: 2**
- RAD 251 - RAD Clinical Ed IV **Credits: 7**

Social/Behavioral Science Elective

Spring Semester II

- RAD 113 - RAD Lab Elective **Credits: 1**
- RAD 261 - RAD Clinical Ed V **Credits: 7**
- RAD 271 - Radiography Capstone **Credits: 3**
- Humanities/Fine Arts Elective

Surgical Technology, A.A.S. (A45740)

This program has selective admission requirements. Contact the Counseling Office for information and application deadlines.

The Surgical Technology curriculum prepares individuals to assist in the care of the surgical patient in the operating room and to function as a member of the surgical team.

Students will apply theoretical knowledge to the care of patients undergoing surgery and develop skills necessary to prepare supplies, equipment, and instruments; maintain aseptic conditions; prepare patients for surgery; and assist surgeons during operations.

Employment opportunities include labor/delivery/emergency departments, inpatient/outpatient surgery centers, dialysis units/facilities, physicians' offices, and central supply processing units.

Students of Commission on Accreditation of Allied Health Education Programs (CAAHEP) accredited programs are required to take the national certification exam administered by the National Board on Certification in Surgical Technology and Surgical Assisting (NBSTSA) within a four week period prior to or after graduation.

General Education Requirements

- COM 120 - Intro Interpersonal Com **Credits: 3**
- ENG 111 - Writing and Inquiry **Credits: 3**
- HUM 115 - Critical Thinking **Credits: 3**
- MAT 110 - Math Measurement & Literacy **Credits: 3**
- PSY 150 - General Psychology **Credits: 3**

Major Requirements

- SUR 110 - Intro to Surg Tech **Credits: 3**
- SUR 111 - Periop Patient Care **Credits: 7**

- SUR 122AB - Surgical Procedures I **Credits: 5**
- SUR 122BB - Surgical Procedures I **Credits: 1**
- SUR 123AB - Surgical Clinical Practice I **Credits: 3.5**
- SUR 123BB - Surgical Clinical Practice I **Credits: 3.5**
- SUR 134 - Surgical Procedures II **Credits: 5**
- SUR 135 - SUR Clinical Practice II **Credits: 4**
- SUR 137 - Professional Success Prep **Credits: 1**
- SUR 210 - Adv SUR Clinical Practice **Credits: 2**
- SUR 211 - Adv Theoretical Concepts **Credits: 2**

Other Major Requirements

- BIO 163 - Basic Anat & Physiology **Credits: 5**
- BIO 175 - General Microbiology **Credits: 3**
- CIS 110 - Introduction to Computers **Credits: 3**
- ENG 114 - Prof Research & Reporting **Credits: 3**
- MED 121 - Medical Terminology I **Credits: 3**
- MED 122 - Medical Terminology II **Credits: 3**

Total Credit Hours: 72

Students must achieve a "C" or higher in each course in the curriculum in order to progress semester by semester and to graduate.

Fall Semester I

- BIO 163 - Basic Anat & Physiology **Credits: 5**
- MED 121 - Medical Terminology I **Credits: 3**
- SUR 110 - Intro to Surg Tech **Credits: 3**
- SUR 111 - Periop Patient Care **Credits: 7**

Spring Semester I

- ENG 111 - Writing and Inquiry **Credits: 3**

- MED 122 - Medical Terminology II **Credits: 3**
- SUR 122AB - Surgical Procedures I **Credits: 5**
- SUR 123AB - Surgical Clinical Practice I **Credits: 3.5**

Summer Semester I

- HUM 115 - Critical Thinking **Credits: 3**
- CIS 110 - Introduction to Computers **Credits: 3**
- SUR 122BB - Surgical Procedures I **Credits: 1**
- SUR 123BB - Surgical Clinical Practice I **Credits: 3.5**

Fall Semester II

- BIO 175 - General Microbiology **Credits: 3**
- MAT 110 - Math Measurement & Literacy **Credits: 3**
- SUR 134 - Surgical Procedures II **Credits: 5**
- SUR 135 - SUR Clinical Practice II **Credits: 4**

Spring Semester II

- COM 120 - Intro Interpersonal Com **Credits: 3**
- ENG 114 - Prof Research & Reporting **Credits: 3**
- PSY 150 - General Psychology **Credits: 3**
- SUR 137 - Professional Success Prep **Credits: 1**
- SUR 210 - Adv SUR Clinical Practice **Credits: 2**
- SUR 211 - Adv Theoretical Concepts **Credits: 2**

Veterinary Medical Technology, A.A.S. (A45780)

This curriculum is designed to prepare individuals to assist veterinarians in preparing animals, equipment, and medications for examination and surgery; collecting specimens; performing laboratory, radiographic, anesthetic, dental procedures; assisting in surgery; and providing proper husbandry of animals and their environment.

Course work includes instruction in veterinary anatomy, nutrition, parasitology, pathology, physiology, radiology, terminology, zoology, office practices, laboratory techniques, dentistry, and small and large animal clinical practices.

Graduates of accredited programs may be eligible to take state and national examinations administered by the North Carolina Veterinary Medical Board. Graduates may be employed in veterinary clinics; diagnostic, research, or pharmaceutical laboratories; zoos; academic institutions; or other areas associated with animal care.

General Education Requirements (19 credits)

Communications

Take 6 credits:

- ENG 111 - Writing and Inquiry **Credits: 3**
- ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts

Take 3 credits:

- ART 111 - Art Appreciation **Credits: 3**
- HUM 115 - Critical Thinking **Credits: 3**
- MUS 110 - Music Appreciation **Credits: 3**
- PHI 210 - History of Philosophy **Credits: 3**

Social/Behavioral Sciences

Take 3 credits:

- PSY 118 - Interpersonal Psychology **Credits: 3**
- PSY 150 - General Psychology **Credits: 3**
- SOC 210 - Introduction to Sociology **Credits: 3**
- SOC 240 - Social Psychology **Credits: 3**

Natural Sciences/Mathematics

Take 7 credits:

- CHM 130 - Gen, Org, & Biochemistry **Credits: 3**

- CHM 130A - Gen, Org, & Biochem Lab **Credits: 1**
- MAT 143 - Quantitative Literacy **Credits: 3**

Major Requirements (50 credits)

Required Courses

Take 47 credits:

- VET 110 - Animal Breeds and Husbandry **Credits: 3**
- VET 120 - Vet Anatomy & Physiology **Credits: 4**
- VET 123 - Veterinary Parasitology **Credits: 3**
- VET 125 - Veterinary Diseases I **Credits: 2**
- VET 126 - Veterinary Diseases II **Credits: 2**
- VET 131 - Vet Lab Techniques I **Credits: 3**
- VET 133 - Vet Clinical Practice I **Credits: 3**
- VET 137 - Vet Office Practices **Credits: 2**
- VET 211 - Vet Lab Techniques II **Credits: 3**
- VET 212 - Vet Lab Techniques III **Credits: 3**
- VET 213 - Vet Clinical Practice II **Credits: 4**
- VET 214 - Vet Clinical Practice III **Credits: 4**
- VET 215 - Veterinary Pharmacology **Credits: 3**
- VET 217 - Large Animal Clin Pract **Credits: 3**
- VET 237 - Animal Nutrition **Credits: 3**
- WBL 112 - Work-Based Learning I **Credits: 2**

Medical Terminology

Take 3 credits:

- VET 121 - Veterinary Medical Terminology **Credits: 3**

Other Major Requirements (7 credits)

Vet

Take 4 credits:

- VET 122 - Veterinary Zoology **Credits: 4**

WBL

Take 1 credit:

- WBL 115 - Work-Based Learning Seminar I **Credits: 1**

Total Credits: 74

Recommended Course Sequence

Fall Semester I

- MAT 143 - Quantitative Literacy **Credits: 3**
- VET 110 - Animal Breeds and Husbandry **Credits: 3**
- VET 121 - Veterinary Medical Terminology **Credits: 3**
- VET 122 - Veterinary Zoology **Credits: 4**
- ENG 111 - Writing and Inquiry **Credits: 3**

Spring Semester I

- CHM 130 - Gen, Org, & Biochemistry **Credits: 3**
- CHM 130A - Gen, Org, & Biochem Lab **Credits: 1**
- VET 120 - Vet Anatomy & Physiology **Credits: 4**
- VET 123 - Veterinary Parasitology **Credits: 3**

Spring Semester II

- VET 137 - Vet Office Practices **Credits: 2**
 - VET 212 - Vet Lab Techniques III **Credits: 3**
 - VET 214 - Vet Clinical Practice III **Credits: 4**
 - VET 217 - Large Animal Clin Pract **Credits: 3**
- Fine Arts/Humanities Elective **Credits / Units: 3**

Summer II

- WBL 112 - Work-Based Learning I **Credits: 2**
- WBL 115 - Work-Based Learning Seminar I **Credits: 1**

Welding Technology Certificate (C50420C)

Major Requirements (15 credits)

Take 15 credits:

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**
- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

Total Credits: 15

Fall Semester I

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**

Spring Semester I

- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

Welding Technology CTE Certificate Pathway (C50420CP)

The Welding Technology curriculum provides students with a sound understanding of the science, technology, and applications essential for successful employment in the welding and metalworking industry.

Instruction includes consumable and non-consumable electrode welding and cutting processes. Courses may include math, print reading, metallurgy, welding inspection, and destructive and non-destructive testing providing the student with industry-standard skills developed through classroom training and practical application.

Graduates of the Welding Technology curriculum may be employed as entry-level technicians in welding and metalworking industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.

Major Requirements (15 credits)

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**
- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

Total Credits: 15

Fall Semester I

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**

Spring Semester I

- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

Welding Technology Diploma (D50420)

The Welding Technology curriculum provides students with a sound understanding of the science, technology, and applications essential for successful employment in the welding and metal industry.

Instruction includes consumable and non-consumable electrode welding and cutting processes. Courses in math, blueprint reading, metallurgy, welding inspection, and destructive and non-destructive testing provides the student with industry-standard skills developed through classroom training and practical application.

Successful graduates of the Welding Technology curriculum may be employed as entry level technicians in welding and metalworking industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.

General Education Requirements (6 credits)

Take 6 credits:

- ENG 101 - Applied Communications I **Credits: 3**
- MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (18 credits)

Take 18 credits:

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**
- WLD 131 - GTAW (TIG) Plate **Credits: 4**
- WLD 141 - Symbols & Specifications **Credits: 3**

Other Major Requirements (18 credits)

Take 18 credits:

- CIS 111 - Basic PC Literacy **Credits: 2**
- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**
- WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**

- WLD 143 - Welding Metallurgy **Credits: 2**
- WLD 215 - SMAW (stick) Pipe **Credits: 4**
- WLD 231 - GTAW (TIG) Pipe **Credits: 3**

Total Credits: 42

Fall Semester I

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**
- WLD 131 - GTAW (TIG) Plate **Credits: 4**
- WLD 141 - Symbols & Specifications **Credits: 3**
- MAT 110 - Math Measurement & Literacy **Credits: 3**

Spring Semester I

- CIS 111 - Basic PC Literacy **Credits: 2**
- ENG 101 - Applied Communications I **Credits: 3**
- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**
- WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**
- WLD 143 - Welding Metallurgy **Credits: 2**

Summer Semester I

- WLD 215 - SMAW (stick) Pipe **Credits: 4**
- WLD 231 - GTAW (TIG) Pipe **Credits: 3**

Welding Technology, GTAW/GMAW Certificate (C50420F)

Major Requirements

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**
- WLD 131 - GTAW (TIG) Plate **Credits: 4**

Major Requirements

- WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**

Total Credits: 13

Fall Semester I

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 131 - GTAW (TIG) Plate **Credits: 4**

Spring Semester I

- WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

Welding Technology, SMAW/GTAW Certificate (C50420)

Major Requirements

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**
- WLD 131 - GTAW (TIG) Plate **Credits: 4**

Major Requirements

- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

Total Credits: 15

Fall Semester I

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**
- WLD 131 - GTAW (TIG) Plate **Credits: 4**

Spring Semester I

- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

Course Descriptions

Please Note:

Prerequisites: A course taken prior to another course.

CFCC administers one placement test: NCDAP. Satisfactory scores on placement tests taken at other colleges (SAT, ACT, COMPASS) may be used to waive Reading, Writing and Mathematical prerequisites. See the Placement Test Advising Guide, for additional information or talk with a counselor.

Receipt of transfer credit for ENG 111 or above will waive the Reading and/or Writing prerequisites for certain courses.

Receipt of a curriculum math credit will waive the prerequisites for certain courses.

Corequisites: A course taken at the same time as another course or prior to the course to be taken.

Some courses in communications, humanities/fine arts, mathematics, natural science, or social/behavioral science may fulfill a general education requirement in one of the following programs: AA (Associate in Arts), AS (Associate in Science), AFA (Associate in Fine Arts), AGE (Associate in General Education), AAS (Associate in Applied Science), DIP (Diploma), or CER (Certificate). Please refer to the programs of study section of this catalog for courses that satisfy each program's general education requirements.

ACA 122 - College Transfer Success

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides information and strategies necessary to develop clear academic and professional goals beyond the community college experience. Topics include the CAA, college policies and culture, career exploration, gathering information on senior institutions, strategic planning, critical thinking, and communications skills for a successful academic transition. Upon completion, students should be able to develop an academic plan to transition successfully to senior institutions. (S25621)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ACC 120 - Prin of Financial Accounting

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course introduces business decision-making using accounting information systems. Emphasis is placed on analyzing, summarizing, reporting, and interpreting financial information. Upon completion, students should be able to prepare financial statements, understand the role of financial information in decision-making and address ethical considerations. (S20278)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ACC 121 - Prin of Managerial Accounting

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ACC-120 Take ACC-120; minimum grade C

This course includes a greater emphasis on managerial and cost accounting skills. Emphasis is placed on managerial accounting concepts for external and internal analysis, reporting and decision-making. Upon completion, students should be able to analyze and interpret transactions relating to managerial concepts including product-costing systems. (S20282)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ACC 122 - Prin of Financial Acct II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ACC-120 Take ACC-120, Minimum grade C

This course provides additional instruction in the financial accounting concepts and procedures introduced in ACC 120. Emphasis is placed on the analysis of specific balance sheet accounts, with in-depth instruction of the accounting principles applied to these accounts. Upon completion, students should be able to analyze data, prepare journal entries, and prepare reports in compliance with generally accepted accounting principles. (S20286)

ACC 129 - Individual Income Taxes

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ACC-120

This course introduces the relevant laws governing individual income taxation. Topics include tax law, electronic research and methodologies, and the use of technology for preparation of individual income tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete various individual tax forms. (S20283)

ACC 130 - Business Income Taxes

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ACC-129

This course introduces the relevant laws governing business and fiduciary income taxes. Topics include tax law relating to business organizations, electronic research and methodologies, and the use of

technology for the preparation of business tax returns. Upon completion, students should be able to analyze basic tax scenarios, research applicable tax law, and complete various business tax forms. (S20277)

ACC 140 - Payroll Accounting

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: ACC-115 or ACC-120

This course covers federal and state laws pertaining to wages, payroll taxes, payroll tax forms, and journal and general ledger transactions. Emphasis is placed on computing wages; calculating social security, income, and unemployment taxes; preparing appropriate payroll tax forms; and journalizing/posting transactions. Upon completion, students should be able to analyze data, make appropriate computations, complete forms, and prepare accounting entries using appropriate technology. (S24972)

ACC 150 - Accounting Software Appl

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: ACC-115 or ACC-120

This course introduces microcomputer applications related to accounting systems. Topics include general ledger, accounts receivable, accounts payable, inventory, payroll, and correcting, adjusting, and closing entries. Upon completion, students should be able to use a computer accounting package to accurately solve accounting problems. (S24974)

ACC 175 - Hotel and Restaurant Acct

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course covers generally accepted accounting principles and the uniform system of accounts for small hotels and motels of the American Hotel and Motel Association. Emphasis is placed on the accounting cycle, analysis of financial statements, and payroll procedures including treatment of tips. Upon completion, students should be able to demonstrate competence in the accounting principles and procedures used in hotels and restaurants. (S11585)

ACC 220 - Intermediate Accounting I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ACC-120 Take ACC-122

This course is a continuation of the study of accounting principles with in-depth coverage of theoretical concepts and financial statements. Topics include generally accepted accounting principles and extensive analysis of balance sheet components. Upon completion, students should be able to

demonstrate competence in the conceptual framework underlying financial accounting, including the application of financial standards. (S20836)

ACC 221 - Intermediate Acct II

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ACC-220

This course is a continuation of ACC 220. Emphasis is placed on special problems which may include leases, bonds, investments, ratio analyses, present value applications, accounting changes, and corrections. Upon completion, students should be able to demonstrate an understanding of the principles involved and display an analytical problem-solving ability for the topics covered. (S10687)

ACC 225 - Cost Accounting

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ACC-121

This course introduces the nature and purposes of cost accounting as an information system for planning and control. Topics include direct materials, direct labor, factory overhead, process, job order, and standard cost systems. Upon completion, students should be able to demonstrate an understanding of the principles involved and display an analytical problem-solving ability for the topics covered. (S10695)

ACC 267 - Fraud Examination

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ACC-120

This course is an introduction to the investigation techniques used to discover fraudulent activities. Emphasis is placed on the techniques for the detection, deterrence and prevention of the major types of occupational and management frauds. Upon completion, students should be able to examine relevant fraud cases and apply critical thinking and technology skills used in fraud examination. (S24965)

AGR 139 - Intro to Sustainable Ag

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course will provide students with a clear perspective on the principles, history and practices of sustainable agriculture in our local and global communities. Students will be introduced to the economic, environmental and social impacts of agriculture. Upon completion, students will be able to identify the principles of sustainable agriculture as they relate to basic production practices. (S23337)

AHR 110 - Intro to Refrigeration

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Corequisites: AHR-111

This course introduces the basic refrigeration process used in mechanical refrigeration and air conditioning systems. Topics include terminology, safety, and identification and function of components; refrigeration cycle; and tools and instrumentation used in mechanical refrigeration systems. Upon completion, students should be able to identify refrigeration systems and components, explain the refrigeration process, and use the tools and instrumentation of the trade. (S23419)

AHR 111 - HVACR Electricity

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: AHR-110

This course introduces electricity as it applies to HVACR equipment. Emphasis is placed on power sources, interaction of electrical components, wiring of simple circuits, and the use of electrical test equipment. Upon completion, students should be able to demonstrate good wiring practices and the ability to read simple wiring diagrams. (S23420)

AHR 112 - Heating Technology

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Corequisites: AHR-110

This course covers the fundamentals of heating including oil, gas, and electric heating systems. Topics include safety, tools and instrumentation, system operating characteristics, installation techniques, efficiency testing, electrical power, and control systems. Upon completion, students should be able to explain the basic oil, gas, and electrical heating systems and describe the major components of a heating system. (S23421)

AHR 113 - Comfort Cooling

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take AHR-110

This course covers the installation procedures, system operations, and maintenance of residential and light commercial comfort cooling systems. Topics include terminology, component operation, and testing and repair of equipment used to control and produce assured comfort levels. Upon completion, students should be able to use psychrometrics, manufacturer specifications, and test instruments to determine proper system operation. (S23422)

AHR 114 - Heat Pump Technology

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: AHR-110 or AHR-113

This course covers the principles of air source and water source heat pumps. Emphasis is placed on safety, modes of operation, defrost systems, refrigerant charging, and system performance. Upon completion, students should be able to understand and analyze system performance and perform routine service procedures. ALL (S23423)

AHR 115 - Refrigeration Systems

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take AHR-110

This course introduces refrigeration systems and applications. Topics include defrost methods, safety and operational control, refrigerant piping, refrigerant recovery and charging, and leak testing. Upon completion, students should be able to assist in installing and testing refrigeration systems and perform simple repairs. (S14137)

AHR 120 - HVACR Maintenance

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the basic principles of industrial air conditioning and heating systems. Emphasis is placed on preventive maintenance procedures for heating and cooling equipment and related components. Upon completion, students should be able to perform routine preventive maintenance tasks, maintain records, and assist in routine equipment repairs. (S13153)

AHR 130 - HVAC Controls

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: AHR-111, ELC-111, or ELC-112

This course covers the types of controls found in residential and commercial comfort systems. Topics include electrical and electronic controls, control schematics and diagrams, test instruments, and analysis and troubleshooting of electrical systems. Upon completion, students should be able to diagnose and repair common residential and commercial comfort system controls. (S23273)

AHR 133 - HVAC Servicing

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: AHR-112 OR AHR-113

Corequisites: AHR-112 AHR-113

The course covers the maintenance and servicing of HVAC equipment. Topics include testing, adjusting, maintaining, and troubleshooting HVAC equipment and record keeping. Upon completion, students should be able to adjust, maintain, and service HVAC equipment. (S13769)

AHR 140 - All-Weather Systems

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: AHR-112 or AHR-113

This course covers the principles of combination heating and cooling systems including gas-electric, all-electric, and oil-electric systems. Topics include PTAC's and package and split-system units. Upon completion, students should be able to understand systems performance and perform routine maintenance procedures. (S11450)

AHR 210 - Residential Building Code

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Corequisites: AHR-110

This course covers the residential building codes that are applicable to the design and installation of HVAC systems. Topics include current residential codes as applied to HVAC design, service, and installation. Upon completion, students should be able to demonstrate the correct usage of residential building codes that apply to specific areas of the HVAC trade. (S10349)

AHR 211 - Residential System Design

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the principles and concepts of conventional residential heating and cooling system design. Topics include heating and cooling load estimating, basic psychrometrics, equipment selection, duct system selection, and system design. Upon completion, students should be able to design a basic residential heating and cooling system. (S23445)

AHR 215 - Commercial HVAC Controls

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: AHR-111, ELC-111, or ELC 112

This course introduces HVAC control systems used in commercial applications. Topics include electric/electronic control systems, pneumatic control systems, DDC temperature sensors, humidity sensors, pressure sensors, wiring, controllers, actuators, and controlled devices. Upon completion,

students should be able to verify or correct the performance of common control systems with regard to sequence of operation and safety. (S22586)

AHR 245 - Chiller Systems

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take AHR-110

This course introduces the fundamentals of liquid chilling equipment. Topics include characteristics of water, principles of water chilling, the chiller, the refrigerant, water and piping circuits, freeze prevention, purging, and equipment flexibility. Upon completion, students should be able to describe the components, controls, and overall operation of liquid chilling equipment and perform basic maintenance tasks. (S12854)

ALT 120 - Renewable Energy Tech

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides an introduction to multiple technologies that allow for the production and conservation of energy from renewable sources. Topics include hydro-electric, wind power, passive and active solar energy, tidal energy, appropriate building techniques, and energy conservation methods. Upon completion, students should be able to demonstrate an understanding of renewable energy production and its impact on humans and their environment. (S22049)

ALT 250 - Thermal Systems

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces concepts, tools, techniques, and materials used to convert thermal energy into a viable, renewable energy resource. Topics include forced convection, heat flow and exchange, radiation, the various elements of thermal system design, regulations, and system installation and maintenance. Upon completion, students should be able to demonstrate an understanding of geothermal and solar thermal systems and corresponding regulations. (S22481)

ANT 210 - General Anthropology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the physical, archaeological, linguistic, and ethnological fields of anthropology. Topics include human origins, genetic variations, archaeology, linguistics, primatology, and contemporary cultures. Upon completion, students should be able to demonstrate an understanding of the four major fields of anthropology. (S13262)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ANT 220 - Cultural Anthropology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the nature of human culture. Emphasis is placed on cultural theory, methods of fieldwork, and cross-cultural comparisons in the areas of ethnology, language, and the cultural past. Upon completion, students should be able to demonstrate an understanding of basic cultural processes and how cultural data are collected and analyzed. (S10526)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ANT 221 - Comparative Cultures

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an ethnographic survey of societies around the world covering their distinctive cultural characteristics and how these relate to cultural change. Emphasis is placed on the similarities and differences in social institutions such as family, economics, politics, education, and religion. Upon completion, students should be able to demonstrate knowledge of a variety of cultural adaptive strategies. (S10536)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ANT 230 - Physical Anthropology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the scientific study of human evolution and adaptation. Emphasis is placed on evolutionary theory, population genetics, biocultural adaptation and human variation, as well as non-human primate evolution, morphology, and behavior. Upon completion, students should be able to demonstrate an understanding of the biological and cultural processes which have resulted in the formation of the human species. (S11533)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ANT 230A - Physical Anthropology Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ANT-230

Corequisites: ANT-230

This course provides laboratory work that reinforces the material presented in ANT 230. Emphasis is placed on laboratory exercises which may include fossil identification, genetic analysis, skeletal comparisons, forensics, computer simulations, and field observations. Upon completion, students should be able to demonstrate an understanding of the analytical skills employed by anthropologists in the study of primate evolution and variation. (S12060)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ANT 240 - Archaeology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the scientific study of the unwritten record of the human past. Emphasis is placed on the process of human cultural evolution as revealed through archaeological methods of excavation and interpretation. Upon completion, students should be able to demonstrate an understanding of how archaeologists reconstruct the past and describe the variety of past human cultures. (S10965)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ANT 240A - Archaeology Field Lab

Class: 0 Lab: 4 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ANT-240

Corequisites: ANT-240

This course provides practical applications of archaeological methods. Emphasis is placed on basic archaeological methods and techniques required in site surveys, site classification, excavation, recording, processing, presentation, chronometry, and analysis of materials. Upon completion, students should be able to participate in applying archaeological methods and techniques to the excavation of a specific site. (S22352)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ANT 245 - World Prehistory

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an introduction to the prehistory of the Old and New world. Emphasis is placed on archaeological evidence from origins of human culture to the beginning of recorded history. Upon completion, students should be able to demonstrate knowledge of the variability of ancient human societies and the development of agriculture and urbanism. (S21935)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ARC 111 - Intro to Arch Technology

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic architectural drafting techniques, lettering, use of architectural and engineer scales, and sketching. Topics include orthographic, axonometric, and oblique drawing techniques using architectural plans, elevations, sections, and details; reprographic techniques; and other related topics. Upon completion, students should be able to prepare and print scaled drawings within minimum architectural standards. (S11683)

ARC 112 - Constr Matls & Methods

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course introduces construction materials and methodologies. Topics include construction terminology, traditional and alternative materials and their properties, manufacturing processes, construction techniques, and other related topics. Upon completion, students should be able to detail construction assemblies and identify construction materials and properties. (S23271)

ARC 113 - Residential Arch Tech

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ARC-111 Take ARC-112 Take ARC-114 ARC-114A

This course covers intermediate residential working drawings. Topics include residential plans, elevations, sections, details, schedules, and other related topics. Upon completion, students should be able to prepare a set of residential working drawings that are within accepted architectural standards. (S11635)

ARC 114 - Architectural CAD

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ARC-114A

Corequisites: ARC-114A

This course introduces basic architectural CAD techniques. Topics include basic commands and system hardware and software. Upon completion, students should be able to prepare and plot architectural drawings to scale within accepted architectural standards. (S10248)

ARC 114A - Architectural CAD Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ARC-114

Corequisites: ARC-114

This course provides a laboratory setting to enhance architectural CAD skills. Emphasis is placed on further development of commands and system operation. Upon completion, students should be able to prepare and plot scaled architectural drawings. (S11284)

ARC 132 - Specifications & Contracts

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ARC-112 Take ARC-230

This course covers the development of written specifications and the implications of different contractual arrangements. Topics include specification development, contracts, bidding material research, and agency responsibilities. Upon completion, students should be able to write a specification section and demonstrate the ability to interpret contractual responsibilities. (S12627)

ARC 211 - Light Constr Technology

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ARC-111 Take ARC-112

This course covers working drawings for light construction. Topics include plans, elevations, sections, and details; schedules; and other related topics. Upon completion, students should be able to prepare a set of working drawings which are within accepted architectural standards. (S13934)

ARC 213 - Design Project

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: ARC-111, ARC-112, and ARC-114 Take ARC-111 ARC-112 ARC-114 ARC-114A ARC-211

This course provides the opportunity to design and prepare a set of contract documents within an architectural setting. Topics include schematic design, design development, construction documents,

and other related topics. Upon completion, students should be able to prepare a set of commercial contract documents. (S10726)

ARC 214 - Architectural Statics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: ARC-111, ARC-112, and MAT-121

This course covers the concepts of elementary statics as applied to architecture. Topics include forces, resultants, and types of force system; equations of equilibrium; reactions of simple architectural structures; internal forces in architectural roof trusses; frames and beams; centroids and moments of inertia as applied to architecture. Upon completion, students should be able to solve problems which require the ability to analyze systems of forces in static equilibrium as applied to architectural forms. (S10740)

ARC 220 - Adv Architect CAD

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ARC-114 Take ARC-114A

This course provides file management, productivity, and CAD customization skills. Emphasis is placed on developing advanced proficiency techniques. Upon completion, students should be able to create prototype drawings and symbol libraries, compose sheets with multiple details, and use advanced drawing and editing commands. (S13375)

ARC 221 - Architectural 3-D CAD

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ARC-114 Take ARC-220

This course introduces architectural three-dimensional CAD applications. Topics include three-dimensional drawing, coordinate systems, viewing, rendering, modeling, and output options. Upon completion, students should be able to prepare architectural three-dimensional drawings and renderings. (S13466)

ARC 225 - Architectural BIM I

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ARC-225A

Corequisites: ARC-225A

This course is an introduction to the fundamentals of Building Information Modeling (BIM) as a construction documentation system. Topics include basic parametric modeling, creating new types and

families of components, and using 3D models to create design drawings. Upon completion, students should be able to use BIM software to create, edit, and print rudimentary architectural 3D computer models. (S23627)

ARC 225A - Architectural BIM I Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ARC-225

Corequisites: ARC-225

This course provides a laboratory setting to enhance architectural BIM skills. Emphasis is placed on further development of basic parametric modeling, creating new types and families of components. Upon completion, students should be able to use BIM software to create, edit, and print rudimentary architectural 3D computer models. (S23629)

ARC 226 - Architectural BIM II

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ARC-225

This course covers advanced concepts of Building Information Modeling (BIM) including complex drawing generation and inter-disciplinary collaboration. Topics include advanced parametric modeling and model analysis, inter-disciplinary coordination, design web format models, material take-off, schedules, and rendering. Upon completion, students should be able to apply BIM software to create full 3D project models and convert them to scaled working or presentation drawings. (S23630)

ARC 226A - Architectural BIM II Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ARC-225 Take ARC-226

This course provides a laboratory setting to enhance advanced architectural BIM skills. Emphasis is placed on further development of advanced parametric modeling and model analysis, inter-disciplinary coordination, design web format models, material take-off, schedules, and rendering. Upon completion, students should be able to apply BIM software to create full 3D project models and convert them to scaled working or presentation drawings. (S23631)

ARC 230 - Environmental Systems

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One Set: Set 1: ARC-111 and MAT-121 Set 2: ARC-111 and MAT-171

This course introduces plumbing, mechanical (HVAC), and electrical systems for the architectural

environment. Topics include basic plumbing, mechanical, and electrical systems for residential and/or commercial buildings with an introduction to selected code requirements. Upon completion, students should be able to develop schematic drawings for plumbing, mechanical, and electrical systems and perform related calculations. (S23949)

ARC 231 - Arch Presentations

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ARC-111

This course introduces architectural presentation techniques. Topics include perspective drawing, shadow projection, texturization, rendered plans, elevations, and other related topics. Upon completion, students should be able to present ideas graphically and do rendered presentation drawings. (S13888)

ARC 235 - Architectural Portfolio

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ARC-113 ARC-231

This course covers the methodology for the creation of an architectural portfolio. Topics include preparation of marketing materials and a presentation strategy using conventional and/or digital design media. Upon completion, students should be able to produce an architectural portfolio of selected projects. (S13879)

ARC 264 - Digital Architecture

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers multiple digital architectural techniques. Topics include spreadsheets and word processing procedures, on-line resources, modems, e-mail, image capture, multimedia, and other related topics. Upon completion, students should be able to transmit/receive electronic data, create multimedia presentations, and produce a desktop publishing document. (S22026)

ART 111 - Art Appreciation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the origins and historical development of art. Emphasis is placed on the relationship of design principles to various art forms including but not limited to sculpture, painting, and architecture. Upon completion, students should be able to identify and analyze a variety of artistic styles, periods, and media. UGETC (S10139)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 113 - Art Methods and Materials

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of media and techniques. Emphasis is placed on exploration and manipulation of materials. Upon completion, students should be able to demonstrate familiarity with a variety of methods, materials, and processes. (S24618)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 114 - Art History Survey I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course covers the development of art forms from ancient times to the Renaissance. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development. UGETC (S10200)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 115 - Art History Survey II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course covers the development of art forms from the Renaissance to the present. Emphasis is placed on content, terminology, design, and style. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of human social development. UGETC (S10149)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 116 - Survey of American Art

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with a minimum grade of P2), BSP-4002 (with a minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course covers the development of American art forms from colonial times to the present. Emphasis is placed on architecture, painting, sculpture, graphics, and the decorative arts. Upon completion, students should be able to demonstrate understanding of the history of the American creative experience. (S10174)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 117 - Non-Western Art History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with a minimum grade of P2), BSP-4002 (with a minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces non-Western cultural perspectives. Emphasis is placed on, but not limited to, African, Oriental, and Oceanic art forms throughout history. Upon completion, students should be able to demonstrate an historical understanding of art as a product reflective of non-Western social and cultural development. (S10125)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 118 - Art by Women

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an analytical study of the works of representative female artists. Emphasis is placed on the historical and cultural contexts, themes, and aesthetic features of individual works. Upon completion, students should be able to interpret, analyze, and discuss selected works. (S22465)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 121 - Two-Dimensional Design

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the elements and principles of design as applied to two-dimensional art. Emphasis is placed on the structural elements, the principles of visual organization, and the theories of color mixing and interaction. Upon completion, students should be able to understand and use critical

and analytical approaches as they apply to two-dimensional visual art. (S23014)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 122 - Three-Dimensional Design

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic studio problems in three-dimensional visual design. Emphasis is placed on the structural elements and organizational principles as applied to mass and space. Upon completion, students should be able to apply three-dimensional design concepts. (S23015)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 130 - Basic Drawing

Class: 0 Lab: 4 Clinical: 0 Work: 0 **Credits: 2**

This course introduces basic drawing techniques and is designed to increase observation skills. Emphasis is placed on the fundamentals of drawing. Upon completion, students should be able to demonstrate various methods and their application to representational imagery. (S10853)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 131 - Drawing I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the language of drawing and the use of various drawing materials. Emphasis is placed on drawing techniques, media, and graphic principles. Upon completion, students should be able to demonstrate competence in the use of graphic form and various drawing processes. (S10812)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 132 - Drawing II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-131

This course continues instruction in the language of drawing and the use of various materials. Emphasis

is placed on experimentation in the use of drawing techniques, media, and graphic materials. Upon completion, students should be able to demonstrate increased competence in the expressive use of graphic form and techniques. (S10831)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 135 - Figure Drawing I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-131

This course introduces rendering the human figure with various drawing materials. Emphasis is placed on the use of the visual elements, anatomy, and proportion in the representation of the draped and undraped figure. Upon completion, students should be able to demonstrate competence in drawing the human figure. (S16219)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 140 - Basic Painting

Class: 0 Lab: 4 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the mechanics of painting. Emphasis is placed on the exploration of painting media through fundamental techniques. Upon completion, students should be able to demonstrate a basic understanding and application of painting. (S13065)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 170 - The Business of Art

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces artists to the skills and knowledge needed to develop their artistic practice into a small business. Emphasis is placed on the skills need to turn an artistic practice into a small business, such as marketing, image documentation, taxes, incorporating, and the logistics of working with galleries or participating in craft shows. Upon completion, students should be able to document their work and advertise it in a professional fashion, file taxes as a sole proprietor, understand the legalities of an LLC, and start to monetize their artistic practice in a variety of settings. (S25727)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 171 - Digital Design I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to introduce students to the elements and principles of design through the use of digital software. Emphasis is placed on developing composition and design skills using vector, raster, and time-based media. Upon completion, students should be able to identify and use tools in digital software, understand and utilize digital and artistic vocabulary, and employ the principles and elements of design to create artwork using digital means. (S25231)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 212 - Gallery Assistantship I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course covers the practical application of display techniques. Emphasis is placed on preparation of artwork for installation, hardware systems, and exhibition graphics. Upon completion, students should be able to demonstrate basic gallery exhibition skills. (S24621)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 213 - Gallery Assistantship II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-212

This course provides additional experience in display techniques. Emphasis is placed on preparation of artwork for exhibition, alternative methods of installation, hardware systems, and exhibition graphics. Upon completion, students should be able to demonstrate independent decision-making and exhibition expertise. (S24619)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 214 - Portfolio and Resume

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course covers resume writing, interview skills, and the preparation and presentation of an art portfolio. Emphasis is placed on the preparation of a portfolio of original artwork, the preparation of a photographic portfolio, approaches to resume writing, and interview techniques. Upon completion,

students should be able to photograph and present a digital portfolio and write an effective resume. (S25044)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 215 - Visual Art Portfolio

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course covers the organization of a comprehensive body of work designed to showcase the visual artist's competencies in selected media and is intended for college transfer or professional advancement. Emphasis includes preparation for gallery exhibition, creation of a digital portfolio, and development of materials associated with best practices for showcasing artistic works, skills, and experience. Upon completion, students should be able to display a professional arrangement of work designed for entry into an advanced visual arts program, application for employment, or presentation to juried gallery exhibitions. (S25161)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 222 - Wood Design I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the historical and contemporary design concepts and their application to the construction of functional and sculptural wood forms. Emphasis is placed on the mastery of hand and power tools. Upon completion, students should be able to demonstrate appropriate use of tools to create unique designs. (S12099)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 231 - Printmaking I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces printmaking: its history, development techniques, and processes. Emphasis is placed on basic applications with investigation into image source and development. Upon completion, students should be able to produce printed images utilizing a variety of methods. (S10482)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 232 - Printmaking II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-231

This course includes additional methods and printmaking processes. Emphasis is placed on the printed image as related to method, source, and concept. Upon completion, students should be able to produce expressive images utilizing both traditional and innovative methods. (S10421)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 235 - Figure Drawing II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-135

This course extends the study and rendering of the draped and undraped human figure. Emphasis is placed on the exploration of materials and approaches to drawing. Upon completion, students should be able to demonstrate creativity in the representation of the figure. (S10465)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 240 - Painting I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the language of painting and the use of various painting materials. Emphasis is placed on the understanding and use of various painting techniques, media, and color principles. Upon completion, students should be able to demonstrate competence in the use of creative processes directed toward the development of expressive form. (S11426)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 241 - Painting II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-240

This course provides a continuing investigation of the materials, processes, and techniques of painting. Emphasis is placed on the exploration of expressive content using a variety of creative processes. Upon completion, students should be able to demonstrate competence in the expanded use of form and

variety. (S11518)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 242 - Landscape Painting

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-240

This course introduces and practices the skills and techniques of open-air painting. Emphasis is placed on techniques of painting summer foliage, skies, and mountains, and the elements of aerial perspective. Upon completion, students should be able to complete an open-air landscape painting employing brush, knife, scumbling, and glazing techniques. (S11451)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 243 - Portrait Painting

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-240

This course covers the portrait as subject matter by use of live models. Topics include composition, color mixing, and the history of portraiture. Upon completion, students should be able to demonstrate competence in the traditional approach to portrait painting. (S11500)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 244 - Watercolor

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic methods and techniques used in watercolor. Emphasis is placed on application, materials, content, and individual expression. Upon completion, students should be able to demonstrate a variety of traditional and nontraditional concepts used in watercolor media. (S11425)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 245 - Metals I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic metal design in traditional and contemporary art forms using brass, copper, and silver. Emphasis is placed on designing and fabricating jewelry, small sculptures, and utilitarian objects. Upon completion, students should be able to design and produce small art objects. (S11515)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 246 - Metals II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-245

This course provides a continuation of metal design utilizing basic methods of casting and other processes. Emphasis is placed on individualized design. Upon completion, students should be able to design and produce expressive forms. (S11473)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 247 - Jewelry I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces a basic understanding of the design and production of jewelry. Emphasis is placed on concepts and techniques using metals and other materials. Upon completion, students should be able to demonstrate an ability to use appropriate methods to create unique jewelry. (S11479)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 248 - Jewelry II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-247

This course is a continuation of the skills learned in ART 247. Emphasis is placed on the creation of individual designs that utilize a variety of techniques such as casting, cloisonne, and plique-a-jour. Upon completion, students should be able to create jewelry which demonstrates originality. (S11436)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 250 - Surface Design: Textiles

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic principles and elements of art as applied to textile surfaces. Emphasis is placed on direct, top-dyed processes that utilize both synthetic and natural dyes, and techniques such as batik, stenciling, and stamping. Upon completion, students should be able to demonstrate a basic understanding of appropriate materials and techniques as they apply to original design on a variety of textile surfaces. (S11144)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 251 - Weaving I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides a basic understanding of the design and production of constructed textiles. Emphasis is placed on traditional weaving techniques. Upon completion, students should be able to warp and dress the loom and use appropriate techniques for the creation of unique woven fabrics. (S11152)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 252 - Weaving II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-251

This course furthers an exploration of creative design as it relates to manipulated fiber construction. Emphasis is placed on traditional and experimental methods. Upon completion, students should be able to create fiber constructions that utilize appropriate techniques for individual expressive designs. (S11125)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 260 - Photography Appreciation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the origins and historical development of photography. Emphasis is placed on the study of composition and history of photography as an art form. Upon completion, students should be

able to recognize and produce, using color transparencies, properly exposed, well-composed photographs. (S12736)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 261 - Photography I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces photographic equipment, theory, and processes. Emphasis is placed on camera operation, composition, darkroom technique, and creative expression. Upon completion, students should be able to successfully expose, develop, and print a well-conceived composition. (S11371)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 262 - Photography II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-261

This course introduces the creative manipulation of alternative photographic materials and processes such as toning, hand coloring, infrared, and multiple exposure. Emphasis is placed on personal vision and modes of seeing. Upon completion, students should be able to create properly exposed images using a variety of photographic materials and processes. (S11289)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 264 - Digital Photography I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces digital photographic equipment, theory and processes. Emphasis is placed on camera operation, composition, computer photo manipulation and creative expression. Upon completion, students should be able to successfully expose, digitally manipulate, and print a well-conceived composition. (S24622)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 265 - Digital Photography II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-264

This course provides exploration of the concepts and processes of photo manipulation through complex composite images, special effects, color balancing and image/text integration. Emphasis is placed on creating a personal vision and style. Upon completion, students should be able to produce well-executed images using a variety of photographic and photo manipulative approaches. (S24620)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 266 - Videography I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces various aspects of basic video production including concept development, scripting, camera operation, and post-production. Emphasis is placed on creative expression, camera handling, story boarding, and editing. Upon completion, students should be able to demonstrate a basic understanding of video camera operation and production techniques. (S11306)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 267 - Videography II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-266

This course is designed to provide a framework for the production of a long-term video project. Emphasis is placed on realization of the unique creative vision. Upon completion, students should be able to produce a thematically coherent, edited video with sound and titling. (S11402)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 271 - Digital Design II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-171

This course includes advanced digital techniques in raster, vector, and time based media. Emphasis is based on creative application and integration of digital technologies. Upon completion, students should be able to demonstrate command of various digital systems to express their personal vision. (S25232)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 275 - Introduction to Graphic Design

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to the field of graphic design. Emphasis is placed on the basic concepts of visual communication, the design process and the ability to evaluate and discuss design issues in a critical manner. Upon completion, students should be able to use contemporary design software and visual language techniques as they apply to creative visual problem-solving involving typography, image manipulation, symbolic representation and page management while being responsive to the relationship between client, designer and audience. (S24464)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 276 - Interactive Media Design

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to the concepts and techniques used in designing and producing interactive projects. Emphasis is placed on the interactive development process, aesthetics of visual solutions, technical proficiency, and graphical user interface (GUI) with projects including digital imaging, web design, simple animation, graphics and copyright issues. Upon completion, students should be able to use contemporary software to solve a variety of multimedia problems for a range of platforms and devices that may include web-based interaction, mobile devices or other emerging technology. (S24476)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 281 - Sculpture I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides an exploration of the creative and technical methods of sculpture with focus on the traditional processes. Emphasis is placed on developing basic skills as they pertain to three-dimensional expression in various media. Upon completion, students should be able to show competence in variety of sculptural approaches. (S16229)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 282 - Sculpture II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-281

This course builds on the visual and technical skills learned in ART 281. Emphasis is placed on developing original solutions to sculptural problems in a variety of media. Upon completion, students should be able to express individual ideas using the techniques and materials of sculpture. (S12071)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 283 - Ceramics I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides an introduction to three-dimensional design principles using the medium of clay. Emphasis is placed on fundamentals of forming, surface design, glaze application, and firing. Upon completion, students should be able to demonstrate skills in slab and coil construction, simple wheel forms, glaze technique, and creative expression. (S11998)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 284 - Ceramics II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-283

This course covers advanced hand building and wheel techniques. Emphasis is placed on creative expression, surface design, sculptural quality, and glaze effect. Upon completion, students should be able to demonstrate a high level of technical competence in forming and glazing with a development of three-dimensional awareness. (S12018)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 285 - Ceramics III

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-284

This course provides the opportunity for advanced self-determined work in sculptural and functional ceramics. Emphasis is placed on developing the technical awareness of clay bodies, slips, engobes, and

firing procedures necessary to fulfill the student's artistic goals. Upon completion, students should be able to demonstrate a knowledge of materials and techniques necessary to successfully create original projects in the clay medium. (S11957)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 286 - Ceramics IV

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ART-285

This course provides the opportunity for self-determined work in sculptural and functional ceramics. Emphasis is placed on developing the technical awareness of glaze materials, glaze formulation, and firing techniques necessary to fulfill the student's artistic goals. Upon completion, students should be able to demonstrate knowledge of materials and techniques necessary to successfully create original projects in the clay medium. (S12082)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 288 - Studio

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides the opportunity for advanced self-determined work beyond the limits of regular studio course sequences. Emphasis is placed on creative self-expression and in-depth exploration of techniques and materials. Upon completion, students should be able to create original projects specific to media, materials, and techniques. (S12053)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ART 289 - Museum Study

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces research methods in the museum setting. Emphasis is placed on the chronology, styles, periods, context, and meaning in art. Upon completion, students should be able to demonstrate the advantage of first-hand and on-site research. (S11951)

ASL 111 - Elementary ASL I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-181

Corequisites: ASL-181

This course introduces the fundamental elements of American Sign Language within a cultural context. Emphasis is placed on the development of basic expressive and receptive skills. Upon completion, students will be able to comprehend and respond with grammatical accuracy to expressive American Sign Language and demonstrate cultural awareness. (S11976)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ASL 112 - Elementary ASL II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-111 Take ASL-182 Take ASL-111; minimum grade C

This course is a continuation of ASL 111 focusing on the fundamental elements of American Sign Language in a cultural context. Emphasis is placed on the progressive development of expressive and receptive skills. Upon completion, the students should be able to comprehend and respond with increasing accuracy to expressive American Sign Language and demonstrate cultural awareness. (S12047)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ASL 181 - ASL Lab 1

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ASL-111

Corequisites: ASL-111

This course provides an opportunity to enhance acquisition of the fundamental elements of American Sign Language. Emphasis is placed on the progressive development of basic expressive and receptive skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to expressive American Sign Language and demonstrate cultural awareness. (S20855)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ASL 182 - ASL Lab 2

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ASL-181 Take ASL-112 Take ASL-181; minimum grade C

This course provides an opportunity to enhance acquisition of the fundamental elements of American Sign Language. Emphasis is placed on the progressive development of basic expressive and receptive skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to expressive American Sign Language and demonstrate cultural awareness. (S20856)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ASL 211 - Intermediate ASL I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-112 Take ASL-281 Take ASL-112; minimum grade C

This course provides a review and expansion of the essential skills of American Sign Language. Emphasis is placed on the progressive development of expressive and receptive skills, study of authentic and representative literacy and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively using American Sign Language about the past, present, and future. (S20054)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ASL 212 - Intermediate ASL II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-211 Take ASL-211; minimum grade C

This course provides a continuation of ASL 211. Emphasis is placed on the continuing development of expressive and receptive skills, with study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. (S16236)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ASL 221 - Advanced ASL I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-212

This course provides an expansion of the essential and advanced skills of ASL, including advanced vocabulary, lexicalized fingerspelling, and complex grammatical structures. Emphasis is placed on the advanced development of expressive, receptive and conversational skills, study of authentic and representative literacy and cultural texts. Upon completion, students will communicate more accurately with advanced complexity, and to present the topics in the various registers, pragmatics and genres of ASL. (S22134)

ASL 250 - Linguistics of ASL

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-112

This course is designed to increase knowledge and skills necessary to linguistically analyze ASL. Emphasis is placed on applying phonology, morphology, syntax, semantics, discourse and socio- linguistics of ASL. Upon completion, students should be able to demonstrate knowledge and understanding of the basic linguistics of ASL through a variety of assessment methods. (S22682)

ASL 281 - ASL Lab 3

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ASL-182 Take ASL-211 Take ASL-182; minimum grade C

This course provides an opportunity to enhance the review and expansion of the essential skills of American Sign Language. Emphasis is placed on the progressive development of expressive and receptive skills through the study of authentic and representative literary and cultural texts through the use of various supplementary learning media and materials. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future. (S20857)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ASL 282 - ASL Lab 4

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take ASL-281

This course provides an opportunity to enhance the review and expansion of the essential skills of American Sign Language. Emphasis is placed on the continuing development of expressive and receptive skills and study of authentic and representative literary and cultural texts thorough the use of various supplementary learning media and materials. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. (S20858)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

AST 111 - Descriptive Astronomy

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: AST-111A

This course introduces an overall view of modern astronomy. Topics include an overview of the solar system, the sun, stars, galaxies, and the larger universe. Upon completion, students should be able to demonstrate an understanding of the universe around them. UGETC (S10553)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

AST 111A - Descriptive Astronomy Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AST-111

Corequisites: AST-111

The course is a laboratory to accompany AST 111. Emphasis is placed on laboratory experiences which enhance the materials presented in AST 111 and which provide practical experience. Upon completion, students should be able to demonstrate an understanding of the universe around them. UGETC (S13670)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

AST 151 - General Astronomy I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the science of modern astronomy with a concentration on the solar system. Emphasis is placed on the history and physics of astronomy and an introduction to the solar system, including the planets, comets, and meteors. Upon completion, students should be able to demonstrate a general understanding of the solar system. UGETC (S10092)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

AST 151A - General Astronomy I Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AST-151

Corequisites: AST-151

The course is a laboratory to accompany AST 151. Emphasis is placed on laboratory experiences which enhance the materials presented in AST 151 and which provide practical experience. Upon completion, students should be able to demonstrate a general understanding of the solar system. UGETC (S10019)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

AST 152 - General Astronomy II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take AST-151

This course is a continuation of AST 151 with primary emphasis beyond the solar system. Topics include the sun, stars, galaxies, and the larger universe, including cosmology. Upon completion, students should be able to demonstrate a working knowledge of astronomy. (S10028)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

AST 152A - General Astronomy II Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AST-151 Take AST-152

The course is a laboratory to accompany AST 152. Emphasis is placed on laboratory experiences which enhance the materials presented in AST 152 and which provide practical experience. Upon completion, students should be able to demonstrate a working knowledge of astronomy. (S12436)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

AST 251 - Observational Astronomy

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: AST-111 or AST-152

This course covers the operation of the telescope and related observatory equipment. Emphasis is placed on the use of the telescope and related observatory equipment, including techniques of data collection, measurements, and data analysis. Upon completion, students should be able to set up a telescope and use the coordinate system to locate objects, collect data, and make measurements with the telescope. (S11574)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ATR 112 - Intro to Automation

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic principles of automated systems and describes the tasks that technicians perform on the job. Topics include the history, development, and current applications of robots and automated systems including their configuration, operation, components, and controls. Upon completion, students should be able to understand the basic concepts of automation and robotic systems. (S23467)

ATR 280 - Robotic Fundamentals

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course covers application, programming, and maintenance fundamentals for robotic devices. Emphasis is placed on terminology, problem solving, robotic systems controls, and hands-on projects. Upon completion, students should be able to apply basic concepts in application, programming, and robotic control systems. (S12171)

AUB 111 - Painting & Refinishing I

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the proper procedures for using automotive refinishing equipment and materials in surface preparation and application. Topics include federal, state, and local regulations, personal safety, refinishing equipment and materials, surface preparation, masking, application techniques, and other related topics. Upon completion, students should be able to identify and use proper equipment and materials in refinishing following accepted industry standards. (S10171)

AUB 112 - Painting & Refinishing II

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take AUB-111

This course covers advanced painting techniques and technologies with an emphasis on identifying problems encountered by the refinishing technician. Topics include materials application, color matching, correction of refinishing problems, and other related topics. Upon completion, students should be able to perform spot, panel, and overall refinishing repairs and identify and correct refinish problems. (S10119)

AUB 114 - Special Finishes

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take AUB-111

This course introduces multistage finishes, custom painting, and protective coatings. Topics include base coats, advanced intermediate coats, clear coats, and other related topics. Upon completion, students should be able to identify and apply specialized finishes based on accepted industry standards. (S10135)

AUB 121 - Non-Structural Damage I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course introduces safety, tools, and the basic fundamentals of body repair. Topics include shop safety, damage analysis, tools and equipment, repair techniques, materials selection, materials usage, and other related topics. Upon completion, students should be able to identify and repair minor direct and indirect damage including removal/repairing/replacing of body panels to accepted standards. (S12230)

AUB 122 - Non-Structural Damage II

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take AUB-121

This course covers safety, tools, and advanced body repair. Topics include shop safety, damage analysis, tools and equipment, advanced repair techniques, materials selection, materials usage, movable glass, and other related topics. Upon completion, students should be able to identify and repair or replace direct and indirect damage to accepted standards including movable glass and hardware. (S12174)

AUB 131 - Structural Damage I

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

This course introduces safety, equipment, structural damage analysis, and damage repairs. Topics include shop safety, design and construction, structural analysis and measurement, equipment, structural glass, repair techniques, and other related topics. Upon completion, students should be able to analyze and perform repairs to a vehicle which has received light/moderate structural damage. (S10839)

AUB 136 - Plastics & Adhesives

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course covers safety, plastic and adhesive identification, and the various repair methods of

automotive plastic components. Topics include safety, identification, preparation, material selection, and the various repair procedures including refinishing. Upon completion, students should be able to identify, remove, repair, and/or replace automotive plastic components in accordance with industry standards. (S10794)

AUB 141 - Mech & Elec Components I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the basic principles of automotive mechanical and electrical components. Topics include personal and environmental safety and suspension and steering, electrical, brake, heating and air-conditioning, cooling, drive train, and restraint systems. Upon completion, students should be able to identify system components and perform basic system diagnostic checks and/or repairs according to industry standards. (S13093)

AUB 162 - Autobody Estimating

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides a comprehensive study of autobody estimating. Topics include collision damage analysis, industry regulations, flat-rate and estimated time, and collision estimating manuals. Upon completion, students should be able to prepare and interpret a damage report. (S11329)

AUC 111 - Auto Customizing Research

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers planning, designs, and research used in automotive customizing. Emphasis is placed on auto customization planning, cost analysis, creative design techniques, and research of available add-on components used in auto customizing. Upon completion, students should be able to develop designs and prepare cost analyses incorporated into a plan of action for customizing vehicles. (S21523)

AUC 112 - Auto Custom Fabrication

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

This course covers modifications of existing vehicle components, as well as fabrication of new vehicle components. Emphasis is placed on basic customizing techniques used on factory original parts, as well as fabrication of custom components using machining processes and customizing techniques. Upon completion, students should be able to modify existing factory components and create custom-fabricated components using auto customizing techniques. (S21524)

AUC 114 - Custom Fiberglass Skills

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

This course will provide instruction in non-metallic customizing and repair techniques. Emphasis will be placed on diagnosis and repair of cracks, proper use of bonding agents, fiberglass body parts removal/replacement, and custom fabrication techniques using fiberglass materials. Upon completion, students should be able to identify types of fiberglass and demonstrate the ability to properly prepare, apply, and finish fiberglass components. (S21526)

AUC 115 - Glass Customizing Methods

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

This course will provide instruction on window removal/replacement, window tinting, and custom glass design etching techniques. Emphasis will be placed on proper removal/replacement, window tinting, laws concerning window tinting, and customizing techniques used to etch designs in auto glasses. Upon completion, students should be able to interpret the laws concerning window tinting, perform removal/replacement/tinting, and use customizing techniques to etch designs on auto glass. (S21527)

AUC 117 - Custom Airbrushing

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course covers custom airbrushing techniques, finish application, and equipment selection. Emphasis is placed on the design and application of custom airbrushing techniques and proper equipment maintenance. Upon completion, students should be able to design and apply custom air brush graphics using a variety of techniques. (S22945)

AUT 116 - Engine Repair

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take AUT-116A

Corequisites: AUT-116A

This course covers the theory, construction, inspection, diagnosis, and repair of internal combustion engines and related systems. Topics include fundamental operating principles of engines and diagnosis, inspection, adjustment, and repair of automotive engines using appropriate service information. Upon completion, students should be able to perform basic diagnosis, measurement and repair of automotive engines using appropriate tools, equipment, procedures, and service information. (S21687)

AUT 116A - Engine Repair Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AUT-116

Corequisites: AUT-116

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include diagnosis, inspection, adjustment, and repair of automotive engines using appropriate service information. Upon completion, students should be able to perform basic diagnosis, measurement and repair of automotive engines using appropriate tools, equipment, procedures, and service information. (S21688)

AUT 123 - Powertrain Diagn & Serv

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers the diagnosis, repair and service of the vehicle powertrain and related systems. Topics include fundamental operating principles of engines and transmissions and use of proper service procedures for diagnosis, service and removal and replacement of major components. Upon completion, students should be able to perform basic service and diagnosis of the powertrain and related systems, and to perform in vehicle repairs and remove and replace components. (S21689)

AUT 141 - Suspension & Steering Sys

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TRN-110

This course covers principles of operation, types, and diagnosis/repair of suspension and steering systems to include steering geometry. Topics include manual and power steering systems and standard and electronically controlled suspension and steering systems. Upon completion, students should be able to service and repair steering and suspension components, check and adjust alignment angles, repair tires, and balance wheels. (S21690)

AUT 141A - Suspension & Steering Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AUT-141 Take TRN-110

Corequisites: AUT-141 TRN-110

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include manual and power steering systems and standard and electronically controlled suspension and steering systems. Upon completion, students should be able to service and repair steering and suspension components, check and adjust alignment angles, repair tires, and balance wheels. (S21691)

AUT 151 - Brake Systems

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take AUT-151A

Corequisites: AUT-151A

This course covers principles of operation and types, diagnosis, service, and repair of brake systems. Topics include drum and disc brakes involving hydraulic, vacuum boost, hydra-boost, electrically powered boost, and anti-lock and parking brake systems. Upon completion, students should be able to diagnose, service, and repair various automotive braking systems. (S21692)

AUT 151A - Brakes Systems Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AUT-151

Corequisites: AUT-151

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include drum and disc brakes involving hydraulic, vacuum-boost, hydra-boost, electrically powered boost, and anti-lock, parking brake systems and emerging brake systems technologies. Upon completion, students should be able to diagnose, service, and repair various automotive braking systems. (S21693)

AUT 163 - Adv Auto Electricity

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: AUT-163A TRN-120

This course covers electronic theory, wiring diagrams, test equipment, and diagnosis, repair, and replacement of electronics, lighting, gauges, horn, wiper, accessories, and body modules. Topics include networking and module communication, circuit construction, wiring diagrams, circuit testing, and troubleshooting. Upon completion, students should be able to properly use wiring diagrams, diagnose, test, and repair wiring, lighting, gauges, accessories, modules, and electronic concerns. (S23604)

AUT 163A - Adv Auto Electricity Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AUT-163 Take TRN-120 Take AUT-163

Corequisites: AUT-163 TRN-120 AUT-163

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include networking and module communication, circuit construction,

wiring diagrams, circuit testing, troubleshooting and emerging electrical/electronic systems technologies. Upon completion, students should be able to properly use wiring diagrams, diagnose, test, and repair wiring, lighting, gauges, accessories, modules, and electronic concerns. (S21699)

AUT 181 - Engine Performance 1

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TRN-110 Take AUT-181A

This course covers the introduction, theory of operation, and basic diagnostic procedures required to restore engine performance to vehicles equipped with complex engine control systems. Topics include an overview of engine operation, ignition components and systems, fuel delivery, injection components and systems and emission control devices. Upon completion, students should be able to describe operation and diagnose/repair basic ignition, fuel and emission related driveability problems using appropriate test equipment/service information. (S21701)

AUT 181A - Engine Performance 1 Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AUT-181 Take TRN-110

Corequisites: AUT-181 TRN-110

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include overviews of engine operation, ignition components and systems, fuel delivery, injection components and systems and emission control devices and emerging engine performance technologies. Upon completion, students should be able to describe operation and diagnose/repair basic ignition, fuel and emission related driveability problems using appropriate test equipment/service information. (S21702)

AUT 212 - Auto Shop Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TRN-110

This course covers the principles of management essential to decision-making, communication, authority, and leadership. Topics include shop supervision, shop organization, customer relations, cost effectiveness and work place ethics. Upon completion, students should be able to describe basic automotive shop operation from a management standpoint. (S21705)

AUT 213 - Automotive Servicing 2

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course is a lab used as an alternative to co-op placement. Emphasis is placed on shop operations, troubleshooting, testing, adjusting, repairing, and replacing components using appropriate test equipment and service information. Upon completion, students should be able to perform a variety of automotive repairs using proper service procedures and to operate appropriate equipment. (S21706)

AUT 221 - Auto Transm/Transaxles

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TRN-110 Take AUT-221A

This course covers operation, diagnosis, service, and repair of automatic transmissions/transaxles. Topics include hydraulic, pneumatic, mechanical, and electrical/electronic operation of automatic drive trains and the use of appropriate service tools and equipment. Upon completion, students should be able to explain operational theory, diagnose and repair automatic drive trains. (S21707)

AUT 221A - Auto Transm/Transax Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AUT-221 TRN-110

Corequisites: AUT-221 TRN-110

This course is an optional lab to be used as an alternative to co-op placement in meeting the NATEF standards for total hours. Topics include hydraulic, pneumatic, mechanical, and electrical/electronic operation of automatic drive trains and the use of appropriate service tools and equipment. Upon completion, students should be able to diagnose and repair automatic drive trains. (S21710)

AUT 231 - Man Trans/Axles/Drtrains

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TRN-110

This course covers the operation, diagnosis, and repair of manual transmissions/transaxles, clutches, driveshafts, axles, and final drives. Topics include theory of torque, power flow, and manual drive train servicing and repair using appropriate service information, tools, and equipment. Upon completion, students should be able to explain operational theory, diagnose and repair manual drive trains. (S22040)

AUT 231A - Man Trans/Ax/Drtrains Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take AUT-231 Take TRN-110

Corequisites: AUT-231 TRN-110

This course is an optional lab for the program that needs to meet NATEF hour standards but does not have a co-op component in the program. Topics include manual drive train diagnosis, service and repair using appropriate service information, tools, and equipment. Upon completion, students should be able to diagnose and repair manual drive trains. (S21712)

AUT 281 - Adv Engine Performance

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take AUT-181 or AUT-183

This course utilizes service information and specialized test equipment to diagnose and repair power train control systems. Topics include computerized ignition, fuel and emission systems, related diagnostic tools and equipment, data communication networks, and service information. Upon completion, students should be able to perform diagnosis and repair. (S21713)

BAF 110 - Principles of Banking

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the fundamentals of bank functions in a descriptive fashion. Topics include banks and the monetary system, the relationship of banks to depositors, the payment functions, bank loans and accounting, regulations, and examinations. Upon completion, students should be able to demonstrate an understanding of the business of banking from a broad perspective. (S24131)

BAF 111 - Teller Training

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of banking teller operations, bank security, and customer relations in preparation for work as a bank teller. Topics include bank profitability, cash and cash handling, checks and other transactions, balancing and setting, and security threats and their detection. Upon completion, students should be able to discuss the components of teller performance and perform effectively as a teller after minimal on-the-job training. (S10163)

BAF 143 - Financial Planning

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the perspectives, principles, and practices of financial planning. Topics include investment, retirement, tax, and estate planning. Upon completion, students should be able to understand the process that looks at a customer's financial picture and recommend strategies to achieve the customer's objectives. (S13055)

BAF 232 - Consumer Lending

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course details the many types of credit arrangements in which a finance charge is paid for the privilege of repaying debt in delayed payments. Topics include consumer credit policy, the loan process, servicing and collecting loans, consumer compliance, and evaluating credit risks. Upon completion, students should be able to identify collection policies and procedures, explain principles of credit evaluation, define open-end credit, and describe indirect lending. (S12709)

BAF 234 - Residential Mort Lending

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the field of mortgage lending and the various financial markets for real estate mortgages. Topics include conventional and government related mortgages, contracts, financial markets, and qualifying prospective loan customers. Upon completion, students should be able to demonstrate an understanding of mortgage loan origination and processing, government regulations, and compliance issues. (S12657)

BAS 120 - Intro to Analytics

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic concepts and applications of analytics. Topics include an overview of the analytical process and the role of the analyst, applied descriptive statistics, and exploratory data analysis. Upon completion, students should be able to demonstrate a basic understanding of analytics for decision-making in business. (S24318)

BAS 121 - Data Visualization

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BAS-120

This course introduces key concepts in data visualization and reporting. Topics include concepts and methods used in graphical representation of data, exploration and reporting of data, and basic linear regression methods. Upon completion, students should be able to effectively use graphical tools to communicate insights about data. (S24319)

BAS 150 - Intro to Analytical Program.

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces statistical software for analytics. Topics include utilization of analytical and statistical software packages for data management, data visualization, and exploratory data analysis.

Upon completion, students should be able to use statistical programming tools to conduct descriptive analytics. (S24320)

BAS 220 - Appl. Analytical Program.

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BAS-150

This course covers applications of statistical software for data management and reporting. Topics include data management, data preprocessing, and modeling including linear and logistic regression analysis using programming tools. Upon completion, students should be able to process data and generate reports that support business decision-making. (S24321)

BAS 221 - Intro to Predictive Analytics

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: BAS-121 and BAS-220

This course introduces foundations of predictive analytics. Topics include basic predictive modeling methods for both classification and regression tasks. Upon completion, students should be able to build and validate predictive models. (S24322)

BAS 230 - Applied Predictive Modeling

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BAS-221

This course covers advanced applications of predictive models. Topics include the advanced use of classification and regression models in real-world scenarios. Upon completion, students should be able to utilize their knowledge and skills in predictive analytics to independently guide decision makers. (S24323)

BAS 240 - Data Structures for Analytics

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: BAS-121 and BAS-220

This course is designed to enhance student proficiency in data management skills for analytics applications. Topics include techniques and methods for identification, extraction, and preparation of data for processing with analytical software. Upon completion, students should be able to demonstrate the skills necessary to effectively organize and combine different data sources for analytic applications. (S24330)

BAS 270 - Adv Analytical Tools & Methods

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: BAS-221 and BAS-240

This course covers the planning and execution of an analytics project that integrates the analytical knowledge and skills acquired through prior coursework. Students will define and carry out an analytics project from inception to final reporting. Upon completion, students should be able to demonstrate their ability to apply analytic methods and best practices in a simulated business setting. (S24333)

BIO 106 - Intro to Anat/Phys/Micro

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course covers the fundamental and principle concepts of human anatomy and physiology and microbiology. Topics include an introduction to the structure and function of cells, tissues, and human organ systems, and an overview of microbiology, epidemiology, and control of microorganisms. Upon completion, students should be able to identify structures and functions of the human body and describe microorganisms and their significance in health and disease. (S14010)

BIO 110 - Principles of Biology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course provides a survey of fundamental biological principles for non-science majors. Emphasis is placed on basic chemistry, cell biology, metabolism, genetics, evolution, ecology, diversity, and other related topics. Upon completion, students should be able to demonstrate increased knowledge and better understanding of biology as it applies to everyday life. UGETC (S24019)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 111 - General Biology I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces the principles and concepts of biology. Emphasis is placed on basic biological chemistry, molecular and cellular biology, metabolism and energy transformation, genetics, evolution, and other related topics. Upon completion, students should be able to demonstrate understanding of life at the molecular and cellular levels. UGETC (S24020)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 112 - General Biology II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take BIO-111

This course is a continuation of BIO 111. Emphasis is placed on organisms, evolution, biodiversity, plant and animal systems, ecology, and other related topics. Upon completion, students should be able to demonstrate comprehension of life at the organismal and ecological levels. UGETC (S24021)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 120 - Introductory Botany

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: BIO-110 or BIO-111

This course provides an introduction to the classification, relationships, structure, and function of plants. Topics include reproduction and development of seed and non-seed plants, levels of organization, form and function of systems, and a survey of major taxa. Upon completion, students should be able to demonstrate comprehension of plant form and function, including selected taxa of both seed and non-seed plants. (S13789)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 130 - Introductory Zoology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: BIO-110 or BIO-111

This course provides an introduction to the classification, relationships, structure, and function of major animal phyla. Emphasis is placed on levels of organization, reproduction and development, comparative systems, and a survey of selected phyla. Upon completion, students should be able to demonstrate comprehension of animal form and function including comparative systems of selected groups. (S11571)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 140 - Environmental Biology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BIO-140A

Corequisites: BIO-140A

This course introduces environmental processes and the influence of human activities upon them. Topics include ecological concepts, population growth, natural resources, and a focus on current environmental problems from scientific, social, political, and economic perspectives. Upon completion, students should be able to demonstrate an understanding of environmental interrelationships and of contemporary environmental issues. (S14156)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 140A - Environmental Biology Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take BIO-140

Corequisites: BIO-140

This course provides a laboratory component to complement BIO 140. Emphasis is placed on laboratory and field experience. Upon completion, students should be able to demonstrate a practical understanding of environmental interrelationships and of contemporary environmental issues. (S13084)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 143 - Field Biology Minicourse

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces the biological and physical components of a field environment. Emphasis is placed on a local field environment with extended field trips to other areas. Upon completion, students should be able to demonstrate an understanding of the biological and physical components of the specific biological environment. (S14183)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 145 - Ecology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: BIO-110 or BIO-111

This course provides an introduction to ecological concepts using an ecosystems approach. Topics include energy flow, nutrient cycling, succession, population dynamics, community structure, and other related topics. Upon completion, students should be able to demonstrate comprehension of basic ecosystem structure and dynamics. (S14188)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 146 - Regional Natural History

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course is an interdisciplinary and historical analysis of the natural resources of the region. Emphasis is placed on geology, climate, forest systems, watersheds, water resources, and fish and wildlife resources of the region. Upon completion, students should be able to demonstrate comprehension of the natural history and the integration of the natural resources of the region. (S14171)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 150 - Genetics in Human Affairs

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: BIO-110 or BIO-111

This course describes the importance of genetics in everyday life. Topics include the role of genetics in human development, birth defects, cancer and chemical exposure, and current issues including genetic engineering and fertilization methods. Upon completion, students should be able to understand the relationship of genetics to society today and its possible influence on our future. (S12454)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 155 - Nutrition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the biochemistry of foods and nutrients with consideration of the physiological effects of specialized diets for specific biological needs. Topics include cultural, religious, and economic factors that influence a person's acceptance of food, as well as nutrient requirements of the various life stages. Upon completion, students should be able to identify the functions and sources of nutrients, the

mechanisms of digestion, and the nutritional requirements of all age groups. (S12502)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 163 - Basic Anat & Physiology

Class: 4 Lab: 2 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course provides a basic study of the structure and function of the human body. Topics include a basic study of the body systems as well as an introduction to homeostasis, cells, tissues, nutrition, acid-base balance, and electrolytes. Upon completion, students should be able to demonstrate a basic understanding of the fundamental principles of anatomy and physiology and their interrelationships. (S13508)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 165 - Anatomy and Physiology I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course is the first of a two-course sequence which provides a comprehensive study of the anatomy and physiology of the human body. Topics include the structure, function, and interrelationship of organ systems with emphasis on the processes which maintain homeostasis. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. (S13524)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 166 - Anatomy and Physiology II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take BIO-165

This course is the second in a two-course sequence which provides a comprehensive study of the anatomy and physiology of the human body. Topics include the structure, function, and interrelationship of organ systems with emphasis on the processes which maintain homeostasis. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and the interrelationships of all body systems. (S13496)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 168 - Anatomy and Physiology I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course provides a comprehensive study of the anatomy and physiology of the human body. Topics include body organization, homeostasis, cytology, histology, and the integumentary, skeletal, muscular, and nervous systems and special senses. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. (S11555)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 169 - Anatomy and Physiology II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take BIO-168

This course provides a continuation of the comprehensive study of the anatomy and physiology of the human body. Topics include the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems as well as metabolism, nutrition, acid-base balance, and fluid and electrolyte balance. Upon completion, students should be able to demonstrate an in-depth understanding of principles of anatomy and physiology and their interrelationships. (S11629)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 173 - Microbes in World Affairs

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: BIO-110 or BIO-111 Take ENG-095 RED-090 or ENG-111

This course provides an integrated and comprehensive study of the microbial world and its influence on global events and human affairs. Topics include plant and animal diseases caused by viral, bacterial, and fungal pathogens and their impacts on history, industrial microbiology, biotechnology, and microbial ecology. Upon completion, students should be able to demonstrate an understanding of the importance of microbes in human and world affairs. (S12302)

BIO 175 - General Microbiology

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: BIO-110, BIO-111, BIO-163, BIO-165, or BIO-168

This course covers principles of microbiology with emphasis on microorganisms and human disease. Topics include an overview of microbiology and aspects of medical microbiology, identification and control of pathogens, disease transmission, host resistance, and immunity. Upon completion, students should be able to demonstrate knowledge of microorganisms and the disease process as well as aseptic and sterile techniques. (S20491)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 180 - Biological Chemistry

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-095 RED-090 or ENG-111;

This course provides an introduction to basic biochemical processes in living systems. Topics include properties of carbohydrates, lipids, proteins, nucleic acids, vitamins, and buffers, with emphasis on biosynthesis, degradation, function, and equilibrium. Upon completion, students should be able to demonstrate an understanding of fundamental biochemical concepts. (S14065)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 224 - Local Flora Spring

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an introduction to the identification of native plants. Emphasis is placed on spring wild flowers. Upon completion, students should be able to identify a variety of spring wild flowers and native plants. (S14262)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 230 - Entomology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take BIO-112

This course covers the biology of insects. Topics include harmful and beneficial insects, their identification, classification, life cycles, behavior, distribution, economic importance, and the methods involved in collection and preservation. Upon completion, students should be able to identify common

insects and describe their biology and ecology. (S12635)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 242 - Nat Resource Conservation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set: Set 1: BIO 112 Set 2: BIO 140 and BIO 140A

This course covers the importance of natural resources and their role in our environment. Emphasis is placed on the physical, biological, and ecological principles underlying natural resource conservation with attention to the biological consequences of human impacts. Upon completion, students should be able to demonstrate an understanding of natural resource conservation. (S22584)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 243 - Marine Biology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: BIO-110 or BIO-111

This course covers the physical and biological components of the marine environment. Topics include major habitats, the diversity of organisms, their biology and ecology, marine productivity, and the use of marine resources by humans. Upon completion, students should be able to identify various marine habitats and organisms and to demonstrate a knowledge of their biology and ecology. (S13534)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 250 - Genetics

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take BIO-112

This course covers principles of prokaryotic and eukaryotic cell genetics. Emphasis is placed on the molecular basis of heredity, chromosome structure, patterns of Mendelian and non-Mendelian inheritance, evolution, and biotechnological applications. Upon completion, students should be able to recognize and describe genetic phenomena and demonstrate knowledge of important genetic principles. (S12198)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 265 - Cell Biology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: BIO-111, BIO-275, or BIO-280

This course provides an in-depth study of cellular organization and communication, biochemical cell processes, and cellular growth, replication and death. Topics include organelle structure and function, nucleic acid and protein synthesis, gene organization and regulation, cell signaling mechanisms, bioenergetics, cell motility and apoptosis. Upon completion, students should be able to demonstrate knowledge of cell structure and function and lab skills including microscopy, cell culture, and molecular biology techniques. (S22560)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 271 - Pathophysiology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: BIO-163, BIO-166, or BIO-169

This course provides an in-depth study of human pathological processes and their effects on homeostasis. Emphasis is placed on interrelationships among organ systems in deviations from homeostasis. Upon completion, students should be able to demonstrate a detailed knowledge of pathophysiology. (S13002)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 275 - Microbiology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: BIO 111, BIO 163, BIO 165, or BIO 168

This course covers principles of microbiology and the impact these organisms have on man and the environment. Topics include the various groups of microorganisms, their structure, physiology, genetics, microbial pathogenicity, infectious diseases, immunology, and selected practical applications. Upon completion, students should be able to demonstrate knowledge and skills including microscopy, aseptic technique, staining, culture methods, and identification of microorganisms. (S26030)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BIO 280 - Biotechnology

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: BIO-111, CHM-131, or CHM-151

This course provides experience in selected laboratory procedures. Topics include proper laboratory techniques in biology and chemistry. Upon completion, students should be able to identify laboratory techniques and instrumentation in basic biotechnology. (S22696)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BMS 117 - Marine Spray Finishing

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers the fundamental techniques used in the preparation and application of marine finishes, using modern coatings and spray equipment common to the marine manufacturing and service industry. Emphasis is placed on safety, product data sheets, mixing ratios, proper spray technique, troubleshooting finishes and equipment. Upon completion, students should be able to correctly operate tools to efficiently prepare surfaces, apply fairing compounds, primers and finish coats to industry standards. (S21973)

BMS 118 - Basic Boat Operation

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers the skills necessary to safely operate small boats and watercraft. Topics include safe boating practices, maneuvering boats and watercraft in waterways or marinas, and familiarity with basic nautical rules and boating etiquette. Upon completion, students should be able to demonstrate safe operation and proficiency in docking, launching, and retrieving small boats and watercraft, and exhibit proper maneuvering techniques within inland waterways. (S25572)

BPA 120 - Petit Fours & Pastries

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course introduces the basic principles of the preparation and plating of a variety of petit fours and individual dessert pastries. Emphasis is placed on traditional and contemporary petit fours and pastries utilizing updated production methods. Upon completion, students should be able to produce individual pastries and petit fours for buffet and special event settings. (S22827)

BPA 130 - European Cakes and Tortes

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course introduces the production of a wide variety of classical and modern cakes suitable for restaurants, retail shops and large-scale production. Emphasis is placed on classic cakes using the methods of mixing, filling, glazing and icing. Upon completion, students should be able to prepare, assemble, and decorate gelatin-based and layered tortes and cakes such as Bavarian, Dobos, and Sacher. (S22828)

BPA 150 - Artisan & Specialty Bread

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: CUL-110 and CUL-160

This course provides an advanced study in the art and craft of bread making. Topics include pertinent formulas and techniques associated with naturally leavened loaves, hearth breads, focaccia, flat breads, and other breads utilizing a variety of grains. Upon completion, students should be able to prepare artisan and specialty breads that meet or exceed the expectations of restaurant and retail publics. (S20739)

BPA 165 - Hot and Cold Desserts

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course covers the principles and techniques of frozen desserts, souffles, cobblers, crisps, and strudel dough products. Topics include bombes, parfaits, baked Alaska, ice cream, sorbets, sherbets and granites; hand-stretched strudel products, crepes, and hot/cold souffles. Upon completion, student should be able to prepare and plate hot and cold desserts with suitable sauces and garnishes. (S22829)

BPA 210 - Cake Design & Decorating

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course covers advanced concepts in the design and decoration of wedding cakes and other specialty cakes. Topics include baking, filling, and assembling cakes; cake design; finishing techniques utilizing gum paste, fondant, and royal icing; and advanced piping skills. Upon completion, students should be able to design, create, finish and evaluate the quality of wedding and specialty cakes. (S22830)

BPA 220 - Confection Artistry

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: CUL-110 and CUL-160

This course introduces the principles and techniques of decorative sugar work and confectionary candy. Topics include nougat, marzipan modeling, pastillage and cocoa painting, confection candy and a variety of sugar techniques including blown, spun, poured and pulled. Upon completion, students should be able to prepare edible centerpieces and confections to enhance dessert buffets and plate presentations. (S20764)

BPA 220 - Confection Artistry

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course introduces the principles and techniques of decorative sugar work and confectionary candy. Topics include nougat, marzipan modeling, pastillage and cocoa painting, confection candy and a variety of sugar techniques including blown, spun, poured and pulled. Upon completion, students should be able to prepare edible centerpieces and confections to enhance dessert buffets and plate presentations. (S25780)

BPA 230 - Chocolate Artistry

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course provides a study in the art and craft of chocolate. Topics include chocolate tempering, piping, and molding; decorative work associated with cakes and centerpieces; and the candy production techniques of filling, enrobing and dipping. Upon completion, students should be able to properly evaluate tempered chocolate and produce a variety of chocolate candies and decorative elements for garnishing desserts. (S22831)

BPA 230A - Chocolate Artistry Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take All: CUL-110 and CUL-160 Take BPA-230

This course provides a laboratory experience for enhancing student skills in the art and craft of chocolate. Emphasis is placed on chocolate tempering, piping, and molding; decorative work associated with cakes and centerpieces; and candy production techniques of filling, enrobing and dipping. Upon completion, students should be able to demonstrate a basic proficiency in the preparation of decorative chocolate centerpieces, garnishes and candies. (S22803)

BPA 240 - Plated Desserts

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course provides a study in the elements and principles of design as they relate to plated desserts. Topics include plate composition, portioning, flavor pairings, textures, temperatures, eye appeal, balance, color harmony and plate decorating/painting techniques such as stenciling and chocolate striping. Upon completion, students should be able to demonstrate competence in combining a variety of dessert components enhanced with plate decorating techniques. (S22832)

BPA 250 - Dessert/Bread Production

Class: 1 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take BPA-150

This course is designed to merge artistry and innovation with the practical baking and pastry techniques utilized in a production setting. Emphasis is placed on quantity bread and roll-in dough production, plated and platter presentations, seasonal/theme product utilization and cost effectiveness. Upon completion, students should be able to plan, prepare and evaluate breads and desserts within a commercial environment and determine production costs and selling prices. (S23072)

BPA 260 - Pastry & Baking Marketing

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: BPA-150 and BPA-210 Take BPA-250

This course is designed to cover the marketing concepts and merchandising trends utilized in bakery and pastry operations. Emphasis is placed on menu planning, pricing products/strategies, resale and wholesale distribution methods, legal implications, and advertising techniques. Upon completion, students should be able to create a marketing plan that will serve as a basis for a capstone experience. (S22834)

BPR 111 - Print Reading

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the basic principles of print reading. Topics include line types, orthographic projections, dimensioning methods, and notes. Upon completion, students should be able to interpret basic prints and visualize the features of a part or system. (S23466)

BPR 121 - Blueprint Reading-Mech

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: BPR-111 or MAC-131

This course covers the interpretation of intermediate blueprints. Topics include tolerancing, auxiliary

views, sectional views, and assembly drawings. Upon completion, students should be able to read and interpret a mechanical working drawing. (S10436)

BPR 130 - Print Reading-Construction

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the interpretation of prints and specifications that are associated with design and construction projects. Topics include interpretation of documents for foundations, floor plans, elevations, and related topics. Upon completion, students should be able to read and interpret construction prints and documents. (S23275)

BTB 101 - Boat Building I

Class: 5 Lab: 15 Clinical: 0 Work: 0 **Credits: 10**

Prerequisites: Take DFT-100

Corequisites: DFT-100

This course introduces the modern wood and composite boat shop. Topics include maintaining, sharpening, and safely using hand and power tools; building station molds; and setting up the building jig prior to planking a boat. Upon completion, students should be able to set up a building jig for any boat and use it for the planking process. (S23276)

BTB 101A - Boat Bldg I (part 1)

Class: 2 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take DFT-100

Corequisites: DFT-100

This course introduces the modern wood and composite boat shop. Topics include maintaining, sharpening, and safely using hand and power tools; lofting; and properly utilizing materials common in the boat-building industry. Upon completion, students should be able to loft a simple flat or V-bottom boat and build it using sheet plywood construction methods. This course is restricted to diploma and/or certificate programs. (L22868)

BTB 101AB - Boat Building I

Class: 3 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take DFT-100

Corequisites: DFT-100

This course introduces the modern wood and composite boat shop. Topics include maintaining, sharpening, and safely using hand and power tools; building station molds; and setting up the building jig prior to planking a boat. Upon completion, students should be able to set up a building jig for any boat and use it for the planking process. (L25548)

BTB 101B - Boat Bldg I (part 2)

Class: 2 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take BTB-101A DFT-100

This course introduces the modern wood and composite boat shop. Topics include maintaining, sharpening, and safely using hand and power tools; lofting; and properly utilizing materials common in the boat-building industry. Upon completion, students should be able to loft a simple flat or V-bottom boat and build it using sheet plywood construction methods. This course is restricted to diploma and/or certificate programs. (L22869)

BTB 101BB - Boat Building I

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take DFT-100 Take BTB-101AB

Corequisites: BTB-101AB DFT-100

This course introduces the modern wood and composite boat shop. Topics include maintaining, sharpening, and safely using hand and power tools; building station molds; and setting up the building jig prior to planking a boat. Upon completion, students should be able to set up a building jig for any boat and use it for the planking process. (L25549)

BTB 102 - Boat Building II

Class: 4 Lab: 15 Clinical: 0 Work: 0 **Credits: 9**

Prerequisites: Take BTB-101

This course introduces more advanced hull development. Topics include advanced lofting, building jigs and birdcage building forms, wood and composite lamination techniques, marine finishing materials and methods, and quality control procedures. Upon completion, students should be able to build, fit out, and finish a small boat using modern fabrics, core materials, and methods of construction. (S23277)

BTB 103 - Yacht Joiner Practices I

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take BTB-101 Take BTB-102

Corequisites: BTB-101 BTB-102

This course introduces the fundamental skills and attention to detail necessary to fine yacht joinery. Emphasis is placed on fitting, mortise/tenon, and dowel joints; fitting dadoes in grooves; and building a project to close tolerances from a blueprint. Upon completion, students should be able to build a cabinet carcass with face frame, round corner posts, laminate surfaces, and a dove-tailed drawer. (S23278)

BTB 104 - Yacht Joiner Practices II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BTB-103 Take BTB-102 Take BTB-105

Corequisites: BTB-103 BTB-102 BTB-105

This course covers advanced yacht joiner practices and emphasizes finishing cabinets and rough-in of yacht interiors. Topics include manufacturing and fitting moldings, door construction methods, bright work finishing, and bulkhead and cabin sole fitting and installation. Upon completion, students should be able to build raised panel doors and moldings, apply modern finishes, and rough in bulkheads, soles, and yacht furniture. (S23279)

BTB 105 - Yacht Repair/Renovation

Class: 3 Lab: 4 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take BTB-102

This course introduces repair/renovation principles and methods for wood and fiberglass boats. Emphasis is placed on surveying boats for needed repairs, planning repairs, and estimating costs in tools, materials, and techniques used in repair and renovation. Upon completion, students should be able to plan and execute repairs in wood and fiberglass boats (structural and cosmetic) and execute marine refinishing techniques. (S23280)

BTB 106 - Engine Install/Systems

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

This course familiarizes students with marine engines and related systems, installation, troubleshooting and minor repairs. Topics covered are drivetrains and cooling, fuel, exhaust, and electrical systems for a typical inboard engine. Upon completion, students should be able to install, troubleshoot, and perform minor repairs on marine engines and related systems. (S21974)

BTB 107 - Boat Electrical Systems

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

This course teaches students the skills necessary to wire 12-volt direct current and 120-volt alternating current electrical systems found on modern boats. Topics covered are electrical system and wiring sizing, batteries, wire harnesses, distribution panels, electronic component installation, and electrical system troubleshooting. Upon completion, students should be able to install a complete electrical system on a mock-up yacht. (S21975)

BTB 108 - Boat Plumbing Systems

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course is an introduction to the plumbing systems used on modern yachts. Topics will include pressurized hot water systems, water closets, sanitation systems, thru hulls, and sea cocks. Upon completion, students should be able to install heads, showers, and drains found on yachts. (S23843)

BTB 109 - Yacht Rigging

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an introduction of Marlinspike Seamanship, rigging and tuning masts, and commissioning yachts. Topics covered are knot tying, whipping lines, standing and running rigging on spars, maintaining winches, anchoring systems and care and rigging of sails. Upon completion, students should be able to efficiently complete yacht rigging competencies to industry standards. (S23281)

BTB 110 - Fiberglass Boat Bldg I

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

This course introduces fiberglass boat building using polyester and vinylester resins in conjunction with single skin and composite covered construction. Topics covered are the types and uses of resins, fabrics, and cores, and chopper and gel coat guns. Upon completion, students should be able to build a composite core boat and a single skin boat. (S21978)

BTB 111 - Fiberglass Boat Bldg II

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take BTB-110

This course covers the skills necessary to build fiberglass molds for hulls and decks. Topics include the proper use of tooling gel coats, proper lay-ups, heat problems during lay-ups, reinforcing techniques and resin infusion. Upon completion, students should be able to build a female mold, a "quickie" female deck mold and various "quickie" male molds for custom parts. (S21979)

BTB 112 - Fiberglass Boat Repairs

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers many aspects of fiberglass hull and deck repair. Topics include performing repairs on single skin hulls, composite hulls, decks and gel coats. Upon completion, students should be able to demonstrate skills necessary to repair damaged laminates to boat industry standards. (S21980)

BTB 115 - Hull and Joinerwork Prep

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course covers the proper techniques for prepping all boat surfaces for stain, paint or varnish. Emphasis is placed on the safe use of faring and glazing compounds and various primers. Upon completion, students should be able to demonstrate the techniques required to prepare a boat hull for various finishes and topcoats. (S23862)

BUS 110 - Introduction to Business

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a survey of the business world. Topics include the basic principles and practices of contemporary business. Upon completion, students should be able to demonstrate an understanding of business concepts as a foundation for studying other business subjects. (S24149)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BUS 115 - Business Law I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the student to the legal and ethical framework of business. Contracts, negotiable instruments, the law of sales, torts, crimes, constitutional law, the Uniform Commercial Code, and the court systems are examined. Upon completion the student should be able to identify legal and ethical issues that arise in business decisions and the laws that apply to them. (S24153)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BUS 121 - Business Math

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers fundamental mathematical operations and their application to business problems. Topics include payroll, pricing, interest and discount, commission, taxes, and other pertinent uses of

mathematics in the field of business. Upon completion, students should be able to apply mathematical concepts to business. (S14289)

BUS 125 - Personal Finance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a study of individual and family financial decisions. Emphasis is placed on building useful skills in buying, managing finances, increasing resources, and coping with current economic conditions. Upon completion, students should be able to develop a personal financial plan. (S14300)

BUS 135 - Principles of Supervision

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BUS-110

This course introduces the basic responsibilities and duties of the supervisor and his/her relationship to higher-level supervisors, subordinates, and associates. Emphasis is placed on effective utilization of the work force and understanding the role of the supervisor. Upon completion, students should be able to apply supervisory principles in the work place. (S12738)

BUS 137 - Principles of Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to be an overview of the major functions of management. Emphasis is placed on planning, organizing, controlling, directing, and communicating. Upon completion, students should be able to work as contributing members of a team utilizing these functions of management. (S24151)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BUS 139 - Entrepreneurship I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an introduction to the principles of entrepreneurship. Topics include self-analysis of entrepreneurship readiness, the role of entrepreneur in economic development, legal problems, organizational structure, sources of financing, budgeting, and cash flow. Upon completion, students should have an understanding of the entrepreneurial process and issues faced by entrepreneurs. (S22030)

BUS 147 - Business Insurance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course surveys the basic concepts of risk management. Topics include principles and applications of health, property, life, and casualty insurance. Upon completion, students should be able to evaluate different insurance needs and assist an organization in acquiring adequate insurance coverage. (S13591)

BUS 225 - Business Finance

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ACC-120 Take BUS-121

This course provides an overview of business financial management. Emphasis is placed on financial statement analysis, time value of money, management of cash flow, risk and return, and sources of financing. Upon completion, students should be able to interpret and apply the principles of financial management. (S13686)

BUS 228 - Business Statistics

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the use of statistical methods and tools in evaluating research data for business applications. Emphasis is placed on basic probability, measures of spread and dispersion, central tendency, sampling, regression analysis, and inductive inference. Upon completion, students should be able to apply statistical problem solving to business. (S23950)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

BUS 230 - Small Business Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the challenges of entrepreneurship including the startup and operation of a small business. Topics include market research techniques, feasibility studies, site analysis, financing alternatives, and managerial decision making. Upon completion, students should be able to develop a small business plan. (S11937)

BUS 239 - Bus Applications Seminar

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One Set: Set 1: ACC-120, BUS-115, BUS-137, MKT-120, and ECO-151 Set 2: ACC-120, BUS-115, BUS-137, MKT-120, and ECO-251 Set 3: ACC-120, BUS-115, BUS-137, MKT-120, and ECO-252

This course is designed as a capstone course for Business Administration majors. Emphasis is placed on decision making in the areas of management, marketing, production, purchasing, and finance. Upon completion, students should be able to apply the techniques, processes, and vital professional skills needed in the work place. (S12076)

BUS 240 - Business Ethics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces contemporary and controversial ethical issues that face the business community. Topics include moral reasoning, moral dilemmas, law and morality, equity, justice and fairness, ethical standards, and moral development. Upon completion, students should be able to demonstrate an understanding of their moral responsibilities and obligations as members of the workforce and society. (S14002)

BUS 253 - Leadership and Mgt Skills

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course includes a study of the qualities, behaviors, and personal styles exhibited by leaders. Emphasis is placed on coaching, counseling, team building, and employee involvement. Upon completion, students should be able to identify and exhibit the behaviors needed for organizational effectiveness. (S13328)

BUS 260 - Business Communication

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-110 or ENG-111 Take One: CIS-110 or CIS-111

This course is designed to develop skills in writing business communications. Emphasis is placed on business reports, correspondence, and professional presentations. Upon completion, students should be able to communicate effectively in the work place. (S23621)

BUS 270 - Professional Development

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides basic knowledge of self-improvement techniques as related to success in the professional world. Topics include positive human relations, job-seeking skills, and projecting positive self-image. Upon completion, students should be able to demonstrate competent personal and professional skills necessary to get and keep a job. (S11540)

BUS 280 - REAL Small Business

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

This course introduces hands-on techniques and procedures for planning and opening a small business, including the personal qualities needed for entrepreneurship. Emphasis is placed on market research, finance, time management, and day-to-day activities of owning/operating a small business. Upon completion, students should be able to write and implement a viable business plan and seek funding. (S14264)

BUS 285 - Business Management Issues

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BUS-137 Take ACC-120 BUS-115 ECO-151 MKT-120

This course covers contemporary issues that affect successful businesses and their managers and employees. Emphasis is placed on using case studies and exercises to develop analytical and problem-solving skills, ethics, quality management concepts, team skills, and effective communication. Upon completion, students should be able to apply the specific knowledge and skills covered to become more effective managers and employees. (S14221)

CAR 111 - Carpentry I

Class: 3 Lab: 15 Clinical: 0 Work: 0 **Credits: 8**

This course introduces the theory and construction methods associated with the building industry, including framing, materials, tools, and equipment. Topics include safety, hand/power tool use, site preparation, measurement and layout, footings and foundations, construction framing, and other related topics. Upon completion, students should be able to safely lay out and perform basic framing skills with supervision. (S16248)

CAR 111AB - Carpentry I

Class: 2 Lab: 8 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the theory and construction methods associated with the building industry, including framing, materials, tools, and equipment. Topics include safety, hand/power tool use, site preparation, measurement and layout, footings and foundations, construction framing, and other related topics. Upon completion, students should be able to safely lay out and perform basic framing skills with supervision. (L27329)

CAR 111BB - Carpentry I

Class: 2 Lab: 8 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CAR-111AB

Corequisites: CAR-111AB

This course introduces the theory and construction methods associated with the building industry, including framing, materials, tools, and equipment. Topics include safety, hand/power tool use, site preparation, measurement and layout, footings and foundations, construction framing, and other related topics. Upon completion, students should be able to safely lay out and perform basic framing skills with supervision. (L27330)

CAR 112 - Carpentry II

Class: 3 Lab: 15 Clinical: 0 Work: 0 **Credits: 8**

Prerequisites: Take CAR-111

This course covers the advanced theory and construction methods associated with the building industry including framing and exterior finishes. Topics include safety, hand/power tool use, measurement and layout, construction framing, exterior trim and finish, and other related topics. Upon completion, students should be able to safely frame and apply exterior finishes to a residential building with supervision. (S16249)

CAR 113 - Carpentry III

Class: 3 Lab: 9 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take CAR-111

This course covers interior trim and finishes. Topics include safety, hand/power tool use, measurement and layout, specialty framing, interior trim and finishes, cabinetry, and other related topics. Upon completion, students should be able to safely install various interior trim and finishes in a residential building with supervision. (S11773)

CAR 113A - Carpentry III - a

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CAR-111

This course covers interior trim and finishes. Topics include safety, hand/power tool use, measurement and layout, specialty framing, interior trim and finishes, cabinetry, and other related topics. Upon completion, students should be able to safely install various interior trim and finishes in a residential building with supervision. (L23142)

CAR 113B - Carpentry III - B

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CAR-111

This course covers interior trim and finishes. Topics include safety, hand/power tool use, measurement and layout, specialty framing, interior trim and finishes, cabinetry, and other related topics. Upon completion, students should be able to safely install various interior trim and finishes in a residential building with supervision. (L23143)

CAR 114 - Residential Bldg Codes

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers building codes and the requirements of state and local construction regulations. Emphasis is placed on the minimum requirements of the North Carolina building codes related to residential structures. Upon completion, students should be able to determine if a structure is in compliance with North Carolina building codes. (S11702)

CAR 115 - Res Planning/Estimating

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BPR-130

This course covers project planning, management, and estimating for residential or light commercial buildings. Topics include planning and scheduling, interpretation of working drawings and specifications, estimating practices, and other related topics. Upon completion, students should be able to perform quantity take-offs and cost estimates. (S11735)

CCT 110 - Intro to Cyber Crime

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces and explains the various types of offenses that qualify as cyber crime activity. Emphasis is placed on identifying cyber crime activity and the response to these problems from both the private and public domains. Upon completion, students should be able to accurately describe and define cyber crime activities and select an appropriate response to deal with the problem. (S11628)

CCT 112 - Ethics & High Technology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers ethical considerations and accepted standard practices applicable to technological investigations and computer privacy issues relative to the cyber crime investigator. Topics include illegal and unethical investigative activities, end-justifying-the-means issues, and privacy issues of massive personal database information gathered by governmental sources. Upon completion, students should be able to examine their own value systems and apply ethical considerations in identifiable cyber crime investigations. (S11599)

CCT 121 - Computer Crime Invest.

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the fundamental principles of computer crime investigation processes. Topics include crime scene/incident processing, information gathering techniques, data retrieval, collection and preservation of evidence, preparation of reports and court presentations. Upon completion, students should be able to identify cyber crime activity and demonstrate proper investigative techniques to process the scene and assist in case prosecution. (S10005)

CCT 231 - Technology Crimes & Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the applicable technological laws dealing with the regulation of cyber security and criminal activity. Topics include an examination of state, federal and international laws regarding cyber crime with an emphasis on both general and North Carolina statutes. Upon completion, students should be able to identify the elements of cyber crime activity and discuss the trends of evolving laws. (S12211)

CCT 250 - Network Vulnerabilities I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take NET-125 or NET-110 Take CET-130

This course introduces students to penetration testing, network vulnerabilities, and hacking. Topics include an overview of traditional network security, system hardening, and known weaknesses. Upon completion, students should be able to evaluate weaknesses of traditional and wireless network for the purpose of incident response, reconstruction, and forensic investigation. (S25622)

CCT 251 - Network Vulnerabilities II

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CCT-250

This course advances students' knowledge of penetration testing, network vulnerabilities, and hacking. Topics include analyzing advanced techniques for circumventing network security hardware and software. Upon completion, students should be able to assemble test kits for multiple operating systems, scan and footprint networks, and perform advanced forensic investigation. (S21750)

CCT 260 - Mobile Phone Examination

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CET-150

This course introduces the unique skills and methodologies necessary to assist in the investigation and prosecution of cyber crimes involving mobile phones. Topics include the basics of the cellular networks as well as data extraction from GSM, iDEN and CDMA handsets. Upon completion, students should be able to use the course processes and methodologies to obtain forensic evidence from GSM, iDEN and CDMA handsets. (S22653)

CCT 289 - Capstone Project

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: CCT-231 or CCT-220

This course provides experience in cyber crime investigations or technology security audits in either the public or private domain. Emphasis is placed on student involvement with businesses or agencies dealing with technology security issues or computer crime activities. Upon completion, students should be able to successfully analyze, retrieve erased evidence and testify in mock proceedings against these criminal entrepreneurs. (S10238)

CET 111 - Computer Upgrade/Repair I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers repairing, servicing, and upgrading computers and peripherals in preparation for industry certification. Topics include CPU/memory/bus identification, disk subsystems, hardware/software installation/configuration, common device drivers, data recovery, system maintenance, and other related topics. Upon completion, students should be able to safely repair and/or upgrade computer systems to perform within specifications. (S21574)

CET 125 - Voice and Data Cabling

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides an understanding of the industry and its worldwide standards, types of media and cabling, physical and logical networks, including signal transmission. Topics include network design documentation, part list set-up, pulling and mounting cable, cable management, wiring closets, patch panel installation and termination including cable testing. Upon completion, students should be able to understand documentation, design, installation and safety issues associated with voice and data cabling. (S20154)

CET 130 - Operating System Prin

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the concepts, usage, internals and applications of operating systems used in engineering technology. Topics include resource management, shells, schedulers, file systems,

networking, software considerations and other related topics. Upon completion, students should be able to choose and evaluate an operating system for engineering applications. (S21771)

CET 150 - Computer Forensics I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CTS-120 or CET-130

This course is an introduction to computer forensic concepts, with emphasis on computer forensic methods and best practices. Topics include computer system analysis, physical and logical storage methods for different types of media, tools to recover and analyze data from storage media, system security. Upon completion, students should be able to use diagnostic and investigative techniques to identify and retrieve data from various types of computer media. (S21772)

CET 172 - Internet Technologies

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

The goal of this course is to provide an introduction to Internet technologies and prepare students to pass vendor independent internet technology certification exams. Topics cover using different Internet protocols, programming on the Internet, the OSI model, the Internet infrastructure, security, and e-commerce. Upon completion, students should be prepared to take vendor independent Internet technology certification exams. (S21775)

CET 211 - Computer Upgrade/Repair II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110

Corequisites: CIS-110

This course covers concepts of repair, service, and upgrade of computers and peripherals in preparation for industry certification. Topics may include resolving resource conflicts and system bus specifications, configuration and troubleshooting peripherals, operating system configuration and optimization, and other related topics. Upon completion, students should be able to identify and resolve system conflicts and optimize system performance. (S21575)

CET 240 - Network Security

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CET-172

This course is to provide a comprehensive study of network and computer security. Topics include security principles, establishing baselines, policies, network hardening, legal issues, disaster recovery,

attack and defense techniques and technologies. Upon completion, students should be able to identify, establish, and maintain an appropriate security model on a computer network. (S21779)

CET 245 - Internet Servers

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CET-130

This course covers the setup and management of Internet server hardware and software. Topics include TCP/IP, FTP, SMTP, and HTTP; installation and configuration of server software for web, FTP, DNS, mail, and other services. Upon completion, students should be able to set up and maintain Internet servers. (S21578)

CET 250 - Computer Forensics II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CET-150

This course is a study in computer forensic practices with emphasis placed on methods used for prevention, detection, and apprehension of perpetrators of cyber-criminal activity. Topics include the roles of Chief Security Officers in the securing of system breaches, vulnerabilities, network and server security issues, OS and application security risks. Upon completion students should be able to identify and collect evidence to prove unauthorized and inappropriate access on computer systems and networks. (S21781)

CHM 115 - Concepts in Chemistry

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic chemical concepts and their applications to daily life for non-science majors. Topics include air pollution, global warming, energy, world of polymers, water and its importance to a technological society, food, drugs, and nuclear chemistry. Upon completion, students should be able to discuss, apply, and appreciate the impact of chemistry on modern society. (S11771)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 115A - Concepts in Chemistry Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take CHM-115

Corequisites: CHM-115

This course is a laboratory for CHM 115. Emphasis is placed on laboratory experiences that enhance materials presented in CHM 115. Upon completion, students should be able to utilize basic laboratory procedures and apply them to chemical concepts presented in CHM 115. (S12468)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 121 - Foundations of Chemistry

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed for those who have no previous high school chemistry or a grade of C or less in high school chemistry. Topics include matter, structure of the atom, nomenclature, chemical equations, bonding and reactions; mathematical topics include measurements, scientific notation, and stoichiometry. Upon completion, students should be able to demonstrate an understanding of chemical concepts and an ability to solve related problems in subsequent chemistry courses. (S14237)

CHM 130 - Gen, Org, & Biochemistry

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with a minimum grade of P2), BSP-4002 (with a minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course provides a survey of basic facts and principles of general, organic, and biochemistry. Topics include measurement, molecular structure, nuclear chemistry, solutions, acid-base chemistry, gas laws, and the structure, properties, and reactions of major organic and biological groups. Upon completion, students should be able to demonstrate an understanding of fundamental chemical concepts. (S12547)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 130A - Gen, Org, & Biochem Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take CHM-130 Take DRE-098, ENG-002(with a minimum grade of P2), BSP-4002,(with a minimum grade of P2), RED-090, ENG-095, ENG-011 or,ENG-111

Corequisites: CHM-130

This course is a laboratory for CHM 130. Emphasis is placed on laboratory experiences that enhance materials presented in CHM 130. Upon completion, students should be able to utilize basic laboratory procedures and apply them to chemical principles presented in CHM 130. (S10032)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 131 - Introduction to Chemistry

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002,(with minimum grade of P2), RED-090, ENG-095, ENG-011 or,ENG-111 Take 1 group:,Group 1: DMA-010 DMA-020 DMA-030 DMA-040 DMA-050 DMA-060,DMA-070 DMA-080,Group 2: MAT-003(with minimum grade of P2),Group 3: BSP-4003(with minimum grade of P2),Group 4: DMA-065 Take CHM-131A

Corequisites: CHM-131A

This course introduces the fundamental concepts of inorganic chemistry. Topics include measurement, matter and energy, atomic and molecular structure, nuclear chemistry, stoichiometry, chemical formulas and reactions, chemical bonding, gas laws, solutions, and acids and bases. Upon completion, students should be able to demonstrate a basic understanding of chemistry as it applies to other fields. (S12692)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 131A - Intro to Chemistry Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take CHM-131 Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002,(with minimum grade of P2), RED-090, ENG-095, ENG-011 or,ENG-111 Take 1 group:,Group 1: DMA-010 DMA-020 DMA-030 DMA-040 DMA-050 DMA-060,DMA-070 DMA-080,Group 2: MAT-003(with minimum grade of P2),Group 3: BSP-4003(with minimum grade of P2),Group 4: DMA-065

Corequisites: CHM-131

This course is a laboratory to accompany CHM 131. Emphasis is placed on laboratory experiences that enhance materials presented in CHM 131. Upon completion, students should be able to utilize basic laboratory procedures and apply them to chemical principles presented in CHM 131. (S12403)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 132 - Organic and Biochemistry

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take one set: Set 1: CHM-131 and CHM-131A Set 2: CHM-151

This course provides a survey of major functional classes of compounds in organic and biochemistry. Topics include structure, properties, and reactions of the major organic and biological molecules and basic principles of metabolism. Upon completion, students should be able to demonstrate an understanding of fundamental chemical concepts needed to pursue studies in related professional fields. (S20490)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 135 - Survey of Chemistry I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course provides an introduction to inorganic chemistry. Emphasis is placed on measurement, atomic structure, bonding, molecular geometry, nomenclature, reactions, the mole concept, stoichiometric calculations, states of matter, and the gas laws. Upon completion, students should be able to demonstrate a basic understanding of chemistry as it applies to other fields. (S12720)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 136 - Survey of Chemistry II

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CHM-135

This course is a continuation of CHM 135 with further study of inorganic reactions and an introduction to organic, biological, and nuclear chemistry. Topics include solutions, acid-base theory, redox reactions, chemical kinetics, organic chemistry, biochemistry, and nuclear chemistry. Upon completion, students should be able to demonstrate a basic understanding of chemistry as it applies to other fields. (S12583)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 151 - General Chemistry I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002,(with minimum grade of P2), RED-090, ENG-095, ENG-011 or,ENG-111 Mat prereq only: Must be completed prior to taking,this course. Take 1 group: Group 1: DMA-010 DMA-020 DMA-030,DMA-040 DMA-050 Group 2: MAT-003(with minimum grade of P2),Group 3: BSP-4003(with minimum grade of P2) Group 4: DMA-065,Group 5: MAT 021 Group 6: MAT 121 Group 7: MAT 043 Group 8:,MAT 143 Group 9: MAT 052 Group 10: MAT 152 Group 11: MAT 071,Group 12: MAT 171 Take 1 group:,Group 1: DMA-010 DMA-020

DMA-030 DMA-040 DMA-050 ,Group 2: MAT-003(with a minimum grade of P2),Group 3: BSP-4003(with a minimum grade of P2),Group 4: DMA-065,Group 5: MAT 021 ,Group 6: MAT 121 ,Group 7: MAT 043 ,Group 8: MAT 143 ,Group 9: MAT 052 ,Group 10: MAT 152 ,Group 11: MAT 071,Group 12: MAT 171,Must be completed prior to taking this course.

This course covers fundamental principles and laws of chemistry. Topics include measurement, atomic and molecular structure, periodicity, chemical reactions, chemical bonding, stoichiometry, thermochemistry, gas laws, and solutions. Upon completion, students should be able to demonstrate an understanding of fundamental chemical laws and concepts as needed in CHM 152. UGETC (S12258)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 152 - General Chemistry II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CHM-151

This course provides a continuation of the study of the fundamental principles and laws of chemistry. Topics include kinetics, equilibrium, ionic and redox equations, acid-base theory, electrochemistry, thermodynamics, introduction to nuclear and organic chemistry, and complex ions. Upon completion, students should be able to demonstrate an understanding of chemical concepts as needed to pursue further study in chemistry and related professional fields. UGETC (S12137)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 251 - Organic Chemistry I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CHM-152

This course provides a systematic study of the theories, principles, and techniques of organic chemistry. Topics include nomenclature, structure, properties, reactions, and mechanisms of hydrocarbons, alkyl halides, alcohols, and ethers; further topics include isomerization, stereochemistry, and spectroscopy. Upon completion, students should be able to demonstrate an understanding of the fundamental concepts of covered organic topics as needed in CHM 252. (S13152)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 252 - Organic Chemistry II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CHM-251

This course provides continuation of the systematic study of the theories, principles, and techniques of organic chemistry. Topics include nomenclature, structure, properties, reactions, and mechanisms of aromatics, aldehydes, ketones, carboxylic acids and derivatives, amines and heterocyclics; multi-step synthesis will be emphasized. Upon completion, students should be able to demonstrate an understanding of organic concepts as needed to pursue further study in chemistry and related professional fields. (S13184)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 263 - Analytical Chemistry

Class: 3 Lab: 4 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take One: CHM-132 or CHM-152

This course covers the knowledge and laboratory skills needed to perform chemical analysis. Emphasis is placed on developing laboratory techniques used in the separation, identification, and quantification of selected substances. Upon completion, students should be able to perform laboratory techniques employed in substance identification and volumetric analysis and interpret the results. (S23614)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CHM 271 - Biochemical Principles

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CHM-252

This course covers fundamental principles of biochemistry. Topics include structures, properties, reactions, and mechanisms of biomacromolecules including amino acids, peptides, proteins, carbohydrates and nucleic acids, enzymatic metabolic pathways, and biochemical genetics. Upon completion, students should be able to demonstrate an understanding of fundamental biochemical processes. (S11454)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CIS 70 - Fundamentals of Computing

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course covers fundamental functions and operations of the computer. Topics include identification of components, overview of operating systems, and other basic computer operations. Upon completion,

students should be able to operate computers, access files, print documents and perform basic applications operations. (S11239)

CIS 110 - Introduction to Computers

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces computer concepts, including fundamental functions and operations of the computer. Topics include identification of hardware components, basic computer operations, security issues, and use of software applications. Upon completion, students should be able to demonstrate an understanding of the role and function of computers and use the computer to solve problems. Students registering for this course should be aware a Windows-based PC/Laptop is required to take this course. Chromebooks, tablets, or Apple-based OS products will not work with the content of this course. Students registering for this course should be aware a Windows-based PC/Laptop is required to take this course. Chromebooks, tablets, or Apple-based OS products will not work with the content of this course. (S21058)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CIS 111 - Basic PC Literacy

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an overview of computer concepts. Emphasis is placed on the use of personal computers and software applications for personal and fundamental workplace use. Upon completion, students should be able to demonstrate basic personal computer skills. Students registering for this course should be aware a Windows-based PC/Laptop is required to take this course. Chromebooks, tablets, or Apple-based OS products will not work with the content of this course. (S21059)

CIS 115 - Intro to Prog & Logic

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020, DMA-030, and DMA-040 Set 2: DMA-025 and DMA-040 Set 3: MAT-121 Set 4: MAT-171 Set 5: MAT-003 Set 6: BSP-4003

This course introduces computer programming and problem solving in a structured program logic environment. Topics include language syntax, data types, program organization, problem solving methods, algorithm design, and logic control structures. Upon completion, students should be able to use top-down algorithm design and implement algorithmic solutions in a programming language. (S25440)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CJC 100 - Basic Law Enforcement Training

Class: 10 Lab: 30 Clinical: 0 Work: 0 **Credits: 20**

This course covers the basic skills and knowledge needed for entry-level employment as a law enforcement officer in North Carolina. Topics are divided into general units of study: legal, patrol duties, law enforcement communications, investigations, practical application and sheriff-specific. Upon successful completion, the student will be able to demonstrate competence in the topics and areas required for the state comprehensive certification examination.

(S25046)

CJC 110 - Basic Law Enforcement BLET

Class: 10 Lab: 30 Clinical: 0 Work: 0 **Credits: 20**

This course covers the basic skills and knowledge needed for entry-level employment as a law enforcement officer in North Carolina. Topics include those mandated by North Carolina Administration Code as essential for functioning in law enforcement. Upon completion, the student should be able to demonstrate competence in the topics required for the state comprehensive certification examination. This is a certificate-level course (S25329)

CJC 111 - Intro to Criminal Justice

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the components and processes of the criminal justice system. Topics include history, structure, functions, and philosophy of the criminal justice system and their relationship to life in our society. Upon completion, students should be able to define and describe the major system components and their interrelationships and evaluate career options. (S10631)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CJC 112 - Criminology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces deviant behavior as it relates to criminal activity. Topics include theories of crime causation; statistical analysis of criminal behavior; past, present, and future social control initiatives; and other related topics. Upon completion, students should be able to explain and discuss various theories of crime causation and societal response. (S10598)

CJC 113 - Juvenile Justice

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the juvenile justice system and related juvenile issues. Topics include an overview of the juvenile justice system, treatment and prevention programs, special areas and laws unique to juveniles, and other related topics. Upon completion, students should be able to identify/discuss juvenile court structure/procedures, function and jurisdiction of juvenile agencies, processing/detention of juveniles, and case disposition. (S10602)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CJC 114 - Investigative Photography

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers the operation of digital photographic equipment and its application to criminal justice. Topics include the use of digital cameras, storage of digital images, the retrieval of digital images and preparation of digital images as evidence. Upon completion, students should be able to demonstrate and explain the role and use of digital photography, image storage and retrieval in criminal investigations. (S20900)

CJC 120 - Interviews/Interrogations

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers basic and special techniques employed in criminal justice interviews and interrogations. Emphasis is placed on the interview/interrogation process, including interpretation of verbal and physical behavior and legal perspectives. Upon completion, students should be able to conduct interviews/interrogations in a legal, efficient, and professional manner and obtain the truth from suspects, witnesses, and victims. (S11674)

CJC 121 - Law Enforcement Operations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces fundamental law enforcement operations. Topics include the contemporary evolution of law enforcement operations and related issues. Upon completion, students should be able to explain theories, practices, and issues related to law enforcement operations. (S11746)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CJC 122 - Community Policing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the historical, philosophical, and practical dimensions of community policing. Emphasis is placed on the empowerment of police and the community to find solutions to problems by forming partnerships. Upon completion, students should be able to define community policing, describe how community policing strategies solve problems, and compare community policing to traditional policing. (S11648)

CJC 131 - Criminal Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the history/evolution/principles and contemporary applications of criminal law. Topics include sources of substantive law, classification of crimes, parties to crime, elements of crimes, matters of criminal responsibility, and other related topics. Upon completion, students should be able to discuss the sources of law and identify, interpret, and apply the appropriate statutes/elements. (S11110)

CJC 132 - Court Procedure & Evidence

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers judicial structure/process/procedure from incident to disposition, kinds and degrees of evidence, and the rules governing admissibility of evidence in court. Topics include consideration of state and federal courts, arrest, search and seizure laws, exclusionary and statutory rules of evidence, and other related issues. Upon completion, students should be able to identify and discuss procedures necessary to establish a lawful arrest/search, proper judicial procedures, and the admissibility of evidence. (S11046)

CJC 141 - Corrections

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the history, major philosophies, components, and current practices and problems of the field of corrections. Topics include historical evolution, functions of the various components, alternatives to incarceration, treatment programs, inmate control, and other related topics. Upon completion, students should be able to explain the various components, processes, and functions of the correctional system. (S12643)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CJC 151 - Intro to Loss Prevention

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the concepts and methods related to commercial and private security systems. Topics include the historical, philosophical, and legal basis of security, with emphasis on security surveys, risk analysis, and associated functions. Upon completion, students should be able to demonstrate and understand security systems, risk management, and the laws relative to loss prevention. (S10203)

CJC 152 - Intro to Sec/Protect Service

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the various components, processes, and operational characteristics associated with private security and loss prevention services. Topics include armed/unarmed security guard/officer hiring criteria including licensing, job responsibilities, career pathways, professional conduct and communication, public relations, emergency procedures, law, first aide, legal issues and liability, workplace violence, patrol techniques, and the security industry. Upon completion, students should be able to evaluate career options and define and describe the major system components, processes, and operational characteristics associated with the private security industry. (S25262)

CJC 153 - Private Security Operations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the various operations associated with private security and loss prevention services. Topics include strategies for protecting individuals and company assets, report writing, interview techniques, crime and accident prevention, courtroom procedures, observation techniques, traffic direction, surveillance, substance abuse, law enforcement relationships, and emergency procedures. Upon completion, students should be able to demonstrate an understanding of the various operational characteristics common to the private security industry. (S25264)

CJC 154 - Private Security Business

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the business and managerial aspects specific to private security and loss prevention services. Topics include profitability, personnel management, finances, rules, policies, and law, organizational structure, sales management, and issues specific to private security and loss prevention services. Upon completion, students should be able to explain the basic characteristics required of an effective private security and loss prevention services business. (S25265)

CJC 160 - Terrorism: Underlying Issu

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course identifies the fundamental reasons why America is a target for terrorists, covering various domestic/international terrorist groups and ideologies from a historical aspect. Emphasis is placed upon recognition of terrorist crime scene; weapons of mass destruction; chemical, biological, and nuclear terrorism; and planning considerations involving threat assessments. Upon completion, students should be able to identify and discuss the methods used in terrorists' activities and complete a threat assessment for terrorists' incidents. (S20701)

CJC 170 - Critical Incident Mgmt Pub Saf

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course prepares the student to specialize in the direct response, operations, and management of critical incidents. Emphasis is placed upon the theoretical and applied models to understand and manage disasters, terrorism, and school/work place violence. Upon completion, the student should be able to identify and discuss managerial techniques legal issues, and response procedures to critical incidents. (S20591)

CJC 212 - Ethics & Comm Relations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers ethical considerations and accepted standards applicable to criminal justice organizations and professionals. Topics include ethical systems; social change, values, and norms; cultural diversity; citizen involvement in criminal justice issues; and other related topics. Upon completion, students should be able to apply ethical considerations to the decision-making process in identifiable criminal justice situations. (S10970)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CJC 213 - Substance Abuse

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a study of substance abuse in our society. Topics include the history and classifications of drug abuse and the social, physical, and psychological impact of drug abuse. Upon completion, students should be able to identify various types of drugs, their effects on human behavior and society, and treatment modalities. (S10983)

CJC 214 - Victimology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the study of victims. Emphasis is placed on roles/characteristics of victims, victim interaction with the criminal justice system and society, current victim assistance programs, and other related topics. Upon completion, students should be able to discuss and identify victims, the uniqueness of victims' roles, and current victim assistance programs. (S10951)

CJC 215 - Organization & Administration

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the components and functions of organization and administration as it applies to the agencies of the criminal justice system. Topics include operations/functions of organizations; recruiting, training, and retention of personnel; funding and budgeting; communications; span of control and discretion; and other related topics. Upon completion, students should be able to identify and discuss the basic components and functions of a criminal justice organization and its administrative operations. (S11008)

CJC 221 - Investigative Principles

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the theories and fundamentals of the investigative process. Topics include crime scene/incident processing, information gathering techniques, collection/preservation of evidence, preparation of appropriate reports, court presentations, and other related topics. Upon completion, students should be able to identify, explain, and demonstrate the techniques of the investigative process, report preparation, and courtroom presentation. (S12498)

CJC 222 - Criminalistics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the functions of the forensic laboratory and its relationship to successful criminal investigations and prosecutions. Topics include advanced crime scene processing, investigative techniques, current forensic technologies, and other related topics. Upon completion, students should be able to identify and collect relevant evidence at simulated crime scenes and request appropriate laboratory analysis of submitted evidence. (S12396)

CJC 225 - Crisis Intervention

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces critical incident intervention and management techniques as they apply to operational criminal justice practitioners. Emphasis is placed on the victim/offender situation as well as

job-related high stress, dangerous, or problem-solving citizen contacts. Upon completion, students should be able to provide insightful analysis of emotional, violent, drug-induced, and other critical and/or stressful incidents that require field analysis and/or resolution. (S12466)

CJC 231 - Constitutional Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

The course covers the impact of the Constitution of the United States and its amendments on the criminal justice system. Topics include the structure of the Constitution and its amendments, court decisions pertinent to contemporary criminal justice issues, and other related topics. Upon completion, students should be able to identify/discuss the basic structure of the United States Constitution and the rights/procedures as interpreted by the courts. (S10090)

CJC 232 - Civil Liability

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers liability issues for the criminal justice professional. Topics include civil rights violations, tort liability, employment issues, and other related topics. Upon completion, students should be able to explain civil trial procedures and discuss contemporary liability issues. (S10037)

CJC 233 - Correctional Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces statutory/case law pertinent to correctional concepts, facilities, and related practices. Topics include examination of major legal issues encompassing incarceration, probation, parole, restitution, pardon, restoration of rights, and other related topics. Upon completion, students should be able to identify/discuss legal issues which directly affect correctional systems and personnel. (S10073)

CJC 240 - Law Enfor Mgt. & Supervis

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a study of the best known methods and practices of police leadership and management. Topics include the role of the manager in law enforcement, communications, time-management in law enforcement, managing problems, training and law enforcement productivity. Upon completion, students should be able to identify and discuss methods and practices capable of moving law enforcement agencies forward into the twenty-first century. (S25334)

CMT 112 - Construction Mgt I

Class: 4 Lab: 4 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take CST-111 and CMT-214;

This course introduces students to the field of construction management technology. Topics include job planning, work methods, materials, equipment, and other related topics. Upon completion, students should be able to demonstrate basic knowledge of methods, materials, equipment, and the logical sequence of a construction project. (S21745)

CMT 120 - Codes and Inspections

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers building codes and the code inspections process used in the design and construction of residential and commercial buildings. Emphasis is placed on commercial, residential, and accessibility (ADA) building codes. Upon completion, students should understand the building code inspections process and apply building code principals and requirements to construction projects. (S23269)

CMT 210 - Construction Management Fund

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the student to the fundamentals of effective supervision emphasizing professionalism through knowledge and applied skills. Topics include safety, planning and scheduling, contracts, problem-solving, communications, conflict resolution, recruitment, employment laws and regulations, leadership, motivation, teamwork, discipline, setting objectives, and training. Upon completion, students should be able to demonstrate the basic skills necessary to be successful as a supervisor in the construction industry. (S23270)

CMT 212 - Total Safety Performance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: CMT-210

This course covers the importance of managing safety and productivity equally by encouraging people to take individual responsibility for safety and health in the workplace. Topics include safety management, controlling construction hazards, communicating and enforcing policies, OSHA compliance, personal responsibility and accountability, safety planning, training, and personal protective equipment. Upon completion, the student should be able to properly supervise safety at a construction jobsite and qualify for OSHA Training Certification. (S20398)

CMT 214 - Planning and Scheduling

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CMT-210 and BPR-130

This course covers the need for and the process of planning construction projects, as well as the mechanics and vocabulary of project scheduling. Topics include project preplanning, scheduling formats, planning for production, short interval planning, schedule updating and revising, and computer-based planning and scheduling. Upon completion, the student should be able to understand the need for planning and scheduling, the language and logic of scheduling, and use of planning skills. (S13439)

CMT 218 - Human Relations Issues

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CMT-210

This course provides instruction on human relations issues as they relate to construction project supervision. Topics include relationships, human behavior, project staffing issues, teamwork, effective communication networks, laws and regulations, and identifying and responding to conflict, crisis, and discipline. Upon completion, the student will demonstrate an understanding of the importance of human relations in the success of a construction project. (S13461)

COE 111AA - Co-Op Work Experience I - AA

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L24169)

COE 111AB - Co-Op Work Exp I - AA Bus

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23417)

COE 111AC - Co-Op Work Exp I - Accounting

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work

experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22814)

COE 111AS - Co-Op Work Experience I - AS

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L24171)

COE 111BA - Co-Op Work Exp I - Bus Admin

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22816)

COE 111CJ - Co-Op Work Exp I - Criminal Ju

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take COE-115CJ

Corequisites: COE-115CJ

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23315)

COE 111CM - Co-Op Work Exp I - Elect Com

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22818)

COE 111CS - Co-Op Work Exp I - AA Comm

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23415)

COE 111CT - Co-Op Wk Exp I - Chem Tech

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L24473)

COE 111CU - Co-Op Work Exp I - Culinary

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take COE-115CU

Corequisites: COE-115CU

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22820)

COE 111EC - Co-Op Work Exp I - Early Child

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23201)

COE 111EE - Co-Op Work Exp I - Ele/Electro

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work

experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23515)

COE 111ET - Co-Op Work Exp I - Ele Eng Tec

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. COOP for Electrical/Engineering Technology (L23446)

COE 111FA - Co-Op Work Exp I - AFA Drama

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23419)

COE 111FV - Co-Op Work Exp I - Film/Video

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23482)

COE 111GS - Co-Op Work Exp I - AA General

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23413)

COE 111HR - Co-Op Work Exp I - Hotel/Res

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take COE-115HR

Corequisites: COE-115HR

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22822)

COE 111ID - Co-Op Work Exp I - Int Design

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22824)

COE 111LG - Co-Op Work Exp I - Landscaping

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23199)

COE 111MO - Co-Op Work Exp I - Med Off Adm

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L24323)

COE 111MT - Co-Op Work Experience I - Mt

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23292)

COE 111NT - Co-Op Work Exp I - Nuc Mnt Tec

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23550)

COE 111OS - Co-Op Work Exp I - Office Sys

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22826)

COE 111PA - Co-Op Work Exp I-Paralegal

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L23207)

COE 111SI - Co-Op Wk Exp I - Spa Inter

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L24475)

COE 112EE - Co-Op Work Experience I - Elec

Class: 0 Lab: 0 Clinical: 0 Work: 20 **Credits: 2**

This course provides work experience with a college approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22828)

COE 115CJ - Work Exp Seminar I - Crim.

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take COE-111, COE-112, COE-113 and COE-114

Corequisites: COE-111 COE-112 COE-113 COE-114

This course description may be written by the individual colleges. (L23317)

COE 115CU - Work Exp Seminar I - Culinary

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take COE-111, COE-112, COE-113 and COE-114

Corequisites: COE-111 COE-112 COE-113 COE-114

This course description may be written by the individual colleges. (L22830)

Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22864)

COE 1310S - Co-Op Work Exp III - Office Sy

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides work experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L22866)

COM 110 - Introduction to Communication

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the basic concepts of communication and the skills necessary to communicate in various contexts. Emphasis is placed on communication theories and techniques used in interpersonal group, public, intercultural, and mass communication situations. Upon completion, students should be able to explain and illustrate the forms and purposes of human communication in a variety of contexts. (S13264)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 111 - Voice and Diction I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides guided practice in the proper production of speech. Emphasis is placed on improving speech, including breathing, articulation, pronunciation, and other vocal variables. Upon completion, students should be able to demonstrate effective natural speech in various contexts. (S13362)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 120 - Intro Interpersonal Com

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the practices and principles of interpersonal communication in both dyadic and group settings. Emphasis is placed on the communication process, perception, listening, self-disclosure, speech apprehension, ethics, nonverbal communication, conflict, power, and dysfunctional communication relationships. Upon completion, students should be able to demonstrate interpersonal communication skills, apply basic principles of group discussion, and manage conflict in interpersonal communication situations. UGETC (S21722)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 130 - Nonverbal Communication

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: COM-110 or COM-120

This course introduces the contemporary study of nonverbal communication in daily life. Topics include haptics, kinesics, proxemics, facial displays, and appearance. Upon completion, students should be able to analyze/interpret nonverbal communication and demonstrate greater awareness of their own nonverbal communication habits. (S22359)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 140 - Intro Intercultural Com

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces techniques of cultural research, definitions, functions, characteristics, and impacts of cultural differences in public address. Emphasis is placed on how diverse backgrounds influence the communication act and how cultural perceptions and experiences determine how one sends and receives messages. Upon completion, students should be able to demonstrate an understanding of the principles and skills needed to become effective in communicating outside one's primary culture. (S22118)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 150 - Intro. to Mass Comm.

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

Corequisites: ENG-112 ENG-113 ENG-114

This course introduces print and electronic media and the new information technologies in terms of communication theory and as economic, political, and social institutions. Topics include the nature, history, functions, and responsibilities of mass communication industries in a global environment and their role and impact in American society. Upon completion, students should be able to demonstrate awareness of the pervasive nature of mass media and how media operate in an advanced post-industrial society. (S22466)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 160 - Small Group Communication

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the theory, practice, and critical analysis of communication in the small group setting. Emphasis is placed on group development, conflict, and conformity; leadership skills and styles; group roles and ranks; and decision making, problem solving, and conflict resolution. Upon completion, students should be able to apply topics of gender, culture, and social-emotional functions within group settings. (S21739)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 231 - Public Speaking

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides instruction and experience in preparation and delivery of speeches within a public setting and group discussion. Emphasis is placed on research, preparation, delivery, and evaluation of informative, persuasive, and special occasion public speaking. Upon completion, students should be able to prepare and deliver well-organized speeches and participate in group discussion with appropriate audiovisual support. UGETC (S12601)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COM 251 - Debate I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the principles of debate. Emphasis is placed on argument, refutation, research, and logic. Upon completion, students should be able to use research skills and logic in the presentation of ideas within the context of formal debate. (S12166)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

COS 111 - Cosmetology Concepts I

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take COS-112

This course introduces basic cosmetology concepts. Topics include safety, first aid, sanitation, bacteriology, anatomy, diseases and disorders, hygiene, product knowledge, chemistry, ethics, manicures, and other related topics. Upon completion, students should be able to safely and competently apply cosmetology concepts in the salon setting. (S12363)

COS 111A - Cosmetology Concepts I a

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ENG-085 RED-080 ENG-095 RED-090 or ENG-111; Take COS-112

Corequisites: COS-112

This course introduces basic cosmetology concepts. Topics include safety, first aid, sanitation, bacteriology, anatomy, diseases and disorders, hygiene, product knowledge, chemistry, ethics, manicures, and other related topics. Upon completion, students should be able to safely and competently apply cosmetology concepts in the salon setting. (L23138)

COS 111B - Cosmetology Concepts I B

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ENG-085 RED-080 ENG-095 RED-090 or ENG-111; Take COS-112

Corequisites: COS-112

This course introduces basic cosmetology concepts. Topics include safety, first aid, sanitation, bacteriology, anatomy, diseases and disorders, hygiene, product knowledge, chemistry, ethics, manicures, and other related topics. Upon completion, students should be able to safely and competently apply cosmetology concepts in the salon setting. (L23139)

COS 112 - Salon I

Class: 0 Lab: 24 Clinical: 0 Work: 0 **Credits: 8**

Prerequisites: Take COS-111

This course introduces basic salon services. Topics include scalp treatments, shampooing, rinsing, hair color, design, haircutting, permanent waving, pressing, relaxing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate salon services. (S12316)

COS 112A - Salon I - a

Class: 0 Lab: 12 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take COS-111

Corequisites: COS-111

This course introduces basic salon services. Topics include scalp treatments, shampooing, rinsing, hair color, design, haircutting, permanent waving, pressing, relaxing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate salon services. (L23140)

COS 112B - Salon I - B

Class: 0 Lab: 12 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take COS-111

Corequisites: COS-111

This course introduces basic salon services. Topics include scalp treatments, shampooing, rinsing, hair color, design, haircutting, permanent waving, pressing, relaxing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate salon services. (L23141)

COS 113 - Cosmetology Concepts II

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: COS-111 and COS-112

This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, chemistry, manicuring, chemical restructuring, and hair coloring. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting. (S24638)

COS 113AB - Cosmetology Concepts II

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take COS-114AB Take COS-111 COS-112;

Corequisites: COS-114AB

This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, chemistry, manicuring, chemical restructuring, and hair coloring. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting. (L25680)

COS 113BB - Cosmetology Concepts II

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take COS-114BB Take COS-111 COS-112;

Corequisites: COS-114BB

This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, chemistry, manicuring, chemical restructuring, and hair coloring. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting. (L25681)

COS 114 - Salon II

Class: 0 Lab: 24 Clinical: 0 Work: 0 **Credits: 8**

Prerequisites: Take All: COS-111 and COS-112

This course provides experience in a simulated salon setting. Topics include basic skin care, manicuring, nail application, scalp treatments, shampooing, rinsing, hair color, design, haircutting, chemical restructuring, pressing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services. (S24639)

COS 114AB - Salon II

Class: 0 Lab: 12 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: TAKE COS-113AB Take COS-111 COS-112; Take COS-113AB

Corequisites: COS-113AB

This course provides experience in a simulated salon setting. Topics include basic skin care, manicuring, nail application, scalp treatments, shampooing, rinsing, hair color, design, haircutting, chemical restructuring, pressing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services. (L25682)

COS 114BB - Salon II

Class: 0 Lab: 12 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take COS-113BB Take COS-111 COS-112;;Take COS-113AB,Take COS 114-AB Take COS-113BB

Corequisites: COS-113BB

This course provides experience in a simulated salon setting. Topics include basic skin care, manicuring, nail application, scalp treatments, shampooing, rinsing, hair color, design, haircutting, chemical restructuring, pressing, wigs, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services. (L25683)

COS 115 - Cosmetology Concepts III

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: COS-111 and COS-112

This course covers more comprehensive cosmetology concepts. Topics include safety, product knowledge, salon management, salesmanship, skin care, electricity/light therapy, wigs, thermal hair styling, lash and brow tinting, superfluous hair removal, and other related topics. Upon completion, students should be able to safely and competently apply these cosmetology concepts in the salon setting. (S24640)

COS 116 - Salon III

Class: 0 Lab: 12 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: COS-111 and COS-112

This course provides comprehensive experience in a simulated salon setting. Emphasis is placed on intermediate-level of skin care, manicuring, scalp treatments, shampooing, hair color, design, haircutting, chemical restructuring, pressing, and other related topics. Upon completion, students should be able to safely and competently demonstrate these salon services. (S24641)

COS 117 - Cosmetology Concepts IV

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: COS-111 and COS-112 Take COS-113 or COS-115

This course covers advanced cosmetology concepts. Topics include chemistry and hair structure, advanced cutting and design, and an overview of all cosmetology concepts in preparation for the licensing examination. Upon completion, students should be able to demonstrate an understanding of these cosmetology concepts and meet program completion requirements. (S24642)

COS 118 - Salon IV

Class: 0 Lab: 21 Clinical: 0 Work: 0 **Credits: 7**

Prerequisites: Take All: COS-111 and COS-112 Take COS-114 or COS-116

This course provides advanced experience in a simulated salon setting. Emphasis is placed on efficient and competent delivery of all salon services in preparation for the licensing examination and employment. Upon completion, students should be able to demonstrate competence in program requirements and the areas covered on the Cosmetology Licensing Examination and meet entry-level employment requirements. (S24643)

COS 119 - Esthetics Concepts I

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Corequisites: COS-120

This course covers the concepts of esthetics. Topics include orientation, anatomy, physiology, hygiene, sterilization, first aid, chemistry, basic dermatology, and professional ethics. Upon completion, students should be able to demonstrate an understanding of the concepts of esthetics and meet course requirements. (S12170)

COS 120 - Esthetics Salon I

Class: 0 Lab: 18 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take COS-119

Corequisites: COS-119

This course covers the techniques of esthetics in a comprehensive experience in a simulated salon setting. Topics include client consultation, facials, body treatments, hair removal, make-up applications, and color analysis. Upon completion, students should be able to safely and competently demonstrate esthetic services on clients in a salon setting. (S10851)

COS 125 - Esthetics Concepts II

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take COS-119 COS-120 Take COS-126

Corequisites: COS-126

This course covers more comprehensive esthetics concepts. Topics include nutrition, business management, makeup, and color analysis. Upon completion students should be able to demonstrate an understanding of the advanced esthetics concepts and meet course requirements. (S10785)

COS 126 - Esthetics Salon II

Class: 0 Lab: 18 Clinical: 0 Work: 0 **Credits: 6**

This course provides experience in a simulated esthetics setting. Topics include machine facials, aromatherapy, surface manipulation in relation to skin care, electricity, and apparatus. Upon completion, students should be able to demonstrate competence in program requirements and the areas covered on the Cosmetology licensing examination for Estheticians. (S24328)

COS 223 - Contemp Hair Coloring

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: COS-111 and COS-112

This course covers basic color concepts, hair coloring problems, and application techniques. Topics include color theory, terminology, contemporary techniques, product knowledge, and other related topics. Upon completion, students should be able to identify a clients color needs and safely and competently perform color applications and correct problems. (S10820)

COS 224 - Trichology & Chemistry

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course is a study of hair and the interaction of applied chemicals. Emphasis is placed on pH actions and the reactions and effects of chemical ingredients. Upon completion, students should be able to demonstrate an understanding of chemical terminology, pH testing, and chemical reactions on hair. (S10836)

COS 240 - Contemporary Design

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: COS-111 and COS-112

This course covers methods and techniques for contemporary designs. Emphasis is placed on contemporary designs and other related topics. Upon completion, students should be able to demonstrate and apply techniques associated with contemporary design. (S10391)

COS 253 - Esthetics Ins. Concepts I

Class: 6 Lab: 15 Clinical: 0 Work: 0 **Credits: 11**

This course introduces esthetic instructional concepts and skills. Topics include orientation, theories of education, unit planning, daily lesson plans, laboratory management, student assessment in a laboratory setting. Upon completion, students should be able to demonstrate esthetic services and instruct and objectively assess student performance in a classroom setting. (S13101)

COS 254 - Esthetic Ins. Concepts II

Class: 6 Lab: 15 Clinical: 0 Work: 0 **Credits: 11**

Prerequisites: Take COS-253

This course covers advanced esthetic instructional concepts and skills. Topics include practical demonstrations, lesson planning, lecture techniques, development and administration of assessment tools, record keeping and other related topics. Upon completion, students should be able to demonstrate competencies in the areas covered by the Esthetics Instructor Licensing Examination and meet program requirements. (S13008)

COS 260 - Design Applications

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course provides an overview of the design concepts used in cosmetology. Topics include the application of art principles and elements to artistically design hair, nails, and make-up and other related topics. Upon completion, students should be able to demonstrate knowledge and techniques associated with design concepts. (S11199)

COS 271 - Instructor Concepts I

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take COS-272

Corequisites: COS-272

This course introduces the basic cosmetology instructional concepts. Topics include orientation, theories of education, unit planning, daily lesson planning, laboratory management, student assessment, record keeping, and other related topics. Upon completion, students should be able to identify theories of education, develop lesson plans, demonstrate supervisory techniques, and assess student performance in a classroom setting. (S11990)

COS 272 - Instructor Practicum I

Class: 0 Lab: 21 Clinical: 0 Work: 0 **Credits: 7**

Prerequisites: Take COS-271

Corequisites: COS-271

This course covers supervisory and instructional skills for teaching entry-level cosmetology students in a laboratory setting. Topics include demonstrations of services, supervision, and entry-level student assessment. Upon completion, students should be able to demonstrate salon services and instruct and objectively assess the entry-level student. (S12026)

COS 273 - Instructor Concepts II

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take All: COS-271 and COS-272 Take COS-274

Corequisites: COS-274

This course covers advanced cosmetology instructional concepts. Topics include practical demonstrations, lesson planning, lecture techniques, development and administration of assessment tools, record keeping, and other related topics. Upon completion, students should be able to develop lesson plans, demonstrate supervision techniques, assess student performance in a classroom setting, and keep accurate records. (\$11965)

COS 274 - Instructor Practicum II

Class: 0 Lab: 21 Clinical: 0 Work: 0 **Credits: 7**

Prerequisites: Take All: COS-271 and COS-272 Take COS-273

Corequisites: COS-273

This course is designed to develop supervisory and instructional skills for teaching advanced cosmetology students in a laboratory setting. Topics include practical demonstrations, supervision, and advanced student assessment. Upon completion, students should be able to demonstrate competence in the areas covered by the Instructor Licensing Examination and meet program completion requirements. (\$12083)

CSC 120 - Computing Fundamentals I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One Set:,Set 1: DMA-010, DMA-020, DMA-030, DMA-040, and DMA-050,Set 2: DMA-010, DMA-020 DMA-030 and DMA-045,Set 3: DMA-025, DMA-040 and DMA-050,Set 4: DMA-025 and DMA-045,Set 5: MAT-121,Set 6: MAT-171,Set 7: MAT-003 ,Set 8: BSP-4003 Take CIS-115

This course provides the essential foundation for the discipline of computing and a program of study in computer science, including the role of the professional. Topics include algorithm design, data abstraction, searching and sorting algorithms, and procedural programming techniques. Upon completion, students should be able to solve problems, develop algorithms, specify data types, perform sorts and searches, and use an operating system. (\$25441)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 130 - Computing Fundamentals II

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CSC-120

This course provides in-depth coverage of the discipline of computing and the role of the professional. Topics include software design methodologies, analysis of algorithm and data structures, searching and sorting algorithms, and file organization methods. Upon completion, students should be able to use software design methodologies and choice of data structures and understand social/ethical responsibilities of the computing professional. (S14281)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 133 - C Programming

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110

Corequisites: CIS-110

This course introduces computer programming using the C programming language with structured programming principles. Topics include input/output operations, iteration, arithmetic operations, arrays, pointers, filters, and other related topics. Upon completion, students should be able to design, code, test and debug at a beginning level. (S21065)

CSC 134 - C++ Programming

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces computer programming using the C++ programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test and debug at a beginning level. (S21066)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 139 - Visual BASIC Programming

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces computer programming using the Visual BASIC programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test and debug at a beginning

level. not used at this time (S21071)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 151 - JAVA Programming

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: CIS-110

This course introduces computer programming using the JAVA programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion students should be able to design, code, test, debug JAVA language programs. (S21076)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 153 - C# Programming

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-115 or CSC-151

This course introduces computer programming using the C# programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test, debug, and implement objects using the appropriate environment at the beginning level. (S21077)

CSC 174 - Server-Side Javascript

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the use of JavaScript in the server environment to build server-side applications. Topics include asynchronous programming, connecting to other machines, testing, and connecting to different databases. Upon completion, students should be able to create server-side applications using JavaScript applications. (S24488)

CSC 227 - Cloud Application Development

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces how to build, deploy, host, and manage applications using cloud technologies. Topics include building cloud applications using cloud toolsets, defining and managing service models, storage fundamentals, secure backup system and database programming. Upon completion, students should be able to develop and host cloud applications, as well as design and develop services that access local and remote data from various data sources. (S24492)

CSC 239 - Advanced Visual BASIC Prog

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CSC-139

This course is a continuation of CSC 139 using the Visual BASIC programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test, debug, and implement objects using the appropriate environment. (S21083)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 249 - Data Structure & Algorithms

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the data structures and algorithms frequently used in programming applications. Topics include lists, stacks, queues, dequeues, heaps, sorting, searching, mathematical operations, recursion, encryption, random numbers, algorithm testing, and standards. Upon completion, students should be able to design data structures and implement algorithms to solve various problems. (S24357)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 251 - Advanced JAVA Programming

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CSC-151

This course is a continuation of CSC 151 using the JAVA programming language with object-oriented programming principles. Emphasis is placed on event-driven programming methods, including creating and manipulating objects, classes, and using object-oriented tools such as the class debugger. Upon completion, students should be able to design, code, test, debug, and implement objects using the appropriate environment. (S21089)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CSC 256 - Software Quality Assurance

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the principles, concepts and processes of software testing. Topics include testing technologies, static techniques, test design techniques, and test management. Upon completion, students should be able to design and implement software testing plans and procedures throughout the software life cycle. (S24493)

CSC 284 - Emerging Comp Prog Tech

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CET-172

This course provides students with the latest technologies and strategies in the field of Computer Programming. Emphasis is placed on the evaluation of developing Computer Programming Technologies and presenting those findings to the class. Upon completion, students should be able to critically analyze emerging Computer Programming Technologies and establish informed opinions. (S21093)

CST 111 - Construction I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course covers standard and alternative building methods to include wall framing. Topics include safety and footings, foundations, floor framing systems, and wall framing systems commonly used in the construction industry. Upon completion, students should be able to safely erect all framing necessary to begin roof framing. (S10559)

CST 112 - Construction II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CST-111

This course covers building methods and materials used to dry-in a building. Topics include safety, ceiling/roof framing applications, roof finishes, windows, and exterior doors. Upon completion, students should be able to safely erect different roof types and properly install windows and exterior doors, roofing, and exterior finish materials. (S10519)

CST 150 - Building Science

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces concepts and techniques for the design and interaction of the mechanical systems of high performance buildings. Topics include building envelope, heating, ventilation and air conditioning (HVAC), indoor air quality, lighting, plumbing and electrical. Upon completion, students should be able to understand building systems interaction and performance. (S23517)

CST 238 - Weatherization

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the use of current energy efficiency methods, materials, and techniques as applied to the weatherization of commercial and residential structures. Topics include the assessment of environmental impacts on energy consumption and building modifications that yield decreases in energy usage and increases in energy efficiency. Upon completion, students should be able to demonstrate competencies in building envelop analysis, energy-efficiency plan design, and implementation of weatherization plan. (S23592)

CST 241 - Planning/Estimating I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: BPR-130, MAT-121, or MAT-171

This course covers the procedures involved in planning and estimating a construction/building project. Topics include performing quantity take-offs of materials necessary for a building project. Upon completion, students should be able to accurately complete a take-off of materials and equipment needs involved in a construction project. (S23984)

CST 244 - Sustainable Bldg Design

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to increase student knowledge about integrating sustainable design principles and green building technologies into mainstream residential construction practices. Emphasis is placed on reducing negative environmental impact and improving building performance, indoor air quality and the comfort of a building's occupants. Upon completion, students should be able to identify principles of green building, environmental efficiency and conservation of natural resources in relation to basic construction practices. (S22260)

CTC 110 - Chemical Safety & Technology

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course covers chemical safety and terminology with a focus on applications to chemical technology.

Topics include chemical hazards, safe handling, storage, hazard recognition and control, waste management, OSHA regulations, and terminology used in a laboratory setting. Upon completion, students should be able to identify potential chemical safety hazards and the appropriate procedures to remediate such hazards. (S24926)

CTC 111 - Basic Chemistry I

Class: 4 Lab: 6 Clinical: 0 Work: 0 **Credits: 7**

This course introduces the basic principles of chemistry with emphasis on applications to chemical technology. Topics include measurement, elements, compounds, moles, solutions, reactions, gases, molecular structure, electron configurations, nomenclature, periodic trends, stoichiometry, and basic laboratory tools, techniques, and safety. Upon completion, students should be able to demonstrate an understanding of basic chemical calculations and routine laboratory procedures.

****This is a Fall Only Class**.**

(S22570)

CTC 112 - Basic Chemistry II

Class: 4 Lab: 6 Clinical: 0 Work: 0 **Credits: 7**

Prerequisites: Take CTC 111

This course introduces solubility, electrochemistry, chemical kinetics, chemical equilibrium, acid/base chemistry, and nuclear chemistry. Topics include solubility products, element families, and basic laboratory tools, techniques, and safety. Upon completion, students should be able to demonstrate an understanding of basic chemical calculations and routine laboratory procedures.

****This is a Spring Only Class.****

(S22577)

CTC 114 - Wet Laboratory Techniques

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

This course introduces basic wet laboratory methods with emphasis on applications in chemical technology. Topics include measurements, physical property identification, separation techniques, gravimetric analysis, titrations, qualitative and quantitative methods, and basic laboratory tools, techniques, and safety. Upon completion, students should be able to demonstrate an understanding of basic chemical calculations and routine laboratory procedures. (S24927)

CTC 115 - Quality Control Laboratory

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

This course introduces quality control procedures with emphasis on applications in chemical technology. Topics include ISO 9000, calibration curves, reagent blanks, internal standards, detection limits, and terminology used in a quality controlled laboratory. Upon completion, students should be able to demonstrate an understanding of quality control and assurance in routine laboratory procedures. (S24928)

CTC 120 - Organic Chemistry I

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take CTC-111

This course covers the nomenclature and properties of organic functional groups with a focus on applications to chemical technology. Emphasis is placed on properties of aliphatic and aromatic hydrocarbons, including alkanes, cycloalkanes, alkenes, alkynes, alcohols and ethers. Upon completion, students should be able to name, identify, and predict reactions for organic molecules.

****This is a Spring Only Class.****

(S22578)

CTC 140 - Organic Processes

Class: 2 Lab: 10 Clinical: 0 Work: 0 **Credits: 7**

Prerequisites: Take CTC-120

This course introduces a chemical technology "real world" laboratory experience. Topics include stereochemistry, delocalization, substitution, elimination reactions and basic laboratory methods such as distillation, extraction, and the use of IR and UV-VIS. Upon completion, students should be able to demonstrate competence in the laboratory techniques presented as well as predict organic reactions. (S22579)

CTC 145 - Advanced Laboratory Methods

Class: 1 Lab: 10 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take One: CTC-114 or CTC-115

This course introduces advanced techniques in a laboratory environment. Topics include synthesis, distillation, extraction, recrystallization, reflux techniques and the use of instrumentation to determine purity. Upon completion, students should be able to identify common glassware and perform advanced synthesis techniques presented. (S24929)

CTC 150 - Standards & Solutions

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: CTC-114 or CTC-115

This course introduces proper procedures for solution preparation in a chemical laboratory environment and the analytical methods used in substance identification. Topics include molarity, normality, dilution, parts per million (ppm), parts per billion (ppb), weight/volume percent, the use of calibration curves and standards, laboratory techniques and analytical equipment used to analyze solutions. Upon completion, students should be able to prepare common laboratory solutions used in an analytical laboratory (S24930)

CTC 210 - Forensic Laboratory

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take CTC-145

This course introduces forensic chemistry and related laboratory techniques. Topics include the application of laboratory techniques and analytical equipment to compounds associated with blood alcohol content, illicit drugs, questioned document analysis, arson investigation, gunshot residues, and DNA. Upon completion, students should be able to perform common laboratory methods used in a forensic chemistry laboratory. (S24931)

CTC 220 - Organic Chemistry II

Class: 3 Lab: 6 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take CTC-140

This course covers intermediate nomenclature and properties of organic functional groups with emphasis on applications to chemical technology. Topics include the preparation, reactions, and analysis of alcohols, amines, ethers, epoxides, and carbonyl compounds. Upon completion, students should be able to predict products from intermediate reactions and determine structures of organic compounds by utilizing IR, UV, and RI.

****This is a Fall Only Class**.**

(S22580)

CTC 230 - Biochemistry

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take CTC-140

This course introduces chemistry at the biological level. Topics include nitrogen compounds, polymers, stereochemistry, carbohydrates, lipids, amino acids, proteins, nucleic acids, protein and nucleic purification, electrophoresis, PCR, and enzymes. Upon completion, students should be able to recognize

biologically active compounds, describe their structure and activity, and predict organic products of biological reactions.

****This is a Spring Only Class.****

(S24094)

CTC 235 - Food Chemistry

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take CTC-145

This course introduces food chemistry and corresponding laboratory techniques. Topics include carbohydrates, lipids, amino acids, proteins, preservatives, antibiotics, laboratory techniques and analytical equipment used to analyze these classes of compounds. Upon completion, students should be able to recognize biologically active compounds, describe their structure, and perform common laboratory methods used in the food industry. (S24932)

CTC 240 - Instru I: Spectroscopy

Class: 2 Lab: 8 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take One: CTC-114 or CTC-115

This course covers appropriate use of equipment and instruments in pharmaceutical and industrial settings as well as qualitative chemical analysis of selected inorganic ions. Emphasis is placed on sample preparation, statistical parameters, titrations, potentiometric methods and various forms of spectroscopy, including UV, AA, AE, IR, NMR, and mass spectroscopy. Upon completion, students should be able to carry out all analytical schemes presented. (S24923)

CTC 250 - Instru II: Chromatography

Class: 2 Lab: 8 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take One: CTC-114 or CTC-115

This course covers the use of various instruments and analytical methods in pharmaceutical, academic, or industrial settings. Emphasis is placed on various forms of chromatography, including GC, HPLC, IC, TLC, and size exclusion, as well as chemiluminescence and radioactive labels. Upon completion, students should be able to carry out all analytical schemes presented and be able to utilize all applicable instruments. (S24924)

CTC 260 - Chemical Technology Capstone

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: CTC-240 or CTC-250

This course is designed to assemble major aspects of the chemical technology field. Emphasis is placed on students completing a small-scale research project in their specialty area. Upon completion, students should be able to develop or modify a laboratory experiment in a current publication or scientific journal, perform tests, and incorporate the data into a formal report and oral presentation. (S24933)

CTI 110 - Web, Pgm, & Db Foundation

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the introduction of the tools and resources available to students in programming, mark-up language and services on the Internet. Topics include standard mark-up language Internet services, creating web pages, using search engines, file transfer programs; and database design and creation with DBMS products. Upon completion students should be able to demonstrate knowledge of programming tools, deploy a web-site with mark-up tools, and create a simple database table. (S22510)

CTI 120 - Network & Sec Foundation

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to the Network concepts, including networking terminology and protocols, local and wide area networks, and network standards. Emphasis is placed on securing information systems and the various implementation policies. Upon completion, students should be able to perform basic tasks related to networking mathematics, terminology, media and protocols. (S22511)

CTI 135 - Introduction to Green IT

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides the skills to implement environmentally sound techniques such as disposal, conservation of power, and reduction of an organization's carbon footprint. Topics include identifying Green organizations and standards, implementing virtualization on IT systems, and calculating the ROI involved in implementing green initiatives. Upon completion, students should be able to develop an environmental policy for a computer network infrastructure. (S23156)

CTI 141 - Cloud & Storage Concepts

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CTS-220

This course introduces cloud computing and storage concepts. Emphasis is placed on cloud terminology, virtualization, storage networking and access control. Upon completion, students should be able to perform tasks related to installation, configuration and management of cloud storage systems. (S23206)

CTI 240 - Virtualization Admin I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CET-130 or CTS-220 or NOS-110

This course covers datacenter virtualization concepts. Topics include data storage, virtual network configuration, virtual machine and virtual application deployment. Upon completion, students should be able to perform tasks related to virtual machine and hypervisor installation and configuration. (S23207)

CTI 241 - Virtualization Admin II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CTI-240

This course covers administration of datacenter virtualization infrastructure. Topics include access control, fault tolerance, scalability, resource management, virtual machine migration and troubleshooting. Upon completion, students should be able to perform tasks related to virtualization security, data protection and resource monitoring. (S23208)

CTS 115 - Info Sys Business Concepts

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

The course introduces the role of IT in managing business processes and the need for business process and IT alignment. Emphasis is placed on industry need for understanding business challenges and developing/managing information systems to contribute to the decision making process based on these challenges. Upon completion, students should be able to demonstrate knowledge of the 'hybrid business manager' and the potential offered by new technology and systems. (S20996)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

CTS 120 - Hardware/Software Support

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the basic hardware of a personal computer, including installation, operations and interactions with software. Topics include component identification, memory-system, peripheral installation and configuration, preventive maintenance, hardware diagnostics/repair, installation and optimization of system software, commercial programs, system configuration, and device-drivers. Upon completion, students should be able to select appropriate computer equipment and software, upgrade/maintain existing equipment and software, and troubleshoot/repair non-functioning personal computers. (S23679)

CTS 130 - Spreadsheet

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110, CIS-111, or OST-137

This course introduces basic spreadsheet design and development. Topics include writing formulas, using functions, enhancing spreadsheets, creating charts, and printing. Upon completion, students should be able to design and print basic spreadsheets and charts. (S24366)

CTS 220 - Adv Hard/Software Support

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CTS-120

This course provides advanced knowledge and competencies in hardware and operating system technologies for computer technicians to support personal computers. Emphasis is placed on: configuring and upgrading; diagnosis and troubleshooting; as well as preventive maintenance of hardware and system software. Upon completion, students should be able to install, configure, diagnose, perform preventive maintenance, and maintain basic networking on personal computers. (S21005)

CTS 240 - Project Management

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110 or CIS-111

This course introduces computerized project management software. Topics include identifying critical paths, cost management, and problem solving. Upon completion, students should be able to plan a complete project and project time and costs accurately. (S24369)

CTS 285 - Systems Analysis & Design

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS 115

Corequisites: None

This course introduces established and evolving methodologies for the analysis, design, and development of an information system. Emphasis is placed on system characteristics, managing projects, prototyping, CASE/OOM tools, and systems development life cycle phases. Upon completion, students should be able to analyze a problem and design an appropriate solution using a combination of tools and techniques. (S21012)

CTS 289 - System Support Project

Class: 1 Lab: 4 Clinical: 0 **Credits: 3**

Prerequisites: Take CTS 285

Corequisites: None

This course provides an opportunity to complete a significant support project with minimal instructor assistance. Emphasis is placed on written and oral communication skills, project definition, documentation, installation, testing, presentation, and user training. Upon completion, students should be able to complete a project from the definition phase through implementation. (S21015)

CUL 110 - Sanitation & Safety

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take CUL-110A

Corequisites: CUL-110A

This course introduces the basic principles of sanitation and safety relative to the hospitality industry. Topics include personal hygiene, sanitation and safety regulations, use and care of equipment, the principles of food-borne illness, and other related topics. Upon completion, students should be able to demonstrate an understanding of the content necessary for successful completion of a nationally recognized food/safety/sanitation exam. (S22835)

CUL 110A - Sanitation & Safety Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take CUL-110

Corequisites: CUL-110

This course provides a laboratory experience for enhancing student skills in the basic principles of sanitation and safety. Emphasis is placed on personal hygiene, sanitation and safety regulations, use and care of equipment, the principles of food-borne illness, and other related topics. Upon completion, students should be able to demonstrate practical applications of sanitation and safety procedures in the hospitality industry. (S22836)

CUL 112 - Nutrition for Foodservice

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the principles of nutrition and its relationship to the foodservice industry. Topics include personal nutrition fundamentals, weight management, exercise, nutritional adaptation/analysis of recipes/menus, healthy cooking techniques and marketing nutrition in a foodservice operation. Upon

completion, students should be able to apply basic nutritional concepts to food preparation and selection. (S22837)

CUL 120 - Purchasing

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take CUL-120A

Corequisites: CUL-120A

This course covers purchasing for foodservice operations. Emphasis is placed on yield tests, procurement, negotiating, inventory control, product specification, purchasing ethics, vendor relationships, food product specifications and software applications. Upon completion, students should be able to apply effective purchasing techniques based on the end-use of the product. (S22838)

CUL 120A - Purchasing Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take CUL-120

Corequisites: CUL-120

This course provides a laboratory experience for enhancing student skills in purchasing for foodservice operations. Emphasis is placed on practical experiences in yield tests, procurement, negotiating, inventory control, product specification, purchasing ethics, vendor relationships, food product specifications and software applications. Upon completion, students should be able to demonstrate practical applications of purchasing within the hospitality industry. (S22839)

CUL 130 - Menu Design

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces menu design and its relationship to foodservice operations. Topics include layout, marketing, concept development, dietary concerns, product utilization, target consumers and trends. Upon completion, students should be able to design, create and produce menus for a variety of foodservice settings. (S22841)

CUL 135 - Food & Beverage Service

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: TAKE CUL-135A

Corequisites: CUL-135A

This course is designed to cover the practical skills and knowledge necessary for effective food and beverage service in a variety of settings. Topics include greeting/service of guests, dining room set-up, profitability, menu sales and merchandising, service styles and reservations. Upon completion, students should be able to demonstrate competence in human relations and the skills required in the service of foods and beverages. (S22842)

CUL 135A - Food & Beverage Serv Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take CUL-135

Corequisites: CUL-135

This course provides a laboratory experience for enhancing student skills in effective food and beverage service. Emphasis is placed on practical experiences including greeting/service of guests, dining room set-up, profitability, menu sales and merchandising, service styles and reservations. Upon completion, students should be able to demonstrate practical applications of human relations and the skills required in the service of foods and beverages. (S22843)

CUL 140 - Culinary Skills I

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take CUL-110 Take CUL-110A

Corequisites: CUL-110 CUL-110A

This course introduces the fundamental concepts, skills and techniques in basic cookery, and moist, dry and combination heat. Emphasis is placed on recipe conversion, measurements, terminology, classical knife cuts, safe food/equipment handling, flavorings/seasonings, stocks/sauces/soups, and related topics. Upon completion, students should be able to exhibit the basic cooking skills used in the foodservice industry. (S22844)

CUL 142 - Fundamentals of Food

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take CUL-110

Corequisites: CUL-110

This course introduces the student to the basic principles of cooking, baking and kitchen operations. Topics include preparation methods for protein, starch, vegetable/fruit identification/selection, storage; breakfast cookery, breads, sweet dough/pastries, basic fabrication, knife skills, and mise en place. Upon completion, students should be able to execute efficiently a broad range of basic cooking/baking skills as they apply to different stations in foodservice operations. (S22845)

CUL 150 - Food Science

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take CUL-110 CUL-110A;

Corequisites: CUL-110 CUL-110A

This course covers the chemical and physical changes in foods that occur with cooking, handling, and processing. Emphasis is placed on practical application of heat transfer and its effect on color/flavor/texture, emulsification, protein coagulation, leavening agents, viscosity, and gel formation. Upon completion, students should be able to demonstrate an understanding of these principles as they apply to food preparation in an experimental setting. (S22846)

CUL 160 - Baking I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CUL-110 Take CUL-110A

Corequisites: CUL-110 CUL-110A

This course covers basic ingredients, techniques, weights and measures, baking terminology and formula calculations. Topics include yeast/chemically leavened products, laminated doughs, pastry dough batter, pies/tarts, meringue, custard, cakes and cookies, icings, glazes and basic sauces. Upon completion, students should be able to demonstrate proper scaling and measurement techniques, and prepare and evaluate a variety of bakery products. (S22847)

CUL 170 - Garde Manger I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CUL-110 Take CUL-140 Take CUL-110A

Corequisites: CUL-110 CUL-110A CUL-140

This course introduces basic cold food preparation techniques and pantry production. Topics include salads, sandwiches, appetizers, dressings, basic garnishes, cheeses, cold sauces, and related food items. Upon completion, students should be able to present a cold food display and exhibit an understanding of the cold kitchen and its related terminology.

****This is a Spring Only Class.****

(S22849)

CUL 214 - Wine Appreciation

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an introduction to information about wine from all the major wine producing regions. Emphasis is placed on the history of wine, production, characteristics, wine list development, laws, purchasing and storing requirements. Upon completion, students should be able to evaluate varietal wines and basic food pairings. (S22852)

CUL 230 - Global Cuisines

Class: 1 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take All: CUL-110 and CUL-140

This course provides practical experience in the planning, preparation, and presentation of representative foods from a variety of world cuisines. Emphasis is placed on indigenous ingredients and customs, nutritional concerns, and cooking techniques. Upon completion, students should be able to research and execute a variety of international and domestic menus. (S22808)

CUL 240 - Culinary Skills II

Class: 1 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take one set: Set 1: CUL-110 and CUL-140 Set 2: CUL-110, CUL-142, and CUL-170

This course is designed to further students' knowledge of the fundamental concepts, skills, and techniques involved in basic cookery. Emphasis is placed on meat identification/fabrication, butchery and cooking techniques/methods; appropriate vegetable/starch accompaniments; compound sauces; plate presentation; breakfast cookery; and quantity food preparation. Upon completion, students should be able to plan, execute, and successfully serve entrees with complementary side items. (S24960)

CUL 245 - Contemporary Cuisines

Class: 1 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take All: CUL-110 and CUL-140

This course introduces students to current culinary trends which include a variety of preparation methods. Topics include current and developing trends such as adaptation of native/regional ingredients and preparation methods into contemporary cuisines. Upon completion, students should be able to demonstrate knowledge of a variety of contemporary cuisines. (S22810)

CUL 250 - Classical Cuisine

Class: 1 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take All: CUL-110, CUL-140, and CUL-240

This course is designed to reinforce the classical culinary kitchen. Topics include the working Grand Brigade of the kitchen, signature dishes and classical banquets. Upon completion, students should be able to demonstrate competence in food preparation in a classical/upscale restaurant or banquet setting. (S22855)

CUL 260 - Baking II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110 and CUL-160

This course is designed to further students' knowledge in ingredients, weights and measures, baking terminology and formula calculation. Topics include classical desserts, frozen desserts, cake and torte production, decorating and icings/glazes, dessert plating and presentation. Upon completion, students should be able to demonstrate pastry preparation, plating, and dessert buffet production skills. (S22857)

CUL 270 - Garde Manger II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110, CUL-140, and CUL-170

This course is designed to further students' knowledge in basic cold food preparation techniques and pantry production. Topics include pates, terrines, galantines, decorative garnishing skills, carving, charcuterie, smoking, canapes, hors d'oeuvres, and related food items. Upon completion, students should be able to design, set up, and evaluate a catering/event display to include a cold buffet with appropriate showpieces. (S22859)

CUL 275 - Catering Cuisine

Class: 1 Lab: 8 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take All: CUL-110, CUL-140, and CUL-240

This course covers the sequential steps to successful catering that include sales, client needs, menu planning, purchasing, costing, event pricing, staffing and sanitation concerns. Emphasis is placed on new culinary competencies and skills specific to catering preparation, presentation, and customer service. Upon completion, students should be able to demonstrate proficiency in the successful design and execution of various types of catering events. (S22861)

CUL 280 - Pastry & Confections

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CUL-110, CUL-140, and CUL-160

This course includes confections and candy, chocolate techniques, transfer sheets, pulled and blown sugar, pastillage, marzipan and custom silicon molding. Emphasis is placed on showpieces, pre-set

molding, stencil cutouts, pattern tracing and/or free-hand shaping. Upon completion, students should be able to design and produce centerpieces and showpieces. (S22862)

CUL 283 - Farm-To-Table

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take All: CUL-110 and CUL-140

This course introduces students to the cooperation between sustainable farmers and foodservice operations. Emphasis is placed on environmental relationships, including how foods are grown, processed, and distributed, as well as related implications on quality and sustainability. Upon completion, students should be able to demonstrate an understanding of environmental stewardship and its impact on cuisine. (S22813)

CUL 285 - Competition Fundamentals

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: CUL-110, CUL-110A, CUL-140, or CUL-160

This course provides practical experience in planning, techniques, and procedures required for culinary competitions and exhibitions. Emphasis is placed on competition strategies including menu planning, teamwork, plate design, flavor profiles, recipe development, nutrition, advanced knife/culinary skills, professionalism, and portfolio development. Upon completion, students should be able to apply competition/exhibition skills and standards in the competition arena and professional kitchen. (S20901)

CVS 160 - CVS Clinical Ed I

Class: 0 Lab: 4 Clinical: 9 Work: 0 **Credits: 5**

This course provides active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S23618)

CVS 161 - CVS Clinical Ed II

Class: 0 Lab: 0 Clinical: 24 Work: 0 **Credits: 8**

Prerequisites: Take CVS-160

This course provides continued participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S10218)

CVS 162 - CVS Clinical Ed III

Class: 0 Lab: 0 Clinical: 15 Work: 0 **Credits: 5**

Prerequisites: Take CVS-161

This course provides continued participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S10146)

CVS 163 - Echo I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course covers cardiac anatomy and introduces cardiac scanning techniques. Topics include normal cardiac anatomy, Doppler physics, and 2-D and M-mode imaging. Upon completion, students should be able to perform 2-D and M-mode studies. (S10197)

CVS 164 - Echo II

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CVS-163

This course is a continuation of CVS 163 with continued study of 2-D and M-mode imaging. Emphasis is placed on continuous wave, pulsed wave, color, and power Doppler imaging of normal and abnormal cardiac conditions. Upon completion, students should be able to perform and recognize normal and abnormal cardiac studies. (S10106)

CVS 260 - CVS Clinical Ed IV

Class: 0 Lab: 0 Clinical: 24 Work: 0 **Credits: 8**

Prerequisites: Take CVS-162

This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S11772)

CVS 261 - CVS Clinical Ed V

Class: 0 Lab: 0 Clinical: 24 Work: 0 **Credits: 8**

Prerequisites: Take CVS-260

This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S11708)

CVS 277 - Cardiovascular Topics

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course provides an overview of cardiovascular topics in preparation for certification examinations. Emphasis is placed on registry preparation. Upon completion, students should be able to sit for the registry examinations. (S22965)

DBA 110 - Database Concepts

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110 or CIS-111

This course introduces database design and creation using a DBMS product. Emphasis is placed on data dictionaries, normalization, data integrity, data modeling, and creation of simple tables, queries, reports, and forms. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports, and forms. (S21017)

DBA 120 - Database Programming I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to develop SQL programming proficiency. Emphasis is placed on data definition, data manipulation, and data control statements as well as on report generation. Upon completion, students should be able to write programs which create, update, and produce reports. (S21020)

DBA 210 - Database Administration

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers database administration issues and distributed database concepts. Topics include database administrator (DBA) goals and functions, backup and recovery, standards and procedures, training, and database security and performance evaluations. Upon completion, students should be able to produce functional DBA documentation and administer a database. (S21021)

DDF 211 - Design Process I

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course emphasizes design processes for finished products. Topics include data collection from manuals and handbooks, efficient use of materials, design sketching, specifications, and vendor selection. Upon completion, students should be able to research and plan the design process for a finished product. (S20641)

DDF 212 - Design Process II

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take DDF-211

This course stresses the integration of various design practices. Emphasis is placed on the creation of an original design. Upon completion, students should be able to apply engineering graphics and design procedures to a design project. (S20817)

DEA 111 - Introduction to DEAT

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course is an overview of the digital effects and animation technology field from the most simple processes to the most complex. Topics covered include digitizing existing images, creating digital images, manipulation of images and various forms of computer animation. Upon completion, students should be able to demonstrate a vocabulary of the digital effects and animation field and a knowledge of ourstanding examples of work in the field. (S10024)

DEN 100 - Basic Orofacial Anatomy

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-101

Corequisites: DEN-101

This course provides a basic introduction to the structures of the head, neck, and oral cavity. Topics include tooth morphology, head and neck anatomy, histology, and embryology. Upon completion, students should be able to demonstrate knowledge of normal structures and development and how they relate to the practice of dental assisting. This is a diploma-level course. (S14129)

DEN 101 - Preclinical Procedures

Class: 4 Lab: 6 Clinical: 0 Work: 0 **Credits: 7**

Prerequisites: Take DEN-111

Corequisites: DEN-111

This course provides instruction in procedures for the clinical dental assistant as specified by the North Carolina Dental Practice Act. Emphasis is placed on orientation to the profession, infection control techniques, instruments, related expanded functions, and diagnostic, operative, and specialty procedures. Upon completion, students should be able to demonstrate proficiency in clinical dental assisting procedures. (S20496)

DEN 102 - Dental Materials

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take DEN-101

Corequisites: DEN-101

This course provides instruction in identification, properties, evaluation of quality, principles, and procedures related to manipulation and storage of operative and specialty dental materials. Emphasis is placed on the understanding and safe application of materials used in the dental office and laboratory. Upon completion, students should be able to demonstrate proficiency in the laboratory and clinical application of routinely used dental materials. (S24548)

DEN 103 - Dental Sciences

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-100 Take DEN-106

Corequisites: DEN-106

This course is a study of oral pathology, pharmacology, and dental office emergencies. Topics include oral pathological conditions, dental therapeutics, and management of emergency situations. Upon completion, students should be able to recognize abnormal oral conditions, identify classifications, describe actions and effects of commonly prescribed drugs, and respond to medical emergencies. (S14117)

DEN 104 - Dental Health Education

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DEN-101 DEN-111 Take DEN-106

Corequisites: DEN-106

This course covers the study of preventive dentistry to prepare dental assisting students for the role of dental health educator. Topics include etiology of dental diseases, preventive procedures, and patient education theory and practice. Upon completion, students should be able to demonstrate proficiency in patient counseling and oral health instruction in private practice or public health settings. (S20498)

DEN 105 - Practice Management

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-100 Take DEN-106

Corequisites: DEN-106

This course provides a study of principles and procedures related to management of the dental practice.

Emphasis is placed on maintaining clinical and financial records, patient scheduling, and supply and inventory control. Upon completion, students should be able to demonstrate fundamental skills in dental practice management. (S14095)

DEN 106 - Clinical Practice I

Class: 2 Lab: 0 Clinical: 12 Work: 0 **Credits: 6**

Prerequisites: Take DEN-101 Take DEN-111 Take DEN-103 DEN-104 DEN-112

This course is designed to provide experience assisting in a clinical setting. Emphasis is placed on the application of principles and procedures of four-handed dentistry and laboratory and clinical support functions. Upon completion, students should be able to utilize classroom theory and laboratory and clinical skills in a dental setting. (S24527)

DEN 107 - Clinical Practice II

Class: 1 Lab: 0 Clinical: 12 Work: 0 **Credits: 5**

Prerequisites: Take DEN-106

This course is designed to increase the level of proficiency in assisting in a clinical setting. Emphasis is placed on the application of principles and procedures of four-handed dentistry and laboratory and clinical support functions. Upon completion, students should be able to combine theoretical and ethical principles necessary to perform entry-level skills including functions delegable to a DA II. (S14107)

DEN 110 - Orofacial Anatomy

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DEN-121

Corequisites: DEN-121

This course introduces the structures of the head, neck, and oral cavity. Topics include tooth morphology, head and neck anatomy, histology, and embryology. Upon completion, students should be able to relate the identification of normal structures and development to the practice of dental assisting and dental hygiene. (S13235)

DEN 111 - Infection/Hazard Control

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-101 or DEN-121

Corequisites: DEN-101 DEN-121

This course introduces the infection and hazard control procedures necessary for the safe practice of

dentistry. Topics include microbiology, practical infection control, sterilization and monitoring, chemical disinfectants, aseptic technique, infectious diseases, OSHA standards, and applicable North Carolina laws. Upon completion, students should be able to understand infectious diseases, disease transmission, infection control procedures, biohazard management, OSHA standards, and applicable North Carolina laws. (S13136)

DEN 112 - Dental Radiography

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DEN-100 or DEN-110 and DEN-111;

Corequisites: DEN-100 DEN-110 DEN-111

This course provides a comprehensive view of the principles and procedures of radiology as they apply to dentistry. Topics include techniques in exposing, processing, and evaluating radiographs, as well as radiation safety, quality assurance, and legal issues. Upon completion, students should be able to demonstrate proficiency in the production of diagnostically acceptable radiographs using appropriate safety precautions. (S20500)

DEN 120 - Dental Hyg Preclinic Lec

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-121

Corequisites: DEN-121

This course introduces preoperative and clinical dental hygiene concepts. Emphasis is placed on the assessment phase of patient care as well as the theory of basic dental hygiene instrumentation. Upon completion, students should be able to collect and evaluate patient data at a basic level and demonstrate knowledge of dental hygiene instrumentation. (S13771)

DEN 121 - Dental Hygiene Precl Lab

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-120 Take DEN-110 and DEN-111

Corequisites: DEN-110 DEN-111

This course provides the opportunity to perform clinical dental hygiene procedures discussed in DEN 120. Emphasis is placed on clinical skills in patient assessment and instrumentation techniques. Upon completion, students should be able to demonstrate the ability to perform specific preclinical procedures. (S13759)

DEN 123 - Nutrition/Dental Health

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces basic principles of nutrition with emphasis on nutritional requirements and their application to individual patient needs. Topics include the study of Federal Nutritional Guidelines, nutrient functions, Recommended Daily Allowances, Adequate Intake, Tolerable Upper Intake Level, Estimated Average Requirement, and related psychological principles. Upon completion, students should be able to recommend and counsel individuals on their food intake as related to their dental health. (\$24466)

DEN 124 - Periodontology

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-110

This course provides an in-depth study of the periodontium, periodontal pathology, periodontal monitoring, and the principles of periodontal therapy. Topics include periodontal anatomy and a study of the etiology, classification, and treatment modalities of periodontal diseases. Upon completion, students should be able to describe, compare, and contrast techniques involved in periodontal/maintenance therapy, as well as patient care management. (\$13772)

DEN 125 - Dental Office Emergencies

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides a study of the management of dental office emergencies. Topics include methods of prevention, necessary equipment/drugs, medicolegal considerations, recognition and effective initial management of a variety of emergencies. Upon completion, the student should be able to recognize, assess and manage various dental office emergencies and activate advanced medical support when indicated. (\$12820)

DEN 130 - Dental Hygiene Theory I

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-120 Take DEN-131

Corequisites: DEN-131

This course is a continuation of the didactic dental hygiene concepts necessary for providing an oral prophylaxis. Topics include deposits/removal, instrument sharpening, patient education, fluorides, planning for dental hygiene treatment, charting, and clinical records and procedures. Upon completion, students should be able to demonstrate knowledge needed to complete a thorough oral prophylaxis. (\$11503)

DEN 131 - Dental Hygiene Clinic I

Class: 0 Lab: 0 Clinical: 9 Work: 0 **Credits: 3**

Prerequisites: Take DEN-121 Take DEN-130

Corequisites: DEN-130

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of the recall patients with gingivitis or light deposits. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment. (S11463)

DEN 140 - Dental Hygiene Theory II

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-130

Corequisites: Take DEN-141

This course introduces principles in treatment modification. Topics include modification of treatment for pain management and advanced radiographic interpretation. Upon completion, students should be able to differentiate necessary treatment modifications, radiographic abnormalities, and be certified in the administration of local anesthesia. (S25911)

DEN 141 - Dental Hygiene Clinic II

Class: 0 Lab: 0 Clinical: 6 Work: 0 **Credits: 2**

Prerequisites: Take DEN-131 Take DEN-140

Corequisites: DEN-140

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of patients with early periodontal disease and subgingival deposits. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment. (S14275)

DEN 220 - Dental Hygiene Theory III

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-140 Take DEN-221

Corequisites: DEN-221

This course introduces advanced principles of patient care. Topics include advanced periodontal debridement, subgingival irrigation, air polishing, special needs and case presentations. Upon completion, students should be able to demonstrate knowledge of methods of treatment and management of periodontally compromised and special needs patients. (S24468)

DEN 221 - Dental Hygiene Clinic III

Class: 0 Lab: 0 Clinical: 12 Work: 0 **Credits: 4**

Prerequisites: Take DEN-141 Take DEN-220

Corequisites: DEN-220

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on treatment of patients with moderate to advanced periodontal involvement and moderate deposits. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment. (S11261)

DEN 222 - General & Oral Pathology

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: BIO-163, BIO-165, or BIO-168 Take DEN-110

This course provides a general knowledge of oral pathological manifestations associated with selected systemic and oral diseases. Topics include developmental and degenerative diseases, selected microbial diseases, specific and nonspecific immune and inflammatory responses with emphasis on recognizing abnormalities. Upon completion, students should be able to differentiate between normal and abnormal tissues and refer unusual findings to the dentist for diagnosis. (S11225)

DEN 223 - Dental Pharmacology

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: BIO-163, BIO-165, or BIO-168

Corequisites: BIO-163, BIO-165, or BIO-168

This course provides basic drug terminology, general principles of drug actions, dosages, routes of administration, adverse reactions, and basic principles of anesthesiology. Emphasis is placed on knowledge of drugs in overall understanding of patient histories and health status. Upon completion, students should be able to recognize that each patient's general health or drug usage may require modification of the treatment procedures. (S11244)

DEN 224 - Materials and Procedures

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DEN-111

This course introduces the physical properties of materials and related procedures used in dentistry. Topics include restorative and preventive materials, fabrication of casts and appliances, and chairside functions of the dental hygienist. Upon completion, students should be able to demonstrate proficiency

in the laboratory and/or clinical application of routinely used dental materials and chairside functions. (S11204)

DEN 230 - Dental Hygiene Theory IV

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take DEN-220 Take DEN-231

Corequisites: DEN-231

This course provides an opportunity to increase knowledge of the profession. Emphasis is placed on dental specialties, technological advances, and completion of a case study presentation. Upon completion, students should be able to demonstrate knowledge of various disciplines of dentistry, technological advances and principles of case presentations. (S24469)

DEN 231 - Dental Hygiene Clinic IV

Class: 0 Lab: 0 Clinical: 12 Work: 0 **Credits: 4**

Prerequisites: Take DEN-221 Take DEN-230

Corequisites: DEN-230

This course continues skill development in providing an oral prophylaxis. Emphasis is placed on periodontal maintenance and on treating patients with moderate to advanced/refractory periodontal disease. Upon completion, students should be able to assess these patients' needs and complete the necessary dental hygiene treatment. (S12938)

DEN 232 - Community Dental Health

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides a study of the principles and methods used in assessing, planning, implementing, and evaluating community dental health programs. Topics include epidemiology, research methodology, biostatistics, preventive dental care, dental health education, program planning, and financing and utilization of dental services. Upon completion, students should be able to assess, plan, implement, and evaluate a community dental health program. (S24470)

DEN 233 - Professional Development

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course includes professional development, ethics, and jurisprudence with applications to practice management. Topics include conflict management, state laws, resumes, interviews, and legal liabilities

as health care professionals. Upon completion, students should be able to demonstrate the ability to practice dental hygiene within established ethical standards and state laws. (S12943)

DES 110 - Architectural Graphics

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

Corequisites: DES-125 DES-135

This course introduces basic drafting skills and techniques. Emphasis is placed on the use of drafting equipment, lettering, dimensioning, elevations, sections, construction details, and design standards as related to interior design. Upon completion, students should be able to complete construction documents skillfully utilizing principles of drafting. (S24219)

DES 111 - Creative Problem Solving

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DES-110

This course is designed to improve conceptual abilities as applied to problems involved with creating practical designs. Emphasis is placed on the awareness of creative thinking techniques that are involved with producing a workable design in an innovative fashion. Upon completion, students should be able to apply creative thinking techniques to find innovative solutions to design challenges. (S24220)

DES 112 - Bldg/Construc Sys

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the residential construction process for the interior designer. Emphasis is placed on providing the fundamental knowledge needed by the designer in residential construction basics and methods, including electrical and lighting, plumbing, sustainability, mechanical and ventilation, and the building envelope. Upon completion, students should be able to demonstrate effective communication required for effective collaboration with architects, engineers, and building contractors. (S23623)

DES 115 - Color Theory

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-110 DES-125 DES-135 DES-225

This course introduces the element of color as a major design factor. Emphasis is placed on the physical, psychological, and other implications of color in design. Upon completion, students should be able to demonstrate knowledge of color and its effects on the human environment. (S10308)

DES 120 - CAD for Interior Design

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DES-110

This course introduces basic computer-aided design and drafting skills and techniques within interior design applications. Emphasis is placed on the most common computer commands used in architectural drafting and design to draw, edit, manipulate layers, and create templates. Upon completion, students should be able to use specific computer applications to complete drawings and plot/print. (S24221)

DES 121 - CAD for Int Des/Advanced

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DES-120

This course provides advanced techniques in drafting on the computer and the applications of computer-aided design for various projects. Emphasis is placed on specific exercises that integrate and reinforce the presentation topics into a scaled drawing. Upon completion, students should be able to draw, transfer, and plot assigned floorplans in an efficient and accurate manner using the computer equipment and software provided. (S11967)

DES 125 - Visual Presentation I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

Corequisites: DES-110 DES-135

This course introduces visual presentation techniques for communicating ideas. Topics include drawing, perspective drawing, rendering and mixed media. Upon completion, students should be able to present a design concept through graphic media. (S24222)

DES 126 - Visual Presentation II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DES-125

This course provides an in-depth study of visual presentation techniques. Topics include extensive rendering and mixed media experience and advanced measured perspective techniques. Upon completion, students should be able to present a complex design concept through graphic media. (S24223)

DES 130 - Digital App/Interior Design

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-110 DES-125 DES-135

This course introduces digital applications using current appropriate software and emerging technologies. Emphasis is placed on the operation of computer software in interior design applications. Upon completion, students should be able to use digital media to prepare a design solution. (S24224)

DES 135 - Prin & Elem of Design I

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Corequisites: DES-110 DES-125

This course introduces the basic concepts and terminology of design as they relate to the design profession. Topics include line, pattern, space, mass, shape, texture, color, unity, variety, rhythm, emphasis, balance, proportion, scale, and function. Upon completion, students should be able to demonstrate an understanding of the principles covered through 2D and 3D exploration. (S24225)

DES 136 - Prin & Elem of Design II

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take DES-135

This course provides advanced study of design principles and elements. Emphasis is placed on color theory, pattern, and texture as used in design as well as an investigation of the psychology of color. Upon completion, students should be able to originate a color program for 2D and 3D exploration. (S24226)

DES 210 - Professional Practices/Int Des

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces contemporary business practices for interior design. Topics include employment skills, business formations, professional associations, preparation of professional contracts and correspondence, and means of compensation. Upon completion, students should be able to demonstrate an understanding of basic business practices as they relate to the interior design profession. (S24227)

DES 220 - Interior Design Fundamentals

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set:,Set 1: DES-135 and ARC-111,Set 2: DES-110,Set 3: DFT-115 Take DES-125

This course provides an introduction to the application of interior design principles. Emphasis is placed on spatial relationships, material selections, craftsmanship, and visual presentation techniques. Upon completion, students should be able to apply interior design principles and illustrate design solutions through visual communication. (S24228)

DES 225 - Textiles for Interiors

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course includes the study of textiles and their applications for a variety of interiors. Emphasis is placed on history, manufacturing processes, fiber characteristics, and residential and non-residential applications. Upon completion, students should be able to specify appropriate textiles. (S24229)

DES 230 - Residential Design I

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-125 DES-136 DES-220

This course includes principles of interior design for various residential design solutions. Emphasis is placed on visual presentation and selection of appropriate styles to meet specifications. Upon completion, students should be able to present scaled floor plans, elevations, specifications, color schemes finishes and furniture selection. (S24230)

DES 231 - Residential Design II

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-230

This course provides advanced projects with a client profile that utilizes the skills developed in DES 230. Emphasis is placed on a total concept and the presentation of appropriate and creative design solutions. Upon completion, students should be able to complete a detailed floorplan, space planning, furniture plan, specifications, program schedules, finishes, and detailed window treatments. (S10619)

DES 235 - Products

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of interior products. Topics include floor coverings; wall coverings and finishes; ceilings, moldings, and furniture construction techniques; and other interior components. Upon completion, students should be able to identify and select appropriate materials and furnishings for interior spaces based on application. (S24231)

DES 238 - Sustainable Interiors

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic concepts of sustainability and green design as they relate to interior environments. Topics include sustainable design principles, LEED and other sustainable rating and certification programs, low impact materials, indoor air quality, and energy and water conservation. Upon completion, students should be able to demonstrate a general understanding of the basic principles of sustainable interiors through hands-on application. (S24232)

DES 240 - Commercial/Contract Design I

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-220

Corequisites: DES-111

This course is designed to focus on commercial/contract design including retail, office, institutional, healthcare and hospitality design. Emphasis is placed on ADA requirements, building codes and standards, space planning, and selection of appropriate materials for non-residential interiors. Upon completion, students should be able to analyze design and present non-residential projects. (S24233)

DES 241 - Comm/Contract Design II

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-240

This course provides an in-depth study of non-residential design exploring more comprehensive design solutions such as health care facilities, furniture gallery design, and large office complexes. Emphasis is placed on design of commercial interiors and suitability of materials to meet ADA requirements, codes, and standards. Upon completion, students should be able to design non-residential spaces meeting ADA requirements and select furniture, materials, fabrics, and accessories meeting codes and flammability standards. (S21678)

DES 242 - Kitchen/Bath Design

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ARC-111, DES-110, or DFT-115

This course covers the fundamentals of kitchen and bath design. Emphasis is placed on the principles and elements of kitchen and bath design, analysis of client needs, specifying products, and drafting design solutions. Upon completion, students should be able to produce basic kitchen and bath design utilizing standards established by the National Kitchen and Bath Association (NKBA). (S23672)

DES 243 - Advanced Kitchen/Bath Design

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-242

This course covers advanced kitchen and bath design. Emphasis will be placed on universal design solutions, producing professional working documents, and mastery of developing and presenting a design concept and theme. Upon completion, students should be able to execute complex kitchen and bath designs. (S23673)

DES 255 - History of Interiors & Furn I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces architecture, interiors, and furnishings in a variety of historic styles from Prehistroic to Neoclassical. Emphasis is placed on vocabulary, chronology, and style recognition. Upon completion, students should be able to recognize, classify and describe major styles of furniture, interiors, and architecture. (S24234)

DES 256 - History of Interiors & Furn II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course continues the study of architecture, interiors, and furnishings from a variety of historic styles from Colonial to Contemporary. Emphasis is placed on style recognition, vocabulary, and chronology. Upon completion, students should be able to recognize, classify and describe major styles of furniture, interiors, and exteriors. (S24235)

DES 260 - Materials Calc/Int Design

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DES-220 DES-235;

This course includes the study of calculations for square footage, square yardage, and cut-length yardage. Emphasis is placed on the development of workable formulas, worksheets, and order forms that can be used in an interior design business. Upon completion, students should be able to produce electronic worksheets and order forms for calculating window treatments, wall coverings, and floor coverings for a given space. (S12551)

DES 265 - Lighting/Interior Design

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DES-110

This course introduces theory and contemporary concepts in lighting. Topics include light levels, light quality, lamps and fixtures, and their use and application in interior design. Upon completion, students

should be able to visually communicate light concepts and requirements based on national standards and select solutions for specific lighting scenarios. (S24236)

DES 285 - Capstone/Interior Design

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: DES-230 and DES-240 Take DES-210

Corequisites: DES-210

This course provides additional studio time to investigate areas of special interest, upgrade weaknesses, and/or capitalize on strengths. Topics include a broad range of options, both residential and non-residential, combining individual research and instructional guidance. Upon completion, students should be able to complete the graphics, client folder, and all schedules for a professional project. (S24324)

DFT 100 - Marine Drafting

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take BTB-101

Corequisites: BTB-101

This course introduces the student to the art of lofting. Topics include utilization of architectural ruler, battens, bevel sticks, trammel points and other lofting tools in order to draw a full size boat from a lines drawing. Upon completion, students should be able to loft a boat full size, determine stem and station bevels, draw deck crown, and expand transoms. (S23283)

DFT 111 - Technical Drafting I

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DFT-111A

Corequisites: DFT-111A DFT-151

This course introduces basic drafting skills, equipment, and applications. Topics include sketching, measurements, lettering, dimensioning, geometric construction, orthographic projections and pictorials drawings, sections, and auxiliary views. Upon completion, students should be able to understand and apply basic drawing principles and practices. (S16295)

DFT 111A - Technical Drafting I Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take DFT-111

Corequisites: DFT-111

This course provides a laboratory setting to enhance basic drafting skills. Emphasis is placed on practical experiences that enhance the topics presented in DFT 111. Upon completion, students should be able to apply the laboratory experiences to the concepts presented in DFT 111. (S11814)

DFT 112 - Technical Drafting II

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DFT-111 Take DFT-112A

Corequisites: DFT-112A

This course provides for advanced drafting practices and procedures. Topics include detailed working drawings, hardware, fits and tolerances, assembly and sub-assembly, geometric dimensioning and tolerancing, intersections, and developments. Upon completion, students should be able to produce detailed working drawings. (S16296)

DFT 112A - Technical Drafting II Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take DFT-112 Take DFT-111

Corequisites: Take DFT-112 Take DFT-111

This course provides a laboratory setting to enhance advance drafting skills. Emphasis is placed on practical experiences that enhance the topics presented in DFT 112. Upon completion, students should be able to apply the laboratory experiences to the concepts presented in DFT 112. (S10249)

DFT 119 - Basic CAD

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MAC-111 and MAC-132

This course introduces computer-aided drafting software for specific technologies to non-drafting majors. Emphasis is placed on understanding the software command structure and drafting standards for specific technical fields. Upon completion, students should be able to create and plot basic drawings. (S13624)

DFT 151 - CAD I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces CAD software as a drawing tool. Topics include drawing, editing, file

management, and plotting. Upon completion, students should be able to produce and plot a CAD drawing. (S13857)

DFT 152 - CAD II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DFT-151;

This course introduces extended CAD applications. Emphasis is placed upon intermediate applications of CAD skills. Upon completion, students should be able to use extended CAD applications to generate and manage drawings. (S20642)

DFT 154 - Intro Solid Modeling

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course is an introduction to basic three-dimensional solid modeling and design software. Topics include basic design, creation, editing, rendering and analysis of solid models, and creation of multiview drawings. Upon completion, students should be able to use design techniques to create, edit, render and generate a multiview drawing. (S20664)

DFT 170 - Engineering Graphics

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic engineering graphics skills and applications. Topics include sketching, selection and use of current methods and tools, and the use of engineering graphics applications. Upon completion, students should be able to demonstrate an understanding of basic engineering graphics principles and practices. (S20734)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DFT 211 - Gears, Cams, & Pulleys

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One Set: Set 1: DFT-111 and MAT-121 Set 2: DFT-111 and MAT-171

This course introduces the principles of motion transfer. Topics include gears, cams, pulleys, and drive components. Upon completion, students should be able to solve problems and produce drawings dealing with ratios. (S23985)

DFT 231 - Jig & Fixture Design

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take DFT-254

This course introduces the study of jigs and fixtures. Topics include different types, components, and uses of jigs and fixtures. Upon completion, students should be able to analyze, design, and complete a set of working drawings for a jig or fixture. (S20665)

DFT 254 - Intermed Solid Model/Render

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DFT-154

This course presents a continuation of basic three-dimensional solid modeling and design software. Topics include advanced study of parametric design, creation, editing, rendering and analysis of solid model assemblies, and multiview drawing generation. Upon completion, students should be able to use parametric design techniques to create and analyze the engineering design properties of a model assembly. (S20156)

DMA 10 - Operations With Integers

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course provides a conceptual study of integers and integer operations. Topics include integers, absolute value, exponents, square roots, perimeter and area of basic geometric figures, Pythagorean theorem, and use of the correct order of operations. Upon completion, students should be able to demonstrate an understanding of pertinent concepts and principles and apply this knowledge in the evaluation of expressions. (S23164)

DMA 20 - Fractions and Decimals

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take DMA-010

This course provides a conceptual study of the relationship between fractions and decimals and covers related problems. Topics include application of operations and solving contextual application problems, including determining the circumference and area of circles with the concept of pi. Upon completion, students should be able to demonstrate an understanding of the connections between fractions and decimals. (S23168)

DMA 25 - Applications With Real Numbers

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides a conceptual study of integers, integer operations, the relationship between

fractions and decimals, rates, ratios, percents, proportions and related problems. Topics include integer operations and rational numbers, geometric applications, absolute value, exponents, square roots, Pythagorean Theorem, order of operations, rates, ratios, percents, proportions, conversion of English and Metric units, and applications of the geometry of similar triangles. Upon completion, students should be able to demonstrate an understanding of pertinent concepts and principles, apply the knowledge of the relationships between decimals, fractions, and percents, and use their understanding to solve conceptual application problems. (S24961)

DMA 30 - Propor/Ratio/Rate/Percent

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take All: DMA-010 and DMA-020

This course provides a conceptual study of the problems that are represented by rates, ratios, percent, and proportions. Topics include rates, ratios, percent, proportion, conversion of English and metric units, and applications of the geometry of similar triangles. Upon completion, students should be able to use their understanding to solve conceptual application problems. (S23169)

DMA 40 - Express/Lin Equat/Inequal

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020 and DMA-030 Set 2: DMA-025

This course provides a conceptual study of problems involving linear expressions, equations, and inequalities. Emphasis is placed on solving contextual application problems. Upon completion, students should be able to distinguish between simplifying expressions and solving equations and apply this knowledge to problems involving linear expressions, equations, and inequalities. (S24983)

DMA 45 - Linear Equations/Inequalities

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take one set: Set 1: DMA-010, DMA-020, and DMA-030 Set 2: DMA-025 Set 3: MAT-060

This course provides a conceptual study of problems involving linear expressions, equations, inequalities, and graphic and algebraic representations of lines. Topics include solving equations, slope, equations of lines, interpretation of basic graphs, linear modeling, and contextual application problems. Upon completion, students should be able to simplify expressions, solve equations and inequalities, create and interpret graphical representation of equations, inequalities, and real world data, and apply this knowledge to real world situations. (S24962)

DMA 50 - Graphs/Equations of Lines

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020, DMA-030 and DMA-040 Set 2: DMA-025 and DMA-040

This course provides a conceptual study of problems involving graphic and algebraic representations of lines. Topics include slope, equations of lines, interpretation of basic graphs, and linear modeling. Upon completion, students should be able to solve contextual application problems and represent real-world situations as linear equations in two variables. (S24984)

DMA 60 - Polynomial/Quadratic Appl

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020, DMA-030, DMA-040, and DMA-050 Set 2: DMA-010, DMA-020, DMA-030, and DMA-045 Set 2: DMA-025, DMA-040, and DMA-050 Set 3: DMA-025 and DMA-045

This course provides a study of problems involving algebraic representations of quadratic equations. Topics include basic polynomial operations, factoring polynomials, and solving polynomial equations by means of factoring. Upon completion, students should be able to find algebraic solutions to contextual problems with quadratic applications. (S24985)

DMA 65 - Algebra for Precalculus

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020, DMA-030, DMA-040, and DMA-050 Set 2: DMA-010, DMA-020, DMA-030, and DMA-045 Set 3: DMA-025, DMA-040, and DMA-050 Set 4: DMA-025 and DMA-045

This course provides a study of problems involving algebraic representations of quadratic, rational, and radical equations. Topics include simplifying polynomial, rational, and radical expressions and solving quadratic, rational, and radical equations. Upon completion, students should be able to find algebraic solutions to contextual problems with quadratic and rational applications. (S25064)

DMA 70 - Rational Express/Equation

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020, DMA-030, DMA-040, DMA-050 and DMA-060 Set 2: DMA-010, DMA-020, DMA-030, DMA-045 and DMA-060 Set 3: DMA-025, DMA-040, DMA-050 and DMA-060 Set 4: DMA-025, DMA-045 and DMA-060

This course provides a study of problems involving algebraic representations of rational equations. Topics include simplifying and performing operations with rational expressions and equations, understanding the domain, and determining the reasonableness of an answer. Upon completion,

students should be able to find algebraic solutions to contextual problems with rational applications. (S24987)

DMA 80 - Radical Express/Equations

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020, DMA-030, DMA-040, DMA-050, DMA-060 and DMA-070 Set 2: DMA-010, DMA-020, DMA-030, DMA-045, DMA-060, and DMA-070 Set 3: DMA-025, DMA-040, DMA-050, DMA-060, AND DMA-070 Set 4: DMA-025, DMA-045, DMA-060, AND DMA-070

This course provides a study of problems involving algebraic representations of the manipulation of radical expressions and the application of radical equations. Topics include simplifying and performing operations with radical expressions and rational exponents, solving radical equations, and determining the reasonableness of a solution. Upon completion, students should be able to find algebraic solutions to contextual problems with radical applications. (S24988)

DME 110 - Intro to Digital Media

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to key concepts, technologies, and issues related to digital media. Topics include emerging standards, key technologies and related design issues, terminology, media formats, career paths, and ethical issues. Upon completion, students should be able to demonstrate the various media formats that are used in digital media technology. (S20550)

DMS 001F - Developmental Math Shell 1

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be one DMA module appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (L25600)

DMS 001G - Developmental Math Shell 1

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be one DMA module appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (L25601)

DMS 001M - Developmental Math Shell 1

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be one DMA module appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (L25602)

DMS 1 - Developmental Math Shell 1

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be one DMA module appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (S23632)

DMS 002F - Developmental Math Shell 2

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be two DMA modules appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (L25603)

DMS 002G - Developmental Math Shell 2

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be two DMA modules appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (L25604)

DMS 002M - Developmental Math Shell 2

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be two DMA modules appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (L25605)

DMS 2 - Developmental Math Shell 2

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be two DMA modules appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (S23633)

DMS 3 - Developmental Math Shell 3

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be three DMA modules appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (S23634)

DMS 4 - Developmental Math Shell 4

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course provides an opportunity to customize developmental math content in specific developmental math areas. Content will be four DMA modules appropriate to the required level of the student. Upon completion, students should be able to demonstrate an understanding of their specific developmental math area of content. (S23635)

DRA 111 - Theatre Appreciation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a study of the art, craft, and business of the theatre. Emphasis is placed on the audience's appreciation of the work of the playwright, director, actor, designer, producer, and critic. Upon completion, students should be able to demonstrate a vocabulary of theatre terms and to recognize the contributions of various theatre artists. UGETC (S11248)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 112 - Literature of the Theatre

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a survey of dramatic works from the classical Greek through the present. Emphasis

is placed on the language of drama, critical theory, and background as well as on play reading and analysis. Upon completion, students should be able to articulate, orally and in writing, their appreciation and understanding of dramatic works. (S10971)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 115 - Theatre Criticism

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-111

This course is designed to develop a critical appreciation of the theatre from the viewpoint of the audience/consumer. Emphasis is placed on viewing, discussing, and evaluating selected theatre performance, either live or on film/video. Upon completion, students should be able to express their critical judgments both orally and in writing. (S11238)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 120 - Voice for Performance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides guided practice in the proper production of speech for the theatre. Emphasis is placed on improving speech, including breathing, articulation, pronunciation, and other vocal variables. Upon completion, students should be able to demonstrate effective theatrical speech. (S12868)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 122 - Oral Interpretation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002 (with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces the dramatic study of literature through performance. Emphasis is placed on analysis and performance of poetry, drama, and prose fiction. Upon completion, students should be able to embody and discuss critically the speakers inherent in literature. (S12397)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 124 - Readers Theatre

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a theoretical and applied introduction to the medium of readers theatre. Emphasis is placed on the group performance considerations posed by various genres of literature. Upon completion, students should be able to adapt and present a literary script following the conventions of readers theatre. (S12856)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 126 - Storytelling

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the art of storytelling and the oral traditions of folk literature. Topics include the history of storytelling, its value and purpose, techniques of the storyteller, and methods of collecting verbal art. Upon completion, students should be able to present and discuss critically stories from the world's repertory of traditional lore. (S12896)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 128 - Children's Theatre

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the philosophy and practice involved in producing plays for young audiences. Topics include the selection of age-appropriate scripts and the special demands placed on directors, actors, designers, and educators in meeting the needs of young audiences. Upon completion, students should be able to present and critically discuss productions for children. (S12864)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 130 - Acting I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides an applied study of the actor's craft. Topics include role analysis, training the voice, and body concentration, discipline, and self-evaluation. Upon completion, students should be able to explore their creativity in an acting ensemble. (S10305)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 131 - Acting II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-130

This course provides additional hands-on practice in the actor's craft. Emphasis is placed on further analysis, characterization, growth, and training for acting competence. Upon completion, students should be able to explore their creativity in an acting ensemble. (S10315)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 132 - Stage Movement

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-111

Corequisites: DRA-111

This course provides an applied study of selected principles of stage movement for actors. Topics include improvisation, mime, stage combat, clowning, choreography, and masks. Upon completion, students should be able to focus properly on stage, to create characters, and to improvise scenes, perform mimes, fight, clown, juggle, and waltz. (S20486)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 135 - Acting for the Camera I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-130

This course provides an applied study of the camera actor's craft. Topics include commercial, dramatic, and print performance styles. Upon completion, students should be able to explore their creativity in on-camera performance. (S10316)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 136 - Acting for the Camera II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-135

This course provides additional hands-on study of the camera actor's craft. Emphasis is placed on more advanced camera acting theories, auditioning techniques, daytime drama, feature film, and print advertisement performance styles. Upon completion, students should be able to explore their creativity in on-camera performance. (S10289)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 140 - Stagecraft I

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the theory and basic construction of stage scenery and properties. Topics include stage carpentry, scene painting, stage electrics, properties, and backstage organization. Upon completion, students should be able to pursue vocational and avocational roles in technical theatre. (S11936)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 141 - Stagecraft II

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-140

This course provides additional hands-on practice in the elements of stagecraft. Emphasis is placed on the design and implementation of the arts and crafts of technical theatre. Upon completion, students should be able to pursue vocational or avocational roles in technical theatre. (S12066)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 142 - Costuming

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the techniques of costume construction and crafts processes. Emphasis is placed on learning costuming techniques, using equipment and materials, and finishing production-appropriate costumes. Upon completion, students should be able to demonstrate an understanding of pattern drafting, construction techniques, and costume fitting procedures. (S11992)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 145 - Stage Make-Up

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers the research, design, selection of materials, and application of stage make-up, prosthetics, wigs, and hairpieces. Emphasis is placed on the development of techniques, style, and presentation of the finished make-up. Upon completion, students should be able to create and apply make-up, prosthetics, and hairpieces. (S12089)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 170 - Play Production I

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production. (S10529)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 171 - Play Production II

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-170

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production. (S10530)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 175 - Teleplay Production I

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

This course provides an applied laboratory study of the processes involved in production of a dramatic television program. Emphasis is placed on the fundamental practices, principles, and techniques associated with producing dramatic television programming. Upon completion, students should be able to participate in an assigned position with a college dramatic television production. (S10542)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 211 - Theatre History I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with a minimum grade of P2), BSP-4002 (with a minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course covers the development of theatre from its origin to the closing of the British theatre in 1642. Topics include the history, aesthetics, and representative dramatic literature of the period. Upon completion, students should be able to trace the evolution of theatre and recognize the styles and types of world drama. (S10268)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 212 - Theatre History II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with a minimum grade of P2), BSP-4002 (with a minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111 and ENG-112

This course covers the development of theatre from 1660 through the diverse influences which shaped the theatre of the twentieth century. Topics include the history, aesthetics, and representative dramatic literature of the period. Upon completion, students should be able to trace the evolution of theatre and recognize the styles and types of world drama. (S10226)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 230 - Acting III

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-131

This course is designed to include an exploration of acting styles. Emphasis is placed on putting the actor's skills to work in a major theatrical form-musical, comedy, or drama. Upon completion, students should be able to explore their creativity in an acting ensemble. (S10671)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 231 - Acting IV

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-230

This course is designed to include further exploration of acting styles. Emphasis is placed on putting the actor's skills to work in a major theatrical form-musical, comedy, or drama. Upon completion, students should be able to explore their creativity in an acting ensemble. (S10673)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 240 - Lighting for the Theatre

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course is an applied study of theatre lighting and is designed to train theatre technicians. Emphasis is placed on lighting technology including the mechanics of lighting and light control equipment by practical work with lighting equipment. Upon completion, students should be able to demonstrate competence with lighting equipment. (S13476)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 260 - Directing

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-130 Take DRA-140

This course provides an analysis and application of the techniques of theatrical directing. Topics include script selection, analysis, casting, rehearsal planning, blocking, stage business, tempo, and technical considerations. Upon completion, students should be able to plan, execute, and critically discuss a student-directed production. (S11775)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 270 - Play Production III

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-171

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production. (S11079)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRA 271 - Play Production IV

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRA-270

This course provides an applied laboratory study of the processes involved in the production of a play. Topics include fundamental practices, principles, and techniques associated with producing plays of various periods and styles. Upon completion, students should be able to participate in an assigned position with a college theatre production. (S11029)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

DRE 96 - Integrated Reading and Writing

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to develop proficiency in specific integrated and contextualized reading and writing skills and strategies. Topics include reading and writing processes, critical thinking strategies, and recognition and composition of well-developed, coherent, and unified texts; these topics are primarily taught at the introductory level using texts primarily in a Lexile (TM) range of 960 to 1115. Upon completion, students should be able to apply those skills toward understanding a variety of academic and career-related texts and composing effective paragraphs. Please note: (TM) stands for registered trademark. (S23641)

DRE 97 - Integrated Reading Writing II

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: TAKE DRE-096

This course is designed to develop proficiency in integrated and contextualized reading and writing skills and strategies. Topics include reading and writing processes, critical thinking strategies, and recognition and composition of well-developed, coherent, and unified texts; except where noted, these topics are

taught at a reinforcement level using texts primarily in a Lexile (TM) range of 1070 to 1220. Upon completion, students should be able to demonstrate and apply those skills toward understanding a variety of complex academic and career texts and composing essays incorporating relevant, valid evidence. Please note: (TM) represents registered trademark. (S23642)

DRE 98 - Integrated Reading Writing III

Class: 2 Lab: 1 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: TAKE DRE-097

This course is designed to develop proficiency in integrated and contextualized reading and writing skills and strategies. Topics include reading and writing processes, critical thinking strategies, and recognition and composition of well-developed, coherent, and unified texts; these topics are taught using texts primarily in the Lexile (TM) range of 1185 to 1385. Upon completion, students should be able to apply those skills toward understanding a variety of texts at the career and college ready level and toward composing a documented essay. Note: (TM) represents registered trademark. (S23643)

DRE 99 - Integrated Reading Writing III

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: TAKE DRE-097

Corequisites: Take ENG-111

This course is designed to develop proficiency in integrated and contextualized reading and writing skills and strategies by complementing, supporting and reinforcing material covered in ENG 111. Topics include reading and writing processes, critical thinking strategies, and recognition and composition of well-developed, coherent, and unified texts; except where noted, these topics are taught using texts primarily in the Lexile (TM) range of 1185 to 1385. Upon completion, students should be able to apply those skills toward understanding a variety of texts at the career and college ready level and toward composing a documented essay. Note: (TM) represents registered trademark. (S23644)

ECO 151 - Survey of Economics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course, for those who have not received credit for ECO 251 or 252, introduces basic concepts of micro- and macroeconomics. Topics include supply and demand, optimizing economic behavior, prices and wages, money, interest rates, banking system, unemployment, inflation, taxes, government spending, and international trade. Upon completion, students should be able to explain alternative solutions for economic problems faced by private and government sectors. (S13257)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ECO 251 - Prin of Microeconomics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces economic analysis of individual, business, and industry in the market economy. Topics include the price mechanism, supply and demand, optimizing economic behavior, costs and revenue, market structures, factor markets, income distribution, market failure, and government intervention. Upon completion, students should be able to identify and evaluate consumer and business alternatives in order to efficiently achieve economic objectives. UGETC (S11774)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ECO 252 - Prin of Macroeconomics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces economic analysis of aggregate employment, income, and prices. Topics include major schools of economic thought; aggregate supply and demand; economic measures, fluctuations, and growth; money and banking; stabilization techniques; and international trade. Upon completion, students should be able to evaluate national economic components, conditions, and alternatives for achieving socioeconomic goals. UGETC (S11710)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 114 - Intro to Family Childcare

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DMA-010, DMA-020, and DMA-030 ENG-085 or DRE-097

Corequisites: Take DRE-097

This course introduces the student to family child care home environments with emphasis on standards and developmentally effective approaches for supporting diverse children and families. Topics include standards for quality, curriculum for multiple age groups, authentic assessment methods, business practices, building positive family and community partnerships, and professionalism. Upon completion, students should be able to design a family child care handbook that reflects a healthy, respectful, supportive, and stimulating learning environment. (S23993)

EDU 119 - Intro to Early Child Educ

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the foundations of early childhood education, the diverse educational settings for young children, professionalism and planning intentional developmentally appropriate experiences for each child. Topics include theoretical foundations, national early learning standards, NC Foundations for Early Learning and Development, state regulations, program types, career options, professionalism, ethical conduct, quality inclusive environments, and curriculum responsive to the needs of each child/family. Upon completion, students should be able to design a career/professional development plan, appropriate environments, schedules, and activity plans.

(S24238)

EDU 119 - Intro to Early Child Education

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the foundations of culturally responsive, equitable and inclusive early childhood education, planning intentional developmentally appropriate experiences, learning activities, and teaching strategies for indoor and outdoor environments for all young children, guidance techniques, and professionalism. Topics include theoretical foundations, national early learning standards, NC Foundations for Early Learning and Development, state regulations, program types, career options, professionalism, ethical conduct, quality inclusive environments, guidance techniques, and curriculum responsive to the needs of each child/family. Upon completion, students should be able to implement developmentally appropriate environments, guidance techniques, schedules, and teaching strategies across developmental domains to support culturally, linguistically, and ability diverse children and their families in inclusive settings, and design a personal career/professional development plan. (S25916)

EDU 131 - Child, Family, and Community

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: EDU-119

This course covers the development of partnerships among culturally, linguistically and ability diverse families, children, schools and communities through the use of evidence-based strategies. Emphasis is placed on developing skills and identifying benefits for establishing and supporting respectful relationships between diverse families, programs/schools, and community agencies/resources reflective of the NAEYC Code of Ethical Conduct and the Code of Ethics for North Carolina Educators. Upon completion, students should be able to identify appropriate relationship building strategies between diverse families, children birth through adolescence, schools, and communities and demonstrate a variety of communication skills including appropriate use of technology to support every child. (S25339)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 144 - Child Development I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: EDU-119

This course includes the theories of child development, observation and assessment, milestones, and factors that influence development, from conception through approximately 36 months. Emphasis is placed on knowledge, observation and assessment of developmental sequences in approaches to play/learning, emotional/social, health/physical, language/communication and cognitive domains. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain biological and environmental factors that impact development, and identify evidence-based strategies for enhancing development for children that are culturally, linguistically, and ability diverse. (S25341)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 145 - Child Development II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119

This course includes the theories of child development, observation and assessment, milestones, and factors that influence development, from preschool through middle childhood. Emphasis is placed on knowledge, observation and assessment of developmental sequences in approaches to play/learning, emotional/social, health/physical, language/communication and cognitive domains. Upon completion, students should be able to compare/contrast typical/atypical developmental characteristics, explain biological and environmental factors that impact development, and identify evidence-based strategies for enhancing development for children that are culturally, linguistically, and ability diverse. (S25342)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 146 - Child Guidance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119

This course introduces evidence-based strategies to build nurturing relationships with each child by applying principles and practical techniques to facilitate developmentally appropriate guidance. Topics include designing responsive/supportive learning environments, cultural, linguistic and socio-economic influences on behavior, appropriate expectations, the importance of communication with children/families including using technology and the use of formative assessments in establishing intentional strategies for children with unique needs. Upon completion, students should be able to demonstrate direct/indirect strategies to encourage social skills, self-regulation, emotional expression

and positive behaviors while recognizing the relationship between children's social, emotional and cognitive development. (S25343)

EDU 151 - Creative Activities

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces developmentally supportive creative learning environments with attention to divergent thinking, creative problem-solving, evidence-based teaching practices, and open-ended learning materials while applying NC Foundations for Early Learning and Development. Emphasis is placed on observation of process driven learning experiences in art, music, creative movement, dance, and dramatics for every young child age birth through eight, integrated through all domains and academic content. Upon completion, students should be able to examine, create, and adapt developmentally creative learning materials, experiences, and environments for children that are culturally, linguistically, and ability diverse.

(S25344)

EDU 151 - Creative Activities

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces developmentally supportive, diverse, equitable, and inclusive creative learning environments with attention to divergent thinking, creative problem-solving, evidence-based teaching practices, and open-ended learning materials and activities that align with the NC Foundations for Early Learning and Development. Emphasis is placed on best practices providing process-driven culturally diverse, learning experiences in art, music, creative movement, dance, and dramatic play integrated across all domains and academic content in indoor/outdoor environments for every young child age birth through age eight. Upon completion, students should be able to observe, examine, create, adapt, and advocate for developmentally appropriate creative learning materials, experiences, and environments for children that are culturally, linguistically, and ability diverse. (S25919)

EDU 151A - Creative Activities Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take EDU-151

Corequisites: EDU-151

This course provides a laboratory component to complement EDU 151. Emphasis is placed on practical experiences that enhance concepts introduced in the classroom. Upon completion, students should be able to demonstrate a practical understanding of the development and implementation of appropriate creative activities. (S25345)

EDU 153 - Health, Safety and Nutrition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: EDU-119

This course covers promoting and maintaining the health and well-being of every child. Topics include health and nutritional guidelines, common childhood illnesses, maintaining safe and healthy learning environments, health benefits of active play, recognition and reporting of abuse/neglect, and state regulations. Upon completion, students should be able to apply knowledge of NC Foundations for Early Learning and Development for health, safety, nutritional needs and safe learning environments. (S25348)

EDU 187 - Teaching and Learning for All

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course introduces students to knowledge, concepts, and best practices needed to provide developmentally appropriate, effective, inclusive, and culturally responsive educational experiences in the classroom. Topics include growth and development, learning theory, student motivation, teaching diverse learners, classroom management, inclusive environments, student-centered practices, instructional strategies, teaching methodologies, observation/assessment techniques, educational planning, reflective practice, collaboration, cultural competence, ethics, professionalism, and leadership. Upon completion, students should be able to identify the knowledge, skills, roles, and responsibilities of an effective educator as defined by state and national professional teaching standards. (S25592)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 188 - Issues in Early Child Ed

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take EDU-119

Corequisites: Take EDU-119

This course covers topics and issues in early childhood education. Emphasis is placed on current advocacy issues, emerging technology, professional growth experiences, and other related topics. Upon completion, students should be able to list, discuss, and explain current topics and issues in early childhood education. (S25366)

EDU 188 - Trends/Policies in Early Child

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers current topics and policies in the diverse and inclusive field of early childhood education that affect young children, families, communities, and professionals. Emphasis is placed on but not limited to advocacy, equity, bias and social justice, emerging research, professionalism, reflective practice, and legal/ethical concerns. Upon completion, student should be able to list, discuss, and explain current trends/policies in early childhood education as well as develop an advocacy plan based on course content. (S26024)

EDU 216 - Foundations of Education

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the examination of the American educational systems and the teaching profession. Topics include the historical and philosophical influences on education, various perspectives on educational issues, and experiences in birth through grade 12 classrooms. Upon completion, students should be able to reflect on classroom observations, analyze the different educational approaches, including classical/traditional and progressive, and have knowledge of the various roles of educational systems at the federal, state and local level. (S25368)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 221 - Children With Exceptionalities

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take one set; Set 1: EDU-144 and EDU-145, Set 2: PSY-244 and PSY-245 Take EDU-119 This course covers atypical patterns of child development, inclusive/diverse settings, evidenced-based educational/family plans, differentiated instruction, adaptive materials, and assistive technology. Emphasis is placed on the characteristics of exceptionalities and delays, early intervention/special education, transitions, observation, developmental screening, formative assessment of children, and collaborating with families and community partners. Upon completion, students should be able to recognize diverse abilities, describe the referral process, identify community resources, explain the importance of collaboration with families/professionals, and develop appropriate strategies/adaptations to support children in all environments with best practices as defined by laws, policies and the NC Foundations for Early Learning and Development. (S25370)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 234 - Infants, Toddlers, and Twos

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119 Take EDU-119

This course covers the development of high-quality, individualized, responsive/engaging relationships and experiences for infants, toddlers, and twos. Emphasis is placed on typical and atypical child development, working with diverse families to provide positive, supportive, and engaging early learning activities and interactions through field experiences and the application of the NC Foundations for Early Learning and Development. Upon completion, students should be able to demonstrate responsive curriculum planning, respectful relationships and exposure to a variety of developmentally appropriate experiences/materials that support a foundation for healthy development and growth of culturally, linguistically and ability diverse children birth to 36 months. (S25373)

EDU 234A - Infants/Toddlers and Twos Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take EDU-234 Take EDU-119

Corequisites: EDU-234

This course focuses on practical applications that support the healthy development of children birth to 36 months by applying principles of quality, individualized, responsive/engaging relationships and experiences. Emphasis is placed on typical and atypical child development, positive early learning experiences, supporting and engaging diverse families, providing safe, warm and nurturing interactions, and the application of the NC Foundations for Early Learning and Development. Upon completion, students should be able to demonstrate the ability to engage in respectful, responsive care to support a foundation for healthy development and growth of children birth to 36 months culturally, linguistically, and ability diverse through responsive planning and positive exposure to a variety of experiences/materials. (S25374)

EDU 235 - School-Age Develop & Programs

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course includes developmentally appropriate practices in group settings for school-age children. Emphasis is placed on principles of development, environmental planning, and positive guidance techniques and program development. Upon completion, students should be able to discuss developmental principles for culturally, linguistically, and ability diverse children ages five to twelve and plan and implement developmentally appropriate programs and activities. (S25375)

EDU 250 - Teacher Licensure Preparation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set: Set 1: ENG-111 and MAT-143 Set 2: ENG-111 and MAT-152 Set 3: ENG-111 and MAT-171

This course provides information and strategies necessary for transfer to a teacher licensure program at a senior institution. Topics include entry level teacher licensure exam preparation, performance based

assessment systems, requirements for entry into teacher education programs, the process to become a licensed teacher in North Carolina, and professionalism including expectations within the field of education. Upon completion, students should be able to utilize educational terminology and demonstrate knowledge of teacher licensure processes including exam preparation, technology based portfolio assessment, and secondary admissions processes to the school of education at a senior institution. (S25134)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 251 - Exploration Activities

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119Take EDU-251A

Corequisites: Take EDU-119Take EDU-251A

This course covers fundamental concepts in the content areas of science, technology, engineering, math and social studies through investigative experiences. Emphasis is placed on exploring fundamental concepts, developmentally appropriate scope and sequence, and teaching strategies to engage each child in the discovery approach. Upon completion, students should be able to understand major concepts in each content area and implement appropriate experiences for young children.
(S25382)

EDU 251 - Exploration Activities

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers fundamental concepts in the content areas of science, technology, engineering, math, and social studies through investigative experiences aligned with NC Foundations for Early Learning and Development. Emphasis is placed on exploring fundamental concepts, scope and sequence, and teaching strategies to engage each child through play and open-ended discovery in indoor/outdoor environments. Upon completion, students should be able to understand major concepts in each content area and implement developmentally appropriate, culturally responsive, equitable, and inclusive experiences for all young children. (S25929)

EDU 251A - Exploration Activities Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take EDU-251 Take EDU-119

Corequisites: EDU-251

This course provides a laboratory component to practice content knowledge gained from EDU 251.

Emphasis is placed on practical experience that enhances the fundamental concepts. Upon completion, students should be able to demonstrate the discovery approach to teaching and plan appropriate science, technology, engineering, math, and social studies experiences for each child. (S25383)

EDU 259 - Curriculum Planning

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119 Take 1 group; EDU-151 EDU-151; EDU-251 EDU-251A; EDU-280 EDU-280A

This course is designed to focus on using content knowledge to build developmentally effective approaches for culturally/linguistically/ability diverse young children. Topics include components of curriculum, a variety of curriculum models, authentic observation and assessment, and planning developmentally appropriate experiences aligned with the NC Foundations for Early Learning and Development. Upon completion, students should be able to understand, evaluate, and use curriculum to plan for individual/group needs.

(S25390)

EDU 259 - Curriculum Planning

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119

This course is designed to focus on using content knowledge to build effective developmentally appropriate approaches that are culturally responsive, equitable, and ability diverse for young children. Topics include components of curriculum, a variety of curriculum models, authentic observation and assessment, and planning developmentally appropriate experiences and indoor/outdoor environments aligned with the NC Foundations for Early Learning and Development. Upon completion, students should be able to understand, evaluate, and use developmentally appropriate curriculum to plan for the individual/group needs of young children. (S25930)

EDU 261 - Early Childhood Admin I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119

Corequisites: EDU-119

This course introduces principles and practices essential to preparing and supporting child care administrators. Topics include program philosophy, policies and procedures, NC Child Care Law and Rules, business planning, personnel and fiscal management, and NAEYC Code of Ethical Conduct Supplement for Early Childhood Program Administration. Upon completion, students should be able to articulate a developmentally appropriate program philosophy, locate current state licensing regulations, analyze a business plan and examine comprehensive program policies and procedures. (S25391)

EDU 262 - Early Childhood Admin II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: EDU-119 and EDU-261

This course focuses on advocacy/leadership, public relations/community outreach and program quality/evaluation for diverse early childhood programs. Topics include program evaluation/accreditation, involvement in early childhood professional organizations, leadership/mentoring, family, volunteer and community involvement and early childhood advocacy. Upon completion, students should be able to define and evaluate all components of early childhood programs, develop strategies for advocacy and integrate community into programs. (S25392)

EDU 263 - School-Age Program Admin

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take EDU-119

Corequisites: Take One: DRE-098, ENG 002, or ENG 111

This course introduces the methods and procedures for development and administration of school-age programs in the public or proprietary setting. Emphasis is placed on the construction and organization of the physical environment. Upon completion, students should be able to plan, develop and administer a quality school-age program. (S23735)

EDU 271 - Educational Technology

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the appropriate and ethical use of technology that is inclusive of digital and analog materials/tools to enhance teaching and learning in all educational settings. Emphasis is placed on the developmentally appropriate use of technology with children, ethical issues, digital citizenship, instructional strategies, assistive technology, and the use of technology for professional development and communication with families. Upon completion, student should be able to demonstrate professional and ethical implementation of various modes of technology in culturally responsive and equitable ways to support diverse children, families and communities. (S25931)

EDU 279 - Literacy Develop and Instruct

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course is designed to provide students with concepts and skills of literacy development, instructional methods/materials and assessment techniques needed to provide scientifically-based, systematic reading and writing instruction into educational practice. Topics include literacy concepts, reading and writing development, developmentally appropriate pedagogy, culturally-responsive

instruction, standards-based outcomes, lesson planning, formative/summative assessment, recognizing reading difficulties, research-based interventions, authentic learning experiences, classroom implementation, and reflective practice. Upon completion, students should be able to plan, implement, assess, evaluate, and demonstrate developmentally appropriate literacy instruction aligned to the NC Standard Course of Study and other state and national standards. (S25593)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EDU 280 - Language/Literacy Experiences

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EDU-119

Corequisites: EDU-280A

This course provides evidence-based strategies for enhancing language and literacy experiences that align with NC Foundations for Early Learning and Development. Topics include developmental sequences for children's emergent receptive and expressive language, print concepts, appropriate observations/assessments, literacy enriched environments, quality selection of diverse literature, interactive media, and inclusive practices. Upon completion, students should be able to select, plan, implement and evaluate developmentally appropriate language and literacy experiences for children who are culturally, linguistically and ability diverse. (S25396)

EDU 280A - Literacy Exp Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take EDU-280 Take EDU-119

Corequisites: EDU-280

This course provides a laboratory component to complement EDU 280. Emphasis is placed on practical experiences that enhance concepts introduced in the classroom. Upon completion, students should be able to demonstrate a practical understanding of the development and implementation of appropriate early literacy experiences. (S25397)

EDU 284 - Early Child Capstone Prac

Class: 1 Lab: 9 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One Set:,Set 1: EDU-119, EDU-144, EDU-145, EDU-146, and EDU-151,Set 2: EDU-119, PSY-244, PSY-245, EDU-146, and EDU-151,Set 3: EDU-119, EDU-144, PSY-245, EDU-146, and EDU-151,Set 4: EDU-119, PSY-244, EDU-145, EDU-146, and EDU-151 Take EDU-119

This course is designed to allow students to demonstrate acquired skills in a three star (minimum) or

NAEYC accredited or equivalent, quality early childhood environment. Emphasis is placed on designing, implementing and evaluating developmentally appropriate activities and environments for all children; supporting/engaging families; and modeling reflective and professional practices based on national and state guidelines. Upon completion, students should be able to apply NC Foundations for Early Learning and Development to demonstrate developmentally appropriate plans/assessments, appropriate guidance techniques and ethical/professional behaviors, including the use of appropriate technology, as indicated by assignments and onsite faculty assessments. (S25400)

EFL 55 - English for Special Purpo

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course will provide instruction in academic and professional language for non-native speakers of English. Emphasis is placed on development of integrated language use for carrying out a specific academic task. Upon completion, students should be able to demonstrate improved language skills for participation and success within the particular topic area. (S12599)

EFL 62 - Listening/Speaking II

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-061

This course is designed to enhance intermediate listening and speaking skills of non-native speakers of English. Emphasis is placed on the ability to hold extended conversation and on the ability to understand extended spoken discourse. Upon completion, students should be able to demonstrate improved listening skills and strategies in a variety of settings. (S11428)

EFL 63 - Listening/Speaking III

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-062

This course is designed to increase the ability and confidence of high intermediate-level non-native speakers of English in verbal expression and listening comprehension. Emphasis is placed on listening/speaking skills which would be appropriate for group discussions, oral presentations, and note taking. Upon completion, students should be able to successfully participate in high intermediate-level listening and speaking activities. (S11523)

EFL 64 - Listening-Speaking IV

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-063

This course is designed to prepare advanced-level non-native speakers of English for academic and

professional speaking and listening activities. Emphasis is placed on learning and practicing strategies of effective oral expression and comprehension of spoken discourse in informal and formal settings. Upon completion, students should be able to effectively participate in activities appropriate to academic and professional settings. (S11442)

EFL 71 - Reading I

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

This course is designed to help those literacy skills achieve reading fluency in English at the beginning level. Emphasis is placed on basic academic and cultural vocabulary and reading strategies which include self-monitoring, and recognizing organizational styles and context clues. Upon completion, students should be able to use these strategies to read and comprehend basic academic, narrative, and expository texts. (S11178)

EFL 72 - Reading II

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-071

This course provides preparation in academic and general purpose reading in order to achieve reading fluency at the low-intermediate level. Emphasis is placed on expanding academic and cultural vocabulary and developing effective reading strategies to improve comprehension and speed. Upon completion, students should be able to read and comprehend narrative and expository texts at the low-intermediate instructional level. (S11145)

EFL 73 - Reading III

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-072

This course is designed to develop fundamental reading and study strategies at the intermediate level needed for curriculum programs. Emphasis is placed on building vocabulary and cultural knowledge, improving comprehension, and developing study strategies on basic-level college materials and literary works. Upon completion, students should be able to read and comprehend narrative and expository texts at the intermediate instructional level. (S11150)

EFL 74 - Reading IV

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-073

This course is designed to enhance the academic reading skills for successful reading ability as required in college-level courses. Emphasis is placed on strategies for effective reading and the utilization of

these strategies to improve comprehension, analytical skills, recall, and overall reading speed. Upon completion, students should be able to comprehend, synthesize, and critique multi-disciplinary college-level reading/textbook materials. (S11128)

EFL 81 - Grammar I

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

This course provides non-native speakers of English with a variety of fundamental grammatical concepts which enrich language skills and comprehension. Emphasis is on key basic grammatical structures and opportunities for practice which incorporate grammatical knowledge into various skills areas. Upon completion, students should be able to demonstrate comprehension and correct usage of specified grammatical concepts. (S12883)

EFL 82 - Grammar II

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-081

This course provides non-native speakers of English with a variety of basic grammatical concepts which enrich language skills and comprehension. Emphasis is on key low-intermediate grammatical structures and opportunities for practice which incorporate grammatical knowledge into various skills areas. Upon completion, students should be able to demonstrate by written and oral means the comprehension and correct usage of specified grammatical concepts (S12912)

EFL 83 - Grammar III

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-082

This course is designed to provide high-intermediate non-native speakers of English with a knowledge of grammatical structures that improves academic communication. Emphasis is placed on using high-intermediate grammatical structures in meaningful contexts through exercises integrating the use of newly acquired structures with previously learned structures. Upon completion, students should be able to demonstrate improved proficiency, comprehension, and grammatical accuracy. (S12869)

EFL 84 - Grammar IV

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-083

This course is designed to give non-native speakers of English a full understanding of advanced grammatical structures and techniques. Emphasis is placed on oral and written communicative fluency through the study of advanced grammatical forms. Upon completion, students should be able to

incorporate the structures covered in both spoken and written form, demonstrating improved proficiency, comprehension, and grammatical accuracy. (S12956)

EFL 91 - Composition I

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

This course introduces basic sentence structure and writing paragraphs. Emphasis is placed on word order, verb tense-aspect system, auxiliaries, word forms, and simple organization and basic transitions in writing paragraphs. Upon completion, students should be able to demonstrate a basic understanding of grammar and ability to write English paragraphs using appropriate vocabulary, organization, and transitions. (S10286)

EFL 92 - Composition II

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-091

This course provides preparation in low-intermediate academic and general-purpose writing. Emphasis is placed on writing as a process, paragraph development, and basic essay organization. Upon completion, students should be able to write and independently edit and use the major elements of the writing process, sentence, paragraph, and essay. (S10325)

EFL 93 - Composition III

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-092

This course covers intermediate-level academic and general-purpose writing. Emphasis is placed on the writing process, content, organization, and language use in formal academic compositions in differing rhetorical modes. Upon completion, students should be able to effectively use the writing process in a variety of rhetorical modes. (S10304)

EFL 94 - Composition IV

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take EFL-093

This course prepares low-advanced non-native speakers of English to determine the purpose of their writing and to write paragraphs and essays to fulfill that purpose. Emphasis is placed on unity, coherence, completeness, audience, the writing process, and the grammatical forms and punctuation appropriate for each kind of writing. Upon completion, students should be able to write unified, coherent, and complete paragraphs and essays which are grammatical and appropriate for the intended audience. (S10309)

EGR 110 - Intro to Engineering Tech

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces general topics relevant to engineering technology. Topics include career assessment, professional ethics, critical thinking and problem solving, usage of college resources for study and research, and using tools for engineering computations. Upon completion, students should be able to choose a career option in engineering technology and utilize college resources to meet their educational goals. (S20645)

EGR 115 - Intro to Technology

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic skills and career fields for technicians. Topics include career options, technical vocabulary, dimensional analysis, measurement systems, engineering graphics, calculator applications, professional ethics, safety practices, and other related topics. Upon completion, students should be able to demonstrate an understanding of the basic technologies, prepare drawings and sketches, and perform computations using a scientific calculator. (S20666)

EGR 120 - Eng and Design Graphics

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the graphical tools for engineering and design communications. Emphasis is placed upon selecting the appropriate methods and tools and conveying ideas using sketches, orthographic views and projections, and computer graphics applications. Upon completion, students should be able to communicate essential features of two-dimensional and three-dimensional objects using the proper tools and methods. (S23536)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 150 - Intro to Engineering

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course is an overview of the engineering profession. Topics include goal setting and career assessment, ethics, public safety, the engineering method and design process, written and oral communication, interpersonal skills and team building, and computer applications. Upon completion, students should be able to understand the engineering process, the engineering profession, and utilize college resources to meet their educational goals. (S20709)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 210 - Intro to Elec/Comp Eng Lab

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: MAT-271 and PHY-251

This course provides an overview of electrical and computer engineering, through a lecture and laboratory setting. Topics include fundamental concepts, electronic circuits, digital circuits, communication systems, and signal processing. Upon completion, students should be able to discuss the wide range of fields available to the electrical or computer engineer. (S20143)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 212 - Logic System Design I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: MAT-271 and PHY-251

This course provides an introduction to digital circuits and analysis. Topics include Boolean Algebra; mixed logic; design of combinational circuits; introduction to sequential systems; and MSI building blocks. Upon completion, students should be able to analyze and design digital circuits and systems. (S20145)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 214 - Num Methods for Engineers

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAT-272

This course introduces contemporary methods and tools for numerical analysis in engineering. Topics include numerical methods in differentiation, integration, root-finding, linear and non-linear regressions. Upon completion, students should be able to demonstrate: basic structured programming concepts involving decision making, loops, functions, and parameter passing; common numerical methods used in engineering analysis; estimation of the amount of error inherent in different numerical methods; assessment of numerical efficiency; method assessment of numerical efficiency; and convergence properties of different numerical methods. (S25082)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 215 - Network Theory I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: MAT-272 and PHY-251 Take PHY-252 and MAT-273

Corequisites: PHY-252 and MAT-273

This course provides an introduction to Kirchoff's laws and terminal equations, circuit analysis techniques and network theorems, transient and natural response, and state variable analysis. Topics include Kirchoff's laws, Ohm's law, circuit analysis techniques, Network theorems, singularity functions, transient and natural responses, power, and state variable analysis. Upon completion, students should be able to analyze electric circuits involving capacitors, inductors, and resistors to determine required parameters. (S20147)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 216 - Logic and Network Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take All: MAT-272 and PHY-251 Take EGR-215

Corequisites: EGR-215

This course provides laboratory experiments in network measurements and logic design and laboratory equipment and techniques. Topics include network measurement and applications, experimental logic design and introduction to laboratory equipment and techniques. Upon completion, students should be able to complete network measurement logic design and be able to use laboratory equipment with proper techniques. (S25154)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 220 - Engineering Statics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHY-251 Take MAT-272

Corequisites: MAT-272

This course introduces the concepts of engineering based on forces in equilibrium. Topics include concentrated forces, distributed forces, forces due to friction, and inertia as they apply to machines, structures, and systems. Upon completion, students should be able to solve problems which require the ability to analyze systems of forces in static equilibrium. (S13929)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 225 - Engineering Dynamics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EGR-220 Take MAT-273

Corequisites: MAT-273

This course introduces the concepts of engineering based on the analysis of motion in Cartesian, cylindrical, and spherical coordinate systems. Topics include the two and three dimensional motion of particles and rigid bodies, the forces associated with that motion, and relative motion between two coordinate systems. Upon completion, students should be able to solve problems which require the ability to analyze the motion and forces involved in a dynamic system. (S13963)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 228 - Intro to Solid Mechanics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EGR-220

This course provides an introduction to engineering theory of deformable solids and applications. Topics include stress and deformation resulting from axial, torsion, and bending loads; shear and moment diagrams; Mohr's circle of stress; and strain and buckling of columns. Upon completion, students should be able to analyze solids subject to various forces and design systems using a variety of materials. (S20151)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

EGR 251 - Statics

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHY-131

This course covers the concepts and principles of statics. Topics include systems of forces and moments on structures in two- and three-dimensions in equilibrium. Upon completion, students should be able to analyze forces and moments on structures. (S23502)

EGR 252 - Strength of Materials

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EGR-251 Take MEC-145

This course covers the principles and concepts of stress analysis. Topics include centroids, moments of inertia, shear/moment diagrams, and stress and strain. Upon completion, students should be able to perform a stress and strain analysis on structural components. (S23503)

ELC 111 - Intro to Electricity

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the fundamental concepts of electricity and test equipment to non-electrical/electronics majors. Topics include basic DC and AC principles (voltage, resistance, current, impedance); components (resistors, inductors, and capacitors); power; and operation of test equipment. Upon completion, students should be able to construct and analyze simple DC and AC circuits using electrical test equipment. (S11841)

ELC 111IS - Intro to Electricity - Ind Sys

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the fundamental concepts of electricity and test equipment to non-electrical/electronics majors. Topics include basic DC and AC principles (voltage, resistance, current, impedance); components (resistors, inductors, and capacitors); power; and operation of test equipment. Upon completion, students should be able to construct and analyze simple DC and AC circuits using electrical test equipment. (L23360)

ELC 111ME - Intro to Electricity - Mec Eng

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the fundamental concepts of electricity and test equipment to non-electrical/electronics majors. Topics include basic DC and AC principles (voltage, resistance, current, impedance); components (resistors, inductors, and capacitors); power; and operation of test equipment. Upon completion, students should be able to construct and analyze simple DC and AC circuits using electrical test equipment. (L23362)

ELC 112 - DC/AC Electricity

Class: 3 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

This course introduces the fundamental concepts of and computations related to DC/AC electricity. Emphasis is placed on DC/AC circuits, components, operation of test equipment; and other related

topics. Upon completion, students should be able to construct, verify, and analyze simple DC/AC circuits. (S23481)

ELC 113 - Residential Wiring

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the care/usage of tools and materials used in residential electrical installations and the requirements of the National Electrical Code. Topics include NEC, electrical safety, and electrical print reading; planning, layout; and installation of electrical distribution equipment; lighting; overcurrent protection; conductors; branch circuits; and conduits. Upon completion, students should be able to properly install conduits, wiring, and electrical distribution equipment associated with residential electrical installations. (S23518)

ELC 114 - Commercial Wiring

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-112 and ELC-113

This course provides instruction in the application of electrical tools, materials, and test equipment associated with commercial electrical installations. Topics include the NEC; safety; electrical blueprints; planning, layout, and installation of equipment and conduits; and wiring devices such as panels and overcurrent devices. Upon completion, students should be able to properly install equipment and conduit associated with commercial electrical installations. (S23519)

ELC 115 - Industrial Wiring

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-113 or ELC-112 and ELC-125 or ELC-125 and ELC-131

This course covers layout, planning, and installation of wiring systems in industrial facilities. Emphasis is placed on industrial wiring methods and materials. Upon completion, students should be able to install industrial systems and equipment. (S23520)

ELC 117 - Motors and Controls

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take 1 course ELC-111 or ELC-112 or ELC-125 or ELC-131

This course introduces the fundamental concepts of motors and motor controls. Topics include ladder diagrams, pilot devices, contactors, motor starters, motors, and other control devices. Upon completion, students should be able to properly select, connect, and troubleshoot motors and control circuits. (S23521)

ELC 118 - National Electrical Code

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ELC-111 ELC-112 or ELC-113

This course covers the use of the current National Electrical Code. Topics include the NEC history, wiring methods, overcurrent protection, materials, and other related topics. Upon completion, students should be able to effectively use the NEC. (S11926)

ELC 119 - NEC Calculations

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ELC-118

This course covers branch circuit, feeder, and service calculations. Emphasis is placed on sections of the National Electrical Code related to calculations. Upon completion, students should be able to use appropriate code sections to size wire, conduit, and overcurrent devices for branch circuits, feeders, and service. (S11833)

ELC 121 - Electrical Estimating

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ELC-113

This course covers the principles involved in estimating electrical projects. Topics include take-offs of materials and equipment, labor, overhead, and profit. Upon completion, students should be able to estimate simple electrical projects. (S21591)

ELC 125 - Diagrams and Schematics

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers the interpretation of electrical diagrams, schematics, and drawings common to electrical applications. Emphasis is placed on reading and interpreting electrical diagrams and schematics. Upon completion, students should be able to read and interpret electrical diagrams and schematics. (S10647)

ELC 128 - Intro to PLC

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ELC-111 or ELC-117 or ELC-131 or ELC-112

This course introduces the programmable logic controller (PLC) and its associated applications. Topics include ladder logic diagrams, input/output modules, power supplies, surge protection,

selection/installation of controllers, and interfacing of controllers with equipment. Upon completion, students should be able to understand basic PLC systems and create simple programs. (S23522)

ELC 131 - Circuit Analysis I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Corequisites: MAT-121

This course introduces DC and AC electricity with an emphasis on circuit analysis, measurements, and operation of test equipment. Topics include DC and AC principles, circuit analysis laws and theorems, components, test equipment operation, circuit simulation, and other related topics. Upon completion, students should be able to interpret circuit schematics; design, construct, verify, and analyze DC/AC circuits; and properly use test equipment. (S23482)

ELC 133 - Circuit Analysis II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-131

This course covers additional concepts of DC/AC electricity, the use of test equipment, and measurement techniques. Topics include the application of network theorems such as delta/wye transformations, Superposition Theorem, and other advanced circuit analysis principles. Upon completion, students should be able to construct and analyze DC/AC circuits used advanced circuit analysis theorems, circuit simulators, and test equipment. (S23484)

ELC 213 - Instrumentation

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-112 ELC-111 or ELC-131

This course covers the fundamentals of instrumentation used in industry. Emphasis is placed on electric, electronic, and other instruments. Upon completion, students should be able to install, maintain, and calibrate instrumentation. (S21598)

ELC 220 - Photovoltaic Sys Tech

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the concepts, tools, techniques, and materials needed to understand systems that convert solar energy into electricity with photovoltaic (pv) technologies. Topics include site analysis for system integration, building codes, and advances in photovoltaic technology. Upon completion, students should be able to demonstrate an understanding of the principles of photovoltaic technology and current applications. (S23449)

ELC 221 - Adv PV Sys Designs

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ELC-220

This course introduces specific elements in photovoltaic (pv) systems technologies including efficiency, modules, inverters, charge controllers, batteries, and system installation. Topics include National Electrical Code (NEC), electrical specifications, photovoltaic system components, array design and power integration requirements that combine to form a unified structure. Upon completion, students should be able to demonstrate an understanding of various photovoltaic designs and proper installation of NEC compliant solar electric power systems. (S23453)

ELC 228 - PLC Applications

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-128

This course covers programming and applications of programmable logic controllers. Emphasis is placed on programming techniques, networking, specialty I/O modules, and system troubleshooting. Upon completion, students should be able to specify, implement, and maintain complex PLC controlled systems. (S21601)

ELC 230 - Wind & Hydro Power Sys

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces concepts, designs, tools, techniques, and material requirements for systems that convert wind and water into usable energy. Topics include the analysis, measurement, and estimation of potential energy of wind and water systems. Upon completion, students should be able to demonstrate an understanding of the technologies associated with converting wind and water into a viable energy source. (S23454)

ELN 114 - Marine Electronics

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces a wide variety of marine electronics that are used in the marine research industry. Topics include basic theory, AC/DC power systems, components, circuits, testing, troubleshooting, and installation of AC and DC marine electronics. Upon completion, students should be able to install, maintain, and operate basic marine electronics used in the marine research industry. (S21621)

ELN 131 - Analog Electronics I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-131 and MAT-121 or MAT-171

This course introduces the characteristics and applications of semiconductor devices and circuits. Emphasis is placed on analysis, selection, biasing, and applications. Upon completion, students should be able to construct, analyze, verify, and troubleshoot analog circuits using appropriate techniques and test equipment. (S23487)

ELN 132 - Analog Electronics II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELN-131

This course covers additional applications of analog electronic circuits with an emphasis on analog and mixed signal integrated circuits (IC). Topics include amplification, filtering, oscillation, voltage regulation, and other analog circuits. Upon completion, students should be able to construct, analyze, verify, and troubleshoot analog electronic circuits using appropriate techniques and test equipment. (S23509)

ELN 133 - Digital Electronics

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-131

This course covers combinational and sequential logic circuits. Topics include number systems, Boolean algebra, logic families, medium scale integration (MSI) and large scale integration (LSI) circuits, analog to digital (AD) and digital to analog (DA) conversion, and other related topics. Upon completion, students should be able to construct, analyze, verify, and troubleshoot digital circuits using appropriate techniques and test equipment. (S23488)

ELN 150 - CAD for Electronics

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ELC-131

This course introduces computer-aided drafting (CAD) with an emphasis on applications in the electronics field. Topics include electronics industry standards (symbols, schematic diagrams, layouts); drawing electronic circuit diagrams; and specialized electronic drafting practices and components such as resistors, capacitors, and ICs. Upon completion, students should be able to prepare electronic drawings with CAD software. (S21630)

ELN 152 - Fabrication Techniques

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers the fabrication methods required to create a prototype product from the initial circuit design. Topics include CAD, layout, sheet metal working, component selection, PC board layout and construction, reverse engineering, soldering, and other related topics. Upon completion, students should be able to design and construct an electronic product with all its associated documentation. (S21631)

ELN 231 - Industrial Controls

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ELC- 111 or ELC-112 or ELC-131

This course introduces the fundamental concepts of control of rotating machinery and associated peripheral devices. Topics include rotating machine theory, ladder logic, electromechanical and solid state relays, motor controls, pilot devices, three-phase power systems, and other related topics. Upon completion, students should be able to interpret schematics and demonstrate an understanding of electromechanical and electronic control of rotating machinery. (S21639)

ELN 232 - Intro to Microprocessors

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take CSC-133 ELN-133

This course introduces microprocessor architecture and microcomputer systems including memory and input/output interfacing. Topics include low-level language programming, bus architecture, I/O systems, memory systems, interrupts, and other related topics. Upon completion, students should be able to interpret, analyze, verify, and troubleshoot fundamental microprocessor circuits and programs using appropriate techniques and test equipment. (S21640)

ELN 234 - Communication Systems

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Corequisites: ELN-133

This course introduces the fundamentals of electronic communication systems. Topics include the frequency spectrum, electrical noise, modulation techniques, characteristics of transmitters and receivers, and digital communications. Upon completion, students should be able to interpret analog and digital communication circuit diagrams, analyze transmitter and receiver circuits, and use appropriate communication test equipment. (S21642)

ELN 235 - Data Communication Sys

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELN-234(S21642);

This course covers data communication systems and the transmission of digital information from source to destination. Topics include data transmission systems, interfaces and modems, protocols, networks, and other related topics. Upon completion, students should be able to demonstrate knowledge of the concepts associated with data communication systems. (S21643)

ELN 236 - Fiber Optics and Lasers

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-111 or ELC-131

Corequisites: ELN-234

This course introduces the fundamentals of fiber optics and lasers. Topics include the transmission of light; characteristics of fiber optic and lasers and their systems; fiber optic production; types of lasers; and laser safety. Upon completion, students should be able to understand fiber optic communications and basic laser fundamentals. (S20400)

ELN 237 - Local Area Networks

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110 CET-172

This course introduces the fundamentals of local area networks and their operation. Topics include the characteristics of network topologies, system hardware, system configuration, installation and operation of the LAN. Upon completion, students should be able to install and maintain a local area network. (S21644)

ELN 238 - Advanced LANs

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TNE-255

This course covers advanced concepts, tools, and techniques associated with servers, workstations, and overall local area network performance. Topics include network security and configuration, system performance and optimization, communication protocols and packet formats, troubleshooting techniques, multi-platform integration, and other related topics. Upon completion, students should be able to use advanced techniques to install, manage, and troubleshoot networks and optimize server and workstation performance. (S21645)

ELN 246 - Cert Elect Tech Prep

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ELN-234

This course covers electronic principles, theories, and concepts. Emphasis is placed on those items covered in the Certified Electronic Technician examination. Upon completion, students should be able to demonstrate competence in electronics and be prepared for the Certified Electronic Technician examination. (S11665)

ELN 260 - Prog Logic Controllers

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course provides a detailed study of PLC applications, with a focus on design of industrial controls using the PLC. Topics include PLC components, memory organization, math instructions, documentation, input/output devices, and applying PLCs in industrial control systems. Upon completion, students should be able to select and program a PLC system to perform a wide variety of industrial control functions. (S21655)

ELN 275 - Troubleshooting

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take ELC-131

Corequisites: ELN-133 ELN-141

This course covers techniques of analyzing and repairing failures in electronic equipment. Topics include safety, signal tracing, use of service manuals, and specific troubleshooting methods for analog, digital, and other electronics-based circuits and systems. Upon completion, students should be able to logically diagnose and isolate faults and perform necessary repairs to meet manufacturers' specifications. Not used at CFCC 5.16.07 (S21659)

EMS 110 - EMT

Class: 6 Lab: 6 Clinical: 3 Work: 0 **Credits: 9**

This course introduces basic emergency medical care. Topics include preparatory, airway, patient assessment, medical emergencies, trauma, infants and children, and operations. Upon completion, students should be able to demonstrate the knowledge and skills necessary to achieve North Carolina State or National Registry EMT certification. (S25182)

EMS 122 - EMS Clinical Practicum I

Class: 0 Lab: 0 Clinical: 3 Work: 0 **Credits: 1**

Prerequisites: Take EMS-110

This course provides the introductory hospital clinical experience for the paramedic student. Emphasis is

placed on mastering fundamental paramedic skills. Upon completion, students should be able to demonstrate competency with fundamental paramedic level skills. (S25185)

EMS 125 - EMS Instructor Methodology

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the information needed to develop and instruct EMS courses. Topics include instructional methods, lesson plan development, time management skills, and theories of adult learning. Upon completion, students should be able to teach EMS courses and meet the North Carolina EMS requirements for instructor methodology.

****This is a Summer Only Class.****

(S25186)

EMS 130 - Pharmacology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take EMS-110

This course introduces the fundamental principles of pharmacology and medication administration and is required for paramedic certification. Topics include medical terminology, pharmacological concepts, weights, measures, drug calculations, vascular access for fluids and medication administration and legislation. Upon completion, students should be able to accurately calculate drug dosages, properly administer medications, and demonstrate general knowledge of pharmacology. (S25187)

EMS 131 - Advanced Airway Management

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take EMS-110

This course is designed to provide advanced airway management techniques and is required for paramedic certification. Topics must meet current guidelines for advanced airway management in the pre-hospital setting. Upon completion, students should be able to properly utilize all airway adjuncts and pharmacology associated with airway control and maintenance. (S25188)

EMS 140 - Rescue Scene Management

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces rescue scene management. Topics include response to hazardous material conditions, incident command, and extrication of patients from a variety of situations. Upon completion, students should be able to recognize and manage rescue operations based upon initial and follow-up scene assessment. (S23876)

EMS 160 - Cardiology I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take EMS-110

This course introduces the study of cardiovascular emergencies and is required for paramedic certification. Topics include anatomy and physiology, pathophysiology, electrophysiology, and rhythm interpretation. Upon completion, students should be able to recognize and interpret rhythms.

****This is a Spring Only Class.****

(S25189)

EMS 220 - Cardiology II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: EMS-122, EMS-130, and EMS-160

This course provides an in-depth study of cardiovascular emergencies and is required for paramedic certification. Topics include assessment and treatment of cardiac emergencies, cardiac pharmacology, and patient care. Upon completion, students should be able to manage the cardiac patient. (S25190)

EMS 221 - EMS Clinical Practicum II

Class: 0 Lab: 0 Clinical: 6 Work: 0 **Credits: 2**

Prerequisites: Take One: EMS-121 or EMS-122

This course provides clinical experiences in the hospital and/or field. Emphasis is placed on increasing the proficiency of students' skills and abilities in patient assessments and the delivery of care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care. (S25191)

EMS 231 - EMS Clinical Pract III

Class: 0 Lab: 0 Clinical: 9 Work: 0 **Credits: 3**

Prerequisites: Take EMS-221

This course provides clinical experiences in the hospital and/or field. Emphasis is placed on enhancing the students' skills and abilities in providing advanced-level care. Upon completion, students should be able to demonstrate continued progress in advanced-level patient care. (S25192)

EMS 235 - EMS Management

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course stresses the principles of managing a modern emergency medical service system. Topics include structure and function of municipal governments, EMS grantsmanship, finance, regulatory agencies, system management, legal issues, and other topics relevant to the EMS manager. Upon completion, students should be able to understand the principles of managing emergency medical service delivery systems. (S11658)

EMS 240 - Patients W/ Special Challenges

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: EMS-122 and EMS-130

This course includes concepts of crisis intervention and techniques of interacting with patients with special challenges and is required for paramedic certification. Topics include appropriate intervention and interaction for neglected, abused, terminally ill, chronically ill, technology assisted, bariatric, physically challenged, mentally challenged, or assaulted patients as well as behavioral emergencies. Upon completion, students should be able to recognize and manage the care of patients with special challenges. (S23919)

EMS 241 - EMS Clinical Practicum IV

Class: 0 Lab: 0 Clinical: 12 Work: 0 **Credits: 4**

Prerequisites: Take EMS-231

This course provides clinical experiences in the hospital and/or field. Emphasis is placed on mastering the skills/competencies required of the paramedic providing advanced-level care. Upon completion, students should be able to provide advanced-level patient care as an entry-level paramedic. (S25193)

EMS 250 - Medical Emergencies

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: EMS-122 and EMS-130

This course provides an in-depth study of medical conditions frequently encountered in the prehospital setting and is required for paramedic certification. Topics include appropriate interventions/treatments for disorders/diseases/injuries affecting the following systems: respiratory, neurological, abdominal/gastrointestinal, endocrine, genitourinary, musculoskeletal, and immunological as well as toxicology, infectious diseases and diseases of the eyes, ears, nose and throat. Upon completion, students should be able to recognize, assess and manage the care of frequently encountered medical conditions based upon initial patient assessment. (S23921)

EMS 260 - Trauma Emergencies

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: EMS-122 and EMS-130

This course provides in-depth study of trauma including pharmacological interventions for conditions frequently encountered in the prehospital setting and is required for paramedic certification. Topics include an overview of thoracic, abdominal, genitourinary, orthopedic, neurological, and multi-system trauma, soft tissue trauma of the head, neck, and face as well as environmental emergencies. Upon completion, students should be able to recognize and manage trauma situations based upon patient assessment and should adhere to standards of care. (S23922)

EMS 270 - Life Span Emergencies

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: EMS-122 and EMS-130

This course covers medical/ethical/legal issues and the spectrum of age-specific emergencies from conception through death required for paramedic certification. Topics include gynecological, obstetrical, neonatal, pediatric, and geriatric emergencies and pharmacological therapeutics. Upon completion, students should be able to recognize and treat age-specific emergencies.

****This is a Spring Only Class.****

(S25194)

EMS 280 - EMS Bridging Course

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to provide currently credentialed state or national Paramedic students with the most current education trends in Paramedic Practice. Emphasis is placed on transitions in healthcare. Upon completion, students should be able to integrate emerging trends in pre-hospital care. (S25195)

EMS 285 - EMS Capstone

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: EMS-220, EMS-250, and EMS-260

This course provides an opportunity to demonstrate problem-solving skills as a team leader in simulated patient scenarios and is required for paramedic certification. Emphasis is placed on critical thinking, integration of didactic and psychomotor skills, and effective performance in simulated emergency situations. Upon completion, students should be able to recognize and appropriately respond to a variety of EMS-related events. (S10931)

ENG 1 - English Skills Support

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course is designed to supplement the skills introduced in ENG-111 with emphasis placed on the editing and revision components of the writing process. Topics include concepts, skills, writing in a variety of genres and formats using a recursive process, and effective use of rhetorical strategies, with emphasis placed on the editing and revision components of the writing process. Upon completion, students should be able to produce unified, coherent, well-developed essays using standard written English. (S24825)

ENG 2 - Transition English

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides an opportunity to customize foundational English content in specific areas and will include developing a growth mindset. Topics include developing the academic habits, learning strategies, social skills, and growth mindset necessary to be successful in college-level English. Upon completion, students should be able to build a stronger foundation for success in their gateway level English courses by obtaining skills through a variety of instructional strategies with emphasis placed on the most essential prerequisite knowledge. (S25125)

ENG 11 - Writing and Inquiry Support

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course is designed to support students in the development of skills necessary for success in ENG 111 by complementing, supporting, and reinforcing ENG 111 Student Learning Outcomes. Emphasis is placed on developing a growth mindset, expanding skills for use in active reading and writing processes, recognizing organizational relationships within texts from a variety of genres and formats, and employing appropriate technology when reading and composing texts. Upon completion, students should be able to apply active reading strategies to college-level texts and produce unified, well-developed writing using standard written English. (S25127)

ENG 101 - Applied Communications I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to enhance reading and writing skills for the workplace. Emphasis is placed on technical reading, job-related vocabulary, sentence writing, punctuation, and spelling. Upon completion, students should be able to identify main ideas with supporting details and produce mechanically correct short writings appropriate to the workplace. (S12858)

ENG 102 - Applied Communications II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to enhance writing and speaking skills for the workplace. Emphasis is placed on generating short writings such as job application documents, memoranda, and reports and developing interpersonal communication skills with employees and the public. Upon completion, students should be able to prepare effective, short, and job-related written and oral communications. (S12952)

ENG 111 - Writing and Inquiry

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set:,Set 1: DRE-097,Set 2: ENG-002,Set 3: BSP-4002 Take ENG-011 Take 1 group;, #, Take DRE-098;, #, Take ENG-002;, From rule RMINP2;, #, Take BSP-4002;, From rule BSPMINP2;, #, Take ENG-011;

Corequisites: ENG-011

This course is designed to develop the ability to produce clear writing in a variety of genres and formats using a recursive process. Emphasis includes inquiry, analysis, effective use of rhetorical strategies, thesis development, audience awareness, and revision. Upon completion, students should be able to produce unified, coherent, well-developed essays using standard written English. UGETC (S25433)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 112 - Writing/Research in the Disc

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course, the second in a series of two, introduces research techniques, documentation styles, and writing strategies. Emphasis is placed on analyzing information and ideas and incorporating research findings into documented writing and research projects. Upon completion, students should be able to evaluate and synthesize information from primary and secondary sources using documentation appropriate to various disciplines. UGETC (S24024)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 113 - Literature-Based Research

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course, the second in a series of two, expands the concepts developed in ENG 111 by focusing on

writing that involves literature-based research and documentation. Emphasis is placed on critical reading and thinking and the analysis and interpretation of prose, poetry, and drama: plot, characterization, theme, cultural context, etc. Upon completion, students should be able to construct mechanically-sound, documented essays and research papers that analyze and respond to literary works. (S13650)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 114 - Prof Research & Reporting

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course, the second in a series of two, is designed to teach professional communication skills. Emphasis is placed on research, listening, critical reading and thinking, analysis, interpretation, and design used in oral and written presentations. Upon completion, students should be able to work individually and collaboratively to produce well-designed business and professional written and oral presentations. (S13706)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 125 - Creative Writing I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course is designed to provide students with the opportunity to practice the art of creative writing. Emphasis is placed on writing, fiction, poetry, and sketches. Upon completion, students should be able to craft and critique their own writing and critique the writing of others. (S16350)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 126 - Creative Writing II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-125

This course is designed as a workshop approach for advancing imaginative and literary skills. Emphasis is placed on the discussion of style, techniques, and challenges for first publications. Upon completion, students should be able to submit a piece of their writing for publication. (S12088)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 127 - Fiction Writing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-125

Corequisites: ENG-125

This course is designed to offer students instruction in the art of writing fiction, including short story, flash fiction, drama, novel excerpts, interactive storytelling, and other forms of fiction. Emphasis is placed on exploring techniques and forms in fiction, engaging in writing exercises, composing original works, critically examining contemporary short fiction and the work of peers, and preparing for careers in publishing and writing-intensive fields. Upon completion, students will be able to effectively apply craft techniques to original works of fiction; students will also be able to respond analytically to contemporary works of fiction and to prepare individual and peer work for publication. (S25722)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 128 - Poetry Writing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-125

Corequisites: ENG-125

This course is designed to offer students instruction in the art of writing poetry, including fixed, experimental, open, and digital forms. Emphasis is placed on exploring techniques and forms in poetry, engaging in writing exercises and composing original poems, critically examining contemporary poetry and the work of peers, and preparing for careers in publishing and writing-intensive fields. Upon completion, students will be able to effectively apply craft techniques to original works of poetry; students will also be able to respond analytically to contemporary works of poetry and prepare individual and peer work for publication. (S25723)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 129 - Creative Nonfiction Writing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-125

Corequisites: ENG-125

This course is designed to offer students instruction in the art of writing creative nonfiction, including the sub-genres of: memoir, the critical essay, personal essay, literary journalism, digital: content writing, and other nonfiction forms. Emphasis is placed on exploring techniques and forms in creative nonfiction, composing original essays, critically examining contemporary nonfiction and the work of peers, and preparing for careers in publishing and writing-intensive fields. Upon completion, students will be able to effectively apply craft techniques to original works of nonfiction; students will also be able to respond analytically to contemporary works of creative nonfiction and prepare individual and peer work for publication. (S25724)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 131 - Introduction to Literature

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111 Take One: ENG-112, ENG-113, or ENG-114

Corequisites: ENG-112, ENG-113, or ENG-114

This course introduces the principal genres of literature. Emphasis is placed on literary terminology, devices, structure, and interpretation. Upon completion, students should be able to analyze and respond to literature. (S14000)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 132 - Introduction to Drama

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111 Take One: ENG-112, ENG-113, or ENG-114

Corequisites: ENG-112 ENG-113 ENG-114

This course provides intensive study of drama as a literary form, based on close reading of representative texts. Emphasis is placed on the development and analysis of drama. Upon completion, students should be able to interpret, analyze, and discuss the distinguishing features of drama. (S14023)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 134 - Introduction to Poetry

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111 Take One: ENG-112, ENG-113, or ENG-114 Take ENG-112, ENG-113 and ENG-114

Corequisites: ENG-112 ENG-113 ENG-114

This course provides intensive study of the poem as a literary form, based on close reading of representative texts. Emphasis is placed on the development and analysis of poetry. Upon completion, students should be able to interpret, analyze, and discuss the distinguishing features of poetry. (S14032)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 231 - American Literature I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG 113, or ENG 114

This course covers selected works in American literature from its beginnings to 1865. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to analyze and interpret literary works in their historical and cultural contexts. UGETC (S24025)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 232 - American Literature II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course covers selected works in American literature from 1865 to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to analyze and interpret literary works in their historical and cultural contexts. UGETC (S24026)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 233 - Major American Writers

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, or ENG-113, or ENG-114

This course provides an intensive study of the works of several major American authors. Emphasis is placed on American history, culture, and the literary merits. Upon completion, students should be able to interpret, analyze, and evaluate the works studied. (S13908)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 235 - Survey of Film As Lit

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-113

This course provides a study of the medium of film with a focus on the historical impact and the various literary genres of movies. Emphasis is placed on an appreciation of film as a form of literature which demonstrates various elements of fiction (character, setting, theme, etc.). Upon completion, students should be able to analyze film critically in various literary contexts. (S21137)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 241 - British Literature I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-112, ENG-113, or ENG-114

This course covers selected works in British literature from its beginnings to the Romantic Period. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts. UGETC (S11763)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 242 - British Literature II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course covers selected works in British literature from the Romantic Period to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to literary works in their historical and cultural contexts. UGETC (S11698)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 243 - Major British Writers

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course provides an intensive study of the works of several major British authors. Emphasis is placed on British history, culture, and the literary merits. Upon completion, students should be able to interpret, analyze, and evaluate the works studied. (S11728)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 251 - Western World Literature I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course provides a survey of selected European works from the Classical period through the Renaissance. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to selected works. (S14255)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 252 - Western World Literature II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course provides a survey of selected European works from the Neoclassical period to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to selected works. (S14203)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 253 - The Bible As Literature

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course introduces the Hebrew Old Testament and the Christian New Testament as works of literary art. Emphasis is placed on the Bible's literary aspects including history, composition, structure, and cultural contexts. Upon completion, students should be able to identify and analyze selected books and passages using appropriate literary conventions. (S14261)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 261 - World Literature I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course introduces selected works from the Pacific, Asia, Africa, Europe, and the Americas from their literary beginnings through the seventeenth century. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to selected works. (S12708)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 262 - World Literature II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course introduces selected works from the Pacific, Asia, Africa, Europe, and the Americas from the eighteenth century to the present. Emphasis is placed on historical background, cultural context, and literary analysis of selected prose, poetry, and drama. Upon completion, students should be able to interpret, analyze, and respond to selected works. (S12600)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 271 - Contemporary Literature

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course includes a study of contemporary literature. Emphasis is placed on literary and cultural trends of selected texts. Upon completion, students should be able to interpret, analyze, and respond to

the literature. (\$13555)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 272 - Southern Literature

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course provides an analytical study of the works of several Southern authors. Emphasis is placed on the historical and cultural contexts, themes, aesthetic features of individual works, and biographical backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and discuss selected works. (\$13535)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 273 - African-American Literature

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course provides a survey of the development of African-American literature from its beginnings to the present. Emphasis is placed on historical and cultural context, themes, literary traditions, and backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and respond to selected texts. (\$13578)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 274 - Literature by Women

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course provides an analytical study of the works of several women authors. Emphasis is placed on the historical and cultural contexts, themes and aesthetic features of individual works, and biographical backgrounds of the authors. Upon completion, students should be able to interpret, analyze, and discuss selected works. (\$13548)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENG 275 - Science Fiction

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: ENG-112, ENG-113, or ENG-114

This course covers the relationships between science and literature through analysis of short stories and novels. Emphasis is placed on scientific discoveries that shaped Western culture and our changing view of the universe as reflected in science fiction literature. Upon completion, students should be able to trace major themes and ideas and illustrate relationships between science, world view, and science fiction literature. (S13564)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

ENT 114 - Entertainment Law

Class: 3 Lab: 0 Clinical: 0 **Credits: 3**

Prerequisites: None

Corequisites: None

This course provides an introduction to legal aspects of the entertainment industry. Topics include performance rights, songwriting and personal appearance contracts, copyright law, trademarks, and the like. Upon completion, students should be able to explain the basic elements of a contract, recognizing, explaining, and evaluating elements of law that pertain to entertainment. (S10258)

ENV 110 - Environmental Science

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers fundamental scientific principles and problems facing society today. Topics include population, natural resources, air and water pollution, and waste disposal problems. Upon completion, students should be able to demonstrate insight into the role the individual plays in shaping the environment. (S23360)

ENV 226 - Environmental Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers federal laws and acts concerning environmental quality standards and the use of resources, legal procedures for enforcing laws, and problems concerning enforcement. Emphasis is placed on environmental law basics, water quality laws, air quality laws, waste disposal laws, and biological resource protection laws. Upon completion, students should be able to demonstrate an

understanding of federal/state environmental laws and their importance to the protection of environmental quality. (S23490)

EPT 120 - Sociology of Disaster

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to overview sociological disaster research, disaster systems, and alternative research approaches. Topics include human and organizational behaviors, long disaster impact on communities, disaster warning, and evacuation considerations. Upon completion, students should be able to assess and predict the impact of disaster-related human behavior. (S20530)

EPT 124 - EM Services Law & Ethics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers federal and state laws that affect emergency service personnel in the event of a natural disaster or terrorist incident. Topics include initial response and long-term management strategies, with an emphasis on legal and ethical considerations and coordination between local, state, and federal agencies. Upon completion, students should have an understanding of the role of private industry, government agencies, public policies, and federal/state declarations of disasters in emergency situations. (S22188)

EPT 130 - Mitigation & Preparedness

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the mitigation and preparation techniques and methods necessary to minimize the impact of natural, technological, and man-made disasters. Topics include hazard identification and mapping, design and construction applications, financial incentives, insurance, structural controls, preparation, planning, assessment, implementation, and exercises. Upon completion students should be able to develop a mitigation and preparedness plan. (S22189)

EPT 140 - Emergency Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the four phases of emergency management: mitigation, preparedness, response, and recovery. Topics include organizing for emergency management, coordinating for community resources, public sector liability, and the roles of government agencies at all levels. Upon completion, students should be able to demonstrate an understanding of comprehensive emergency management and the integrated emergency management system. (S23936)

EPT 150 - Incident Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the National Incident Management System (NIMS). Topics include integrating command and control systems, maintaining communication within command and control systems, and using NIMS procedures. Upon completion, students should be able to demonstrate knowledge of key concepts necessary for operating within the National Incident Management System. (S22186)

EPT 210 - Response & Recovery

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic concepts, operational procedures, and authorities involved in response and recovery efforts to major disasters. Topics include federal, state, and local roles and responsibilities in major disaster, response, and recovery work, with an emphasis on governmental coordination. Upon completion, students should be able to implement a disaster response plan and assess the needs of those involved in a major disaster. (S22187)

EPT 220 - Terrorism and Emer. Mgt.

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers preparing for, responding to, and safely mitigating terrorism incidents. Topics include the history of terrorism, scene hazards, evidence preservation, risk assessment, roles and responsibilities, explosive recognition, and terrorism planning. Upon completion, students should be able to recognize the threat of terrorism and operate within the emergency management framework at a terrorism incident. (S22024)

EPT 230 - Emergency Planning

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the rationale for and methods related to a comprehensive approach to emergency planning. Topics include the emergency planning process, command arrangement, coordination, budgetary issues, environmental contamination issues, and public policy concerns. Upon completion, students should be able to develop an emergency plan for a community. (S22191)

EPT 260 - Business Continuity

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers emergency preparedness techniques necessary to maintain business continuity. Topics include critical processes, planning, risk assessment, impact analysis, mitigation strategies, response, recovery and resumption activities. Upon completion, students should be able to demonstrate a working knowledge of the partnership between business and emergency response. (S22192)

EPT 275 - Emergency Ops Center Mgt

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides students with the knowledge and skills to effectively manage and operate an emergency operations center (EOC) during crisis situations. Topics include properly locating and designing an EOC, staffing, training and briefing EOC personnel, and how to operate an EOC. Upon completion, students should be able to demonstrate how to set up and operate an effective emergency operations center. (S22025)

FIP 120 - Intro to Fire Protection

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the development, methods, systems and regulations that apply to the fire protection field. Topics include history, evolution, statistics, suppression, organizations, careers, curriculum, and related subjects. Upon completion, students should be able to demonstrate a broad understanding of the fire protection field. (S23882)

FIP 124 - Fire Prevention & Public Ed

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces fire prevention concepts as they relate to community and industrial operations referenced in NFPA standard 101. Topics include the development and maintenance of fire prevention programs, educational programs, and inspection programs. Upon completion, students should be able to research, develop, and present a fire safety program to a citizens or industrial group. (S23883)

FIP 128 - Detection & Investigation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers procedures for determining the origin and cause of accidental and incendiary fires referenced in NFPA standard 921. Topics include collection and preservation of evidence, detection and determination of accelerants, courtroom procedure and testimony, and documentation of the fire scene. Upon completion, students should be able to conduct a competent fire investigation and present those findings to appropriate officials or equivalent. (S23884)

FIP 132 - Building Construction

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the principles and practices reference in NFPA standard 220 related to various types of building construction, including residential and commercial, as impacted by fire conditions. Topics

include types of construction and related elements, fire resistive aspects of construction materials, building codes, collapse, and other related topics. Upon completion, students should be able to understand and recognize various types of construction and their positive or negative aspects as related to fire conditions. (S23885)

FIP 136 - Inspections & Codes

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the fundamentals of fire and building codes and procedures to conduct an inspection referenced in NFPA standard 1730. Topics include review of fire and building codes, writing inspection reports, identifying hazards, plan reviews, site sketches, and other related topics. Upon completion, students should be able to conduct a fire code compliance inspection and produce a written report. (S23886)

FIP 152 - Fire Protection Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers fire protection law as referenced in NFPA standard 1. Topics include legal terms, contracts, liability, review of case histories, and other related topics. Upon completion, students should be able to discuss laws, codes, and ordinances as they relate to fire protection. (S23888)

FIP 156 - Computers in Fire Svc

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers the use of computers by fire protection organizations. Topics include operating systems, networking concepts, fire incident reporting systems, and other software applications in fire protection. Upon completion, students should be able to demonstrate knowledge of computers and their applications to fire protection. (S23890)

FIP 162 - Firefighter Safety & Wellness

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

The purpose of this course is to reduce firefighter injuries and fatalities by discussing topics that impact firefighter safety. Emphasis is placed on national standards, the 16 Life Safety Initiatives, and current events to identify changes needed to create a culture of safety. Upon completion, students should be able to define and describe the need for cultural and behavioral changes within the emergency services. (S24210)

FIP 164 - OSHA Standards

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers public and private sector OSHA work site requirements referenced in NFPA standard 1250. Emphasis is placed on accident prevention and reporting, personal safety, machine operations, and hazardous material handling. Upon completion, students should be able to analyze and interpret specific OSHA regulations and write workplace policies designed to achieve compliance. (S23893)

FIP 220 - Fire Fighting Strategies

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides preparation for command of initial incident operations involving emergencies within both the public and private sector referenced in NFPA standards 1561, 1710, and 1720. Topics include incident management, fire-ground tactics and strategies, incident safety, and command/control of emergency operations. Upon completion, students should be able to describe the initial incident system as it relates to operations involving various emergencies in fire and non-fire situations. (S23898)

FIP 221 - Adv Fire Fighting Strat

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FIP-220

This course covers command-level operations for multi-company/agency operations involving fire and non-fire emergencies. Topics include advanced use of the Incident Command System(ICS), advanced incident analysis, command-level fire operations, and control of both man made and natural major disasters. Upon completion, students should be able to describe proper and accepted systems for the mitigation of emergencies at the level of overall scene command. (S23899)

FIP 228 - Local Govt Finance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces local governmental financial principles and practices. Topics include budget preparation and justification, revenue policies, statutory requirements, audits, and the economic climate. Upon completion, students should be able to comprehend the importance of finance as it applies to the operations of a department. (S23902)

FIP 240 - Fire Service Supervision

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers supervisory skills and practices in the fire protection field. Topics include the supervisor's job, supervision skills, the changing work environment, managing change, organizing for results, discipline and grievances, and safety. Upon completion, students should be able to demonstrate

an understanding of the roles and responsibilities of effective fire service supervision, meeting elements of NFPA 1021. (S23908)

FIP 256 - Munic Public Relations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a general survey of municipal public relations and their effect on the governmental process referenced in NFPA standard 1035. Topics include principles of public relations, press releases, press conferences, public information officers, image surveys, and the effects of perceived service on fire protection delivery. Upon completion, students should be able to manage public relations functions of organizations which meet elements of NFPA 1021 for Fire Officer I and II. (S23912)

FIP 276 - Managing Fire Services

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of fire department operative services referenced in NFPA standard 1021. Topics include finance, staffing, equipment, code enforcement, management information, specialized services, legal issues, planning, and other related topics. Upon completion, students should be able to understand concepts and apply fire department management and operations principles. (S23917)

FRE 111 - Elementary French I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the fundamental elements of the French language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written French and demonstrate cultural awareness. (S11554)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 112 - Elementary French II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FRE-111

This course is a continuation of FRE 111 focusing on the fundamental elements of the French language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written French and demonstrate further cultural awareness.

(S11626)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 141 - Culture and Civilization

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course, taught in English, provides an opportunity to explore issues related to the Francophone world. Topics include historical and current events, geography, and customs. Upon completion, students should be able to identify and discuss selected topics and cultural differences related to the Francophone world. (S10038)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 151 - Francophone Literature

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course includes selected readings by Francophone writers. Topics include fictional and non-fictional works by representative authors from a variety of genres and literary periods. Upon completion, students should be able to analyze and discuss selected texts within relevant cultural and historical contexts. (S12355)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 161 - Cultural Immersion

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FRE-111

This course explores Francophone culture through intensive study on campus and field experience in a host country or area. Topics include an overview of linguistic, historical, geographical, sociopolitical, economic, and/or artistic concerns of the area visited. Upon completion, students should be able to exhibit first-hand knowledge of issues pertinent to the host area and demonstrate an understanding of cultural differences. (S10918)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 181 - French Lab 1

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take FRE-111

Corequisites: FRE-111

This course provides an opportunity to enhance acquisition of the fundamental elements of the French language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written French and demonstrate cultural awareness. (S10406)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 182 - French Lab 2

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take FRE-181 Take FRE-112

Corequisites: FRE-112

This course provides an opportunity to enhance acquisition of the fundamental elements of the French language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written French and demonstrate cultural awareness. (S10371)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 211 - Intermediate French I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FRE-112

This course provides a review and expansion of the essential skills of the French language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future. (S12685)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 212 - Intermediate French II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FRE-211

This course is a continuation of FRE 211. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. (S12610)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 221 - French Conversation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FRE-212

This course provides an opportunity for intensive communication in spoken French. Emphasis is placed on vocabulary acquisition and interactive communication through the discussion of media materials and authentic texts. Upon completion, students should be able to discuss selected topics, express ideas and opinions clearly, and engage in formal and informal conversations. (S10196)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FRE 231 - Reading and Composition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FRE-212

This course provides an opportunity for intensive reading and composition in French. Emphasis is placed on the use of literary and cultural materials to enhance and expand reading and writing skills. Upon completion, students should be able to demonstrate in writing an in-depth understanding of assigned readings. (S12238)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

FST 102 - Foodservice Skills I

Class: 4 Lab: 8 Clinical: 0 Work: 0 **Credits: 8**

Prerequisites: Take CUL-110

Corequisites: CUL-110

This course introduces the concepts, skills, and techniques for volume food production in an institutional or commercial setting. Emphasis is placed on knife skills, tool and equipment handling, and applying principles of basic hot and cold food preparation. Upon completion, students should be able to demonstrate entry-level skills for foodservice operations. (S22866)

FVP 111 - Intro. to Film and Video

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course is an overview of the film making process from conceptualization to execution and examines film genres in the context of history, theory, creativity, and commerce. Topics include the history of film and video in the US, technical terminology, relationships between various job categories, and the language of film. Upon completion, students should be able to demonstrate a film vocabulary and knowledge of working conditions in the film/video production field. (S13357)

FVP 112 - Art Dept Operations I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course introduces practical fabrication skills for wood and other materials required to build both props and sets from blueprints, photographs, or sketches. Emphasis is placed on the safe use of hand and power tools, and the skills required for collaborative efforts in set and prop construction. Upon completion students should be able to demonstrate a working knowledge of the equipment and skills necessary to assist in constructing sets and props. (S13281)

FVP 113 - Grip & Electrical I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course covers various grip/support packages used in different environments for studio and location. Topics include lighting units, hardware, stands, color media, and electrical theory with emphasis on safety. Upon completion, students should be able to execute basic grip and electrical directions given by the key grip, and/or gaffer. (S13333)

FVP 114 - Camera & Lighting I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the basic principles of video camera and recorder operations in professional formats, crew protocol and safety, and basic lighting theory and application. Emphasis is placed on terminology, the characteristics of light, basic lighting procedures, and proper procedures of field recording with

video equipment. Upon completion, students should be able to demonstrate an understanding of the basic technical terms of camera operation, video recording and lighting equipment. (S13243)

FVP 115 - Camera & Lighting II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FVP-114

This course offers advanced principles of video camera and recorder operations and introduces students to film formats and equipment as well as advanced lighting theory applications. Emphasis is placed on terminology, lighting for effect, and color correction. Upon completion, students should be able to demonstrate an understanding of camera terms and equipment, lighting theory and applications, and assist on studio and location shoots. (S13336)

FVP 116 - Sound Operations

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of sound theory, methods, and technologies for location and studio recording, and hands-on work in location sound gathering. Emphasis is placed on terminology, protocol, cabling, trouble-shooting, mixing skills and safety aspects associated with hands-on work in sound gathering. Upon completion, students should be able to demonstrate an understanding of sound theory and terminology and assist professionals in sound gathering in both film and audio production. (S16377)

FVP 117 - Make-Up & Wardrobe

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers talent presentation for camera including period and genre make-up styles, materials and methods of fabrication. Emphasis is placed on understanding the wardrobe department, make-up application, prosthetics and special effects make-up with emphasis on safety, hygiene, durability and continuity. Upon completion, students should understand the functions of the wardrobe department and demonstrate competence in the use of various make-up applications. (S16378)

FVP 120 - Art Dept. Operations II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FVP-112

This course provides a more in depth coverage of the skills necessary to assist in the set construction, paint, set dressing, props and greens departments. Emphasis is placed on the skill range required for each craft including, but not limited to, plumbing, casting, wallpapering, furniture construction, upholstery, wiring and drapery. Upon completion students should be competent to assist in all fields related to the fabrication and decoration of sets and props. (S10528)

FVP 130 - Grip and Electrical II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FVP-113

This course provides a more in depth coverage of grip/support packages used in studio work and on location. Topics include advanced coverage of lighting, color media, and camera dollies, rigging, and electrical distribution with emphasis on safety issues. Upon completion students should be able to execute grip and electrical directions given by the key grip, gaffer, cinematographer and/or director of photography. (S11543)

FVP 212 - Production Techniques I

Class: 1 Lab: 12 Clinical: 0 Work: 0 **Credits: 5**

This course provides experience working in a variety of crew positions with both student and professional productions and covers advanced film production concepts. Emphasis is placed on successful interaction with other advanced students and/or professionals as well as competency in advanced film production concepts. Upon completion, students should be able to demonstrate professional skills needed to pursue careers in the film and video industry. (S20850)

FVP 213 - Production Techniques II

Class: 1 Lab: 12 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take FVP-212

This course provides experience working in a variety of crew positions with both student and professional productions and covers advanced film production concepts. Emphasis is placed on successful interaction with other advanced students and/or professionals as well as competency in advanced film production concepts. Upon completion, students should be able to demonstrate professional skills needed to pursue careers in key positions in the film and video industry. (S16382)

FVP 215 - Production Management

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: FVP-238 or FVP-240 Take FVP-111

Corequisites: FVP-238 or FVP-240

This course emphasizes the activity of script breakdown in pre-production as well as the activities of the production office in both the production and post-production stages. Emphasis is placed on procedures, use of industry standard forms and software, as well as the functions and practices of the production office. Upon completion students should be able to demonstrate the people and technical skills necessary to assist above-the-line professionals in all types of film and video production. (S24281)

FVP 220 - Editing I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers film and video editing from traditional methods to digital non-linear systems and basic film lab and transfer facility procedures. Topics include terminology, technologies, aesthetics, basic picture-only editing skills; and the editor's role augmented by hands-on experience. Upon completion, students should be able to use editing equipment and basic digitizing, logging, and picture only editing skills. (S20851)

FVP 223 - Postproduct. Sound Design

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: FVP-116 or FVP-220

This course covers audio postproduction recording, mixing, and editing techniques, technologies, and aesthetics for the development of a compelling soundtrack for film and video media. Topics include using library effects, recording sound, effects and Foley to reinforce images and the story, preparing and mixing sound tracks for media productions. Upon completion students should be able to record, edit and mix sound design projects that strengthen narrative elements and perform critique of media sound design. (S22164)

FVP 227 - Multimedia Production

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FVP-212

This course covers technical terms used in the multimedia industry and introduces skills related to digital manipulation of audio and video materials. Emphasis is placed on technical terms used in multimedia work and integration of sound, video, graphics, and text into a single production. Upon completion, students should be able to define technical terms in multimedia work and work with a variety of computer hardware and software. (S11272)

FVP 238 - Software Apps for FVP

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the use of industry standard computer software unique to the motion picture industry using personal computers. Emphasis is placed on hands-on work with budgeting and scheduling software and in facilitating the relationship between the technical crew and the script. Upon completion, students should be able to assist with script breakdown for budgeting and scheduling and work with that information in computer-based formats. (S12706)

FVP 240 - Introduction to Screenwriting

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course introduces the principles and practices of the screenwriting craft. Emphasis is placed on analysis of screenwriting and script components and the preparation and development of motion picture and television treatments and scripts. Upon completion, students should be able to critically analyze the components of both motion picture and television treatments and scripts, and prepare effective, camera-ready motion picture and television scripts. (S23626)

FVP 250 - Production Specialties I

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take FVP-111 FVP-114

This course provides education and training through contextual learning in the film production areas of art department, camera, sound, grip, electric, locations, script, and continuity. Emphasis is placed on successful professional level interaction with other students and industry and professionals through pre-production and initial production of an actual film/video project. Upon completion, students should demonstrate an understanding of the film/video pre-production and initial production process, and the relationship among the departments in these areas. (S11311)

FVP 251 - Product. Specialities II

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides education and training through contextual learning in the film production area of concluding photography and post-production areas of sound and picture editing. Emphasis is placed on successful professional level interaction with other students and industry professionals through concluding production and post-production of an actual film/video project. Upon completion, student should demonstrate an understanding of film/video production from concluding photography to the post-production areas of sound and picture editing. (S11406)

GEL 111 - Geology

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course introduces basic landforms and geological processes. Topics include rocks, minerals, volcanoes, fluvial processes, geological history, plate tectonics, glaciers, and coastal dynamics. Upon completion, students should be able to describe basic geological processes that shape the earth. UGETC (S24027)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GEL 113 - Historical Geology

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: GEL-111 or GEL-120 Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002,(with minimum grade of P2), RED-090, ENG-095, ENG-011 or,ENG-111

This course covers the geological history of the earth and its life forms. Emphasis is placed on the study of rock strata, fossil groups, and geological time. Upon completion, students should be able to identify major fossil groups and associated rock strata and approximate ages of geological formations. (S20058)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GEL 120 - Physical Geology

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course provides a study of the structure and composition of the earth's crust. Emphasis is placed on weathering, erosional and depositional processes, mountain building forces, rocks and minerals, and structural changes. Upon completion, students should be able to explain the structure, composition, and formation of the earth's crust. (S10883)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GEL 220 - Marine Geology

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: GEL-111 or GEL-120

This course presents a detailed examination of coastal and sea floor geology. Emphasis is placed on coastal and sea floor landforms and processes that shape these features. Upon completion, students should be able to describe the origin and evolution of both coastal and sea floor landforms. (S21172)

GEL 230 - Environmental Geology

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: GEL-111, GEL-120, or PHS-130 Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002,(with minimum grade of P2), RED-090, ENG-095, ENG-011 or,ENG-111

This course provides insights into geologic forces that cause environmental changes influencing man's activities. Emphasis is placed on natural hazards and disasters caused by geologic forces. Upon completion, students should be able to relate major hazards and disasters to the geologic forces responsible for their occurrence. (S20238)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 111 - Elementary German I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the fundamental elements of the German language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written German and demonstrate cultural awareness. (\$12750)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 112 - Elementary German II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take GER-111

This course is a continuation of GER 111 focusing on the fundamental elements of the German language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written German and demonstrate further cultural awareness. (\$12801)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 141 - Culture and Civilization

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course, taught in English, provides an opportunity to explore issues related to the German-speaking world. Topics include historical and current events, geography, and customs. Upon completion, students should be able to identify and discuss selected topics and cultural differences related to the German-speaking world. (\$10643)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 161 - Cultural Immersion

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take GER-111

This course explores German culture through intensive study on campus and field experience in a host country or area. Topics include an overview of linguistic, historical, geographical, sociopolitical, economic and/or artistic concerns of the area visited. Upon completion, students should be able to exhibit first-hand knowledge of issues pertinent to the host area and demonstrate an understanding of cultural differences. (S20485)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 181 - German Lab 1

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take GER-111

Corequisites: GER-111

This course provides an opportunity to enhance acquisition of the fundamental elements of the German language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written German and demonstrate cultural awareness. (S10984)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 182 - German Lab 2

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take GER-181 Take GER-112

Corequisites: GER-112

This course provides an opportunity to enhance acquisition of the fundamental elements of the German language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written German and demonstrate cultural awareness. (S10956)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 211 - Intermediate German I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take GER-112

This course provides a review and expansion of the essential skills of the German language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future. (S12035)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 212 - Intermediate German II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take GER-211

This course provides a continuation of GER 211. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. (S11969)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 221 - German Conversation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take GER-212

This course provides an opportunity for intensive communication in spoken German. Emphasis is placed on vocabulary acquisition and interactive communication through the discussion of media materials and authentic texts. Upon completion, students should be able to discuss selected topics, express ideas and opinions clearly, and engage in formal and informal conversations. (S10753)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GER 231 - Reading and Composition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take GER-212

This course provides an opportunity for intensive reading and composition in German. Emphasis is

placed on the use of literary and cultural materials to enhance and expand reading and writing skills. Upon completion, students should be able to demonstrate in writing an in-depth understanding of assigned readings. (S13325)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GIS 111 - Introduction to GIS

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the hardware and software components of a Geographic Information System and reviews GIS applications. Topics include data structures and basic functions, methods of data capture and sources of data, and the nature and characteristics of spatial data and objects. Upon completion, students should be able to identify GIS hardware components, typical operations, products/applications, and differences between database models and between raster and vector systems. (S12471)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

GRD 110 - Typography I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the history and mechanics of type and its application to layout and design. Topics include typographic fundamentals, anatomy, measurements, composition, identification, and terminology. Upon completion, students should be able to demonstrate proficiency in design application, analysis, specification, and creation of typographic elements. (S10565)

GRD 110 - Typography I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the history and mechanics of type and its application to layout and design. Topics include typographic fundamentals, anatomy, measurements, composition, identification, and terminology. Upon completion, students should be able to demonstrate proficiency in design application, analysis, specification, and creation of typographic elements. (S25910)

GRD 131 - Illustration I

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: ART-131, DES-125, or GRD-121

This course introduces the application of rendering techniques to create illustrations. Emphasis is placed on controlling various media, methods, surfaces, design problems, and the appropriate media selection process. Upon completion, students should be able to produce quality illustrations from conception through finished artwork. (S11105)

GRD 142 - Graphic Design II

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: ART-121, DES-135, or GRD-141

This course covers the application of visual elements and design principles in advertising and graphic design. Topics include creation of various designs, such as logos, advertisements, posters, outdoor advertising, and publication design. Upon completion, students should be able to effectively apply design principles and visual elements to projects. (S12559)

GRD 151 - Computer Design Basics

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course covers designing and drawing with various types of software applications for advertising and graphic design. Emphasis is placed on creative and imaginative use of space, shapes, value, texture, color, and typography to provide effective solutions to advertising and graphic design problems. Upon completion, students should be able to use the computer as a creative tool. (S10206)

GRD 152 - Computer Design Tech I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take GRD-151

This course covers complex design problems utilizing various design and drawing software applications. Topics include the expressive use of typography, image, and organization to communicate a message. Upon completion, students should be able to use appropriate computer software to professionally present their work. (S10154)

GRD 241 - Graphic Design III

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: DES-136 or GRD-142

This course is an advanced exploration of various techniques and media for advertising and graphic design. Emphasis is placed on advanced concepts and solutions to complex and challenging graphic design problems. Upon completion, students should be able to demonstrate competence and professionalism in visual problem solving. (S12281)

GRD 275 - Animation I

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: GRD-151 or GRA-151

This course introduces the concepts and development of animation. Emphasis is placed on theory, storyboarding, narration, sequence implementation, appropriate software usage, and audio visual manipulation. Upon completion, students should be able to successfully complete computer-generated animated sequences. (S10446)

GRD 280 - Portfolio Design

Class: 2 Lab: 4 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One Set: Set 1: GRD-142 and GRD-152 Set 2: GRD-142 and GRA-152

This course covers the organization and presentation of a design/advertising or graphic art portfolio and appropriate related materials. Emphasis is placed on development and evaluation of the portfolio, design and production of a resume and self-promotional materials, and interview techniques. Upon completion, students should be able to prepare and professionally present an effective portfolio and related self-promotional materials. (S11408)

GRO 120 - Gerontology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the psychological, social, and physical aspects of aging. Emphasis is placed on the factors that promote mental and physical well-being. Upon completion, students should be able to recognize the aging process and its psychological, social, and physical aspects. (S22966)

HBI 110 - Issues and Trends in HBI

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a survey of current and emerging technology applications and data standards in the healthcare industry. Topics include the history, implementation, use, management, and impact of information technology in healthcare settings. Upon completion, students should have an understanding of the current trends and issues in healthcare informatics. (S22762)

HBI 113 - Survey of Med Insurance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a survey of the healthcare insurance system. Emphasis is placed on the foundation necessary for understanding the healthcare delivery system, terminology and practices of healthcare

insurance, and provider reimbursement. Upon completion, students should have an understanding of healthcare insurance and how outcomes are addressed through healthcare informatics. (S22763)

HBI 250 - Data Mgmt and Utilization

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: DBA-110, DBA-120, or DBA-210

This course covers the management and usage of data in healthcare settings according to current practices in healthcare informatics. Topics include data warehousing, data integrity, data security, data mining, and report generating in healthcare settings. Upon completion, students should be able to demonstrate an understanding of using healthcare data to support reporting and decision making in healthcare settings. (S22764)

HBI 289 - HBI Project

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HBI-250

This course provides an opportunity to complete a significant healthcare business informatics project with minimal instructor assistance. Emphasis is placed on written and oral communication skills, project definition, documentation, installation, testing, presentation, and user training. Upon completion, students should be able to complete a healthcare informatics project from the definition phase through implementation. (S22765)

HEA 110 - Personal Health/Wellness

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an introduction to basic personal health and wellness. Emphasis is placed on current health issues such as nutrition, mental health, and fitness. Upon completion, students should be able to demonstrate an understanding of the factors necessary to the maintenance of health and wellness. (S10185)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HEA 112 - First Aid & CPR

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the basics of emergency first aid treatment. Topics include rescue breathing, CPR, first aid for choking and bleeding, and other first aid procedures. Upon completion, students should be able to demonstrate skills in providing emergency care for the sick and injured until medical help can be

obtained. (S10211)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HEA 120 - Community Health

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides information about contemporary community health and school hygiene issues. Topics include health education and current information about health trends. Upon completion, students should be able to recognize and devise strategies to prevent today's community health problems. (S12251)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HEA 130 - Health-Adult Sexuality

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides information about health issues related to adult human sexuality. Topics include basic reproductive anatomy, contraceptive methods, STDs, and related information. Upon completion, students should be able to identify various related community agencies and available resources relating to sexual issues. (S10832)

HET 110 - Diesel Engines

Class: 3 Lab: 9 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take TRN-110 Take MRN-121

Corequisites: MRN-121

This course introduces theory, design, terminology, and operating adjustments for diesel engines. Emphasis is placed on safety, theory of operation, inspection, measuring, and rebuilding diesel engines according to factory specifications. Upon completion, students should be able to measure, diagnose problems, and repair diesel engines. (S12126)

HET 114 - Power Trains

Class: 3 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

This course introduces power transmission devices. Topics include function and operation of gears,

chains, clutches, planetary gears, drive lines, differentials, and transmissions. Upon completion, students should be able to identify, research specifications, repair, and adjust power train components. (S12114)

HET 115 - Electronic Engines

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TRN-120

This course introduces the principles of electronically controlled diesel engines. Emphasis is placed on testing and adjusting diesel engines in accordance with manufacturers' specifications. Upon completion, students should be able to diagnose, test, and calibrate electronically controlled diesel engines. (S12235)

HET 125 - Preventive Maintenance

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces preventive maintenance practices used on medium and heavy duty vehicles and rolling assemblies. Topics include preventive maintenance schedules, services, DOT rules and regulations, and road ability. Upon completion, students should be able to set up and follow a preventive maintenance schedule as directed by manufacturers. (S10840)

HET 128 - Medium/Heavy Duty Tune Up

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces tune-up and troubleshooting according to manufacturers' specifications. Topics include troubleshooting engine systems, tune-up procedures, and use and care of special test tools and equipment. Upon completion, students should be able to troubleshoot, diagnose, and repair engines and components using appropriate diagnostic equipment. (S10823)

HET 134 - Diesel Fuel & Power Sys

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the principles of fuel injection and other power systems used in the heavy equipment industry including newer and cleaner technology. Emphasis is placed on test equipment, component functions, safety, and theories of older conventional and newer and cleaner Tier III and Tier IV fuel systems. Upon completion, students should be able to diagnose and service fuel systems and explain proper safety procedures on alternative fuel systems used in heavy equipment industry. (S23319)

HET 229 - Brakes and Steering

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the theory and principles of braking and steering in medium and heavy duty vehicles. Topics include wheel and tire problems, frame members, bearings, fifth wheel, coupling systems, and braking systems. Upon completion, students should be able to diagnose, adjust, and repair steering and braking problems on medium and heavy duty vehicles. (S10429)

HET 230 - Air Brakes

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the operation and design of air braking systems used on trucks. Topics include safety, governors, compressors, and supporting systems. Upon completion, students should be able to diagnose, disassemble, inspect, repair, and reassemble air brake systems. (S11522)

HFS 110 - Exercise Science

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

This course is a survey of scientific principles, methodologies, and research as applied to exercise and physical adaptations to exercise. Topics include the basic elements of kinesiology, biomechanics, and motor learning. Upon completion, students should be able to identify and describe physiological responses and adaptations to exercise. (S24773)

HFS 111 - Fitness & Exer Testing I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the student to graded exercise testing. Topics include various exercise testing protocols with methods for prescribing exercise programs based on exercise tolerance tests and the use of various equipment and protocols. Upon completion, students should be able to conduct specific exercise tests and the use of various equipment. (S24774)

HFS 116 - Pvnt & Care Exer Injuries

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: BIO-111 or BIO-168

This course provides information about the care and prevention of exercise injuries. Topics include proper procedures, prevention techniques, and on-site care of injuries. Upon completion, students should be able to demonstrate the knowledge and skills necessary to prevent and care for exercise related injuries. (S24776)

HFS 118 - Fitness Facility Mgmt

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

Corequisites: BIO-168 or BIO-169

This course provides information about the management and operation of health and fitness facilities and programs. Topics include human resources, sales and marketing, member retention, financial management, facility design and maintenance, and risk management. Upon completion, students should be able to demonstrate the knowledge and skills necessary to effectively manage a fitness facility. (S24777)

HFS 120 - Group Exer Instruction

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HFS-110

This course introduces the concepts and guidelines of instructing exercise classes. Topics include program designs, working with special populations, and principles of teaching and monitoring physical activity. Upon completion, students should be able to demonstrate basic skills in instructing an exercise class and monitoring workout intensity. (S24778)

HFS 210 - Personal Training

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: HFS-110 and HFS-111 Take PED-117 Take PED-118

Corequisites: BIO-168 or BIO-169 PED-118

This course introduces the student to the aspects of personal (one-on-one) training. Topics include training systems, marketing, and program development. Upon completion, students should be able to demonstrate personal training techniques and competencies of same. (S24779)

HFS 212 - Exercise Programming

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HFS-110 Take HFS-210

This course provides information about organizing, scheduling, and implementation of physical fitness programs. Topics include programming for various age groups, competitive activities and special events, and evaluating programs. Upon completion, students should be able to organize and implement exercise activities in a competent manner. (S24781)

HFS 218 - Lifestyle Chng & Wellness

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take HFS-210

This course introduces health risk appraisals and their application to lifestyle changes. Topics include nutrition, weight control, stress management, and the principles of exercise. Upon completion, students should be able to conduct health risk appraisals and apply behavior modification techniques in a fitness setting. (S24783)

HIS 111 - World Civilizations I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces world history from the dawn of civilization to the early modern era. Topics include Eurasian, African, American, and Greco-Roman civilizations and Christian, Islamic and Byzantine cultures. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in pre-modern world civilizations. UGETC (S10799)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 112 - World Civilizations II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces world history from the early modern era to the present. Topics include the cultures of Africa, Europe, India, China, Japan, and the Americas. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in modern world civilizations. UGETC (S10844)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 115 - Intro to Global History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the study of global history. Emphasis is placed on topics such as colonialism, industrialism, and nationalism. Upon completion, students should be able to analyze significant global historical issues. (S10822)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 116 - Current World Problems

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers current world events from an historical perspective. Topics include regional problems as well as international concerns. Upon completion, students should be able to analyze significant current world problems from an historical perspective. (S10826)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 121 - Western Civilization I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces western civilization from pre-history to the early modern era. Topics include ancient Greece, Rome, and Christian institutions of the Middle Ages and the emergence of national monarchies in western Europe. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in early western civilization. (S13000)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 122 - Western Civilization II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces western civilization from the early modern era to the present. Topics include the religious wars, the Industrial Revolution, World Wars I and II, and the Cold War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in modern western civilization. (S13096)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 131 - American History I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a survey of American history from pre-history through the Civil War era. Topics include the migrations to the Americas, the colonial and revolutionary periods, the development of the Republic, and the Civil War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in early American history. UGETC (S10372)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 132 - American History II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a survey of American history from the Civil War era to the present. Topics include industrialization, immigration, the Great Depression, the major American wars, the Cold War, and social conflict. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in American history since the Civil War. UGETC (S10386)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 141 - Genealogy & Local History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course explores the role of the local or family historian. Emphasis is placed on historical or genealogical research techniques including a survey of local, state, and national archival resources. Upon completion, students should be able to conduct genealogical research and do a major research project on local or family history. (S11285)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 145 - The Second World War

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the period of the Second World War from 1919 to 1945. Topics include the Treaty of Versailles, the rise of totalitarian regimes, the origins of the war, the major military campaigns in Europe and the Pacific, and the aftermath. Upon completion, students should be able to analyze significant political, military, socioeconomic, and cultural developments that influenced the Second World War. (S21384)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 151 - Hispanic Civilization

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-095 RED-090 or ENG-111;

This course surveys the cultural history of Spain and its impact on the New World. Topics include Spanish and Latin American culture, literature, religion, and the arts. Upon completion, students should

be able to analyze the cultural history of Spain and Latin America. (S11246)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 162 - Women and History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course surveys the experience of women in historical perspective. Topics include the experiences and contributions of women in culture, politics, economics, science, and religion. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural contributions of women in history. (S12886)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 163 - The World Since 1945

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course surveys world developments since the end of World War II. Topics include the Cold War, nationalism, colonialism, the Third World, the arms race, and global capitalism and regionalism. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the world since 1945. (S12914)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 165 - Twentieth-Century World

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course includes the major developments, issues, and ideas in twentieth-century world history. Emphasis is placed on contrasting political systems, the impact of science and technology, and the philosophical temperament of twentieth-century people. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the twentieth century. (S12963)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 167 - The Vietnam War

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-095 RED-090 or ENG-111;

This course covers the American political and military involvement in Vietnam from 1944 to 1975. Topics include the French colonial policy, Vietnamese nationalism, the war with France, American involvement, and resolution of the conflict. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments that influenced the Vietnam War. (S12926)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 211 - Ancient History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course traces the development of the cultural, intellectual, and political foundations of western civilization. Topics include the civilizations of the Near East, the classical Greek and Hellenistic eras, the Roman world, Judaism, and Christianity. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the ancient world. (S10466)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 212 - Medieval History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course traces the cultural, political, economic, social, religious, and intellectual history of Europe during the Middle Ages. Topics include the decline of the Roman Empire, the Frankish Kingdoms, the medieval church, feudalism, the rise of national monarchies, urbanization, and the rise of universities. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in medieval Europe. (S10435)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 216 - Twentieth-Century Europe

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an in-depth survey of twentieth-century Europe. Topics include World Wars I and II, and political, social, and cultural movements of the twentieth century. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in twentieth-century Europe. (S10431)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 221 - African-American History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers African-American history from the Colonial period to the present. Topics include African origins, the slave trade, the Civil War, Reconstruction, the Jim Crow era, the civil rights movement, and contributions of African Americans. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the history of African Americans. (S11507)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 222 - African-American Hist I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers African American history through the Civil War period. Topics include African origins, the nature of slavery, African-American participation in the American Revolution, abolitionism, and the emergence of a distinct African-American culture. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in early African-American history. (S11465)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 223 - African-American Hist II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers African American history from the Civil War to the present. Topics include Reconstruction, the Jim Crow era, urbanization, the Harlem Renaissance, the Civil Rights movement, and the philosophies of major African-American leaders. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in African-American history since the Civil War. (S11488)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 226 - The Civil War

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-095 RED-090 or ENG-111;

This course examines the social, political, economic, and ideological forces that led to the Civil War and Reconstruction. Topics include regional conflicts and sectionalism, dissolution of the Union, military campaigns, and the War's socioeconomic impact, aftermath, and consequences. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the United States during the era of the Civil War. (S11444)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 227 - Native American History

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course surveys the history and cultures of Native Americans from pre-history to the present. Topics include Native American civilizations, relations with Europeans, and the continuing evolution of Native American cultures. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments among Native Americans. (S11493)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 228 - History of the South

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the origin and development of the South as a distinct region of the United States. Emphasis is placed on Southern identity and its basis in cultural, social, economic, and political developments during the 19th and 20th centuries. Upon completion, students should be able to identify and analyze the major cultural, social, economic, and political developments in the South. (S11422)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HIS 229 - History of the Old South

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a study of the development of the South from European settlement through the Civil War. Topics include the multi-ethnic character of colonization, the plantation economy, relations between social classes, the nature of slavery, and issues leading to the Civil War. Upon completion, students should be able to analyze significant political, socioeconomic, and cultural developments in the

antebellum South. (S11514)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HMT 110 - Intro to Healthcare Mgt

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the functions, practices, organizational structures, and professional issues in healthcare management. Emphasis is placed on planning, controlling, directing, and communicating within health and human services organizations. Upon completion, students should be able to apply the concepts of management within a healthcare service environment. (S20232)

HOR 112 - Landscape Design I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers landscape principles and practices for residential and commercial sites. Emphasis is placed on drafting, site analysis, and common elements of good design, plant material selection, and proper plant utilization (encouraged use of native plants and discouraged use of invasive species). Upon completion, students should be able to read plans and draft a landscape design according to sustainable practices. (S23383)

HOR 114 - Landscape Construction

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the design and fabrication of landscape structures/features. Emphasis is placed on safety, tool identification and use, material selection, construction techniques, and fabrication. Upon completion, students should be able to design and construct common landscape structures/features. (S13181)

HOR 118 - Equipment Op & Maint

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers the proper operation and maintenance of selected equipment used in horticulture. Emphasis is placed on the maintenance, minor repairs, safety devices, and actual operation of selected equipment. Upon completion, students should be able to design a maintenance schedule, service equipment, and demonstrate safe operation of selected equipment. (S13189)

HOR 124 - Nursery Operations

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers nursery site and crop selection, cultural practices, and production and marketing methods. Topics include site considerations, water availability, equipment, irrigation, fertilization, containers, media, and pest control. Upon completion, students should be able to design and implement a nursery operation and grow and harvest nursery crops. (S13778)

HOR 134 - Greenhouse Operations

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the principles and procedures involved in the operation and maintenance of greenhouse facilities. Emphasis is placed on the operation of greenhouse systems, including the environmental control, record keeping, scheduling, and production practices. Upon completion, students should be able to demonstrate the ability to operate greenhouse systems and facilities to produce greenhouse crops. (S11499)

HOR 160 - Plant Materials I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers identification, culture, characteristics, and use of plants in a sustainable landscape. Emphasis is placed on nomenclature, identification, growth requirements, cultural requirements, soil preferences, and landscape applications. Upon completion, students should be able to demonstrate knowledge of the proper selection and utilization of plant materials, including natives and invasive plants. (S23284)

HOR 161 - Plant Materials II

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides a supplementary opportunity to cover identification, culture, characteristics, and use of plants in a sustainable landscape, giving students a broader knowledge of available landscape plants for utilization in landscapes and plant production. Emphasis is placed on nomenclature, identification, growth requirements, cultural requirements, soil preferences, landscape applications and expansion of the plant palette. Upon completion, students should be able to demonstrate knowledge of the proper selection and utilization of plant materials, including natives and invasive plants. (S24316)

HOR 162 - Applied Plant Science

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic concepts of botany as they apply to horticulture. Topics include

nomenclature, physiology, morphology, and anatomy as they apply to plant culture. Upon completion, students should be able to apply the basic principles of botany to horticulture. (S13621)

HOR 164 - Hort Pest Management

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the identification and management of plant pests including insects, diseases, and weeds. Topics include pest identification and beneficial organisms, pesticide application safety and use of least toxic methods of management. Upon completion, students should be able to manage common landscape pests using least toxic methods of control and be prepared to sit for North Carolina Commercial Pesticide Ground Applicators license. (S23384)

HOR 166 - Soils & Fertilizers

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the physical and chemical properties of soils and soil fertility and management. Topics include soil formation; classification; physical, chemical, and biological properties (including microorganisms); testing; and fertilizer application. Upon completion, students should be able to analyze, evaluate, and properly amend soils/media according to sustainable practices. (S23385)

HOR 168 - Plant Propagation

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course is a study of sexual and asexual reproduction of plants. Emphasis is placed on seed propagation, grafting, stem and root propagation, micro-propagation, and other propagation techniques. Upon completion, students should be able to successfully propagate ornamental plants. (S13635)

HOR 213 - Landscape Design II

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HOR-112

This course covers residential and commercial landscape design, cost analysis, and installation. Emphasis is placed on job cost estimates, installation of the landscape design, and maintenance techniques. Upon completion, students should be able to read landscape design blueprints, develop cost estimates, and implement the design. (S11339)

HOR 235 - Greenhouse Production

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the production of greenhouse crops. Emphasis is placed on product selection and production based on market needs and facility availability, including record keeping. Upon completion, students should be able to select and make production schedules to successfully produce greenhouse crops. (S12953)

HOR 257 - Arboriculture Practices

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take HOR-160 or LSG-111

This course covers the culture and maintenance of trees and shrubs. Topics include fertilization, pruning, approved climbing techniques, pest control, and equipment use and safety. Upon completion, students should be able to properly prune trees and shrubs and perform arboricultural practices. (S23257)

HRM 110 - Intro to Hosp & Tourism

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the growth and progress of the hospitality industry. Topics include tourism, lodging, resorts, gaming, restaurants, foodservice and clubs. Upon completion, students should be able to demonstrate an understanding of the background, context, and career opportunities that exist within the hospitality industry. (S22898)

HRM 115 - Housekeeping

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HRM-115A

Corequisites: HRM-115A

This course covers the scope, responsibilities, communications, terminology, materials, and concerns specific to hotel housekeeping. Topics include management and supervision of housekeeping staff, proper cleaning and sanitation of rooms and public areas, budgeting, purchasing, security, and inventory control. Upon completion, students should be able to understand and apply the principles of organization and management of a housekeeping department. (S22899)

HRM 115A - Housekeeping Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take HRM-115

Corequisites: HRM-115

This course provides a laboratory experience for enhancing student skills in the responsibilities, communications, terminology, materials, and concerns specific to hotel housekeeping. Emphasis is placed on practical experiences of management/supervision of housekeeping staff in the proper cleaning/sanitation of rooms/public areas, budgeting, purchasing, security, and inventory control. Upon completion, students should be able to demonstrate mastery of housekeeping skills. This course is a laboratory to accompany HRM 115. Emphasis is placed on the development of skills for the performance of housekeeping tasks. (S22900)

HRM 120 - Front Office Procedures

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HRM-120A

Corequisites: HRM-120A

This course introduces a systematic approach to lodging front office procedures. Topics include reservations, registration, guest satisfaction, occupancy and revenue management, security, interdepartmental communications, and related guest services. Upon completion, students should be able to demonstrate a basic understanding of current front office operating systems, including efficient and courteous guest services. (S22901)

HRM 120A - Front Office Procedures Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take HRM-120

Corequisites: HRM-120

This course provides a laboratory experience for enhancing student skills in lodging front office procedures. Emphasis is placed on practical computer applications of reservations, registration, guest satisfaction, occupancy and revenue management, security, interdepartmental communications, and related guest services. Upon completion, students should be able to demonstrate a basic proficiency in computer-based, front office applications. (S22902)

HRM 124 - Guest Service Management

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to provide an introduction to the culture of dining room service management. Emphasis is placed on the dignity and psychology of service work, dining room organization/infrastructure, service delivery, and modeling management roles in a dining room environment. Upon completion, students should be able to demonstrate an understanding of the guest/server dynamic and apply these principles in a dining room setting. (S22904)

HRM 130 - Bed and Breakfast Mgt.

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the management of bed and breakfast facilities. Emphasis is placed on lifestyle commitment, property needs, computer operations, business and marketing plans, customer service and facility management. Upon completion, students should be able to describe and apply the principles of management unique to the bed and breakfast industry. (S22906)

HRM 135 - Facilities Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic elements of planning and designing hospitality facilities including environmental impacts, maintenance, and upkeep. Topics include equipment and plant preventive maintenance, engineering, interior design, space utilization, remodeling and expansion, and traffic and work flow patterns. Upon completion, students should be able to demonstrate an understanding of the planning, design, national certification, and maintenance of hospitality physical plants and equipment. (S22907)

HRM 140 - Legal Issues-Hospitality

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the rights and responsibilities that the law grants to or imposes upon the hospitality industry. Topics include federal and state regulations, historical and current practices, safety and security, risk management, loss prevention, relevant torts, and contracts. Upon completion, students should be able to demonstrate an understanding of the legal system and the concepts necessary to prevent or minimize organizational liability. (S22908)

HRM 160 - Info Systems for Hosp

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers current technology and technological issues for the future as they apply to the hospitality industry. Emphasis is placed on the effect of technology on e-commerce, human resources, menu management, and hospitality management systems. Upon completion, students will be able to demonstrate competence in utilizing contemporary information application systems in a hospitality setting. (S22821)

HRM 210 - Meetings & Event Planning

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces concepts related to the planning and operation of conventions, trade shows, professional meetings, and foodservice events. Emphasis is placed on methods of marketing, selling, organizing, and producing conventions, events, and trade shows that will increase financial and environmental value. Upon completion, students should be able to demonstrate an understanding of management principles for multi-function, multi-day conferences and events. (S22910)

HRM 215 - Restaurant Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: CUL-135 or HRM-124 Take HRM-215A

Corequisites: HRM-215A

This course provides an overview of the responsibilities and activities encountered in managing a food and beverage operation. Topics include planning, organization, accounting, marketing, trends, and human resources from an integrated managerial viewpoint. Upon completion, students should be able to demonstrate an understanding of the operation of a restaurant. (S22911)

HRM 215A - Restaurant Management Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One: CUL-135 or HRM-124 Take HRM-215

Corequisites: HRM-215

This course provides a laboratory experience for enhancing student skills in the responsibilities and activities encountered in managing a food and beverage operation. Emphasis is placed on practical applications of planning, organization, accounting, marketing, trends, and human resources from an integrated managerial viewpoint. Upon completion, students should be able to demonstrate a basic proficiency in restaurant management operations which may include overseeing and execution of production and service. This course is a laboratory to accompany HRM 215. Emphasis is placed on practical applications of restaurant management principles. (S22912)

HRM 220 - Cost Control-Food & Bev

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HRM-220A

Corequisites: HRM-220A

This course introduces controls and accounting procedures as applied to costs in the hospitality industry. Topics include reports, cost control, planning and forecasting, control systems, financial statements, operational efficiencies, labor controls and scheduling. Upon completion, students should be able to

demonstrate an understanding of food, beverage, and labor cost control systems for operational troubleshooting and problem solving. (S22913)

HRM 220A - Cost Control-Food & Bev Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take HRM-220

Corequisites: HRM-220

This course provides a laboratory experience for enhancing student skills in controls and purchasing procedures as applied to costs in the hospitality industry. Emphasis is placed on practical applications of reports, cost control, planning and forecasting, control systems, financial statements, operational efficiencies, labor controls and scheduling. Upon completion, students should be able to demonstrate proficiency in computer-based control applications. (S22914)

HRM 225 - Beverage Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the management of beverages served in hospitality operations. Topics include history and trends; service, procurement and storage; knowledge and control of wines and fermented/distilled beverages; and non-alcoholic beverages, coffees, and teas. Upon completion, students should be able to demonstrate an understanding of responsible alcohol service and the knowledge of beverages consumed in a hospitality operation. (S22915)

HRM 228 - Mixology

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course provides instruction and demonstration for the practice of bartending. Emphasis is placed on set-up, including equipment/supplies/glassware; and production/service of alcoholic beverages including, but not limited to, beer, wine, cocktails, mixed/blended drinks, and specialty products. Upon completion, students should be able to demonstrate the basics of mixing alcoholic beverages in a commercial bar, tavern or nightclub setting. (S22822)

HRM 230 - Club & Resort Management

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces specific principles of managing a hospitality operation in a resort or club setting. Topics include operational efficiencies, resort and club marketing, recreational and sport activity management, and retail management. Upon completion, students should be able to demonstrate an understanding of the specialized skills involved in resort and club management. (S22916)

HRM 240 - Marketing for Hospitality

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers planning, organizing, directing, and analyzing the results of marketing programs for the hospitality industry. Emphasis is placed on target marketing, marketing mix, analysis, product and image development, use of current media, sales planning, advertising, public relations, and collateral materials. Upon completion, students should be able to apply the marketing process as it relates to the hospitality industry. (S22918)

HRM 245 - Human Resource Mgmt-Hosp

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces a systematic approach to human resource management in the hospitality industry. Topics include training/development, staffing, selection, hiring, recruitment, evaluation, benefit administration, employee relations, labor regulations/laws, discipline, motivation, productivity, shift management, contract employees and organizational culture. Upon completion, students should be able to apply human resource management skills for the hospitality industry. (S22919)

HRM 260 - Procurement for Hosp

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides information for management decisions regarding needs analysis and fulfillment for hospitality operations. Emphasis is placed on supply chain sourcing, environmental impacts, procurement technologies, and packaging of products such as food, beverages, supplies, furniture, and equipment. Upon completion, students should be able to demonstrate competence in planning and executing the procurement function. (S22823)

HRM 275 - Leadership-Hospitality

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces leadership traits, styles, and the roles and responsibilities of successful hospitality leaders while developing the student's personal leadership skills. Topics include formal and informal hospitality leadership; defining effective and ineffective leadership behavior; and leadership organizational change and planning within the hospitality industry. Upon completion, students will be able to apply appropriate leadership actions in real-world situations ranging from local to global hospitality environments. (S22824)

HRM 280 - Mgmt Problems-Hospitality

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HRM-110

This course is designed to introduce students to timely issues within the hospitality industry and is intended to move students into a managerial mindset. Emphasis is placed on problem-solving skills using currently available resources. Upon completion, students should be able to demonstrate knowledge of how hospitality management principles may be applied to real challenges facing industry managers. (S22920)

HRM 285 - Service Projects-Hosp

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

This course introduces the application of hospitality management through engaging in community service. Emphasis is placed on problem solving skills, critical thinking, and applying academic concepts while using limited resources. Upon completion, students should be able to plan and execute hospitality-related projects that meet community needs. (S22825)

HSC 110 - Orientation to Health Careers

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course is a survey of health care professions. Topics include professional duties and responsibilities, working environments, and career choices. Upon completion, students should be able to demonstrate an understanding of the health care professions and be prepared to make informed career choices. (S12920)

HSE 110 - Intro to Human Services

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the human services field, including the history, agencies, roles, and careers. Topics include personal/professional characteristics, diverse populations, community resources, disciplines in the field, systems, ethical standards, and major theoretical and treatment approaches. Upon completion, students should be able to identify the knowledge, skills, and roles of the human services worker. (S12827)

HSE 112 - Group Process I

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces interpersonal concepts and group dynamics. Emphasis is placed on self-awareness facilitated by experiential learning in small groups with analysis of personal experiences and

the behavior of others. Upon completion, students should be able to show competence in identifying and explaining how people are influenced by their interactions in group settings. (S12789)

HSE 123 - Interviewing Techniques

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the purpose, structure, focus, and techniques employed in effective interviewing. Emphasis is placed on observing, attending, listening, responding, recording, and summarizing of personal histories with instructor supervision. Upon completion, students should be able to perform the basic interviewing skills needed to function in the helping relationship. (S13613)

HSE 125 - Counseling

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers the major approaches to psychotherapy and counseling, including theory, characteristics, and techniques. Emphasis is placed on facilitation of self-exploration, problem solving, decision making, and personal growth. Upon completion, students should be able to understand various theories of counseling and demonstrate counseling techniques. (S21902)

HSE 127 - Conflict Resolution

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces conflict resolution and mediation theory and practice. Emphasis is placed on achieving compromise and a win/win perception. Upon completion, students should be able to demonstrate competence in identifying seemingly dissimilar positions and facilitating agreement. (S13607)

HSE 135 - Orientation Lab I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course is designed to promote professional, program, and personal identification with the human services field. Emphasis is placed on interpersonal communication, verbal and non-verbal interactions, and team building. Upon completion, students should be able to identify with the human services profession and demonstrate basic team-building skills. (S11854)

HSE 170 - Recovery Services

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an indepth assessment of the array of services, resources and supports that people

in recovery from mental health and addiction issues need to be successful in their communities. Topics include how to model and teach basic life skills needed in recovery such as advocacy, finances, job skills/professionalism, housing options, educational options and creating meaningful communities, while learning how to model and teach appropriate boundaries both personally and professionally. Upon completion, students should be able to assess models of wellness and recovery that enhance client outcomes through a researched approach to recovery and strategize ways to build recovery communities. (S25237)

HSE 210 - Human Services Issues

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course covers current issues and trends in the field of human services. Emphasis is placed on contemporary topics with relevance to special issues in a multi-faceted field. Upon completion, students should be able to integrate the knowledge, skills, and experiences gained in classroom and clinical experiences with emerging trends in the field. (S11975)

HSE 220 - Case Management

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HSE-110

This course covers the variety of tasks associated with professional case management. Topics include treatment planning, needs assessment, referral procedures, and follow-up and integration of services. Upon completion, students should be able to effectively manage the care of the whole person from initial contact through termination of services. (S13993)

HSE 225 - Crisis Intervention

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic theories and principles of crisis intervention. Emphasis is placed on identifying and demonstrating appropriate and differential techniques for intervening in various crisis situations. Upon completion, students should be able to assess crisis situations and respond appropriately. (S14034)

HSE 226 - Intellectual Disabilities

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers intellectual disabilities and related issues. Emphasis is placed on the theoretical perspectives, causes, prevention, and treatment of intellectual disabilities. Upon completion, students should be able to demonstrate a general knowledge of individuals with intellectual disabilities. (S24623)

HSE 227 - Children & Adol in Crisis

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the crises affecting children and adolescents in contemporary society. Emphasis is placed on abuse and neglect, suicide and murder, dysfunctional family living, poverty, and violence. Upon completion, students should be able to identify and discuss intervention strategies and available services for the major contemporary crises affecting children and adolescents. (S14015)

HUM 110 - Technology and Society

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course considers technological change from historical, artistic, and philosophical perspectives and its effect on human needs and concerns. Emphasis is placed on the causes and consequences of technological change. Upon completion, students should be able to critically evaluate the implications of technology. (S14059)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 115 - Critical Thinking

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take one set: Set 1: DRE-098 Set 2: ENG-002 Set 3: BSP-4002 Set 4: ENG-111

This course introduces the use of critical thinking skills in the context of human conflict. Emphasis is placed on evaluating information, problem solving, approaching cross-cultural perspectives, and resolving controversies and dilemmas. Upon completion, students should be able to demonstrate orally and in writing the use of critical thinking skills in the analysis of appropriate texts. (S25444)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 120 - Cultural Studies

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the distinctive features of a particular culture. Topics include art, history, music, literature, politics, philosophy, and religion. Upon completion, students should be able to appreciate the unique character of the study culture. (S12973)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 121 - The Nature of America

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an interdisciplinary survey of the American cultural, social, and political experience. Emphasis is placed on the multicultural character of American society, distinctive qualities of various regions, and the American political system. Upon completion, students should be able to analyze significant cultural, social, and political aspects of American life. (S13080)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 122 - Southern Culture

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course explores the major qualities that make the South a distinct region. Topics include music, politics, literature, art, religion, race relations, and the role of social class in historical and contemporary contexts. Upon completion, students should be able to identify the characteristics that distinguish Southern culture. (S13030)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 123 - Appalachian Culture

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an interdisciplinary study of the unique features of Appalachian culture. Topics include historical, political, sociological, psychological, and artistic features which distinguish this region. Upon completion, students should be able to demonstrate a broad-based awareness and appreciation of Appalachian culture. (S13041)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 130 - Myth in Human Culture

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an in-depth study of myths and legends. Topics include the varied sources of myths and their influence on the individual and society within diverse cultural contexts. Upon completion, students should be able to demonstrate a general familiarity with myths and a broad-based understanding of the influence of myths and legends on modern culture. (S13721)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 140 - History of Architecture

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the political and religious influences upon architecture. Topics include specific historical buildings evidencing architectural advancement, with special emphasis upon modern architecture. Upon completion, students should be able to analyze and identify significant developments in architecture. (S11314)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 150 - American Women's Studies

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an inter-disciplinary study of the history, literature, and social roles of American women from Colonial times to the present. Emphasis is placed on women's roles as reflected in American language usage, education, law, the workplace, and mainstream culture. Upon completion, students should be able to identify and analyze the roles of women as reflected in various cultural forms. (S11249)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 160 - Introduction to Film

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the fundamental elements of film artistry and production. Topics include film styles, history, and production techniques, as well as the social values reflected in film art. Upon completion, students should be able to critically analyze the elements covered in relation to selected films. (S16395)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 161 - Advanced Film Studies

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HUM-160

This course provides an advanced study of film art and production, building on skills learned in HUM 160. Topics include advanced film production techniques, film genres, examination of master directors' styles, and the relation of film to culture. Upon completion, students should be able to recognize and critically analyze advanced elements of film production. (S10896)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 170 - The Holocaust

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a survey of the destruction of European Jewry by the Nazis during World War II. Topics include the anti-Semitic ideology, bureaucratic structures, and varying conditions of European occupation and domination under the Third Reich. Upon completion, students should be able to demonstrate an understanding of the historical, social, religious, political, and economic factors which cumulatively resulted in the Holocaust. (S13684)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 180 - Internat Cultural Explor

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides a framework for students to visit, examine, and analyze a country/region outside the United States to learn about the place and people. Emphasis is placed on the distinctive cultural characteristics of a country or region. Upon completion, students should be able to identify similarities/differences, analyze causes/effects, and clearly articulate the impact of one or more cultural elements. (S22360)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 211 - Humanities I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course introduces the humanities as a record in literature, music, art, history, religion, and philosophy of humankind's answers to the fundamental questions of existence. Emphasis is placed on

the interconnectedness of various aspects of cultures from ancient through early modern times. Upon completion, students should be able to identify significant figures and cultural contributions of the periods studied. (S10430)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 212 - Humanities II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course introduces the humanities as a record in literature, music, art, history, religion, and philosophy of humankind's answers to the fundamental questions of existence. Emphasis is placed on the interconnectedness of various aspects of cultures from early modern times to the present. Upon completion, students should be able to identify significant figures and cultural contributions of the periods studied. (S10487)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 220 - Human Values and Meaning

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111 Take ENG-112

This course presents some major dimensions of human experience as reflected in art, music, literature, philosophy, and history. Topics include the search for identity, the quest for knowledge, the need for love, the individual and society, and the meaning of life. Upon completion, students should be able to recognize interdisciplinary connections and distinguish between open and closed questions and between narrative and scientific models of understanding. (S11527)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HUM 230 - Leadership Development

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111 Take ENG-112

This course explores the theories and techniques of leadership and group process. Emphasis is placed on leadership styles, theories of group dynamics, and the moral and ethical responsibilities of leadership. Upon completion, students should be able to identify and analyze a personal philosophy and style of leadership and integrate these concepts in various practical situations. (S11154)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

HYD 110 - Hydraulics/Pneumatics I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic components and functions of hydraulic and pneumatic systems. Topics include standard symbols, pumps, control valves, control assemblies, actuators, FRL, maintenance procedures, and switching and control devices. Upon completion, students should be able to understand the operation of a fluid power system, including design, application, and troubleshooting. (S23526)

HYD 110EE - Hydraulics/Pneumatics I - Elec

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic components and functions of hydraulic and pneumatic systems. Topics include standard symbols, pumps, control valves, control assemblies, actuators, FRL, maintenance procedures, and switching and control devices. Upon completion, students should be able to understand the operation of a fluid power system, including design, application, and troubleshooting. (L23366)

HYD 110IS - Hydraulics/Pneumatics I - Ind

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic components and functions of hydraulic and pneumatic systems. Topics include standard symbols, pumps, control valves, control assemblies, actuators, FRL, maintenance procedures, and switching and control devices. Upon completion, students should be able to understand the operation of a fluid power system, including design, application, and troubleshooting. (L23364)

HYD 110ME - Hydraulics/Pneumatics I - Mech

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic components and functions of hydraulic and pneumatic systems. Topics include standard symbols, pumps, control valves, control assemblies, actuators, FRL, maintenance procedures, and switching and control devices. Upon completion, students should be able to understand the operation of a fluid power system, including design, application, and troubleshooting. (L23370)

HYD 112 - Hydraulics-Med/Heavy Duty

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces hydraulic theory and applications as applied to mobile equipment. Topics include component studies such as pumps, motors, valves, cylinders, filters, reservoirs, lines, and fittings. Upon completion, students should be able to identify, diagnose, test, and repair hydraulic systems using schematics and technical manuals. (S10750)

INS 121 - Life Insurance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to follow the guidelines set forth by the North Carolina Department of Insurance to prepare an individual for the life agent state licensing exam. Topics include basic principles of life insurance, life insurance policies, provisions, options, riders, premiums, proceeds, beneficiaries, insurance underwriting, policy issues, and North Carolina Statutes and Regulations. Upon completion, students should be able to demonstrate a thorough knowledge of North Carolina Department of Insurance requirements for life insurance and be prepared to sit for the state life agent licensing exam. (S24966)

INS 122 - Accident and Health Insurance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to follow the guidelines set forth by the North Carolina Department of Insurance to prepare an individual for the accident and health agent insurance state licensing exam. Topics include basic principles of accident and health insurance, health insurance providers, medical expense insurance, accidental death & dismemberment, and accident and health insurance policy provisions. Upon completion, students should be able to demonstrate a thorough knowledge of North Carolina Department of Insurance requirements and be prepared to sit for the state accident and health agent licensing exam. (S24967)

INS 129 - Property & Casualty Insurance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed for instructional areas related to property and casualty insurance (P&C) topics to meet the pre-licensing education requirements for insurance agents as prescribed by the North Carolina Department of Insurance - Agent Services Division. Topics include terms and concepts of property and casualty insurance, North Carolina Insurance Law, and multiple areas within P&C. identify the concepts covered in the NC Department of Insurance - Property and Casualty Insurance license exams. (S25469)

INT 110 - International Business

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the environment, concepts, and basic differences involved in

international business. Topics include forms of foreign involvement, international trade theory, governmental influences on trade and strategies, international organizations, multinational corporations, personnel management, and international marketing. Upon completion, students should be able to describe the foundation of international business. (S24145)

INT 210 - International Trade

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers international business trade practices and foreign market research. Emphasis is placed on current trends of US trade practices in foreign countries and how to engage in international trade and acquire foreign marketing information. Upon completion, students should be able to formulate an overall product policy for the international marketplace. (S24146)

IPP 111 - Intro to Interpretation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an orientation to the field of interpreting, interpretation models, cognitive processes associated with interpretation, professional ethical standards, employment opportunities, and working conditions. Topics include specialized jargon, code of ethics, theories, interpreter assessments/qualifications, and protocol associated with various settings. Upon completion, students should be able to explain the rationale for placement of interpreters and apply ethical standards to a variety of working situations. (S22719)

IPP 112 - Comparative Cultures

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-212 with a grade of C or better

This course introduces various cultural attributes and how they impact the consumers and the interpreting process. Topics include value systems of deaf and non-deaf individuals, enculturation stages, sociolinguistic continuum of language use within the deaf community, and cross-cultural management. Upon completion, students should be able to compare deaf and non-deaf cultures and discuss how attitudes impact communication interactions and interpreting. (S22720)

IPP 130 - Analytical Skills for Int

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-112 and pass with grade of C or better.

This course is designed to improve cognitive processes associated with interpreting, listening, short-term memory, semantic equivalence, visual/auditory processing, thought organization, and logic. Emphasis is placed on developing skills necessary to generate equivalent messages between ASL and

English. Upon completion, students should be able to consecutively interpret non-technical, interactive messages between ASL and English. (S12361)

IPP 152 - ASL/English Translation

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ASL-112

This course provides a study of the component parts of a cultural scheme and the manner in which ASL and English differ. Emphasis is placed on analyzing, discussing, and translating basic ASL and English texts. Upon completion, students should be able to discuss and apply techniques of cross-cultural communication and translation between deaf and non-deaf communities. (S25620)

IPP 161 - Consecutive Interpreting

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take IPP-152

This course introduces the process of ASL/English consecutive interpreting in a variety of interview, meeting, and small conference settings. Emphasis is placed on generating equivalent messages between ASL and English. Upon completion, students should be able to discuss and apply the principles of the protocol of consecutive interpreting. (S13756)

IPP 221 - Simultaneous Interpret I

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take IPP-161

This course introduces simultaneous ASL/English interpreting through a variety of expository texts originating in group, meeting, and conference settings. Emphasis is placed on analyzing expository texts, identifying registers, and applying principles of the protocol of interpreting. Upon completion, students should be able to apply the appropriate linguistic and/or cultural adjustments required to generate equivalent messages. (S14047)

IPP 224 - ASL to English Interpret

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take IPP-152

This course is designed to improve skills in ASL to English interpretation. Emphasis is placed on receptive skills, equivalent messages, grammatically correct English, and appropriate content, mood, and register. Upon completion, students should be able to generate appropriate English equivalents and apply appropriate linguistic and/or cultural adjustments. (S14062)

IPP 240 - Ethical Stnds & Practices

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take IPP-221

Corequisites: IPP-221

This course develops intellectual and ethical decision-making abilities and considers common ethical dilemmas that arise within the interpreting process. Topics include a model of ethical/intellectual development and the application of the model to interpreting practices. Upon completion, students should be able to discuss ethical resolution to various case studies and apply recognized principles of professional behavior to the interpreting process. (S13736)

ISC 112 - Industrial Safety

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the principles of industrial safety. Emphasis is placed on industrial safety and OSHA regulations. Upon completion, students should be able to demonstrate knowledge of a safe working environment and OSHA compliance. (S23527)

ISC 112EE - Industrial Safety - Elec

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the principles of industrial safety. Emphasis is placed on industrial safety and OSHA and environmental regulations. Upon completion, students should be able to demonstrate knowledge of a safe working environment. (L23461)

ISC 121 - Envir Health & Safety

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers workplace environmental, health, and safety concepts. Emphasis is placed on managing the implementation and enforcement of environmental health and safety regulations and on preventing accidents, injuries, and illnesses. Upon completion, students should be able to demonstrate an understanding of basic concepts of environmental health and safety. (S20650)

ISC 130 - Intro to Quality Control

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAT-121 or MAT-171

This course introduces the philosophies, principles, and techniques of managing quality. Topics include

the functions, responsibilities, structures, costs, reports, personnel, and vendor-customer relationships associated with quality control and management. Upon completion, students should be able to demonstrate an understanding of quality control and management. (S12046)

ISC 278 - cGMP Quality Systems

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course focuses on the development, implementation, and ongoing maintenance of a quality system in a cGMP environment. Topics include the cGMP standard, components of cGMP quality systems, quality function roles and training, development of documentation such as SOPs, and system review procedures. Upon completion, students should be able to identify the components of a quality system and develop a quality system manual utilizing the cGMP standard. (S20897)

JOU 110 - Intro to Journalism

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course presents a study of journalistic news, feature, and sports writing. Emphasis is placed on basic news writing techniques and on related legal and ethical issues. Upon completion, students should be able to gather, write, and edit news, feature, and sports articles. (S12092)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

JOU 217 - Feature/Editorial Writing

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111 Take JOU-110

This course covers the basics of persuasive writing for community newspapers and other print media. Emphasis is placed on writing features, reviews, and editorials including audience analysis, appropriate language, effective supporting details, completeness, and accuracy. Upon completion, students should be able to write effective feature stories, reviews, and editorials. (S20976)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

LEX 110 - Intro to Paralegal Study

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the paralegal profession and the legal system, and an emphasis is placed on the role of professional and legal ethics. Topics include regulations, ethics, case analysis, legal reasoning, career opportunities, professional organizations, terminology and other related topics. Upon completion, students should be able to explain the role of a paralegal and identify the skills, knowledge, and ethics required of paralegals. (S21169)

LEX 120 - Legal Research/Writing I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the techniques of legal research and writing. Emphasis is placed on locating, analyzing, applying, and updating sources of law; effective legal writing, including proper citation; and the use of electronic research methods. Upon completion, students should be able to perform legal research and writing assignments using techniques covered in the course. (S10824)

LEX 121 - Legal Research/Writing II

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take LEX-120

This course covers advanced topics in legal research and writing. Topics include more complex legal issues and assignments involving preparation of legal memos, briefs, and other documents and the advanced use of electronic research methods. Upon completion, students should be able to perform legal research and writing assignments using techniques covered in the course. (S10825)

LEX 130 - Civil Injuries

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers traditional tort concepts and the evolving body of individual rights created by statute. Topics include intentional and non-intentional torts with emphasis on negligence, strict liability, civil rights, workplace and environmental liability, remedies, and damages. Upon completion, students should be able to recognize, explain, and evaluate elements of civil injuries and related defenses. (S16405)

LEX 140 - Civil Litigation I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the structure of the legal system and the rules governing civil litigation. Topics include jurisdiction state and federal rules of civil procedure and evidence. Upon completion, students should be able to assist an attorney in pre-litigation matters and preparation of pleadings and motions. (S16406)

LEX 141 - Civil Litigation II

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take LEX-140

This course covers advanced topics in the civil litigation process. Topics include motions, discovery, and trial and appellate procedures. Upon completion, students should be able to assist an attorney in preparing and organizing documents for trial, settlement and post-trial practice. (S16407)

LEX 150 - Commercial Law I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers legally enforceable agreements, forms of organization, and selected portions of the Uniform Commercial Code. Topics include drafting and enforcement of contracts, leases, and related documents and selection and implementation of business organization forms, sales, and commercial papers. Upon completion, students should be able to apply the elements of a contract, prepare various business documents, and understand the role of commercial paper. (S10945)

LEX 151 - Commercial Law II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take LEX-150

This course is a continuation of LEX 150 and covers advanced topics in Business and Commercial Law. Topics include agency and employment, insurance, computer law, intellectual property, personal property and bailment, corporate organizations and bankruptcy. Upon completion, students will understand and be able to apply legal principles governing these topics and be able to draft a variety of financial instruments. (S11001)

LEX 160 - Criminal Law & Procedure

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces substantive criminal law and procedural rights of the accused. Topics include elements of state/federal crimes, defenses, constitutional issues, pre-trial and trial process, and other related topics. Upon completion, students should be able to explain elements of specific crimes and assist an attorney in preparing a criminal case. (S11247)

LEX 170 - Administrative Law

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course covers the scope, authority, and regulatory operations of various federal, state, and local

administrative agencies. Topics include social security, worker's compensation, unemployment, zoning, and other related topics. Upon completion, students should be able to research sources of administrative law, investigate, and assist in representation of clients before administrative agencies. (S12960)

LEX 210 - Real Property I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the study of real property law. Topics include the distinction between real and personal property, various estates, mechanics of conveyance and encumbrance, recordation, special proceedings, and other related topics. Upon completion, students should be able to identify estates, forms of deeds, requirements for recording, and procedures to enforce rights to real property. (S16409)

LEX 211 - Real Property II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take LEX-210

This course continues the study of real property law relating to title examination and preparation of closing documents. Topics include use of courthouse and other public records in title examination and preparation of documents required in real estate transactions and closings. Upon completion, students should be able to plot/draft a description, perform complete title examination, draft closing documents including title insurance forms, and prepare disbursement reconciliation. (S13155)

LEX 214 - Investigat & Trial Prep

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the fundamentals of investigation. Topics include compiling/assembling data for cases; investigative planning/information gathering techniques; locating/interviewing witnesses; collection/preserving/evaluating sufficiency/admissibility of evidence; preparation of reports; and evidence presentation at depositions/court proceeding. Upon completion, students should be able to plan/use investigative checklists, understand/demonstrate investigative techniques, prepare reports, and enhance verbal and interpersonal communications skills and interviewing techniques. (S10630)

LEX 240 - Family Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers laws governing domestic relations. Topics include marriage, separation, divorce, child custody, support, property division, adoption, domestic violence, and other related topics. Upon completion, students should be able to interview clients, gather information, and draft documents related to family law. (S16411)

LEX 250 - Wills, Estates, & Trusts

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course covers various types of wills, trusts, probate, estate administration, and intestacy. Topics include types of wills and execution requirements, caveats and dissents, intestate succession, inventories and accountings, distribution and settlement, and other related topics. Upon completion, students should be able to draft simple wills, prepare estate forms, understand administration of estates including taxation, and explain terms regarding trusts. (S12819)

LEX 260 - Bankruptcy and Collections

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the laws of bankruptcy and the rights of creditors and debtors. Topics include bankruptcy procedures and estate management, attachment, claim and delivery, repossession, foreclosure, collection, garnishment, and post-judgment collection procedure. Upon completion, students should be able to prepare and file bankruptcy forms, collection letters, statutory liens, and collection of judgments. (S20834)

LEX 270 - Law Office Mgt/Technology

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an overview of law office management and organization. Topics include office forms, filing systems, billing/time keeping, computer systems, calendar systems, library administration, case management, office/personnel procedures, ethics, and technology. Upon completion, students should be able to establish and maintain various law office systems, monitor case progress, and supervise non-lawyer personnel. (S10858)

LEX 271 - Law Office Writing

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers the basics of writing for the law office including the drafting of general correspondence, the briefing of cases, and the preparation of settlement brochures. Emphasis is placed on legal vocabulary in the context of letter writing, briefing judicial opinions, and the preparation of the settlement brochure. Upon completion, students should be able to draft letters to clients, opposing counsel, government entities, and insurance companies and prepare the settlement brochure. (S11838)

LEX 273 - NCCP Review Course

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: LEX-121 and LEX-141

This course provides an overview of the topics assessed on the North Carolina Certified Paralegal (NCCP) Exam. Topics include Wills, Trusts, and Estates; Family Law; Civil Litigation; Real Property; Commercial Law; Ethics; legal research, grammar and writing. Upon completion, students should be prepared to sit for the NCCP exam. (S24475)

LEX 280 - Ethics & Professionalism

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course reinforces legal ethics and the role of the paralegal in a professional work environment. Topics include a review of ethics, employment opportunities, and search techniques; paralegal certification and other related topics. Upon completion, students should be able to understand the paralegal's role in the ethical practice of law. (S16413)

LEX 287 - CLA Review Seminar

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take LEX-210

This course is designed to prepare students for voluntary certification sponsored by the National Association of Legal Assistants to demonstrate significant competence in paralegalism. Topics include communications, ethics, human relations, interviewing techniques, judgment and analytical analysis, legal research, legal terminology, general law and nine tested specialty areas of law. Upon completion, students should be able to demonstrate that they are prepared to take the NALA's Certified Legal Assistant Exam. (S20835)

LEX 288 - Elder Law

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of laws especially relevant to older persons. Topics include health care decision-making, living wills, powers of attorney, financial and estate planning, government benefits, housing issues, elder abuse, and ethical considerations. Upon completion, students should be able to assist an attorney in addressing legal issues pertinent to the elderly. (S22707)

LSG 111 - Basic Landscape Technique

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take LSG-121, LSG-122 or LSG-123

Corequisites: LSG-123 LSG-121 LSG-122

This course introduces basic principles essential to sustainable landscape gardening. Topics include soils,

propagation, watering, fertilizing, pruning, pest control, and planting. Upon completion, students should be able to perform basic sustainable gardening techniques essential to maintaining a sustainable landscape. (S23387)

LSG 121 - Fall Gardening Lab

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

Corequisites: LSG-111

This course provides basic hands-on experience in fall gardening techniques. Emphasis is placed on pruning, irrigation, planting, fertilizing, pest control, equipment operation, and turf maintenance. Upon completion, students should be able to perform various techniques essential to maintaining the fall landscape. (S11318)

LSG 122 - Spring Gardening Lab

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

This course provides familiarization with basic gardening techniques by performing practical hands-on exercises required for the spring season. Emphasis is placed on pruning, irrigation, planting, fertilizing, pest control, equipment operation, turf maintenance, and landscape construction. Upon completion, students should be able to satisfactorily perform various practices essential to maintaining the landscape in the spring season. (S11369)

LSG 123 - Summer Gardening Lab

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

This course provides basic hands-on experience in summer gardening techniques. Emphasis is placed on pruning, irrigation, planting, fertilizing, pest control, equipment operation, turf maintenance, landscape construction, and maintaining fruits and vegetables. Upon completion, students should be able to perform various techniques essential to maintaining the summer landscape. (S11290)

LSG 231 - Landscape Supervision

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: LSG-123 and HOR-161

This course provides experience in planning, implementing, and supervising various landscape management projects. Emphasis is placed on supervisory skills, organizing, and scheduling. Upon completion, students should be able to supervise employees in various landscape management jobs. (S24084)

LSG 232 - Garden Management

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: LSG-123 and HOR-161

This course covers the implementation of knowledge gained in previous landscape gardening courses. Emphasis is placed on scheduling, designing, renovation, and plant management. Upon completion, students should be able to collate the material learned in the Landscape Gardening curriculum and apply it to various landscape gardening situations. (S24085)

LSG 297 - Seminar in Landscape Gardening

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to explore topics of current interest. Emphasis is placed on the development of critical listening skills and the presentation of seminar issues. Upon completion, students should be able to critically analyze issues and establish informed opinions. (L23209)

MAC 111 - Machining Technology I

Class: 2 Lab: 12 Clinical: 0 Work: 0 **Credits: 6**

This course introduces machining operations as they relate to the metalworking industry. Topics include machine shop safety, measuring tools, lathes, drilling machines, saws, milling machines, bench grinders, and layout instruments. Upon completion, students should be able to safely perform the basic operations of measuring, layout, drilling, sawing, turning, and milling. (S11631)

MAC 112 - Machining Technology II

Class: 2 Lab: 12 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take MAC-111;

This course provides additional instruction and practice in the use of precision measuring tools, lathes, milling machines, and grinders. Emphasis is placed on setup and operation of machine tools including the selection and use of work holding devices, speeds, feeds, cutting tools, and coolants. Upon completion, students should be able to perform basic procedures on precision grinders and advanced operations of measuring, layout, drilling, sawing, turning, and milling. (S22988)

MAC 112A - Machining Technology II - A

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAC-111

This course provides additional instruction and practice in the use of precision measuring tools, lathes,

milling machines, and grinders. Emphasis is placed on setup and operation of machine tools including the selection and use of work holding devices, speeds, feeds, cutting tools, and coolants. Upon completion, students should be able to perform basic procedures on precision grinders and advanced operations of measuring, layout, drilling, sawing, turning, and milling. (L23552)

MAC 112B - Machining Technology II - B

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAC-111

This course provides additional instruction and practice in the use of precision measuring tools, lathes, milling machines, and grinders. Emphasis is placed on setup and operation of machine tools including the selection and use of work holding devices, speeds, feeds, cutting tools, and coolants. Upon completion, students should be able to perform basic procedures on precision grinders and advanced operations of measuring, layout, drilling, sawing, turning, and milling. (L23553)

MAC 113 - Machining Technology III

Class: 2 Lab: 12 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take MAC-112(S22988) MEC-231(S20658);

This course provides an introduction to advanced and special machining operations. Emphasis is placed on working to specified tolerances with special and advanced setups. Upon completion, students should be able to produce a part to specifications. (S22989)

MAC 121 - Intro to CNC

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the concepts and capabilities of computer numerical control machine tools. Topics include setup, operation, and basic applications. Upon completion, students should be able to explain operator safety, machine protection, data input, program preparation, and program storage. (S11049)

MAC 122 - CNC Turning

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MAC-124

This course introduces the programming, setup, and operation of CNC turning centers. Topics include programming formats, control functions, program editing, part production, and inspection. Upon completion, students should be able to manufacture simple parts using CNC turning centers. (S11081)

MAC 124 - CNC Milling

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One Set: Set: MAC-121 MAC-111 Set: MAC-121 MEC-111

This course introduces the manual programming, setup, and operation of CNC machining centers. Topics include programming formats, control functions, program editing, part production, and inspection. Upon completion, students should be able to manufacture simple parts using CNC machining centers. (S11096)

MAC 131 - Blueprint Reading/Mach I

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers the basic principles of blueprint reading and sketching. Topics include multi-view drawings; interpretation of conventional lines; and dimensions, notes, and thread notations. Upon completion, students should be able to interpret basic drawings, visualize parts, and make pictorial sketches. (S12563)

MAC 132 - Blueprint Reading/Mach II

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MAC-131

This course introduces more complex industrial blueprints. Emphasis is placed on auxiliary views, section views, violations of true project, special views, applications of GD & T, and interpretation of complex parts. Upon completion, students should be able to read and interpret complex industrial blueprints. (S22991)

MAC 152 - Adv Machining Calc

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MAT-121 or MAT 120

This course combines mathematical functions with practical machine shop applications and problems. Emphasis is placed on gear ratios, lead screws, indexing problems, and their applications in the machine shop. Upon completion, students should be able to calculate solutions to machining problems. (S12224)

MAC 222 - Advanced CNC Turning

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MAC-122

This course covers advanced methods in setup and operation of CNC turning centers. Emphasis is placed on programming and production of complex parts. Upon completion, students should be able to demonstrate skills in programming, operations, and setup of CNC turning centers. (S22994)

MAC 224 - Advanced CNC Milling

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MAC-124

This course covers advanced methods in setup and operation of CNC machining centers. Emphasis is placed on programming and production of complex parts. Upon completion, students should be able to demonstrate skills in programming, operations, and setup of CNC machining centers. (S23000)

MAC 233 - Appl in CNC Machining

Class: 2 Lab: 12 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take MAC-113 MAC-224 MEC-232 Take MAC-222

Corequisites: MAC-222

This capstone course provides students the opportunity to apply skills learned throughout the curriculum. Emphasis is placed on production of parts and assemblies using modern CNC machine tools. Upon completion, students should be able to manufacture complex parts using a variety of CNC machine tools. (S21152)

MAC 241 - Jigs & Fixtures I

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MAC-112 MEC-231

This course introduces the application and use of jigs and fixtures. Emphasis is placed on design and manufacture of simple jigs and fixtures. Upon completion, students should be able to design and build simple jigs and fixtures. (S22996)

MAC 245 - Mold Construction I

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MEC-232

This course introduces the principles of mold making. Topics include types, construction, and application of molds. Upon completion, students should be able to design and build simple molds. (S23004)

MAC 248 - Production Procedures

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MAC-113 MAT-121

This course covers product planning and control and scheduling and routing of operations. Topics

include cost-effective production methods, dimensional and statistical quality control, and the tooling and machines required for production. Upon completion, students should be able to plan, set up, and produce cost-effective quality machined parts. (\$10897)

MAT 1 - Math Skills Support

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Course: MAT-110 MAT-121 MAT-143 MAT-152 or MAT-171

Corequisites: MAT-110 MAT-121 MAT-143 MAT-152 or MAT-171

This course provides opportunities for students to build a stronger foundation for success in their corequisite math course by obtaining skills through a variety of instructional strategies. Emphasis is placed on foundational skills as well as concepts, skills, vocabulary and definitions necessary to master student learning outcomes of the co-requisite math course. Upon completion, students should be able to apply mathematical concepts and critical thinking skills to solve problems relevant to the student's co-requisite math course. (\$24075)

MAT 3 - Transition Math

Class: 0 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

This course provides an opportunity to customize foundational math content in specific math areas and will include developing a growth mindset. Topics include developing the academic habits, learning strategies, social skills, and growth mindset necessary to be successful in mathematics. Upon completion, students should be able to build a stronger foundation for success in their gateway level math courses by obtaining skills through a variety of instructional strategies with emphasis placed on the most essential prerequisite knowledge. (\$25126)

MAT 10 - Math Measurement & Literacy Su

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to customize foundational math content specific to Math Measurement & Literacy. Topics include developing the academic habits, learning strategies, social skills, and growth mindset necessary to be successful in mathematics. Upon completion, students should be able to build a stronger foundation for success in Math Measurement & Literacy by obtaining skills through a variety of instructional strategies with emphasis placed on the most essential prerequisite knowledge. (\$25128)

MAT 21 - Algebra/Trigonometry I Support

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize foundational math content specific to Algebra and Trigonometry I. Topics include developing the academic habits, learning strategies, social skills, and growth mindset necessary to be successful in mathematics. Upon completion, students should be able to build a stronger foundation for success in Algebra/Trigonometry I by obtaining skills through a variety of instructional strategies with emphasis placed on the most essential prerequisite knowledge. (S25129)

MAT 43 - Quantitative Literacy Support

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize foundational math content specific to Quantitative Literacy. Topics include developing the academic habits, learning strategies, social skills, and growth mindset necessary to be successful in mathematics. Upon completion, students should be able to build a stronger foundation for success in Quantitative Literacy by obtaining skills through a variety of instructional strategies with emphasis placed on the most essential prerequisite knowledge. (S25136)

MAT 50 - Basic Math Skills

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course is designed to strengthen basic math skills. Topics include properties, rounding, estimating, comparing, converting, and computing whole numbers, fractions, and decimals. Upon completion, students should be able to perform basic computations and solve relevant mathematical problems. (S14130)

MAT 52 - Statistical Methods I Support

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize foundational math content specific to Statistical Methods I. Topics include developing the academic habits, learning strategies, social skills, and growth mindset necessary to be successful in mathematics. Upon completion, students should be able to build a stronger foundation for success in Statistical Methods I by obtaining skills through a variety of instructional strategies with emphasis placed on the most essential prerequisite knowledge. (S25135)

MAT 71 - Precalculus Algebra Support

Class: 0 Lab: 4 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to customize foundational math content specific to Precalculus Algebra. Topics include developing the academic habits, learning strategies, social skills, and growth mindset necessary to be successful in mathematics. Upon completion, students should be able to build a stronger foundation for success in Precalculus Algebra by obtaining skills through a variety of instructional strategies with emphasis placed on the most essential prerequisite knowledge. (S25141)

MAT 110 - Math Measurement & Literacy

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set:,Set 1: DMA-010, DMA-020, and DMA-030,Set 2: DMA-025,Set 3: MAT-003,Set 4: BSP-4003 Take MAT-010 Take 1 group;,, #, Take DMA-010 DMA-020 DMA-030;,, #, Take DMA-025;,, #, Take MAT-003;,, From rule RMINP1;,, #, Take BSP-4003;,, From rule BSPMINP1;,, #, Take MAT-010;

Corequisites: MAT-010

This course provides an activity-based approach that develops measurement skills and mathematical literacy using technology to solve problems for non-math intensive programs. Topics include unit conversions and estimation within a variety of measurement systems; ratio and proportion; basic geometric concepts; financial literacy; and statistics including measures of central tendency, dispersion, and charting of data. Upon completion, students should be able to demonstrate the use of mathematics and technology to solve practical problems, and to analyze and communicate results. (S25428)

MAT 121 - Algebra/Trigonometry I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set:,Set 1: DMA-010, DMA-020, DMA-030, DMA-040, DMA-050,Set 2: DMA-025, DMA-040, DMA-050,Set 3: DMA-025, DMA-045,Set 4: DMA-010, DMA-020, DMA-030, DMA-045,Set 5: MAT-003 ,Set 6: BSP-4003 Take MAT-021 Take 1 group;,, #, Take DMA-010 DMA-020 DMA-030 DMA-040, DMA-050 DMA-060;,, #, Take DMA-010 DMA-020 DMA-030 DMA-045 DMA-060;,, #, Take DMA-025 DMA-040 DMA-050, DMA-060, #, Take DMA-025 DMA-045 DMA-060, #, Take 1 courses;,, From rule RMINP3;,, #, Take BSP-4003; From rule BSPMINP3;,, #, Take MAT-071, #, Take MAT-021;

Corequisites: MAT-021

This course provides an integrated approach to technology and the skills required to manipulate, display, and interpret mathematical functions and formulas used in problem solving. Topics include the properties of plane and solid geometry, area and volume, and basic proportion applications; simplification, evaluation, and solving of algebraic equations and inequalities and radical functions; complex numbers; right triangle trigonometry; and systems of equations. Upon completion, students will be able to demonstrate the ability to use mathematics and technology for problem-solving, analyzing and communicating results. (S25429)

MAT 122 - Algebra/Trigonometry II

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAT-121

This course is designed to cover concepts in algebra, function analysis, and trigonometry. Topics include exponential and logarithmic functions, transformations of functions, Law of Sines, Law of Cosines,

vectors, and statistics. Upon completion, students should be able to demonstrate the ability to use mathematics and technology for problem-solving, analyzing and communicating results. (S23931)

MAT 141 - Mathematical Concepts I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set: Set 1: DMA-010, DMA-020, DMA-030, and DMA-040 Set 2: DMA-025 and DMA-040 Set 3: MAT-121 Set 4: MAT-171 Set 5: MAT-003 Set 6: BSP-4003

This course is the first of a two-course sequence that develops a deeper understanding and appreciation of the basic concepts of mathematics. Emphasis is placed on sets, logic, number bases, elementary number theory, introductory algebra, measurement including metrics, and problem solving. Upon completion, students should be able to communicate orally and in writing these basic mathematical concepts. (S25446)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 142 - Mathematical Concepts II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAT-141

This course is the second of a two-course sequence that develops a deeper understanding and appreciation of the basic concepts of mathematics. Emphasis is placed on probability, statistics, functions, introductory geometry, and mathematics of finance. Upon completion, students should be able to communicate orally and in writing these basic mathematical concepts and utilize technology as a mathematical tool. (S20300)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 143 - Quantitative Literacy

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set:,Set 1: DMA-010, DMA-020, DMA-030, and DRE-098,Set 2: DMA-010, DMA-020, DMA-030, and ENG-002,Set 3: DMA-010, DMA-020, DMA-030, and BSP-4002,Set 4: DMA-025, and DRE-098,Set 5: DMA-025, and ENG-002,Set 6: DMA-025, and BSP-4002,Set 7: MAT-003 and DRE-098,Set 8: MAT-003 and ENG-002,Set 9: MAT-003 and BSP-4002,Set 10: BSP-4003 and DRE-098 ,Set 11: BSP-4003 and ENG-002,Set 12: BSP-4003 and BSP-4002 Take MAT-043 Take 1 group, #, Take DMA-010 DMA-020 DMA-030 DMA-040, DMA-050, #, Take DMA-010 DMA-020 DMA-030 DMA-045, #, Take DMA-025 DMA-040 DMA-050, #, Take DMA-025 DMA-045, #, Take MAT-003, #, From rule RMINP2, #, Take BSP-4003, #, From rule BSPMINP2, #, Take MAT-043, #, Take MAT-052;

Corequisites: MAT-043

This course is designed to engage students in complex and realistic situations involving the mathematical phenomena of quantity, change and relationship, and uncertainty through project- and activity-based assessment. Emphasis is placed on authentic contexts which will introduce the concepts of numeracy, proportional reasoning, dimensional analysis, rates of growth, personal finance, consumer statistics, practical probabilities, and mathematics for citizenship. Upon completion, students should be able to utilize quantitative information as consumers and to make personal, professional, and civic decisions by decoding, interpreting, using, and communicating quantitative information found in modern media and encountered in everyday life. UGETC (S25430)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 152 - Statistical Methods I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One Set:,Set 1: DMA-010, DMA-020, DMA-030, and DRE-098,Set 2: DMA-010, DMA-020, DMA-030, and ENG-002,Set 3: DMA-010, DMA-020, DMA-030, and BSP-4002,Set 4: DMA-025, and DRE-098,Set 5: DMA-025, and ENG-002,Set 6: DMA-025, and BSP-4002,Set 7: MAT-003 and DRE-098,Set 8: MAT-003 and ENG-002,Set 9: MAT-003 and BSP-4002,Set 10: BSP-4003 and DRE-098 ,Set 11: BSP-4003 and ENG-002,Set 12: BSP-4003 and BSP-4002 Take MAT-052

Corequisites: MAT-052

This course provides a project-based approach to introductory statistics with an emphasis on using real-world data and statistical literacy. Topics include descriptive statistics, correlation and regression, basic probability, discrete and continuous probability distributions, confidence intervals and hypothesis testing. Upon completion, students should be able to use appropriate technology to describe important characteristics of a data set, draw inferences about a population from sample data, and interpret and communicate results. UGETC (S25431)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 167 - Discrete Mathematics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: MAT-121 or MAT-171

This course is designed to develop problem-solving and reasoning skills using an algorithmic approach. Topics include sets, number theory, numeration systems, linear programming, traditional and propositional logic, truth tables, Venn diagrams, elementary proofs, and Boolean algebra. Upon completion, students should be able to apply logic and other mathematical concepts to solve a variety of

problems. (S23933)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 171 - Precalculus Algebra

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One Set;,Set 1: DMA-010, DMA-020, DMA-030, DMA-040, DMA-050,Set 2: DMA-010, DMA-020, DMA-030, DMA-045,Set 3: DMA-025, DMA-045,Set 4: DMA-025, DMA-040, DMA-050,Set 5: MAT 121,Set 6: MAT-003 ,Set 7: BSP-4003 Take MAT-071 Take 1 group;, #, Take DMA-010 DMA-020 DMA-030 DMA-040, DMA-050 DMA-060 DMA-070, DMA-080;, #, Take DMA-010 DMA-020 DMA-030 DMA-040, DMA-050 DMA-065;, #, Take DMA-025 DMA-040 DMA-050, DMA-060 DMA-070 DMA-080;, #, Take DMA-025 DMA-040 DMA-050, DMA-065;, #, Take DMA-025 DMA-045 DMA-060 DMA-070, DMA-080;, #, Take DMA-025 DMA-045 DMA-065;, #, Take 1 courses;, From rule RMINP3;, #, Take BSP-4003;, From rule BSPMINP3;, #, Take MAT-021;, #, Take MAT-071;

Corequisites: MAT-071

This course is designed to develop topics which are fundamental to the study of Calculus. Emphasis is placed on solving equations and inequalities, solving systems of equations and inequalities, and analysis of functions (absolute value, radical, polynomial, rational, exponential, and logarithmic) in multiple representations. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to algebra-related problems with and without technology. UGETC (S25432)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 172 - Precalculus Trigonometry

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MAT-171

This course is designed to develop an understanding of topics which are fundamental to the study of Calculus. Emphasis is placed on the analysis of trigonometric functions in multiple representations, right and oblique triangles, vectors, polar coordinates, conic sections, and parametric equations. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to trigonometry-related problems with and without technology. UGETC (S23935)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 252 - Statistical Methods II

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MAT-152

This course is designed to provide a technology-based treatment of multiple sample inferential statistics. Emphasis is placed on two sample hypothesis tests and confidence intervals, linear and multiple regression, analysis of variance, experimental design, and non-parametric techniques. Upon completion, students should be able to draw statistical inferences and communicate results on multiple sample data taken from business and health, social, natural, and applied sciences. (S25063)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 263 - Brief Calculus

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MAT-171

This course is designed to introduce concepts of differentiation and integration and their applications to solving problems. Topics include graphing, differentiation, and integration with emphasis on applications drawn from business, economics, and biological and behavioral sciences. Upon completion, students should be able to demonstrate an understanding of the use of basic calculus and technology to solve problems and to analyze and communicate results. UGETC (S23937)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 271 - Calculus I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take: MAT-172

This course is designed to develop the topics of differential and integral calculus. Emphasis is placed on limits, continuity, derivatives and integrals of algebraic and transcendental functions of one variable. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to derivative-related problems with and without technology. MAT 172 is the prerequisite for this course; however, a student may PLACE DIRECTLY into MAT 271 if the student has met at least one (1) of the following criteria within the past five (5) years: 1. A score of 2 or higher on the AP Calculus AB Exam. 2. A grade of C or higher in an AP Calculus course and an unweighted HS GPA of 3.0 or higher. 3. A score of 90 or higher on the ACCUPLACER College-Level Math (CLM) test. 4. A score of 46 or higher on the trigonometry section of the ACT Compass Math Placement Test. 5. A score of 580 or higher on the SAT Math and a grade of C or higher in the North Carolina Standard Course of Study Pre-Calculus course or an equivalent course from another state. 6. A score of 27 or higher on the ACT Math and a grade of C or higher in the North Carolina Standard Course of Study Pre-Calculus course or an equivalent course from another state. 7. A score of 560 or higher on the SAT Subject Test in

Mathematics Level 2. UGETC (S23939)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 272 - Calculus II

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MAT-271

This course is designed to develop advanced topics of differential and integral calculus. Emphasis is placed on the applications of definite integrals, techniques of integration, indeterminate forms, improper integrals, infinite series, conic sections, parametric equations, polar coordinates, and differential equations. Upon completion, students should be able to select and use appropriate models and techniques for finding solutions to integral-related problems with and without technology. UGETC (S23940)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 273 - Calculus III

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MAT-272

This course is designed to develop the topics of multivariate calculus. Emphasis is placed on multivariate functions, partial derivatives, multiple integration, solid analytical geometry, vector valued functions, and line and surface integrals. Upon completion, students should be able to select and use appropriate models and techniques for finding the solution to multivariate-related problems with and without technology. (S23941)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 280 - Linear Algebra

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAT-271

This course provides an introduction to linear algebra topics. Emphasis is placed on the development of abstract concepts and applications for vectors, systems of equations, matrices, determinants, vector spaces, multi-dimensional linear transformations, eigenvectors, eigenvalues, diagonalization and orthogonality. Upon completion, students should be able to demonstrate understanding of the theoretical concepts and select and use appropriate models and techniques for finding solutions to

linear algebra-related problems with and without technology. (S23942)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MAT 285 - Differential Equations

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAT-272

This course provides an introduction to topics involving ordinary differential equations. Emphasis is placed on the development of abstract concepts and applications for first-order and linear higher-order differential equations, systems of differential equations, numerical methods, series solutions, eigenvalues and eigenvectors, and LaPlace transforms. Upon completion, students should be able to demonstrate understanding of the theoretical concepts and select and use appropriate models and techniques for finding solutions to differential equations-related problems with and without technology. (S23943)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MEC 110 - Intro to CAD/CAM

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MEC-111 DFT-151

This course introduces CAD/CAM. Emphasis is placed on transferring part geometry from CAD to CAM for the development of a CNC-ready program. Upon completion, students should be able to use CAD/CAM software to produce a CNC program. (S14051)

MEC 111 - Machine Processes I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course introduces shop safety, hand tools, machine processes, measuring instruments, and the operation of machine shop equipment. Topics include use and care of tools, safety, measuring tools, and the basic setup and operation of common machine tools. Upon completion, students should be able to manufacture simple parts to specified tolerance. (S20654)

MEC 130 - Mechanisms

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the purpose and action of various mechanical devices. Topics include cams,

cables, gear trains, differentials, screws, belts, pulleys, shafts, levers, lubricants, and other devices. Upon completion, students should be able to analyze, maintain, and troubleshoot the components of mechanical systems. (S16429)

MEC 145 - Mfg Materials I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces a variety of manufacturing materials and common processing techniques. Emphasis is placed on the processing, testing, and application of materials such as wood, metals, plastics, ceramics, and composites. Upon completion, students should be able to demonstrate an understanding of fundamental engineering applications for a variety of materials, including their process capabilities and limitations. (S23498)

MEC 231 - Comp-Aided Manufact I

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MAC-124 MAC-132

This course introduces computer-aided design/ manufacturing (CAD/CAM) applications and concepts. Topics include software, programming, data transfer and verification, and equipment setup. Upon completion, students should be able to produce parts using CAD/CAM applications. (S20658)

MEC 232 - Comp-Aided Manufact II

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MEC-231

This course provides an in-depth study of CAM applications and concepts. Emphasis is placed on the manufacturing of complex parts using computer-aided manufacturing software. Upon completion, students should be able to manufacture complex parts using CAM software. (S14320)

MEC 265 - Fluid Mechanics

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take 1 set: Set: ENG-111 and MAT-121 Set: ENG-111 and MAT-171

This course covers the physical behavior of fluids and fluid systems. Topics include fluid statics and dynamics, laminar and turbulent flow, Bernoulli's Equation, components, applications, and other related topics. Upon completion, students should be able to apply fluid power principles to practical applications. (S23504)

MEC 267 - Thermal Systems

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: PHY-131 or PHY-151 Take NUC-110

This course introduces the fundamental laws of thermodynamics. Topics include work and energy, open and closed systems, and heat engines. Upon completion, students should be able to demonstrate a knowledge of the laws and principles that apply to thermal power. (S11802)

MED 110 - Orientation to Med Assist

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course covers the history of medicine and the role of the medical assistant in the health care setting. Emphasis is placed on professionalism, communication, attitude, behaviors, and duties in the medical environment. Upon completion, students should be able to project a positive attitude and promote the profession of medical assisting. (S11175)

MED 116 - Introduction to A & P

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course introduces basic anatomy and physiology. Emphasis is placed on the relationship between body structure and function and the procedures common to health care. Upon completion, students should be able to identify body system components and functions relating this knowledge to the delivery of health care. (S11160)

MED 118 - Medical Law and Ethics

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course covers legal relationships of physicians and patients, contractual agreements, professional liability, malpractice, medical practice acts, informed consent, and bioethical issues. Emphasis is placed on legal terms, professional attitudes, and the principles and basic concepts of ethics and laws involved in providing medical services. Upon completion, students should be able to meet the legal and ethical responsibilities of a multi-skilled health professional. (S11173)

MED 120 - Survey of Med Terminology

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the vocabulary, abbreviations, and symbols used in the language of medicine. Emphasis is placed on building medical terms using prefixes, suffixes, and word roots. Upon completion, students should be able to pronounce, spell, and define accepted medical terms. (S12808)

MED 121 - Medical Terminology I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces prefixes, suffixes, and word roots used in the language of medicine. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders. (S12737)

MED 122 - Medical Terminology II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MED-121 Take MED-121; Minimum grade C;

This course is the second in a series of medical terminology courses. Topics include medical vocabulary and the terms that relate to the anatomy, physiology, pathological conditions, and treatment of selected systems. Upon completion, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders. (S12833)

MED 130 - Admin Office Proc I

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces medical office administrative procedures. Topics include appointment processing, written and oral communications, medical records, patient orientation, and safety. Upon completion, students should be able to perform basic administrative skills within the medical environment. (S10285)

MED 131 - Admin Office Proc II

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides medical office procedures in both economic and management skills. Topics include physical plant maintenance, equipment and supplies, liability coverage, medical economics, and introductory insurance procedures. Upon completion, students should be able to manage the economics of the medical office and supervise personnel. (S16431)

MED 134 - Medical Transcription

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MED-121 Take 1 group:, Take OST-136 BIO-163 OR, Take OST-136 BIO-168

This course provides the basic knowledge, understanding, and skills required to complete medical reports and transcribe medical dictation. Emphasis is placed on correct punctuation, capitalization, and spelling. Upon completion, students should be able to demonstrate competence in medical transcription. (S10271)

MED 136 - Preventive Health

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MED-270

Corequisites: MED-276

This course provides information on public school and community health issues at all levels and preventive measures for prevalent diseases in the schools. Topics include healthy lifestyles, disease prevention, child psychology, and holistic health. Upon completion, students should be able to present information to all age levels concerning health issues, disease prevention, and attainment of healthy lifestyles. (S21420)

MED 140 - Exam Room Procedures I

Class: 3 Lab: 4 Clinical: 0 Work: 0 **Credits: 5**

This course provides instruction in clinical examining room procedures. Topics include asepsis, infection control, assisting with exams and treatment, patient education, preparation and administration of medications, EKG, vital signs, and medical emergencies. Upon completion, students should be able to demonstrate competence in exam room procedures. (S11885)

MED 150 - Laboratory Procedures I

Class: 3 Lab: 4 Clinical: 0 Work: 0 **Credits: 5**

This course provides instruction in basic lab techniques used by the medical assistant. Topics include lab safety, quality control, collecting and processing specimens, performing selective tests, phlebotomy, screening and follow-up of test results, and OSHA/CLIA regulations. Upon completion, students should be able to perform basic lab tests/skills based on course topics. (S10688)

MED 260 - MED Clinical Practicum

Class: 0 Lab: 0 Clinical: 15 Work: 0 **Credits: 5**

This course provides the opportunity to apply clinical, laboratory, and administrative skills in a medical facility. Emphasis is placed on enhancing competence in clinical and administrative skills necessary for comprehensive patient care and strengthening professional communications and interactions. Upon completion, students should be able to function as an entry-level health care professional. (S22977)

MED 264 - Med Assisting Overview

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course provides an overview of the complete medical assisting curriculum. Emphasis is placed on all facets of medical assisting pertinent to administrative, laboratory, and clinical procedures performed in the medical environment. Upon completion, students should be able to demonstrate competence in the areas covered on the national certification examination for medical assistants. (S13592)

MED 270 - Symptomatology

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MED-260 MED-264 MED-272 MED-274

This course covers the study of disease symptoms and the appropriate actions taken by medical assistants in a medical facility in relation to these symptoms. Emphasis is placed on interviewing skills and appropriate triage, preparing patients for procedures, and screening test results. Upon completion, students should be able to recognize how certain symptoms relate to specific diseases, recognize emergency situations, and take appropriate actions. (S11862)

MED 272 - Drug Therapy

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course focuses on major drug groups, including their side effects, interactions, methods of administration, and proper documentation. Emphasis is placed on the theory of drug administration. Upon completion, students should be able to identify, spell, recognize side effects of, and document the most commonly used medications in a physician's office. (S16433)

MED 274 - Diet Therapy/Nutrition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic principles of nutrition as they relate to health and disease. Topics include basic nutrients, physiology, dietary deficiencies, weight management, and therapeutic nutrition in wellness and disease. Upon completion, students should be able to interpret clinical and dietary data and provide patient counseling and education. (S11835)

MED 276 - Patient Education

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: MED-270

Corequisites: MED-136

This course is designed to provide communication skills, basic education principles, and knowledge of available community resources and to apply this knowledge to the clinical setting. Emphasis is placed on identifying appropriate community resources, developing patient education materials, and perfecting

written and oral communication skills. Upon completion, students should be able to instruct, communicate effectively, and act as a liaison between the patient and community agencies. (S11808)

MHA 140 - Treatment Modalities

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a comprehensive exposure to different mental health treatment modalities. Topics include self-help and professional support groups, different forms of psychotherapy, adjunctive therapies, and therapies based on family systems theory. Upon completion, students should be able to identify the treatment methods of various self-help groups and recognize the theoretical bases for various forms of psychotherapy. (S14209)

MHA 150 - Mental Health Systems

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take HSE-110

This course introduces the treatment and services available at both public and private mental health facilities. Topics include intake procedures, admission criteria, history, and structure of mental health facilities. Upon completion, students should be able to demonstrate competence in articulating both the theory and practice of mental health services delivery. (S12614)

MHA 155 - Psychological Assessment

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course covers psychological assessment. Emphasis is placed on different types of psychological tests. Upon completion, students should be able to recognize and understand the purpose of various psychological tests. (S12650)

MHA 240 - Advocacy

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take HSE-110

This course covers the roles and duties of the client advocate. Topics include treatment planning, needs assessment, referral procedures, and follow-up and integration of services. Upon completion, students should be able to effectively manage the care of the whole person from contact initiation to termination. (S13494)

MKT 120 - Principles of Marketing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces principles and problems of marketing goods and services. Topics include promotion, placement, and pricing strategies for products. Upon completion, students should be able to apply marketing principles in organizational decision making. (S24159)

MKT 121 - Retailing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course examines the role of retailing in the economy. Topics include the development of present retail structure, functions performed, effective operations, and managerial problems resulting from current economic and social trends. Upon completion, students should be able to demonstrate an understanding of the basic principles of retailing. (S12710)

MKT 221 - Consumer Behavior

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BUS-110

This course is designed to describe consumer behavior as applied to the exchange processes involved in acquiring, consuming, and disposing of goods and services. Topics include an analysis of basic and environmental determinants of consumer behavior with emphasis on the decision-making process. Upon completion, students should be able to analyze concepts related to the study of the individual consumer. (S12308)

MKT 223 - Customer Service

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course stresses the importance of customer relations in the business world. Emphasis is placed on learning how to respond to complex customer requirements and to efficiently handle stressful situations. Upon completion, students should be able to demonstrate the ability to handle customer relations. (S12287)

MKT 224 - International Marketing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the basic concepts of international marketing activity and theory. Topics include product promotion, placement, and pricing strategies in the international marketing environment. Upon completion, students should be able to demonstrate a basic understanding of the concepts covered. (S12374)

MKT 232 - Social Media Marketing

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course is designed to build students' social media marketing skills by utilizing projects that give students hands on experience implementing social media marketing strategies. Topics include integrating different social media technologies into a marketing plan, creating social media marketing campaigns, and applying appropriate social media tools. Upon completion, students should be able to use social media technologies to create and improve marketing efforts for businesses. (S24164)

MLT 110 - Intro to MLT

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces all aspects of the medical laboratory profession. Topics include health care/laboratory organization, professional ethics, basic laboratory techniques, safety, quality assurance, and specimen collection. Upon completion, students should be able to demonstrate a basic understanding of laboratory operations and be able to perform basic laboratory skills. (S12410)

MLT 111 - Urinalysis & Body Fluids

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the laboratory analysis of urine and body fluids. Topics include physical, chemical, and microscopic examination of the urine and body fluids. Upon completion, students should be able to demonstrate theoretical comprehension in performing and interpreting urinalysis and body fluid tests. (S12518)

MLT 115 - Laboratory Calculations

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course is designed to present mathematical operations used in the medical laboratory. Topics include use of basic math processes, systems of measurement, conversion factors, solutions, and dilutions. Upon completion, students should be able to solve practical problems in the context of the medical laboratory. (S12514)

MLT 120 - Hematology/Hemostasis I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the theory and technology used in analyzing blood cells and the study of hemostasis. Topics include hematology, hemostasis, and related laboratory testing. Upon completion,

students should be able to demonstrate theoretical comprehension of hematology/hemostasis, perform diagnostic techniques, and correlate laboratory findings with disorders. (S13505)

MLT 126 - Immunology and Serology

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the immune system and response and basic concepts of antigens, antibodies, and their reactions. Emphasis is placed on basic principles of immunologic and serodiagnostic techniques and concepts of cellular and humoral immunity in health and disease. Upon completion, students should be able to demonstrate theoretical comprehension and application in performing and interpreting routine immunologic and serodiagnostic procedures. (S13486)

MLT 127 - Transfusion Medicine

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the blood group systems and their applications in transfusion medicine. Emphasis is placed on blood bank techniques including blood grouping and typing, pretransfusion testing, donor selection and processing, and blood component preparation and therapy. Upon completion, students should be able to demonstrate theoretical comprehension and application in performing/interpreting routine blood bank procedures and recognizing/resolving common problems. (S13522)

MLT 130 - Clinical Chemistry I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the quantitative analysis of blood and body fluids and their variations in health and disease. Topics include clinical biochemistry, methodologies, instrumentation, and quality control. Upon completion, students should be able to demonstrate theoretical comprehension of clinical chemistry, perform diagnostic techniques, and correlate laboratory findings with disorders. (S12376)

MLT 140 - Intro to Microbiology

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic techniques and safety procedures in clinical microbiology. Emphasis is placed on the morphology and identification of common pathogenic organisms, aseptic technique, staining techniques, and usage of common media. Upon completion, students should be able to demonstrate theoretical comprehension in performing and interpreting basic clinical microbiology procedures. (S14122)

MLT 217 - Professional Issues

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course surveys professional issues in preparation for career entry. Emphasis is placed on work readiness and theoretical concepts in microbiology, immunohematology, hematology, and clinical chemistry. Upon completion, students should be able to demonstrate competence in career entry-level areas and be prepared for the national certification examination. (S12112)

MLT 220 - Hematology/Hemostasis II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the theories and techniques used in the advanced analysis of human blood cells and hemostasis. Emphasis is placed on the study of hematologic disorders, abnormal cell development and morphology, and related testing. Upon completion, students should be able to demonstrate a theoretical comprehension and application of abnormal hematology and normal and abnormal hemostasis. (S10838)

MLT 230 - Clinical Chemistry II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MLT-130

This course is designed to supplement the biochemical and physiologic theory presented in MLT 130. Emphasis is placed on special chemistry techniques and methodologies. Upon completion, students should be able to recognize and differentiate technical and physiological causes of unexpected test results. (S13092)

MLT 240 - Special Clin Microbiology

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MLT-140

This course is designed to introduce special techniques in clinical microbiology. Emphasis is placed on advanced areas in microbiology. Upon completion, students should be able to demonstrate theoretical comprehension in performing and interpreting specialized clinical microbiology procedures. (S10388)

MLT 254 - MLT Practicum I

Class: 0 Lab: 0 Clinical: 12 Work: 0 **Credits: 4**

This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. (S11401)

MLT 266 - MLT Practicum II

Class: 0 Lab: 0 Clinical: 18 Work: 0 **Credits: 6**

This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. (S11220)

MLT 276 - MLT Practicum III

Class: 0 Lab: 0 Clinical: 18 Work: 0 **Credits: 6**

This course provides entry-level clinical laboratory experience. Emphasis is placed on technique, accuracy, and precision. Upon completion, students should be able to demonstrate entry-level competence on final clinical evaluations. (S12851)

MLT 280 - Special Practice Lab

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course provides additional medical laboratory experience. Emphasis is placed on laboratory skills and techniques. Upon completion, students should be able to demonstrate proficiency in laboratory skills and techniques. (S10243)

MNT 110 - Intro to Maint Procedures

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers basic maintenance fundamentals for power transmission equipment. Topics include equipment inspection, lubrication, alignment, and other scheduled maintenance procedures. Upon completion, students should be able to demonstrate knowledge of accepted maintenance procedures and practices according to current industry standards. (S23528)

MNT 111 - Maintenance Practices

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides in-depth theory and practical applications relating to predictive and preventive maintenance programs. Emphasis is placed on equipment failure analysis, maintenance management software, and techniques such as vibration and infrared analysis. Upon completion, students should be able to demonstrate an understanding of modern analytical and documentation methods. (S16435)

MNT 131 - Metalworking Processes

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the standard practices that are found in the metal workshop. Topics include the proper care/use of basic hand tools and precision measuring instruments and layout procedures/operation of lathes, drill presses, grinders, milling machines, and power saws. Upon completion, students should be able to work safely in the metal workshop and use basic metalworking equipment. (S20667)

MNT 220 - Rigging and Moving

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers the principles of safe rigging practices for handling, placing, installing, and moving heavy machinery and equipment. Topics include safety, weight and dimensional estimation, positioning of equipment slings, rollers, jacks, levers, dollies, ropes, chains, padding, and other related topics. Upon completion, students should be able to safely relocate and set up equipment using accepted rigging practices. (S13803)

MNT 230 - Pumps & Piping Systems

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course covers pump installation and maintenance and related valves and piping systems. Topics include various types of pump systems and their associated valves, piping requirements, and other related topics. Upon completion, students should be able to select and install pump and piping systems and demonstrate proper maintenance and troubleshooting procedures. (S10184)

MRN 121 - Marine Engines

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take TRN-110 Take HET-110

Corequisites: HET-110

This course covers two and four cycle diesel engines that are used for marine vessel propulsion. Emphasis is placed on construction, design, cooling systems, lubrication systems, and air-intake systems. Upon completion, students should be able to test, troubleshoot, diagnose and repair marine engine systems. (S23442)

MRN 147 - Marine Power Trains

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course covers the principles and function of marine power trains. Emphasis is placed on marine

gears, drive lines, gear reduction, and installation aboard vessels. Upon completion, students should be able to test, service, and trouble shoot marine power trains. (S23443)

MRN 150 - Adv Marine Electrical Sys

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take TRN-120

This course covers the skills necessary to wire 12-volt direct current and 120-volt alternating current electrical systems found on modern boats and marine applications. Topics include wire sizing, batteries, wire harnesses, distribution panels, electronic component installation, and electrical system troubleshooting, including generators operation and disassembly. Upon completion students should be able to diagnose, test, and repair advanced electrical systems in marine applications and boats. (S23444)

MSC 110 - Training Cruise I

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course covers the skills necessary to live and work safely aboard oceangoing research vessels. Emphasis is placed on the skills necessary for the safe operation of biological sampling equipment. Upon completion, students should be able to safely live and work aboard an oceanographic research vessel conducting offshore scientific operations. (S21403)

MSC 112 - Training Cruise II

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course covers the skills necessary to live and work safely aboard oceangoing research vessels. Emphasis is placed on maintaining a 24-hour navigation log and weather watch and safely conducting over-the-side sampling operations. Upon completion, students should be able to maintain a weather log, plot a cruise track, and safely use sampling gear. (S21404)

MSC 114 - Training Cruise III

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One: MSC-110 or MSC-112

This course covers the skills necessary to live and work safely aboard oceangoing research vessels. Emphasis is placed on utilizing the navigational and hydrographical techniques needed to conduct an offshore bathymetric survey. Upon completion, students should be able to accurately navigate a vessel, gather bathymetric data, and prepare a depth contour plot of a predetermined quadrant. (S24091)

MSC 120 - Marine Software & Data Ntwks

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces software used in the marine industry and the network hardware required for data integration. Emphasis is placed on hydrographic/oceanographic software packages, and the use of serial communications, Ethernet, null modem, and USB technologies. Upon completion, students should be able to demonstrate an understanding of the various software applications and be able to integrate networking technologies when underway. (S24942)

MSC 122 - Boat Handling/Seamanship

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the skills of boat handling, the practice of seamanship, and safety and survival in the marine environment. Topics include safe boat handling, seamanship under adverse conditions, fire fighting, man overboard rescue, PFDs, EPIRBs, distress signals, lifeboats, and life rafts. Upon completion, students should be able to competently operate small powerboats and demonstrate proficiency in the use of marine fire fighting and lifesaving equipment. (S23388)

MSC 124 - Industrial Skills

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course offers a practical approach to the mechanical and technical skills needed by technicians in a variety of marine-related jobs. Topics include industrial safety, measurement systems, hand and power tools, fasteners, corrosion protection, project design, and construction and cost estimation. Upon completion, students should be able to safely use hand and/or power tools and understand a variety of measurement and pricing systems. (S23389)

MSC 126 - Marine Engines

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers fundamental theory, troubleshooting, and maintenance of marine engines and related equipment, especially outboards. Emphasis is placed on maintenance and operational procedures, including corrosion control, lubrication, propellers, carburetors, two-cycle theory, magneto ignition, batteries, starters, alternators, and trailers. Upon completion, students should be able to understand how a marine engine and related components work, perform minor repairs, and properly maintain them. (S13687)

MSC 132 - Fishing Gear Tech I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces modern rope seamanship and fishing gear theory, design, repair, and analysis as

it relates to fisheries research. Emphasis is placed on various practical knots, rope splicing, marine hardware, biological sampling gear classifications, and the basics of net construction, repair, and design. Upon completion, students should be able to implement marlin spike skills; repair netted material; and identify, design, and construct various types of biological entrapment and entanglement gear. (S23390)

MSC 134 - Fishing Gear Tech II

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MSC-132

This course offers further experience and instruction in fishing gear theory and design and the collection and recording of biological data. Emphasis is placed on the general skills needed to design, construct, and repair complex sampling gear and be employed as a fisheries technician. Upon completion, students should be able to understand and apply fishing gear design and construction techniques and collect, compile, and record biological data. (S12028)

MSC 150 - Marine Navigation

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides training in marine piloting and electronic navigation techniques. Topics include use of charts, instruments, navigational aids, compasses, nautical publications, radar, GPS, LORAN, and depth sounders, with an emphasis on plotting techniques. Upon completion, students should be able to demonstrate competence in the safe navigation of vessels utilizing and interpreting information obtained from navigational aids. (S23391)

MSC 152 - Marine Instrumentation

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the various types of oceanographic instrumentation used for the collection of data and samples by the oceanographic community. Emphasis is placed on data recording procedures, proper operation, safe handling, and calibration, maintenance, and repair of instruments. Upon completion, students should be able to safely and correctly use the instruments covered to conduct accurate field measurements. (S13363)

MSC 154 - Marine Photography

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-085 RED-080 ENG-095 RED-090 DRE-097 or ENG-111 Take CIS-110 or CIS-111

Corequisites: CIS-110 CIS-111

This course introduces the basic concepts, processes, and techniques of photography with emphasis on marine applications. Topics include proper camera operation, composition, exposure, lighting techniques, and the processing of black and white films and papers. Upon completion, students should be able to demonstrate proficiency in the operation of a camera and portable lighting tools with consistent exposures and darkroom techniques. (S13329)

MSC 160 - Oceanography

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a general description of the geology, chemistry, and physics of the oceans. Topics include a history of oceanography, bathymetry, plate tectonics, seawater chemistry and physics, atmospheric circulation, currents, waves, tides, sedimentation, and coastal geology. Upon completion, students should be able to describe bathymetric features, the chemistry and physics of seawater, atmospheric and ocean circulations, marine sediments, and coastal processes. (S25580)

MSC 172 - Marine Biology

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course utilizes field trips to the beach, salt marsh, and other habitats to study marine animals and plants in their natural communities. Topics include divisions of the marine environment, distribution of life in the ocean, and the interrelationships of marine organisms in various habitats. Upon completion, students should be able to scientifically identify various marine species and describe the role they fill in their biological communities. (S11611)

MSC 174 - Marine Invertebrate Zoo

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course covers the behavior and classification of marine invertebrates. Topics include identification, feeding behavior, reproduction, and symbiotic relationships of marine invertebrates. Upon completion, students should be able to identify and classify marine invertebrates and demonstrate an understanding of their basic anatomy and physiology. (S11590)

MSC 180 - Water Analysis

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the practical analysis of water samples with an emphasis on marine-oriented techniques and procedures. Topics include basic laboratory skills, microbiology techniques, and the use of wet chemistry and instruments to quantify chemically and biologically important parameters. Upon completion, students should be able to culture microbes, and measure pH, turbidity, dissolved oxygen, and nutrients in natural water samples. (S23393)

MSC 210 - Marine Envir Samp&Analysis

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the fundamental principles used in the environmental assessment process and their applicability to environmental laws and policies. Emphasis is placed on characterizing sampling sites; understanding contaminant transport; developing and following sampling plans for the collection of various media; documenting field activities; following proper lab techniques and safety; and interpreting lab reports. Upon completion, students should be able to describe significant environmental regulations applicable to the marine environment, classes and typical sources of contaminants, and current sampling and laboratory techniques and quality control measures. (S24295)

MSC 216 - Training Cruise IV

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Set: Set 1: MSC-110, MSC-114, and MSC-152 Set 2: MSC-112, MSC-114, and MSC-152

This course covers the skills necessary to live and work safely aboard oceangoing research vessels. Emphasis is placed on conducting standard hydrographic stations using various oceanographic samples. Upon completion, students should be able to set up and conduct a hydrographic station and collect accurate data using various types of marine instrumentation. (S24092)

MSC 218 - Training Cruise V

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One Set: Set 1: MSC-114 and MSC-152 Set 2: MSC-216 and MSC-152

This course covers the skills necessary to live and work safely aboard oceangoing research vessels. Emphasis is placed on conducting a broad range of oceanographic survey techniques, including chemical, meteorological, geological, physical, and biological surveys. Upon completion, students should be able to demonstrate competence in the skills required of a marine technician aboard an oceanographic or survey vessel. (S24093)

MSC 220 - Marine GIS

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to the software and data components of a Geographic Information System. Topics include data collection, management, and analysis, and the creation of marine-based GIS maps. Upon completion, students should be able to use GIS software in marine applications. (S25695)

MSC 254 - Marine Data Processing

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: NET-125 and MSC-152

This course introduces standard oceanographic procedures used to process and analyze oceanographic data. Emphasis is placed on the use of standard recording procedures and computer applications for processing and analyzing oceanographic data. Upon completion, students should be able to record and analyze oceanographic data using standard procedures along with computer-based applications. (S25696)

MSC 256 - Cartogr/Hydro Surveying

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take NET-125 MSC-152 Take MSC-254

Corequisites: MSC-254

This course covers basic surveying and cartography techniques as they apply to marine research. Topics include topographic map and bathymetric chart basics, including symbols, contours, elevations, coordinate systems, and basic survey instruments, modeling, and field projects. Upon completion, students should be able to use topographic and bathymetric maps as a research tool and set up and conduct field surveys. (S11694)

MSC 258 - CAD & Multimedia Display

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One Set: Set 1: CIS-110 and MSC-154 Set 2: CIS-111 and MSC-154

This course introduces and provides experience with a variety of technically oriented digital applications. Emphasis is placed on contemporary visual presentation methods and techniques, as well as on an introduction to plotting, editing, and file management with CAD software. Upon completion, students should be able to produce a computerized technical presentation and informational presentation item, and create cross sections and profiles using CAD software. (S23057)

MSC 276 - Marine Vertebrate Zoo

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course covers the behavior and classification of marine fishes, reptiles, birds, and mammals. Topics include identification, feeding behavior, reproduction, migration, and other marine vertebrate characteristics. Upon completion, students should be able to identify marine vertebrates and demonstrate an understanding of the methods marine vertebrates use to survive in the ocean. (S23394)

MUS 110 - Music Appreciation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a basic survey of the music of the Western world. Emphasis is placed on the elements of music, terminology, composers, form, and style within a historical perspective. Upon completion, students should be able to demonstrate skills in basic listening and understanding of the art of music. UGETC (S13676)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 111 - Fundamentals of Music

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is an introductory course for students with little or no music background. Emphasis is placed on music notation, rhythmic patterns, scales, key signatures, intervals, and chords. Upon completion, students should be able to demonstrate an understanding of the rudiments of music. (S16443)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 112 - Introduction to Jazz

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the origins and musical components of jazz and the contributions of its major artists. Emphasis is placed on the development of discriminating listening habits, as well as the investigation of the styles and structural forms of the jazz idiom. Upon completion, students should be able to demonstrate skills in listening and understanding this form of American music. UGETC (S13646)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 113 - American Music

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces various musical styles, influences, and composers of the United States from pre-Colonial times to the present. Emphasis is placed on the broad variety of music particular to American culture. Upon completion, students should be able to demonstrate skills in basic listening and understanding of American music. (S13699)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 114 - Introduction to World Music

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a basic survey of World Music. Emphasis is placed on non-traditional instruments, sources, and performing practices. Upon completion, students should be able to demonstrate skills in basic listening and understanding of the art of World Music. (S25735)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 121 - Music Theory I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: MUS-125

This course provides an introduction to the musical elements of melody, rhythm, and harmony. Emphasis is placed upon the interaction of these elements through fundamental analysis and an introduction to part writing. Upon completion, students should be able to demonstrate understanding of melodic voice leading, rhythmic functions within simple and compound meters, and simple harmonic progressions. (S25120)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 122 - Music Theory II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-121

Corequisites: MUS-126

This course provides a comprehensive study of diatonic harmony. Emphasis is placed on voice leading tasks, part writing, and analysis using various labeling systems. Upon completion, students should be able to demonstrate harmonic principles through four-voice part writing, recognize and label non-harmonic tones, analyze chords using Roman numerals, figured bass, and lead sheet symbols, and classify small-scale phrase structure and cadence types. (S25121)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 123 - Music Composition

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One: MUS-111 or MUS-121

This course provides a study of elementary forms and traditional approaches to the organization of melody, harmony, rhythm, etc. in musical composition. Emphasis is placed on using musical notation to create new musical works. (S12023)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 125 - Aural Skills I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Corequisites: MUS-121

This course provides an introduction to the fundamentals in aural skills. Emphasis is placed on the study of basic melodies, harmonies, and rhythms through sight singing and ear training. Upon completion, students should be able to identify diatonic intervals, scales, and chords and perform and dictate simple melodies and rhythmic patterns. (S25116)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 126 - Aural Skills II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-125

Corequisites: MUS-122

This course provides a foundation in aural skills. Emphasis is placed on the development of sight singing and ear training skills in diatonic melody, diatonic harmonic progression, and rhythmic patterns. Upon completion, students should be able to fluently read music in treble and bass clefs; utilize any solmization system while sight singing simple diatonic melodies; identify elementary diatonic chord progressions; perform rhythms in simple and compound meters; and dictate diatonic melodic, diatonic harmonic, and advanced rhythmic patterns. (S25117)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 131 - Chorus I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to gain experience singing in a chorus. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. (S14027)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 132 - Chorus II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-131

This course provides a continuation of studies begun in MUS 131. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. (S13988)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 133 - Band I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity for those who play a band instrument to gain experience playing in an ensemble. Emphasis is placed on band techniques and the study and performance of a variety of styles and periods of band literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S14035)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 134 - Band II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-133

This course is a continuation of MUS 133. Emphasis is placed on band techniques and the study and performance of a variety of styles and periods of band literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S14007)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 135 - Jazz Ensemble I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity for those who play an appropriate instrument to gain experience playing in a jazz ensemble. Emphasis is placed on jazz ensemble techniques and the study and performance of a variety of styles of jazz literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S14021)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 136 - Jazz Ensemble II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-135

This course is a continuation of MUS 135. Emphasis is placed on jazz ensemble techniques and the study and performance of a variety of styles and periods of jazz literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S13994)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 137 - Orchestra I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity for those who play an orchestral instrument to gain experience playing in an ensemble. Emphasis is placed on orchestral techniques and the study and performance of a variety of styles and periods of orchestral and string ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S14040)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 138 - Orchestra II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-137

This course is a continuation of MUS 137. Emphasis is placed on orchestral techniques and the study and performance of a variety of styles and periods of orchestral and string ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S14006)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141 - Ensemble I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S13366)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141B - Ensemble I - Brass

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22786)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141J - Ensemble I - Jazz Orchestra

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to

demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23436)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141O - Ensemble I - Orchestra

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23537)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141R - Ensemble I - Rock

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22788)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141S - Ensemble I - Strings

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course

requirement. (L23471)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141W - Ensemble I - Woodwind

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23467)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 141XX - Do Not Use

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 0**

This course provides an opportunity to perform in any combination of instrumental, vocal, or keyboard groups of two or more. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23538)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 142 - Ensemble II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-141

This course is a continuation of MUS 141. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S13271)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 142R - Ensemble II - Rock

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-141

This course is a continuation of MUS 141. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23321)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151 - Class Music I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S13815)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151B - Class Music I - Brass

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22790)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151G - Class Music I - Guitar

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22794)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151P - Class Music I - Piano

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22796)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151S - Class Music I - Saxophone

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23060)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151V - Class Music I - Violin

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23521)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151VO - Class Music I - Voice

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22792)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 151W - Class Music I - Woodwind

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course provides group instruction in skills and techniques of the particular instrument or voice for those with little or no previous experience. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22798)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 152 - Class Music II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-151

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the

exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S13794)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 152G - Class Music II - Guitar

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-151

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23227)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 152P - Class Music II - Piano

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-151

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L22800)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 152R - Class Music II - Rock

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-151

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23323)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 152S - Class Music II - Saxophone

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-151

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23327)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 152V - Class Music II Violin

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-151

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L24188)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 152VO - Class Music II - Voice

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-151

This course is a continuation of MUS 151. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23325)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161 - Applied Music I

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S16445)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161B - Applied Music I - Brass

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L22802)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161G - Applied Music I - Guitar

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L22806)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161J - Applied Music I - Jazz Instrum

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L23448)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161P - Applied Music I - Piano

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L22808)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161S - Applied Music I - Saxophone

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L22812)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161V - Applied Music I-Violin

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and

repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L23519)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161VO - Applied Music I - Voice

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L22804)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 161W - Applied Music I - Woodwind

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides individual instruction in the skills and techniques of the particular instrument or voice. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L22810)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162 - Applied Music II

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S16446)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162B - Applied Music II - Brass

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26597)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162G - Applied Music II - Guitar

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L23217)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162P - Applied Music II - Piano

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L23205)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162T - Applied Music II -Trumpet

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26156)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162V - Applied Music II Violin

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L23875)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162VO - Applied Music II - Voice

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161 Take MUS-161VO

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement as a premajor and/or elective course requirement. (L23319)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 162W - Applied Music II -Woodwind

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-161

This course is a continuation of MUS 161. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26099)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 170 - Business of Music

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic elements of the music business. Topics include copyright law, musical arrangements and abridgements, recording and songwriting contracts, agents and managers, performing rights organizations, and the musician's union. Upon completion, students should be able to demonstrate an understanding of the basic elements of the music business. (S14169)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 173 - Opera Production I

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

This course provides an applied laboratory study of the processes involved in the production of an opera. Topics include fundamental practices, principles, and techniques associated with producing operas of various musical periods with an emphasis on vocal technique. Upon completion, students should be able to participate in an assigned position in a college opera production. (S12842)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 174 - Opera Production II

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-173

This course provides an applied laboratory study of the processes involved in the production of an opera. Topics include fundamental practices, principles, and techniques associated with producing operas of various musical periods with an emphasis on musical/language production. Upon completion, students should be able to participate in an assigned position in a college opera production. (S12761)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 181 - Show Choir I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course provides students the initial training in basic competencies of dance/voice-based performances and to the nuances of preparation for such pop/jazz/theatre performances. Emphasis is placed on the introduction to, and subsequent development of, basic performance skills necessary for choreographed performance. Upon completion, students should be able to demonstrate the foundation competencies necessary to perform the assigned literature in various venues and under various professional conditions. (S20951)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 182 - Show Choir II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MUS-181

This course provides intermediate training in dance/voice-based performances and in the nuances of preparation for such pop/jazz/theatre performances. Emphasis is placed on continued development of skills necessary for professional group choral preparation and performance, as well as effective social interaction with a performance troupe. Upon completion, students should be able to demonstrate the intermediate competencies necessary to perform the assigned literature in various venues and under various professional conditions. (S21139)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 210 - History of Rock Music

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a survey of Rock music from the early 1950's to the present. Emphasis is placed on musical groups, soloists, and styles related to the evolution of this idiom and on related historical and social events. Upon completion, students should be able to identify specific styles and to explain the influence of selected performers within their respective eras. (S20297)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 211 - History of Country Music

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the varied origins of country music and the commercialization of this art form.

Emphasis is placed on historical, sociocultural, and stylistic factors related to country music and musicians. Upon completion, students should be able to identify specific styles and explain the influence of pop culture on the development of country music. (S13954)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 212 - American Musical Theatre

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the origins and development of the musical from Show Boat to the present. Emphasis is placed on the investigation of the structure of the musical and its components through listening and analysis. Upon completion, students should be able to demonstrate skills in listening and understanding this form of American music. (S10054)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 213 - Opera and Musical Theatre

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the origins and development of opera and musical theatre from the works of Claudio Monteverdi to the present. Emphasis is placed on how the structure and components of opera and musicals effect dramaturgy through listening examples and analysis. Upon completion, students should be able to demonstrate analytical and listening skills in understanding both opera and the musical. (S13978)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 214 - Electronic Music I

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to study and explore various electronic instruments and devices. Emphasis is placed on fundamental MIDI applications and implementation, features and application of sequences, sound modules, digital keyboards, and Digital Audio Workstations (DAWs). Upon completion, students should be able to demonstrate proficiency by creation of appropriate musical projects using the equipment and techniques covered. (S25736)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 215 - Electronic Music II

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-214

This course is a continuation of MUS 214. Emphasis is placed on advanced MIDI applications and implementation and continued work with sequencers, sound modules, and digital keyboards. Upon completion, students should be able to demonstrate proficiency by creation of appropriate musical projects using the equipment and techniques covered. (S13959)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 217 - Elementary Conducting

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-111

This course introduces the basic patterns and skills for conducting instrumental and vocal groups. Emphasis is placed on conducting beat patterns, expressive gestures, fermatas, accents, tempos, and rehearsal techniques. Upon completion, students should be able to demonstrate the above skills by conducting vocal and/or instrumental groups. (S13967)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 221 - Music Theory III

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-122

Corequisites: MUS-225

This course provides a comprehensive study of chromatic harmony. Emphasis is placed on advanced voice leading tasks, part writing, and analysis of chord progressions, modulations, and large-scale forms. Upon completion, students should be able to identify, notate, and analyze an array of chromatic chords, recognize the function and movement of chromatic harmonies, identify modulatory procedures, analyze formal structures including, but not limited to, binary, ternary, sonata, and rondo. (S25122)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 222 - Music Theory IV

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-221

Corequisites: MUS-226

This course provides an advanced study of chromatic harmony, scale systems, and an introduction to twentieth-century music. Emphasis is placed on advanced part writing and analysis of chromatic harmony and basic twentieth-century compositional and analytical techniques. Upon completion, students should be able to analyze complex chord progressions, advanced modulations, and elemental serial procedures; build an array of synthetic scales; and identify characteristics of twentieth-century topics including, but not limited to, atonality, serialism, minimalism, indeterminacy, and electronic music. (S25123)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 225 - Aural Skills III

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-126

Corequisites: MUS-221

This course provides advanced aural skills training in diatonicism and basic aural skills training in chromaticism. Emphasis is placed on the development of sight singing and ear training skills in complex rhythmic patterns, diatonic melodies and harmonies, and basic chromaticism. Upon completion, students should be able to utilize any solmization system while sight singing diatonic melodies with functional and non-functional chromaticism, fluently read music in multiple clefs in addition to treble and bass, identify modulations, perform complex rhythmic patterns in various meters, and dictate tonal melodies and harmonies including chromaticism. (S25118)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 226 - Aural Skills IV

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-225

Corequisites: Take MUS-222

This course provides advanced aural skills training in diatonicism and chromaticism. Emphasis is placed on the development of sight singing and ear training skills in chromatic melodies, chromatic harmonies, and complex rhythmic patterns. Upon completion, students should be able to utilize any solmization

system while sight singing melodies containing significant chromaticism; fluently read music in multiple clefs, including treble, bass, alto, and tenor; perform and dictate rhythmic patterns in irregular and changing meters; and dictate diatonic and chromatic melodies and harmonic progressions. (S25119)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 231 - Chorus III

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-132

This course is a continuation of MUS 132. Emphasis is placed on vocal techniques and the study and performance of a variety of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. (S13853)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 232 - Chorus IV

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-231

This course is a continuation of MUS 231. Emphasis is placed on vocal techniques and the study of styles and periods of choral literature. Upon completion, students should be able to demonstrate skills needed to participate in choral singing leading to performance. (S13907)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 233 - Band III

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-134

This course is a continuation of MUS 134. Emphasis is placed on band techniques and the study and performance of a variety of styles and periods of band literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S13863)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 234 - Band IV

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-233

This course is a continuation of MUS 233. Emphasis is placed on band techniques and the study and performance of a variety of styles and periods of band literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (\$13893)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 235 - Jazz Ensemble III

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-136

This course is a continuation of MUS 136. Emphasis is placed on jazz ensemble techniques and the study and performance of a variety of styles and periods of jazz literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (\$13840)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 236 - Jazz Ensemble IV

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-235

This course is a continuation of MUS 235. Emphasis is placed on jazz ensemble techniques and the study and performance of a variety of styles and periods of jazz literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (\$13896)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 237 - Orchestra III

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-138

This course is a continuation of MUS 138. Emphasis is placed on orchestral techniques and the study and performance of a variety of styles and periods of orchestral and string ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing

leading to performance. (S13868)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 238 - Orchestra IV

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-237

This course is a continuation of MUS 237. Emphasis is placed on orchestral techniques and the study and performance of a variety of styles and periods of orchestral and string ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S13878)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 241 - Ensemble III

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-142

This course is a continuation of MUS 142. Emphasis is placed on the development of performance skills and the study of a variety of styles and periods of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S11705)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 242 - Ensemble IV

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-241

This course is a continuation of MUS 241. Emphasis is placed on the development of performance skills and the study of styles of ensemble literature. Upon completion, students should be able to demonstrate skills needed to participate in ensemble playing leading to performance. (S11736)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 251 - Class Music III

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-152

This course is a continuation of MUS 152. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S14199)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 251G - Class Music III - Guitar

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-152

This course is a continuation of MUS 152. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement pre-major and/or elective course requirement. (L23476)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 251P - Class Music III - Piano

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-152

This course is a continuation of MUS 152. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L25428)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 252 - Class Music IV

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take MUS-251

This course is a continuation of MUS 251. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S14260)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 253 - Big Band

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course includes the Big Band instrumentation of five saxes, four trumpets, four trombones, and four-piece rhythm section (bass, piano, drums, and guitar). Emphasis is placed on learning the repertoire specifically written for Big Band instrumentation. Upon completion, students should be able to demonstrate skills needed to participate in performance of Big Band music. (S14231)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 260 - Intro to Music Education

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-121

This course provides an introduction to the music education profession. Emphasis is placed on creating successful music learning environments and the role of the music educator. Upon completion, students should be able to demonstrate knowledge and skills related to the philosophy and methods of teaching music. (S24336)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261 - Applied Music III

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S16449)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261B - Applied Music III -Brass

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26702)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261G - Applied Music III - Guitar

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a premajor and/or elective course requirement. (L23478)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261M - Applied Music III

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26222)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261P - Applied Music III - Piano

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L25429)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261S - Applied Music III - Saxophone

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. This course has been approved to satisfy the Comprehensive Articulation Agreement for transferability as a premajor and/or elective course requirement. (L23480)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261V - Applied Music III - Violin

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L25427)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 261W - Applied Music III

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-162

This course is a continuation of MUS 162. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26223)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 262 - Applied Music IV

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-261

This course is a continuation of MUS 261. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (S16450)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 262G - Applied Music IV Guitar

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-261

This course is a continuation of MUS 261. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L25481)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 262M - Applied Music IV Voice

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-261

This course is a continuation of MUS 261. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26100)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 262P - Applied Music IV -Piano

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-261

This course is a continuation of MUS 261. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26749)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 262V - Applied Music IV Violin

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-261

This course is a continuation of MUS 261. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26421)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 262W - Applied Music IV Woodwind

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take MUS-261

This course is a continuation of MUS 261. Emphasis is placed on techniques and styles and the exploration and study of appropriate literature. Upon completion, students should be able to demonstrate proficiency in the studied skills and repertoire through performance. (L26748)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 265 - Piano Pedagogy

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the basic methods and materials of piano instruction. Emphasis is placed on basic teaching techniques and piano literature appropriate for various skill levels. Upon completion, students should be able to identify and utilize appropriate teaching methods and materials for various levels of piano instruction. (S12624)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 271 - Music History I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-122

This course is the first of a two-semester, in-depth study of music history. Emphasis is placed on the history and literature of music from Antiquity through the Baroque Period. Upon completion, students should be able to trace important musical developments and demonstrate an understanding of the composers' styles. (S13536)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 272 - Music History II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-271

This course is the second of a two-semester, in-depth study of music history. Emphasis is placed on the history and literature of music from the Classical Period to the present. Upon completion, students should be able to trace important musical developments and demonstrate an understanding of the composers' styles. (S13580)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 273 - Opera Production III

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-174

This course provides an applied laboratory study of the processes involved in the production of an opera. Topics include fundamental practices, principles, and techniques associated with producing operas of various musical periods with an emphasis on stagecraft. Upon completion, students should be able to participate in an assigned position in a college opera production. (S11993)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 274 - Opera Production IV

Class: 0 Lab: 9 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-273

This course provides an applied laboratory study of the processes involved in the production of an opera. Topics include fundamental practices, principles, and techniques associated with producing operas of various musical periods with an emphasis on rehearsal and performance techniques. Upon completion, students should be able to participate in an assigned position in a college opera production. (S12029)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 280 - Music for the EI Classrm

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take MUS-110

This course covers the skills necessary for teaching music in the elementary school. Emphasis is placed on integrating music activities which are suitable for all ages of elementary students, including theory, performance, and conducting, into classroom activities. Upon completion, students should be able to utilize a variety of music activities in the elementary school classroom. (S12293)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 281 - Show Choir III

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MUS-182

This course provides advanced training in dance/voice-based performance and in the nuances of preparation for such pop/jazz/theatre performances. Emphasis is placed on development of advanced skills necessary for professional group choral performance and the technical skills necessary for the execution of such performances. Upon completion, students should be able to demonstrate the advanced competencies necessary to perform the assigned literature in various venues and under various professional conditions. (S21140)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 282 - Show Choir IV

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take MUS-281

This course provides advanced training in dance/voice-based pop/jazz/theatre performances and is the capstone course in a four-semester series. Emphasis is placed on refinement of advanced skills necessary for professional group choral performance and the technical skills necessary for the execution of such performances. Upon completion, students should be able to demonstrate a mastery of the skills necessary to plan and perform the assigned literature in various venues and under various professional conditions. (S21141)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

MUS 283 - Varied Cultures/Musical Perf

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take One: MUS-181, MUS-182, MUS-281, or MUS-282 Take MUS-181, MUS-182, MUS-281 and MUS-282

Corequisites: MUS-181, MUS-182, MUS-281 and MUS-282

This course provides an opportunity for music students to experience various musical cultures and to perform in public venues for audiences in these cultures. Emphasis is placed on the development of performance skills and on the musically historical information that characterizes the specific culture. Upon completion, students should be able to identify new culturally-based musical concepts and will have experiences in working with other cultures and in culturally-reflective environments. (S21142)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

NAS 101 - Nurse Aide I

Class: 3 Lab: 4 Clinical: 3 Work: 0 **Credits: 6**

This course includes basic nursing skills required to provide safe, competent personal care for individuals. Emphasis is placed on person-centered care, the aging process, communication, safety/emergencies, infection prevention, legal and ethical issues, vital signs, height and weight measurements, elimination, nutrition, basic restorative care/rehabilitation, dementia, mental health and end-of-life care. Upon completion, students should be able to demonstrate knowledge and skills and be eligible to test for listing on the North Carolina Nurse Aide I Registry. (S24247)

NAS 102 - Nurse Aide II

Class: 3 Lab: 2 Clinical: 6 Work: 0 **Credits: 6**

Prerequisites: Take NAS-101

This course provides training in Nurse Aide II tasks. Emphasis is placed on the role of the Nurse Aide II, sterile technique and specific tasks such as urinary catheterization, wound care, respiratory procedures, ostomy care, peripheral IV assistive activities, and alternative feeding methods. Upon completion, students should be able to demonstrate knowledge and skills and safe performance of skills necessary to be eligible for listing on the North Carolina Nurse Aide II Registry. (S24248)

NAS 103 - Home Health Care Nurse Aide

Class: 4 Lab: 4 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take NAS-101

This course provides advanced training for the currently listed Nurse Aide I enhancing specific skills needed when working in the home care setting. Topics include person-centered care, nutrition, hydration, patient and personal safety, mental health, dementia, behavioral challenges, pain management, palliative care, and stress management. Upon completion, students are eligible for listing as a home care nurse aide with the North Carolina Nurse Aide Registry. (S24249)

NET 110 - Networking Concepts

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to the networking field. Topics include network terminology and protocols, local-area networks, wide-area networks, OSI model, cabling, router programming, Ethernet, IP addressing, and network standards. Upon completion, students should be able to perform tasks related to networking mathematics, terminology, and models, media, Ethernet, subnetting, and TCP/IP Protocols. (S21056)

NET 111 - Internetwork Arch & Design

Class: 2 Lab: 2 Clinical: 0 **Credits: 3**

Prerequisites: Take one: CIS 282 or NET 110

Corequisites: None

This course introduces the physical and logical design of local area networks, wide area networks, and networking devices used in the design implementation and integration. Topics include LAN segmentation, VLANs, IP addressing, router, switch, and server placement with an emphasis on design. Upon completion, students should be able to understand fundamental LAN and WAN design and the physical and logical aspects needed to achieve the design goal. (S21057)

NET 116 - Fund of Voice/Data Cable

Class: 2 Lab: 2 Clinical: 0 **Credits: 3**

Prerequisites: Take one: CIS 110 or CIS 111 or CTS 125

Corequisites: None

This introductory course to voice and data cabling focuses on cabling issues related to data and voice connections. Topics include skills in design documentation, determining cabling equipment, pulling, mounting and managing cable, selecting wiring closets, terminating cable, installing jacks, and testing cable. Upon completion, students should be able to understand of the industry, media and cabling, physical and logical networks, and signal transmission. (S21423)

NET 125 - Introduction to Networks

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the architecture, structure, functions, components, and models of the Internet and computer networks. Topics include introduction to the principles of IP addressing and fundamentals of Ethernet concepts, media, and operations. Upon completion, students should be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. (S24501)

NET 126 - Switching and Routing

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take NET-125

This course covers the architecture, components, and operations of routers and switches in small networks and introduces wireless local area networks (WLAN) and security concepts. Emphasis is placed on configuring and troubleshooting routers and switches for advanced functionality using security best practices and resolving common network issues utilizing both IPv4 and IPv6 protocols. Upon completion, students should be able to configure VLANs and Inter-VLAN routing applying security best practices, troubleshoot inter-VLAN routing on Layer 3 devices, configure redundancy on a switched network using STP and EtherChannel, configure WLANs using a WLC and L2 security best practices and configure IPv4 and IPv6 static routing on routers. (S25758)

NET 225 - Enterprise Networking

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take NET-126

This course is designed to cover the architecture, components, operations, and security to scale for large, complex networks, including wide area network (WAN) technologies. Emphasis is placed on configuring, troubleshooting, and securing enterprise network devices and understanding how application programming interfaces (API) and configuration management tools enable network automation. Upon completion, students should be able to configure link state routing protocols, implement ACLs to filter traffic and secure administrative access, configure NAT services on the router to provide address scalability, explain techniques to provide address scalability and secure remote access for WAN, and explain how automation affects evolving networks. (S25759)

NET 226 - Network Programmability

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course covers the methodologies and tools of modern software development, applied to IT and Network operations. Emphasis is placed on network programming in current network scripting

languages, using GIT and common data formats, deploying applications as containers, using Continuous Integration/Continuous Deployment (CI/CD) pipelines and automating infrastructure using code. Upon completion, students should be able to use basic Python programming and Linux skills, implement a development environment, use software development and design best practices, create a secure API, use current technologies to deploy and secure applications and compare software testing and deployment methods in automation and simulation environments. (S25797)

NOS 110 - Operating Systems Concepts

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110 or CIS-111

Corequisites: CIS-110 CIS-111

This course introduces students to a broad range of operating system concepts, including installation and maintenance. Emphasis is place on operating system concepts, management, maintenance, and resources required. Upon completion of this course, students will have an understanding of OS concepts, installation, management, maintenance, using a variety of operating systems. (S20980)

NOS 130 - Windows Single User

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take one: CET 211 or CTI 130 or NOS 110

Corequisites: None

This course introduces operating system concepts for single-user systems. Topics include hardware management, file and memory management, system configuration/optimization, and utilities. Upon completion, students should be able to perform operating systems functions at the support level in a single-user environment. (S24049)

NOS 230 - Windows Administration I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take NOS-130(S24049);

This course covers the installation and configuration of a Windows Server operating system. Emphasis is placed on the basic configuration of core network services, Active Directory and group policies. Upon completion, students should be able to install and configure a Windows Server operating system. (S24041)

NUC 110 - Nuclear Reactor Systems

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an introduction to nuclear power plants. Topics include the description and function of each major component of the primary and secondary systems. Upon completion, students should be able to demonstrate a working knowledge of major nuclear energy power systems and processes including their application during refueling operations. (S23252)

NUC 120 - Nuclear Reactor Theory

Class: 4 Lab: 0 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take one set: Set 1: Take ENG-111 MAT-121 Set 2: Take ENG-111 MAT-122

This course covers the fundamental operating theory of nuclear reactors used by electric utilities. Topics include nuclear fission, radioactivity, radiation, reactivity effects from control rods, fission products, and the burnable poisons created during reactor steady-state and transient operations. Upon completion, students should be able to demonstrate a working knowledge of the neutron life cycle, reactor kinetics, reactivity coefficients, and the effects from xenon. (S23253)

NUC 130 - Applied NDE-Nuclear

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the principles of nondestructive examination (NDE) of the quality of stainless steel pipe, reactor vessel, and nozzle welds. Topics include practical applications of visual inspection along with dye penetrant, magnetic particle, ultrasonic, and radiographic testing, of acceptable and unacceptable welds. Upon completion, students should be able to select and apply the proper testing method to detect surface and subsurface flaws. (S22454)

NUC 210 - Nuclear Steam Plant Systems

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: nuc-110 Take NUC-120

This course provides the student with detailed knowledge of the secondary systems in a nuclear power plant, their interface with the primary systems, and the operation and control of these components and systems. Topics include steam generators, main steam systems, condensate and feed water systems, main turbines, main generators and support, control systems, and plant auxiliary systems. Upon completion, students should be able to describe nuclear plant secondary systems, functioning of components, the interactions between the systems parts, the interactions between the various secondary systems, and the interactions between the secondary and primary systems and the control of these systems. (S23259)

NUC 220 - Nuclear Primary Plant Systems

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take NUC-120 Take NUC-110

This course provides the student with detailed knowledge of the primary systems in a nuclear power plant and their interface with the secondary systems and the operation and control of these components and systems. Topics include containment systems, radiation protection systems including components and testing devices, primary systems such as the reactor, reactor vessel, reactor coolant, and reactor coolant pumps, system pressure and water level controls, and refueling systems and reactor safety systems. Upon completion, students should be able to describe nuclear plant primary systems, functioning of components, the interactions between the systems parts, the interactions between the various secondary systems, and the interactions between the secondary and primary systems and the control of these systems. (S23262)

NUR 101 - Practical Nursing I

Class: 7 Lab: 6 Clinical: 6 Work: 0 **Credits: 11**

Corequisites: Take PSY-150, BIO-163 or BIO-169

This course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including assessment, clinical decision making, professional behaviors, caring interventions, biophysical and psychosocial concepts, communication, collaboration, teaching/learning, safety, ethical principles, legal issues, informatics, and evidence-based practice. Upon completion, students should be able to provide safe nursing care across the lifespan incorporating the concepts identified in this course. (S24252)

NUR 102 - Practical Nursing II

Class: 7 Lab: 0 Clinical: 9 Work: 0 **Credits: 10**

Prerequisites: Take NUR-101 Take ENG-111 PSY-241

Corequisites: ENG-111 PSY-241

This course is designed to further develop the concepts within the three domains of the individual, nursing, and healthcare. Emphasis is placed on the concepts within each domain including clinical decision making, caring interventions, biophysical and psychosocial concepts, communication, collaboration, teaching and learning, accountability, safety, informatics, and evidence-based practice. Upon completion, students should be able to provide safe nursing care across the lifespan incorporating the concepts identified in this course. (S24253)

NUR 103 - Practical Nursing III

Class: 6 Lab: 0 Clinical: 9 Work: 0 **Credits: 9**

Prerequisites: Take NUR-101

This course is designed to assimilate the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on biophysical and psychosocial concepts, professional behaviors, healthcare systems, health policy, and quality improvement. Upon completion, students should be able to demonstrate the knowledge, skills, and attitudes necessary to provide safe, quality, and individualized entry level nursing care. (S24254)

NUR 107 - LPN Refresher

Class: 9 Lab: 0 Clinical: 9 Work: 0 **Credits: 12**

This refresher course is designed to provide an independent didactic review for the previously licensed practical nurse whose license has lapsed. Emphasis is placed on common medical-surgical conditions and nursing interventions, including mental health principles, pharmacological concepts, and safe clinical practice. Upon completion, students will be eligible to apply for reinstatement of licensure. (S16463)

NUR 107A - Lpn Refresher - Class

Class: 9 Lab: 0 Clinical: 0 Work: 0 **Credits: 9**

This refresher course is designed to provide an independent didactic review for the previously licensed practical nurse whose license has lapsed. Emphasis is placed on common medical-surgical conditions and nursing interventions, including mental health principles, pharmacological concepts, and safe clinical practice. Upon completion, students will be eligible to apply for reinstatement of licensure. This course is restricted to diploma and/or certificate programs. (L23261)

NUR 107B - Lpn Refresher - Clinical

Class: 0 Lab: 0 Clinical: 9 Work: 0 **Credits: 3**

Prerequisites: Take NUR-107A;

This refresher course is designed to provide an independent didactic review for the previously licensed practical nurse whose license has lapsed. Emphasis is placed on common medical-surgical conditions and nursing interventions, including mental health principles, pharmacological concepts, and safe clinical practice. Upon completion, students will be eligible to apply for reinstatement of licensure. This course is restricted to diploma and/or certificate programs. (L23262)

NUR 111 - Intro to Health Concepts

Class: 4 Lab: 6 Clinical: 6 Work: 0 **Credits: 8**

Prerequisites: Take BIO-168 and PSY-150

Corequisites: BIO-168 PSY-150

This course introduces the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts within each domain including medication administration, assessment, nutrition, ethics, interdisciplinary teams, informatics, evidence-based practice, individual-centered care, and quality improvement. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course. (S22213)

NUR 112 - Health-Illness Concepts

Class: 3 Lab: 0 Clinical: 6 Work: 0 **Credits: 5**

Prerequisites: Take NUR-111 Take BIO-168 PSY-150

Corequisites: PSY-241

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of acid-base, metabolism, cellular regulation, oxygenation, infection, stress/coping, health-wellness-illness, communication, caring interventions, managing care, safety, quality improvement, and informatics. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course. (S22212)

NUR 113 - Family Health Concepts

Class: 3 Lab: 0 Clinical: 6 Work: 0 **Credits: 5**

Prerequisites: Take NUR-111 Take NUR-111 PSY-150 BIO-168

Corequisites: BIO-169

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of oxygenation, sexuality, reproduction, grief/loss, mood/affect, behaviors, development, family, health-wellness-illness, communication, caring interventions, managing care, safety, and advocacy. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course. (S22214)

NUR 114 - Holistic Health Concepts

Class: 3 Lab: 0 Clinical: 6 Work: 0 **Credits: 5**

Prerequisites: Take NUR-111 Take NUR-112 Take PSY-241

Corequisites: BIO-169 PSY-241

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of cellular regulation, perfusion, inflammation, sensory perception, stress/coping, mood/affect, cognition, self, violence, health-wellness-

illness, professional behaviors, caring interventions, and safety. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course. (S22215)

NUR 211 - Health Care Concepts

Class: 3 Lab: 0 Clinical: 6 Work: 0 **Credits: 5**

Prerequisites: Take NUR-111 Take NUR-111 NUR-113 Take NUR-114

Corequisites: BIO-175 ENG-111

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of cellular regulation, perfusion, infection, immunity, mobility, comfort, behaviors, health-wellness-illness, clinical decision-making, caring interventions, managing care, and safety. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course. (S22216)

NUR 212 - Health System Concepts

Class: 3 Lab: 0 Clinical: 6 Work: 0 **Credits: 5**

Prerequisites: Take NUR-111 Take NUR-211 Take BIO-175 and ENG-111

Corequisites: BIO-175 ENG-111

This course is designed to further develop the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of grief/loss, violence, health-wellness-illness, collaboration, managing care, safety, advocacy, legal issues, policy, healthcare systems, ethics, accountability, and evidence-based practice. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course (S22217)

NUR 213 - Complex Health Concepts

Class: 4 Lab: 3 Clinical: 15 Work: 0 **Credits: 10**

Prerequisites: Take NUR-111 Take NUR-112, NUR-113, NUR-114, NUR-211 and NUR-212 Take ENG-111 Take ENG-114 or ENG-112

Corequisites: ENG-114 or ENG-112 NUR-112, NUR-113, NUR-114, NUR-211 and NUR-212

This course is designed to assimilate the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of fluid/electrolytes, metabolism, perfusion, mobility, stress/coping, violence, health-wellness-illness, professional behaviors, caring interventions, managing care, healthcare systems, and quality improvement. Upon completion, students should be able to demonstrate the knowledge, skills, and attitudes necessary to provide quality, individualized, entry level nursing care. (S23071)

NUR 214 - Nsg Transition Concepts

Class: 3 Lab: 0 Clinical: 3 Work: 0 **Credits: 4**

This course is designed to introduce concepts within the three domains of the individual, healthcare, and nursing as the LPN transitions to the ADN role. Emphasis is placed on the concepts within each domain including evidenced-based practice, quality improvement, communication, safety, interdisciplinary team, clinical decision-making, informatics, assessment, caring, and health-wellness-illness. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course. (S22443)

NUR 220 - Nursing V

Class: 4 Lab: 3 Clinical: 15 Work: 0 **Credits: 10**

Prerequisites: Take NUR-210

This course provides an expanded knowledge base for delivering nursing care to individuals of various ages. Emphasis is placed on the nurse's role as an independent provider and manager of care for a group of individuals and member of a multidisciplinary team. Upon completion, students should be able to provide comprehensive nursing care to a group of individuals with common complex health alterations. (S10767)

NUR 221 - LPN to ADN Concepts I

Class: 6 Lab: 0 Clinical: 9 Work: 0 **Credits: 9**

This course is designed for the LPN to ADN student to explore the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of safety, perfusion, inflammation, oxygenation, mood/affect, behavior, development, family, health-wellness-illness, sensory perception, stress/coping, cognition, self, violence, and professional behaviors. Upon completion, students should be able to provide safe nursing care incorporating the concepts identified in this course. (S22445)

NUR 223 - LPN to ADN Concepts II

Class: 6 Lab: 0 Clinical: 9 Work: 0 **Credits: 9**

Prerequisites: Take NUR-221

This course is designed for the LPN to ADN student to assimilate the concepts within the three domains of the individual, healthcare, and nursing. Emphasis is placed on the concepts of fluid/electrolytes, metabolism, thermoregulation, oxygenation, tissue integrity, infection, perfusion, mobility, reproduction, sexuality, health-wellness-illness, professional behaviors, accountability, advocacy, and collaboration. Upon completion, students should be able to demonstrate the knowledge, skills, and attitudes necessary to provide quality, individualized, entry-level nursing care. (S22446)

NUT 110 - Nutrition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers basic principles of nutrition and their relationship to human health. Topics include meeting nutritional needs of healthy people, menu modification based on special dietary needs, food habits, and contemporary problems associated with nutrition. Upon completion, students should be able to apply basic nutritional concepts as they relate to health and well being. (S16468)

OMT 156 - Problem-Solving Skills

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a foundation for creating constructive relationships and presents the processes behind problem solving for groups and individuals. Emphasis is placed on building constructive relationships, confronting issues, winning support, and the basic processes of problem solving. Upon completion, students should be able to enhance relationships with others and apply a systematic approach to problem solving. (S12579)

OST 131 - Keyboarding

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers basic keyboarding skills. Emphasis is placed on the touch system, correct techniques, and development of speed and accuracy. Upon completion, students should be able to key at an acceptable speed and accuracy level using the touch system. (S13790)

OST 136 - Word Processing

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CIS-110 or CIS-111

This course is designed to introduce word processing concepts and applications. Topics include preparation of a variety of documents and mastery of specialized software functions. Upon completion, students should be able to work effectively in a computerized word processing environment. (S22144)

OST 148 - Med Ins & Billing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take OST-247 OST-248

This course introduces fundamentals of medical insurance and billing. Emphasis is placed on the medical billing cycle to include third party payers, coding concepts, and form preparation. Upon completion,

students should be able to explain the life cycle of and accurately complete a medical insurance claim. (S24693)

OST 149 - Medical Legal Issues

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the complex legal, moral, and ethical issues involved in providing health-care services. Emphasis is placed on the legal requirements of medical practices; the relationship of physician, patient, and office personnel; professional liabilities; and medical practice liability. Upon completion, students should be able to demonstrate a working knowledge of current medical law and accepted ethical behavior. (S10679)

OST 164 - Office Editing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a comprehensive study of editing skills needed in the workplace. Emphasis is placed on grammar, punctuation, sentence structure, proofreading, and editing. Upon completion, students should be able to use reference materials to compose and edit text. (S24696)

OST 243 - Med Office Simulation

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take OST-148

This course introduces medical systems used to process information in the automated office. Topics include traditional and electronic information resources, storing and retrieving information, and the billing cycle. Upon completion, students should be able to use the computer accurately to schedule, bill, update, and make corrections. (S12315)

OST 247 - Procedure Coding

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: MED-121 or OST-141 Take One Set: MED-121 MED-122 ,Set: OST-141 OST-142

This course provides in-depth coverage of procedural coding. Emphasis is placed on CPT and HCPCS coding systems. Upon completion, students should be able to properly code procedures and services performed in a medical facility. (S24704)

OST 248 - Diagnostic Coding

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: MED-121 or OST-141 Take One Set:,Set: MED-121 MED-122,Set: OST-141 OST-142

This course provides an in-depth study of diagnostic coding. Emphasis is placed on ICD coding system. Upon completion, students should be able to properly code diagnoses in a medical facility. (S24705)

OST 249 - Med Coding Certification Prep

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: OST-247 and OST-248

This course provides instruction that will prepare students to sit for a national coding certification exam. Topics include diagnostic and procedural coding. Upon completion, students should be able to sit for various medical coding certification exams. (S24706)

OST 260 - Adv Coding Methodologies

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: OST-247 and OST-248

This course provides advanced instruction in a variety of emergent methodologies in medical coding. Topics include advanced outpatient coding, inpatient coding, risk adjustment coding, online encoder software, Correct Coding Initiatives (CCI), and advanced record abstraction. Upon completion, students should be able to perform advanced coding in a healthcare facility. (S24668)

OST 280 - Electronic Health Records

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: CIS-110, CIS-111, or OST-137

Corequisites: OST-148

This course focuses on the use of electronic health records in medical documentation and patient management. Emphasis is placed on creating and maintaining patient medical information, scheduling patient appointments, documenting patient encounters, and billing/insurance claim processing. Upon completion, students should be able to perform the required software tasks following a patient visit from start to finish. (S24673)

OST 288 - Medical Office Admin Capstone

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: OST-148 or HMT-210

This course is designed to be a capstone course for the medical office professional and provides a working knowledge of medical office procedures. Emphasis is placed on written and oral communication skills, practice management, electronic health records, medical office procedures, ethics, and professional development. Upon completion, students should be able to demonstrate the skills necessary to manage a medical office. (S24674)

OTA 110 - Fundamentals of OT

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: BIO-165 or BIO-168 Take OTA-120 OTA-140

Corequisites: BIO-165 or BIO-168 OTA-120 OTA-140

This course introduces occupational therapy (OT) theory, practice, philosophy, and principles. Emphasis is placed on providing a basic understanding of the profession as well as beginning to develop interaction and observation skills. Upon completion, students should be able to demonstrate basic understanding of the domain and practice of occupational therapy, practice settings and professional roles, OT terminology, activity analysis, principles, process, philosophies, and frames of reference. (S24624)

OTA 120 - OT Media I

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take OTA-110 Take OTA-140

Corequisites: OTA-110 OTA-140

This course provides training in recognizing the therapeutic value and use of a wide variety of human occupations including basic activities of daily living, instrumental activities of daily living, rest and sleep, education, work, play, leisure, and social participation. Topics include the understanding of different teaching and learning methods and styles, the language of occupational therapy (OT), OT interventions including preparatory methods and tasks, and restorative and compensatory techniques. Upon completion, students should be able to analyze, design, select, and safely perform occupation related activities that would be therapeutic for various populations across the lifespan. (S24625)

OTA 130 - Assessment Skills

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take OTA-110 Take OTA-120 OTA-140 Take OTA-150 OTA-161 OTA-170

Corequisites: OTA-110 OTA-150 OTA-161 OTA-170

This course provides training in appropriate and accurate assessment skills related to sensation, movement, vision, perception, cognition, emotions, and performance of basic activities of daily living

and instrumental activities of daily living. Topics include physical and psychosocial factors affecting performance; and sensory, range of motion, strength, coordination, cognitive, visual-perceptual, self-care, and work-related assessments. Upon completion, students should be able to gather and share data for the purpose of screening and evaluation, administer selected assessments using appropriate procedures and protocols, and articulate the role of the occupational therapy assistant and occupational therapist in the screening and evaluation process. (S24626)

OTA 140 - Professional Skills I

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take OTA-110 Take OTA-120

Corequisites: OTA-110 OTA-120

This course introduces the roles and responsibilities of the occupational therapy assistant (OTA) and the occupational therapist (OT) in occupational therapy practice and facilitates development of professional behaviors and skills. Topics include professional ethics, supervisory roles, responsibilities, and collaborative professional relationships; credentialing, certification, and licensure; documentation, which communicates the need and rationale for occupational therapy services; therapeutic use of self; and professional identity and professional behaviors; and observation skills. Upon completion, students should be able to demonstrate ethical behavior, discriminate between roles and responsibilities of the OTA and OT, and explain acceptable supervision and documentation. (S24628)

OTA 150 - Peds Concepts & Interventions

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-241 and OTA-170 Take OTA-110 OTA-120 OTA-140 Take OTA-130 OTA-161

Corequisites: PSY-241 and OTA-170 OTA-130 OTA-161

This course provides knowledge and skills needed for working with children from birth through adolescence. Topics include review of normal growth and development, habituation of healthy habits/routines, the role of occupational therapy with caregivers/providers, understanding of common conditions and developmental delays; and the role of occupation in assessment, intervention planning and implementation with pediatric populations. Upon completion, students should be able to plan, implement, and modify appropriate interventions with children in their context and environment to promote engagement in occupation. (S24629)

OTA 161 - Fieldwork I-Placement 1

Class: 0 Lab: 0 Clinical: 3 Work: 0 **Credits: 1**

Prerequisites: Take OTA-120 and OTA-140 Take OTA-110 Take OTA-150 OTA-170

Corequisites: OTA-150 OTA-170

This course provides introductory-level clinical training opportunities. Emphasis is placed on observational and basic interactional skills in a setting with a culturally diverse client population. Upon completion, students should be able to use observational and interactional skills to relate effectively with clients under the guidance/direction of fieldwork supervisors. (S24530)

OTA 162 - Fieldwork I-Placement 2

Class: 0 Lab: 0 Clinical: 3 Work: 0 **Credits: 1**

Prerequisites: Take OTA-120 and OTA-140 Take OTA-130 Take OTA-150 OTA-161 OTA-170 Take OTA-220

Corequisites: OTA-130 OTA-220

This course provides introductory-level clinical training opportunities. Emphasis is placed on observational and basic interactional skills in a setting with a culturally diverse client population. Upon completion, students should be able to use observational and interactional skills to relate effectively with clients under the guidance/direction of fieldwork supervisors. (S13445)

OTA 163 - Fieldwork I-Placement 3

Class: 0 Lab: 0 Clinical: 3 Work: 0 **Credits: 1**

Prerequisites: Take OTA-120 and OTA-140 Take OTA-130 Take OTA-220 Take OTA-180, OTA-240 and OTA-250

Corequisites: OTA- 130 OTA-180 OTA-240 OTA-250

This course provides introductory-level clinical training opportunities. Emphasis is placed on observational and basic interactional skills in a setting with a culturally diverse client population. Upon completion, students should be able to use observational and interactional skills to relate effectively with clients under the guidance/direction of fieldwork supervisors. (S13397)

OTA 170 - Physical Conditions

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take OTA-130 Take OTA-110 OTA-120 OTA-140 Take OTA-150 OTA-161

Corequisites: OTA-130 OTA-150 OTA-161

This course is designed to provide knowledge and skills needed for working with individuals experiencing various medical conditions to help them achieve participation in life through engagement in occupation. Topics include medical terminology, common conditions, body functions that change with disease processes, applicable theories and principles, assessment and intervention priorities for commonly treated conditions. Upon completion, students should be able to recognize common symptoms,

prioritize mental, neuromusculoskeletal and movement related functional problems, while providing for patient safety within the patient's context and environment. (S24630)

OTA 180 - Psychosocial Conditions

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-281 Take OTA-130 Take OTA-220 Take OTA-163 OTA-240 OTA-250

Corequisites: OTA-130 OTA-163 OTA-240 OTA-250

This course is designed to provide knowledge and skills needed for working with individuals experiencing various psychosocial conditions to help them achieve participation in life through engagement in occupation. Topics include mental health conditions, applicable theories and principles, symptoms of dysfunction, assessment and treatment of individuals, planning and facilitating therapeutic groups, client safety, therapeutic use of self, and psychosocial aspects of practice. Upon completion, students should be able to effectively plan and conduct individual and group interventions for client conditions related to psychosocial dysfunction while recognizing contexts and environments that may also impact occupational performance. (S24631)

OTA 220 - OT Media II

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take OTA-120 and OTA-130 Take OTA-150 OTA-161 OTA-170 Take OTA-162

Corequisites: OTA-162

This course provides training in appropriate and accurate assessment and intervention skills related to orthotics, prosthetics, assistive devices, assistive technology, client mobility, and Americans with Disabilities Act (ADA) issues. Topics include ergonomics seating and positioning, community mobility, use of physical agent modalities, and technology in occupational therapy intervention. Upon completion, students should be able to demonstrate competency fabricating and utilizing orthotic and assistive devices, understanding ADA guidelines, and using technology for engagement in occupation. (S24632)

OTA 240 - Professional Skills II

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take OTA-140 Take OTA-220 Take OTA-163 OTA-180 OTA-250

Corequisites: OTA-163 OTA-180 OTA-250

This course covers professional development, supervisory relationships, involvement in the profession, and clinic management skills. Topics include clarification of roles and responsibilities, detailed examination of the supervisory process, participation in professional organizations, and the mechanics

of assisting in clinic operations. Upon completion, students should be able to work effectively with a supervisor, plan and implement a professional activity, and perform routine clinic management tasks. (S24633)

OTA 250 - Adult Concepts & Interventions

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-241, OTA-170 and OTA-180 Take OTA-220 Take OTA-163 OTA-240

Corequisites: PSY-241, OTA-170 and OTA-180 OTA-163 OTA-240

This course provides knowledge and skills needed for working with adults through the lifespan. Emphasis is placed on identification and discussion of common changes associated with aging, disabilities and chronic diseases affecting this population, assessments and intervention, including developing healthy habits and routines, and the impact on participation in occupation in various settings. Upon completion, students should be able to plan, implement, and modify appropriate interventions with adults in their context and environment to promote engagement in occupations. (S24634)

OTA 260 - Level II Fieldwork Placement 1

Class: 0 Lab: 0 Clinical: 18 Work: 0 **Credits: 6**

Prerequisites: Take OTA-261

Corequisites: OTA-261

This course provides clinical experience under the direct supervision of experienced occupational therapists or occupational therapy assistant practitioners working in various practice settings. Emphasis is placed on final clinical preparation for entry-level practice in the profession. Upon completion, students should be able to meet all critical competencies for entry-level practice established by the curriculum, AOTA guidelines, and regulatory bodies. (S24635)

OTA 261 - Level II Fieldwork Placement 2

Class: 0 Lab: 0 Clinical: 18 Work: 0 **Credits: 6**

Prerequisites: Take OTA-260

Corequisites: OTA-260

This course provides the final clinical experience under the direct supervision of experienced occupational therapists or occupational therapy assistant practitioners working in various practice settings. Emphasis is placed on final clinical preparation for entry-level practice in the profession. Upon completion, students should be able to meet all critical competencies for entry-level practice established by the curriculum, AOTA guidelines, and regulatory bodies. (S24636)

PAD 151 - Intro to Public Admin

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course includes an overview of the role of the public administrator in government and an examination of the development and implementation of public policy. Topics include public personnel administration and management, decision making, public affairs, ethics, organizational theories, budgetary functions within governmental agencies, and other governmental issues. Upon completion, students should be able to explain the functions of government in society and in the lives of people composing that society. (S24135)

PAD 152 - Ethics in Government

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the ethical issues and problems within the public administration field. Emphasis is placed on building analytical skills, stimulating moral imagination, and recognizing the discretionary power of the administrator's role. Upon completion, students should be able to understand the moral dimensions of public administrative decision making. (S24136)

PAD 251 - Public Finance & Budgeting

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the public finance and budgeting processes used in the allocation of public resources to meet differing public interests. Topics include the political environment, government expenditures, revenues, taxation, budgetary process theories and techniques, and the relation of government finance to the economy. Upon completion, students should be able to recognize impacts of government revenue and expenditure policies and understand the role of budgeting in executing governmental policy. (S24137)

PAD 252 - Public Policy Analysis

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a study of methods and techniques used to determine the effectiveness of public programs. Emphasis is placed on the concept of ecology and environmental impact, informal groups and information networks, and the relationship between public and private sectors. Upon completion, students should be able to analyze case studies with the use of political analysis techniques. (S24138)

PAD 254 - Grant Writing

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the basic techniques of successful grant writing. Topics include concept development, funding sources research, and writing skills relevant to the grants process. Upon completion, students should be able to demonstrate a basic understanding of the grants process. (S11855)

PBT 100 - Phlebotomy Technology

Class: 5 Lab: 2 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take PBT-101 NAS-102

Corequisites: PBT-101

This course provides instruction in the skills needed for the proper collection of blood and other specimens used for diagnostic testing. Emphasis is placed on ethics, legalities, medical terminology, safety and universal precautions, health care delivery systems, patient relations, anatomy and physiology, and specimen collection. Upon completion, students should be able to demonstrate competence in the theoretical comprehension of phlebotomy techniques. (S10532)

PBT 101 - Phlebotomy Practicum

Class: 0 Lab: 0 Clinical: 9 Work: 0 **Credits: 3**

Prerequisites: Take PBT-100 NAS-102

Corequisites: PBT-100

This course provides supervised experience in the performance of venipuncture and microcollection techniques in a clinical facility. Emphasis is placed on patient interaction and application of universal precautions, proper collection techniques, special procedures, specimen handling, and data management. Upon completion, students should be able to safely perform procedures necessary for specimen collections on patients in various health care settings. (S10511)

PCI 162 - Instrumentation Controls

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ELC-111 or ELC-131(S21593);

This course surveys industrial process control instrumentation concepts, devices, and systems. Topics include process control devices and process control applications associated with industrial instrumentation. Upon completion, students should be able to demonstrate a basic understanding of the various industrial process control and instrumentation systems. (S21608)

PCI 262 - Intro to Process Control

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take ELC-131 Take PCI-261

Corequisites: PCI-261

This course introduces process control and related instrumentation devices. Topics include basic process control theory, P&ID diagrams, and calibration methods associated with transducers, transmitters, control valves, and related process devices. Upon completion, students should be able to understand and troubleshoot basic process control devices and systems. (S21611)

PED 110 - Fit and Well for Life

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course is designed to investigate and apply the basic concepts and principles of lifetime physical fitness and other health-related factors. Emphasis is placed on wellness through the study of nutrition, weight control, stress management, and consumer facts on exercise and fitness. Upon completion, students should be able to plan a personal, lifelong fitness program based on individual needs, abilities, and interests. (S11789)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 113 - Aerobics I

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces a program of cardiovascular fitness involving continuous, rhythmic exercise. Emphasis is placed on developing cardiovascular efficiency, strength, and flexibility and on safety precautions. Upon completion, students should be able to select and implement a rhythmic aerobic exercise program. (S11650)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 117 - Weight Training I

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the basics of weight training. Emphasis is placed on developing muscular strength, muscular endurance, and muscle tone. Upon completion, students should be able to establish and implement a personal weight training program. (S11656)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 118 - Weight Training II

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take PED-117

This course covers advanced levels of weight training. Emphasis is placed on meeting individual training goals and addressing weight training needs and interests. Upon completion, students should be able to establish and implement an individualized advanced weight training program. (S11783)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 119 - Circuit Training

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course covers the skills necessary to participate in a developmental fitness program. Emphasis is placed on the circuit training method which involves a series of conditioning timed stations arranged for maximum benefit and variety. Upon completion, students should be able to understand and appreciate the role of circuit training as a means to develop fitness. (S11692)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 120 - Walking for Fitness

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces fitness through walking. Emphasis is placed on stretching, conditioning exercises, proper clothing, fluid needs, and injury prevention. Upon completion, students should be able to participate in a recreational walking program. (S11072)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 122 - Yoga I

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the basic discipline of yoga. Topics include proper breathing, relaxation techniques, and correct body positions. Upon completion, students should be able to demonstrate the procedures of yoga. (S11107)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 123 - Yoga II

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take PED-122

This course introduces more detailed aspects of the discipline of yoga. Topics include breathing and physical postures, relaxation, and mental concentration. Upon completion, students should be able to demonstrate advanced procedures of yoga. (S11044)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 124 - Run, Swim, Cycle

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the sport of the triathlon. Topics include the rules, equipment, and skills necessary for the triathlon. Upon completion, students should be able to participate in a triathlon competition. (S11075)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 125 - Self-Defense: Beginning

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course is designed to aid students in developing rudimentary skills in self-defense. Emphasis is placed on stances, blocks, punches, and kicks as well as non-physical means of self-defense. Upon completion, students should be able to demonstrate basic self-defense techniques of a physical and non-physical nature. (S11023)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 128 - Golf-Beginning

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course emphasizes the fundamentals of golf. Topics include the proper grips, stance, alignment, swings for the short and long game, putting, and the rules and etiquette of golf. Upon completion,

students should be able to perform the basic golf shots and demonstrate a knowledge of the rules and etiquette of golf. (S11067)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 129 - Golf-Intermediate

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take PED-128

This course covers the more advanced phases of golf. Emphasis is placed on refining the fundamental skills and learning more advanced phases of the games such as club selection, trouble shots, and course management. Upon completion, students should be able demonstrate the knowledge and ability to play a recreational round of golf. (S11033)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 130 - Tennis-Beginning

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course emphasizes the fundamentals of tennis. Topics include basic strokes, rules, etiquette, and court play. Upon completion, students should be able to play recreational tennis. (S12680)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 131 - Tennis-Intermediate

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take PED-130

This course emphasizes the refinement of playing skills. Topics include continuing the development of fundamentals, learning advanced serves, and strokes and pace and strategies in singles and doubles play. Upon completion, students should be able to play competitive tennis. (S12604)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 143 - Volleyball-Beginning

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course covers the fundamentals of volleyball. Emphasis is placed on the basics of serving, passing, setting, spiking, blocking, and the rules and etiquette of volleyball. Upon completion, students should be able to participate in recreational volleyball. (S10153)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 145 - Basketball-Beginning

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course covers the fundamentals of basketball. Emphasis is placed on skill development, knowledge of the rules, and basic game strategy. Upon completion, students should be able to participate in recreational basketball. (S10128)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 147 - Soccer

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the basics of soccer. Emphasis is placed on rules, strategies, and fundamental skills. Upon completion, students should be able to participate in recreational soccer. (S10136)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 148 - Softball

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the fundamental skills and rules of softball. Emphasis is placed on proper techniques and strategies for playing softball. Upon completion, students should be able to participate in recreational softball. (S10188)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 149 - Flag Football

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the fundamentals and rules of flag football. Emphasis is placed on proper techniques and strategies for playing in game situations. Upon completion, students should be able to participate in recreational flag football. (S10111)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 154 - Swimming for Fitness

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces lap swimming, aquacises, water activities, and games. Emphasis is placed on increasing cardiovascular efficiency through aquatic exercise. Upon completion, students should be able to develop an individualized aquatic fitness program. (S21455)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 165 - Sport Science As a Career

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take one set: Set 1: DRE-097 Set 2: ENG-002 Set 3: BSP-4002 Set 4: ENG-111

This course provides students with foundational knowledge about the study of physical activity and career opportunities within the discipline. Emphasis will be placed on the role of physical activity, the subdisciplines of the field, and possible career choices. Upon completion, students should have an understanding of the subdisciplines and employment opportunities within an Exercise and Sport Science program. (S25448)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 170 - Backpacking

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course covers the proper techniques for establishing a campsite, navigating in the wilderness, and planning for an overnight trip. Topics include planning for meals, proper use of maps and compass, and packing and dressing for extended periods in the outdoors. Upon completion, students should be able to identify quality backpacking equipment, identify the principles of no-trace camping, and successfully complete a backpacking experience. (S13081)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 172 - Outdoor Living

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course is designed to acquaint the beginning camper with outdoor skills. Topics include camping techniques such as cooking and preserving food, safety, and setting up camp. Upon completion, students should be able to set up camp sites in field experiences using proper procedures. (S13042)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 210 - Team Sports

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the fundamentals of popular American team sports. Emphasis is placed on rules, equipment, and motor skills used in various sports. Upon completion, students should be able to demonstrate knowledge of the sports covered. (S12519)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 211 - New Games

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course includes explanation, demonstration, and participation in games that provide an alternative to traditional sports. Emphasis is placed on playing for pleasure rather than for competitive purposes. Upon completion, students should be able to participate and lead others in participating in non-competitive games. (S12438)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 216 - Indoor Cycling

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course is designed to promote physical fitness through indoor stationary cycling. Emphasis is placed on pedaling techniques, safety procedures, and conditioning exercises necessary for cycling. Upon completion, students should have improved cardiovascular and muscular endurance and be able to

design and participate in a cycling for fitness program. (S20842)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 219 - Disc Golf

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the fundamentals of disc golf. Emphasis is placed on basic throwing techniques, putting, distance driving, scoring, and single and doubles play. Upon completion, students should be able to perform the skills required in playing situations. (S22467)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 233 - Ju-Jitsu

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces martial arts using the ju-jitsu form. Topics include proper conditioning exercises, proper terminology, historical foundations, etiquette, and drills. Upon completion, students should be able to perform skills and techniques related to this form of martial arts. (S20630)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 235 - Tai Chi

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course introduces martial arts using the Tai Chi form. Topics include proper conditioning exercises, proper terminology, historical foundations, etiquette, and drills. Upon completion, students should be able to perform skills and techniques related to this form of martial arts. (S20632)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 252 - Officiating/Bsball/Sfball

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the rules and techniques for sports officiating in baseball and softball. Emphasis is placed on officiating fundamentals and responsibilities. Upon completion, students should be able to

demonstrate proper mechanics and knowledge of officiating procedures in baseball and softball. (S13122)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 254 - Coaching Basketball

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the theory and methods of coaching basketball. Emphasis is placed on rules, game strategies, and selected techniques of coaching basketball. Upon completion, students should be able to demonstrate competent coaching skills in basketball. (S13146)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 256 - Coaching Baseball

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the theory and methods of coaching baseball. Emphasis is placed on rules, game strategies, and selected techniques of coaching baseball. Upon completion, students should be able to demonstrate competent coaching skills in baseball. (S13107)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PED 259 - Prev & Care Ath Injuries

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course provides information on the prevention and care of athletic injuries. Topics include safety devices, taping, therapeutic techniques, and conditioning exercises. Upon completion, students should be able to demonstrate proper preventive measures and skills in caring for athletic injuries. (S13182)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHI 210 - History of Philosophy

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course introduces fundamental philosophical issues through an historical perspective. Emphasis is placed on such figures as Plato, Aristotle, Lao-Tzu, Confucius, Augustine, Aquinas, Descartes, Locke, Kant, Wollstonecraft, Nietzsche, and Sartre. Upon completion, students should be able to identify and distinguish among the key positions of the philosophers studied. (S14081)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHI 215 - Philosophical Issues

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course introduces fundamental issues in philosophy considering the views of classical and contemporary philosophers. Emphasis is placed on knowledge and belief, appearance and reality, determinism and free will, faith and reason, and justice and inequality. Upon completion, students should be able to identify, analyze, and critically evaluate the philosophical components of an issue. UGETC (S24028)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHI 220 - Western Philosophy I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course covers Western intellectual and philosophic thought from the early Greeks through the medievalists. Emphasis is placed on such figures as the pre-Socratics, Plato, Aristotle, Epicurus, Epictetus, Augustine, Suarez, Anselm, and Aquinas. Upon completion, students should be able to trace the development of leading ideas regarding reality, knowledge, reason, and faith. (S13045)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHI 221 - Western Philosophy II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course covers Western intellectual and philosophic thought from post-medievalists through recent thinkers. Emphasis is placed on such figures as Descartes, Spinoza, Leibnitz, Locke, Berkeley, Hume, Kant, Hegel, Marx, Mill, and representatives of pragmatism, logical positivism, and existentialism. Upon

completion, students should be able to trace the development of leading ideas concerning knowledge, reality, science, society, and the limits of reason. (S12988)

PHI 230 - Introduction to Logic

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course introduces basic concepts and techniques for distinguishing between good and bad reasoning. Emphasis is placed on deduction, induction, validity, soundness, syllogisms, truth functions, predicate logic, analogical inference, common fallacies, and scientific methods. Upon completion, students should be able to analyze arguments, distinguish between deductive and inductive arguments, test validity, and appraise inductive reasoning. (S13741)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHI 240 - Introduction to Ethics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course introduces theories about the nature and foundations of moral judgments and applications to contemporary moral issues. Emphasis is placed on moral theories such as consequentialism, deontology, and virtue ethics. Upon completion, students should be able to apply various ethical theories to moral issues such as abortion, capital punishment, poverty, war, terrorism, the treatment of animals, and issues arising from new technologies. UGETC (S24029)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHM 110 - Introduction to Pharmacy

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces pharmacy practice and the technician's role in a variety of pharmacy settings. Topics include medical terminology and abbreviations, drug delivery systems, law and ethics, prescription and medication orders, and the health care system. Upon completion, students should be able to explain the role of pharmacy technicians, read and interpret drug orders, describe quality assurance, and utilize pharmacy references. (S21732)

PHM 111 - Pharmacy Practice I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take PHM-110 and PHM-115 Take PHM-115A and BIO-163

Corequisites: PHM-110 and PHM-115 PHM-115A BIO-163

This course provides instruction in the technical procedures for preparing and dispensing drugs in the hospital and retail settings under supervision of a registered pharmacist. Topics include drug packaging and labeling, out-patient dispensing, hospital dispensing procedures, controlled substance procedures, inventory control, and non-sterile compounding. Upon completion, students should be able to perform basic supervised dispensing techniques in a variety of pharmacy settings. (\$12794)

PHM 115 - Pharmacy Calculations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHM-115A

Corequisites: PHM-115A

This course provides an introduction to the metric, avoirdupois, and apothecary systems of measurement and the calculations used in pharmacy practice. Topics include ratio and proportion, dosage determinations, percentage preparations, reducing and enlarging formulas, dilution and concentration, aliquots, specific gravity and density, and flow rates. Upon completion, students should be able to correctly perform calculations required to properly prepare a medication order. (\$21733)

PHM 115A - Pharmacy Calculations Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take PHM-115 PHM-110 PHM-111 BIO-163

Corequisites: PHM-115 PHM-110 PHM-111 BIO-163

This course provides an opportunity to practice and perform calculations encountered in pharmacy practice. Emphasis is placed on ratio and proportion, dosage calculations, percentage, reduction/enlargement formulas, aliquots, flow rates, and specific gravity/density. Upon completion, students should be able to perform the calculations required to properly prepare a medication order. (\$12969)

PHM 118 - Sterile Products

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take PHM-110 and PHM-111 Take PHM-120 PHM-136

Corequisites: PHM-120 PHM-136

This course provides an introduction to intravenous admixture preparation and other sterile products, including total parenteral nutrition and chemotherapy. Topics include aseptic techniques; facilities, equipment, and supplies utilized in admixture preparation; incompatibility and stability; laminar flow hoods; immunizations and irrigation solutions; and quality assurance. Upon completion, students should be able to describe and demonstrate the steps involved in preparation of intermittent and continuous infusions, total parenteral nutrition, and chemotherapy. (S12780)

PHM 120 - Pharmacology I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHM-110 PHM-111; Take PHM-118 PHM-136

Corequisites: PHM-118 PHM-136

This course introduces the study of the properties, effects, and therapeutic value of the primary agents in the major drug categories. Topics include nutritional products, blood modifiers, hormones, diuretics, cardiovascular agents, respiratory drugs, and gastrointestinal agents. Upon completion, students should be able to place major drugs into correct therapeutic categories and identify indications, side effects, and trade and generic names. (S13587)

PHM 125 - Pharmacology II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHM-120 Take PHM-110 PHM-111 Take PHM-133 PHM-140

Corequisites: PHM-140 PHM-133

This course provides a continuation of the study of the properties, effects, and therapeutic value of the primary agents in the major drug categories. Topics include autonomic and central nervous system agents, anti-inflammatory agents, and anti-infective drugs. Upon completion, students should be able to place major drugs into correct therapeutic categories and identify indications, side effects, and trade and generic names. (S13637)

PHM 133 - Pharmacy Clinical

Class: 0 Lab: 0 Clinical: 9 Work: 0 **Credits: 3**

This course provides an opportunity to work in pharmacy settings under a pharmacist's supervision. Emphasis is placed on effective communication with personnel, developing proper employee attitude, and dispensing of medications. Upon completion, students should be able to demonstrate an understanding of pharmacy operations, utilize references, dispense medications, prepare patient charges, and efficiently operate computers. (S11908)

PHM 135 - Pharmacy Clinical

Class: 0 Lab: 0 Clinical: 15 Work: 0 **Credits: 5**

This course provides an opportunity to work in pharmacy settings under a pharmacist's supervision. Emphasis is placed on effective communication with personnel, developing proper employee attitude, and dispensing of medications. Upon completion, students should be able to demonstrate an understanding of pharmacy operations, utilize references, dispense medications, prepare patient charges, and efficiently operate computers. (S11888)

PHM 136 - Pharmacy Clinical

Class: 0 Lab: 0 Clinical: 18 Work: 0 **Credits: 6**

Prerequisites: Take PHM-110 PHM-111; Take PHM-118 PHM-120

Corequisites: PHM-118 PHM-120

This course provides an opportunity to work in pharmacy settings under a pharmacist's supervision. Emphasis is placed on effective communication with personnel, developing proper employee attitude, and dispensing of medications. Upon completion, students should be able to demonstrate an understanding of pharmacy operations, utilize references, dispense medications, prepare patient charges, and efficiently operate computers. (S11827)

PHM 140 - Trends in Pharmacy

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take PHM-110 PHM-111; Take PHM-125 PHM-133

Corequisites: PHM-125 PHM-133

This course covers the major issues, trends, and concepts in contemporary pharmacy practice. Topics include professional ethics, continuing education, job placement, and the latest developments in pharmacy technician practice. Upon completion, students should be able to demonstrate a basic knowledge of the topics discussed. (S13926)

PHM 150 - Hospital Pharmacy

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course provides an in-depth study of hospital pharmacy practice. Topics include hospital organizational structure, committee functions, utilization of reference works, purchasing and inventory control, drug delivery systems, and intravenous admixture preparation. Upon completion, students should be able to explain hospital organization/committee functions, interpret and enter patient orders, fill unit-dose cassettes, and prepare intravenous admixtures. (S25333)

PHM 155 - Community Pharmacy

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHM-110 PHM-111 PHM-125 and PHM-118

This course covers the operational procedures relating to retail pharmacy. Emphasis is placed on a general knowledge of over-the-counter products, prescription processing, business/inventory management, and specialty patient services. Upon completion, students should be able to provide technical assistance and support to the retail pharmacist. (S13388)

PHM 160 - Pharm Dosage Forms

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHM-125 PHM-118

This course is a study of pharmaceutical dosage forms and considerations in their manufacture. Topics include bioavailability, routes of administration, tablets, capsules, solutions, syrups, suspensions, elixirs, aerosols, transdermals, topicals, ophthalmics, otics, and other dosage forms. Upon completion, students should be able to describe the characteristics of the major dosage forms and explain how these characteristics affect the action of the drug. (S13904)

PHM 165 - Pharmacy Prof Practice

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course provides a general overview of all aspects of pharmacy technician practice. Emphasis is placed on pharmacy law, calculations, compounding, pharmacology, and pharmacy operations. Upon completion, students should be able to demonstrate competence in the areas required for the Pharmacy Technician Certification Examination. (S13870)

PHM 265 - Professional Issues

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHM-165

This course provides a comprehensive discussion of topics common to the practice of the pharmacy technician. Emphasis is placed on application of professional competencies including legal/ethical issues, leadership/management concepts and employability skills. Upon completion, students should be able to demonstrate competence in pharmacy workplace skills and leadership/management roles. (S22262)

PHY 110 - Conceptual Physics

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PHY-110A

Corequisites: PHY-110A

This course provides a conceptually-based exposure to the fundamental principles and processes of the physical world. Topics include basic concepts of motion, forces, energy, heat, electricity, magnetism, and the structure of matter and the universe. Upon completion, students should be able to describe examples and applications of the principles studied. UGETC (S12004)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHY 110A - Conceptual Physics Lab

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take PHY-110

Corequisites: PHY-110

This course is a laboratory for PHY 110. Emphasis is placed on laboratory experiences that enhance materials presented in PHY 110. Upon completion, students should be able to apply the laboratory experiences to the concepts presented in PHY 110. UGETC (S13531)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHY 131 - Physics-Mechanics

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: MAT-121 or MAT-171 Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002,(with minimum grade of P2), RED-090, ENG-095, ENG-011 or,ENG-111

This algebra/trigonometry-based course introduces fundamental physical concepts as applied to engineering technology fields. Topics include systems of units, problem-solving methods, graphical analysis, vectors, motion, forces, Newton's laws of motion, work, energy, power, momentum, and properties of matter. Upon completion, students should be able to apply the principles studied to applications in engineering technology fields. (S23976)

PHY 132 - Physics-Elec & Magnetism

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take PHY-131

This algebra/trigonometry-based course is a study of fundamental physical concepts as applied to engineering technology fields. Topics include systems of units, problem-solving methods, graphical analysis, waves, electricity, magnetism, circuits, transformers, motors, and generators. Upon

completion, students should be able to apply the principles studied to applications in engineering technology fields. (S13247)

PHY 151 - College Physics I

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: MAT-171 or MAT-271

This course uses algebra- and trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include units and measurement, vectors, linear kinematics and dynamics, energy, power, momentum, fluid mechanics, and heat. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. UGETC (S24925)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHY 152 - College Physics II

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take PHY-151

This course uses algebra- and trigonometry-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include electrostatic forces, electric fields, electric potentials, direct-current circuits, magnetostatic forces, magnetic fields, electromagnetic induction, alternating-current circuits, and light. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. UGETC (S11553)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHY 251 - General Physics I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: MAT-271

Corequisites: MAT-272

This course uses calculus-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include units and measurement, vector operations, linear kinematics and dynamics, energy, power, momentum, rotational mechanics, periodic motion, fluid mechanics, and heat. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. UGETC (S12543)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PHY 252 - General Physics II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take All: MAT-272 and PHY-251

This course uses calculus-based mathematical models to introduce the fundamental concepts that describe the physical world. Topics include electrostatic forces, electric fields, electric potentials, direct-current circuits, magnetostatic forces, magnetic fields, electromagnetic induction, alternating-current circuits, and light. Upon completion, students should be able to demonstrate an understanding of the principles involved and display analytical problem-solving ability for the topics covered. UGETC (\$12686)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PLU 110 - Modern Plumbing

Class: 4 Lab: 15 Clinical: 0 Work: 0 **Credits: 9**

This course introduces the tools, equipment, and materials associated with the plumbing industry. Topics include safety, use and care of tools, recognition and assembly of fittings and pipes, and other related topics. Upon completion, students should be able to safely assemble various pipes and fittings in accordance with state code requirements. (\$10579)

PLU 111 - Intro to Basic Plumbing

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces basic plumbing tools, materials, and fixtures. Topics include standard tools, materials, and fixtures used in basic plumbing systems and other related topics. Upon completion, students should be able to demonstrate an understanding of a basic plumbing system. (\$10637)

PLU 120 - Plumbing Applications

Class: 4 Lab: 15 Clinical: 0 Work: 0 **Credits: 9**

This course covers general plumbing layout, fixtures, and water heaters. Topics include drainage, waste and vent pipes, water service and distribution, fixture installation, water heaters, and other related topics. Upon completion, students should be able to safely install common fixtures and systems in compliance with state and local building codes. (\$11704)

PLU 130 - Plumbing Systems

Class: 3 Lab: 9 Clinical: 0 Work: 0 **Credits: 6**

This course covers the maintenance and repair of plumbing lines and fixtures. Emphasis is placed on identifying and diagnosing problems related to water, drain and vent lines, water heaters, and plumbing fixtures. Upon completion, students should be able to identify and diagnose needed repairs to the plumbing system. (S11016)

PLU 140 - Intro to Plumbing Codes

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers plumbing industry codes and regulations. Emphasis is placed on North Carolina regulations and the minimum requirements for plumbing materials and design. Upon completion, students should be able to research and interpret North Carolina plumbing codes. (S12595)

PLU 150 - Plumbing Diagrams

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces sketching diagrams and interpretation of blueprints applicable to the plumbing trades. Emphasis is placed on plumbing plans for domestic and/or commercial buildings. Upon completion, students should be able to sketch plumbing diagrams applicable to the plumbing trades. (S10118)

PLU 160 - Plumbing Estimates

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers techniques for estimating quantities of materials and cost of installation for various types of plumbing systems. Topics include design of systems, codes, material take-offs, pricing, and public relations. Upon completion, students should be able to order materials needed for installation from a designed system. (S12176)

PMT 110 - Intro to Project Mgmt

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take BUS-110

This course introduces project management fundamentals and principles for organizing, planning, implementing, and controlling nonroutine activities to achieve schedule, budget and performance objectives. Topics include project life cycles; work breakdown structures; responsibility matrixes; as well as planning and control methods such as PERT/CPM and Gantt charts. Upon completion, students

should be able to demonstrate knowledge, strategies, and techniques needed to create and execute plans for project development and management. (S22221)

POL 110 - Intro Political Science

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces basic political concepts used by governments and addresses a wide range of political issues. Topics include political theory, ideologies, legitimacy, and sovereignty in democratic and non-democratic systems. Upon completion, students should be able to discuss a variety of issues inherent in all political systems and draw logical conclusions in evaluating these systems. (S13770)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

POL 120 - American Government

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is a study of the origins, development, structure, and functions of American government. Topics include the constitutional framework, federalism, the three branches of government including the bureaucracy, civil rights and liberties, political participation and behavior, and policy process. Upon completion, students should be able to demonstrate an understanding of the basic concepts and participatory processes of the American political system. UGETC (S24030)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

POL 130 - State & Local Government

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course includes state and local political institutions and practices in the context of American federalism. Emphasis is placed on procedural and policy differences as well as political issues in state, regional, and local governments of North Carolina. Upon completion, students should be able to identify and discuss various problems associated with intergovernmental politics and their effect on the community and the individual. (S14316)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

POL 210 - Comparative Government

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a cross-national perspective on the government and politics of contemporary nations such as Great Britain, France, Germany, and Russia. Topics include each country's historical uniqueness, key institutions, attitudes and ideologies, patterns of interaction, and current political problems. Upon completion, students should be able to identify and compare various nations' governmental structures, processes, ideologies, and capacity to resolve major problems. (S14332)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

POL 220 - International Relations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a study of the effects of ideologies, trade, armaments, and alliances on relations among nation-states. Emphasis is placed on regional and global cooperation and conflict, economic development, trade, non-governmental organizations, and international institutions such as the World Court and UN. Upon completion, students should be able to identify and discuss major international relationships, institutions, and problems. (S12877)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

POL 250 - Intro to Political Theory

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to normative political theory and examines basic questions and issues about the nature and purpose of politics. Emphasis is placed on the classical and modern political theories of Plato, Aristotle, Machiavelli, Hobbes, Locke, Rousseau, Mill, and Marx. Upon completion, students should be able to discuss and evaluate normative political theories about the nature and purpose of politics. (S22932)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PST 120 - NCDPS Correct'l Officer Train

Class: 6 Lab: 4 Clinical: 0 Work: 0 **Credits: 8**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is the 160-hour Basic Correctional Officer training course regulated by the NC Criminal Justice Education and Training Standards Commission and required for certification

as a state correctional officer with the NC Department of Public Safety. Official documentation of successful completion of the state-mandated training must be provided and retained on file. *160 Hours Minimum Documented Training Required. (S25267)

PST 123 - NC Sheriffs' Telecom Training

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is the 47-hour Telecommunicator Certification Course regulated by the NC Sheriffs' Education and Training Standards Commission. Official documentation of successful completion of the state-mandated training must be provided and retained on file. *47 Hours Minimum Documented Training Required. (S25268)

PST 124 - Nc Sheriffs' Detent Ofr Train

Class: 6 Lab: 4 Clinical: 0 Work: 0 **Credits: 8**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is the 174-hour Detention Officer Certification Course regulated by the NC Sheriffs' Education and Training Standards Commission and required for certification as a detention officer. Official documentation of successful completion of the state-mandated training must be provided and retained on file. *174 Hours Minimum Documented Training Required. (S25270)

PST 125 - NC Basic Juv Just Ofr Train

Class: 4 Lab: 6 Clinical: 0 Work: 0 **Credits: 7**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. This prior learning source is the 160-hour Basic Juvenile Justice Officer training course regulated by the NC Criminal Justice Education and Training Standards Commission and required for certification as a state juvenile justice officer with the NC Department of Public Safety. Official documentation of successful completion of the state-mandated training must be provided and retained on file. *160 Hours Minimum Documented Training Required. (S25272)

PST 126 - NC Basic Juv Just Counsel Trg

Class: 4 Lab: 6 Clinical: 0 Work: 0 **Credits: 7**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. This prior learning source is the 162-hour Basic Juvenile Court Counselor training course regulated by the NC Criminal Justice Education and Training Standards Commission and required for certification as a state juvenile court counselor with the NC Department of Public Safety. Official

documentation of successful completion of the state-mandated training must be provided and retained on file. *162 Hours Minimum Documented Training Required. (S25273)

PST 127 - NC Basic Probation Ofr Traing

Class: 6 Lab: 6 Clinical: 0 Work: 0 **Credits: 9**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is the 216-hour Basic Probation Officer training course regulated by the NC Criminal Justice Education and Training Standards Commission and required for certification as a state correctional officer with the NC Department of Public Safety. Official documentation of successful completion of the state-mandated training must be provided and retained on file. *216 Hours Minimum Documented Training Required. (S25274)

PST 151 - NC Justice Academy Training

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *16 Hours Minimum Documented Training Required. (S25275)

PST 152 - NC Justice Academy Training

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *48 Hours Minimum Documented Training Required. (S25276)

PST 153 - NC Justice Academy Training

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official

documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *80 Hours Minimum Documented Training Required. (S25277)

PST 154 - NC Justice Academy Training

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *128 Hours Minimum Documented Training Required. (S25278)

PST 155 - NC Justice Academy Training

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *176 Hours Minimum Documented Training Required. (S25279)

PST 156 - NC Justice Academy Training

Class: 2 Lab: 12 Clinical: 0 Work: 0 **Credits: 6**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *224 Hours Minimum Documented Training Required. (S25280)

PST 157 - NC Justice Academy Training

Class: 2 Lab: 15 Clinical: 0 Work: 0 **Credits: 7**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official

documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *272 Hours Minimum Documented Training Required. (S25282)

PST 158 - NC Justice Academy Training

Class: 2 Lab: 18 Clinical: 0 Work: 0 **Credits: 8**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *320 Hours Minimum Documented Training Required. (S25283)

PST 159 - NC Justice Academy Training

Class: 2 Lab: 21 Clinical: 0 Work: 0 **Credits: 9**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Justice Academy-developed training that may be regulated by the NC Criminal Justice Education and Training Standards Commission and the NC Sheriffs' Education and Training Commission in support of law enforcement training in North Carolina. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *368 Hours Minimum Documented Training Required. (S25285)

PST 161 - NC OSFM Training

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Office of State Fire Marshal regulated by the Fire and Rescue Commission under the NC Department of Insurance. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *16 Hours Minimum Documented Training Required. (S25288)

PST 162 - NC OSFM Training

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is NC Office of State Fire Marshal regulated by the Fire and Rescue Commission under the NC Department of Insurance. Official documentation of successful completion of this training must be provided from the training delivery agency and retained on file. *48 Hours Minimum Documented Training Required. (S25289)

PST 163 - NC OSFM Training

PST 181 - NCDPS Unarmed Sec Guard Trg

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. This prior learning source is Unarmed Security Guard training regulated by NCDPS Private

Protection Services. Official documentation of successful completion of the state-mandated training must be provided and retained on file. *16 Hours Minimum Documented Training Required. (S25303)

PST 182 - NCDPS Armed Sec Ofc Inst Trg

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is Armed Security Officer Training Firearms regulated by NCDPS Private Protection Services. Official documentation of successful completion of the state-mandated training must be provided and retained on file. *40 Hours Minimum Documented Training Required. (S25304)

PST 189 - NCDOJ Prof Cert Program

Class: 9 Lab: 0 Clinical: 0 Work: 0 **Credits: 9**

This course is a mechanism for awarding prior learning credit for industry-recognized training and/or credentials. The prior learning source is the Professional Certificate program regulated by NCDOJ. A certificate of completion and associated transcript for the program must be provided and retained on file. (S25306)

PSY 118 - Interpersonal Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: BIO-163 or BIO-169

This course introduces the basic principles of psychology as they relate to personal and professional development. Emphasis is placed on personality traits, communication/leadership styles, effective problem solving, and cultural diversity as they apply to personal and work environments. Upon completion, students should be able to demonstrate an understanding of these principles of psychology as they apply to personal and professional development. (S11025)

PSY 150 - General Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the scientific study of human behavior. Topics include history, methodology, biopsychology, sensation, perception, learning, motivation, cognition, abnormal behavior, personality theory, social psychology, and other relevant topics. Upon completion, students should be able to demonstrate a basic knowledge of the science of psychology. UGETC (S10777)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 211 - Psychology of Adjustment

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course introduces the study of the adjustment process focusing on contemporary challenges individuals must deal with in everyday life. Topics include theories of behavior, career choices, self-understanding, coping mechanisms, human relationships, intimacy, sociocultural factors influencing healthy personal adjustment, and other related topics. Upon completion, students should be able to demonstrate an awareness of the processes of adjustment. (S10085)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 215 - Positive Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course is an overview of the scientific study of human strengths. Topics include resilience, optimism, vital engagement (flow), positive relationships, creativity, wisdom, happiness, empathy, emotional intelligence, and other relevant topics. Upon completion, students should be able to demonstrate an understanding of the psychological factors relevant to enhancing well being. (S22044)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 231 - Forensic Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course introduces students to concepts which unite psychology and the legal system. Topics include defining competency, insanity, involuntary commitment, as well as introducing forensic assessment techniques, such as interviewing process, specialized assessments, and collecting collateral information. Upon completion, students should be able to demonstrate knowledge in areas of forensic psychology: risk assessment, criminal competencies, insanity, psychopathology, and mentally disordered offenders. (S20489)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 237 - Social Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One: PSY-150 or SOC-210

This course introduces the study of individual behavior within social contexts. Topics include affiliation, attitude formation and change, conformity, altruism, aggression, attribution, interpersonal attraction, and group behavior. Upon completion, students should be able to demonstrate an understanding of the basic principles of social influences on behavior. (S10878)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 239 - Psychology of Personality

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course covers major personality theories and personality research methods. Topics include psychoanalytic, behavioristic, social learning, cognitive, humanistic, and trait theories including supporting research. Upon completion, students should be able to compare and contrast traditional and contemporary approaches to the understanding of individual differences in human behavior. (S10904)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 241 - Developmental Psych

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course is a study of human growth and development. Emphasis is placed on major theories and perspectives as they relate to the physical, cognitive, and psychosocial aspects of development from conception to death. Upon completion, students should be able to demonstrate knowledge of development across the life span. (S13114)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 243 - Child Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course provides an overview of physical, cognitive, and psychosocial development from conception through adolescence. Topics include theories and research, interaction of biological and environmental factors, language development, learning and cognitive processes, social relations, and moral development. Upon completion, students should be able to identify typical and atypical childhood behavior patterns as well as appropriate strategies for interacting with children. (S13165)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 246 - Adolescent Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course provides an overview of the behavior patterns, life changes, and social issues that accompany the developmental stage of adolescence. Topics include developmental theories; physical, cognitive and psychosocial growth; transitions to young adulthood; and sociocultural factors that influence adolescent roles in home, school and community. Upon completion, students should be able to identify typical and atypical adolescent behavior patterns as well as appropriate strategies for interacting with adolescents. (S13226)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 249 - Psychology of Aging

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course covers the particular needs and behaviors of the maturing adult. Emphasis is placed on psychosocial processes; biological and intellectual aspects of aging; adjustments to retirement, dying, bereavement; and the stereotypes and misconceptions concerning the elderly. Upon completion, students should be able to show an understanding of the psychological factors related to the aging process. (S13106)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 259 - Human Sexuality

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course provides the biological, psychological, and sociocultural aspects of human sexuality and

related research. Topics include reproductive biology, sexual and psychosexual development, sexual orientation, contraception, sexually transmitted diseases, sexual disorders, theories of sexuality, and related issues. Upon completion, students should be able to demonstrate an overall knowledge and understanding of human sexuality. (S10448)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 263 - Educational Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course examines the application of psychological theories and principles to the educational process and setting. Topics include learning and cognitive theories, achievement motivation, teaching and learning styles, teacher and learner roles, assessment, and developmental issues. Upon completion, students should be able to demonstrate an understanding of the application of psychological theory to educational practice. (S11448)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 265 - Behavioral Modification

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course is an applied study of factors influencing human behavior and strategies for behavioral change. Emphasis is placed on cognitive-behavioral theory, behavioral assessment, practical applications of conditioning techniques, and maintenance of adaptive behavior patterns. Upon completion, students should be able to implement basic learning principles to effect behavioral changes in self and others. (S11424)

PSY 271 - Sports Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course provides an overview of the field of sports and exercise psychology. Topics include concentration, goal setting, arousal level, exercise psychology, mental imagery, confidence, and other issues related to sport and exercise performance. Upon completion, students should be able to demonstrate a knowledge of psychological factors involved in sport and exercise. (S11142)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 275 - Health Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course covers the biopsychosocial dynamics of stress and the maintenance of good health. Topics include enhancing health and well-being, stress management, lifestyle choices and attitudes, the mind-body relationship, nutrition, exercise, and fitness. Upon completion, students should be able to demonstrate an understanding of the psychological factors related to health and well-being. (S11131)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PSY 281 - Abnormal Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take PSY-150

This course provides an examination of the various psychological disorders, as well as theoretical, clinical, and experimental perspectives of the study of psychopathology. Emphasis is placed on terminology, classification, etiology, assessment, and treatment of the major disorders. Upon completion, students should be able to distinguish between normal and abnormal behavior patterns as well as demonstrate knowledge of etiology, symptoms, and therapeutic techniques. (S12906)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

PTE 110 - Pathway to Employ-Construction

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces fundamental employment core skillsets required to effectively enter the construction workforce and/or a registered apprenticeship and may also serve as a component of a pre-apprenticeship. Topics include workplace safety, communication skills, industry overview, tools and equipment, computation and financial literacy, materials, employability skills, personal health, career exploration and pathways including apprenticeship, job preparation and required job skills, and site visits. Upon completion, students should be able to explain how to locate and engage employers, present themselves in a professional manner, perform basic on-the-job skills, pursue necessary job-specific training and/or certification, and enter a construction career with the knowledge required to be successfully employed. (S25628)

PTE 112 - Pathway to Employ-Public Safe

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces fundamental employment core skillsets required to effectively enter the public safety workforce and/or a registered apprenticeship and may also serve as a component of a pre-apprenticeship. Topics include workplace safety, communication skills, industry overview, tools and equipment, computation and financial literacy, employability skills, personal health, career exploration and pathways including apprenticeship, job preparation and required job skills, and site visits. Upon completion, students should be able to explain how to locate and engage employers, present themselves in a professional manner, perform basic on-the-job skills, pursue necessary job-specific training and/or certification, and enter a public safety career with the knowledge required to be successfully employed. (S25630)

RAD 110 - Rad Intro & Patient Care

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the radiography profession and student responsibilities. Emphasis is placed on basic principles of patient care, radiation protection, technical factors, and medical terminology. Upon completion, students should be able to demonstrate basic skills in these areas.

(S25783)

RAD 111 - RAD Procedures I

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

Corequisites: RAD-110 RAD-151

This course provides the knowledge and skills necessary to perform standard radiographic procedures. Emphasis is placed on radiography of the chest, abdomen, extremities, bony thorax and pelvis. Upon completion, students should be able to demonstrate competence in these areas. (S24943)

RAD 112 - RAD Procedures II

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course provides the knowledge and skills necessary to perform standard radiographic procedures. Emphasis is placed on radiography of the skull, spine, and gastrointestinal, biliary, and urinary systems. Upon completion, students should be able to demonstrate competence in these areas.

(S25784)

RAD 113 - RAD Lab Elective

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

This course provides additional laboratory opportunities in radiologic technology. Emphasis is placed on radiographic procedures and manipulation of equipment. Upon completion, students should be able to demonstrate competence in radiographic procedures through laboratory evaluations. (S24959)

RAD 121 - Image Production I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides the basic principles of radiographic image production. Emphasis is placed on image production, x-ray equipment, receptor exposure, and basic imaging quality factors. Upon completion, students should be able to demonstrate an understanding of basic principles of radiographic image production. (S25785)

RAD 122 - Image Production II

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course is designed to continue to develop the concepts and principles in the field of radiologic technology. Emphasis is placed on advanced digital principles and production. Upon completion, students should be able to demonstrate an understanding of advanced principles of digital imaging production. (S25786)

RAD 131 - Radiographic Physics I

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take RAD-121

Corequisites: Take RAD-122 and RAD-171

Restrictions: Restricted to Major 45700

This course introduces the principles of radiation characteristics and production. Emphasis is placed on imaging equipment. Upon completion, students should be able to demonstrate a basic understanding of radiation characteristics and production. (S23864)

RAD 141 - Radiation Safety

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course covers the principles of radiation protection and radiobiology. Topics include the effects of ionizing radiation on body tissues, protective measures for limiting exposure to the patient and

personnel, and radiation monitoring devices. Upon completion, students should be able to demonstrate an understanding of the effects and uses of radiation in diagnostic radiology. (S25787)

RAD 151 - RAD Clinical Ed I

Class: 0 Lab: 0 Clinical: 9 Work: 0 **Credits: 3**

Corequisites: This course introduces patient management and basic radiographic procedures in the clinical setting. Emphasis is placed on mastering positioning of the chest and extremities, manipulating equipment, and applying principles of ALARA. Upon completion, students should be able to demonstrate successful completion of clinical objectives.

(S25788)

RAD 161 - RAD Clinical Ed II

Class: 0 Lab: 0 Clinical: 15 Work: 0 **Credits: 5**

This course provides additional experience in patient management and in more complex radiographic procedures. Emphasis is placed on mastering positioning of the spine, pelvis, head and neck, and thorax and adapting procedures to meet patient variations. Upon completion, students should be able to demonstrate successful completion of clinical objectives. (S25789)

RAD 171 - RAD Clinical Ed III

Class: 0 Lab: 0 Clinical: 9 Work: 0 **Credits: 3**

This course provides experience in patient management specific to advanced radiographic procedures. Emphasis is placed on applying appropriate technical factors to all studies and transitioning to mastering positioning of advanced studies. Upon completion, students should be able to demonstrate successful completion of clinical objectives. (S25790)

RAD 181 - RAD Clinical Elective

Class: 0 Lab: 0 Clinical: 3 Work: 0 **Credits: 1**

This course provides advanced knowledge of clinical applications. Emphasis is placed on enhancing clinical skills. Upon completion, students should be able to successfully complete the clinical course objectives. (S13957)

RAD 182 - RAD Clinical Elective

Class: 0 Lab: 0 Clinical: 6 Work: 0 **Credits: 2**

This course provides advanced knowledge of clinical applications. Emphasis is placed on enhancing clinical skills. Upon completion, students should be able to successfully complete the clinical course objectives. (S13921)

RAD 211 - RAD Procedures III

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides the knowledge and skills necessary to perform standard and specialty radiographic procedures. Emphasis is placed on radiographic specialty procedures, advanced imaging, radiographic pathology and image analysis. Upon completion, students should be able to demonstrate an understanding of these areas. (S25791)

RAD 231 - Image Production III

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course is designed to continue to develop the concepts and principles in the field of radiologic technology. Emphasis is placed on complex imaging production and principles, quality control and quality assurance in the imaging sciences. Upon completion, students should be able to demonstrate an understanding of advanced radiographic equipment and quality control programs. (S25792)

RAD 241 - Radiobiology/Protection

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: RAD-122, RAD-131, and RAD-171 Take RAD-211, RAD-231 and RAD-251

Corequisites: RAD-231

Restrictions: Restricted to Major 45700

This course covers the principles of radiation protection and radiobiology. Topics include the effects of ionizing radiation on body tissues, protective measures for limiting exposure to the patient and personnel, and radiation monitoring devices. Upon completion, students should be able to demonstrate an understanding of the effects and uses of radiation in diagnostic radiology. (S20874)

RAD 245 - Image Analysis

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take All: RAD-211, RAD-231, RAD-241, and RAD-251

Corequisites: Take RAD-261 and RAD-271

Restrictions: Restricted to Major 45700

This course provides an overview of image analysis and introduces methods of quality management. Topics include image evaluation, pathology, quality control, and quality assurance. Upon completion, students should be able to demonstrate a basic knowledge of image analysis and quality management. (S23867)

RAD 251 - RAD Clinical Ed IV

Class: 0 Lab: 0 Clinical: 21 Work: 0 **Credits: 7**

This course provides the opportunity to continue mastering all basic radiographic procedures and to attain experience in advanced areas. Emphasis is placed on equipment operation, pathological recognition, pediatric and geriatric variations, and further awareness of radiation protection requirements. Upon completion, students should be able to demonstrate successful completion of clinical objectives. (S25793)

RAD 261 - RAD Clinical Ed V

Class: 0 Lab: 0 Clinical: 21 Work: 0 **Credits: 7**

This course is designed to enhance expertise in all radiographic procedures, patient management, radiation protection, and image production and evaluation. Emphasis is placed on developing an autonomous approach to the diversity of clinical situations and successfully adapting to those procedures. Upon completion, students should be able to demonstrate successful completion of clinical objectives. (S25794)

RAD 271 - Radiography Capstone

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course provides an opportunity to exhibit problem-solving skills required for certification. Emphasis is placed on critical thinking and integration of didactic and clinical components. Upon completion, students should be able to demonstrate the knowledge required of an entry-level radiographer. (S25795)

RAD 281 - RAD Clinical Elective

Class: 0 Lab: 0 Clinical: 3 Work: 0 **Credits: 1**

Prerequisites: Take RAD-161;

This course provides advanced knowledge of clinical applications. Emphasis is placed on enhancing clinical skills. Upon completion, students should be able to successfully complete the clinical course objectives. (S13793)

REL 110 - World Religions

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces the world's major religious traditions. Topics include Primal religions, Hinduism, Buddhism, Islam, Judaism, and Christianity. Upon completion, students should be able to identify the origins, history, beliefs, and practices of the religions studied. (S13256)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

REL 111 - Eastern Religions

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces the major Asian religious traditions. Topics include Hinduism, Buddhism, Taoism, Confucianism, and Shinto. Upon completion, students should be able to identify the origins, history, beliefs, and practices of the religions studied. (S13358)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

REL 112 - Western Religions

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course introduces the major western religious traditions. Topics include Zoroastrianism, Islam, Judaism, and Christianity. Upon completion, students should be able to identify the origins, history, beliefs, and practices of the religions studied. (S13280)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

REL 211 - Intro to Old Testament

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade

of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course is a survey of the literature of the Hebrews with readings from the law, prophets, and other writings. Emphasis is placed on the use of literary, historical, archeological, and cultural analysis. Upon completion, students should be able to use the tools of critical analysis to read and understand Old Testament literature. (S11707)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

REL 212 - Intro to New Testament

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course is a survey of the literature of first-century Christianity with readings from the gospels, Acts, and the Pauline and pastoral letters. Topics include the literary structure, audience, and religious perspective of the writings, as well as the historical and cultural context of the early Christian community. Upon completion, students should be able to use the tools of critical analysis to read and understand New Testament literature. (S11723)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

REL 221 - Religion in America

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take DRE-098, ENG-002(with minimum grade of P2), BSP-4002 (with minimum grade of P2), RED-090, ENG-095, ENG-011 or ENG-111

This course is an examination of religious beliefs and practice in the United States. Emphasis is placed on mainstream religious traditions and non-traditional religious movements from the Colonial period to the present. Upon completion, students should be able to recognize and appreciate the diversity of religious traditions in America. (S11026)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

RLS 112 - Broker Prelicensing

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

This course provides basic instruction in real estate principles and practices. Topics include law, finance, brokerage, closing, valuation, management, taxation, mathematics, construction, land use, property

insurance, and NC License Law and Commission Rules. Upon completion, students should be able to demonstrate basic knowledge and skills necessary for real estate sales. (S21721)

RLS 113 - Real Estate Mathematics

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course provides basic instruction in business mathematics applicable to real estate situations. Topics include area computations, percentage of profit/loss, bookkeeping and accounting methods, appreciation and depreciation, financial calculations and interest yields, property valuation, insurance, taxes, and commissions. Upon completion, students should be able to demonstrate proficiency in applied real estate mathematics. (S12735)

RLS 121 - Broker Relationships

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take RLS-112

This course provides post-licensing instruction in broker relationships and responsibilities when working with residential sellers and buyers. Topics include agency relationships and duties, agency contracts and disclosure, and the practical aspects of working with residential buyers and sellers. Upon completion, students should be able to demonstrate knowledge and skills necessary to effectively work with residential buyers/sellers according to law and prevailing practices. (S21954)

RLS 122 - Contracts and Closing

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take RLS-112

This course provides post-licensing instruction in broker responsibilities relating to real estate sales contracts, contract procedures, the Real Estate Settlement Procedures Act and closings. Topics include contract law concepts, residential sales contract preparation and procedures, closing procedures and closing statement preparation. Upon completion, students should be able to handle sales contract negotiations, prepare residential sales contracts, assist sellers/buyers prepare for closing and verify closing statements. (S21955)

RLS 123 - Select Real Estate Issues

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take RLS-112

This course provides post-licensing instruction in real estate on selected topics of special importance to licensees. Topics include commercial real estate brokerage, residential property management, land use controls, loan fraud, license law, fair housing, establishing a brokerage firm, and manufactured/modular

homes. Upon completion, students should be able to demonstrate knowledge of commercial real estate brokerage, residential property management, and the other topics addressed in this course. (S21956)

SAB 110 - Substance Abuse Overview

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: HSE-110

This course provides an overview of the core concepts in substance abuse and dependence. Topics include the history of drug use/abuse, effects on societal members, treatment of addiction, and preventive measures. Upon completion, students should be able to demonstrate knowledge of the etiology of drug abuse, addiction, prevention, and treatment. (S13172)

SAB 120 - Intake and Assessment

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course develops processes for establishment of client rapport, elicitation of client information on which therapeutic activities are based, and stimulation of client introspection. Topics include diagnostic criteria, functions of counseling, nonverbal behavior, collaterals and significant others, dual diagnosis, client strengths and weakness, uncooperative clients, and crisis interventions. Upon completion, students should be able to establish communication with clients, recognize disorders, obtain information for counseling, and terminate the counseling process. (S10488)

SAB 125 - SA Case Management

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides case management activities, including record keeping, recovery issues, community resources, and continuum of care. Emphasis is placed on establishing a systematic approach to monitor the treatment plan and maintain quality of life. Upon completion, students should be able to assist clients in the continuum of care as an ongoing recovery process and develop agency networking. (S22453)

SAB 135 - Addictive Process

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course explores the physical, emotional, psychological, and cultural aspects of the addictive process. Emphasis is placed on addictions to food, sex, alcohol, drugs, work, gambling, and relationships. Upon completion, students should be able to identify the effects, prevention strategies, and treatment methods associated with addictive disorders. (S21907)

SAB 137 - Co-Dependency

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the adult child concept and co-dependency as syndromes of the addictive process. Emphasis is placed on treatment and recovery within the context of a paradigm shift which allows the individual to choose a healthy model of life. Upon completion, students should be able to assess levels of co-dependency and associated levels of physical and mental health and develop strategies to enhance health. (S11443)

SAB 210 - Addiction and Recovery Counsel

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides theory and skills acquisition by utilizing intervention strategies designed to obtain therapeutic information, support recovery, and prevent relapse. Topics include counseling individuals and dysfunctional families, screening instruments, counseling techniques and approaches, recovery and relapse, and special populations. Upon completion, students should be able to discuss issues critical to recovery, identify intervention models, and initiate a procedure culminating in cognitive/behavioral change. (S25826)

SAB 215 - Arrest Test and Assess

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course covers the legal and ethical responsibilities of criminal justice, medical, and substance abuse fields in the conviction/treatment process for DWI clients. Emphasis is placed on the legal arrest, chain of custody, and court ordered treatment process for the DWI client. Upon completion, students should be able to understand the multidisciplinary responsibility to bring a DWI client through a successful process of conviction and treatment. (S11281)

SAB 240 - Sab Issues in Client Serv

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces systems of professional standards, values, and issues in substance abuse counseling. Topics include confidentiality, assessment of personal values, professional responsibilities, competencies, and ethics relative to multicultural counseling and research. Upon completion, students should be able to understand and discuss multiple ethical issues applicable to counseling and apply various decision-making models to current issues. (S10303)

SEC 110 - Security Concepts

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the concepts and issues related to securing information systems and the development of policies to implement information security controls. Topics include the historical view of networking and security, security issues, trends, security resources, and the role of policy, people, and processes in information security. Upon completion, students should be able to identify information security risks, create an information security policy, and identify processes to implement and enforce policy. (S23204)

SEC 160 - Security Administration I

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: NET-125 CET-130 SEC-110

This course provides an overview of security administration and fundamentals of designing security architectures. Topics include networking technologies, TCP/IP concepts, protocols, network traffic analysis, monitoring, and security best practices. Upon completion, students should be able to identify normal network traffic using network analysis tools and design basic security defenses. (S24399)

SEC 175 - Perimeter Defense

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SEC-110 NET-125 NET-126

This course introduces the principles of securing networks using routers and firewalls. Topics include networking protocols, threat mitigation, firewall configuration, authentication, authorization, intrusion detection, encryption, IPSec, VPNs, and remote access technologies. Upon completion, students should be able to secure internal networks using router and firewall technologies. (S24507)

SEC 260 - Security Admin II

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SEC-160 Take NET-125 NET-126

This course provides the skills necessary to design and implement information security controls. Topics include advanced networking and TCP/IP concepts, network vulnerability analysis, and monitoring. Upon completion, students should be able to distinguish between normal and anomalous network traffic, identify common network attack patterns, and implement security solutions. (S21115)

SEM 297 - Seminar in _____

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 2**

This course provides an opportunity to explore topics of current interest. Emphasis is placed on the

development of critical listening skills and the presentation of seminar issues. Upon completion, students should be able to critically analyze issues and establish informed opinions. (S20030)

SOC 210 - Introduction to Sociology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the scientific study of human society, culture, and social interactions. Topics include socialization, research methods, diversity and inequality, cooperation and conflict, social change, social institutions, and organizations. Upon completion, students should be able to demonstrate knowledge of sociological concepts as they apply to the interplay among individuals, groups, and societies. UGETC (S11919)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 213 - Sociology of the Family

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the institution of the family and other intimate relationships. Emphasis is placed on mate selection, gender roles, sexuality, communication, power and conflict, parenthood, diverse lifestyles, divorce and remarriage, and economic issues. Upon completion, students should be able to analyze the family as a social institution and the social forces which influence its development and change. (S11798)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 215 - Group Processes

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces group processes and dynamics. Emphasis is placed on small group experiences, roles and relationships within groups, communication, cooperation and conflict resolution, and managing diversity within and among groups. Upon completion, students should be able to demonstrate the knowledge and skills essential to analyze group interaction and to work effectively in a group context. (S11859)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 220 - Social Problems

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an in-depth study of current social problems. Emphasis is placed on causes, consequences, and possible solutions to problems associated with families, schools, workplaces, communities, and the environment. Upon completion, students should be able to recognize, define, analyze, and propose solutions to these problems. (S13948)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 225 - Social Diversity

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides a comparison of diverse roles, interests, opportunities, contributions, and experiences in social life. Topics include race, ethnicity, gender, sexual orientation, class, and religion. Upon completion, students should be able to analyze how cultural and ethnic differences evolve and how they affect personality development, values, and tolerance. (S13923)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 230 - Race and Ethnic Relations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course includes an examination of the various aspects of race and ethnicity and how these lead to different experiences, opportunities, problems, and contributions. Topics include prejudice, discrimination, perceptions, myths, stereotypes, and intergroup relationships. Upon completion, students should be able to identify and analyze relationships among racial and ethnic groups within the larger society. (S13407)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 232 - Social Context of Aging

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of the social implications of the aging process. Emphasis is placed on the roles of older adults within families, work and economics, politics, religion, education, and health care. Upon completion, students should be able to identify and analyze changing perceptions, diverse lifestyles, and social and cultural realities of older adults. (S13373)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 234 - Sociology of Gender

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course examines contemporary roles in society with special emphasis on recent changes. Topics include sex role socialization, myths and stereotypes, gender issues related to family, work, and power. Upon completion, students should be able to analyze modern relationships between men and women. (S13427)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 240 - Social Psychology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course examines the influence of culture and social groups on individual behavior and personality. Emphasis is placed on the process of socialization, communication, conformity, deviance, interpersonal attraction, intimacy, race and ethnicity, small group experiences, and social movements. Upon completion, students should be able to identify and analyze cultural and social forces that influence the individual in a society. (S13849)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 242 - Sociology of Deviance

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of deviant behavior and the processes involved in its definition, causation, prevention, control, and treatment. Topics include theories of causation, social control, delinquency, victimization, criminality, the criminal justice system, punishment, rehabilitation, and restitution. Upon completion, students should be able to identify and analyze issues surrounding the nature and development of social responses to deviance. (S13866)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 244 - Soc of Death & Dying

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course presents sociological perspectives on death and dying. Emphasis is placed on analyzing the different death rates among various groups, races, and societies, as well as various types of death. Upon completion, students should be able to discuss the rituals of death, both cultural and religious, and examine current issues relating to death and dying. (S13843)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 245 - Drugs and Society

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set: Set 1: DRE-098 and SOC-210 Set 2: ENG-002 and SOC-210 Set 3: BSP-4002 and SOC-210 Set 4: ENG-111 and SOC-210

This course covers the impact of drugs on society and human behavior. Emphasis is placed on the construction of a modern social problem from contrasting historical responses to mind-altering substances. Upon completion, students should be able to apply sociological analysis in evaluating drug use as a societal and interpersonal problem. (S25449)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 250 - Sociology of Religion

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course examines religion from a sociological perspective as part and product of human society. Topics include the origins, development, and functions of belief systems; religious organizations; conversion; and interactions with politics, the economy, science, and the class system. Upon completion, students should be able to describe and analyze religious systems. (S11715)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SOC 254 - Rural and Urban Sociology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course applies sociological concepts to a comparative study of major social issues facing contemporary rural and urban America. Emphasis is placed on growth and development patterns, ecological factors, social organizations, social controls, and processes of change. Upon completion, students should be able to illustrate the differences and similarities that exist between urban and rural

environments as they resolve contemporary issues. (S11677)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SON 110 - Intro to Sonography

Class: 1 Lab: 3 Clinical: 3 Work: 0 **Credits: 3**

This course provides an introduction to medical sonography. Topics include applications, sonographic terminology, history, patient care, ethics, and basic skills. Upon completion, students should be able to define professionalism and sonographic applications and perform basic patient care skills and preliminary scanning techniques. (S13282)

SON 111 - Sonographic Physics

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course introduces ultrasound physical principles, bioeffects, and sonographic instrumentation. Topics include sound wave mechanics, transducers, sonographic equipment, Doppler physics, bioeffects, and safety. Upon completion, students should be able to demonstrate knowledge of sound wave mechanics, transducers, sonography equipment, the Doppler effect, bioeffects, and safety. (S23619)

SON 120 - SON Clinical Ed I

Class: 0 Lab: 0 Clinical: 15 Work: 0 **Credits: 5**

Prerequisites: Take SON-110

This course provides active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S10505)

SON 121 - SON Clinical Ed II

Class: 0 Lab: 0 Clinical: 15 Work: 0 **Credits: 5**

Prerequisites: Take SON-120

This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S10547)

SON 130 - Abdominal Sonography I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces abdominal and small parts sonography. Emphasis is placed on the sonographic anatomy of the abdomen and small parts with correlated laboratory exercises. Upon completion, students should be able to recognize and acquire basic abdominal and small parts images. (S11569)

SON 131 - Abdominal Sonography II

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take SON-130

This course covers abdominal and small parts pathology recognizable on sonograms. Emphasis is placed on abnormal sonograms of the abdomen and small parts with correlated sonographic cases. Upon completion, students should be able to recognize abnormal pathological processes in the abdomen and on small parts sonographic examinations. (S11608)

SON 140 - Gynecological Sonography

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take SON-110

This course is designed to relate gynecological anatomy and pathology to sonography. Emphasis is placed on gynecological relational anatomy, endovaginal anatomy, and gynecological pathology. Upon completion, students should be able to recognize normal and abnormal gynecological sonograms. (S10950)

SON 220 - Son Clinical Ed III

Class: 0 Lab: 0 Clinical: 24 Work: 0 **Credits: 8**

Prerequisites: Take SON-121

This course provides continued active participation in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S11100)

SON 221 - SON Clinical Ed IV

Class: 0 Lab: 0 Clinical: 24 Work: 0 **Credits: 8**

Prerequisites: Take SON-220

This course provides continued active participation off campus in clinical sonography. Emphasis is placed on imaging, processing, and technically evaluating sonographic examinations. Upon completion, students should be able to image, process, and evaluate sonographic examinations. (S11048)

SON 225 - Case Studies

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One: SON-110 or CVS-163

This course offers the opportunity to present interesting cases found during clinical education. Emphasis is placed on presentation methods which integrate patient history, laboratory results, and sonographic findings with reference to current literature. Upon completion, students should be able to correlate information necessary for complete presentation of case studies. (S16541)

SON 241 - Obstetrical Sonography I

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take SON-110

This course covers normal obstetrical sonography techniques, the normal fetal environment, and abnormal first trimester pregnancy states. Topics include gestational dating, fetal anatomy, uterine environment, and first trimester complications. Upon completion, students should be able to produce gestational sonograms which document age, evaluate the uterine environment, and recognize first trimester complications. (S10156)

SON 242 - Obstetrical Sonography II

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take SON-241

This course covers second and third trimester obstetrical complications and fetal anomalies. Topics include abnormal fetal anatomy and physiology and complications in the uterine environment. Upon completion, students should be able to identify fetal anomalies, fetal distress states, and uterine pathologies. (S10167)

SON 250 - Vascular Sonography

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take SON-111(S23619);

This course provides an in-depth study of the anatomy and pathology of the vascular system. Topics include peripheral arterial, peripheral venous, and cerebrovascular disease testing. Upon completion, students should be able to identify normal vascular anatomy and recognize pathology of the vascular system. (S23622)

SON 272 - Advanced Pathology

Class: 0 Lab: 3 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take SON-110

This course is designed to concentrate on complex pathological states seen on sonograms. Emphasis is placed on systemic diseases and multi-organ disease states as seen on sonograms. Upon completion, students should be able to research, present, and discuss system diseases presented on sonograms. (S13095)

SON 289 - Sonographic Topics

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take SON-110

This course provides an overview of sonographic topics in preparation for certification examinations. Emphasis is placed on registry preparation. Upon completion, students should be able to demonstrate a comprehensive knowledge of sonography and be prepared for the registry examinations. (S22124)

SPA 111 - Elementary Spanish I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Corequisites: SPA-181

This course introduces the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the development of basic listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written Spanish and demonstrate cultural awareness. (S13047)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 112 - Elementary Spanish II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SPA-111

Corequisites: SPA-182

This course is a continuation of SPA 111 focusing on the fundamental elements of the Spanish language within a cultural context. Emphasis is placed on the progressive development of listening, speaking, reading, and writing skills. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written Spanish and demonstrate further cultural awareness. (S12995)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 120 - Spanish for the Workplace

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course offers applied Spanish for the workplace to facilitate basic communication with people whose native language is Spanish. Emphasis is placed on oral communication and career-specific vocabulary that targets health, business, and/or public service professions. Upon completion, students should be able to communicate at a functional level with native speakers and demonstrate cultural sensitivity. (S13709)

SPA 141 - Culture and Civilization

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an opportunity to explore issues related to the Hispanic world. Topics include historical and current events, geography, and customs. Upon completion, students should be able to identify and discuss selected topics and cultural differences related to the Hispanic world. (S11221)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 151 - Hispanic Literature

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111

This course includes selected readings by Hispanic writers. Topics include fictional and non-fictional works by representative authors from a variety of genres and literary periods. Upon completion, students should be able to analyze and discuss selected texts within relevant cultural and historical contexts. (S12849)

SPA 161 - Cultural Immersion

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SPA-111

This course explores Hispanic culture through intensive study on campus and field experience in a host country or comparable area within the United States. Topics include an overview of linguistic, historical, geographical, sociopolitical, economic, and/or artistic concerns of the area visited. Upon completion, students should be able to exhibit first-hand knowledge of issues pertinent to the host area and demonstrate understanding of cultural differences. (S23680)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 181 - Spanish Lab 1

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take SPA-111

Corequisites: SPA-111

This course provides an opportunity to enhance acquisition of the fundamental elements of the Spanish language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of various supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with grammatical accuracy to spoken and written Spanish and demonstrate cultural awareness. (S13916)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 182 - Spanish Lab 2

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take SPA-111 Take SPA-181

Corequisites: SPA-112

This course provides an opportunity to enhance acquisition of the fundamental elements of the Spanish language. Emphasis is placed on the progressive development of basic listening, speaking, reading, and writing skills through the use of various supplementary learning media and materials. Upon completion, students should be able to comprehend and respond with increasing proficiency to spoken and written Spanish and demonstrate cultural awareness. (S24207)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 211 - Intermediate Spanish I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SPA-112

This course provides a review and expansion of the essential skills of the Spanish language. Emphasis is placed on the study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present,

and future. (S11415)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 212 - Intermediate Spanish II

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SPA-211

This course provides a continuation of SPA 211. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. (S11504)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 215 - Spanish Phonetics/Structure

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to improve the understanding of Spanish phonetics and the structure of the Spanish language. Topics include the structure of the Spanish language, phonology, morphology, and syntax. Upon completion, students should have an understanding of the phonetics and structure of the Spanish language and be able to contrast the structure of the Spanish and English languages. (S13285)

SPA 221 - Spanish Conversation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SPA-212

This course provides an opportunity for intensive communication in spoken Spanish. Emphasis is placed on vocabulary acquisition and interactive communication through the discussion of media materials and authentic texts. Upon completion, students should be able to discuss selected topics, express ideas and opinions clearly, and engage in formal and informal conversations. (S14295)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 231 - Reading and Composition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SPA-212

This course provides an opportunity for intensive reading and composition in Spanish. Emphasis is placed on the use of literary and cultural materials to enhance and expand reading and writing skills. Upon completion, students should be able to demonstrate in writing an in-depth understanding of assigned readings. (S12741)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 281 - Spanish Lab 3

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: TAKE SPA-182

Corequisites: SPA-211

This course provides an opportunity to enhance the review and expansion of the essential skills of the Spanish language. Emphasis is placed on the study of authentic and representative literary and cultural texts through the use of various supplementary learning media and materials. Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future. (S25828)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPA 282 - Spanish Lab 4

Class: 0 Lab: 2 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take SPA-281

Corequisites: SPA-212

This course provides an opportunity to enhance the review and expansion of the essential skills of the Spanish language. Emphasis is placed on the continuing study of authentic and representative literary and cultural texts through the use of various supplementary learning media and materials. Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. (S25829)

This is a college transfer course. Check with your senior institution to ensure the course will be appropriate for your program at that institution.

SPI 113 - Intro. to Spanish Inter.

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take ENG-111;

This course introduces the field of interpreting, interpretation models, cognitive processes associated with interpretation, professional ethical standards, employment opportunities, and working conditions. Topics include specialized jargon, code of ethics, interpreter assessments/qualifications, and protocol associated with various settings. Upon completion, students should be able to explain the rationale for placement of interpreters and apply ethical standards to a variety of working situations. (S12939)

SPI 114 - Ana.Skills Spanish Inter.

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to improve cognitive processes associated with interpreting, listening, short-term memory, semantic equivalence, visual/auditory processing, thought organization and logic. Emphasis is placed on developing skills necessary to generate equivalent messages between Spanish and English. Upon completion, students should be able to consecutively interpret non-technical, interactive messages between Spanish and English. (S12853)

SPI 213 - Review of Grammar

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to review the common elements of Spanish grammar in oral and written form. Emphasis is placed on the fundamental grammatical concepts of the Spanish language. Upon completion, students should be able to demonstrate comprehension and correct usage of specified grammatical concepts in both oral and written form. (S11896)

SPI 214 - Intro. to Translation

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to improve the quality of Spanish to English and English to Spanish translation. Emphasis is placed on the practice of Spanish to English and English to Spanish translation in a variety of prose styles. Upon completion, students should be able to demonstrate the usage and understanding of the processes involved in translating. (S11799)

SPI 221 - Consecutive Interp I

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces skills of consecutive interpretation used by professional interpreters. Topics include memory development, note taking, sight translation and non-verbal communication. Upon completion, students should be able to apply consecutive interpretation techniques in a variety of role-playing situations and settings. (S11731)

SPI 241 - Legal Interpreting I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course is designed for students planning to specialize in legal interpreting in areas such as the courtroom, attorney offices and law enforcement. Emphasis is placed on the development of legal terminology vocabulary and application of legal standards. Upon completion, students should be able to consecutively interpret and provide on-sight translation renderings of basic messages in a variety of legal settings. (S24812)

SPI 243 - Medical Interpreting I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course is designed for students planning to specialize in medical interpreting in settings such as hospitals, physicians' offices and clinics. Emphasis is placed on the development of medical terminology vocabulary through active role-play. Upon completion, students should be able to apply medical interpretation techniques in a variety of medical situations. (S24813)

SPI 245 - Community Interpreting I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to expose students to interpreting in areas such as social services, business and industry. Emphasis is placed on the development of social services, business and industry vocabulary through role-play. Upon completion, students should be able to consecutively interpret basic messages in a variety of social services, business and industry situations. (S12644)

SST 110 - Intro to Sustainability

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course introduces sustainability issues and individual contributions toward environmental sustainability. Topics include management processes needed to maximize renewable/non-renewable energy resources, economics of sustainability, and reduction of environmental impacts. Upon completion, students should be able to discuss sustainability practices and demonstrate an understanding of their effectiveness and impacts. (S22468)

SST 120 - Energy Use Analysis

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the principles of analyzing energy use, energy auditing tools and techniques, conservation techniques, and calculating energy savings. Topics include building system control theory,

calibrating digital controls, energy loss calculations, and applicable conservation techniques. Upon completion, students should be able to demonstrate an understanding of energy use, audits, and controls in the analysis of energy consumption. (S22469)

SST 130 - Modeling Renewable Energy

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces software and other technologies used for modeling renewable energy systems. Topics include renewable energy modeling software applications, data analysis, renewable energy sources, and cost of renewable energy systems. Upon completion, students should be able to use appropriate technology to model the effectiveness of renewable energy systems. (S22470)

SST 140 - Green Bldg & Design Concepts

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course is designed to introduce the student to sustainable building design and construction principles and practices. Topics include sustainable building rating systems and certifications, energy efficiency, indoor environmental quality, sustainable building materials and water use. Upon completion, students should be able to identify the principles and practices of sustainable building design and construction. (S23302)

SST 210 - Issues in Sustainability

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SST-110

This course introduces the long-term impacts and difficulties of applying sustainability concepts in an organization, business, or society. Topics include the application of sustainable technologies and the analysis of affordability, efficiencies, recycling, and small and large-scale design. Upon completion, students should be able to recognize the possible limitations of sustainable technologies and be prepared to reconcile such conflicts. (S22472)

SST 250 - Sustain Capstone Project

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SST-110

This course introduces an integrated team approach to a sustainability topic of interest to students, faculty, or professional community. Topics include problem identification, proposal preparation, conceptual design, and an effective project work schedule. Upon completion, students should be able to integrate the many facets of a topic based on environmental sustainability into a completed project. (S22473)

SUR 110 - Intro to Surg Tech

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take SUR-111 BIO-163 MED-121

Corequisites: SUR-111 BIO-163 MED-121

This course provides a comprehensive study of peri-operative care, patient care concepts, and professional practice concepts within the profession of surgical technology. Topics include: introductory concepts, organizational structure and relationships, legal, ethical and moral issues, medical terminology, pharmacology, anesthesia, wound healing management concepts, and the technological sciences. Upon completion, students should be able to apply theoretical knowledge of the course topics to the practice of surgical technology. (S23183)

SUR 111 - Periop Patient Care

Class: 5 Lab: 6 Clinical: 0 Work: 0 **Credits: 7**

Prerequisites: Take SUR-110

Corequisites: SUR-110

This course provides the surgical technology student the theoretical knowledge required to function in the pre-operative, intra-operative, and post-operative role. Topics include asepsis, disinfection and sterilization, physical environment, instrumentation, equipment, peri-operative patient care, and peri-operative case management. Upon completion, students should be able to apply the principles and practice of the peri-operative team member to the operative environment. (S23184)

SUR 122 - Surgical Procedures I

Class: 5 Lab: 3 Clinical: 0 Work: 0 **Credits: 6**

Prerequisites: Take All: SUR-110 and SUR-111 Take SUR-123

Corequisites: SUR-123

This course provides an introduction to selected basic and intermediate surgical specialties that students are exposed to the first clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies, and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment. (S24471)

SUR 122AB - Surgical Procedures I

Class: 4 Lab: 2 Clinical: 0 Work: 0 **Credits: 4.5**

Prerequisites: Take All: SUR-110 and SUR-111 Take SUR-123AB BIO-163 MED-121

Corequisites: SUR-123AB ENG-111 MED-122

This course provides an introduction to selected basic and intermediate surgical specialties that students are exposed to the first clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies, and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment. (L25743)

SUR 122BB - Surgical Procedures I

Class: 1 Lab: 1 Clinical: 0 Work: 0 **Credits: 1.5**

Prerequisites: Take All: SUR-110 and SUR-111 Take SUR-122AB ENG-111 MED-122

Corequisites: SUR-123BB CIS-110 HUM-115

This course provides an introduction to selected basic and intermediate surgical specialties that students are exposed to the first clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies, and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment. (L25744)

SUR 123 - Sur Clinical Practice I

Class: 0 Lab: 0 Clinical: 21 Work: 0 **Credits: 7**

Prerequisites: Take All: SUR-110 and SUR-111 Take SUR-122

Corequisites: SUR-122

This course provides clinical experience with a variety of perioperative assignments to build upon skills learned in SUR 111. Emphasis is placed on the scrub and circulating roles of the surgical technologist including aseptic technique and basic case preparation for selected surgical procedures. Upon completion, students should be able to prepare, assist with, and dismantle basic surgical cases in both the scrub and circulating roles. (S12656)

SUR 123AB - Sur Clinical Practice I

Class: 0 Lab: 0 Clinical: 10 Work: 0 **Credits: 3.5**

Prerequisites: Take All: SUR-110 and SUR-111 Take SUR-122AB Take SUR-122AB Take BIO-163 MED-121

Corequisites: SUR-122AB

This course provides clinical experience with a variety of perioperative assignments to build upon skills

learned in SUR 111. Emphasis is placed on the scrub and circulating roles of the surgical technologist including aseptic technique and basic case preparation for selected surgical procedures. Upon completion, students should be able to prepare, assist with, and dismantle basic surgical cases in both the scrub and circulating roles. (L25745)

SUR 123BB - Sur Clinical Practice I

Class: 0 Lab: 0 Clinical: 10 Work: 0 **Credits: 3.5**

Prerequisites: Take All: SUR-110 and SUR-111 Take SUR-122BB Take SUR-123AB ENG-111 MED-122 Take HUM-115 CIS-110

Corequisites: SUR-122BB ENG-111 MED-122

This course provides clinical experience with a variety of perioperative assignments to build upon skills learned in SUR 111. Emphasis is placed on the scrub and circulating roles of the surgical technologist including aseptic technique and basic case preparation for selected surgical procedures. Upon completion, students should be able to prepare, assist with, and dismantle basic surgical cases in both the scrub and circulating roles. (L25746)

SUR 134 - Surgical Procedures II

Class: 5 Lab: 0 Clinical: 0 Work: 0 **Credits: 5**

Prerequisites: Take SUR-123 Take SUR-123AB SUR-123BB

Corequisites: SUR-135 BIO-175 MAT-110 OR MAT-143

This course provides a comprehensive study of intermediate and advanced surgical specialties that students are exposed to in the second clinical rotation. Emphasis is placed on related surgical anatomy, pathology, and procedures that enhance theoretical knowledge of patient care, instrumentation, supplies, and equipment. Upon completion, students should be able to correlate, integrate, and apply theoretical knowledge of the course topics to the clinical operative environment. (S24472)

SUR 135 - SUR Clinical Practice II

Class: 0 Lab: 0 Clinical: 12 Work: 0 **Credits: 4**

Prerequisites: Take SUR-123 Take SUR-134 SUR-123AB SUR-123BB

Corequisites: SUR-134

This course provides clinical experience with a variety of perioperative assignments to build skills required for complex perioperative patient care. Emphasis is placed on greater technical skills, critical thinking, speed, efficiency, and autonomy in the operative setting. Upon completion, students should be able to function in the role of an entry-level surgical technologist. (S22703)

SUR 137 - Professional Success Prep

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take SUR-123AB, SUR-123BB, SUR-134, and SUR-135 Take SUR-211 SUR-210 ENG-114 COM-120 PSY-150

Corequisites: SUR-211 SUR-210 ENG-114 COM-120 PSY-150

This course provides employability skills and an overview of theoretical knowledge in preparation for certification. Topics include test-taking strategies, resume preparation, interviewing strategies, communication skills, and teamwork concepts. Upon completion, students should be able to prepare a resume, demonstrate appropriate interview techniques, and identify strengths and weaknesses in preparation for certification. (S24549)

SUR 210 - Adv SUR Clinical Practice

Class: 0 Lab: 0 Clinical: 6 Work: 0 **Credits: 2**

Corequisites: SUR-137

This course is designed to provide individualized experience in advanced practice, education, circulating, and managerial skills. Emphasis is placed on developing and demonstrating proficiency in skills necessary for advanced practice. Upon completion, students should be able to assume leadership roles in a chosen specialty area. (S22704)

SUR 211 - Adv Theoretical Concepts

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

Corequisites: SUR-137

This course covers theoretical knowledge required for extension of the surgical technologist role. Emphasis is placed on advanced practice in complex surgical specialties, educational methodologies, and managerial skills. Upon completion, students should be able to assume leadership roles in a chosen specialty area. (S22705)

SWK 113 - Working With Diversity

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course examines and promotes understanding, sensitivity, awareness, and knowledge of human diversity. Emphasis is placed on professional responsibilities, duties, and skills critical to multicultural human services practice. Upon completion, students should be able to integrate and expand knowledge, skills, and cultural awareness relevant to diverse populations. (S11127)

TDP 110 - Introduction to 3D Printing

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the historical, social and ethical issues, as well as the basic techniques surrounding 3D Printing. Topics include current and historical events, social impact of the technology and basic model creation and manipulation techniques. Upon completion, students should be able to demonstrate an understanding of the major advantages and disadvantages of 3D Printing technology as well as demonstrate an ability to create and print a simple project. (S24064)

TDP 140 - Precision 3D Printing

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TDP-110

This course provides an introduction to precision printing using the basic techniques surrounding 3D Printing. Emphasis is placed on cost-effective production methods and dimensional quality control. Upon completion, students should be able to demonstrate an understanding of three-dimensional precision printing as well as demonstrate an ability to create and print an advanced project. (S24066)

TNE 245 - Netwk Perimeter Security

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces a variety of ways to implement security into network designs and upgrades. Topics include securing the network through the use of access lists, routers, firewalls, Ipchains, and stateful packet filtering. Upon completion, students should be able to demonstrate a variety of techniques to harden the network from outside threats. (S21617)

TNE 255 - Network Servers

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CET-130 or NOS-110 or CTS-220

This course covers the activities and methods required to assure productive and reliable operation of network servers. Topics include planning, installing, configuring, and maintaining servers, including knowledge of server-level hardware implementations, operating systems, data storage subsystems, data recovery, and I/O subsystems. Upon completion, students should be able to configure and maintain a network server. (S21619)

TRF 110 - Intro Turfgrass Cult & ID

Class: 3 Lab: 2 Clinical: 0 Work: 0 **Credits: 4**

This course covers the principles of reproduction, growth development, species characteristics, establishment and maintenance of golf courses and sports fields, and lawns. Topics include principles of reproduction, growth development, species characteristics, establishment and maintenance of golf courses and sports fields, and lawn applications. Upon completion, students should be able to identify turfgrass species and develop an establishment and maintenance plan for high quality turf areas in accordance with sustainable practices. (S23406)

TRN 110 - Intro to Transport Tech

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course covers workplace safety, hazardous materials, environmental regulations, hand tools, service information, basic concepts, vehicle systems, and common transportation industry terminology. Topics include familiarization with major vehicle systems, proper use of various hand and power tools, material safety data sheets, and personal protective equipment. Upon completion, students should be able to demonstrate appropriate safety procedures, identify and use basic shop tools, and describe government regulations regarding transportation repair facilities. (S23455)

TRN 120 - Basic Transp Electricity

Class: 4 Lab: 3 Clinical: 0 Work: 0 **Credits: 5**

This course covers basic electrical theory, wiring diagrams, test equipment, and diagnosis, repair and replacement of batteries, starters, and alternators. Topics include Ohm's Law, circuit construction, wiring diagrams, circuit testing, and basic troubleshooting. Upon completion, students should be able to properly use wiring diagrams, diagnose, test, and repair basic wiring, battery, starting, charging, and electrical concerns. (S23456)

TRN 130 - Intro to Sustainable Transp

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides an overview of alternative fuels and alternative fuel vehicles. Topics include composition and use of alternative fuels including compressed natural gas, biodiesel, ethanol, hydrogen, and synthetic fuels, hybrid/electric, and vehicles using alternative fuels. Upon completion, students should be able to identify alternative fuel vehicles, explain how each alternative fuel delivery system operates, and perform minor repairs. (S23458)

TRN 140 - Transp Climate Control

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take TRN-140A

Corequisites: TRN-140A

This course covers the theory of refrigeration and heating, electrical/electronic/pneumatic controls, and diagnosis and repair of climate control systems. Topics include diagnosis and repair of climate control components and systems, recovery/recycling of refrigerants, and safety and environmental regulations. Upon completion, students should be able to diagnose and repair vehicle climate control systems. (S23460)

TRN 140A - Transp Climate Cont Lab

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take TRN-140

Corequisites: TRN-140

This course provides experiences for enhancing student skills in the diagnosis and repair of transportation climate control systems. Emphasis is placed on reclaiming, recovery, recharging, leak detection, climate control components, diagnosis, air conditioning equipment, tools and safety. Upon completion, students should be able to describe the operation, diagnose, and safely service climate control systems using appropriate tools, equipment, and service information. (S23461)

TRN 145 - Adv Transp Electronics

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take TRN-120

This course covers advanced transportation electronic systems including programmable logic controllers, on-board data networks, telematics, high voltage systems, navigation, collision avoidance systems and electronic accessories. Topics include interpretation of wiring schematics, reprogramming PLC's, diagnosing and testing data networks and other electronic concerns. Upon completion, students should be able to reprogram PLC's, diagnose and test data networks and other electronic concerns, and work safely with high voltage systems. (S23462)

TRN 180 - Basic Welding for Transp

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

This course covers the terms and procedures for welding various metals used in the transportation industry with an emphasis on personal safety and environmental health. Topics include safety and precautionary measures, setup/operation of MIG equipment, metal identification methods, types of welds/joints, techniques, inspection methods, cutting processes and other related issues. Upon completion, students should be able to demonstrate a basic knowledge of welding operations and safety procedures according to industry standard (S23464)

TRP 100 - Truck Driver Training

Class: 6 Lab: 18 Clinical: 0 Work: 0 **Credits: 12**

This course provides training in inspecting and driving tractor trailers and assuming driver responsibilities on the road and at pickup and delivery points. Emphasis is placed on defensive driving, federal motor carrier safety regulations, trip planning, cargo handling, vehicle systems, hours of service, and accident prevention. Upon completion, students should be able to demonstrate the skills required for the commercial driver's license and employment. (S14087)

UAS 110 - Intro to UAS Operations

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides an introduction to the history, various technologies, and capabilities of unmanned aircraft systems (UAS). Topics include UAS history, operational design and capabilities, popular applications, and the science of flight. Upon completion, students should be able to identify and explain common aspects of unmanned aircraft systems including their historical development, commonly utilized technologies, applications, and unit flight capabilities. (S24340)

UAS 111 - Unmanned Aircraft Systems

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course provides students with the various products and technologies commonly associated with unmanned aircraft systems utilized by hobbyists, government, industry, and the military. Topics include data acquisition, operations and the various technologies associated with unmanned flight. Upon completion, students should be able to demonstrate an understanding of flight control operations including programming telemetry and data acquisition. (S24341)

UAS 115 - Small UAS Certification

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course prepares learners for small Unmanned Aircraft Systems (UAS) flight certification to promote compliance with the requirements of Title 14 of the Code of Federal Regulations (14 CFR). Topics include FAA Title 14 CFR Part 107 study guide and NCDOT UAS flight standards to provide guidance in the areas of remote pilot certification, aircraft registration and marking, aircraft airworthiness, basic piloting skills, and the operation of small UAS. Upon completion, students should be able to meet requirements for small UAS certification through the NCDOT and perform basic small UAS piloting in accordance with FAA Title 14 CFR Part 107 regulations. (S25091)

VET 110 - Animal Breeds and Husbandry

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course provides a study of the individual breed characteristics and management techniques of the canine, feline, equine, bovine, porcine, ovine, caprine, and laboratory animals. Topics include physiological data, animal health management, and basic care and handling of animals. Upon completion, students should be able to identify breeds of domestic and laboratory animals, list physiological data, and outline basic care, handling, and management techniques. (S12169)

VET 114 - Intro to Vet Med Tech

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course introduces the standard operating procedures and responsibilities of veterinary medical technology departments, common zoonotic diseases, safety and ethical issues, and USDA/DEA/OSHA regulations/compliance. Emphasis is placed on standard operating procedures, zoonotic diseases, safety and ethical issues, and the importance of USDA/DEA/OSHA regulations and compliance. Upon completion, students should be able to perform duties assigned in veterinary medical technology, recognize potential zoonotic diseases, and establish safety protocols/regulatory compliance. (S12151)

VET 120 - Vet Anatomy & Physiology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course covers the structure and function of the animal body with emphasis on the similarities and differences among domestic animals. Emphasis is placed on the structure and function of the major physiological systems of domestic, laboratory, and zoo animals. Upon completion, students should be able to identify relevant anatomical structure and describe basic physiological processes for the major body systems. (S14046)

VET 121 - Veterinary Medical Terminology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the basic medical terminology required for veterinary technicians. Topics include the pronunciation, spelling and definition of word parts and vocabulary terms unique to the anatomy, clinical pathology, and treatment of animals. Upon completion, students should be able to demonstrate knowledge and understanding of basic medical terms as they relate to veterinary medicine. (S20429)

VET 122 - Veterinary Zoology

Class: 3 Lab: 3 Clinical: 0 Work: 0 **Credits: 4**

This course introduces basic concepts and principles of biology including cell structure, metabolism, genetics, evolution, and ecology. Topics include anatomy and physiology, phylogeny, and taxonomy of the animal kingdom. Upon completion, students should be able to explain basic life processes and identify evolutionary relationships among members of the animal kingdom. (S14058)

VET 123 - Veterinary Parasitology

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course covers the common internal and external parasites of companion animals, livestock, selected zoo animals, and wild animals. Emphasis is placed on laboratory diagnosis of the most common forms of the parasite through fecal, urine, skin, and blood exams. Upon completion, students should be able to identify common parasites and discuss life-cycles, treatment and prevention strategies, and public health aspects of veterinary parasitology. (S14060)

VET 125 - Veterinary Diseases I

Class: 2 Lab: 0 Clinical: 0 Work: 0 **Credits: 2**

This course introduces basic immunology, fundamentals of disease processes including inflammation, and common infectious diseases of animals and their prevention through immunization. Topics include fundamental disease processes, principles of medical therapy, immunologic processes, infections and zoonotic diseases of domestic animals, and prevention of disease. Upon completion, students should be able to describe basic disease and immunological processes, recognize infections and zoonotic diseases, and discuss prevention strategies. (S14075)

VET 126 - Veterinary Diseases II

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

Prerequisites: Take VET-125

This course is the study of basic disease processes and fundamentals of pathology, and other selected topics of veterinary medicine. Topics include histopathology, pathologic changes associated with common diseases of animals, necropsy procedures, and specimen handling. Upon completion, students should be able to describe basic pathologic changes associated with disease, recognize histopathologic changes, and properly perform collection and submission of necropsy specimens. (S14050)

VET 131 - Vet Lab Techniques I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take VET-123 Take VET-133

Corequisites: VET-133

This course includes the fundamental study of hematology, hemostasis, and urinalysis. Emphasis is placed on basic hematology and urinalysis techniques, manual skill development, instrumentation, quality control, and applications to veterinary science. Upon completion, students should be able to perform manual and automated CBCs, hemostatic assays, and complete urinalyses and maintain laboratory equipment and quality control. (S13057)

VET 133 - Vet Clinical Practice I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take VET-120

Corequisites: VET-120

This course introduces basic practices and techniques of the veterinary clinic and biomedical research fields for dogs, cats, and laboratory animals. Topics include physical exam, husbandry, housing, sanitation, restraint and handling, administration of medications, anesthesia and euthanasia techniques, grooming, and dentistry. Upon completion, students should be able to properly restrain, medicate, examine, groom, and maintain each of the species studied. (S13076)

VET 137 - Vet Office Practices

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course is designed to teach basic administrative techniques, client communication skills, and regulations pertaining to veterinary medicine. Topics include record keeping, telephone techniques, professional liability, office procedures, state and national regulatory laws, human relations, and animal welfare. Upon completion, students should be able to demonstrate effective communication techniques, office procedures, and knowledge of regulatory laws and issues relating to animal welfare. (S12146)

VET 211 - Vet Lab Techniques II

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take VET-131 Take VET-213

Corequisites: VET-213

This course covers advanced hematology, serology, immunology, and clinical chemistry. Topics include advanced hematologic, serologic, and immunologic test procedures: manual and automated clinical chemistry procedures: laboratory safety: and quality control. Upon completion, students should be able to collect, prepare, and analyze serum and plasma samples and outline quality control and safety procedures. (S13112)

VET 212 - Vet Lab Techniques III

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take VET-211 Take VET-214

Corequisites: VET-214

This course introduces the basic principles of microbiology, histology, and cytology. Emphasis is placed on collection of microbiological samples for culture and sensitivity and collection and preparation of samples for histological and cytological examination. Upon completion, students should be able to perform microbiological culture and sensitivity and evaluate cytology and histology specimens. (S13216)

VET 213 - Vet Clinical Practice II

Class: 1 Lab: 9 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take VET-133

This course covers basic radiography, anesthesia techniques, dentistry, sample collection and handling, surgical assistance and instrumentation, sterile techniques, and patient record keeping. Topics include basic radiography, injectable and gas anesthesia, dentistry, instrument identification and care, sterile surgical technique, specimen collection and processing, and maintenance of patient records. Upon completion, students should be able to take and process radiographs, administer and monitor anesthesia, assist in surgical procedures, collect specimens, and maintain surgical records. (S13159)

VET 214 - Vet Clinical Practice III

Class: 1 Lab: 9 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take VET-213

This course covers advanced anesthetic techniques, special radiographic techniques, advanced dentistry, sample collection and processing, bandaging, and emergency and critical care procedures. Topics include induction and maintenance of anesthesia, radiographic contrast studies, advanced dentistry, external coaptation, intensive care procedures, and advanced sample collection techniques. Upon completion, students should be able to demonstrate proficiency in sample collection, radiology, anesthesia, critical care and emergency procedures, and dentistry. (S13177)

VET 215 - Veterinary Pharmacology

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take One Set:,Set 1: CHM-130 and CHM-130A,Set 2: CHM-151 Take VET-213

Corequisites: VET-213

This course introduces drugs and other substances utilized in veterinary medicine. Emphasis is placed on drug classification and methods of action, administration, effects and side effects, storing and handling of drugs, and dosage calculations. Upon completion, students should be able to properly calculate and administer medications, recognize adverse reactions, and maintain pharmaceutical inventory and administration records. (S21571)

VET 217 - Large Animal Clin Pract

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take VET-120 Take VET-213

Corequisites: VET-213

This course covers topics relevant to the medical and surgical techniques for the common domestic large animal species. Topics include physical exam, restraint, sample collection, bandaging, emergency treatment, surgical and obstetrical procedures and instruments, herd health, and lameness topics. Upon completion, students should be able to safely perform restraint, examination, and sample collection; assist surgical, obstetrical, and emergency procedures; and discuss herd health. (S13147)

VET 237 - Animal Nutrition

Class: 3 Lab: 0 Clinical: 0 Work: 0 **Credits: 3**

This course covers the principles of nutrition and their application to feeding practices of domestic, farm, and companion animals. Topics include basic nutrients and nutritional needs of individual species, proximate analysis, interpretation of food and feed labels, types of animal foods, and ration formulation. Upon completion, students should be able to select appropriate diets for animals in various stages of health and disease, analyze nutrition labels, and identify foods. (S11468)

WBL 110 - World of Work

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

This course covers basic knowledge necessary for gaining and maintaining employment. Topics include job search skills, work ethic, meeting employer expectations, workplace safety, and human relations. Upon completion, students should be able to successfully make the transition from school to work. (S23792)

WBL 111 - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (S23794)

WBL 111A - Work-Based Learning I Acct

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area

related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25576)

WBL 111B - Work-Based Learning I Bus.

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25578)

WBL 111D - Work-Based Learning I Des

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25693)

WBL 111E - Work-Based Learning I Cet

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25594)

WBL 111F - Work-Based Learning I Fip

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25593)

WBL 111G - Work-Based Learning I Lnd/Gard

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25569)

WBL 111H - Work-Based Learning I Hotel/Re

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25584)

WBL 111I - Work-Based Learning I- Spi

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25695)

WBL 111J - Work-Based Learning I Crim.jus

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25582)

WBL 111K - Work-Based Learning I Culinary

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25583)

WBL 111M - Work-Based Learning I Med. Adm

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25581)

WBL 111N - Work-Based Learning I Nuc Tech

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25567)

WBL 111P - Work-Based Learning I Paraleg

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25589)

WBL 111Q - Work-Based Learning I -IPP

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26401)

WBL 111R - Work-Based Learning I Eln

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25694)

WBL 111S - Work-Based Learning I Sst

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25574)

WBL 111T - Work-Based Learning I Ctc

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25590)

WBL 111U - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take HSE-110 SAB-110 HSE-112 HSE-123 HSE-125 SAB-120

Corequisites: WBL-115U SAB-135 SAB-240

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26829)

WBL 111V - Work-Based Learning I Film&vid

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25587)

WBL 111W - Work-Based Learning I Plumbing

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with

related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25610)

WBL 111X - Work-Based Learning I- Cmt

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25697)

WBL 111Y - Work-Based Learning I -Baking&

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26062)

WBL 112 - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 20 **Credits: 2**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (S23795)

WBL 112AB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26860)

WBL 112AB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area

related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26862)

WBL 112AB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26864)

WBL 112B - Work-Based Learning I Business

Class: 0 Lab: 0 Clinical: 0 Work: 20 **Credits: 2**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26906)

WBL 112BB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take WBL-112AB

Corequisites: WBL-112AB

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26855)

WBL 112BB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take WBL-112AB

Corequisites: WBL-112AB

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with

related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26857)

WBL 112BB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take WBL-112AB

Corequisites: WBL-112AB

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26859)

WBL 112BB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take WBL-112AB

Corequisites: WBL-112AB

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26861)

WBL 112BB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take WBL-112AB

Corequisites: WBL-112AB

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26863)

WBL 112BB - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: Take WBL-112AB

Corequisites: WBL-112AB

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26865)

WBL 112H - Work-Based Learning I HRM

Class: 0 Lab: 0 Clinical: 0 Work: 20 **Credits: 2**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26336)

WBL 112K - Work-Based Learning I CUL

Class: 0 Lab: 0 Clinical: 0 Work: 20 **Credits: 2**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26337)

WBL 112Y - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 20 **Credits: 2**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26194)

WBL 112Z - Work-Based Learning I VET

Class: 0 Lab: 0 Clinical: 0 Work: 20 **Credits: 2**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26780)

WBL 113 - Work-Based Learning I

Class: 0 Lab: 0 Clinical: 0 Work: 30 **Credits: 3**

Prerequisites: None

Corequisites: None

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (S23797)

WBL 115 - Work-Based Learning Seminar I

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One: WBL-111, WBL-112, WBL-113 or WBL-114

Corequisites: WBL-111, WBL-112, WBL-113 or WBL-114

This course description may be written by the individual colleges. This course is designed to be a corequisite seminar to accompany Work-Based Learning 111. Topics include: examination and analysis of the organizational structure, career path, job descriptions, job breakdowns and management style. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (S23799)

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with

related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25577)

WBL 121B - Work-Based Learning II Bus.

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25580)

WBL 121E - Work-Based Learning II Cet

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25596)

WBL 121G - Work-Based Learning II Lnd-Gar

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25570)

WBL 121H - Work-Based Learning II Hotel/R

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Corequisites: WBL-125

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25588)

WBL 121K - Work-Based Learning II Culinar

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Corequisites: WBL-125

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25585)

WBL 121N - Work-Based Learning II Nuc Tec

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25568)

WBL 121S - Work-Based Learning II Sst

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25575)

WBL 121T - Work-Based Learning II Ctc

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25591)

WBL 121U - Work Based Learning II-Human Services Technology

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

Prerequisites: HSE-110, SAB-110, HSE-112, HSE-123, HSE-125, SAB-120, SAB-135, SAB-240, WBL-115U, WBL-111, SAB-135, SAB-240

Corequisites: HSE-225 and SAB-125

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (US23800)

WBL 121Y - Work-Based Learning II Baking

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L26139)

WBL 125 - Work-Based Learning Seminar II

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take One: WBL-121, WBL-122, WBL-123 or WBL-124

Corequisites: WBL-121, WBL-122, WBL-123 or WBL-124

This course description may be written by the individual colleges. This course is designed to be a corequisite seminar to accompany Work-Based Learning 121. Topics include: examination and analysis of the organizational structure, career path, job descriptions, job breakdowns and management style. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (S23804)

WBL 131 - Work-Based Learning III

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (S23805)

WBL 131G - Work-Based Learning III L-G

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25571)

WBL 131H - Work-Based Learning III H-M

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25625)

WBL 131K - Work-Based Learning III Culina

Class: 0 Lab: 0 Clinical: 0 Work: 10 **Credits: 1**

This course provides a work-based learning experience with a college-approved employer in an area related to the student's program of study. Emphasis is placed on integrating classroom learning with related work experience. Upon completion, students should be able to evaluate career selection, demonstrate employability skills, and satisfactorily perform work-related competencies. (L25586)

WBL 215 - Work-Based Learning Seminar IV

Class: 1 Lab: 0 Clinical: 0 Work: 0 **Credits: 1**

Prerequisites: Take WBL-211, WBL-212, WBL-213 or WBL-214;

Corequisites: WBL-211, WBL-212, WBL-213 or WBL-214

This course description may be written by the individual colleges. (S23817)

WEB 111 - Intro to Web Graphics

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the creation of web graphics, and addressing problems peculiar to WWW display using appropriate software. Topics include web graphics file types, optimization, RGB color, web typography, elementary special effects, transparency, animation, slicing, basic photo manipulation, and other related topics. Upon completion, students should be able to create graphics, such as animated banners, buttons, backgrounds, logos, and manipulate photographic images for Web delivery. (S22416)

WEB 115 - Web Markup and Scripting

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces Worldwide Web Consortium (W3C) Internet programming using JavaScript. Topics include basic syntax, object-oriented programming, functions, variables, events, arrays,

validation, accessibility, and web standards. Upon completion, students should be able to write, debug, maintain well-formed and well documented interactive web content using JavaScript code. (S25729)

WEB 151 - Mobile Application Dev I

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to programming technologies, design, and development related to mobile applications. Topics include accessing device capabilities, compliance with industry standards, and programming for mobile applications. Upon completion, students should be able to develop basic applications for mobile devices. (S25818)

WEB 179 - JAVA Web Programming

Class: 2 Lab: 3 Clinical: 0 **Credits: 3**

Prerequisites: None

Corequisites: None

This course introduces the development of dynamic, database-driven web applications using the JAVA programming languages. Topics include Object Oriented Programming JAVA Server Pages, servlets, database interactions, and form handling. Upon completion, students should be able to create and modify JAVA-based internet applications. (S21484)

WEB 210 - Web Design

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take CTI-110(S22510) or CET-172

This course introduces intermediate to advanced web design techniques. Topics include customer expectations, advanced markup language, multimedia technologies, usability and accessibility practices, and techniques for the evaluation of web design. Upon completion, students should be able to employ advanced design techniques to create high impact and highly functional web sites. (S22061)

WEB 210 - Web Design

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces intermediate to advanced web design techniques. Topics include customer expectations, advanced markup language, multimedia technologies, usability and accessibility practices, and techniques for the evaluation of web design. Upon completion, students should be able to employ advanced design techniques to create high impact and highly functional web sites. (S25876)

WEB 213 - Internet Mkt & Analytics

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to Search Engine Optimization (SEO), Search Engine Marketing (SEM) and web analytics. Topics include Search Engine Optimization (SEO), Pay Per Click advertising (PPC), Search Engine Marketing (SEM), web analytics, eye-tracking software and email marketing. Upon completion, students should be able to set up, monitor and maintain SEO optimized websites; and develop strategies for online marketing and advertising plans. (S23077)

WEB 213 - Internet Mkt & Analytics

Class: 2 Lab: 3 Clinical: 0 Work: 0 **Credits: 3**

This course introduces students to Search Engine Optimization (SEO), Search Engine Marketing (SEM) and web analytics. Topics include Search Engine Optimization (SEO), Pay Per Click advertising (PPC), Search Engine Marketing (SEM), web analytics, eye-tracking software and email marketing. Upon completion, students should be able to set up, monitor and maintain SEO optimized websites; and develop strategies for online marketing and advertising plans. (S25877)

WEB 215 - Adv Markup and Scripting

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take WEB-115

This course covers the advanced programming skills required to design Internet applications and interactive web content. Emphasis is placed on the programming techniques required to develop Internet applications, interactive web content, frameworks, and using libraries. Upon completion, students should be able to design, code, debug, and document Internet-based programming solutions to various real-world problems.

(S22062)

WEB 289 - Internet Technologies Project

Class: 1 Lab: 4 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take All: CTI-110, CTI-120, and CTS-115 Take WEB-215

This course provides an opportunity to complete a significant Web technologies project from the design phase through implementation with minimal instructor support. Emphasis is placed on project definition, documentation, installation, testing, presentation, and training. Upon completion, students should be able to complete an Internet project from the definition phase through implementation.

(S24411)

WLD 110 - Cutting Processes

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces oxy-fuel and plasma-arc cutting systems. Topics include safety, proper equipment setup, and operation of oxy-fuel and plasma-arc cutting equipment with emphasis on straight line, curve and bevel cutting. Upon completion, students should be able to oxy-fuel and plasma-arc cut metals of varying thickness. (S23303)

WLD 112 - Basic Welding Processes

Class: 1 Lab: 3 Clinical: 0 Work: 0 **Credits: 2**

This course introduces basic welding and cutting. Emphasis is placed on beads applied with gases, mild steel fillers, and electrodes and the capillary action of solder. Upon completion, students should be able to set up welding and oxy-fuel equipment and perform welding, brazing, and soldering processes. (S10926)

WLD 115 - SMAW (Stick) Plate

Class: 2 Lab: 9 Clinical: 0 Work: 0 **Credits: 5**

This course introduces the shielded metal arc (stick) welding process. Emphasis is placed on padding, fillet, and groove welds in various positions with SMAW electrodes. Upon completion, students should be able to perform SMAW fillet and groove welds on carbon plate with prescribed electrodes. (S23304)

WLD 116 - SMAW (stick) Plate/Pipe

Class: 1 Lab: 9 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take WLD-115

This course is designed to enhance skills with the shielded metal arc (stick) welding process. Emphasis is placed on advancing manipulative skills with SMAW electrodes on varying joint geometry. Upon completion, students should be able to perform groove welds on carbon steel with prescribed electrodes in the flat, horizontal, vertical, and overhead positions. (S10935)

WLD 121 - GMAW (MIG) FCAW/Plate

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take WLD-110(S23303) or WLD-112;

This course introduces metal arc welding and flux core arc welding processes. Topics include equipment setup and fillet and groove welds with emphasis on application of GMAW and FCAW electrodes on carbon steel plate. Upon completion, students should be able to perform fillet welds on carbon steel with prescribed electrodes in the flat, horizontal, and overhead positions. (S23305)

WLD 131 - GTAW (TIG) Plate

Class: 2 Lab: 6 Clinical: 0 Work: 0 **Credits: 4**

This course introduces the gas tungsten arc (TIG) welding process. Topics include correct selection of tungsten, polarity, gas, and proper filler rod with emphasis placed on safety, equipment setup, and welding techniques. Upon completion, students should be able to perform GTAW fillet and groove welds with various electrodes and filler materials. (S23306)

WLD 132 - GTAW (TIG) Plate/Pipe

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take WLD-131

This course is designed to enhance skills with the gas tungsten arc (TIG) welding process. Topics include setup, joint preparation, and electrode selection with emphasis on manipulative skills in all welding positions on plate and pipe. Upon completion, students should be able to perform GTAW welds with prescribed electrodes and filler materials on various joint geometry. (S10497)

WLD 141 - Symbols & Specifications

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

This course introduces the basic symbols and specifications used in welding. Emphasis is placed on interpretation of lines, notes, welding symbols, and specifications. Upon completion, students should be able to read and interpret symbols and specifications commonly used in welding. (S23307)

WLD 143 - Welding Metallurgy

Class: 1 Lab: 2 Clinical: 0 Work: 0 **Credits: 2**

This course introduces the concepts of welding metallurgy. Emphasis is placed on basic metallurgy, effects of welding on various metals, and metal classification and identification. Upon completion, students should be able to understand basic metallurgy, materials designation, and classification systems used in welding. (S11434)

WLD 215 - SMAW (stick) Pipe

Class: 1 Lab: 9 Clinical: 0 Work: 0 **Credits: 4**

Prerequisites: Take One: WLD-115 or WLD-116

This course covers the knowledge and skills that apply to welding pipe. Topics include pipe positions, joint geometry, and preparation with emphasis placed on bead application, profile, and discontinuities.

Upon completion, students should be able to perform SMAW welds to applicable codes on carbon steel pipe with prescribed electrodes in various positions. (S10353)

WLD 231 - GTAW (TIG) Pipe

Class: 1 Lab: 6 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: Take WLD-132

This course covers gas tungsten arc welding on pipe. Topics include joint preparation and fit up with emphasis placed on safety, GTAW welding technique, bead application, and joint geometry. Upon completion, students should be able to perform GTAW welds to applicable codes on pipe with prescribed electrodes and filler materials in various pipe positions. (S11260)

WLD 262 - Inspection & Testing

Class: 2 Lab: 2 Clinical: 0 Work: 0 **Credits: 3**

Prerequisites: None

Corequisites: None

This course introduces destructive and non-destructive testing methods. Emphasis is placed on safety, types and methods of testing, and the use of testing equipment and materials. Upon completion, students should be able to understand and/or perform a variety of destructive and non-destructive testing processes. (S11961)

Campus Maps & Parking

Parking	
Parking & Security Permits	

Parking

To park on any CFCC property, you must clearly display a CFCC parking decal. Parking decals, along with rules and regulations, are obtained in the Business Office. Violation of parking policy may result in citations, towing or booting of vehicle, or further disciplinary action.

Downtown, the College offers student surface parking lots and a parking deck at 200 Hanover Street. In addition to the parking decal, students must have a CFCC Student ID card to enter and exit the parking deck. Student IDs may be obtained from the Downtown or North Campus Business Office by bringing another form of photo identification and a current class schedule. The North Campus, the Burgaw Center, and the Alston W. Burke Center offer surface parking lots.

Handicap parking is provided at each of Cape Fear Community College's campuses and centers. Downtown, anyone displaying a DMV Handicap placard or license plate may park in any of the metered, City street parking spaces without paying.

For complete rules and regulations, along with the most up-to-date information regarding parking and traffic conditions, please refer to the Parking at CFCC webpage or follow us on Twitter @cfccparking.

Parking & Security Permits

A non-refundable fee is charged to curriculum students for College access, parking, and security. A parking permit is issued when a student is paying for their tuition and fees in the Business Office. The parking permit is valid September 1 to August 31. The maximum cost of the College access, parking, and security fee per semester is \$75, but is subject to change.

Continuing Education Division

General Course Information

The Continuing Education Division promotes the personal and professional development of individuals and employee groups by offering non-credit courses and seminars. Courses and seminars vary from a few hours in length to several hundred hours, depending on their purpose and content. Continuing Education instruction generally includes a combination of lecture, demonstration, and application, and may be delivered in a classroom setting, on location, or through an online learning environment.

Courses open to the general public are advertised through various print, online, social media, and news outlets. New courses are added throughout the year. An up-to-date listing can be found at cfcc.edu/ce.

Courses developed and customized for current or future employees of client companies are not advertised to the general public.

The Continuing Education Division offers a broad range of educational services: basic skills and developmental assessments, high school equivalency exam testing, training and testing for professional licenses and certifications, career assessments, training needs assessments and job task analyses, as well as courses designed for personal enrichment and lifelong learning. Some specialized programs include the Small Business Center, Career Readiness courses, Customized Training Programs, workplace literacy, and English as a Second Language (ESL).

Courses taken through Continuing Education are generally not transferable to curriculum programs at CFCC or other colleges. CFCC does award curriculum credit in limited areas, such as Emergency Medical Science, using a combination of Continuing Education credits (CEUs), current certifications, and work experience.

Classes are held at the Wilmington downtown campus, North Campus, Burgaw Center, Alston W. Burke Center, and at other locations throughout New Hanover and Pender counties.

For more information and an up-to-date listing of upcoming courses, visit www.cfcc.edu/ce.

Admission

Generally, any person who is 18 years of age or older, or whose high school class has graduated, is eligible for admission to Continuing Education courses. High school juniors and seniors, 16 years of age and older, may enroll with permission from high school officials and a signed parental consent form. Applicants are usually admitted on a first-come, first-serve basis. Some courses have specific admission requirements. Information on requirements is available online at cfcc.edu/ce or by calling the number listed with the course. Individuals interested in attending any occupational extension or community enrichment course may register online through WebAdvisor at www.cfcc.edu or in person by visiting the college.

Change of Name/Address

It is extremely important for the College to have accurate name and address information for each student. Students must have their name formally changed with the Social Security Administration and the Department of Motor Vehicles in order to process a name change. Name changes can only be done in person in Student Services and Enrollment Management on either campus. Students with new addresses may complete a form in Student Services and Enrollment Management or update their address online through WebAdvisor.

Registration Information

Most courses require pre-registration. For information concerning the current course offerings and their locations in New Hanover or Pender counties, call (910) 362-7170 or visit the website at www.cfcc.edu/ce.

Course Schedules

Continuing Education courses are scheduled on a continuous basis with new courses starting often. Specific announcements of course offerings, registration dates, locations, and other pertinent information will be through various print, online, social media, and news outlets.

For current course information, please call (910) 362-7170 or visit www.cfcc.edu/ce.

Special seminars and industrial courses may be scheduled to begin at any time period appropriate to a company and Cape Fear Community College.

For more information about customized training, please call (910) 362.7846. For Small Business seminars, call (910) 362-7469.

Minimum Enrollment Required

The college reserves the right to cancel any course when an insufficient number of people register.

Course Schedules

Continuing Education course schedules vary depending on the subject matter and intent of the course. Specific information on course schedules can be found within the online description of that course at www.cfcc.edu/ce.

Fees

Registrations fees for occupational extension courses are set by the State of North Carolina. Based on the length of the course, the costs range from \$70 to \$180. In compliance with North Carolina statutes, registration fees may be waived for selected courses and qualifying individuals. Occupational Extension registration fees are subject to change contingent upon action by the NC General Assembly.

Registration fees for self-supporting courses are set by the college. They are based on a number of factors specific to each course and may vary greatly from course to course. For specific course costs, visit www.cfcc.edu/ce.

Additional costs may include textbooks, equipment and/ or supplies specific to the course, insurance fees, a \$5.00 Campus access/parking/security fee, and a \$5.00 technology fee where applicable. In a limited number of self-supporting classes and seminars, other special fees may be charged.

Withdrawal and Refund Policy

The refund policy, as set forth by the North Carolina General Assembly, follows in the next paragraph. To be eligible for a refund the student must officially withdraw from the class by completing a refund request form. Any additional fees paid are nonrefundable, including professional liability insurance and technology fees.

A 100 percent tuition refund shall be made if the student officially withdraws from class before the first class meeting (fax: 910-362-7990 or email: ceregistrar@cfcc.edu). A written request must be dated and received by the registrar before the first class meeting.

A 75 percent tuition refund shall be made if the student officially withdraws from class prior to or on the 10 percent date of scheduled hours. A written request must be dated and received by the registrar prior to or on the 10 percent date of scheduled hours. Students are responsible for obtaining the 10 percent date from their instructor on the first class meeting.

Please note: For courses that meet fewer than 10 times, the 10 percent date will usually be the first class meeting.

A full refund shall be made for classes canceled by the college. Students do not have to request refunds in this case.

Transcript of Record

(Curriculum and Continuing Education)

Upon written request of the student, a transcript of classes taken and credits earned at Cape Fear Community College will be sent to other colleges or third parties. Transcripts can be requested for colleges to which you have applied through the College's website (www.cfcc.edu). Transcripts requested in person will be printed on demand except during peak registration days or mailed as designated. The non-refundable cost for an official transcript is \$5.00 each.

Continuing Education Registration-Campus Access Fee

All parking decals may be obtained in person Monday through Friday, 8 a.m.–5 p.m. in the college business office at both the Wilmington and North Campus.

At the Burgaw Center and Alston Burke Center, parking decals may be obtained in person Monday through Friday, 8 a.m.–5 p.m. from the front desk.

Students are required to display parking passes on vehicles parked on campus at any site.

Academic and Career Readiness Department

The Academic and Career Readiness Department includes the following programs for adults 16 years of age or older, who wish to begin, continue, or expand their educational skills. All interested participants in Academic and Career Readiness must demonstrate the ability to benefit from the program by being able to take one of the following pre-tests as determined by the college: CASAS, TABE. Students unable to complete the pre-test will be admitted to the program at a future date once they are able to complete the pre-test.

Adult Basic Education (ABE)

Adult High School Diploma (AHS)

Career Readiness (formerly known as Human Resources Development)

English as a Second Language (ESL)

High School Equivalency Exam Prep for the GED® Test

All classes are offered at convenient times and locations. All classes are free. Anyone under 18 years of age must have school and parental release forms. High School Equivalency Exam Prep classes for the GED® Test, Adult High School classes are also offered online to students who meet eligibility requirements. National Career Readiness Certification prep classes are also offered online.

For more information visit <http://cfcc.edu/acr>.

Basic Skills Attendance Policy for High School Equivalency Prep, ABE, ABE Essentials, ESL

Students must be in attendance at least eighty percent (80%) of the clock hours of a class in order to remain in the class.

Those who do not meet minimum attendance requirements will be dropped from the class for that session and will be given a grade of "U". Students are expected to punctually attend all lecture and laboratory sessions in the classes for which they are registered. Late arrivals and/or early departures will count toward total absences in classes. Attendance in online classes (HSE, AHS online) is measured not only by initial login but also by completion of 80% of the required course work. Students MUST also meet on the published meeting dates (registration/ orientation, required testing dates).

Pre-registration/Orientation

To enroll in ABE, AHS, High School Equivalency Exam preparation, ESL, or AHS classes at CFCC, students must attend a pre-registration and orientation session. No appointment is necessary. All sessions are held on the Wilmington Campus of CFCC. Students who wish to enroll in off-campus classes may register at the class site. Cost is free.

Adult Basic Education (ABE) Classes

The ABE program is designed for persons 16 or older with or without a high school diploma or its equivalency who function below the ninth grade level. Students receive individualized and classroom instruction in basic math, reading, writing, computer and employability skills. These classes improve adults' basic skills preparing them to enter the workforce, enhance daily living skills, prepare for the GED® Test or Adult High School Diploma classes and enroll in college.

For more information, call (910) 362-7324 or log onto <http://cfcc.edu/acr/ged-abe/>.

Adult Basic Education Essentials

The ABE Essentials classes are designed for adults that have completed high school but want to continue improving their reading, writing, computer and employability skills with the goal of getting a job. Classes meet Monday through Thursday on campus and Monday through Friday at off campus locations. Cost varies.

Call (910) 362-7457 for more information.

Adult High School Diploma (AHS) Classes

The Adult High School (AHS) program is designed for adult learners 16 years of age or older who have not completed high school, but have academic skills at or above the 9th grade level. Students who are 16 or 17 years old may enroll only if they have officially withdrawn from public school. Students must complete 22 units to be eligible to graduate. Classes meet nightly, Monday through Thursday, from 5:30

p.m. until 9:30 p.m. at campus sites in Wilmington and Burgaw. The cost is free. Registration for all AHS classes is held at the Wilmington campus.

Classes are also available online to students who meet eligibility requirements.

For information, please call (910) 362-7324 or visit <http://cfcc.edu/acr/ahs/>.

Career Readiness Classes (formerly known as Human Resources Development)

The Career Readiness program is designed for individuals who wish to become more marketable by upgrading their employability skills. Classes are year round and include Introduction to Computers, Resume Preparation, Interview Coaching, Career Interests and Aptitudes, Confidence Building, and Self-Discovery. Classes are reasonably priced and the fee may be waived for those who qualify.

For more information, call (910) 362-7324.

English as a Second Language (ESL) Classes

The ESL program is designed for persons 16 years or older whose native language is not English. Instruction focuses on English skills that will enable students to interact effectively in the community, workplace, or in higher education.

Classes are designed to serve the needs of those individuals who have no English skills up to and including individuals who are preparing for university study. ESL classes help individuals develop skills to secure a job, help children with schoolwork, talk on the phone, meet new people, and improve communication skills.

For information call (910) 362-7324 or visit <http://cfcc.edu/acr/esl/>.

GED® Testing

GED® Tests are offered at the downtown campus. For registration Information call (910) 362-7324.

High School Equivalency Exam Prep Classes for the GED® Test

This program is designed for persons 16 or older without a high school diploma or its equivalency and who function at or above the 9th grade level. Students receive individualized and classroom instruction to prepare for the four areas of the GED® Test. Classes are also available online to students who meet eligibility requirements.

For more information, call (910) 362-7324 or visit <http://cfcc.edu/acr/ged-abe/>.

National Career Readiness Certification (CRC)

Cape Fear Community College in partnership with NC Department of Commerce, Work Force, Centers in New Hanover and Pender counties, is offering the National Career Readiness Certificate (NCRC) program. The NCRC is a portable credential recognized by many employers across the State and nationwide that allows a job candidate to prove his/her skills in three areas Applied Mathematics, Reading for Information and Locating Information. This allows employers to make informed employment and training decisions. After taking the KeyTrain pre-assessments students will know if there are any skills gaps and exactly what areas in which they need to improve when considering specific jobs. Certifications awarded in: bronze, silver, gold, and platinum.

For more information, call (910) 362-7324, or visit <http://cfcc.edu/careerreadiness/>.

Community Enrichment Department

The Community Enrichment department offers short term, non-credit courses that encourage and support individuals interested in lifelong learning opportunities and becoming active citizens in their community. Students receive an abundance of opportunities to meet new people, explore their interests, and develop new skills. CFCC Community Enrichment is committed to facilitating personal transformations that enrich the education and lives of our students.

Four areas of course offerings are included within the Community Enrichment department. Personal enrichment courses cover a broad range of topics from culinary techniques to small scale farming. In addition, **defensive driving courses** encourage the general public to learn safe driving strategies to reduce risk of citations and motor vehicle crashes. Below is a brief sampling of courses available.

For more information about these courses, or to suggest a new course offering, please call (910) 362-7199 unless otherwise noted.

Community Enrichment courses are frequently designed to meet specific requests; therefore, course offerings may change with the interests and the needs of residents in CFCC's service areas of New Hanover and Pender counties. Input from the community is welcome and encouraged, and we are always seeking talented instructors.

If you are interested in teaching for Community Enrichment, please call the Director of Community Enrichment at (910) 362-7254.

Personal Enrichment Courses

It's never too late to try something new! CFCC Community Enrichment offers a variety of personal enrichment courses and workshops which are open to the general public. Areas of course offerings include, but are not limited to: personal health and wellness, computers and technology, recreational sports, foreign and sign languages, heritage arts and crafts, boating safety, visual and performing arts, home and garden, and much more.

For information about upcoming personal enrichment courses, please call (910) 362-7199 or visit <https://cfcc.edu/communityenrichment/> .

Defensive Driving Courses

Defensive Driving courses are available to individuals with moving violations and also to the general public to improve driving skills.

For information and class schedules, call (910) 362-7219, or (910) 362-7175 or visit <http://cfcc.edu/communityenrichment>.

Alive@25: This course is ideal for young drivers age 16-25. Through interactive media segments, workbook exercises, role playing, and classroom participation, young drivers develop strategies that will keep them safe on the road.

DDC4: This four (4) hour Defensive Driving course will motivate drivers to change behind-the-wheel behaviors and attitudes. It will give them key understanding, skills and techniques to avoid collisions and reduce future violations. The result is a more responsible driver who grasps best practices to prevent injury and death while operating a motor vehicle. This class is open to any individual or business wanting to increase their awareness of roadway safety.

DDC8: The eight (8) hour Defensive Driving Course is used extensively for court referrals, as a diversion program for drivers with excessive violations, and to retrain drivers with poor driving records. This course addresses the attitudes of drivers so participants can see that their choices have financial, legal, and personal consequences.

Motorcycle Rider Safety - Basic

This basic twenty-two (22) hour course is designed for new riders who have never ridden a motorcycle and for re-entry riders who need a refresher course. Students will learn about the different types of motorcycles, layout and operation of the basic controls, and how to become a safer, more responsible rider. Successful participants will receive a NC DMV skills waiver card.

For information and class schedules, call (910) 362-7219 or 362-7175.

Motorcycle Rider Safety - Experienced

A one-day course for riders with basic skills, this class provides more in-depth riding techniques and procedures than practiced in the basic motorcycle rider course. This course consists of activities that emphasize personal risk management and self-assessment strategies and on-cycle exercises with emphasis in cornering, braking and swerving.

For information and class schedules, call (910) 362-7219 or 362-7175.

Customized Training and Workforce Development Department

502 N Front Street – Union Station U550

Wilmington, North Carolina 28401

Located at 502 N Front Street, the Customized Training and Workforce Development Department offers courses in a wide variety of areas for job training as well as and customized industry training in New Hanover and Pender counties.

To request industry training or receive information on upcoming courses or seminars, call (910) 362-7170 or visit <http://cfcc.edu/workforce>. The following is a small sampling of courses available.

Auto Safety Inspection and OBD Emissions

This course prepares auto technicians and service personnel as safety and emission inspectors for motor vehicles. It includes regulations and test inspection procedures and is taught to insure that the student understands rules and regulations, can inspect a vehicle properly and can successfully pass qualification exams for certification as a safety and emission inspector at a licensed inspection station.

Auto Safety & OBD Emission Inspection Certification

This course is designed to prepare auto technicians and service personnel as OBD (On-Board Diagnostics) emission inspectors for motor vehicles. Course topics include regulations and test inspection procedures required by the NC DMV – Enforcement Section – OBD emission inspectors. Upon completion a student will understand the rules, regulations and procedures for OBD emission inspections, be able to inspect a vehicle properly, and be prepared to sit for the state certification exam.

Aviation Ground School

This course is designed to provide ground school training for people interested in flying or working with the Federal Aviation Administration (FAA) as tower operators or radar operators. . The course provides instruction in general airplane knowledge, weather patterns, FAA regulations and flight planning. Students are prepared to successfully complete flight training and receive the FAA Private Pilot license. This course is only classroom time and does not include flight lessons.

Assistance Towing Endorsement

This 4 hour U.S. Coast Guard approved course is intended for those who hold, or are in the process of attaining, their Operator of Uninspected Passenger Vehicles (OUPV) 6-Passenger or Master's

Licenses. In order to commercially assist other vessels that may be aground, disabled, out of fuel, or experiencing some other malfunction, a boat operator must hold this "Assistance Towing" Endorsement. This course serves in lieu of taking an Assistance Towing Endorsement examination at any U.S. Coast Guard Regional Examination Center.

Celestial Navigation

This course will cover the theory and technique of finding one's position at sea through sextant observations of celestial bodies.

Coastal Navigation

This course provides training in marine piloting and electronic navigation techniques. Upon successful completion, students will gain competence in the safe navigation of vessels utilizing and interpreting information obtained from navigational aids.

Barber School

The barbering program consists of four courses students take consecutively to prepare them for the NC State Barbering Exam. Completion of the program takes approximately 14 months. Day and evening courses are available.

For more information, call (910) 362-7693.

Customized Training Program

The Customized Training Program provides training for industry at CFCC as well as on-site for businesses. Topics vary widely according to industry need and can be customized. Examples of industry offerings include: technical training, basic computer and software program skills, oral and written communication skills, management, supervision, quality standards, customer service, and team- building.

The Customized Training Program supports the economic development efforts of the State by providing education and training opportunities for eligible businesses and industries. Amended in 2008, this program integrates the New and Expanding Industry Training Program and the Customized Industry Training Program to more effectively respond to business and industry (G.S. 115D-5.1e). The Customized Training Program also includes the former Focused Industry Training Program and shall offer programs and training services to assist new and existing business and industry to remain productive, profitable, and within the State.

The program was developed in recognition of the fact that one of the most important factors for a business or industry considering locating, expanding, or remaining in North Carolina is the ability of the State to ensure the presence of a well-trained workforce. The program is designed to react quickly to

the needs of businesses and to respect the confidential nature of proprietary processes and information within those businesses.

The purpose of the Customized Training Program is to provide customized training assistance in support of full-time production and direct customer service positions created in the State of North Carolina, thereby enhancing the growth potential of companies located in the state while simultaneously preparing North Carolina's workforce with the skills essential to successful employment in emerging industries.

For more information, call (910) 362-7176.

Ed2Go - Online Courses

More than 350 instructor-led courses are available via the Internet through Ed2Go. Topic areas include computer applications, web design, customer service, project management, production and inventory management, small business, healthy lifestyle, writing, and many more. All courses begin on the third Wednesday of every month.

For more information, call (910) 362-7572 or visit <http://ed2go.com/cfcc>.

Professional development courses include training necessary to earn and maintain licensing, commissioning, or certification in various fields of employment and meet the continuing education requirements of trade contractors and other occupations. Through a partnership with Ed2Go, CFCC offers over 350 non-credit, instructor-led online courses ranging from Accounting to Writing Essentials.

Effective Substitute Teacher Training

This course is required by New Hanover County Schools and provides prospective substitute teachers with the principles and practices of effective teaching, including: skills in planning, classroom management, and instructional techniques. This course is also suitable for new teachers and teacher assistants. Upon completion of the course, students will receive a certificate that proves participation and successful completion of the course.

For information about requirements and upcoming courses, please call (910) 362-7199.

Continuing Education for Teachers

Teachers in need of license renewal credits can receive Continuing Education Units (CEUs) through Ed2Go, which offers flexible and affordable online courses in the following areas: classroom computing, languages, mathematics, reading and writing, science, test prep, and tools for teachers. Each course runs for six weeks and consists of twelve lessons.

For information about upcoming course offerings or to request a customized Continuing Education course for your school, please call (910) 362-7199 or visit the Ed2Go website at: <http://ed2go.com/cfcc>.

Electrical Contractors' Renewal

Electrical Contractors' Renewal courses are held throughout the year. This provides electrical contractors the eight hours of mandatory continuing education credits required to maintain a license.

For more information, call (910) 362-7319.

Electrical Apprenticeship Training

Offered in partnership with the NC Department of Labor, this program is designed to provide the specific skills associated with the electrical trade. On-the-job training, combined with classroom instruction, develops the employees' hands-on-skills, and results in the award of a certificate as a journeyman in the trade.

For more information, call (910) 362-7319.

Electrical Lineworker

The Electrical Lineworker Training Program is designed to train persons that wish to become entry-level electrical lineworkers for private and public utility companies and related employers. Students learn the academic and field skill necessary for entry-level workers. Safety is a major focus and students can earn a CDL, Flagger and OSHA 10 certification.

Notary Public

The North Carolina Secretary of State's office requires that anyone wishing to serve as a Notary Public in North Carolina must successfully complete an approved Notary Public course before applying for commission. In order to take this course and become a Notary Public in North Carolina, an individual must meet certain requirements which include, but are not limited to the following: 18 years of age or older; reside or work in the state of North Carolina; possess a high school diploma or equivalent, legally reside in the United States; speak, read, and write in English; and have no felony convictions. In the event of a misdemeanor conviction or any question about eligibility, interested students should call the NC Secretary of State's office at (919) 807-2000 before signing up for the course.

Marine Captain's License Preparation

This 64-hour course provides students with the information necessary to take the US Coast Guard examination for licensing as an Operator of Uninspected Passenger Vessels (OUPV) up to 100 gross tons, on inland, near coastal or ocean waters. The examination is then administered upon conclusion of the course.

Upgrade from Operator of Uninspected Passenger Vessels (OUPV) to Master

This 24-hour course is provided to enable the holder of a 6 Passenger OUPV Captain's license to upgrade to a Master's Level License, which is required for inspected vessels certified to carry more than 6 passengers. Upon successful completion of this course, a Certificate of Completion is awarded which is then presented to the Coast Guard as part of the Master's License issuance process. The subject material covered in the course is in accordance with guidelines set by the U. S. Coast Guard.

Medical Coding and Billing Specialist

This program prepares students to take the AAPC Certified Medical Coder exam. To complete the program students must take the following classes: Anatomy & Physiology/Medical Terminology, Introduction to Medical Coding and Advanced Medical Coding. Each class is 96 hours. An optional Certification Exam Prep class is provided before the certification exam date. A required orientation session for newly enrolled students is held prior to the first class. Online classes will be scheduled accordingly.

For more information, call (910) 362-7909.

Nurse Aide Program

This program provides students with the required classroom, skills lab and direct patient care experience to become a Certified Nursing Assistant, and Personal and Home Care Aide.

Nurse Aide Level I - Prepares graduates to provide personal care and perform basic nursing skills for the elderly and other adults.

Nurse Aide Refresher - A refresher course designed for skill/competency testing of Nurse Aide I employees.

Nurse Aide Level II - Prepares Nurse Aides to perform more complex nursing skills.

Nurse Aide Level II Refresher (with Competency Assessment) - This Refresher with competency assessment is available for the Nurse Aide II who has an expired Nurse Aide II listing.

Personal and Home Care Aide - this course provides advanced training in Home Care for the Nurse Aide I.

For additional information and class schedules.

Wilmington location: (910) 362-7370

Burgaw location: (910) 362-7909 or 362-7370

Surf City location: (910) 362-7370

Outboard Systems

This 13-week Yamaha Marine University approved course will provide instruction related to the core skills used by mechanics for marine outboard systems. Students can expect to learn the basics of boating, fuel system components, outboard electrical systems, as well as a fundamental understanding of the marine industry, and marine service careers.

Phlebotomy

The Phlebotomy course prepares individuals to obtain blood and other specimens for the purpose of laboratory analysis. The program is 256 hours combined classroom and clinical hours. Phlebotomists are healthcare professionals whose responsibility it is to draw blood samples for patients or units of blood from donors. Good phlebotomists have a dramatic impact on the accuracy of test results and have perfected all aspects of their technique to minimize the impact on the patient.

Photography

The DSLR photography series of courses takes the serious aspiring photographer from the basics of digital photography through more advanced techniques to studio lighting and on-location photo shoots. Courses for recreational point-and-shoot photographers are also available.

ServSafe® Certification

The ServSafe® Certification course teaches safe food handling practices and prepares students to take the ServSafe® Certification exam created by the National Restaurant Association. The exam is administered on the last night of class. This is an important certification for anyone working in food service.

Small Engine Repair

The course is designed to teach students to repair small gasoline engines. Students will receive instruction in the principle of 4 and 2 stroke cycle engines. Other areas of emphasis are troubleshooting and repair of valves, power producing components, fuel, ignition, exhaust, lubrication and cooling systems.

Substance Abuse Counseling Program

This program provides students with the 270 education/training hours required by the North Carolina Substance Abuse Professional Practice Board (NCSAPPB) in order to earn certification as a Certified Substance Abuse Counselor (CSAC). It is important for those interested in this program to review the additional requirements that are outlined on the NCSAPPB website.

For more information, call (910) 362-7370.

Welding: 3 Modules

Topics include Blueprint Reading, Virtual Welding Simulation, and Testing/Inspection.

Qualifications: Upon completion of this course, students will demonstrate and understand how to read blueprints using symbols and specifications, use the virtual welding simulation software, and better understand the testing/inspection qualifications. Students who complete this first course will be eligible for hands-on welding courses to earn AWS certifications in MIG, TIG, and Stick welding.

About Duke Energy: Duke Energy has recognized that even though the Carolinas have top-rated community and technical college systems, budgetary constraints present a challenge for them. Duke Energy's Community College Grant Program provides a financial boost that helps enable college systems to extend their expertise, to provide rewarding opportunities for students, and ultimately, to help revitalize manufacturing in the Carolinas.

About North Carolina Community Foundation: North Carolina Community Foundation administers the Duke Energy Community College Grant Program in the Duke Energy Progress area of the state. The Foundation is the single statewide community foundation in North Carolina, serving the philanthropic needs of donors and a broad range of charitable purposes in North Carolina. Visit www.nccommunityfoundation.org.

Small Business Center

The Small Business Center is a provider of business counseling, education, training, and referrals developed to provide start-up assistance to individuals or advice to existing business owners. Our goal is to improve the success rate and number of viable small businesses in Pender and New Hanover counties.

CLASSES/SEMINARS

Targeted to prospective and existing Small Business owners including topics like Business Basics, Marketing, Financials, Writing the Business Plan, QuickBooks, Grant Writing, and Customer Service just to name a few!

COUNSELING

Confidential one-on-one business counseling services.

REFERENCE LIBRARY

Access to our Reference Library is available by appointment and includes Internet Access, business planning, and accounting software, marketing/website videos, and business books.

Visit us online at <http://cfcc.edu/sbc> to register for classes, find how-to startup documents, and download helpful demographics and statistics to aid in writing a business plan, or call the SBC at (910) 362-7216.

Public Safety Department

Emergency Medical Technician/Paramedic Program

Emergency Medical Technician initial training prepares the student to perform basic patient care in a pre-hospital setting. The AEMT and Paramedic initial training builds on the EMT initial training and prepares the student to perform basic and advanced patient care in the pre-hospital setting. The course goal for the EMT, AEMT, and Paramedic is to prepare competent entry-level EMS personnel in the cognitive, psychomotor, and affective learning domains. After successful completion of the course, a state examination is required for credentialing. Additional courses offered include continuing education and refresher for all levels of EMS training. Specialty courses may be offered upon request.

For information and class schedules, call (910) 362-7751.

CoAEMSP Required Published Statement

The Cape Fear Community College Continuing Education Paramedic program has been issued a Letter of Review by the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP). This letter is NOT a CAAHEP accreditation status, it is a status signifying that a program seeking initial accreditation has demonstrated sufficient compliance with the accreditation Standards through the Letter of Review Self Study Report (LSSR) and other documentation. Letter of Review is recognized by the National Registry of Emergency Medical Technicians (NREMT) for eligibility to take the NREMT's Paramedic credentialing examination(s). However, it is NOT a guarantee of eventual accreditation.

To contact CoAEMSP:

8301 Lakeview Parkway Suite 111312

Rowlett, TX 75088

214-703-8445 FAX 214-703-8992

In-Service Law Enforcement Continuing Education Courses

Our program offers State Mandated In-Service Training courses for Sworn Law Enforcement Officers affiliated with an existing Law Enforcement Agency. We offer RADAR/LIDAR Certification & Recertification classes several times per year. A Law-Enforcement General Instructor course is offered 2 times per year. We can provide specialized training to Law Enforcement officers on an as needed basis.

For more information see the CFCC Law Enforcement website at www.cfcc.edu/publicsafety/law-enforcement-training. E-mail lawenftraining@cfcc.edu or call (910)-362-7217, (910) 362-7649 or (910) 362-7822.

Fire/Rescue and Emergency Management

The Public Safety Fire/Rescue Training Department offers fire and rescue training as well as Emergency Management certification classes and National Fire Academy Programs in New Hanover and Pender counties. Classes for North Carolina Office of the State Fire Marshall (OSFM) State Certification, National Fire Academy and NC State Emergency Management Certification programs are offered by coordinating with area fire and rescue departments and emergency management personnel. Firefighter recertification and courses in the latest technology are also offered locally. CERT (Community Emergency Response Team), fire brigade/emergency response team training and customized training programs are available upon request.

For more information call (910) 362-7799 or (910) 362-7711.

First Responder Academy

This academy is a comprehensive program which includes Firefighter, Haz-Mat, Technical Rescue, TR Vehicle Rescue, Driver Operator, Emergency Vehicle Driver, Emergency Medical Technician (EMT), Driver Operator Pump Operations, Driver Operator Aerial Operations, Rapid Intervention and other vital classes necessary for future firefighters.

For additional information about the Academy, please call (910) 362-7770 or e-mail firetraining@cfcc.edu.

NIMS ICS (National Incident Management System) Incident Command System FEMA-Federal Emergency Management Agency

The National Incident Management System (NIMS) which is under the Federal Emergency Management Agency provides consistent nationwide template to enable all government, private sector, and nongovernmental organizations, including all first responders, to work together effectively during domestic incidents. The intent of NIMS is to be applicable across a full spectrum of potential incidents and hazard scenarios, regardless of size or complexity and improve coordination and cooperation between public and private entities in a variety of domestic incident management activities. NIMS provides for interoperability and compatibility among all responders.

NIMS ICS-700 National Incident Management System An Introduction

Fire/Security Alarms System Technician (FAST)

The Fire Alarm System Training (FAST) program is designed to produce competent and qualified individuals in the field of alarm systems. It is our belief that properly trained and knowledgeable alarm system designers and technicians will reduce the losses due to fire or false alarms and improve the quality of life in the community. This program is offered online.

For more information contact Paul Inferrera at pinferrera@cfcc.edu.

Burgaw Center

**100 East Industrial Drive
Burgaw, North Carolina 28425**

Phone: (910) 259-4966 or 362-7900 Fax: (910) 259-9048

The CFCC Burgaw Center offers continuing education classes at this Pender County location. Pre-registration is required, call: (910) 362-7909. The curriculum classes that meet in the Burgaw Center are registered through the main campus at CFCC in Wilmington, NC.

Alston W. Burke Center

**621 NC Highway 210 E
Surf City, North Carolina 28445**

CFCC offers continuing education classes at the Alston W. Burke Center. Pre-registration is required, call: (910) 362- 7931.

Continuing Education Services

The Continuing Education Division promotes the concept of lifelong learning by providing meaningful educational experiences that will help adults meet occupational and professional goals and fulfill social and personal needs. Non-credit classes and seminars offered will allow adults to achieve their full potential in our ever-changing world of knowledge and skills by preparing for employment to upgrade their skills or learn a new skill.

Human Resources Development Program

The Human Resources Development (HRD) program is designed for unemployed or underemployed individuals who wish to become more marketable by upgrading their employability skills. Classes are year round and are free for those who qualify. See Corporate and Continuing Education Division for further details.

Basic Skills and Career Readiness Department

The Basic Skills and Career Readiness Department offers literacy classes for adults 16 years of age or older, who wish to begin, continue, or expand their educational skills. All classes are free and are offered at convenient times and locations. Anyone under 18 years of age must have school and parental release forms. See Extended Services Continuing Education Division for further details.

The Career Readiness program (formerly known as Human Resources Development) is designed for unemployed or underemployed individuals who wish to become more marketable by upgrading their employability skills. Classes are year round and are free for those who qualify. See Corporate and Continuing Education Division for further details.

University Transfer Program Information

ACA-122 College Transfer Requirement

ACA 122 is designed as the college's First-Year Experience course, intended to deliberately engage students in their first semester of enrollment and support them through that term as they transition into the college. The course is required for all university transfer students enrolled in the following degree programs:

- Associate in Arts
- Associate in Arts Elementary Education
- Associate in Arts in Teacher Preparation
- Associate in Engineering
- Associate in Fine Arts
- Associate in Fine Arts, Music
- Associate in Fine Arts, Theatre
- Associate in Fine Arts, Visual Arts
- Associate in Science
- Associate in Science in Teacher Preparation

Students enrolled in the aforementioned programs must enroll in ACA 122 at Cape Fear Community College unless they have transfer credit for ACA 122 (or equivalent) from another regionally accredited institution.

The course description for ACA 122 is as follows:

This course provides information and strategies necessary to develop clear academic and professional goals beyond the community college experience. Topics include the CAA, college policies and culture, career exploration, gathering information on senior institutions, strategic planning, critical thinking, and communications skills for a successful academic transition. Upon completion, students should be able to develop an academic plan to transition successfully to senior institutions.

Due to the content of the ACA 122 course, we believe it is highly advantageous for the student to enroll in the course as early in their program as possible. Therefore, we are proposing that students enroll in ACA 122 within their first 24 credit hours. To enforce this, we would like to create a registration rule in Colleague that would require students to register for ACA 122 within their first 24 credit hours. If a student does not have credit for ACA 122 when attempting to register for classes, Self-Service will not allow students to register for a schedule that does not include ACA 122.

In addition to the procedure listed above, we would like to add the following policy to the College Catalog:

Students who are seeking a transfer degree must complete ACA 122 during their first 24 credit hours. If a student who is seeking a transfer degree fails to complete ACA 122 during the first 24 hours, registration will be restricted until ACA 122 is added to the student's schedule.

General Education Courses and Competencies

All associate degree programs at Cape Fear Community College (CFCC) comply with the program standards established by the North Carolina Community College System. Each degree program includes a general education component consisting of a minimum of 15 credit hours:

- The Associate in General Education program requires a minimum of 15 general education credit hours;

- The Associate in Applied Science programs require a minimum of 15 general education credit hours;

- The Associate in Engineering requires a minimum of 45 general education credit hours;

- The Associate in Arts requires a minimum of 45 general education credit hours;

- The Associate in Science requires a minimum of 45 general education credit hours; and

- The Associate in Fine Arts programs require the following: 25-26 general education credit hours in the Music premajor, 31-32 general education credit hours in the Theatre premajor, and 25-26 general education credit hours in the Visual Arts premajor.

Degree programs' general education components are comprised of courses from some or all of the following areas: communications, humanities and fine arts, social and behavioral sciences, natural sciences, and mathematics.

General education courses are designed to introduce students to a wide variety of academic topics and traditions. These courses also help promote students' attainment of CFCC's general education competencies, which represent the broad areas of knowledge and skills that students develop in the general education component of their degree programs. CFCC's general education competencies include:

Critical Thinking: Students will apply questioning and reasoning skills to problems, scenarios and arguments in order to create, support, and reflect upon sound solutions, decisions, and positions.

Global Fluency: Students will utilize knowledge of historical contexts, cultural differences, and social constructs to analyze human interactions, conflicts, and achievements.

Communication: Students will utilize written, oral interpersonal, and creative media communication skills to effectively convey information, ideas, and arguments appropriate to specific audiences.

Quantitative and Scientific Reasoning: Students will use mathematical and scientific concepts to solve numerical problems, create and analyze experiments, and record observations.

These competencies promote learners' appreciation for intellectual rigor, academic integrity, cultural diversity, and responsible citizenship.

College Transfer/University Parallel

General Information and Articulation Agreements

Students should always check with the Admissions Office of the four-year institution for the most current transfer information. Effective fall of 2014, UNC institutions will develop, publish, and maintain four-year degree plans identifying community college courses that provide pathways leading to associate degree completion, admission into the major, and baccalaureate completion. Students who complete the AA or AS degree and the degree plan tracks published by a UNC institution, and who are accepted into that institution and into that major within four years of initial enrollment at the community college, will continue into that major at the UNC institution with all courses fulfilling lower division general education requirements.

Articulation (Transfer) Agreements

The Comprehensive Articulation Agreement (CAA)

To facilitate the transfer of students between the North Carolina Community College System and the constituent institutions of the University of North Carolina System, the North Carolina General Assembly mandated the Comprehensive Articulation Agreement (CAA). The CAA applies to students who are pursuing an Associate in Arts or an Associate in Science degree and provides guidance to those who are pursuing an Associate in Fine Arts degree. These two transfer programs consist mainly of

general education courses. The courses provide opportunities for students to know the philosophy, literature, institutions, and art of their own culture and other cultures; to understand math and science; to communicate with others and develop a sense of community. Students should choose electives that align with their intended major and institution.

Students must meet the receiving university's foreign language and/or health and physical education requirements, if applicable, before or after transfer to the senior institution. Only 60-61 semester hours are guaranteed to transfer.

To receive the maximum benefit from the CAA, students may transfer as juniors if they follow these guidelines:

- Earn an Associate in Arts degree or an Associate in Science degree.

- Earn a grade of "C" or better in all courses.

- Earn an overall grade-point average of a "C" or a 2.0 at the time of transfer (Note: If the entering grade-point average of the receiving institution is higher than the 2.0 CAA grade-point average, the student must comply with the requirement of the receiving institution. Students should always contact the receiving institutions for the latest information about the admission and program standards. Some UNC institutions do not accept grades of a "C-," even though CFCC will accept a "C-.")

- Obtain acceptance at the UNC institution.

Under the CAA, no student is guaranteed admission to a specific UNC institution or to any specific program or professional school in the institution. Admission is a competitive process.

Students Not Completing the Associate in Arts or Associate in Science Degrees

A North Carolina community college student who satisfactorily completes, with a grade of "C" or better, courses identified in the Universal General Education Transfer Component (UGETC) will receive credit applied toward the university's lower-division general education course requirements, subject to the following distribution limit: maximum of 6 hours in English Composition, 9 hours in Humanities/Fine Arts/Communications, 9 hours in Social/ Behavioral Sciences, 8 hours in Mathematics, and 8 hours in the Natural Sciences.

A North Carolina community college student who satisfactorily completes a transfer course that is not designated as a UGETC course will receive transfer credit for the course. The receiving institution will determine how the course counts. (Source: CAA Manual, February 21, 2014)

Transfer of Courses Not Originated at North Carolina Community Colleges

Transfer courses that do not originate at a North Carolina Community College System institution or at a UNC System institution are allowed to be used to complete the AA or AS degree at an NCCCS institution

and would fall under the protections of the CAA. Students transferring without the completed degree would have their individual courses from outside of NCCCS institutions subject to the receiving institution's regular transfer articulation procedures.

Transfer Assured Admissions Policy (TAAP)

The Comprehensive Articulation Agreement (CAA) assures the admission of a North Carolina community college graduate to one of the sixteen (16) University of North Carolina (UNC) institutions with the following stipulations:

Admission is not assured to a specific campus or program or major.

Students must have graduated from a North Carolina community college with an Associate in Arts or an Associate in Science degree.

Students must meet all requirements of the CAA.

Students must have a minimum grade-point average of 2.0 on a 4.0 scale, as calculated by the college from which they graduated, and a grade of "C" or better in all CAA courses. (Note: If the entering grade-point average of the receiving institution is higher than the 2.0 CAA grade-point average, the student must comply with the requirement of the receiving institution. Students should always contact the receiving institutions for the latest information about admission and program standards.)

Students must be academically eligible for re-admission to the last institution attended.

Students must meet judicial requirements for the institution to which they apply.

Students must meet all application requirements at the receiving institution, including the submission of all required documentation by stated deadlines.

If a student is denied admission to a UNC institution, they will receive a letter from that institution directing the student to the College Foundation of North Carolina (CFNC) website. At the CFNC website, the student will be presented with the conditions of the TAAP. If these conditions are met, the student will be given information regarding space availability and contacts within other UNC institutions. The student should contact those institutions and get specific information about admissions and available majors.

If the steps above do not result in admission to a UNC institution, then the student should contact the CFNC Resource Center at 1-866-866-CFNC.

The Independent Comprehensive Articulation Agreement (ICAA)

The ICAA establishes the procedures governing the transfer of credits for students who transfer from a North Carolina Community College to a Signatory Institution of North Carolina Independent Colleges and Universities. The ICAA does not address admission to a specific institution or to a specific major within an institution.

To be eligible for the transfer of all credits under the ICAA, the student must graduate from the community college with an Associate in Arts (AA) or Associate in Science (AS) degree, have an overall Grade Point Average (GPA) of at least 2.0 on a 4.0 scale, and a grade of "C" or better in all ICAA courses. Students who do not complete the degree are eligible to transfer credits on a course-by-course basis.

Purpose of the College Transfer Programs

Most of the college transfer programs provide the first two years or the basic studies requirements of a baccalaureate degree. If students plan to transfer to a four-year college or university, they should declare a college transfer program as their program of study. Cape Fear Community College (CFCC) offers six college transfer programs: one (1) associate in arts, one (1) associate in science, one (1) associate in engineering, and (3) associate in fine arts, and two (2) associate in teacher preparation.

These academic programs help students develop the abilities to solve problems, understand scientific principles, write and speak effectively, use computers, reason and think critically, research, understand cultures, manipulate numerical data, and work in teams—invaluable workplace skills for the 21st century. Across the college transfer curricula, faculty try to adapt to students' learning styles by using a variety of teaching techniques. In turn, students are expected to adapt to a variety of teaching styles.

Students should expect courses in these programs to require reading, study, and interaction outside of class or in an online platform each week. Courses in the college transfer programs are equal in rigor and expectations to university courses.

To evaluate student performance, faculty use some of the following methods: critical analysis papers and research papers; article reviews; book critiques; organized discussions; video summaries and applications; journals and novels; study guides/concept sheet assignments; readers' analysis of readings; debates; current events papers; project/oral presentations; exams/quizzes (true/false, fill in the blanks, short answers, multiple choice, essay); portfolios; hands-on assignments and faculty observation; peer reviews; role-playing; resumes, business letters, and compositions.

Choosing a Program of Study

When choosing a program of study, students should

- Consider their talents/abilities, personality, and passions/ dreams.

- Research the career of their choice for information about the following: the nature of the career, qualifications, salary range, market demand, employment locations, and related fields. For information about careers, students may visit CFCC's Career and Testing Services.

- Be willing to change their program if they discover a more rewarding academic field. Through a classroom project, an extracurricular activity, or an interview with someone in a field, a student may decide his or her career goal. Review the websites about academic majors from senior institutions.

Additional Supplies and Costs

Art Supplies - In addition to the purchase of a textbook, some art classes require students to purchase supplies. The following costs are estimations and will depend on the instructor, the place of purchase, and the maker/manufacture: ART 121 - Two-Dimensional Design - Design I, \$75-\$100; ART 131 - Drawing I, \$80 - \$100; ART 240 - Painting I, \$150-\$175 (an additional \$80 needed if a class wants to learn about watercolors and oils/acrylics.); and ART 261 - Photography I, \$120 for film, paper and supplies. ART 261 also requires students to have a manual 35-millimeter camera. ART 283 - Ceramics I, Students in ART 283 must pay \$10-\$20 for a personal tool packet, available at the CFCC Bookstore.

Math Supplies - Students may be required to purchase a graphic calculator if they enroll in the following math classes: MAT 121, MAT 122, MAT 171, MAT 172, MAT 271, MAT 272, and MAT 273.

Some courses require a MyLabsPlus student access code. This code is included with the purchase of a new textbook from the CFCC bookstore and is used to access the online portion of the class. If a used book is purchased, the code must be purchased separately at an additional cost either at the CFCC Bookstore or online from the publisher of the textbook.

Physical Education Courses - Some PED classes require membership at a commercial facility approved by the class instructor. The cost ranges from \$20 to \$144 depending on the course and the facility. Some PED courses meet off-campus at local parks.

All PED courses require a physical activity component. Details on specific PED course requirements may be found in the Course Descriptions section at the rear of the catalog.

NOTE: The course PED 110 requires the commercial membership only if the PED 110 class is an internet class. The commercial facility must be approved by the instructor.

Science Courses - Internet, hybrid, and face-to-face science courses may require lab software as an online supplement or the purchase of a lab kit and/or safety supplies.

College Transfer/University Parallel Programs

University Transfer Programs

University Transfer Program Information

College Transfer/University Parallel Programs

Associate in Arts (A10100)

As a result of a legislative mandate from the NC General Assembly, fall of 1997, the 58 North Carolina community colleges and the 16 institutions in the University of North Carolina (UNC) System entered into an agreement called the statewide Comprehensive Articulation Agreement, better known as the CAA. This agreement has been updated, and the revisions were implemented in the fall of 2014. This agreement includes two degrees—the Associate in Arts and the Associate in Science—and enables North Carolina community college graduates to receive junior status if the graduates meet certain criteria. Students are encouraged to complete their degree before they transfer. Admission to a UNC institution is a competitive process.

The Associate in Arts degree requires 60-61 credit hours. It allows students to take the first two years of their baccalaureate degree at CFCC and enables them to transfer to one of the 16 institutions in the UNC System with junior status. To graduate from CFCC under this agreement, students must meet all prerequisite and corequisite requirements, successfully complete all the required CAA courses with a grade of "C" or better, and earn at least a 2.0 overall grade-point average. (Note: To enroll at a senior institution, students must meet the grade-point average requirement of the receiving institution, which may be higher than a 2.0. While CFCC will accept a grade of "C-" from another institution, students should be aware that some UNC institutions will not accept this grade.)

It is the responsibility of the student to meet all graduation requirements.

Students are advised to take ACA 122 - College Transfer Success in their first or second semester and create a suitable plan of study.

Students must meet the receiving institution's foreign language and/or health and physical education course, if applicable, prior to or after transfer to the senior institution.

Website that houses the four-year baccalaureate plans at the 16 institutions in the University of North Carolina System: <http://cfcc.edu/transfer/curriculum-pathways/>.

The Associate in Arts program requirements are outlined as follows:

Universal General Education Transfer Component (32- 33 semester-hour credits)—These courses are sometimes referred to as the UGETC courses and are supposed to transfer for equivalency credit at the 16 University of North Carolina institutions.

Additional General Education Courses (14 semester-hour credits)—These may be additional general education courses that CFCC has selected for its students and/ or additional general education courses that a senior institution has recommended or required for an intended major.

Other Requirements (14 semester-hour credits)—A few electives are mandated by CFCC. Students should select the remaining electives based on the intended major of the senior institution.

Universal General Education Transfer Component (Credits: 32-33)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

UGETC Humanities/Fine Arts

COM/HUM/FA

Choose three of the following courses from two different disciplines. Take 9 credits:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

COM 120 - Intro Interpersonal Com **Credits: 3**

Total Requirement in Semester Hours: 61

Associate in Arts Elementary Education (A10100EE)

This program is specifically designed for students desiring to transfer into UNCW's Watson College of Education under the SEAPath agreement. Students who are undecided on their four-year institution should speak to their advisor about equivalent program options to pursue a degree in education.

Universal General Education Transfer Component (Credits: 32)

English Composition

Take 6 credits:

ENG 112 - Writing/Research in the Disc **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**

Humanities/Fine Arts

Select one course from each group below. Take 9 credits:

Group I

Choose one course.

COM 231 - Public Speaking **Credits: 3**

Group II

Choose one course.

PHI 215 - Philosophical Issues **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Group III

Choose one course.

ENG 231 - American Literature I **Credits: 3**

Social/Behavioral Sciences

Select one course from each group below. Take 9 credits:

Group I

Choose one course.

HIS 111 - World Civilizations I **Credits: 3**

HIS 112 - World Civilizations II **Credits: 3**

Group II

Choose one course.

HIS 131 - American History I **Credits: 3**

HIS 132 - American History II **Credits: 3**

Group III

Choose one course.

PSY 150 - General Psychology **Credits: 3**

Mathematics

Take 4 credits:

MAT 171 - Precalculus Algebra **Credits: 4**

Natural Sciences

Select one course below. Take 4 credits:

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

Additional General Education Courses (Credits: 16)

Critical Thinking

Take two courses. Take 7 credits:

PSY 263 - Educational Psychology **Credits: 3**

Choose a second science from the following 4:

CHM 151 - General Chemistry I **Credits: 4**

GEL 111 - Geology **Credits: 4**

PHY 110 - Conceptual Physics **Credits: 3**

PHY 110A - Conceptual Physics Lab **Credits: 1**

Global Awareness/Foreign Language

Take 9 credits:

ASL 111 - Elementary ASL I **Credits: 3**

ASL 112 - Elementary ASL II **Credits: 3**

ASL 211 - Intermediate ASL I **Credits: 3**

SPA 111 - Elementary Spanish I **Credits: 3**

SPA 112 - Elementary Spanish II **Credits: 3**

SPA 211 - Intermediate Spanish I **Credits: 3**

SPA 212 - Intermediate Spanish II **Credits: 3**

Other Required Hours

Required Course: Academic Transition

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Other Required Hours

Take 11 credits:

ASL 181 - ASL Lab 1 **Credits: 1**
ASL 182 - ASL Lab 2 **Credits: 1**
SOC 210 - Introduction to Sociology **Credits: 3**
MAT 141 - Mathematical Concepts I **Credits: 3**
EDU 216 - Foundations of Education **Credits: 3**

Total Credits: 60

Fall Semester I

ACA 122 - College Transfer Success **Credits: 1**
COM 231 - Public Speaking **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**
MAT 171 - Precalculus Algebra **Credits: 4**
SPA 111 - Elementary Spanish I **Credits: 3**
SPA 181 - Spanish Lab 1 **Credits: 1**
OR
ASL 111 - Elementary ASL I **Credits: 3**
ASL 181 - ASL Lab 1 **Credits: 1**

15 Credits

Spring Semester I

ENG 112 - Writing/Research in the Disc **Credits: 3**

BIO 110 - Principles of Biology **Credits: 4**
OR
BIO 111 - General Biology I **Credits: 4**

HIS 131 - American History I **Credits: 3**
OR
HIS 132 - American History II **Credits: 3**

SPA 112 - Elementary Spanish II **Credits: 3**
SPA 182 - Spanish Lab 2 **Credits: 1**

ASL 211 - Intermediate ASL I **Credits: 3**

15 Credits

Spring Semester II

PHI 215 - Philosophical Issues **Credits: 3**

OR

PHI 240 - Introduction to Ethics **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

MAT 141: 3 Credits

Lab Science Elective: 4 credits

13 Credits

Associate in Arts in Teacher Preparation (A1010T)

The Associate in Arts in Teacher Preparation degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in arts programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.7 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT (Credits: 45)

English Composition

Take 6 credits:

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

Communications

Take 3 credits:

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts

Take 6 credits:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

ENG 242 - British Literature II **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

ENG 241 - British Literature I **Credits: 3**
MUS 110 - Music Appreciation **Credits: 3**
MUS 112 - Introduction to Jazz **Credits: 3**
PHI 215 - Philosophical Issues **Credits: 3**
PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

Choose two courses from two different disciplines: Take 6 credits:

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**
POL 120 - American Government **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Math

Take 3-4 credits:

MAT 143 - Quantitative Literacy **Credits: 3**
MAT 152 - Statistical Methods I **Credits: 4**
MAT 171 - Precalculus Algebra **Credits: 4**

Natural Sciences

Take 4 credits:

Group 1:
AST 111 - Descriptive Astronomy **Credits: 3**
and
AST 111A - Descriptive Astronomy Lab **Credits: 1**
Group 2:
AST 151 - General Astronomy I **Credits: 3**
and
AST 151A - General Astronomy I Lab **Credits: 1**

Group 3:

PHY 110 - Conceptual Physics **Credits: 3**

and

PHY 110A - Conceptual Physics Lab **Credits: 1**

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

CHM 115 - Concepts in Chemistry **Credits: 3**

GEL 111 - Geology **Credits: 4**

Other Required General Education Hours

Other Required Hours (14-15 SHC)

Choose 14-15 hours from the following:

ANT 210 - General Anthropology **Credits: 3**

ANT 220 - Cultural Anthropology **Credits: 3**

ANT 221 - Comparative Cultures **Credits: 3**

ANT 230 - Physical Anthropology **Credits: 3**

EDU 279 - Literacy Develop and Instruct **Credits: 4**

Required Course: Academic Transition

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Total Semester Hours Credits: 60-61

Optional General Education Hours

A student may **take up to 8 SHC** of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

Associate in Engineering (A10500)

The Associate in Engineering (AE) degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use. The degree plan includes required general education and prerequisite courses that are acceptable to all state-funded Bachelor of Engineering programs.

Students who follow the degree progression plan will meet the entrance requirements at all of the North Carolina public Bachelor of Science Engineering programs. Associate in Engineering graduates may then apply to any of these programs without taking additional and sometimes duplicative courses. Admission to Engineering programs is highly competitive and admission is not guaranteed. To be eligible for the transfer of credits under the AE to the Bachelor of Science in Engineering Articulation Agreement, community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.5 on a 4.0 scale.

Other Gen-Ed/Pre Major Elective **Credits / Units: 3/4**

Associate in Fine Arts, Music (A10700)

It is the responsibility of the student to know and to comply with the prerequisites and the corequisites listed in this catalog. If students have previous college credits from other institutions, students are advised to check first with a counselor at the receiving institution (the institution in which they plan to attend upon leaving CFCC). A counselor at the receiving institution should advise students of the courses to take at CFCC if the students have credits from other institutions. Otherwise, students will be encouraged to 1) complete their associate degree, which consists of 64-65 semester hours, or, the general education core, which consists of 28 semester hours; 2) contact their CFCC advisor, register early, and pay their tuition on time; and 3) earn a grade of "C" or higher on the first attempt. Since this program has only 28 credit hours in the general education core, students may be required to fulfill their basic studies requirement after they transfer. While some UNC institutions accept students with a 2.0 grade-point average, other UNC institutions require at least a 2.5 grade point average. (Reminder: While CFCC will accept a grade of "C-," some senior institutions will not accept this grade.) Students must always comply with the admission requirements of the receiving institution.

Important Websites

The following website provides more CFCC college transfer and advising information:

<http://cfcc.edu/transfer/>. The following website lists the academic programs offered at the sixteen (16)

UNC institutions: <http://www.northcarolina.edu/apps/programs/index.php>.

Students who need assistance in deciding their major may visit CFCC's Career and Testing Services or visit the website about academic majors from their institution of choice. Example:
https://www1.cfnc.org/Plan/For_A_Career/_default.aspx.

The general education core consists of 28 semester hour credits.

While the courses in this program are not taught every semester, every effort is made to see that each course is taught at least once per year. When planning a class schedule, students should consider the frequency of the course offerings.

Associate in Fine Arts, Visual Arts (A10600)

It is the responsibility of the student to know and to comply with the prerequisites and the corequisites listed in this catalog. If students have previous college credits from other institutions, students are advised to check first with a counselor at the receiving institution (the institution in which they plan to attend upon leaving CFCC). A counselor at the receiving institution should advise students of the courses to take at CFCC if the students have credits from other institutions. Otherwise, students will be encouraged to 1) complete their associate degree, which consists of 60-61 semester hours, or, the general education core, which consists of 25 semester hours; 2) contact their CFCC advisor, register early, and pay their tuition on time; and 3) earn a grade of "C" or higher on the first attempt. Since this program has only 25 credit hours in the general education core, students may be required to fulfill their basic studies requirements after they transfer. While some UNC institutions accept students with a 2.0 grade-point average, other UNC institutions require at least a 2.5 grade-point average. Students must always comply with the admission requirements of the receiving institution. Reminder: CFCC accepts a grade of "C-," but some UNC institutions will not accept this grade.

Important Websites

The following website provides more CFCC college transfer and advising information:

<http://cfcc.edu/transfer/>.

The following website lists the academic programs offered at the sixteen (16) UNC institutions:

<http://www.northcarolina.edu/apps/programs/index.php>.

Students who need assistance in deciding their major may visit CFCC's Career and Testing Services or visit the website about academic majors from their institution of choice. Example:

https://www1.cfnc.org/Plan/For_A_Career/_default.aspx.

While the courses in this pre-major are not taught every semester, every effort is made to see that each course is taught at least once per year. When planning a class schedule, students should consider the frequency of the course offerings.

Since requirements vary, each student should first contact the senior institution of choice to determine the specific requirements of that institution and to determine whether it is better to complete this pre-major or the Associate in Arts program or the minimum transfer hours of the receiving institution. Some senior institutions offer a Bachelor in Fine Arts degree while others offer a Bachelor in Arts degree. Depending on the institution of choice, some students will not have satisfied the general education core or the basic studies requirements even if the students complete this degree. Students are encouraged to contact the senior institution to confirm degree offerings.

Universal General Education Transfer Component (Credits: 25-26)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

COM/Humanities/Fine Arts

Take 6 credits from 2 disciplines.

ART 111 - Art Appreciation **Credits: 3**

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

ENG 232 - American Literature II **Credits: 3**

ENG 241 - British Literature I **Credits: 3**

ENG 242 - British Literature II **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

MUS 112 - Introduction to Jazz **Credits: 3**

PHI 215 - Philosophical Issues **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

Select one course from each group below. Take 6 credits:

Group I

HIS 111 - World Civilizations I **Credits: 3**
HIS 112 - World Civilizations II **Credits: 3**
HIS 131 - American History I **Credits: 3**
HIS 132 - American History II **Credits: 3**

Group II

ECO 251 - Prin of Microeconomics **Credits: 3**
ECO 252 - Prin of Macroeconomics **Credits: 3**
POL 120 - American Government **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Mathematics

Take 3/4 credits:

MAT 143 - Quantitative Literacy **Credits: 3**
MAT 152 - Statistical Methods I **Credits: 4**
MAT 171 - Precalculus Algebra **Credits: 4**
MAT 271 - Calculus I **Credits: 4**

Natural Sciences

Choose one natural science option from the list below. Take 4 credits:

(Reminder: AST 111 and PHY 110 have mandatory labs.)

AST 111 - Descriptive Astronomy **Credits: 3 and**
AST 111A - Descriptive Astronomy Lab **Credits: 1**

BIO 110 - Principles of Biology **Credits: 4**

BIO 111 - General Biology I **Credits: 4**

CHM 151 - General Chemistry I **Credits: 4**

GEL 111 - Geology **Credits: 4**

PHY 110 - Conceptual Physics **Credits: 3 and**

PHY 110A - Conceptual Physics Lab **Credits: 1**

Other Required Hours (Credits: 35)

College Success Course

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Additional UGETC ART Courses

Take 6 credits:

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

Other Required ART Courses

Take 9 credits:

ART 121 - Two-Dimensional Design **Credits: 3**

ART 122 - Three-Dimensional Design **Credits: 3**

ART 131 - Drawing I **Credits: 3**

Additional Hours

An additional **19 SHC** of courses should be selected from the courses listed below. Students should select these courses based on their intended major and transfer university. Can take up to 9 SHC in sequential foreign language courses. SPA-111, 112, 211/ FRE-111, 112, 211/ GER-111, 112, 211

ART 113 - Art Methods and Materials **Credits: 3**

Associate in Science (A10400)

As a result of a legislative mandate from the NC General Assembly, fall of 1997, the 58 North Carolina community colleges and the 16 institutions in the University of North Carolina (UNC) System entered into an agreement called the statewide Comprehensive Articulation Agreement, better known as the CAA. This agreement has been updated, and the revisions were implemented fall of 2014. This agreement includes two degrees—the Associate in Arts and the Associate in Science—and enables North Carolina community college graduates to receive junior status if the graduates meet certain criteria. Students are encouraged to complete their degree before they transfer. Admission to a UNC institution is a competitive process.

The Associate in Science degree requires 60-61 credit hours. It allows students to take the first two years of their baccalaureate degree at CFCC and enables them to transfer to one of the 16 institutions in the University of North Carolina System with junior status. Students in this program may choose majors in architecture, agriculture, biology, chemistry, computer science, dentistry, forestry, mathematics, medicine, pharmacy, and textiles. To graduate from CFCC, students must meet all prerequisite and corequisite requirements, successfully complete all the required CAA courses with a grade of "C" or above, and earn at least a 2.0 overall grade-point average. (Note: To enroll at a senior institution, students must meet the grade-point average requirement of the receiving institution, which may be higher than a 2.0. While CFCC may accept a grade of "C-" from another institution, students should be aware that some UNC institutions will not accept this grade.)

This plan of study is subject to change when the college thinks that such action is in the best interest of the student or the program. It is the responsibility of the student to meet all graduation requirements.

When students enroll at CFCC, they are advised to take ACA 122 - College Transfer Success in their first or second semester and create a suitable plan of study. Students must also demonstrate their computer competency before graduation by taking CIS 110 or CIS 115 or CSC 151. If a student is enrolled in the last semester of course work, is computer competent, but has not fulfilled the computer requirement, the student may opt to take a computer competency in the Learning Lab at the North or the Wilmington campus.

Students must meet the receiving institution's foreign language and/or health and physical education course, if applicable, prior to or after transfer to the senior institution.

Website that houses CFCC's college transfer curriculum worksheets: <http://cfcc.edu/transfer/current-student/>.

Website that houses the four-year baccalaureate plans at the 16 institutions in the University of North Carolina System: <http://cfcc.edu/transfer/curriculum-pathways/>.

The Associate in Science program requirements are outlined as follows:

Universal General Education Transfer Component (34 semester hour credits)—These courses are sometimes referred to as the UGETC courses and will transfer for equivalency credit at the 16 University of North Carolina institutions.

Additional General Education Courses (11 semester hour credits)— These may be additional general education courses that CFCC has selected for its students and/or additional general education courses that a senior institution has recommended or required for an intended major.

Other Requirements (15 semester hour credits)—A few electives are mandated by CFCC. Students should select the remaining electives based on their intended major and the senior institution of choice.

Universal General Education Transfer Component (Credits: 45)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

Total Requirement in Semester Hours: 60-61

Associate in Science in Teacher Preparation (A1040T)

The Associate in Science in Teacher Preparation degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and the basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in science programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.7 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions.

UNIVERSAL GENERAL EDUCATION TRANSFER COMPONENT(Credits: 45)

English Composition

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

Communications

Take 3 credits:

Take 1 course:

COM 120 - Intro Interpersonal Com **Credits: 3**

COM 231 - Public Speaking **Credits: 3**

Humanities/Fine Arts

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**

ART 115 - Art History Survey II **Credits: 3**

DRA 111 - Theatre Appreciation **Credits: 3**

OTHER REQUIRED HOURS (Credits: 15)

Education

Take 14 credits:

EDU 187 - Teaching and Learning for All **Credits: 4**
EDU 216 - Foundations of Education **Credits: 3**
EDU 250 - Teacher Licensure Preparation **Credits: 3**
EDU 279 - Literacy Develop and Instruct **Credits: 4**

Academic Transition

Take 1 credit:

ACA 122 - College Transfer Success **Credits: 1**

Total Semester Hours Credit: 60-61

Optional General Education Hours

A student may take up to 8 SHC of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

Accounting Fraud Analytics (Cert) C25800A

This certificate provides exposure to the investigative techniques used by accountants to conduct forensic examinations as well as the common schemes and techniques used to commit fraud. The skills acquired will enable students to assist businesses in detecting, investigating, documenting, and preventing fraud.

Graduates should be able to understand both the pervasiveness and the causes of fraud and white-collar crime in our society, examine the types of fraud and fraud schemes that affect business enterprises, explore methods of fraud detection and prevention, and increase their ability to recognize potential fraudulent situations.

The certificate helps to prepare students determine the probability and/or extent of the occurrence of fraud. By analyzing definite financial and non-financial information, checking public records, and administering fact-finding and admission-seeking questioning and evaluation, suspicions or accusations will be resolved and refuted.

Business Administration, A.A.S. (A25120)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Business Analytics Certificate (C25350)

The Business Analytics curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in analytical professions. Business analysts process and analyze essential information about business operations and also assimilate data for forecasting purposes.

Students will complete course work in business analytics, including general theory, best practices, data mining, data warehousing, predictive modeling, project and operations management, statistical analysis, and software packages. Related skills include business communication, critical thinking and decision making.

Graduates should qualify for employment as data technicians, data scientists, business and data analytics engineers, and business analysts in the fields of finance, banking, logistics, marketing, healthcare, manufacturing, information technology, and government organizations.

Required Courses (18 credits)

BAS 120 - Intro to Analytics **Credits: 3**
BAS 121 - Data Visualization **Credits: 3**
BAS 150 - Intro to Analytical Program. **Credits: 3**
BAS 220 - Appl. Analytical Program. **Credits: 3**
BUS 110 - Introduction to Business **Credits: 3**

Cyber Crime Technology, A.A.S (A55210)

This curriculum will prepare students to enter the field of computer crime investigations and private security. Students completing this curriculum will be capable of investigating computer crimes, properly seize and recover computer evidence and aid in the prosecution of cyber criminals. Course work in this curriculum will include a division of work in the disciplines of criminal justice and computer information systems. Additionally, students will be required to take specific cyber crime classes. Graduates should qualify to become computer crime investigators for local or state criminal justice agencies. Also these graduates should be competent to serve as computer security specialists or consultants with private business.

Healthcare Business Informatics Certificate (C25510)

The Healthcare Business Informatics curriculum prepares individuals for employment as specialists in installation, data management, data archiving/retrieval, system design and support, and computer training for medical information systems.

Students learn about the field through multidisciplinary coursework including the study of terminology relating to informatics, systems analysis, networking technology, computer/network security, data warehousing, archiving and retrieval of information, and healthcare computer infrastructure support.

Graduates should qualify for employment as database/data warehouse analysts, technical support professionals, informatics technology professionals, systems analysts, networking and security technicians, and computer maintenance professionals in the healthcare field.

Information Technology, A.A.S. (A25590)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

Information Technology, CyberSecurity & Networking Diploma (D25590B)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams

General Education Requirements (6 credits)

English Requirement

Paralegal Technology, A.A.S. (A25380)

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks, and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Coursework includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses also include subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

*Graduates of the A.A.S. program will be eligible to take the North Carolina Paralegal Certification Examination and the National Association of Legal Assistants (NALA) exam. Please contact the Paralegal Department for further information.

General Education Requirements (15 credits)

Take 9 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

DFT 100 - Marine Drafting **Credits: 2**

Spring Semester I

BTB 101B - Boat Bldg I (part 2) **Credits: 5**

Boat Building (Wooden) Diploma (D35120)

The Boat Building curriculum prepares individuals for employment in the boat building and boat repair industry. Today's boat builders are highly skilled craftspeople who can create complex shapes out of wood.

Course work includes reading boat plans, lofting, setting up the building jig, fashioning the structural timbers, and different planking techniques. Interior joinery, exterior joinery, and yacht rigging is also covered.

Graduates may find work with yacht manufacturers, high end furniture shops, architectural millwork shops, and companies installing built in furniture in homes. Other opportunities can be found in boat maintenance and repair yards.

General Education Requirements (6 credits)

Take 6 credits:

ENG 101 - Applied Communications I **Credits: 3**

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (35 credits)

Take 35 credits:

BTB 101 - Boat Building I **Credits: 10**

BTB 102 - Boat Building II **Credits: 9**

BTB 103 - Yacht Joiner Practices I **Credits: 4**

BTB 104 - Yacht Joiner Practices II **Credits: 3**

BTB 105 - Yacht Repair/Renovation **Credits: 5**

BTB 109 - Yacht Rigging **Credits: 2**

DFT 100 - Marine Drafting **Credits: 2**

Other Major Requirements (2 credits)

Take 2 credits:

CIS 111 - Basic PC Literacy **Credits: 2**

Total Credits: 43

Fall Semester I

BTB 101 - Boat Building I **Credits: 10**

CIS 111 - Basic PC Literacy **Credits: 2**

DFT 100 - Marine Drafting **Credits: 2**

MAT 110 - Math Measurement & Literacy **Credits: 3**

Spring Semester I

BTB 102 - Boat Building II **Credits: 9**

BTB 103 - Yacht Joiner Practices I **Credits: 4**

Summer Semester I

BTB 104 - Yacht Joiner Practices II **Credits: 3**

BTB 105 - Yacht Repair/Renovation **Credits: 5**

BTB 109 - Yacht Rigging **Credits: 2**

Boat Manufacture and Service Diploma (D60330)

The Boat Manufacture and Service Technology program prepares students for employment in the manufacture and service of boats. Students learn the basics of boat design and the implementation of those designs in various components and/or complete boats or yachts.

Course work includes reading and interpreting marine blueprints, manuals, and other documents common to the industry; lofting; constructing forms and mold-making; application of concepts and techniques in composite, and fiberglass; marine woodworking; interior finishing; and marine mechanical, electrical, and plumbing systems.

Graduates may find employment with boat/yacht manufacturers, service yards, dealerships doing commissioning work, and companies doing custom boat building.

General Education Requirements (6 credits)

Take 6 credits:

ENG 101 - Applied Communications I **Credits: 3**
MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (27 credits)

Required

Take 13 credits:

BTB 110 - Fiberglass Boat Bldg I **Credits: 5**
BTB 111 - Fiberglass Boat Bldg II **Credits: 5**
BTB 112 - Fiberglass Boat Repairs **Credits: 3**

Marine Services

Take 14 credits:

BTB 106 - Engine Install/Systems **Credits: 5**
BTB 107 - Boat Electrical Systems **Credits: 5**
BTB 108 - Boat Plumbing Systems **Credits: 4**

Other Major Requirements (6 credits)

Take 6 credits:

BMS 117 - Marine Spray Finishing **Credits: 2**
BMS 118 - Basic Boat Operation **Credits: 2**
CIS 111 - Basic PC Literacy **Credits: 2**

Total Credits: 39

Fall Semester I

BTB 107 - Boat Electrical Systems **Credits: 5**

BTB 112 - Fiberglass Boat Repairs **Credits: 3**
CIS 111 - Basic PC Literacy **Credits: 2**

Marine Technology, A.A.S. (A15320)

Marine Technology students are required, for completion of their degree, to complete 5 separate training cruises. During these cruises students should not be excused from assignments and tests but are required to arrange makeups with faculty well in advance of departure. If the faculty maintains a graded attendance policy, cruises should be treated as an excused absence and not be punitive.

These curricula prepare individuals for a variety of marine-related occupations such as marine conservation, water analysis, marine scientific research support and commercial fishing. Individuals will be prepared as naturalists within the ecotourism industry and be trained in observational and measurement techniques aboard a variety of vessels including ocean-going research vessels. Course work includes a unique blend of traditional and contemporary vocational, technical, and scientific marine education. Course work specific for Marine Sciences includes instruction in biological sciences, environmental sciences, and marine sciences. Field and laboratory experiences prepare students to identify, observe, and collect scientific data associated with the fauna and flora found in the rivers, estuaries, sounds, and ocean. Course work in Marine Technologies includes instruction in the use of physical, chemical, meteorological, biological, and geological oceanographic instrumentation and sampling equipment. Graduates are prepared for employment opportunities with aquariums, fisheries, corps of engineers, marine patrol, ecotourism companies, commercial fishing industries, entry-level field or laboratory positions with industries, state and federal agencies, and educational facilities associated with marine science and research. Career opportunities include oceanography, environmental science, marine biology, geophysical exploration, and fisheries-related employment.

Marine Technology: A program that provides the practical and academic skills essential for success in marine scientific support. Training in the operation and maintenance of seismic and hydrographic instrumentation including: side scan sonar, multibeam echo sounders, and sub-bottom profilers is provided in the classroom and underway at sea. Additional course work includes: classic and digital navigation techniques, practical applications of boat handling, seamanship, marlinspike seamanship, and safety at sea. Instruction applicable to fisheries science and environmental assessment is provided.

General Education Requirements Credits: 15

Note:

As a student participating on training cruises in the Marine Technology program at Cape Fear Community College, all students must have a licensed physician complete a physical in addition to passing a drug screen (documentation is available in the MT department office). This exam and test will be conducted at the student's expense.

The physical will be valid for the two years that the student is enrolled in the program. After this time period the student will be required to complete another physical if the training cruises are not completed.

If a student demonstrates behavior causing concern as to alcohol or drug use they will be required to submit to an immediate drug screening at his/her expense. Failure to comply or evidence of drug or alcohol in a screening test will result in revocation of training cruise participation for 1 year. After this time, the student must submit a clean drug test for consideration.

Architectural Technology, A.A.S. (A40100)

The Architectural Technology curriculum prepares individuals with knowledge and skills that can lead to employment in the field of architecture or one of the associated professions.

Students receive instruction in construction document preparation, materials and methods, environmental and structural systems, building codes and specifications, and computer applications as well as completing a design project. Optional courses may be provided to suit specific career needs.

Upon completion, graduates have career opportunities within the architectural, engineering, and construction professions as well as positions in industry and government. A strong emphasis on sustainable design and construction techniques is included.

Baking and Pastry Arts, A.A.S. (A55130)

This curriculum is designed to provide students with the skills and knowledge required for employment in the baking/pastry industry, including restaurants, hotels, independent bakeries/pastry shops, wholesale/retail markets, and high-volume bakeries, and/or further academic studies. Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Course work includes specialty/artisanal breads, desserts/pastries, decorative work, high-volume production and food marketing. Graduates should qualify for entry-level positions, such as pastry/bakery assistant, area pastry chef and assistant pastry chef. American Culinary Federation certification may be available to graduates.

Note:

*Students may take WBL 112Y (320 hrs) in lieu of taking WBL 111Y (160 hrs) and WBL 121Y (160 hrs).

Community Spanish Interpreter, A.A.S. (A55370)

The Community Spanish Interpreter curriculum prepares individuals to work as entry-level bilingual professionals who will provide communication access in interview and interactive settings. In addition, this curriculum provides educational training for working professionals who want to acquire Spanish language skills.

Course work includes the acquisition of Spanish: grammar, structure, and sociolinguistic properties, cognitive processes associated with interpretation between Spanish and English; the structure and character of the Hispanic community; and acquisition of communication skills.

Graduates should qualify for entry-level jobs as para-professional bilingual employees in educational systems or a variety of community settings. Individuals may choose from part-time, full-time, or self-employment/free-lance positions, or apply language skills to other human service related areas.

General Education Requirements (15 -16 credits)

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

Cosmetology Certificate (C55140)

Uniforms and name tags are required at an additional cost.

Students will be required to meet all applicable requirements of the State Board of Cosmetic Arts Rules and Regulations for graduation and licensure.

****Successful completion of this certificate program will give the student 1,200 hours of cosmetology training and allow the student to sit for the North Carolina State Board of Cosmetic Arts Apprenticeship License Examination. Passing the North Carolina written and practical exam will qualify the student to pay for and receive an apprenticeship license. The student must then complete a 1,040 hour mentorship with a licensed cosmetologist in order to earn a full cosmetology license.**

Cosmetology Diploma (D55140)

Uniforms and name tags are required at an additional cost.

Students will be required to meet all applicable requirements of the State Board of Cosmetic Arts Rules and Regulations for graduation and licensure.

The Cosmetology curriculum is designed to provide competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the cosmetology industry. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional imaging, hair design, chemical processes, skin care, nail care, multi-cultural practices, business/computer principles, product knowledge, and other selected topics.

Graduates should qualify to sit for the State Board of Cosmetic Arts examination. Upon successfully passing the State Board exam, graduates will be issued a license. Employment is available in beauty salons and as skin/nail specialists, platform artists, and related business.

The listed courses, CFCC Cosmetology competencies, NC State Board Performances and a minimum of 1500 hours are required for graduation.

This curriculum complies with the standard approved by the State Board of Community Colleges.

Criminal Justice Technology, A.A.S. (A55180)

The Criminal Justice Technology curriculum is designed with a core of courses to afford one the opportunity to acquire basic knowledge, skills and attitudes in the generally accepted subject areas associated with a two-year study of law enforcement services. It includes subjects such as interpersonal communications, law, psychology and sociology.

In addition to core subjects, students are given instruction in topic areas where they will become exposed to and need knowledge of in order to become entry level professionals within the criminal justice community such as, but not limited to areas of study such as the correctional services program such as confinement facility administration, correctional law, counseling, probation-parole services and rehabilitation options. Similarly, the law enforcement option provides an opportunity to study other generally accepted subjects included in a law enforcement services program such as criminal behavior, criminal investigation, patrol operation, traffic management, and other aspects of law enforcement administration and operations. The security services option provides an opportunity to study other generally accepted subjects related to a security services program such as accident prevention and safety management, common carrier protection, fire prevention, private security, industrial security, retail security, security systems cyber security, private investigations and surveillance.

Job opportunities are available with federal, state, county and municipal governments. In addition, knowledge, skills and attitudes acquired in this course of study qualify one for job opportunities with private enterprise in such areas as industrial, retail physical, cyber, and private security.

Culinary Arts, A.A.S. (A55150)

Students are responsible for purchasing their own uniforms and knife kit.

This curriculum provides specific training required to prepare students to assume positions as trained culinary professionals in a variety of foodservice settings including full service restaurants, hotels, resorts, clubs, catering operations, contract foodservice and health care facilities.

Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Courses include sanitation/safety, baking, garde manger, culinary fundamentals/production skills, nutrition, customer service, purchasing/cost control, and human resource management.

Graduates should qualify for entry-level opportunities including prep cook, line cook, and station chef. American Culinary Federation certification may be available to graduates. With experience, graduates may advance to positions including sous chef, pastry chef, executive chef, or foodservice manager.

General Education Requirements (15 credits)

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**
MAT 110 - Math Measurement & Literacy **Credits: 3**

Communications

Take 3 credits:

COM 120 - Intro Interpersonal Com **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**
MUS 110 - Music Appreciation **Credits: 3**
HUM 115 - Critical Thinking **Credits: 3**

Social/Behavioral Science Electives

Take 3 credits:

HIS 132 - American History II **Credits: 3**
PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**

Major Requirements(30 credits)

Take 21 credits:

CUL 110 - Sanitation & Safety **Credits: 2**
CUL 140 - Culinary Skills I **Credits: 5**
CUL 160 - Baking I **Credits: 3**
CUL 170 - Garde Manger I **Credits: 3**
CUL 240 - Culinary Skills II **Credits: 5**
HRM 245 - Human Resource Mgmt-Hosp **Credits: 3**

Customer Service

Take either
CUL 135 - Food & Beverage Service **Credits: 2**
or take
HRM 124 - Guest Service Management **Credits: 3**

Nutrition

Take 3 credits:

CUL 112 - Nutrition for Foodservice **Credits: 3**
NUT 110 - Nutrition **Credits: 3**

Purchasing/Cost Control

Take either
CUL 120 - Purchasing **Credits: 2**

or take

HRM 260 - Procurement for Hosp **Credits: 3**

Work Based Learning Elective

Take 2 Credits:

WBL 111 - Work-Based Learning I **Credits: 1**

WBL 112 - Work-Based Learning I **Credits: 2**

WBL 121 - Work-Based Learning II **Credits: 1**

Other Major Requirements (22 credits)

Take 12 credits:

CIS 111 - Basic PC Literacy **Credits: 2**

CUL 110A - Sanitation & Safety Lab **Credits: 1**

CUL 130 - Menu Design **Credits: 2**

CUL 150 - Food Science **Credits: 2**

HRM 220 - Cost Control-Food & Bev **Credits: 3**

HRM 220A - Cost Control-Food & Bev Lab **Credits: 1**

WBL 115 - Work-Based Learning Seminar I **Credits: 1**

Culinary Electives I

Take 5 credits:

CUL 230 - Global Cuisines **Credits: 5**

CUL 245 - Contemporary Cuisines **Credits: 5**

CUL 250 - Classical Cuisine **Credits: 5**

Culinary Electives II

Take 5 credits:

CUL 120A Purchasing Lab

Credits / Units: 1

CUL 135A Food and Beverage Serv Lab

Credits / Units: 1

CUL 214 - Wine Appreciation **Credits: 2**

CUL 260 - Baking II **Credits: 3**

CUL 270 - Garde Manger II **Credits: 3**

CUL 275 - Catering Cuisine **Credits: 5**
CUL 280 - Pastry & Confections **Credits: 3**
CUL 283 - Farm-To-Table **Credits: 5**
CUL 285 - Competition Fundamentals **Credits: 3**
HRM 225 - Beverage Management **Credits: 3**
HRM 228 - Mixology **Credits: 3**
WBL 125 - Work-Based Learning Seminar II **Credits: 1**
WBL 131 - Work-Based Learning III **Credits: 1**

Total Credits: 67

Fall Semester I

CUL 110 - Sanitation & Safety **Credits: 2** and
CUL 110A - Sanitation & Safety Lab **Credits: 1**

CUL 140 - Culinary Skills I **Credits: 5**
CUL 150 - Food Science **Credits: 2**
CUL 160 - Baking I **Credits: 3**
CUL 112 - Nutrition for Foodservice **Credits: 3**
Or
NUT 110 - Nutrition **Credits: 3**

Spring Semester I

CUL 170 - Garde Manger I **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**
CUL 240 - Culinary Skills II **Credits: 5**
Humanities/Fine Arts Elective **Credits: 3**
Social /Behavioral Science Elective **Credits: 3**

Summer Semester I

COM 120 - Intro Interpersonal Com **Credits: 3**
WBL 121K - Work-Based Learning II Culinar **Credits: 1**
WBL 125K - Work-Based Learning Seminar II Credits: 1
MAT 110 - Math Measurement & Literacy **Credits: 3**

Fall Semester II

CIS 111 - Basic PC Literacy **Credits: 2**

HRM 220 - Cost Control-Food & Bev **Credits: 3 and**
HRM 220A - Cost Control-Food & Bev Lab **Credits: 1**

CUL 120 - Purchasing **Credits: 2**

Or

HRM 260 - Procurement for Hosp **Credits: 3**

Spring Semester II

CUL 130 - Menu Design **Credits: 2**

HRM 245 - Human Resource Mgmt-Hosp **Credits: 3**

WBL 111K - Work-Based Learning I **Credits: 1 ***

Or

WBL 112K - Work-Based Learning I **Credits: 1***

WBL 115K - Work-Based Learning Seminar I **Credits: 1**

Culinary Arts Elective II

Note:

* Students may take WBL 112K (320 hrs) in lieu of taking WBL 111K (160 hrs) & WBL 121K (160 hrs)

Emergency Management A.A.S (A55460)

The Emergency Management curriculum is designed to provide students with a foundation of technical and professional knowledge needed for emergency services delivery in local and state government agencies. Study involves both management and technical aspects of law enforcement, fire protection, emergency medical services, and emergency planning.

Course work includes classroom and laboratory exercises to introduce the student to various aspects of emergency preparedness, protection, and enforcement. Students will learn technical and administrative skills such as investigative principles, hazardous materials, codes, standards, emergency agency operations, and finance.

Employment opportunities include ambulance services, fire/rescue agencies, law enforcement agencies, fire marshal offices, industrial firms, educational institutions, emergency management offices, and other government agencies. Employed persons should have opportunities for skilled and supervisory-level positions.

General Education Requirements (15 credits)

Communications

Take 6 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Emergency Medical Science, A.A.S. (A45340)

The Emergency Medical Science curriculum provides individuals with the knowledge, skills and attributes to provide advanced emergency medical care as a paramedic for critical and emergent patients who access the emergency medical system and prepares graduates to enter the workforce.

Students will gain complex knowledge, competency, and experience while employing evidence based practice under medical oversight, and serve as a link from the scene into the healthcare system.

Graduates of this program may be eligible to take state and/or national certification examinations. Employment opportunities include providers of emergency medical services, fire departments, rescue agencies, hospital specialty areas, industry, educational and government agencies.

Esthetics Technology Certificate (C55230)

Uniforms and name tags are required at an additional cost.

Students will be required to meet all applicable requirements of the State Board of Cosmetic Arts Rules and Regulations for graduation and licensure.

The Esthetics Technology curriculum provides competency-based knowledge, scientific/artistic principles and hands-on fundamentals associated with the art of skin care. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional Esthetics Technology, business/human relations, product knowledge, and other related topics.

Graduates should be prepared to take the North Carolina Cosmetology State Board Licensing Exam and upon passing be licensed and qualify for employment in beauty and cosmetic/skin care salons, as a platform artist, and in related businesses.

Major Requirements

COS 119 - Esthetics Concepts I **Credits: 2**

Film and Video Production Technology, A.A.S. (A30140)

Note: Limited classes are offered in this program. Please check with Public Services Department Chair or Student Development.

The Film and Video Production Technology curriculum prepares students for entry-level employment in production support and selected technical areas of film, video, and associated media production. Instruction provides training for entry-level crew and/or production and post-production assistants in many moving image media forms.

The first year content includes exposure to the entire production process. Students are taught by industry professionals who provide extensive hands-on instruction. In the second year, students receive professional training by performing in various crew positions on actual production projects.

Graduates may find employment as entry-level crew and/or production assistants in feature and short films, commercials, and industrial, educational, and documentary productions. Other opportunities include entry-level employment in pre-production and post-production areas for film and video.

Fire Protection Technology, A.A.S. (A55240)

The Fire Protection Technology curriculum is designed to provide students with knowledge and skills in the technical, managerial, and leadership areas necessary for advancement within the fire protection community and related firefighting industries, and to provide currently employed firefighters with knowledge and skills often required for promotional consideration.

Course work includes diverse fire protection subject areas, including fire prevention and safety, public education, building construction, fire ground strategies and tactics, and local government finance and laws, as they apply to emergency services management. Emphasis includes understanding fire characteristics and the structural consequences of fire; risk assessment and management; and relevant research, communications, and leadership methodologies.

Employment opportunities exist with fire departments, governmental agencies, industrial firms, insurance rating organizations, and educational organizations.

WBL 125H - Work-Based Learning Seminar II **Credits: 1**

Hospitality Management Elective **Credits: 1-5**

Work-Based Elective **Credits: 1**

Note:

* Student may take WBL 112H (320 hrs) in lieu of taking WBL 111H (160 hrs) & WBL 121H (160 hrs)

Interior Design Certificate(C30220)

The Interior Design curriculum is designed to prepare students for a variety of job opportunities in the field of both residential and non-residential interior design. The focus of the studies is technical knowledge, professional practices, and aesthetic principles and design process.

Curriculum content includes residential and non-residential interior design, architectural drafting, computer-aided design, and universal design. Also included are basic design, code standards, history of interiors and furnishings, color theory, products, professional practices, visual presentations, and sustainable principles.

Graduates should qualify for interior design opportunities in numerous residential and commercial environments such as hospitality, corporate, mercantile, educational, and healthcare. Interior designers also have employment opportunities in real estate, entertainment, visual merchandising, government, sales and marketing, and other specialties dealing with interiors.

Major Requirements (13 credits)

Required Courses

Take 13 credits:

DES 110 - Architectural Graphics **Credits: 2**

DES 120 - CAD for Interior Design **Credits: 2**

DES 125 - Visual Presentation I **Credits: 2**

DES 135 - Prin & Elem of Design I **Credits: 4**

DES 220 - Interior Design Fundamentals **Credits: 3**

Total Credits: 13

Fall Semester I

DES 110 - Architectural Graphics **Credits: 2**
DES 125 - Visual Presentation I **Credits: 2**
DES 135 - Prin & Elem of Design I **Credits: 4**

Spring Semester I

DES 120 - CAD for Interior Design **Credits: 2**

Interpreter Education, A.A.S. (A55300)

The Interpreter Education curriculum prepares individuals to work as entry-level Sign Language Interpreters who will provide communication access in interview and interactive settings. In addition, this curriculum provides in-service training for working interpreters who want to upgrade their skills.

Course work includes the acquisition of American Sign Language (ASL); grammar, structure, and sociolinguistic properties; cognitive processes associated with interpretation between ASL and English; the structure and character of the deaf community; and acquisition of consecutive and simultaneous interpreting skills.

Entry-level jobs for para-professional interpreters are available in educational systems or a variety of community settings. Individuals may choose from part-time, full-time, or self-employment/freelance positions or apply language skills to other human service related areas.

General Education Requirements (15 credits)

English

Take 3 credits:

Public Safety Administration (A55480)

The Public Safety Administration curriculum is designed to provide students, as well as practitioners, with knowledge and skills in the technical, managerial, and administrative areas necessary for entrance or advancement within various public safety and government organizations. Course work in diverse subject areas includes public safety administration and education, interagency operations, crisis leadership, government and agency financial management, professional standards, incident management, administrative law, and supervision, while providing a streamlined pathway that recognizes the value of previously earned skillsets and credentials within the public safety sector. Employment opportunities exist with fire or police departments, emergency management organizations, governmental agencies, industrial firms, correctional facilities, private industries, insurance organizations, educational organizations, security and protective organizations, and through self-employment opportunities.

Public Safety Administration Certificate (C55480)

The Public Safety Administration curriculum is designed to provide students, as well as practitioners, with knowledge and skills in the technical, managerial, and administrative areas necessary for entrance or advancement within various public safety and government organizations. Course work in diverse subject areas includes public safety administration and education, interagency operations, crisis leadership, government and agency financial management, professional standards, incident management, administrative law, and supervision while providing a streamlined pathway that recognizes the value of previously earned skillsets and credentials within the public safety sector. Employment opportunities exist with fire or police departments, emergency management organizations, governmental agencies, industrial firms, correctional facilities, private industries, insurance organizations, educational organizations, security and protective organizations, and through self-employment opportunities

Major Hours (12 Credits)

EPT 150 - Incident Management **Credits: 3**
PAD 252 - Public Policy Analysis **Credits: 3**
PAD 151 - Intro to Public Admin **Credits: 3**
PAD 254 - Grant Writing **Credits: 3**

Welding Technology, SMAW/GTAW Certificate (C50420)

Welding Technology Certificate (C50420C)

Career & Technical Education

Air Conditioning, Heating and Refrigeration, Commercial Refrigeration Certificate (C35100R)

The Air Conditioning, Heating, and Refrigeration Technology curriculum provides the basic knowledge to develop skills necessary to work with residential and light commercial systems. Topics include mechanical refrigeration, heating and cooling theory, electricity, controls, and safety. The diploma program covers air conditioning, furnaces, heat pumps, tools and instruments. In addition, the AAS degree covers residential building codes, residential system sizing, and advanced comfort systems.

Major Requirements (14 credits)

Required Courses

Take 14 credits:

AHR 110 - Intro to Refrigeration **Credits: 5**

AHR 111 - HVACR Electricity **Credits: 3**

AHR 115 - Refrigeration Systems **Credits: 2**

AHR 215 - Commercial HVAC Controls **Credits: 2**

AHR 245 - Chiller Systems **Credits: 2**

Total Credits: 14

Fall Semester I

AHR 110 - Intro to Refrigeration **Credits: 5**

AHR 111 - HVACR Electricity **Credits: 3**

Spring Semester I

AHR 115 - Refrigeration Systems **Credits: 2**

AHR 215 - Commercial HVAC Controls **Credits: 2**

AHR 245 - Chiller Systems **Credits: 2**

Air Conditioning, Heating, and Refrigeration Technology Certificate (C35100)

(EVENINGS)

Major Requirements

Core

AHR 110 - Intro to Refrigeration **Credits: 5**

AHR 114 - Heat Pump Technology **Credits: 4**

Electricity

AHR 111 - HVACR Electricity **Credits: 3**

Total Credits: 12

Fall Semester I

AHR 110 - Intro to Refrigeration **Credits: 5**

AHR 111 - HVACR Electricity **Credits: 3**

Spring Semester I

AHR 114 - Heat Pump Technology **Credits: 4**

Air Conditioning, Heating, and Refrigeration Technology Diploma (D35100)

The Air Conditioning, Heating, and Refrigeration Technology curriculum provides the basic knowledge to develop skills necessary to work with residential and light commercial systems.

Topics include mechanical refrigeration, heating and cooling theory, electricity, controls, and safety. The diploma program covers air conditioning, furnaces, heat pumps, tools, and instruments.

Diploma graduates should be able to assist in the start-up, preventive maintenance, service, repair, and/or installation of residential and light commercial systems.

General Education Requirements (6 credits)

Take 6 credits:

ENG 101 - Applied Communications I **Credits: 3**

TRN 110 - Intro to Transport Tech **Credits: 2**

Automotive Customizing Technology Diploma (D60190)

The curriculum prepares individuals to modify existing automotive vehicle components, fabrication techniques to create custom vehicle components, non-structural damage repair, custom painting and refinishing techniques, custom upholstery and glass removal/replacement/custom modifications, and other automotive technology related systems.

Course work may include transportation systems theory, custom fabrication, custom fiberglass skills, auto shop management, and basic welding for transportation.

Graduates of this pathway should be prepared to take professional licensure exams, which correspond to certain programs of study, and to enter careers as entry-level technicians in the transportation industry.

Automotive Systems Technology, A.A.S. (A60160)

The curriculum prepares individuals for employment as automotive service technicians. It provides an introduction to automotive careers and increases student awareness of the challenges associated with this fast and ever-changing field.

Classroom and lab experiences integrate technical and academic coursework. Emphasis is placed on theory, servicing and operation of brakes, electrical/electronic systems, engine performance, steering/suspension, automatic transmission/transaxles, engine repair, climate control, and manual drive trains.

Upon completion of this curriculum, students should be prepared to take the ASE exam and be ready for full-time employment in dealerships and repair shops in the automotive service industry.

Collision Repair and Refinishing Technology Diploma (D60130)

The Collision Repair and Refinishing Technology curriculum prepares individuals to become qualified technicians who possess the diverse skills required to perform quality repairs and proper refinishing techniques on automobile bodies and to diagnose and repair mechanical and electrical systems.

Coursework includes classroom and laboratory experiences that integrate technical application with academic theory. Emphasis is placed on autobody fundamentals, painting and refinishing, structural and non-structural damage repair, mechanical and electrical component repair or replacement, and common industry practices.

Graduates should be qualified to take National Institute for Automotive Service Excellence (ASE) certification examinations and also for entry-level employment in automotive dealerships, independent repair shops, or through self-employment, as collision repair and refinishing technicians.

Computer-Integrated Machining Certificate (C50210)

(DAY AND EVENINGS)

Major Requirements

MAC 111 - Machining Technology I **Credits: 6**
MAC 112 - Machining Technology II **Credits: 6**
MAC 121 - Intro to CNC **Credits: 2**
MAC 122 - CNC Turning **Credits: 2**
MAC 124 - CNC Milling **Credits: 2**

Total Credits: 18

Fall Semester I

MAC 111 - Machining Technology I **Credits: 6**
MAC 121 - Intro to CNC **Credits: 2**

Spring Semester I

MAC 112 - Machining Technology II **Credits: 6**
MAC 124 - CNC Milling **Credits: 2**

Summer Semester I

MAC 122 - CNC Turning **Credits: 2**

Computer-Integrated Machining, A.A.S. (A50210)

The Computer-Integrated Machining curriculum prepares students with the analytical, creative and innovative skills necessary to take a production idea from an initial concept through design, development and production, resulting in a finished product.

Coursework may include manual machining, computer applications, engineering design, computer-aided drafting (CAD), computer-aided machining (CAM), blueprint interpretation, advanced computerized numeric control (CNC) equipment, basic and advanced machining operations, precision measurement and high-speed multi-axis machining.

Graduates should qualify for employment as machining technicians in high-tech manufacturing, rapid-prototyping and rapid-manufacturing industries, specialty machine shops, fabrication industries, and high-tech or emerging industries such as aerospace, aviation, medical, and renewable energy, and to sit for machining certification examinations.

General Education Requirements

COM 110 - Introduction to Communication **Credits: 3**

ENG 111 - Writing and Inquiry **Credits: 3**

Construction Management Technology, Project Management Certificate (C35190A)

These curriculums are designed to prepare individuals to apply technical knowledge and skills to the fields of architecture, construction, construction management, and other associated professions.

Course work includes instruction in sustainable building and design, print reading, building codes, estimating, construction materials and methods, and other topics related to design and construction occupations.

Graduates of this pathway should qualify for entry-level jobs in architectural, engineering, construction and trades professions as well as positions in industry and government.

Major Requirements (6 credits)

Required Courses

CMT 120 - Codes and Inspections **Credits: 3**

Construction Management Technology

CMT 210 - Construction Management Fund **Credits: 3**

Other Major Requirements (6 credits)

Required Courses

BUS 240 - Business Ethics **Credits: 3**

Construction Management Technology, A.A.S. (A35190)

This curriculum is designed to prepare individuals for careers in the construction management field. Such positions may include project manager, superintendent, estimator, or foreman.

Course work includes safety, planning, scheduling, cost control, productivity, human relations, estimating, and building codes. Students will also gain proficiency in specific construction related skills.

Graduates should qualify for entry-level positions in the field of construction management.

Construction Management, Building Performance Certificate (C35190S)

These curriculums are designed to prepare individuals to apply technical knowledge and skills to the fields of architecture, construction, construction management, and other associated professions.

Course work includes instruction in sustainable building and design, print reading, building codes, estimating, construction materials and methods, and other topics related to design and construction occupations.

Graduates of this pathway should qualify for entry-level jobs in architectural, engineering, construction and trades professions as well as positions in industry and government.

A program that prepares individuals to supervise, manage, and inspect construction sites, buildings, and associated facilities. Includes instruction in site safety, personnel supervision, labor relations, diversity training, construction documentation, scheduling, resource and cost control, bid strategies, rework prevention, construction insurance and bonding, accident management and investigation, applicable law and regulations, and communication skills.

Major Requirements

Required Courses

Take 15 credits:

SST 120 - Energy Use Analysis **Credits: 3**

SST 130 - Modeling Renewable Energy **Credits: 3**

SST 140 - Green Bldg & Design Concepts **Credits: 3**

CST 150 - Building Science **Credits: 3**

Diesel and Heavy Equipment Technology, A.A.S. (A60460)

This curriculum provides training for individuals interested in becoming technicians who service and maintain the propulsion systems of boats and other types of marine and industrial equipment.

The course work includes the maintenance and repair procedures of mechanical, electrical, hydraulics equipment used on marine systems. Students will inspect and test equipment to determine the cause of faulty operation, and then repair and replace defective parts.

Graduates of the curriculum should qualify as marine technicians which may be employed in marinas, shipyards, industrial and trucking industries.

Electrical Systems Technology, A.A.S. (A35130)

The Electrical Systems Technology curriculum is designed to provide training for persons interested in the installation and maintenance of electrical/electronic systems found in residential, commercial and industrial facilities.

Training, most of which is hands-on, will include such topics as AC/DC theory, basic wiring practices, digital electronics, programmable logic controllers, industrial motor controls, the National Electric Code, and other subjects as local needs require.

Graduates should qualify for a variety of jobs in the electrical/electronic field as an on-the-job trainee or apprentice, assisting in the layout, installation, and maintenance of electrical/electronic systems.

ELC 228 - PLC Applications **Credits: 4**
Social/Behavioral Science Elective **Credits: 3**

Electronics Engineering Drone Systems(C40200DS)

A course of study that prepares the students to apply basic engineering principles and technical skills to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems. Includes instruction in mathematics, basic electricity, solid-state fundamentals, digital concepts, and microprocessors or programmable logic controllers. Graduates should qualify for employment as electronics engineering technician, field service technician, instrumentation technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Major Requirements

Take 4 credits

ELC 131 - Circuit Analysis I **Credits: 4**

Other Major Requirements

Take 12 credits

ELN 152 - Fabrication Techniques **Credits: 2**

ELN 275 - Troubleshooting **Credits: 2**

UAS 110 - Intro to UAS Operations **Credits: 3**

UAS 111 - Unmanned Aircraft Systems **Credits: 3**

UAS 115 - Small UAS Certification **Credits: 2**

Total Credits: 16

Recommended Course Sequence

Fall Semester I

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 152 - Fabrication Techniques **Credits: 2**

Spring Semester I

ELN 275 - Troubleshooting **Credits: 2**

UAS 110 - Intro to UAS Operations **Credits: 3**

UAS 111 - Unmanned Aircraft Systems **Credits: 3**

UAS 115 - Small UAS Certification **Credits: 2**

Electronics Engineering Tech, LAN Cabling Technician Certificate (C40200L)

A course of study that prepares the students to apply basic engineering principles and technical skills to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls,

manufacturing systems, communication systems, and power electronic systems. Includes instruction in mathematics, basic electricity, solid-state fundamentals, digital concepts, and microprocessors or programmable logic controllers. Graduates should qualify for employment as electronics engineering technician, field service technician, instrumentation technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Major Requirements (4 credits)

ELC 131 - Circuit Analysis I **Credits: 4**

Other Major Requirements(6 credits)

ELN 152 - Fabrication Techniques **Credits: 2**

ELN 236 - Fiber Optics and Lasers **Credits: 4**

Other Required Courses (3 credits)

CET 125 - Voice and Data Cabling **Credits: 3**

Total Credits: 13

Recommended Course Sequence

Fall Semester I

ELN 152 - Fabrication Techniques **Credits: 2**

ELC 131 - Circuit Analysis I **Credits: 4**

Spring Semester I

CET 125 - Voice and Data Cabling **Credits: 3**

ELN 236 - Fiber Optics and Lasers **Credits: 4**

Electronics Engineering Technology Certificate (C40200)

The EET Certificate Program is designed for part-time students who want to learn the fundamentals of electricity, semiconductors, and the test equipment and troubleshooting procedures found in the field of Electronics. The certificate program can be completed in one year. Certificate students can always continue on to pursue the A.A.S. 2 year degree.

General Education Requirements

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Major Requirements

Technical Core

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 131 - Analog Electronics I **Credits: 4**

ELN 133 - Digital Electronics **Credits: 4**

Other Major Requirements

Required

ELN 152 - Fabrication Techniques **Credits: 2**

Total Credits: 17

Fall Semester I

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 152 - Fabrication Techniques **Credits: 2**

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Spring Semester I

ELN 131 - Analog Electronics I **Credits: 4**

ELN 133 - Digital Electronics **Credits: 4**

Electronics Engineering Technology Diploma (D40200)

General Education Requirements

ENG 111 - Writing and Inquiry **Credits: 3**

ELN 275 - Troubleshooting **Credits: 2**

Summer Semester I

ELN 132 - Analog Electronics II **Credits: 4**

ELN 133 - Digital Electronics **Credits: 4**

Electronics Engineering Technology, A.A.S. (A40200)

The Electronics Engineering Technology curriculum prepares individuals to become technicians who build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and electronic systems.

A broad-based core of courses, including basic electricity, solid-state fundamentals, digital concepts, and microprocessors, ensures the student will develop the skills necessary to perform entry-level tasks. Emphasis is placed on developing the student's ability to analyze and troubleshoot electronic systems.

Graduates should qualify for employment as engineering assistants or electronic technicians with job titles such as electronics engineering technician, field service technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

General Education Requirements (15 credits)

Take 9 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits:

ART 111 - Art Appreciation **Credits: 3**

HUM 115 - Critical Thinking **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

Social/Behavioral Science Electives

Take 3 credits:

HIS 132 - American History II **Credits: 3**

PSY 150 - General Psychology **Credits: 3**

SOC 210 - Introduction to Sociology **Credits: 3**

Major Requirements (27 credits)

Technical Core

Take 12 credits:

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 131 - Analog Electronics I **Credits: 4**

ELN 133 - Digital Electronics **Credits: 4**

Electronics Engineering Tech

Take 15 credits:

- ELC 128 - Intro to PLC **Credits: 3**
- ELC 133 - Circuit Analysis II **Credits: 4**
- ELN 132 - Analog Electronics II **Credits: 4**
- ELN 234 - Communication Systems **Credits: 4**

Other Major Requirements (24 credits)

Required

Take 21 credits:

- CIS 110 - Introduction to Computers **Credits: 3**
- CTS 120 - Hardware/Software Support **Credits: 3**
- ELN 152 - Fabrication Techniques **Credits: 2**
- ELN 231 - Industrial Controls **Credits: 3**
- ELN 236 - Fiber Optics and Lasers **Credits: 4**
- ELN 275 - Troubleshooting **Credits: 2**
- PHY 131 - Physics-Mechanics **Credits: 4**

Electronics Engineering Technology Electives

Take 3 credits:

- ATR 112 - Intro to Automation **Credits: 3**
- CET 125 - Voice and Data Cabling **Credits: 3**
- CTS 220 - Adv Hard/Software Support **Credits: 3**
- ELC 111 - Intro to Electricity **Credits: 3**

Summer Semester I

TRF 110 - Intro Turfgrass Cult & ID **Credits: 4**

Landscape Gardening and Horticultural Science A.A.S. (A15260)

Landscape Gardening curriculum is designed to prepare individuals for various careers in horticulture. Classroom instruction and practical laboratory applications of horticultural principles and practices are included in the program of study.

Course work includes plant identification, pest management, plant science and soil science. Also included are courses in sustainable plant production and management, landscaping, and the operation of horticulture businesses.

Graduates should qualify for employment in a variety of positions associated with nurseries, garden centers, greenhouses, landscape operations, governmental agencies/parks, golf courses, sports complexes, highway vegetation, turf maintenance companies, and private and public gardens. Graduates should also be prepared to take the North Carolina Pesticide Applicator's Examination and/or the North Carolina Certified Plant Professional Examination.

Landscape Gardening: A program that prepares individuals to manage and maintain indoor and/or outdoor ornamental and recreational plants and groundcovers and related conceptual designs established by landscape architects, interior designers, enterprise owners or managers, and individual clients. Potential course work includes instruction in applicable principles of horticulture, gardening, plant and soil irrigation and nutrition, turf maintenance, plant maintenance, equipment operation and maintenance, personnel supervision, and purchasing.

General Education Requirements Credits: 15

Take 9 credits.

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

MAT 110 - Math Measurement & Literacy **Credits: 3**

Humanities/Fine Arts Electives

Take 3 credits.

ART 111 - Art Appreciation **Credits: 3**

MUS 110 - Music Appreciation **Credits: 3**

HUM 115 - Critical Thinking **Credits: 3**

Social/Behavioral Science Electives

Take 3 credits.

ANT 210 - General Anthropology **Credits: 3**

ECO 251 - Prin of Microeconomics **Credits: 3**

Landscape Gardening, Retention Pond Management Certificate (C15260R)

The Retention Pond Management Certificate Program provides a heavy concentration of hands-on retention pond management experience using retention ponds at the CFCC North Campus. Students will learn how to select aquatic and wetland plants for use around a retention pond including planting, fertilization and pruning. Students will also learn the basics of aquatic and wetland weed management and pest control and will receive the North Carolina Commercial Aquatic Pest Control license and the Commercial Pesticide Ground Applicators license.

Major Requirements

Plant Identification

HOR 160 - Plant Materials I **Credits: 3**

Pest Management

HOR 164 - Hort Pest Management **Credits: 3**

Horticulture Technology

HOR 162 - Applied Plant Science **Credits: 3**

Landscape Gardening

LSG 121 - Fall Gardening Lab **Credits: 2**

LSG 122 - Spring Gardening Lab **Credits: 2**

Total Credits: 13

Fall Semester I

HOR 160 - Plant Materials I **Credits: 3**

LSG 121 - Fall Gardening Lab **Credits: 2**

HOR 162 - Applied Plant Science **Credits: 3**

Spring Semester I

HOR 164 - Hort Pest Management **Credits: 3**

LSG 122 - Spring Gardening Lab **Credits: 2**

Landscape Gardening, Sustainable Gardening Certificate (C15260S)

These curricula are designed to prepare individuals for various careers in horticulture. Classroom instruction and practical laboratory applications of horticultural principles and practices are included in the program of study. Course work includes plant identification, pest management, plant science and soil science. Also included are courses in sustainable plant production and management, landscaping, and the operation of horticulture businesses. Graduates should qualify for employment in a variety of positions associated with nurseries, garden centers, greenhouses, landscape operations, governmental agencies/parks, golf courses, sports complexes, highway vegetation, turf maintenance companies, and private and public gardens. Graduates should also be prepared to take the North Carolina Pesticide Applicator's Examination and/or the North Carolina Certified Plant Professional Examination.

Mechanical Engineering Technology, A.A.S. (A40320)

The Mechanical Engineering Technology curriculum prepares graduates for employment as technicians in the diversified mechanical and manufacturing engineering fields. Mechanical Engineering technicians

assist in design, development, testing, process design and improvement, and troubleshooting and repair of engineered systems. Emphasis is placed on the integration of theory and hands-on application of engineering principles.

In addition to course work in engineering graphics, engineering fundamentals, materials and manufacturing processes, mathematics, and physics, students will study computer applications, critical thinking, planning and problem solving, and oral and written communications.

Graduates of the curriculum will find employment opportunities in the manufacturing or service sectors of engineering technology. Engineering technicians may obtain professional certification by application to organizations such as ASQ, SME, and NICET.

General Education Requirements

Mechatronics Engineering Technology Automation Certificate (C40350)

A course of study that prepares the students to use basic engineering principles and technical skills in developing and testing automated, servomechanical, and other electromechanical systems. Includes instruction in prototype testing, manufacturing and operational testing, systems analysis and maintenance procedures. Graduates should be qualified for employment in industrial maintenance and manufacturing including assembly, testing, startup, troubleshooting, repair, process improvement, and control systems, and should qualify to sit for Packaging Machinery Manufacturers Institute (PMMI) mechatronics or similar industry examinations.

ATR 112 - Intro to Automation **Credits: 3**

ATR 280 - Robotic Fundamentals **Credits: 4**

Mechatronics Engineering Technology, A.A.S. (A40350)

A course of study that prepares the students to use basic engineering principles and technical skills in developing and testing automated, servomechanical, and other electromechanical systems. Includes instruction in prototype testing, manufacturing and operational testing, systems analysis and maintenance procedures.

Graduates should be qualified for employment in industrial maintenance and manufacturing including assembly, testing, startup, troubleshooting, repair, process improvement, and control systems, and should qualify to sit for Packaging Machinery Manufacturers Institute (PMMI) mechatronics or similar industry examinations.

General Education Requirements

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts

HUM 115 - Critical Thinking **Credits: 3**

Social/Behavioral Sciences

PSY 150 - General Psychology **Credits: 3**

Natural Sciences/Math

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Major Requirements

Required

ATR 112 - Intro to Automation **Credits: 3**

ELC 213 - Instrumentation **Credits: 4**

Computer Applications

CIS 110 - Introduction to Computers **Credits: 3**

Safety

ISC 112 - Industrial Safety **Credits: 2**

Basic Electricity

ELC 131 - Circuit Analysis I **Credits: 4**

Drawing

DFT 151 - CAD I **Credits: 3**

Fluid Mechanics

HYD 110 - Hydraulics/Pneumatics I **Credits: 3**

Mechanical Drives

MEC 130 - Mechanisms **Credits: 3**

Machines

ELC 117 - Motors and Controls **Credits: 4**

Programmable Logic Controls

ELC 128 - Intro to PLC **Credits: 3**

Physics

PHY 131 - Physics-Mechanics **Credits: 4**

Other Major Requirements

ELC 115 - Industrial Wiring **Credits: 4**
ELC 125 - Diagrams and Schematics **Credits: 2**
ELN 231 - Industrial Controls **Credits: 3**
MEC 111 - Machine Processes I **Credits: 3**
MNT 110 - Intro to Maint Procedures **Credits: 2**
WLD 112 - Basic Welding Processes **Credits: 2**
ATR 280 - Robotic Fundamentals **Credits: 4**

Total Credits: 71

Fall Semester I

CIS 110 - Introduction to Computers **Credits: 3**
ELC 125 - Diagrams and Schematics **Credits: 2**
ELC 131 - Circuit Analysis I **Credits: 4**
ENG 111 - Writing and Inquiry **Credits: 3**
ISC 112 - Industrial Safety **Credits: 2**
MNT 110 - Intro to Maint Procedures **Credits: 2**

Spring Semester I

ELC 117 - Motors and Controls **Credits: 4**
HYD 110 - Hydraulics/Pneumatics I **Credits: 3**
MEC 130 - Mechanisms **Credits: 3**
MAT 121 - Algebra/Trigonometry I **Credits: 3**

Summer Semester I

DFT 151 - CAD I **Credits: 3**
ELC 115 - Industrial Wiring **Credits: 4**
MEC 111 - Machine Processes I **Credits: 3**

Fall Semester II

ATR 112 - Intro to Automation **Credits: 3**
ELC 128 - Intro to PLC **Credits: 3**
ELC 213 - Instrumentation **Credits: 4**
PSY 150 - General Psychology **Credits: 3**
ATR 280 - Robotic Fundamentals **Credits: 4**

Spring Semester II

ELN 231 - Industrial Controls **Credits: 3**
ENG 114 - Prof Research & Reporting **Credits: 3**
HUM 115 - Critical Thinking **Credits: 3**
PHY 131 - Physics-Mechanics **Credits: 4**
WLD 112 - Basic Welding Processes **Credits: 2**

Nuclear Technology, A.A.S. (A50460)

The Nuclear Technology curriculum prepares individuals to become qualified reactor field technicians who are employed by licensed nuclear reactor facilities.

Course work includes theory and application related to industrial and engineering technology disciplines including nuclear reactor theory, reactor systems, industrial and nuclear safety, instrumentation, electrical generation, automation and robotics, and may include quality control, welding, and various metallurgical inspection procedures.

Upon completion, graduates should qualify as entry-level nuclear reactor technicians and have academic preparations to advance into other industrial or engineering technician positions within the commercial nuclear power industry.

General Education Requirements (15 credits)

English (6 credits)

ENG 111 - Writing and Inquiry **Credits: 3**
ENG 114 - Prof Research & Reporting **Credits: 3**

Humanities/Fine Arts (3 credits)

HUM 115 - Critical Thinking **Credits: 3**

Natural Sciences/Math (3 credits)

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Social/Behavioral Science Electives (3 credits)

PSY 150 - General Psychology **Credits: 3**
SOC 210 - Introduction to Sociology **Credits: 3**
HIS 132 - American History II **Credits: 3**

Major Requirements (30 credits)

Required (27 credits)

Take:

HYD 110 - Hydraulics/Pneumatics I **Credits: 3**
ISC 130 - Intro to Quality Control **Credits: 3**
NUC 110 - Nuclear Reactor Systems **Credits: 3**
NUC 120 - Nuclear Reactor Theory **Credits: 4**
NUC 130 - Applied NDE-Nuclear **Credits: 2**
PHY 131 - Physics-Mechanics **Credits: 4**
PHY 132 - Physics-Elec & Magnetism **Credits: 4**
WLD 112 - Basic Welding Processes **Credits: 2**
WLD 143 - Welding Metallurgy **Credits: 2**

Computers (3 credits)

Take:

CIS 110 - Introduction to Computers **Credits: 3**

Other Major Requirements (19 credits)

Required Courses (13 credits)

Take:

ELC 131 - Circuit Analysis I **Credits: 4**
ISC 112 - Industrial Safety **Credits: 2**
ISC 121 - Envir Health & Safety **Credits: 3**
WBL 111 - Work-Based Learning I **Credits: 1**
MEC 111 - Machine Processes I **Credits: 3**

Nuclear Electives (6 credits)

Take 6 credits:

ATR 112 - Intro to Automation **Credits: 3**
ELC 213 - Instrumentation **Credits: 4**
ELC 230 - Wind & Hydro Power Sys **Credits: 3**
MEC 130 - Mechanisms **Credits: 3**

Engineering (3 credits)

Take:
EGR 115 - Intro to Technology **Credits: 3**

Total Credits: 67

Fall Semester I

CIS 110 - Introduction to Computers **Credits: 3**
EGR 115 - Intro to Technology **Credits: 3**
ENG 111 - Writing and Inquiry **Credits: 3**
ISC 112 - Industrial Safety **Credits: 2**
NUC 110 - Nuclear Reactor Systems **Credits: 3**
MAT 121 - Algebra/Trigonometry I **Credits: 3**

Spring Semester I

ELC 131 - Circuit Analysis I **Credits: 4**
HYD 110 - Hydraulics/Pneumatics I **Credits: 3**
Nuclear Technology Elective **Credits: 3**
Social Behavioral Elective **Credits: 3**

Summer I

PHY 131 - Physics-Mechanics **Credits: 4**
WLD 112 - Basic Welding Processes **Credits: 2**
Nuclear Technology Elective **Credits: 3**
ISC 121 - Envir Health & Safety **Credits: 3**

Fall Semester II

ENG 114 - Prof Research & Reporting **Credits: 3**
PHY 132 - Physics-Elec & Magnetism **Credits: 4**
NUC 120 - Nuclear Reactor Theory **Credits: 4**
HUM 115 - Critical Thinking **Credits: 3**

Spring Semester II

WBL 111N - Work-Based Learning I Nuc Tech **Credits: 1**

Summer II

ISC 130 - Intro to Quality Control **Credits: 3**

MEC 111 - Machine Processes I **Credits: 3**

NUC 130 - Applied NDE-Nuclear **Credits: 2**

WLD 143 - Welding Metallurgy **Credits: 2**

Note:

Actual course sequence may vary from that stated above depending upon prior college credits. Contact the Lead Instructor regarding individual schedule and course selections.

This program includes a cooperative work experience course at a nuclear power plant that requires students to meet Federal regulations for fitness for duty and access authorization. Prior to registering for WBL 111N, students must complete a process that supports the security criteria for their assigned nuclear plant that includes a background check, drug screen, and psychological assessment. The college has agreements with the service providers of this process and students will be charged a fee that totals about \$150. Please contact the Lead Instructor, Nuclear Technology for further details.

Plumbing Certificate (C35300)

Major Requirements

Required

PLU 110 - Modern Plumbing **Credits: 9**

Technical Core

BPR 130 - Print Reading-Construction **Credits: 3**

Other Major Requirements

PLU 140 - Intro to Plumbing Codes **Credits: 2**

PLU 150 - Plumbing Diagrams **Credits: 2**

Total Credits: 16

Fall Semester I

PLU 110 - Modern Plumbing **Credits: 9**

BPR 130 - Print Reading-Construction **Credits: 3**

Spring Semester I

PLU 140 - Intro to Plumbing Codes **Credits: 2**

PLU 150 - Plumbing Diagrams **Credits: 2**

Plumbing Diploma (D35300)

These curriculums are designed to prepare individuals to apply technical knowledge and skills to the fields of architecture, construction, construction management, and other associated professions.

Course work includes instruction in sustainable building and design, print reading, building codes, estimating, construction materials and methods, and other topics related to design and construction occupations.

Graduates of this pathway should qualify for entry-level jobs in architectural, engineering, construction and trades professions as well as positions in industry and government. A program that prepares individuals to work in the field of plumbing by applying technical knowledge and skills to lay out, assemble, install, and maintain piping fixtures and systems for natural gas, lp gas, hot water, drainage, sprinkling, and plumbing processing systems in residential and commercial environments. Includes instruction in source determination, water service and distribution, waste removal, pressure adjustment, basic physics, technical mathematics, print reading, pipe installation, pumps, soldering, plumbing inspection, and applicable codes and standards.

General Education Requirements

English

ENG 101 - Applied Communications I **Credits: 3**

Math and Algebra

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements

Required

Welding Technology Certificate (C50420C)

Major Requirements (15 credits)

Take 15 credits:

WLD 110 - Cutting Processes **Credits: 2**
WLD 115 - SMAW (Stick) Plate **Credits: 5**
WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**
WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

Total Credits: 15

Fall Semester I

WLD 110 - Cutting Processes **Credits: 2**

WLD 115 - SMAW (Stick) Plate **Credits: 5**

Spring Semester I

WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

Welding Technology Diploma (D50420)

The Welding Technology curriculum provides students with a sound understanding of the science, technology, and applications essential for successful employment in the welding and metal industry.

Instruction includes consumable and non-consumable electrode welding and cutting processes. Courses in math, blueprint reading, metallurgy, welding inspection, and destructive and non-destructive testing provides the student with industry-standard skills developed through classroom training and practical application.

Successful graduates of the Welding Technology curriculum may be employed as entry level technicians in welding and metalworking industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.

General Education Requirements (6 credits)

Take 6 credits:

ENG 101 - Applied Communications I **Credits: 3**

MAT 110 - Math Measurement & Literacy **Credits: 3**

Major Requirements (18 credits)

Take 18 credits:

WLD 110 - Cutting Processes **Credits: 2**

WLD 115 - SMAW (Stick) Plate **Credits: 5**

WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

WLD 131 - GTAW (TIG) Plate **Credits: 4**

WLD 141 - Symbols & Specifications **Credits: 3**

Other Major Requirements (18 credits)

Take 18 credits:

- CIS 111 - Basic PC Literacy **Credits: 2**
- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**
- WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**
- WLD 143 - Welding Metallurgy **Credits: 2**
- WLD 215 - SMAW (stick) Pipe **Credits: 4**
- WLD 231 - GTAW (TIG) Pipe **Credits: 3**

Total Credits: 42

Fall Semester I

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 115 - SMAW (Stick) Plate **Credits: 5**
- WLD 131 - GTAW (TIG) Plate **Credits: 4**
- WLD 141 - Symbols & Specifications **Credits: 3**
- MAT 110 - Math Measurement & Literacy **Credits: 3**

Spring Semester I

- CIS 111 - Basic PC Literacy **Credits: 2**
- ENG 101 - Applied Communications I **Credits: 3**
- WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**
- WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**
- WLD 143 - Welding Metallurgy **Credits: 2**

Summer Semester I

- WLD 215 - SMAW (stick) Pipe **Credits: 4**
- WLD 231 - GTAW (TIG) Pipe **Credits: 3**

Welding Technology, GTAW/GMAW Certificate (C50420F)

Major Requirements

- WLD 110 - Cutting Processes **Credits: 2**
- WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

WLD 131 - GTAW (TIG) Plate **Credits: 4**

Major Requirements

WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**

Total Credits: 13

Fall Semester I

WLD 110 - Cutting Processes **Credits: 2**

WLD 131 - GTAW (TIG) Plate **Credits: 4**

Spring Semester I

WLD 132 - GTAW (TIG) Plate/Pipe **Credits: 3**

WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

Welding Technology, SMAW/GTAW Certificate (C50420)

Major Requirements

WLD 110 - Cutting Processes **Credits: 2**

WLD 115 - SMAW (Stick) Plate **Credits: 5**

WLD 131 - GTAW (TIG) Plate **Credits: 4**

Major Requirements

WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

Total Credits: 15

Fall Semester I

WLD 110 - Cutting Processes **Credits: 2**

WLD 115 - SMAW (Stick) Plate **Credits: 5**

WLD 131 - GTAW (TIG) Plate **Credits: 4**

Spring Semester I

WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

Programs for Dually Enrolled High School Students (Career and College Promise)

Electronics Engineering Technology CTE Pathway (C40200CP)

A course of study that prepares the students to apply basic engineering principles and technical skills to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems. Includes instruction in mathematics, basic electricity, solid-state fundamentals, digital concepts, and microprocessors or programmable logic controllers. Graduates should qualify for employment as electronics engineering technician, field service technician, instrumentation technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

General Education Requirement (3 credits)

MAT 121 - Algebra/Trigonometry I **Credits: 3**

Major Requirements (12 credits)

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 131 - Analog Electronics I **Credits: 4**

ELN 133 - Digital Electronics **Credits: 4**

Other Major Requirements (3 credits)

ELC 128 - Intro to PLC **Credits: 3**

Total Credits: 18

Mechanical Engineering, CAD Drafting CTE Pathway (C40320DP)

Major Hours

Core

DFT 151 - CAD I **Credits: 3**

DFT 154 - Intro Solid Modeling **Credits: 3**

Other Major Hours

DFT 111 - Technical Drafting I **Credits: 2**

DFT 111A - Technical Drafting I Lab **Credits: 1**

DFT 112 - Technical Drafting II **Credits: 2**

DFT 112A - Technical Drafting II Lab **Credits: 1**

Total Hours: 12

Fall Semester I

DFT 111 - Technical Drafting I **Credits: 2**

DFT 111A - Technical Drafting I Lab **Credits: 1**

DFT 151 - CAD I **Credits: 3**

Spring Semester I

DFT 112 - Technical Drafting II **Credits: 2**

DFT 112A - Technical Drafting II Lab **Credits: 1**

DFT 154 - Intro Solid Modeling **Credits: 3**

Programs for Dually Enrolled High School Students (Career and College Promise)

Programs for Dually Enrolled High School Students (Career and College Promise)

Career and Technical Education Pathways

University Transfer Pathways

University Transfer Pathways

Associate in Engineering College Transfer Pathway (CCP) (P1052C)

The Associate in Engineering (AE) degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and basic computer use.

The degree plan includes required general education and prerequisite courses that are acceptable to all state funded Bachelor of Engineering programs. Students who follow the degree progression plan will meet the entrance requirements at all of the North Carolina public Bachelor of Science Engineering programs. Associate in Engineering graduates may then apply to any of these programs without taking additional and sometimes duplicative courses. *Admission to Engineering programs is highly competitive and admission is not guaranteed.*

To be eligible for the transfer of credits under the AE to the Bachelor of Science in Engineering Articulation Agreement, community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.5 on a 4.0 scale.

General Education Requirements (28 credits)

English Composition

ENG 111 - Writing and Inquiry **Credits: 3**

ENG 112 - Writing/Research in the Disc **Credits: 3**

Humanities/Fine Arts

Take 3 credits:

COM 231 - Public Speaking **Credits: 3**

ENG 231 - American Literature I **Credits: 3**

ENG 232 - American Literature II **Credits: 3**

ENG 241 - British Literature I **Credits: 3**

ENG 242 - British Literature II **Credits: 3**

PHI 240 - Introduction to Ethics **Credits: 3**

Social/Behavioral Sciences

ECO 251 - Prin of Microeconomics **Credits: 3**

Mathematics

MAT 271 - Calculus I **Credits: 4**
MAT 272 - Calculus II **Credits: 4**

Natural Sciences

Take 8 credits:

CHM 151 - General Chemistry I **Credits: 4**
PHY 251 - General Physics I **Credits: 4**
PHY 252 - General Physics II **Credits: 4**

Other Required Hours (6 credits)

ACA 122 - College Transfer Success **Credits: 1**
DFT 170 - Engineering Graphics **Credits: 3**
EGR 150 - Intro to Engineering **Credits: 2**

Total Credits: 34

Optional General Education Hours

A student may take up to 8 SHC of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

College Transfer Pathway - Associate in Arts CCP (P1012C)

General Education Requirements (31 credits)

English Composition

Take 6 credits from the following:

ENG 111 - Writing and Inquiry **Credits: 3**
ENG 112 - Writing/Research in the Disc **Credits: 3**

COM/Humanities/Fine Arts

Take 9 credits from the following:

ART 111 - Art Appreciation **Credits: 3**

ART 114 - Art History Survey I **Credits: 3**
ART 115 - Art History Survey II **Credits: 3**
COM 120 - Intro Interpersonal Com **Credits: 3**
COM 231 - Public Speaking **Credits: 3**

Art

Take 6 credits:

ART 121 - Two-Dimensional Design **Credits: 3**

ART 131 - Drawing I **Credits: 3**

Total Credits: 32

Optional General Education Hours

A student may take up to 8 SHC of foreign language courses, in a single language, designated as General Education in the CAA as a part of this pathway. These courses are not a part of the Universal General Education Transfer Component. Students who complete these courses with a grade of "C" or better will receive transfer credit. The receiving university will determine whether the courses will count as general education, pre-major, or elective credit.

College Transfer Pathway - Associate in General Education, Nursing CCP (P1032C)

The Associate in General Education (AGE)-Nursing is designed for students who wish to begin their study toward the Associate in Nursing degree and a Baccalaureate degree in Nursing as based on Blocks 1 through 3 of the Uniform Articulation Agreement between the University of North Carolina's Registered Nurse (RN) to Bachelor of Science in Nursing (BSN) programs and the North Carolina Community College Associate Degree Nursing Programs which was approved by the State Board of Community Colleges and the UNC Board of Governors in February 2015. The AGE-Nursing shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of courses.

A student who completes an Associate in Applied Science (AAS) in Nursing with a GPA of at least 2.0 and a grade of C or better in the AGE-Nursing courses listed below and who holds a current unrestricted license as a Registered Nurse in North Carolina will have fulfilled the UNC institutions lower-division general education requirements as well as nursing program entry requirements. However, because nursing program admissions are competitive, no student is guaranteed admission to the program of his or her choice.

General Education (23 credits)

English Composition

Group 1: Take 3 credits:

ENG 111 - Writing and Inquiry **Credits: 3**

Group 2: Take 3 credits:

College Transfer Pathway - Associate in Science CCP (P1042C)

The Associate in Science degree shall be granted for a planned program of study consisting of a minimum of 60 semester hours of credit (SHC) of college transfer courses. Within the degree program, the institution shall include opportunities for the achievement of competence in reading, writing, oral communication, fundamental mathematical skills, and the basic computer use.

The Comprehensive Articulation Agreement (CAA) and the Independent Comprehensive Articulation Agreement (ICAA) enables North Carolina community college graduates of two-year associate in science programs who are admitted to constituent institutions of The University of North Carolina and to Signatory Institutions of North Carolina Independent Colleges and Universities to transfer with junior status.

Community college graduates must obtain a grade of "C" or better in each course and an overall GPA of at least 2.0 on a 4.0 scale in order to transfer with a junior status. Courses may also transfer through bilateral agreements between institutions. GENERAL ED

Advertising and Graphic Design CTE Pathway(C30100CP)

The Advertising and Graphic Design curriculum is designed to provide students with knowledge and skills necessary for employment in the graphic design profession which emphasizes design, advertising, illustration, and digital and multimedia preparation of printed and electronic promotional materials.

Students will be trained in the development of concept and design for promotional materials such as newspaper and magazine advertisements, posters, folders, letterheads, corporate symbols, brochures, booklets, preparation of art for printing, lettering and typography, photography, and electronic media.

Graduates should qualify for employment opportunities with graphic design studios, advertising agencies, printing companies, department stores, a wide variety of manufacturing industries, newspapers, and businesses with in-house graphics operations.

Major Requirements

Required Courses

GRD 110 - Typography I **Credits: 3**

GRD 131 - Illustration I **Credits: 2**

GRD 142 - Graphic Design II **Credits: 4**

GRD 151 - Computer Design Basics **Credits: 3**

ART 121 - Two-Dimensional Design **Credits: 3**

ART 121 - Two-Dimensional Design **Credits: 3**

ART 131 - Drawing I **Credits: 3**

Fall Semester I

GRD 110 - Typography I **Credits: 3**

GRD 151 - Computer Design Basics **Credits: 3**

Spring Semester II

GRD 131 - Illustration I **Credits: 2**

GRD 142 - Graphic Design II **Credits: 4**

Air Conditioning Heating and Refrigeration Technology CCP (C35100CP)

Programs that prepare individuals to apply technical knowledge and skills related to the fields of architecture, construction, and associated professions. Includes instruction that can be applied to a variety of careers in the design-construction industry, including employment with architectural and engineering firms, residential and commercial builders/contractors, and other construction related occupations.

Major Requirements (12 Credits)

AHR 110 - Intro to Refrigeration **Credits: 5**

AHR 111 - HVACR Electricity **Credits: 3**

AHR 114 - Heat Pump Technology **Credits: 4**

Total Credits: 12

Course Sequence

Fall I

AHR 110 - Intro to Refrigeration **Credits: 5**

Spring I

AHR 111 - HVACR Electricity **Credits: 3**

AHR 114 - Heat Pump Technology **Credits: 4**

Air Conditioning, Heating & Refrigeration - Commercial Refrigeration CTE Pathway (C35100RP)

The Air Conditioning, Heating, and Refrigeration Technology curriculum provides the basic knowledge to develop skills necessary to work with residential and light commercial systems. Topics include mechanical refrigeration, heating and cooling theory, electricity, controls, and safety. The diploma program covers air conditioning, furnaces, heat pumps, tools and instruments. In addition, the AAS degree covers residential building codes, residential system sizing, and advanced comfort systems.

Major Requirements (14 credits)

Required Courses

Take 14 credits:

AHR 110 - Intro to Refrigeration **Credits: 5**

AHR 111 - HVACR Electricity **Credits: 3**

AHR 115 - Refrigeration Systems **Credits: 2**

AHR 215 - Commercial HVAC Controls **Credits: 2**

AHR 245 - Chiller Systems **Credits: 2**

Total Credits: 14

Fall Semester I

AHR 110 - Intro to Refrigeration **Credits: 5**

AHR 111 - HVACR Electricity **Credits: 3**

Spring Semester I

AHR 115 - Refrigeration Systems **Credits: 2**

AHR 215 - Commercial HVAC Controls **Credits: 2**

AHR 245 - Chiller Systems **Credits: 2**

Architectural Technology CTE Pathway (C40100CP)

A program that prepares individuals to assist architects, engineers, and construction professionals in developing plans and related documentation for residential and commercial projects in both the private

and public sectors. Includes instruction in architectural drafting, computer-assisted drafting, construction materials and methods, environmental systems, codes and standards, structural principles, cost estimation, planning, graphics, and presentation.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

ARC 114 - Architectural CAD **Credits: 2**

Other Major Requirements (6 credits)

ARC 225 - Architectural BIM I **Credits: 2**

ARC 225A - Architectural BIM I Lab **Credits: 1**

ARC 114A - Architectural CAD Lab **Credits: 1**

ARC 220 - Adv Architect CAD **Credits: 2**

Total Credits: 15

Automotive Customizing Technology CTE Pathway (C60190CP)

A program that prepares individuals to modify existing automotive vehicle components, fabrication techniques to create custom vehicle components, non-structural damage repair, custom painting and refinishing techniques, custom upholstery and glass removal/replacement/custom modifications, and other automotive technology related systems.

Major Requirements (2 credits)

TRN 110 - Intro to Transport Tech **Credits: 2**

Other Major Requirements (12 credits)

AUC 114 - Custom Fiberglass Skills **Credits: 4**

AUC 115 - Glass Customizing Methods **Credits: 4**

AUC 117 - Custom Airbrushing **Credits: 4**

Total Credits: 14

Automotive Systems Technology CTE Pathway (C60160CP)

A program that prepares individuals to apply technical knowledge and skills to repair, service, and maintain all types of automobiles. Includes instruction in brake systems, electrical systems, engine performance, engine repair, suspension and steering, automatic and manual transmissions and drive trains, and heating and air condition systems

Major Requirements (13 credits)

AUT 141 - Suspension & Steering Sys **Credits: 3**

AUT 151 - Brake Systems **Credits: 3**

TRN 110 - Intro to Transport Tech **Credits: 2**

TRN 130 - Intro to Sustainable Transp **Credits: 3**

TRN 140 - Transp Climate Control **Credits: 2**

Other Major Requirements (4 credits)

AUT 141A - Suspension & Steering Lab **Credits: 1**

AUT 151A - Brakes Systems Lab **Credits: 1**

TRN 140A - Transp Climate Cont Lab **Credits: 2**

Total Credits: 17

Baking and Pastry Arts CTE Pathway (C55130CP)

This curriculum is designed to provide students with the skills and knowledge required for employment in the baking/pastry industry, including restaurants, hotels, independent bakeries/pastry shops, wholesale/retail markets, and high-volume bakeries, and/or further academic studies.

Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism. Course work includes specialty/artisanal breads, desserts/pastries, decorative work, high-volume production and food marketing.

Graduates should qualify for entry-level positions, such as pastry/bakery assistant, area pastry chef and assistant pastry chef. American Culinary Federation certification may be available to graduates.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (12 credits)

BPA 150 - Artisan & Specialty Bread **Credits: 4**
BPA 210 - Cake Design & Decorating **Credits: 3**
CUL 110 - Sanitation & Safety **Credits: 2**
CUL 160 - Baking I **Credits: 3**

Other Major Requirements (4 credits)

BPA 165 - Hot and Cold Desserts **Credits: 3**
CUL 110A - Sanitation & Safety Lab **Credits: 1**

Total Credits: 16

Boat Building CTE Pathway (C35120CP)

The Boat Building curriculum prepares individuals for employment in the boat building and boat repair industry. Today's boat builders are highly skilled craftspeople who can create complex shapes out of wood.

Course work includes reading boat plans, lofting, setting up the building jig, fashioning the structural timbers, and different planking techniques. Interior

joinery, exterior joinery, and yacht rigging is also covered.

Graduates may find work with yacht manufacturers, high end furniture shops, architectural millwork shops, and companies installing built in furniture in homes. Other opportunities can be found in boat maintenance and repair yards.

Major Requirements (12 credits)

BTB 101 - Boat Building I **Credits: 10**

DFT 100 - Marine Drafting **Credits: 2**

Total Credits: 12

Business Administration Certificate CTE Pathway (C25120DP)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (3 credits)

Computer Applications

Take:

CIS 110 - Introduction to Computers **Credits: 3**

Other Required Courses (12 credits)

Take:

CTS 130 - Spreadsheet **Credits: 3**

DBA 110 - Database Concepts **Credits: 3**

OMT 156 - Problem-Solving Skills **Credits: 3**

OST 136 - Word Processing **Credits: 3**

Total credits: 15 SHC

Recommended Course Sequence

Fall Semester I

CIS 110 - Introduction to Computers **Credits: 3**

OMT 156 - Problem-Solving Skills **Credits: 3**

Spring Semester I

OST 136 - Word Processing **Credits: 3**

CTS 130 - Spreadsheet **Credits: 3**

DBA 110 - Database Concepts **Credits: 3**

Business Administration, Banking and Finance CTE Pathway (C25120BP)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements

Take 1 course

CIS 110 - Introduction to Computers **Credits: 3**

Concentration Requirements (3 credits)

BAF 110 - Principles of Banking **Credits: 3**

Other Requirements (9 credits)

BAF 111 - Teller Training **Credits: 3**

BAF 232 - Consumer Lending **Credits: 3**

or

BAF 234 - Residential Mort Lending **Credits: 3**

BUS 125 - Personal Finance **Credits: 3**

Total Credits: 18

Fall Semester I

BAF 110 - Principles of Banking **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

Spring Semester I

BAF 111 - Teller Training **Credits: 3**

BUS 125 - Personal Finance **Credits: 3**

BAF 232 - Consumer Lending **Credits: 3**

or

BAF 234 - Residential Mort Lending **Credits: 3**

Business Administration, Business Admin CTE Pathway (C25120CP)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Major Requirements (13 credits)

ACC 120 - Prin of Financial Accounting **Credits: 4**

BUS 110 - Introduction to Business **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

MKT 120 - Principles of Marketing **Credits: 3**

Total Credits: 13

Fall Semester I

ACC 120 - Prin of Financial Accounting **Credits: 4**

BUS 110 - Introduction to Business **Credits: 3**

Spring Semester I

CIS 110 - Introduction to Computers **Credits: 3**

MKT 120 - Principles of Marketing **Credits: 3**

Business Administration, Customer Service CTE Pathway (C25120UP)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Major Requirements (15 credits)

BUS 110 - Introduction to Business **Credits: 3**
BUS 137 - Principles of Management **Credits: 3**
ECO 151 - Survey of Economics **Credits: 3**
INT 110 - International Business **Credits: 3**
MKT 223 - Customer Service **Credits: 3**

Other Major Requirements (3 credits)

Take 3 credits from the following courses:

MKT 224 - International Marketing **Credits: 3**

Total Credits: 18

Fall Semester I

BUS 110 - Introduction to Business **Credits: 3**
ECO 151 - Survey of Economics **Credits: 3**
INT 110 - International Business **Credits: 3**

Spring Semester I

MKT 224 - International Marketing **Credits: 3**
BUS 137 - Principles of Management **Credits: 3**
MKT 223 - Customer Service **Credits: 3**

Business Administration, Mgmt and Supervision CTE Pathway (C25120AP)

The Business Administration curriculum is designed to introduce students to the various aspects of the free enterprise system. Students will be provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as accounting, business law, economics, management, and marketing. Skills related to the application of these concepts are developed through the study of computer applications, communication, team building, and decision making. Through these skills, students will have a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small business or industry.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Concentration Requirements (12 credits)

INT 110 - International Business **Credits: 3**

General Business Administration

Take 9 credits

BUS 110 - Introduction to Business **Credits: 3**

BUS 135 - Principles of Supervision **Credits: 3**

BUS 137 - Principles of Management **Credits: 3**

Other Requirements (6 credits)

OMT 156 - Problem-Solving Skills **Credits: 3**

PMT 110 - Intro to Project Mgmt **Credits: 3**

Total Credits: 18

Fall Semester I

BUS 110 - Introduction to Business **Credits: 3**

INT 110 - International Business **Credits: 3**

Spring Semester I

BUS 135 - Principles of Supervision **Credits: 3**

BUS 137 - Principles of Management **Credits: 3**

PMT 110 - Intro to Project Mgmt **Credits: 3**

Business Analytics CTE Pathway (C25350CP)

The Business Analytics curriculum is designed to provide students with the knowledge and the skills necessary for employment and growth in analytical professions. Business analysts process and analyze essential information about business operations and also assimilate data for forecasting purposes.

Students will complete course work in business analytics, including general theory, best practices, data mining, data warehousing, predictive modeling, project and operations management, statistical analysis, and software packages. Related skills include business communication, critical thinking and decision making.

Graduates should qualify for employment as data technicians, data scientists, business and data analytics engineers, and business analysts in the fields of finance, banking, logistics, marketing, healthcare, manufacturing, information technology, and government organizations.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Required Courses (18 credits)

Take the following courses:

BAS 120 - Intro to Analytics **Credits: 3**

BAS 121 - Data Visualization **Credits: 3**

BAS 150 - Intro to Analytical Program. **Credits: 3**

BAS 220 - Appl. Analytical Program. **Credits: 3**

BUS 110 - Introduction to Business **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

Total Credits: 18

Recommended Course Sequence

Fall Semester I

BAS 120 - Intro to Analytics **Credits: 3**

CIS 110 - Introduction to Computers **Credits: 3**

BAS 150 - Intro to Analytical Program. **Credits: 3**

Spring Semester I

BUS 110 - Introduction to Business **Credits: 3**

BAS 121 - Data Visualization **Credits: 3**

BAS 220 - Appl. Analytical Program. **Credits: 3**

Chemical Technology CCP (C20120CP)

The Chemical Technology curriculum prepares individuals for work as analytical technicians in chemical laboratories associated with chemical production, environmental concerns, pharmaceuticals, or general analysis.

Course work includes general chemistry, organic chemistry, introductory chemical engineering, qualitative analysis, and quantitative analysis, including such instrumental techniques as spectroscopy (UV-Vis, IR, AA) and chromatography (GC, LC). Students also utilize computerized data collection, reduction, and graphic presentation.

Graduates should qualify as entry-level chemical laboratory technicians. Their duties may include chemical solution preparation; raw material, product, or environmental sampling; and/or sample testing via wet chemistry or instrumental techniques.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

General Education Requirements

CHM 151 - General Chemistry I **Credits: 4**

Major Requirements

CTC 110 - Chemical Safety & Technology **Credits: 2**

CTC 114 - Wet Laboratory Techniques **Credits: 5**

CTC 115 - Quality Control Laboratory **Credits: 5**

Total Credits: 16

Collision Repair and Refinishing Technology CTE Pathway (C60130CP)

A program that prepares individuals to apply technical knowledge and skills to repair, reconstruct and finish automobile bodies, fenders, and external features. Includes instruction in structure analysis, damage repair, non-structural analysis, mechanical and electrical components, plastics and adhesives, painting and refinishing techniques, and damage analysis and estimating.

Major Requirements (12 credits)

AUB 111 - Painting & Refinishing I **Credits: 4**

AUB 121 - Non-Structural Damage I **Credits: 3**

TRN 110 - Intro to Transport Tech **Credits: 2**

TRN 180 - Basic Welding for Transp **Credits: 3**

Total Credits: 12

Community Spanish Interpreter CTE Pathway (C55370CP)

The Community Spanish Interpreter curriculum prepares individuals to work as entry-level bilingual professionals who will provide communication access in interview and interactive settings. In addition, this curriculum provides educational training for working professionals who want to acquire Spanish language

skills.

Course work includes the acquisition of Spanish: grammar, structure, and sociolinguistic properties, cognitive processes associated with interpretation between Spanish and English; the structure and character of the Hispanic community; and acquisition of communication skills.

Graduates should qualify for entry-level jobs as para-professional bilingual employees in educational systems or a variety of community settings. Individuals may choose from part-time, full-time, or self-employment/free-lance positions, or apply language skills to other human service related areas.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (17 credits)

SPA 111 - Elementary Spanish I **Credits: 3**

SPA 112 - Elementary Spanish II **Credits: 3**

SPA 120 - Spanish for the Workplace **Credits: 3**

SPA 181 - Spanish Lab 1 **Credits: 1**

SPA 182 - Spanish Lab 2 **Credits: 1**

SPI 113 - Intro. to Spanish Inter. **Credits: 3**

SPI 243 - Medical Interpreting I **Credits: 3**

Total Credits: 17

Computer-Integrated Machining CTE Pathway (C50210CP)

The Computer-Integrated Machining curriculum prepares students with the analytical, creative and innovative skills necessary to take a production idea from an initial concept through design, development and production, resulting in a finished product.

Coursework may include manual machining, computer applications, engineering design, computer-aided drafting (CAD), computer-aided machining (CAM), blueprint interpretation, advanced computerized numeric control (CNC) equipment, basic and advanced machining operations, precision measurement and high-speed multi-axis machining.

Graduates should qualify for employment as machining technicians in high-tech manufacturing, rapid-prototyping and rapid-manufacturing industries, specialty machine shops, fabrication industries, and high-tech or emerging industries such as aerospace, aviation, medical, and renewable energy, and to sit for machining certification examinations.

Major Requirements

Required Courses

Take 12 credits

MAC 111 - Machining Technology I **Credits: 6**

MAC 112 - Machining Technology II **Credits: 6**

Total Credits: 12

Fall Semester I

MAC 111 - Machining Technology I **Credits: 6**

Spring Semester I

MAC 112 - Machining Technology II **Credits: 6**

Construction Management Technology CTE Pathway (C35190CP)

A program that prepares individuals to supervise, manage, and inspect construction sites, buildings, and associated facilities. Includes instruction in site safety, personnel supervision, labor relations, diversity training, construction documentation, scheduling, resource and cost control, bid strategies, rework

prevention, construction insurance and bonding, accident management and investigation, applicable law and regulations, and communication skills.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (12 credits)

BPR 130 - Print Reading-Construction **Credits: 3**

CMT 212 - Total Safety Performance **Credits: 3**

CST 241 - Planning/Estimating I **Credits: 3**

CMT 210 - Construction Management Fund **Credits: 3**

Other Major Requirements (6 credits)

CMT 214 - Planning and Scheduling **Credits: 3**

CMT 218 - Human Relations Issues **Credits: 3**

Total Credits: 18

Construction Management Technology, Framing CTE Pathway (C35190FP)

A program that prepares individuals to supervise, manage, and inspect construction sites, buildings, and associated facilities. Includes instruction in site safety, personnel supervision, labor relations, diversity training, construction documentation, scheduling, resource and cost control, bid strategies, rework prevention, construction insurance and bonding, accident management and investigation, applicable law and regulations, and communication skills.

Major Requirements (6 credits)

BPR 130 - Print Reading-Construction **Credits: 3**

CMT 120 - Codes and Inspections **Credits: 3**

Other Major Requirements (8 credits)

CST 111 - Construction I **Credits: 4**

CST 112 - Construction II **Credits: 4**

Total Credits: 14

This CTE Pathway matches a local certificate (C35190F).

Recommended Course Sequence

Fall Semester I

BPR 130 - Print Reading-Construction **Credits: 3**

CST 111 - Construction I **Credits: 4**

Spring Semester I

CMT 120 - Codes and Inspections **Credits: 3**

CST 112 - Construction II **Credits: 4**

Cosmetology Certificate CTE Pathway, C55140CP

The Cosmetology curriculum is designed to provide competency-based knowledge, scientific/artistic principles, and hands-on fundamentals associated with the cosmetology industry. The curriculum provides a simulated salon environment which enables students to develop manipulative skills.

Course work includes instruction in all phases of professional imaging, hair design, chemical processes, skin care, nail care, multi-cultural practices, business/computer principles, product knowledge, and other selected topics.

Graduates should qualify to sit for the State Board of Cosmetic Arts examination. Upon successfully passing the State Board exam, graduates will be issued a license. Employment is available in beauty salons and related businesses.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (32 credits)

Required Courses (32 credits)

Take:

COS 111 - Cosmetology Concepts I **Credits: 4**

COS 112 - Salon I **Credits: 8**

COS 113 - Cosmetology Concepts II **Credits: 4**

COS 114 - Salon II **Credits: 8**

COS 115 - Cosmetology Concepts III **Credits: 4**

COS 116 - Salon III **Credits: 4**

Other Major Requirements (2 credits)

Take:

COS 224 - Trichology & Chemistry **Credits: 2**

Total credits: 34

Recommended Course Sequence

Criminal Justice Technology CTE Pathway (C55180CP)

The Criminal Justice Technology curriculum is designed to provide knowledge of criminal justice systems and operations. Study will focus on local, state, and federal law enforcement, judicial processes, corrections, and security services. The criminal justice system's role within society will be explored.

Emphasis is on criminal justice systems, criminology, juvenile justice, criminal and constitutional law, investigative principles, ethics, and community relations. Additional study may include issues and concepts of government, counseling, communications, computers, and technology.

Employment opportunities exist in a variety of local, state, and federal law enforcement, corrections, and security fields. Examples include police officer, deputy sheriff, county detention officer, state trooper, intensive probation/parole surveillance officer, correctional officer, and loss prevention specialist.

Major Requirements (13 credits)

CJC 111 - Intro to Criminal Justice **Credits: 3**

CJC 112 - Criminology **Credits: 3**

CJC 113 - Juvenile Justice **Credits: 3**

CJC 221 - Investigative Principles **Credits: 4**

Total Credits: 13

Culinary Arts CTE Pathway (C55150CP)

This curriculum provides specific training required to prepare students to assume positions as trained culinary professionals in a variety of foodservice settings including full service restaurants, hotels, resorts, clubs, catering operations, contract food service and health care facilities. Students will be provided theoretical knowledge/practical applications that provide critical competencies to meet industry demands, including environmental stewardship, operational efficiencies and professionalism.

Courses include sanitation/safety, baking, garde manger, culinary fundamentals/production skills, nutrition, customer service, purchasing/cost control, and human resource management.

Graduates should qualify for entry-level opportunities including prep cook, line cook, and station chef. American Culinary Federation certification may be

available to graduates. With experience, graduates may advance to positions including sous chef, pastry chef, executive chef, or foodservice manager.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (12 credits)

CUL 110 - Sanitation & Safety **Credits: 2**

CUL 140 - Culinary Skills I **Credits: 5**

CUL 240 - Culinary Skills II **Credits: 5**

Other Major Requirements (6 credits)

CUL 110A - Sanitation & Safety Lab **Credits: 1**

CUL 130 - Menu Design **Credits: 2**

CUL 160 - Baking I **Credits: 3**

Total Credits: 18

Cyber Crime CTE Pathway (C55210CP)

Major Hours

Core

CCT 110 - Intro to Cyber Crime **Credits: 3**
CCT 112 - Ethics & High Technology **Credits: 3**
CCT 121 - Computer Crime Invest. **Credits: 4**
NET 110 - Networking Concepts **Credits: 3**

Total Credits: 13

Fall Semester I

CCT 110 - Intro to Cyber Crime **Credits: 3**
CCT 112 - Ethics & High Technology **Credits: 3**

Spring Semester II

NET 110 - Networking Concepts **Credits: 3**
CCT 121 - Computer Crime Invest. **Credits: 4**

Diesel and Heavy Equipment Technology CCP (C60460CP)

A program that prepares individuals to apply technical knowledge and skills to repair, service, and maintain diesel engines in vehicles such as Heavy Duty Trucks over one ton classification, buses, ships, railroad locomotives, and equipment; as well as stationary diesel engines in electrical generators and related equipment.

Major Requirements (17 Credits)

HET 110 - Diesel Engines **Credits: 6**
MRN 121 - Marine Engines **Credits: 4**
TRN 110 - Intro to Transport Tech **Credits: 2**
TRN 120 - Basic Transp Electricity **Credits: 5**

Total Credits: 17

Course Sequence

Fall I

TRN 110 - Intro to Transport Tech **Credits: 2**
TRN 120 - Basic Transp Electricity **Credits: 5**

Spring I

HET 110 - Diesel Engines **Credits: 6**

MRN 121 - Marine Engines **Credits: 4**

Early Childhood Education, Infant/Toddler CTE Pathway(C55220IP)

The curriculum prepares individuals to work with children from infancy to three years of age in diverse learning environments. Students will combine learned theories, competency-based knowledge, and practice in actual settings with infants and toddlers.

Course work includes infant/toddler growth and development: physical/nutritional needs of infants and toddlers; safety issues in the care of infants and toddlers; care and guidance; communication skills with families and children; design an implementation of appropriate curriculum; and other related topics.

Graduates should be prepared to plan and implement developmentally appropriate infant/toddler programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Early Head Start Programs, and other infant/toddler programs.

Major Requirements

Technical Core

EDU 119 - Intro to Early Child Educ **Credits: 4**

EDU 131 - Child, Family, and Community **Credits: 3**

EDU 153 - Health, Safety and Nutrition **Credits: 3**

EDU 234 - Infants, Toddlers, and Twos **Credits: 3**

EDU 234A- Infants, Toddlers, and Twos Lab

Credits / Units: 1

Other Major Requirements

EDU 144 - Child Development I **Credits: 3**

Total Credits: 17

Early Childhood Education, Preschool Certificate CTE Pathway(C55220PP)

This curriculum prepares individuals to work with preschool aged children (3-5) in diverse learning environments. Students will combine learned theories, competency-based knowledge, and practice in actual settings with preschool children.

Course work includes child growth and development, physical/nutritional needs of preschool children, safety issues in the care of preschool children; care and guidance; communication skills with families and children; design and implementation of appropriate curriculum; and other related topics.

Graduates should be prepared to plan and implement developmentally appropriate preschool programs in early childhood settings. Employment opportunities include child development and child care programs, preschools, public and private schools, recreational centers, Head Start Programs, and other preschool programs

Major Requirements

Required Courses

EDU 119 - Intro to Early Child Educ **Credits: 4**

EDU 131 - Child, Family, and Community **Credits: 3**

EDU 145 - Child Development II **Credits: 3**

EDU 146 - Child Guidance **Credits: 3**

EDU 153 - Health, Safety and Nutrition **Credits: 3**

Total Credits: 16

Electrical Systems Technology CTE Pathway (C35130CP)

This curriculum is designed to provide training for persons interested in the installation and maintenance of electrical systems found in residential, commercial, and industrial facilities.

Coursework, most of which is hands-on, will include such topics as AC/DC theory, basic wiring practices, programmable logic controllers, industrial motor controls, applications of the National Electric Code, and other subjects as local needs require.

Graduates should qualify for a variety of jobs in the electrical field as an on-the-job trainee or apprentice assisting in the layout, installation, and maintenance of electrical systems.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (13 credits)

DC/AC

ELC 112 - DC/AC Electricity **Credits: 5**

Motor Controls

ELC 117 - Motors and Controls **Credits: 4**

Required Courses

ELC 113 - Residential Wiring **Credits: 4**

Other Requirements (2 credits)

Industrial Safety

ISC 112 - Industrial Safety **Credits: 2**

Total Credits: 15

Electronics Engineering Drone Systems CTE Pathway(C40200DP)

A course of study that prepares the students to apply basic engineering principles and technical skills to become technicians who design, build, install, test, troubleshoot, repair, and modify developmental and production electronic components, equipment, and systems such as industrial/computer controls, manufacturing systems, communication systems, and power electronic systems. Includes instruction in mathematics, basic electricity, solid-state fundamentals, digital concepts, and microprocessors or programmable logic controllers. Graduates should qualify for employment as electronics engineering technician, field service technician, instrumentation technician, maintenance technician, electronic tester, electronic systems integrator, bench technician, and production control technician.

Major Requirements

Take 4 credits

ELC 131 - Circuit Analysis I **Credits: 4**

Other Major Requirements

Take 12 credits

ELN 152 - Fabrication Techniques **Credits: 2**

ELN 275 - Troubleshooting **Credits: 2**

UAS 110 - Intro to UAS Operations **Credits: 3**

UAS 111 - Unmanned Aircraft Systems **Credits: 3**

UAS 115 - Small UAS Certification **Credits: 2**

Total Credits: 16

Recommended Course Sequence

Fall Semester I

ELC 131 - Circuit Analysis I **Credits: 4**

ELN 152 - Fabrication Techniques **Credits: 2**

Spring Semester I

ELN 275 - Troubleshooting **Credits: 2**

UAS 110 - Intro to UAS Operations **Credits: 3**

UAS 111 - Unmanned Aircraft Systems **Credits: 3**

UAS 115 - Small UAS Certification **Credits: 2**

Emergency Management CTE Pathway (C55460CP)

The Emergency Management curriculum is designed to provide students with a foundation of technical and professional knowledge needed for emergency services delivery in local and state government agencies. Study involves both management and technical aspects of law enforcement, fire protection, emergency medical services, and emergency planning.

Course work includes classroom and laboratory exercises to introduce the student to various aspects of emergency preparedness, protection, and enforcement. Students will learn technical and administrative skills such as investigative principles, hazardous materials, codes, standards, emergency agency operations, and finance.

Employment opportunities include ambulance services, fire/rescue agencies, law enforcement agencies, fire marshal offices, industrial firms, educational institutions, emergency management offices, and other government agencies. Employed persons should have opportunities for skilled and supervisory-level positions.

Required Courses (15 credits)

EPT 120 - Sociology of Disaster **Credits: 3**
EPT 130 - Mitigation & Preparedness **Credits: 3**
EPT 140 - Emergency Management **Credits: 3**
EPT 210 - Response & Recovery **Credits: 3**
EPT 220 - Terrorism and Emer. Mgt. **Credits: 3**

Total Credits: 15

Fire Protection Technology CTE Pathway (C55240CP)

The Fire Protection Technology curriculum is designed to provide students with knowledge and skills in the technical, managerial, and leadership areas necessary for advancement within the fire protection community and related firefighting industries, and to provide currently employed firefighters with knowledge and skills often required for promotional consideration.

Course work includes diverse fire protection subject areas, including fire prevention and safety, public education, building construction, fire ground strategies and tactics, and local government finance and laws, as they apply to emergency services management. Emphasis includes understanding fire characteristics and the structural consequences of fire; risk assessment and management; and relevant research, communications, and leadership methodologies.

Employment opportunities exist with fire departments, governmental agencies, industrial firms, insurance rating organizations, and educational organizations.

Required Courses (12 credits)

FIP 120 - Intro to Fire Protection **Credits: 3**
FIP 124 - Fire Prevention & Public Ed **Credits: 3**
FIP 132 - Building Construction **Credits: 3**
FIP 220 - Fire Fighting Strategies **Credits: 3**

Other Major Requirements (3 credits)

FIP 162 - Firefighter Safety & Wellness **Credits: 3**

Total Credits: 15

Health and Fitness Science (Pathway)(C45630CP)

Major Requirements

Take the following courses:

HFS 110 - Exercise Science **Credits: 4**
HFS 111 - Fitness & Exer Testing I **Credits: 4**
HFS 120 - Group Exer Instruction **Credits: 3**
HFS 212 - Exercise Programming **Credits: 3**

Other Major Requirements

Take the following courses:

PED 110 - Fit and Well for Life **Credits: 2**
PED 119 - Circuit Training **Credits: 1**

Fall Semester

HFS 110 - Exercise Science **Credits: 4**
HFS 111 - Fitness & Exer Testing I **Credits: 4**
PED 110 - Fit and Well for Life **Credits: 2**

Spring Semester

HFS 120 - Group Exer Instruction **Credits: 3**
HFS 212 - Exercise Programming **Credits: 3**
PED 119 - Circuit Training **Credits: 1**

Healthcare Business Informatics CCP Certificate (C25510CP)

The Healthcare Business Informatics curriculum prepares individuals for employment as specialists in installation, data management, data archiving/retrieval, system design and support, and computer training for medical information systems.

Students learn about the field through multidisciplinary coursework including the study of terminology relating to informatics, systems analysis, networking technology, computer/network security, data warehousing, archiving and retrieval of information, and healthcare computer infrastructure support.

Graduates should qualify for employment as database/data warehouse analysts, technical support professionals, informatics technology professionals, systems analysts, networking and security technicians, and computer maintenance professionals in the healthcare field.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Required Courses (15 credits)

CTS 120 - Hardware/Software Support **Credits: 3**

HBI 110 - Issues and Trends in HBI **Credits: 3**

HBI 113 - Survey of Med Insurance **Credits: 3**

HMT 110 - Intro to Healthcare Mgt **Credits: 3**

MED 121 - Medical Terminology I **Credits: 3**

Other Major Requirements (3 credits)

CIS 111 - Basic PC Literacy **Credits: 2**

Total Credits: 17

Course Sequence

Fall I

CIS 111 - Basic PC Literacy **Credits: 2**

HBI 110 - Issues and Trends in HBI **Credits: 3**

MED 121 - Medical Terminology I **Credits: 3**

Spring I

CTS 120 - Hardware/Software Support **Credits: 3**

HBI 113 - Survey of Med Insurance **Credits: 3**

HMT 110 - Intro to Healthcare Mgt **Credits: 3**

Hospitality Management CTE Pathway (C21510CP)

This curriculum prepares individuals to understand and apply the administrative and practical skills needed for supervisory and managerial positions in hotels, motels, resorts, inns, restaurants, institutions, and clubs.

Course work includes guest services, leadership, management, restaurant operations, lodging operations, marketing, sanitation, food preparation, food and beverage management and other critical areas.

Graduates should qualify for management or entry-level supervisory positions in food and lodging operations, including restaurants, foodservice, beverage service, catering, front office, reservations and housekeeping. Opportunities are also available in product services, and technology support and sales.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (14 credits)

CUL 110 - Sanitation & Safety **Credits: 2**
HRM 110 - Intro to Hosp & Tourism **Credits: 3**
HRM 220 - Cost Control-Food & Bev **Credits: 3**
HRM 240 - Marketing for Hospitality **Credits: 3**
HRM 245 - Human Resource Mgmt-Hosp **Credits: 3**

Other Required Hours (2 credits)

CUL 110A - Sanitation & Safety Lab **Credits: 1**
HRM 220A - Cost Control-Food & Bev Lab **Credits: 1**

Total Credits: 16

Human Services Technology, Substance Abuse CTE Pathway Certificate (C4538ECP)

The Human Services Technology/Substance Abuse concentration prepares students to assist in drug and alcohol counseling, prevention-oriented educational activities, rehabilitation with recovering clients, managing community-based programs, counseling in residential facilities, and pursuit of four-year degrees.

Course work includes classroom and experiential activities oriented toward an overview of chemical dependency, psychological/sociological process, the twelve Core Functions, intervention techniques with individuals in groups, and follow-up activities with recovering clients.

Graduates should qualify for positions as substance abuse counselors, DUI counselors, halfway house workers, residential facility employees, and substance education specialists. With educational and clinical experiences, graduates can obtain certification by the North Carolina Substance Abuse Board.

Major Requirements (13 credits)

Take:
HSE 110 - Intro to Human Services **Credits: 3**
HSE 112 - Group Process I **Credits: 2**
HSE 123 - Interviewing Techniques **Credits: 3**

HSE 210 - Human Services Issues **Credits: 2**

HSE 225 - Crisis Intervention **Credits: 3**

Total Credits: 13

Information Technology, CyberSecurity & Networking-CTE Certificate Pathway (C25590CP)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

Major Requirements (12 credits)

Technical Core (12 credits)

Take 12 credits:

NET 125 - Introduction to Networks **Credits: 3**

NET 126 - Switching and Routing **Credits: 3**

CTI 120 - Network & Sec Foundation **Credits: 3**

SEC 110 - Security Concepts **Credits: 3**

Total Credits: 12

Recommended Course Sequence

Fall Semester

CTI 120 - Network & Sec Foundation **Credits: 3**

NET 125 - Introduction to Networks **Credits: 3**

Spring Semester

NET 126 - Switching and Routing **Credits: 3**

SEC 110 - Security Concepts **Credits: 3**

Information Technology, Software & Web Development CTE Pathway (C25590EP)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Course Requirements

CIS 115 - Intro to Prog & Logic **Credits: 3**

CSC 120 - Computing Fundamentals I **Credits: 4**

DBA 120 - Database Programming I **Credits: 3**

WEB 115 - Web Markup and Scripting **Credits: 3**

Total Credits: 13

Recommended Course Sequence

Fall Semester I

CIS 115 - Intro to Prog & Logic **Credits: 3**

DBA 120 - Database Programming I **Credits: 3**

Spring Semester I

CSC 120 - Computing Fundamentals I **Credits: 4**

WEB 115 - Web Markup and Scripting **Credits: 3**

Interior Design CTE Pathway (C30220CP)

The Interior Design curriculum is designed to prepare students for a variety of job opportunities in the field of both residential and non-residential interior design. The focus of the studies is technical knowledge, professional practices, and aesthetic principles and design process.

Curriculum content includes residential and non-residential interior design, architectural drafting, computer-aided design, and universal design. Also included are basic design, code standards, history of interiors and furnishings, color theory, products, professional practices, visual presentations, and sustainable principles.

Graduates should qualify for interior design opportunities in numerous residential and commercial environments such as hospitality, corporate, mercantile, educational, and healthcare. Interior designers also have employment opportunities in real estate, entertainment, visual merchandising, government, sales and marketing, and other specialties dealing with interiors.

Major Requirements (13 credits)

Required Courses

Take 13 credits:

DES 110 - Architectural Graphics **Credits: 2**

DES 120 - CAD for Interior Design **Credits: 2**

DES 125 - Visual Presentation I **Credits: 2**

DES 135 - Prin & Elem of Design I **Credits: 4**

DES 220 - Interior Design Fundamentals **Credits: 3**

Total Credits: 13

Fall Semester I

DES 110 - Architectural Graphics **Credits: 2**

DES 125 - Visual Presentation I **Credits: 2**

DES 135 - Prin & Elem of Design I **Credits: 4**

Spring Semester I

DES 120 - CAD for Interior Design **Credits: 2**

DES 220 - Interior Design Fundamentals **Credits: 3**

IT Systems Administration CTE Pathway (C25590FP)

The Information Technology (IT) curriculum prepares graduates for employment in the technology sector as designers, testers, support technicians, system administrators, developers, or programmers who use computer software and/or hardware to design, process, implement and manage information systems in specialties such as database services, security, business intelligence, healthcare informatics and others depending on the technical path selected within this curriculum.

Course work includes development of a student's ability to create, store, communicate, exchange and use information to solve technical issues related to information support and services, interactive media, network systems, programming and software development, information security and other emerging technologies based on the selected area of study.

Graduates should qualify for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to design and manage information. The program will incorporate the competencies of industry-recognized certification exams.

Technical Core (12 credits)

CTI 120 - Network & Sec Foundation **Credits: 3**

CTS 120 - Hardware/Software Support **Credits: 3**

CTS 220 - Adv Hard/Software Support **Credits: 3**

DBA 210 - Database Administration **Credits: 3**

Total Credits: 12

Fall Semester

CTS 120 - Hardware/Software Support **Credits: 3**

CTI 120 - Network & Sec Foundation **Credits: 3**

Spring Semester

CTS 220 - Adv Hard/Software Support **Credits: 3**

DBA 210 - Database Administration **Credits: 3**

Landscape Gardening Certificate CTE Pathway (C15260CP)

A program that prepares individuals to manage and maintain indoor and/or outdoor ornamental and recreational plants and groundcovers and related conceptual designs established by landscape architects, interior designers, enterprise owners or managers, and individual clients. Potential course work includes instruction in applicable principles of horticulture, gardening, plant and soil irrigation and nutrition, turf maintenance, plant maintenance, equipment operation and maintenance, personnel supervision, and purchasing.

Required Courses (14 credits)

LSG 111 - Basic Landscape Technique **Credits: 2**

LSG 121 - Fall Gardening Lab **Credits: 2**

HOR 160 - Plant Materials I **Credits: 3**

HOR 164 - Hort Pest Management **Credits: 3**

TRF 110 - Intro Turfgrass Cult & ID **Credits: 4**

Total Credits: 14

Landscape Gardening, Design Certificate (C15260LD)

These curricula are designed to prepare individuals for various careers in horticulture. Classroom instruction and practical laboratory applications of horticultural principles and practices are included in the program of study.

Course work includes plant identification, pest management, plant science and soil science. Also included are courses in sustainable plant production and management, landscaping, and the operation of horticulture businesses.

Graduates should qualify for employment in a variety of positions associated with nurseries, garden centers, greenhouses, landscape operations, governmental agencies/parks, golf courses, sports complexes, highway vegetation, turf maintenance companies, and private and public gardens. Graduates should also be prepared to take the North Carolina Pesticide Applicator's Examination and/or the North Carolina Certified Plant Professional Examination.

Major Requirements (18 credits)

HOR 112 - Landscape Design I **Credits: 3**

HOR 114 - Landscape Construction **Credits: 3**

HOR 160 - Plant Materials I **Credits: 3**

HOR 161 - Plant Materials II **Credits: 3**

HOR 162 - Applied Plant Science **Credits: 3**

HOR 213 - Landscape Design II **Credits: 3**

Total Credits: 18

Recommended Course Sequence

Fall Semester I

HOR 112 - Landscape Design I **Credits: 3**
HOR 114 - Landscape Construction **Credits: 3**
HOR 160 - Plant Materials I **Credits: 3**
HOR 162 - Applied Plant Science **Credits: 3**

Spring Semester I

HOR 161 - Plant Materials II **Credits: 3**
HOR 213 - Landscape Design II **Credits: 3**

Landscape Gardening, Horticulture Production Certificate (C15260HP)

A program that focuses on the general production and management of cultivated plants, shrubs, flowers, foliage, trees, groundcovers, and related plant materials; the management of technical and business operations connected with horticultural services; and the basic scientific principles needed to understand plants and their management and care.

Required Courses (15 credits)

HOR 124 - Nursery Operations **Credits: 3**
HOR 134 - Greenhouse Operations **Credits: 3**
HOR 162 - Applied Plant Science **Credits: 3**
HOR 164 - Hort Pest Management **Credits: 3**
HOR 168 - Plant Propagation **Credits: 3**

Total Credits: 15

Recommended Course Sequence

Fall Semester I

HOR 124 - Nursery Operations **Credits: 3**
HOR 162 - Applied Plant Science **Credits: 3**
HOR 168 - Plant Propagation **Credits: 3**

Spring Semester I

HOR 134 - Greenhouse Operations **Credits: 3**

HOR 164 - Hort Pest Management **Credits: 3**

Landscape Gardening, Sustainable Gardening CTE Pathway(C15260SP)

These curricula are designed to prepare individuals for various careers in horticulture. Classroom instruction and practical laboratory applications of horticultural principles and practices are included in the program of study. Course work includes plant identification, pest management, plant science and soil science. Also included are courses in sustainable plant production and management, landscaping, and the operation of horticulture businesses. Graduates should qualify for employment in a variety of positions associated with nurseries, garden centers, greenhouses, landscape operations, governmental agencies/parks, golf courses, sports complexes, highway vegetation, turf maintenance companies, and private and public gardens. Graduates should also be prepared to take the North Carolina Pesticide Applicator's Examination and/or the North Carolina Certified Plant Professional Examination.

Major Requirements

Pest Management

HOR 164 - Hort Pest Management **Credits: 3**

Horticulture Technology

HOR 162 - Applied Plant Science **Credits: 3**

Landscape Gardening

HOR 134 - Greenhouse Operations **Credits: 3**

LSG 121 - Fall Gardening Lab **Credits: 2**

Other Major Requirements

AGR 139 - Intro to Sustainable Ag **Credits: 3**

Total Credit Hours: 14

Marine Technology Certificate CTE Pathway (C15320CP)

These curricula prepare individuals for a variety of marine-related occupations such as marine conservation, water analysis, marine scientific research support and commercial fishing. Individuals will

be prepared as naturalists within the ecotourism industry and be trained in observational and measurement techniques aboard a variety of vessels including ocean-going research vessels.

Course work includes a unique blend of traditional and contemporary vocational, technical, and scientific marine education. Course work specific for Marine Sciences includes instruction in biological sciences, environmental sciences, and marine sciences. Field and laboratory experiences prepare students to identify, observe, and collect scientific data associated with the fauna and flora found in the rivers, estuaries, sounds, and ocean. Course work in Marine Technologies includes instruction in the use of physical, chemical, meteorological, biological, and geological oceanographic instrumentation and sampling equipment.

Graduates are prepared for employment opportunities with aquariums, fisheries, corps of engineers, marine patrol, ecotourism companies, commercial fishing industries, entry-level field or laboratory positions with industries, state and federal agencies, and educational facilities associated with marine science and research. Career opportunities include oceanography, environmental science, marine biology, geophysical exploration, and fisheries-related employment.

Marine Technology: A program that provides the practical and academic skills essential for success in marine scientific support. Training in the operation and maintenance of seismic and hydrographic instrumentation including: side scan sonar, multibeam echo sounders, and sub-bottom profilers is provided in the classroom and underway at sea. Additional course work includes: classic and digital navigation techniques, practical applications of boat handling, seamanship, marlinspike seamanship, and safety at sea. Instruction applicable to fisheries science and environmental assessment is provided.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Major Requirements (16 credits)

- MSC 132 - Fishing Gear Tech I **Credits: 3**
- MSC 150 - Marine Navigation **Credits: 3**
- MSC 160 - Oceanography **Credits: 3**
- MSC 172 - Marine Biology **Credits: 3**
- MSC 276 - Marine Vertebrate Zoo **Credits: 4**

Total Credits: 16

Recommended Course Sequence

Fall Semester I

MSC 132 - Fishing Gear Tech I **Credits: 3**

MSC 160 - Oceanography **Credits: 3**

MSC 172 - Marine Biology **Credits: 3**

Spring Semester I

MSC 150 - Marine Navigation **Credits: 3**

MSC 276 - Marine Vertebrate Zoo **Credits: 4**

Mechanical Engineering Technology Certificate CTE Pathway (C40320CP)

A course of study that prepares the students to use basic engineering principles and technical skills to design, develop, test, and troubleshoot projects involving mechanical systems. Includes instruction in principles of mechanics, applications to specific engineering systems, design testing procedures, prototype and operational testing and inspection procedures, manufacturing system-testing procedures, test equipment operation and maintenance, computer applications, critical thinking, planning and problem solving, and oral and written communications. Graduates of the curriculum will find employment opportunities in the manufacturing or service sectors of engineering technology. Engineering technicians may obtain professional certification by application to organizations such as ASQC, SME, and NICET.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

Mechatronics Engineering Technology Automation CCP (C40350MP)

A course of study that prepares the students to use basic engineering principles and technical skills in developing and testing automated, servomechanical, and other electromechanical systems. Includes instruction in prototype testing, manufacturing and operational testing, systems analysis and maintenance procedures. Graduates should be qualified for employment in industrial maintenance and manufacturing including assembly, testing, startup, troubleshooting, repair, process improvement, and control systems, and should qualify to sit for Packaging Machinery Manufacturers Institute (PMMI) mechatronics or similar industry examinations.

Major Requirements (14 Credits)

ATR 112 - Intro to Automation **Credits: 3**

ELC 131 - Circuit Analysis I **Credits: 4**

Medical Assisting CTE Pathway (C45400CP)

The Medical Assisting curriculum prepares multi-skilled health care professionals qualified to perform administrative, clinical, and laboratory procedures.

Course work includes instruction in scheduling appointments, coding and processing insurance accounts, billing, collections, computer operations; assisting with examinations/treatments, performing routine laboratory procedures, electrocardiography, supervised medication administration; and ethical/legal issues associated with patient care.

Graduates of CAAHEP-accredited medical assisting programs may be eligible to sit for the American Association of Medical Assistants' Certification Examination to become Certified Medical Assistants. Employment opportunities include physicians' offices, health maintenance organizations, health departments, and hospitals.

Major Requirements (12 Credits)

MED 110 - Orientation to Med Assist **Credits: 1**
MED 118 - Medical Law and Ethics **Credits: 2**

Medical Office Administration Certificate CTE Pathway (C25310CP)

The Medical Office Administration curriculum prepares individuals for employment as medical administrative personnel in the areas of medical office, medical billing and coding, dental office, patient services, and medical documents.

Course work includes medical terminology, computer applications, medical office management, medical coding, medical insurance and billing, medical legal and ethical issues, oral and written communication, and other topics depending on the subject area selected within this curriculum.

Graduates should qualify for employment opportunities in a variety of medical office positions in medical and dental offices, hospitals, insurance companies, laboratories, medical supply companies, and other healthcare related organizations. Upon graduation, students may be eligible to sit for industry recognized certification exams.

Although placement testing is not required for this particular pathway, some of the classes within this pathway do require certain math or reading levels and therefore would require a placement test or other testing scores before registration. Please check each course within this pathway to see which applies.

CIS 110 - Introduction to Computers **Credits: 3**

Spring Semester I

OST 149 - Medical Legal Issues **Credits: 3**

BIO 163 - Basic Anat & Physiology **Credits: 5**

Nuclear Technology CCP Pathway (C50460CP)

The Nuclear Technology curriculum prepares individuals to become qualified reactor field technicians who are employed by licensed nuclear reactor facilities.

Course work includes theory and application related to industrial and engineering technology disciplines including nuclear reactor theory, reactor systems, industrial and nuclear safety, instrumentation, electrical generation, automation and robotics, and may include quality control, welding, and various metallurgical inspection procedures.

Upon completion, graduates should qualify as entry-level nuclear reactor technicians and have academic preparations to advance into other industrial or engineering technician positions within the commercial nuclear power industry.

Required Courses (13 Credits)

CIS 110 - Introduction to Computers **Credits: 3**

HYD 110 - Hydraulics/Pneumatics I **Credits: 3**

NUC 110 - Nuclear Reactor Systems **Credits: 3**

WLD 112 - Basic Welding Processes **Credits: 2**

WLD 143 - Welding Metallurgy **Credits: 2**

Total Credits: 13

Paralegal Technology CCP (C25380CP)

The Paralegal Technology curriculum prepares individuals to work under the supervision of attorneys by performing routine legal tasks and assisting with substantive legal work. A paralegal/legal assistant may not practice law, give legal advice, or represent clients in a court of law.

Course work includes substantive and procedural legal knowledge in the areas of civil litigation, legal research and writing, real estate, family law, wills, estates, trusts, and commercial law. Required courses

also include
subjects such as English, mathematics, and computer utilization.

Graduates are trained to assist attorneys in probate work, investigations, public records search, drafting and filing legal documents, research, and office management. Employment opportunities are available in private law firms, governmental agencies, banks, insurance agencies, and other business organizations.

Major Requirements (14 Credits)

LEX 110 - Intro to Paralegal Study **Credits: 2**
LEX 120 - Legal Research/Writing I **Credits: 3**
LEX 130 - Civil Injuries **Credits: 3**
LEX 150 - Commercial Law I **Credits: 3**
LEX 210 - Real Property I **Credits: 3**

Other Major Requirements (3 Credits)

LEX 160 - Criminal Law & Procedure **Credits: 3**

Total Credits: 17

Plumbing Certificate CTE Pathway (C35300CP)

A program that prepares individuals to work in the field of plumbing by applying technical knowledge and skills to lay out, assemble, install, and maintain piping fixtures and systems for natural gas, lp gas, hot water, drainage, sprinkling, and plumbing processing systems in residential and commercial environments. Includes instruction in source determination, water service and distribution, waste removal, pressure adjustment, basic physics, technical mathematics, print reading, pipe installation, pumps, soldering, plumbing inspection, and applicable codes and standards.

Required Courses

BPR 130 - Print Reading-Construction **Credits: 3**
PLU 110 - Modern Plumbing **Credits: 9**

Other Required Courses

PLU 140 - Intro to Plumbing Codes **Credits: 2**
PLU 150 - Plumbing Diagrams **Credits: 2**

Total Credits: 16

Welding Technology CTE Certificate Pathway (C50420CP)

The Welding Technology curriculum provides students with a sound understanding of the science, technology, and applications essential for successful employment in the welding and metalworking industry.

Instruction includes consumable and non-consumable electrode welding and cutting processes. Courses may include math, print reading, metallurgy, welding inspection, and destructive and non-destructive testing providing the student with industry-standard skills developed through classroom training and practical application.

Graduates of the Welding Technology curriculum may be employed as entry-level technicians in welding and metalworking industries. Career opportunities also exist in construction, manufacturing, fabrication, sales, quality control, supervision, and welding-related self-employment.

Major Requirements (15 credits)

WLD 110 - Cutting Processes **Credits: 2**

WLD 115 - SMAW (Stick) Plate **Credits: 5**

WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**

WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

Total Credits: 15

Fall Semester I

WLD 110 - Cutting Processes **Credits: 2**

WLD 115 - SMAW (Stick) Plate **Credits: 5**

Spring Semester I

WLD 116 - SMAW (stick) Plate/Pipe **Credits: 4**

WLD 121 - GMAW (MIG) FCAW/Plate **Credits: 4**
